U.S. COIN AUCTION

APRIL 25-26 & 28, 2019 | CSNS | CHICAGO

4737

# U.S. Coins

Featuring: The Chinook Collection • The William Rehwald Proof Set Collection • Selections from the Jim O'Neal Collection • The Perfection Collection of DMPL/Prooflike Morgan Dollars • The Jersey Shore Gold Collection • The Uptown Collection of Bechtler Territorial Gold • The Marcello Collection, Part VI • The Jack-The-Knife Collection of Lincoln Cents • The Cedar Crest Collection, Part I • The Lake County Collection • The Morris Collection

April 25-26 & 28, 2019 | Chicago

## FLOOR Signature® Sessions 1-4

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Renaissance Schaumburg Convention Center  
Utopia Ballroom C  
1551 North Thoreau Drive • Schaumburg, IL 60173

### Session 1

Thursday, April 25 • 1:00 PM CT • Lots 3001-3661

Session 2 - PLATINUM NIGHT (See separate catalog)

Thursday, April 25 • 7:00 PM CT • Lots 3662-3989

### Session 3

Friday, April 26 • 1:00 PM CT • Lots 3990-4587

### Session 4

Friday, April 26 • 6:00 PM CT • Lots 4588-5242

## INTERNET Signature® Session 5

(HERITAGELive!®, Internet, Fax, & Mail only Session)

### Session 5

Sunday, April 28 • 12:00 PM CT • Lots 7001-8767

## LOT SETTLEMENT AND PICK-UP

Friday, April 26 • 10:00 AM – 1:00 PM CT

Saturday, April 27 • 9:00 AM – 12:00 PM CT

Extended Payment Terms available. Email: [Credit@HA.com](mailto:Credit@HA.com)

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

### Buyer's Premium Per Lot:

This auction is subject to a Buyer's Premium of 20% (minimum \$19) per lot.

## BIDDING METHODS

### HERITAGE Live!®<sup>1</sup> Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at [HA.com/Live](http://HA.com/Live)

### Live Floor Bidding

Bid in person during the floor sessions.

### Live Telephone Bidding (Floor Sessions Only)

Phone bidding must be arranged 24 hours before your session begins. Client Service: 866-835-3243

### Internet Absentee Bidding

Proxy bidding ends ten minutes prior to the session start time. Live Proxy bidding continues through the session. [HA.com/1294](http://HA.com/1294)

### Fax Bidding

Fax bids must be received 24 hours before your session begins. Fax: 214-409-1425

Phone: 214-528-3500 • 877-HERITAGE (437-4824)

Fax: 214-409-1425

Direct Client Service Line: 866-835-3243

Dear Bidder,

Welcome to Central States and Heritage's Official Auction! This year, the Central States Numismatic Society Convention marks its 80th anniversary. Heritage Auctions is proud to be part of the Midwest's premier numismatic event, and it is our pleasure and privilege to be the Official Auctioneer once again. It is always one of the top numismatic venues of the year.

We have a strong core of Featured Collections that will attract your interest and challenge your bidding skills.

## The Chinook Collection

Our consignor is an avid fisherman and outdoorsman who loves the Pacific Northwest. Chinook salmon provide one of his favorite challenges, routinely tipping the scales anywhere from 10 to 25 pounds, and sometimes they get much larger. (Chinook weighing upwards of 100 pounds are reported, although they are rare that large). The three dollar gold series is replete with its own rarities in both circulation strike and proof formats, and that popular series forms the largest part of The Chinook Collection. Three dollar gold is a long-running series where low mintages are the rule, rather than the exception. Examples are especially challenging in mid-to-high Mint State grades, and proofs for most dates are rare at any level. The Chinook Collection is virtually complete by date and mint. Some important three dollar patterns include a trio of 1869 pieces in copper and aluminum ... a rare 1868 aluminum Judd-655 from the Pittman Collection ... an 1867 three dollar struck in nickel (PR58, Judd-655, R.8) ... and an 1875 three dollar struck in gilt copper, representing the 1875 date in this high-grade collection. A handful of nice double eagles supplements The Chinook Collection, including an 1869 PR64 PCGS aluminum double eagle (Judd-785, high R.7), with CAC endorsement. We suggest you cast several aggressive bids at lots within The Chinook Collection, which will improve your odds of reeling in a "lunker rarity" from this outstanding collection.

## The William Rehwald Proof Set Collection

We are privileged to offer a large and essentially complete set of proofs dated 1859 to 1916 -- nearly all in the PR64 grade -- covering the copper, nickel, and silver denominations, and lacking only a few ultra-rare or esoteric proofs. Formed over a period of 30+ years, this set offers exceptional quality for the grade, and is almost entirely housed in older-generation holders, as explained by our consignor:

"I'm Bill Rehwald, born and raised in Santa Monica, California. My love of coins was handed down to me from my dad, John Rehwald. I remember scouring bank rolls for coins to fill the press-in slots of Whitman albums, and I remember receiving the Boy Scout Coin Collecting merit badge as a young man! My dad, god bless him, never met a telemarketer he didn't like. I cannot tell you how many items like proof sets from Trinidad and Tobago, coins from Israel, and "battleship" one-ounce silver ingots from the Franklin Mint, he had stashed away. In fact, my dad's collecting was so prolific, that after his passing, we had boxes and boxes of stamps and coins, unopened, to sort through. Many thanks to John McIntosh for help us find new homes for all of that material.

"As I progressed through the better numismatic items from Dad's collection, I always thought of someday collecting coins myself. When PCGS burst upon the scene, I remember buying MS65 common date Morgan dollars for way too much money (being certified, they were perceived as being 'rare'). It was in the mid-1980s that I decided to pursue a collection of coins that was attainable, reasonably priced, and but still very nice coins. I settled on proof coins in the PR64 grade, from 1859 to 1916. I wanted proofs in all denominations -- except for gold, and what I call the esoteric one offs such as the 1884 and 1885 Trade dollars, which did not fit my 'reasonably priced' definition. I stuck to my PR64 limit with only a few exceptions; for example, the short sets in PR66

for 1936 thru 1942, and 1950 thru 1952. Time and again, I saw that PR64 coins were much nicer than the '63s, and in an excellent price range. At one time or another, I purchased every proof date and denomination that fit my parameters from 1859 thru 1916. I cannot tell you how many times, as was perusing the bourse (mostly at Long Beach) I was offered a coin that I needed, but as a PR63 or PR65. I would only buy a PR64. The hardest coins in the set to find were two of the 1878 Morgan dollar varieties, and of course, the coveted 1895 Morgan dollar.

"I mostly enjoy brilliant white proofs, although there are some attractively toned coins in my collection, too. I only purchased the 'right' coins, rather than just filling the slot. I believe, as you look at the coins in the collection, that you will appreciate a discerning eye (even if I do say so myself). I am sure many of my coins will upgrade, as about half of the collection are CAC coins, and nearly all of the coins are in old holders from 20+ years ago. I really enjoyed pursuing the proofs, and forming this set over the last 30-plus years. The collection certainly demonstrates this, and I hope you will enjoy these proofs as much as I have. Going forward, my latest endeavor is completing one of the top ten Peace dollar collections.

"Many, many thanks to the various dealers who reliably went to the Long Beach show year after year, and scouted out coins for me. You know who you are, and without your help, critical eye, guidance, and counsel this collection would never have been possible.

"My business life has been, and still is, consumed by the automobile and real estate businesses. My family has owned various franchises -- starting in 1937, with Packard, Studebaker, Rambler, Dodge, SAAB, and finally for the past 48 years, Mercedes-Benz automobiles. My life is in the car business, and it is said that I bleed Mercedes blue. I have three wonderful grown children, and reside with my lovely partner, Linda, in Pacific Palisades, California."

## Selections from the Jim O'Neal Collection

Longtime Heritage friend, consignor, and client Jim O'Neal brings yet another fantastic collection to our Official Central States Signature auction. Jim is the former President and CEO of Frito-Lay International and a retired PepsiCo executive. This is (by latest count) his eleventh Heritage consignment -- an impressive group of early half dollars, Bust halves, and Seated halves. All are in remarkably high-grade, circulation strike format, and most have notable pedigrees that accompany their high rankings in the Condition Census for the date and/or variety. Half dollar specialists will not want to miss 15 selections that highlight Thursday afternoon's Floor Session 1, followed by 30 more lots in Thursday evening's Platinum Night -- more than 80% of the early, Bust, and Seated half dollars that qualify for inclusion in the high-value Platinum Night lineup come from Jim O'Neal's collection. Nearly every example is high Condition Census for the variety, many with impressive pedigrees. All have outstanding eye appeal.

## The Perfection Collection of DMPL/Prooflike Morgan Dollars

Previous consignments from this long-time Heritage client have never failed to live up to the "Perfection" billing. In fact, the Mr. Perfection namesake appears frequently among All-Time Finest and Current Finest PCGS Set Registry categories for different denominations and collecting interests. The #4 ranking in the Morgan Dollars Prooflike Basic Set, Circulation Strikes (1878-1921, both All-Time and Current) serves as a foundation for many of the 58 selections included in the current consignment. These are exceptional Morgan dollars, most with prooflike or deep mirror prooflike finishes, plus a few additional key-date silver dollars in high-end circulation strike format. We note an 1883 dollar, MS66 PCGS Deep Mirror Prooflike, Ex: D.L. Hansen Collection, with none certified finer. Likewise, an 1883-O dollar has similar credentials, certified MS66+ Deep Mirror Prooflike PCGS, CAC, with spectacular cameo contrast. We encourage Morgan dollar enthusiasts to study each lot -- this collection will provide upgrades for even the finest and most-advanced sets.

## The Jersey Shore Gold Collection

Although focused on mid-to-late 1800s and early 1900s U.S. gold, The Jersey Shore Gold Collection adds a few patterns and assorted gold type to a long list of Mint State or nearly Mint State Liberty Head and Saint-Gaudens gold. Selections from the collection appear in every floor session including Platinum Night, as well as several sharp gold pieces in the online Signature® Internet session. This carefully assembled collection includes numerous better dates and conditionally scarce examples, with a keen eye for visual appeal and collector-preferred dates and grades. Carson City gold figures prominently among the various gold denominations, as do selected dates and denominations from the other branch mints. Platinum Night includes a near-Mint State 1854-O three dollar gold piece, popular as the sole O-mint issue in the series. We also note a particularly nice 1884-CC eagle -- rare in Mint State -- graded MS61 NGC with gleaming, orange-gold surfaces. Its counterpart 1884-CC double eagle is a favorite Carson City date in Mint State and rare any finer, certified MS62 NGC. Numerous prooflike gold pieces stand out throughout the collection.

## The Uptown Collection of Bechtler Territorial Gold

Platinum Night offers a terrific selection of Territorial gold, including a fine collection of rare varieties from the private mint founded by Christopher Bechtler and his family. The Bechtler mint is one of the most interesting and certainly the longest-running of all private mints from the 1830s to the 1850s, when the nation saw two important gold rush periods -- one in the East, the other in the West. The Eastern gold rush was localized in the rural Piedmont/Appalachian areas of North Carolina, South Carolina, and Georgia, where the North Carolina Bechtler mint struck gold dollars, quarter eagles, and half eagles from the 1830s until the mid-1850s, including many rare varieties eagerly sought by Territorial gold specialists. This consignment includes key varieties from all of the Bechtler denominations and striking periods, including a rare C. Bechtler quarter eagle, Kagin-9, XF40 PCGS, Star in Field over 75 G., an R.7 variety with just a half dozen pieces known.

## The Marcello Collection, Part VI

The few Blake & Co. gold ingots that exist are extremely popular with collectors, not only for their rarity, but also for their appearance. The polished surfaces are bright and smooth, and the raw edges nicely beveled -- perhaps a sign that the ingots were designed to change hands in commerce. Blake & Co. ingots from The Marcello Collection are favored far beyond their size and weight by collectors. We are pleased to bring an equally exceptional ingot to Central States, where a record price may be in the offing for this 19.15 ounce ingot. Lettering is sharply stamped front, top, and bottom, while the back side shows seabed encrustation with tiny gold flakes -- like toasted oats on a muffin -- a reminder of the shower of gold that accompanied the wreck of the S.S. Central America.

## The Jack-The-Knife Collection of Lincoln Cents

The average grade of this splendid, PCGS-graded Lincoln cent collection is MS67, with all of the copper pieces receiving the Red color designation. Focused on key Lincoln cent dates and mints, the collection includes a stunning 1909-S MS67 Red PCGS, Ex: Jack Lee ... a 1913 MS67 Red PCGS ... the 1913-D MS66+ Red PCGS ... the key 1914-D MS65 Red PCGS ... a Superb 1921 MS68 Red PCGS ... a 1923-S MS65 Red PCGS ... an amazing 1924-D MS65 Red PCGS, Ex: Tom Mershon Collection ... a 1924-S MS65 Red PCGS ... and a 1925-S MS65 Red PCGS, Ex: Jack Lee. Several other coins rate as either the finest-known in Red format, or tied at the top of the Condition Census. Each of the 35 lots is a solid candidate for Registry Set inclusion.

## The Cedar Crest Collection, Part I

High-grade commemorative silver makes up the entirety of The Cedar Crest Collection, Part I -- with the lots divided between Floor Session 3 and the online Signature® Internet session. Advanced classic commemorative collections require Gem, Premium Gem, or Superb Gem examples (depending on the issue) to rank among the finest sets. Nuances of surface quality, eye appeal, and grade make all the difference. This is an extraordinary collection in that regard. Amazingly, 34 of the 36 pieces have CAC endorsement, more than half carry the PCGS Plus designation, and 21 coins are certified MS67 or MS67+. Two pieces are MS65 or MS65+, and the rest are MS66 or MS66+. Eye appeal is excellent, with beautiful border toning around lightly toned centers the rule.

## The Lake County Collection

This interesting little type set runs a gamut of grades and denominations. A mere dozen coins do the job, ranging from a Good 6 1796 dime to a pair of VG coins (a Classic Head half eagle and an early half dime) to a nice collector-grade Flowing Hair dollar certified Fine 12 NGC. A Fine 15 Flowing Hair half dime takes up that rung on the grading ladder, followed by an 1805 Draped Bust half dollar, O-110 (R.5) certified VF35 NGC. An XF45 1874-CC double eagle comes next, then two AU58 coins -- an 1883-CC five dollar gold, and a pleasing 1852 ten dollar gold piece. The set concludes with a trio of Mint State coins, including an 1878-S Trade dollar certified MS62 NGC, an 1888-O MS62 NGC eagle, and a splendid MS67★ NGC three cent silver.

## The Morris Collection

An eclectic group of type coins makes up The Morris Collection, with a preference for early type. Highlights include a 1795 Flowing Hair half dollar, O-106, certified VF25 PCGS -- a coin that sneaks into the low-end of the Condition Census for the variety. A 1795 B-1, BB-21 Flowing Hair dollar represents the Two Leaves type, graded Fine 15 PCGS. An 1891-CC five dollar gold piece grades MS62 PCGS, and is a sharp Carson City type coin for a Mint State collection.

Heritage Auctions will be prominent at the Renaissance Convention Center throughout the CSNS event, manning our location on the bourse and always ready to be of service to answer any questions you might have about bidding, lot viewing, or to discuss your collecting interests in general. If you would like to talk about a future consignment, we can discuss that as well -- either at our tables, or in private. While you are in the greater Chicago area, our office near the downtown Loop at 215 W. Ohio Street is also available.

Heritage makes it easy to place your bids either before or during the auction. If you are at the Convention, please plan to attend one or more of our floor sessions -- there is nothing like the action of a well-attended live auction. Live telephone bidding and interactive online bids through HERITAGELive!® are second to none in the industry, and available to you wherever you are in the world with real-time phone or computer bidding. As always, we can accept your bids via e-mail, fax, or regular mail before the auction.

One way or the other, please put our auction dates and times on your calendar, and do not miss a minute of the action. We hope to see you in the Windy City, and wish you the best of luck with your bids.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Greg'.

# SESSION ONE

## COLONIALS

1652 Pine Tree Shilling, VF35  
Small Planchet, Noe-29, W-930

- 3001** 1652 Pine Tree Shilling, Small Planchet, VF35 PCGS. Noe-29, W-930, Salmon 11-F, R.3. 70.68 grains. The L in ENGLAND is directly over the 5, and the W in NEW is left of the X. Although this is called the Heavy 5 variety, the strength of that digit matches the others in the date. The obverse is struck off-center toward 9 o'clock, cutting off most of MASAT, but the visible motifs are strong. Several die cracks are noted. The reverse is nicely centered with softness on the lower border. Each side features deep stone-gray surfaces. Listed on page 51 of the 2019 *Guide Book*. NGC ID# 2ARZ, PCGS# 24

1694 Elephant Token, VF20  
GOD PRESERVE CAROLINA  
PROPRIETORS, W-12120

- 3002** 1694 Carolina Elephant Token, PROPRIETORS, VF20 PCGS. Hodder 2-F, W-12120, R.6. The GOD PRESERVE LONDON elephant tokens are regularly encountered, but the three varieties of greatest interest to Early American collectors are each formidable rarities. There are only three known examples of Hodder 2-G, the GOD PRESERVE NEW ENGLAND variety. Two GOD PRESERVE CAROLINA varieties exist. The extremely rare Hodder 1-E refers to the LORDS PROPRIETERS. The very rare Hodder 2-F shares the same reverse die but was struck after the second E in PROPRIETERS was overpunched with the letter O. The present piece is the PROPRIETORS variety. The deep brown surfaces are evenly defined with all legends bold. Marks are limited to a few trivial ticks, though the surfaces are lightly to moderately porous. Listed on page 59 of the 2019 *Guide Book*. NGC ID# 2ATW, PCGS# 73

**1723 Hibernia Farthing in Silver, SP64  
M. 3.2-Bc.10, W-12500**

- 3003 1723 Hibernia Pattern Farthing, Silver SP64 PCGS. M. 3.2-Bc.10, W-12500, R.5.** Breen-173, "very rare." Close DEI GRATIA. According to Breen, "About 20 pieces turned up in England, 1971," a quantity insufficient to satisfy the growing number of Early American collectors. Lovely orange-gold and ocean-blue endow this prooflike and needle-sharp Hibernia pattern. A small planchet flaw (as struck) is located in the field near the chin and a tiny roundish depression on the King's cheek are mentioned for the sake of future pedigree researchers. Listed on page 56 of the 2019 *Guide Book*. Population: 10 in 64 (2 in 64+), 5 finer (3/19). NGC ID# 2AT7, PCGS# 179

**1723/2 Hibernia Halfpenny  
MS65 Brown, W-12850**

- 3004 1723/2 Hibernia Halfpenny MS65 Brown PCGS. M. 3.4-Db.1, W-12850, R.3.** Though designated as Brown, this overdated Hibernia halfpenny displays copious brick-red within the legends and protected portions of the motifs. Evenly struck and well centered with mark-free surfaces and a smattering of mint-made die rust. A late die state with several peripheral cracks. Undoubtedly among the finest examples of this popular variety, listed on page 57 of the 2019 *Guide Book*. NGC ID# 2ATF, PCGS# 183

**1787 Massachusetts Half Cent  
MS63 Brown, Ryder 4-C**

- 3005 1787 Massachusetts Half Cent MS63 Brown PCGS. Ryder 4-C, W-5940, R.2.** An exquisite chocolate-brown commonwealth copper. One tiny edge flaw at 12:30, but there are no other mint imperfections, and the surfaces are essentially unabraded. The strike is generally sharp, with minor blending noted on the shield and the high points of the Indian. Listed on page 71 of the 2019 *Guide Book*. Population: 21 in 63 (1 in 63+) Brown, 36 finer (3/19). NGC ID# 2B22, PCGS# 296

**1787 Immunis Columbia Copper, AU Details  
Eagle Reverse, W-5680**

- 3006 1787 Immunis Columbia, Eagle Reverse — Environmental Damage — NGC Details. AU. W-5680, High R.4.** New York-related Immunis Columbia/Eagle copper is a scarce late Federation-era private issue. This olive example has minor to moderate granularity, an alloy inclusion above the knees is burnished, the eagle's breast has re-engraved feather detail, and the eagle's right (facing) shoulder is tooled. Listed on page 67 of the 2019 *Guide Book*. Ex: FUN Signature (Heritage, 1/2011), lot 3077; Sacramento ANA Signature (Heritage, 3/2011), lot 3013, which realized \$3,220.

- 3007 '1772' Machin's Mills, IVS, VG10 PCGS. Vlack 5-72A, W-7710, R.6.** Two 1772-dated varieties (Vlack 5-72A and 6-72A) display the king's name as GEORGIUS, another (Vlack 7-72B) shows it as GEORGIUS, and the final variety (Vlack 24-72C) has a mostly lapped obverse legend. This example has granular ebony-field fields and lighter steel-gray high points. A thin diagonal mark is behind the king's head. Listed on page 79 of the 2019 *Guide Book*. NGC ID# 2B3W, PCGS# 939

**'1776' Machin's Mills Halfpenny, XF40  
W-7790, Problem-Free Surfaces**

- 3008 '1776' Machin's Mills Halfpenny XF40 PCGS. Vlack 6-76A, W-7790, R.4.** A golden-brown representative with pleasing surfaces, complete legends, and consistent color. The central strike is soft, as deliberately made to imply acceptance in commerce. Machin's Mills was a secretive New York private coiner. Although dated 1776, the piece was probably produced circa-1788. Listed on page 79 of the 2019 *Guide Book*. NGC ID# 2B43, PCGS# 460

- 3009 1786 New Jersey Copper, Narrow Shield, Curved Beam XF40 PCGS. Maris 24-P, W-4965, R.2.** A handsome medium to deep brown New Jersey type coin. A slender vertical mark is centered on the shield, but the remainder of the coin is unabraded. Evenly struck, and only slightly off center toward 12 o'clock. Listed on page 81 of the 2019 *Guide Book*. NGC ID# AUKK, PCGS# 45424

**1787 New Jersey Copper, MS62 Brown  
Camel Head, M. 56-n**

- 3010** 1787 New Jersey Copper, Camel Head, MS62 Brown PCGS. M. 56-n, W-5310, R.1. Maris 56 through Maris 58 are deemed Camel Heads, all paired with the n reverse. The last two varieties are rare, but Maris 56-n shows up regularly, and has the closest association with the *Guide Book* listing. The present piece is an uncommonly nice example. The mahogany-brown surfaces are unblemished, and the strike is exceptionally sharp, particularly on the shield lines and the horse's mane. Struck over a Connecticut copper, with portions of INDE ET LIB faintly apparent on the reverse periphery. Listed on page 82 of the 2019 *Guide Book*. NGC ID# 2B4V, PCGS# 515

**1788 New Jersey Copper, VF20  
Scarce Head Left, M. 50-f**

- 3011** 1788 New Jersey Copper, Head Left VF20 PCGS. Maris 50-f, W-5475, R.3. The elusive Head Left *Guide Book* variety is confined to three 1788 marriages, with a rarity range of R.3 to High R.5. This minimally marked example is well-defined for the VF20 level, though the ebony-brown surfaces are somewhat granular. A usual die state with obverse cracks near 3 o'clock. Listed on page 83 of the 2019 *Guide Book*. NGC ID# 2B53, PCGS# 527

**1788 New Jersey Copper, Choice XF  
Running Fox, M. 77-dd Late Die State**

- 3012** 1788 New Jersey Copper, Running Fox, XF45 PCGS. Maris 77-dd (DS3), W-5535, R.2. The late die state with a dramatic raised diagonal line above the neck of the horse, and a second raised line from the base of the shield to the middle of the left shield border. The die damage was considered sufficiently significant for Dr. Maris to separately list the variety as 78-dd, and New Jersey specialists collected both 77-dd and "78-dd" for more than a century. Of course, the "running fox" at 8 o'clock on the reverse is also of importance, especially for those who collect by *Guide Book* variety. The medium brown surfaces are minutely granular and display a thin vertical line on the right obverse field. Struck moderately off center toward 1 o'clock. Listed on page 83 of the 2019 *Guide Book*. NGC ID# AUKF, PCGS# 524

- 3013** 1785 Nova Constellatio Copper, Pointed Rays, Large Date, AU58 PCGS. Crosby 3-B, W-1895, R.2. A lovely chocolate-brown near-Mint Nova Constellatio type coin. The all-seeing eye displays slight wear, but marks are refreshingly absent, and the strike is consistent throughout. Minor die crumbling near NOVA is usual for Crosby 3-B. Listed on page 66 of the 2019 *Guide Book*. Population: 17 in 58 (1 in 58+), 22 finer (2/19). NGC ID# 2AZ3, PCGS# 813

**1785 Nova Constellatio Copper, MS63 Brown  
Pointed Rays, Large Date, Crosby 3-B**

- 3014** Nova Constellatio Copper, Pointed Rays, Large Date, MS63 Brown NGC. Crosby 3-B, W-1895, R.2. Crosby-3 represents one of the more collectible Nova Constellatio copper varieties. This Select Uncirculated example is in a typically late die state with heavy rust lumps throughout the obverse. Both sides are smooth with areas of appealing mahogany-brown and golden-orange color. A popular colonial type. Listed on page 66 of the 2019 *Guide Book*. Census (all Pointed Rays, Large Date varieties): 2 in 63 Brown, 5 finer (3/19). NGC ID# 2AZ3, PCGS# 813

- 3015** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS62 Brown PCGS. N. 13-X, W-6855, R.2. The tell-tale vertical die crack at 6 o'clock on the reverse is diagnostic for the 'X' reverse, as seen on many high-grade Fugio cents released from the Bank of New York holdings. This charming medium brown copper is unabraded, though a trio of small laminations are noted near the right reverse border. Listed on page 99 of the 2019 *Guide Book*. NGC ID# AX5E, PCGS# 883

**1787 Fugio Cent, MS66 Red and Brown  
Condition Census New Haven Restrike  
N. 104-FF, W-17650**

- 3016** 1787 Fugio Cent, New Haven Restrike, Copper, MS66 Red and Brown PCGS. N. 104-FF, W-17560. When offered by Mid-American Coin Auctions in their Capitol City Sale, this coin was described, "This is, without a doubt, the finest example we have ever seen of this interesting numismatic item. The surfaces exhibit liberal quantities of blazing red luster (a condition which is very unusual for this issue). Most restrikes available today display a subdued and faded mint red color. This example is worthy of inclusion in the finest Fugio variety set, or Colonial Type set." Listed on page 100 of the 2019 *Guide Book*. Ex: Capitol City Sale, Mid-American Auctions (2/1985), lot 8; Denver Signature (Heritage, 8/2006), lot 70, where it realized \$8,050. NGC ID# 2B8S, PCGS# 917

**1794 Talbot, Allum & Lee Cent, NEW YORK  
Fuld-4, Lettered Edge, MS66 Red and Brown  
Ex: Eric P. Newman**

- 3017** 1794 Talbot, Allum, & Lee Cent, NEW YORK MS66 Red and Brown NGC. Fuld-4, W-8590, R.1. Ex: Eric P. Newman Collection. 158.4 grains. Struck in Birmingham, by Peter Kempson & Co., and imported to America, Talbot, Allum & Lee cents were distributed into circulation in 1794 and 1795 to advertise the New York-based business, which was engaged in the India trade. Pieces are known both with and without the words NEW YORK above the ship on the reverse. This high-end example represents the with NEW YORK variant; it is the single finest certified at NGC, and is the finest of just eight Red and Brown-designated pieces at NGC and PCGS combined by a full grade point (3/19). Flashy copper-red luster radiates from the recesses, with complementary pale burgundy accents on each side. The strike is sharp and the preservation is exceptional. Listed on page 88 of the 2019 *Guide Book*.  
Ex: Eric P. Newman Collection, Part IV (Heritage, 5/2014), lot 30395, which realized \$9,987.50; Summer FUN Signature (Heritage, 7/2015), lot 3005, which realized \$7,050. NGC ID# 2B5X, PCGS# 635

**1791 Liverpool Halfpenny, AU55  
Baker-17, Washington Portrait Obverse**

- 3018** 1791 Washington Liverpool Halfpenny, Copper AU55 PCGS. Baker-17, W-10650, Musante GW-19, R.6. A large die break appears near 12 o'clock on the reverse. The same die was used for a 1793-dated Conder token (not included) that shows an earlier stage of that die break, indicating that the 1791 Liverpool halfpenny was struck after the 1793 Conder token. This Choice AU example was imperfectly centered on a slightly undersize planchet. Delicate blue overtones appear on the pleasing chocolate-brown surfaces. Listed on page 93 of the 2019 *Guide Book*. NGC ID# 2B7H, PCGS# 698

**1791 Washington Large Eagle Cent  
Baker-15, MS63 Brown**

- 3019** 1791 Washington Large Eagle Cent MS63 Brown PCGS. Baker-15, W-10610, Musante GW-15, R.2. 30 mm, copper, lettered edge. A sharp example with glossy surfaces and no discernible wear points. Each side has rich burgundy-brown patina that reveals shades of green and violet when viewed beneath a loupe. A few faint contact marks are barely noticed. Eye-appealing for the grade and type. Listed on page 93 of the 2019 *Guide Book*. NGC ID# 2B6Z, PCGS# 702

**1791 Washington Cent, MS65 Brown  
Large Eagle, Baker-15**

- 3020** 1791 Washington Large Eagle Cent MS65 Brown NGC. Baker-15, W-10610, Musante GW-15, R.2. A crisply struck and semiprooflike Gem. Protected areas display olive-brown, and the open fields are chocolate-brown. The right reverse exhibits minor carbon, but the surfaces are essentially mark-free. Baker-15 was an attempt by the Westwood Mint of Birmingham, England, to secure a coinage contract with the United States. Listed on page 93 of the 2019 *Guide Book*. NGC ID# 2B6Z, PCGS# 702
- 3021** 1791 Washington Small Eagle Cent MS62 Brown NGC. The speckled, pale-blue patina suggests that this sharply struck bronze piece may have been silvered at one time. Struck in England and imported to America in an attempt to secure a private coinage contract, the 1791 Large and Small Eagle cents are popular colonial issues. They are important as inspiration for the rare Getz and Perkins Washington President varieties. Listed on page 93 of the 2019 *Guide Book*. NGC ID# 2B73, PCGS# 705

**'1737' Higley Copper, MS66 Brown  
W-14270 Bolen-Edwards Copy**

- 3022** (Circa-1864) "1737" Higley Copper, Edwards Copy, MS66 Brown PCGS. Kenney-4, Musante JAB-10, W-14270, R.5. The dies were made by John Adams Bolen in 1864, and sold the next year to Dr. Francis Smith Edwards, who struck an unknown quantity in various metals, principally copper. Moderate die rust on the reverse led PCGS to conclude that Edwards, rather than Bolen, produced the present piece, which imitates W-8200. The light olive-brown surfaces are evenly struck and appear immaculate.

**Bolen-Edwards '1737' Higley Copper  
MS65, Struck in Brass, W-14275**

- 3023** (Circa-1864) "1737" Higley Copper, Edwards Copy, Brass, MS65 PCGS. Kenney-4, Musante JAB-10, W-14275, Low R.7. J.A. Bolen's well-made Civil War-era copy of the W-8200 Higley Three Hammers variety was issued in copper, brass, silver, and German silver. Most survivors are copper, and the other alloys range from very rare to extremely rare. PCGS presumes the present brass example was struck by Dr. Edwards after his 1865 acquisition of the Bolen dies, though the piece lacks the die cancellation marks found on JAB-M/E-13. The reverse die was moderately rusted. The sharply struck green-gold surfaces are unabraded but display flecks near the H in THREE and a small spot near the first T in CONNECTICUT.

**'1737' Higley Copper, Near-Mint  
Bolen-Edwards Copy, W-14285, Struck in Silver**

- 3024** (Circa-1864) "1737" Higley Copper, Edwards Copy, Silver, AU58 PCGS. Kenney-4, Musante JAB-10, W-14285, R.7. Civil War-era medallist J.A. Bolen provided a popular series of copies of rare colonials. Among his output was the JAB-10 copy of W-8200, Higley's introductory THREE PENCE / CONNECTICUT variety. Bolen sold the dies to Dr. Edwards in 1865, and it is unknown whether a given piece was struck by Bolen or Edwards. In any event, silver examples are much rarer than their copper counterparts. This powder-blue and gold representative is mark-free and shows only a trace of wear. The flan is slightly undersized and out of round, and the strike shows minor softness along the right-side borders.

**Higley-Confederatio Bolen-Edwards Mule  
Very Rare W-14580, From Cancelled Dies  
MS64 Red and Brown**

- 3025** (Post-1864) '1785' Higley Copper / Confederatio Mule, Edwards Copy, MS64 Red and Brown PCGS. Kenney-14, Musante JAB M/E-13, W-14580, High R.7. J.A. Bolen made both colonial imitation dies circa-1864. The obverse struck JAB-10, and the reverse struck JAB-7. Later, several Bolen dies were obtained by Dr. F.S. Edwards, who paired them indiscriminately to provide additional varieties for collectors. JAB-M/E-13 is very rare, and did not appear in the Ford auctions. Both sides display numerous raised bars, as made from cancelled dies. Substantial brick-red color emerges across well-preserved and evenly struck surfaces.

**HALF CENTS**

- 3026** 1793 C-2, B-2, R.3 — Damage — PCGS Genuine. VG Details. Portions of HALF CENT are faint, but the remaining legends are clear. A medium to deep brown representative of the introductory and single-year type. Only lightly granular, though moderate marks near the date and left obverse field account for the PCGS notation. The dies are rotated clockwise 45 degrees. Our EAC grade Good 5.
- 3027** 1793 C-4, B-4, Low R.3 — Corroded — ANACS. Fine 12 Details. A noticeably porous charcoal-brown piece. The legends are blurry but legible, except for AMERICA which is very faint. First-year half cents are desirable as a single-year type, and all four die varieties are collectible despite their scarcity. Our EAC grade Good 4.  
*Ex: National Money Show Signature (Heritage, 4/2006), lot 20.*

**1800 Draped Bust Half Cent, MS63 Brown  
C-1, B-1, Only Dies for the Date**

- 3028** 1800 C-1, B-1, R.1, MS63 Brown PCGS. Manley Die State 4. The smooth olive-brown surfaces of this impressive Select specimen show a few faint hints of original red in sheltered areas. The design elements are well-detailed and only a few scattered, microscopic specks of carbon are evident. A small planchet flaw above the E in CENT can serve as a pedigree marker. Our EAC grade AU55. NGC ID# 222B, PCGS# 35119 Base PCGS# 1051

**1804 C-13 Half Cent, AU50  
Brockage, Rotated Double Struck**

- 3029** 1804 Plain 4, No Stems, C-13, B-10, R.1 — Rotated Double Struck Over, Reverse Brockage — AU50 PCGS. The first strike for this error half cent was between the reverse die and the reverse of a previously struck half cent. Thus, after the first strike, the reverse had a normal appearance, the obverse displayed the reversed and incused image (a brockage) of the reverse design. This would not do, so the coiner sent the piece through the dies a second time. That strike was normal, although rotated about 30 degrees clockwise (relative to the reverse) from the first strike. A great conversation piece. The olive-brown surfaces are problem-free. Our EAC grade XF40. NGC ID# 222F, PCGS# 35176 Base PCGS# 1063

**1806 Small 6 Half Cent, MS63 Red and Brown  
C-1, B-3, No Stems Reverse**

- 3030** 1806 Small 6, No Stems, C-1, B-3, R.1, MS63 Red and Brown NGC. Clash marks from the wreath are visible in the obverse fields around the portrait, as always on this variety. This is the only stemless variety of the 1806 half cent and is relatively plentiful overall. Mint State coins are often available for type and date representation. This Select Red and Brown coin displays deep burgundy surfaces with reddish undertones. The strike is sharp. Satiny luster shows a few flecks of carbon in the margins. Our EAC grade AU55. NGC ID# 4DVC, PCGS# 35192 Base PCGS# 1094

**1828 C-3, B-2 Half Cent, MS65 Red and Brown  
Scarce Early Die State**

- 3031** 1828 13 Stars, C-3, B-2, R.1, MS65 Red and Brown PCGS. Manley Die State 2.0 with Star 7 recut and a long spine from the leaf over the H in HALF. Rich orange surfaces have slight mellowing of the original mint color with delicate brown toning and myriad trivial spots on each side that fail to limit the numerical grade of this important half cent. This lovely piece is tied with seven others for the finest that PCGS has certified in Red and Brown, with two graded MS65 Red, and a single MS66 Brown graded numerically finer (2/19). Our EAC grade MS63. NGC ID# 222V, PCGS# 35262 Base PCGS# 1148

- 3032** 1854 C-1, B-1, R.1, MS65+ Red and Brown PCGS. An exquisite Gem, this half cent has splashes of toning over nearly all of the obverse and reverse surfaces. This piece has frosty mint luster and excellent eye appeal. Our EAC grade MS64. NGC ID# 26YY, PCGS# 35331 Base PCGS# 1231

- 3033** 1855 C-1, B-1, R.1, MS64 Red and Brown NGC. A Choice fire-red type coin that approaches a full Red designation, despite slight mellowing toward mahogany on the left obverse field. Contact is confined to a tick on the C in CENT. A good strike, though the right-side stars are incompletely brought up. Our EAC grade MS63. Ex: FUN Signature (Heritage, 1/2014), lot 8059. NGC ID# 26YZ, PCGS# 35334 Base PCGS# 1234

**1855 C-1, B-1 Half Cent, MS65 Red  
No Finer Red Examples**

- 3034** 1855 C-1, B-1, R.1, MS65 Red PCGS. While the borders show typical weakness, this piece has excellent central detail. Both sides are brilliant with fiery orange mint luster. Trivial spots are less obvious than on most hoard examples of this issue. Our EAC grade MS64. Population: 43 in 65 Red (4 in 65+), 0 finer (2/19). NGC ID# 26YZ, PCGS# 35335 Base PCGS# 1235

- 3035** 1857 C-1, B-1, R.2, MS65 Red and Brown NGC. The final half cent issue has a low mintage and is scarce with partial remaining Red. The minimally marked surfaces display orange-gold and gunmetal shades, with the former prominent on the obverse and the latter more extensive on the reverse. Encapsulated in a circa-2000 holder. Our EAC grade MS63. NGC ID# 26Z3, PCGS# 35340 Base PCGS# 1240

**PROOF CLASSIC HEAD HALF CENT**

**1834 C-1 Half Cent, PR62 Brown  
Intricate Strike, Problem-Free**

- 3036** 1834 PR62 Brown NGC. C-1, B-1, R.6 as a proof. A fully struck lime-green and peach-gold specimen. No marks are remotely relevant, and carbon is inconsequential. The eye appeal surpasses the numerical grade. Although C-1 is plentiful as a business strike, proofs are undeniable rare, with "15 to 20 known" survivors per PCGS. Our EAC grade PR60. NGC ID# 223A, PCGS# 1201

## LARGE CENTS

### 1793 Chain Cent, VG Details Sheldon-1, AMERI.

- 3037** 1793 Chain, AMERI., S-1, B-1, R.4 — **Environmental Damage** — PCGS Genuine. VG Details. The AMERI cent was the first die marriage of any denomination struck for commerce by the fledgling U.S. Mint. Its historical importance is immense, and survivors are desirable regardless of condition. The reverse is fairly sharp, with all letters clear to bold. The obverse shows greater wear, but all four date digits are distinct, as is Liberty's profile and much of LIBERTY. The dark brown surfaces are lightly granular and likely burnished. Large obverse initials AK are faintly pinscratched. Our EAC grade Good 4.

- 3038** 1793 Chain, AMERICA, S-3, B-4, Low R.3 — **Corroded** — NCS. AG Details. Light tan color on the obverse with deeper olive-brown on the reverse. The surfaces are uniformly corroded, weakening many of the design features and rendering correct attribution nearly impossible. While we agree with the identification of this variety as Sheldon-3, it is difficult to be certain. In today's market, with increasing prices for important types and key dates, this example may prove to be an affordable alternative to many others. Our EAC grade Fair 2.  
*Ex: Long Beach Signature (Heritage, 9/2006), lot 118, where it sold for \$1,955.*

### 1793 Chain Cent, Fine Details S-3, B-4, AMERICA Reverse

- 3039** 1793 Chain, AMERICA, S-3, B-4, Low R.3 — **Damaged** — NGC Details. Fine. Breen Die State II, with clash marks in front of Liberty's mouth. Sheldon-3 is quickly attributed by the high, right-leaning R in LIBERTY. Reddish-violet hues color slightly porous surfaces. A large planchet void occurs below the final A in AMERICA, and a rim mark appears above RI. Clear detail remains on the well-worn legends and central devices, including the date, portrait, and chain links. The noted damage takes the form of a flattened rim from 10 o'clock to 11:30 on the obverse. Our EAC grade Good 4.
- 3040** 1793 Wreath, Vine and Bars Edge, S-5, B-6, R.4 — **Environmental Damage** — PCGS Genuine. Fine Details. All legends are fully readable, and the devices are nicely defined, but the tan-brown surfaces are evenly granular. Flan flaws are apparent near the bust tip and the second T in STATES. A first-year, single-year copper type. Our EAC grade Good 5.

- 3041** 1793 Wreath, Vine and Bars Edge, S-10, B-10, R.4 — **Rim Repaired** — PCGS Genuine. Fine Details. A period following the final A in AMERICA is the pick-up point for Sheldon-10, a better Wreath cent die marriage. This lightly granular lavender-brown example has clear legends, but has a dull mark near the NI in UNITED and an obverse repair near 3 o'clock in addition to the S-10 die characteristic at that location. The edge has been tooled or smoothed. Our EAC grade Good 4.

- 3042** 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3 — **Rim Damage** — PCGS Genuine. Good Details. Breen Die State III. Both sides display minor rim knocks, the most apparent beneath the 9 in the date, and west of the L in LIBERTY. The deep brown surfaces are evenly granular. Marks are relatively few, though we note the profile displays three ticks, with another near the 3 in the date. Our EAC grade Good 4.

- 3043** 1795 Plain Edge, S-76b, B-4b, R.1, VF25 NGC. Breen Die State II. An attractive olive-brown Liberty Cap type coin. The obverse is lightly brushed, but no marks are mentionable, and definition is bold save for softness on TES OF and the ER in LIBERTY. Our EAC grade Fine 15. NGC ID# 223T, PCGS# 35723 Base PCGS# 1380

### 1795 Cent, Choice AU S-76b, B-4b, Plain Edge

- 3044** 1795 Plain Edge, S-76b, B-4b, R.1, AU55 PCGS. CAC. Breen Die State IV, with faint double clash marks on each side. Sheldon-76b is a collectible die pair with wide date digits and the leaf pointing to the right foot of the T in CENT. This attractive mahogany-brown Liberty Cap type coin showcases bold detail with minimal wear. Post-strike contact is inconsequential. Our EAC grade XF40. NGC ID# 223T, PCGS# 35723 Base PCGS# 1380

### 1796 Liberty Cap Cent, VF35 S-87, B-8, Bold Detail

- 3045** 1796 Liberty Cap, S-87, B-8, R.3, VF35 PCGS. Breen Die State III, an early stage — the die rust is evident at the U in UNITED, although the obverse die crack through the 7 in the date is still faint. The bulge at the 96 partially obscures the 6. Border dentils are complete along the left-hand rims, weak around the opposite edge. To the unaided eye, the surfaces are smooth and uniformly chocolate-brown with good detail on the devices. A loupe reveals scattered tiny contact marks, including some faint hairline scratches that run vertically across Liberty's face and a few small marks in the field below the LI in LIBERTY. Our EAC grade Fine 15. NGC ID# 223V, PCGS# 35768 Base PCGS# 1392

- 3046** 1796 Reverse of 1794, S-110, B-16, R.3 — Tooled — PCGS Genuine. AU Details. Breen Die State VII with a small break east of the E in ONE. A distinctive variety due to its many clashes, cracks, and die chips. This sharply defined Draped Bust cent has dusky sea-green and lavender toning. The obverse field is lightly burnished, and a spot is noted near the D in UNITED. Our EAC grade VF20.

**1801 Draped Bust Cent, AU50  
S-216, Clashed Die State**

- 3047** 1801 S-216, B-6, R.1, AU50 PCGS. Breen Die State II with clash marks prominent near the O in ONE. The S-216 obverse always has a blurry appearance, since the die was lapped prior to production. Rich sea-green and rose-red undertones accompany this glossy and pleasing Draped Bust type coin. Marks are nearly absent, though brief lines near the L in LIBERTY and the 00 in the denominator provide identifiers. Our EAC grade VF35. NGC ID# 224B, PCGS# 36245 Base PCGS# 1458

- 3048** 1803 Small Date, Small Fraction, S-251, B-8, R.2, AU50 PCGS. Breen Die State I. There is no evidence of die cracks or clash marks on either side of this early die state S-251 cent. The variety is quickly recognized when the recut second S in STATES. Emerald toning tendencies are evident on the slate surfaces of this lovely cent. Our EAC grade XF40. NGC ID# 224G, PCGS# 36368 Base PCGS# 1482

- 3049** 1805 S-267, B-1, R.1, AU53 PCGS. Breen Die State III. The 5 in the date is widely repunched. A well-defined steel-blue and golden-brown cent of this conditionally challenging Draped Bust date. One hair-thin vertical mark beneath the ear, but otherwise uncommonly unabraded. Our EAC grade XF40. NGC ID# 224K, PCGS# 36427 Base PCGS# 1510

- 3050** 1807 Large Fraction, S-276, B-6, R.1, AU50 PCGS. Breen Die State IV. A small bulge is evident left of the low curl, and minor clash marks are noted on the reverse. Pleasing chocolate-brown surfaces display splashes of maroon patina with traces of faded red on the reverse. Scattered marks are mostly inconsequential. The reverse die is rotated 180 degrees, resulting in medal-turn alignment. Our EAC grade VF35. NGC ID# 224M, PCGS# 36451 Base PCGS# 1516

**1821 N-1 Cent, AU58  
Elusive Condition Rarity**

- 3051** 1821 N-1, R.1, AU58 PCGS. CAC. Although rating as common, the 1821 cents were not part of the Randall Hoard of 1816 to 1820 cents, and therefore begin a long series of elusive issues that are rarely seen in or around Mint State grades. This near-Mint representative exhibits outstanding olive and golden-brown surfaces with minimal, grade-consistent handling marks on each side. Our EAC grade XF45. NGC ID# 2258, PCGS# 36706 Base PCGS# 1621

**1847 N-2 Cent, MS64 Brown  
Large Over Small 47**

- 3052** 1847 Large Over Small 47, N-2, R.3, MS64 Brown PCGS. Grellman Die State a. Repunching on the 1, 4, and 7 is clear, as are die polish lines between I and T of UNITED and below C in CENT. The Large 47 over Small 47 feature is clear. Strike doubling exists on the reverse, visible along the top of AMERICA, and the reverse shows no evidence of die cracks in this early die state. Rich chocolate-brown surfaces are smooth and sharply struck, with some rounding on stars 5 to 7 and a few tiny, pinpoint carbons among the stars. Strong eye appeal accompanies the Choice surfaces of this *Guide Book* variety. Our EAC grade MS60. NGC ID# 226D, PCGS# 37367 Base PCGS# 1880

- 3053** 1847 N-20, R.3, MS65 Brown PCGS. CAC. Horizontal die lines within the NE in ONE confirm the Newcomb variety. Hints of fire-red linger in design recesses, though the majority of this satiny Gem is medium brown. No marks or spots are evident. A few stars are lightly brought up, but the major motifs are nicely struck. Our EAC grade MS62. NGC ID# 4CNX, PCGS# 37313 Base PCGS# 1877

**1851/81 Cent, MS65+ Brown  
N-3, Early Die State**

- 3054** 1851/81 N-3, R.1, MS65+ Brown PCGS. CAC. Grellman Die State a. Horizontal die lines in the field are readily apparent around the date. This obverse features 51 repunched over an erroneous and inverted 18. The surfaces of this Gem are glossy reddish-brown, but the hidden areas retain a pleasing amount of mint red color. Detail on the portrait and wreath is good. Our EAC grade MS63. Population: 12 in 65 (2 in 65+) Brown, 4 finer. CAC: 7 in 65, 3 finer (3/19). NGC ID# 226H, PCGS# 400138 Base PCGS# 1895

## PROOF LARGE CENT

### 1856 N-5 Cent, PR63 Brown Proof-Only Large Cent Variety

- 3055 1856 Slanted 5, N-5, R.5, PR63 Brown PCGS.** The 1856 N-5 large cent is known only in proof format, and several dozen survive. Housed in a green-label PCGS holder, this example has a bold strike and features lime and plum toning on both sides. The fields are minimally reflective. Our EAC grade PR60.  
*Ex: ANA Sale (Heritage, 8/1990), lot 71; Superior (5/1991), lot 992; Larry Briggs Rare Coins. PCGS# 400607 Base PCGS# 1997*

## FLYING EAGLE CENTS

### 1857 Flying Eagle Cent, MS65 Elusive Issue in Finer Grades

- 3056 1857 MS65 PCGS. CAC.** A delightful Gem representative of the first small cent design, with sharply detailed design elements and well-preserved copper-red surfaces that radiate vibrant mint luster from both sides. A short die crack is evident on the reverse, from the rim at 9 o'clock to the wreath. PCGS has graded 21 numerically finer examples (3/19). NGC ID# 226P, PCGS# 2016

### 1858 Flying Eagle Cent, MS66 Large Letters, Three Coins Finer at PCGS

- 3057 1858 Large Letters MS66 PCGS.** High Leaves Reverse, Closed E in ONE. The usual variety. The final-year 1858 Flying Eagle cent was widely saved, with the series' introduction having spurred on a massive boom in coin collecting in the United States. Examples can be found without too much effort in grades as high as MS65, above which point the issue becomes conditionally scarce.  
Bronze-gold color dominates this highly lustrous Premium Gem. Blushes of coppery toning also appear on the obverse. Strike detail is nearly complete on that side, while the reverse exhibits softness on the right portion of the wreath. Ticks below (STA)T(ES), on the N in ONE, and under the N in CENT are the only apparent flaws. Die cracks travel through much of the obverse legends. Population: 48 in 66 (6 in 66+), 3 finer (3/19). NGC ID# 2277, PCGS# 2019

## PROOF FLYING EAGLE CENT

### 1856 Flying Eagle Cent Proof Snow-9, Unc Details

- 3058 1856 Snow-9 — Environmental Damage — PCGS Genuine. Proof, Unc Details.** The normal proof variety (restrike from the late 1850s) is attributed by the die line in the eagle's wing and the tine off the lower left ribbon end. This example of the all-important first-year 1856 Flying Eagle cent has a pleasing appearance in spite of its uniform granular corrosion, and it displays rich brown color. A collectible, boldly struck example of what might otherwise be an out-of-reach issue.  
*From The Jersey Shore Gold Collection.*

## INDIAN CENTS

- 3059 1862 MS66+ PCGS.** Vibrant, satiny rose-gold mint luster engulfs this high-end Premium Gem, while each side displays unabraded surfaces and sharp definition. The 1862 is a plentiful copper-nickel issue, ideal for type representation when found in high grade. PCGS lists 14 coins finer than the present (3/19). NGC ID# 227H, PCGS# 2064
- 3060 1864 Copper-Nickel MS66 PCGS.** Razor-sharp definition is evident on all design elements of this delightful Premium Gem and the well-preserved copper-red surfaces are lustrous and appealing. Population: 48 in 66 (4 in 66+), 1 finer (3/19). NGC ID# 227K, PCGS# 2070

### 1864 No L Cent, MS68 Brown Snow-8, Repunched 6

- 3061 1864 Bronze No L MS68 Brown NGC. Snow-8.** The 6 is nicely repunched within the loop. Rick Snow calls the variety "fairly scarce." The variety is undesignated on the NGC insert. Both fields are clashed, but the coruscating surfaces appear void of carbon or contact. The variegated steel-blue and rose-red coloration is consistent throughout. NGC ID# 227L, PCGS# 2076
- 3062 1871 MS65 Brown PCGS. CAC.** Bold N. Substantial mint red supports bluish-brown overtones of this Gem 1871 cent. Extremely challenging in high grades regardless of color, the 1871 barely circulated before heading back to the Mint for melting and recoinage. The sharply struck motifs and well-preserved surfaces combine for a true series rarity — only a handful of pieces are finer. CAC endorsement adds considerably to this coin's status. Population: 17 in 65 Brown, 2 finer. CAC: 8 in 65, 2 finer (3/19). NGC ID# 227V, PCGS# 2100

**3063 1871 MS65 Red and Brown PCGS. CAC.** The pleasing red surfaces of this delightful Gem have mellowed to light brown in some areas, but much original mint luster remains intact. The design elements are sharply detailed throughout. Population: 85 in 65 (3 in 65+) Red and Brown, 2 finer. CAC: 20 in 65, 0 finer (3/19). NGC ID# 227V, PCGS# 2101

**3064 1872 MS64 Red and Brown NGC. CAC. Bold N.** The 1872 is a series scarcity both by strike quality and by mintage. Considered the second-most challenging date of the Indian Head design (behind the 1877), its mintage of slightly more than 4 million pieces came from recoinced cents. The mixture of alloys resulted in many poorly struck pieces. This Choice Uncirculated example is just the opposite — well-struck, with tan-brown color and over pale-orange surfaces and nice mint luster. CAC endorsed. NGC ID# 227W, PCGS# 2104

**1873 Closed 3 Cent, AU55  
Snow-1, Doubled Die Obverse**

**3065 1873 Doubled LIBERTY, Snow-1, FS-101, AU55 NGC.** A prominent Closed 3 *Guide Book* variety, showing LIBERTY boldly die doubled on Liberty's headdress, as are the feathers. Liberty's facial profile and eye are also doubled. This Choice AU example displays glassy brown surfaces and sharp detail. A few contact marks accompany light wear but do not detract. NGC ID# 227X, PCGS# 37504 Base PCGS# 2115

**1876 Indian Cent, MS67  
Finest Certified Red and Brown Example**

**3066 1876 MS67 Red and Brown NGC.** More than 7.9 million Indian cents were struck at the Philadelphia Mint in the centennial year of 1876 and the present coin is the single-finest survivor with a Red and Brown designation (2/19). This spectacular Superb Gem exhibits sharply detailed design elements and the flawless surfaces show a mix of crimson and original red patina. Overall eye appeal is terrific. NGC ID# 229V, PCGS# 2125

**1877 Indian Cent, Glossy AU53  
Undisputed Key to the Series**

**3067 1877 AU53 NGC.** Rich, glossy chocolate-brown surfaces with excellent eye appeal for the grade. A few faint marks are evident on the obverse and reverse, but they are of little or no significance. The key date to the Indian cent series, examples in all grades remain in constant demand.

*Ex: National Money Show Signature (Heritage, 3/2008), lot 188, where it brought \$3,450. NGC ID# 2284, PCGS# 2127*

**3068 1877 — Tooled — PCGS Genuine. Unc Details.** The tooling appears at the center of the reverse and joins the N in ONE with the N in CENT. This piece is otherwise a highly attractive medium brown cent with splashes of faded red luster on both sides. A sharply struck example of this key issue.

**1877 Indian Cent, MS62 Brown  
Exceptional for the Grade**

**3069 1877 MS62 Brown NGC.** The preservation of this piece is exemplary for the grade, eye appeal far exceeding expectations. Satiny luster illuminates amber-red, russet, olive, and golden hues across each side, with a balance of color that nearly earns a Red and Brown designation. The design elements are well-struck. On the reverse, a shallow N in ONE confirms that this is in fact a circulation strike, the key date in the series. Efforts to determine grade-limiting factors on this piece reveal only a few tiny marks in the left obverse field. NGC ID# 2284, PCGS# 2127

**1877 Indian Cent, MS62 Red and Brown  
Low-Mintage Series Key**

- 3070 1877 MS62 Red and Brown PCGS.** Shallow N. Die Pair 1, per Snow. The 18 in the date nearly touch, and the reverse shows the usual die clashing from the jaw-neck juncture above the O in ONE. The 1877 Indian cent is the sought-after key to the series, from a minuscule mintage of 852,500 pieces. This impressive MS62 example exhibits well-detailed design elements, with a touch of the usual softness on the feather points and ribbon knot. The well-preserved surfaces show a mix of original red and light brown patina. NGC ID# 2284, PCGS# 2128
- 3071 1883 MS66 Red PCGS.** Just the slightest touch of softness shows on the headdress feathers, but this attractive Premium Gem is sharply detailed in most places. The flawless copper-red surfaces have mellowed to light crimson in selected areas. Population: 33 in 66 (2 in 66+) Red, 6 finer (3/19). NGC ID# 228A, PCGS# 2147
- 3072 1887 MS65 Red PCGS. CAC.** An unabraded Gem that boasts consistent olive-gold color and a near-absence of carbon. A few of the feather tips are incompletely brought up. Housed in a green label holder. Population: 63 in 65 (1 in 65+) Red, 30 finer. CAC: 15 in 65, 14 finer (2/19). NGC ID# 228F, PCGS# 2159

**1889 Cent, MS65+ Red  
Scarce This Well-Preserved**

- 3073 1889 MS65+ Red PCGS. CAC.** A scarce issue in Gem Red condition, the 1889 Indian cent is rarely found so fine with CAC endorsement. This piece boasts the added appeal of a Plus designation. Each side is boldly struck and frosty with original luster. The obverse displays a bright copper-pink hue, while the reverse has deeper peach-orange color. No distractions — abrasions or carbon spots — are visible. Population: 56 in 65 (3 in 65+) Red, 16 finer. CAC: 6 in 65, 6 finer (3/19). NGC ID# 2732, PCGS# 2174

**1898 Indian Cent, MS67 Red  
Tied for the Finest Certified**

- 3074 1898 MS67 Red PCGS.** Nearly 50 million Indian cents were coined in 1898, but the surviving population with full Red color is extremely small. Despite that large production, PCGS and NGC have graded just over 2,500 examples in all grades and color designations. Of those, just 20% enjoy the Red designation. No finer Red examples of the 1898 Indian cent have been examined at PCGS or NGC. This sharply defined Indian cent exhibits fiery orange mint luster and minimal, grade-consistent spots. An exceptional piece for the Set Registry collector. Population: 13 in 67 Red, 0 finer (3/19). NGC ID# 228T, PCGS# 2201

**1902 Indian Cent, MS67 Red  
Tied for the Finest at PCGS**

- 3075 1902 MS67 Red PCGS.** The viewer would be hard pressed to find anything wrong with this Superb Gem. Even at 10x magnification, the surfaces are pristine. Both sides exhibit a generally strong strike, although a few feather tips are indistinct. Frosty orange luster is unimpeded. An extraordinary Indian cent. Population: 14 in 67 Red, 0 finer (3/19). NGC ID# 228X, PCGS# 2213

- 3076 1903 MS66 Red PCGS. CAC.** The design elements of this spectacular Premium Gem are sharply detailed, with some clash marks showing between the feathers of the headdress. The flawless original red surfaces radiate vibrant mint luster, with terrific eye appeal. PCGS has graded 12 numerically finer examples (3/19). NGC ID# 228Y, PCGS# 2216

**1908-S Indian Cent, MS66 Red  
Scarce Semikey Issue**

- 3077 1908-S MS66 Red PCGS. CAC.** Eagle Eye Photo Seal, card included. The popular 1908-S is a semikey issue at all levels of preservation. This full Red Premium Gem displays bright, flashy surfaces. Copper-gold luster adorns both sides, and the strike is definitely above-average for the issue, including sharpness on all four diamonds. Close examination reveals no marks or spots worthy of note. Housed in a first-generation holder. Population: 69 in 66 (10 in 66+) Red, 1 finer. CAC: 20 in 66, 0 finer (3/19).  
*Ex: Long Beach Signature (Heritage, 9/2008), lot 291, where it brought \$6,325. NGC ID# 2296, PCGS# 2234*

- 3078 1909 MS66 Red PCGS. CAC.** This spectacular Premium Gem represents the final year of the Indian design, with well-detailed design elements and vibrant mint luster throughout. The original red surfaces are impeccably preserved. PCGS has graded 18 numerically finer examples (3/19). NGC ID# 22AZ, PCGS# 2237

**PROOF INDIAN CENTS**

- 3079 1859 PR64 PCGS.** As a one-year type coin, the Laurel Wreath proof Indian cent is highly sought-after in all grades. PCGS lists only a few Cameo examples, making non-Cameo pieces the norm for this issue. Offered here is a reflective tan-gold near-Gem with tinges of peach and rose color in the fields. The strike is sharp.  
*From The William Rehwald Proof Set Collection. NGC ID# 2299, PCGS# 2247*

- 3080 1859 PR64 PCGS. CAC.** The first year of full-scale production of the Indian cent, this issue also represents a one-year type as there is no shield at the top of the reverse. This Choice proof has a bold strike with delicate tan surfaces and faint traces of golden-brown toning on both sides. NGC ID# 2299, PCGS# 2247

- 3081 1860 PR64 PCGS. CAC.** Eagle Eye Photo Seal, card included. The obverse is peach-gold with hints of powder-blue. The reverse shows lighter hues of lemon, lilac, and apricot. This nicely mirrored near-Gem is unabraded and shows only minuscule carbon on the cheek and near the date. One unobtrusive lint mark (as made) on the field near the nose. CAC: 9 in 64, 19 finer (3/19).  
*From The William Rehwald Proof Set Collection. NGC ID# 229A, PCGS# 2253*

**1861 Cent, PR64  
Appreciably Toned**

- 3082 1861 PR64 PCGS.** No records were kept pertaining to the production of proof cents in 1861, but the estimated mintage is around 1,000 pieces. A mix of copper-orange, golden-brown, and lavender patina colors each side in an appreciable fashion. Planchet voids appear left of Liberty's mouth and below the ribbon end, as often found among 1861 specimens. This glossy, semireflective example shows minor contact marks on the cheek, but the fields are clean. Only 38 submissions are graded finer at PCGS, including five Cameo representatives (3/19).  
*From The William Rehwald Proof Set Collection. NGC ID# 229B, PCGS# 2256*

- 3083 1864 Bronze No L PR64 Red PCGS.** The more plentiful No L bronze variety, ideal for date and type collectors. This Choice proof displays copper-orange and golden-tan patina with sharp motifs. The fields are modestly reflective, and no distracting carbon spotting is seen. Population: 10 in 64 Red, 8 finer (3/19).  
*From The William Rehwald Proof Set Collection. NGC ID# 229F, PCGS# 2278*

- 3084 1866 PR66 Red and Brown PCGS.** Exquisitely patinated in vibrant orange-red and powder-blue hues. This intricately struck specimen is free from contact and virtually void of carbon. The lot will be of considerable interest to the toning enthusiast. NGC ID# 229J, PCGS# 2286

- 3085 1867 PR64 Red PCGS.** The original red surfaces of this impressive Choice proof are well-preserved, with reflective fields and a few highlights of lilac. The design elements are sharply detailed throughout. Population: 32 in 64 Red, 8 finer (3/19).  
*From The William Rehwald Proof Set Collection. NGC ID# 229K, PCGS# 2290*

**1876 Indian Cent, PR67 Red and Brown  
Among the Finest Certified**

- 3086 1876 PR67 Red and Brown NGC.** From a fairly generous centennial mintage of 1,150 pieces, the 1876 proof Indian cent is decidedly rare at the PR67 grade level. This delightful Superb Gem exhibits sharply detailed design elements and deeply reflective fields on both sides. The flawless surfaces show a mix of light brown, crimson, and original red patina. Housed in a circa-2000 holder. Census: 4 in 67 (1 in 67★) Red and Brown, 0 finer (2/19). NGC ID# 229V, PCGS# 2316

- 3087 1876 PR64 Cameo PCGS. CAC.** A lovely cherry-red Choice Cameo cent. Carbon is limited to minuscule flecks, and the strike is fairly sharp. The Guide Book estimates 1,500 to 2,000 proofs were produced, but most are no longer full Red, or lack blatant contrast. Population: 3 in 64 Cameo, 12 finer. CAC: 1 in 64, 2 finer (3/19). Ex: *Central States Signature (Heritage, 5/2004)*, lot 5496, which realized \$1,092.50.  
**From The William Rehwald Proof Set Collection.** NGC ID# 229V, PCGS# 82317

**1877 Cent, PR64 Red and Brown  
Important Key Date**

- 3088 1877 PR64 Red and Brown PCGS.** Proof versions of the famous 1877 Indian Head cent often stand in for their circulation-strike counterparts, which prove challenging in high grades. A woodgrain pattern of golden-amber patina dominates this Choice specimen, with violet accents over the centers. Free of reportable contact. Encapsulated in an old green label holder.  
**From The William Rehwald Proof Set Collection.** NGC ID# 229W, PCGS# 2319

**1877 Cent, PR65+ Red and Brown  
Sharp and Reflective**

- 3089 1877 PR65+ Red and Brown PCGS. CAC.** Scrutiny of this high-end Gem proof fails to reveal a single point of strike softness, and the fields are deeply reflective. About half of each side displays bright copper-gold color, with a balance of burgundy and olive toning. The Plus designation and CAC endorsement earn this coin high marks for collector appeal. Proof 1877 Indian cents are often acquired as alternatives to the conditionally scarce, key-date circulation strike. CAC: 32 in 65, 6 finer (3/19). NGC ID# 229W, PCGS# 2319

**1901 Cent, PR66 Red  
Repunched Date, Snow-PR2**

- 3090 1901 PR66 Red PCGS. Snow-PR2.** A beautiful butter-gold Premium Gem. Nicely struck and free from contact. Carbon is limited to trivial flecks near the U in UNITED and the E in AMERICA. The second 1 in the date shows repunching beneath the base. Only a small percentage of survivors qualify as full Red. Population: 28 in 66 (1 in 66+) Red, 8 finer (2/19). NGC ID# 22AP, PCGS# 2392

**LINCOLN CENTS**

- 3091 1909-S VDB MS64 Brown PCGS.** Luminous original mint luster complements bold design elements on this Choice Brown 1909-S VDB Lincoln cent. Each side displays a woodgrain pattern of chestnut-brown, gold, and olive patina that is highly attractive. A faint partial print is visible in the upper right obverse field when viewed with a loupe. NGC ID# BYKW, PCGS# 2426
- 3092 1909-S VDB MS64 Brown PCGS. CAC.** Golden mint luster warms the medium-brown surfaces of this attractive, near-Gem 1909-S. The finely grained surfaces display a sharp strike and virtually no marks or distractions of any kind. A faint, inconspicuous hairline jumps the T of LIBERTY, the sole abrasion to mention, and it is of little consequence. The V.D.B. initials are bold and sharp. The all-important CAC endorsement confirms the outstanding quality. NGC ID# BYKW, PCGS# 2426
- 3093 1909-S VDB MS64 Red and Brown NGC.** Frosty original luster shimmers across this Choice Red and Brown example as it is rotated beneath a light. Original copper-gold and orange hues dominate each side, while delicate burgundy and chestnut overtones deepen the overall hue of the surfaces. This is a sharp example of the series key, and only a few small flecks are visible with a loupe. NGC ID# 22B2, PCGS# 2427

**1909-S VDB Cent, MS66 Red and Brown  
Great Color and Character**

- 3094 1909-S VDB MS66 Red and Brown PCGS.** This key 1909-S VDB cent has great character. Although fully Red examples are prized and tend to command premiums, astute collectors will appreciate the violet, magenta, and sea-green hues that complement the copper-orange surfaces of this Red and Brown Premium Gem. A slight woodgrain effect furthers the appeal. Detail is strong, including on the initials. Softness is limited to Lincoln's hair and beard. PCGS has only graded one finer Red and Brown submission (3/19). NGC ID# 22B2, PCGS# 2427

**1909-S VDB Lincoln Cent, MS66  
Well-Preserved Red Surfaces**

- 3095 1909-S VDB MS66 Red PCGS.** From a series-low mintage of 484,000 pieces, the 1909-S VDB Lincoln cent is a sought-after key issue. The 1909-S VDB is somewhat scarce in MS66 condition, with the Red designation, and PCGS has only certified 15 numerically finer examples in that category (3/19). This sharply detailed Premium Gem exhibits well-preserved original red surfaces, with vibrant mint luster and no trace of carbon. NGC ID# 22B2, PCGS# 2428

**1909 Lincoln Cent, MS67+ Red  
Top-Grade CAC Registry Coin**

- 3096 1909 MS67+ Red PCGS. CAC.** Ex: Tom Mershon Collection. This pumpkin-gold Superb Gem is fully struck and close to perfect, being conditionally scarce this fine. Bright mint luster illuminates essentially unabraded and carbon-free surfaces. Exceptional quality for this first-year Philadelphia issue without Victor D. Brenner's initials on the reverse. Population: 90 in 67 (13 in 67+) Red, 0 finer. CAC: 25 in 67, 0 finer (3/19).  
Ex: Tom Mershon #2 All-Time PCGS Registry Set of Lincoln Wheat Cents (Heritage, 5/2005), lot 5300, which realized \$3,220; Central States Signature (Heritage, 4/2012), lot 3241, which realized \$3,220.  
**From The Jack-The-Knife Collection of Lincoln Cents.** NGC ID# 22B3, PCGS# 2431

- 3097 1910 MS67 Red PCGS.** Scarce in MS67 Red, this Superb Gem 1910 Lincoln cent is among the finest-known examples of this early Philadelphia issue, showing rich luster and incredible coloration. Sun-orange, gold, and cherry-red hues adorn each side amid luminous frosted luster. Neither side has bothersome abrasions or other imperfections. Population: 46 in 67 (10 in 67+) Red, 0 finer (3/19). NGC ID# 22B5, PCGS# 2437

**1910 Lincoln Cent, MS67 Red  
Condition Rarity, Lustrous Appeal**

- 3098 1910 MS67 Red PCGS.** Swirling luster rolls over the lightly textured, tangerine-orange surfaces of this Superb Gem cent. Although common as a date, this Philadelphia issue is decidedly rare in MS67 and likely unavailable any finer. The devices display a full strike including an exceptionally sharp portrait of Lincoln, with full facial features, beard, and hair as well as bold shoulder details. This appealing cent is just a fleck or two away from the possibility of an even higher grade. Population: 44 in 67 (10 in 67+) Red, 0 finer (2/19).  
Ex: Central States Signature (Heritage, 4/2014), lot 3116, where it sold for \$4,230.  
**From The Jack-The-Knife Collection of Lincoln Cents.** NGC ID# 22B5, PCGS# 2437

- 3099 1913-D MS65 Red PCGS. CAC.** The 1913-D is a better date in the upper Red grades. This CAC-approved Gem displays uniform copper-pink luster and satiny surfaces. The strike is sharp, and a fleck near the left wheat ear stem is the only obvious sign of carbon. PCGS lists 28 finer Red examples. CAC: 18 in 65, 7 finer (3/19). NGC ID# 22BE, PCGS# 2464
- 3100 1914-D AU58 PCGS.** An accurately graded near-Mint example of this Denver key, showing sharp motifs and satiny chocolate-brown surfaces. A few light field marks are only visible with a loupe. Collector-grade 1914-D Lincoln cents are rarely seen at auction in this condition. NGC ID# 84BX, PCGS# 2471
- 3101 1914-D — Altered Color — NGC Details. Unc.** The key date 1914-D is rarer in Mint State than the only two lower mintage issues, the 1909-S VDB and 1931-S. This coruscating and well-struck representative appears virtually unabraded, but the sea-green and brick-red surfaces have been deemed recolored by NGC. Unobtrusive laminations are noted on the obverse margin between 4:30 and 6 o'clock. NGC ID# 84BX, PCGS# 2471
- 3102 1914-D — Smoothed — PCGS Genuine. Unc. Details.** The 1914-D is much rarer in Mint State than the two other traditional low-mintage keys to the series, the 1909-S VDB and the 1931-S. The present satiny example is nicely struck and unabraded. The fields are lightly burnished, but have attractively retoned in sea-green, rose-red, and orange-gold shades.

**1914-D Cent, MS64 Red**  
**Famous Key, Scarce This Fine**

**3103** 1914-D MS64 Red PCGS. Collectors prize the 1914-D as one of the low-mintage keys to the Lincoln cent series. Fewer than 1.2 million pieces were struck, and scarcely are examples offered as fine as this Red near-Gem. Satiny mint luster glows from copper-orange surfaces that feature well-struck motifs. Trivial chatter on the shoulder and a hint of softness on the O in ONE are unimportant. NGC ID# 22BH, PCGS# 2473

**3104** 1915-D MS66 Red PCGS. Hints of emerald and iridescent toning appear on the brilliant coppery-orange surfaces of this frosty and fully lustrous Premium Gem. An important Set Registry coin. Population: 42 in 66 (5 in 66+) Red, 1 finer (3/19).  
*From The Jack-The-Knife Collection of Lincoln Cents.* NGC ID# 22BL, PCGS# 2482

**1915-S Cent, Sharp MS65 Red**

**3105** 1915-S MS65 Red PCGS. Gem-quality examples with Red color are conditionally scarce, and the dearth of higher-graded representatives puts tremendous pressure on coins at this level. Both sides are completely struck from the centers to the rims. The obverse shows rose accents over the portrait that progress to light copper and tan-gold surfaces elsewhere, including the entire reverse. Population: 34 in 65 (1 in 65+) Red, 9 finer (2/19).  
*From The Jack-The-Knife Collection of Lincoln Cents.* NGC ID# 22BM, PCGS# 2485

**1918 Lincoln Cent, MS67 Red**  
**Rarely Offered So Fine**

**3106** 1918 MS67 Red PCGS. A rare Superb Gem Red example of this early Philadelphia Lincoln cent, showing carbon-free surfaces and blazing golden-orange and brass-yellow luster. Sharp design elements and a lack of abrasions further enhance the eye appeal. Easily one of the finest-known 1918 Lincoln cents and a prime Registry Set candidate as such. Population: 37 in 67 (6 in 67+) Red, 1 finer (3/19).  
*From The Jack-The-Knife Collection of Lincoln Cents.* NGC ID# 22BV, PCGS# 2506

**1918-D Cent, MS65 Red**  
**Nearly Fully Struck**

**3107** 1918-D MS65 Red PCGS. Lincoln's portrait, the wheat stalks, and legends are nearly fully struck on this Red Gem. Satin mint luster glistens from surfaces that show tan-gold and deeper copper accents with minor spotting in the right obverse and reverse fields. Attractively textured with a single tick right of Lincoln's mouth. Population: 60 in 65 (23 in 65+) Red, 11 finer (2/19).  
*From The Jack-The-Knife Collection of Lincoln Cents.* NGC ID# 22BW, PCGS# 2509

**1919 Cent, Magnificent MS68 Red**  
**One Coin Graded Higher**

**3108** 1919 MS68 Red PCGS. The Jerald L. Martin Collection example of the 1919 Lincoln cent recently set a new auction record during our 2019 FUN Signature event in Orlando, Florida. This piece compares favorably with that one, showing similar lavender accents over finely textured copper-orange surfaces. Fully struck devices, glistening mint luster, and a lack of carbon or abrasions further the appeal. Population: 17 in 68 Red, 1 finer (2/19).  
*From The Jack-The-Knife Collection of Lincoln Cents.* NGC ID# 22BY, PCGS# 2515

**1919-D Cent, MS66 Red**  
**Strong Portrait Detail**

**3109** 1919-D MS66 Red PCGS. In addition to the eye-catching copper-orange color and vibrant satin mint luster that grace each side, this 1919-D cent in Premium Gem condition exhibits pinpoint detail on Lincoln's portrait. The border elements are slightly softer, but trivially so. The obverse fields are clean, and the reverse only shows a few minor flecks. Population: 19 in 66 (6 in 66+) Red, 2 finer (3/19). NGC ID# 22BZ, PCGS# 2518

- 3110 1920-D MS66+ Red and Brown PCGS. CAC.** The well-preserved surfaces of this Plus-graded Premium Gem show a mix of original red and light brown patina, with vibrant mint luster throughout. The design elements are sharply detailed. Population: 9 in 66 (2 in 66+) Red and Brown, 0 finer. CAC: 2 in 66, 0 finer (3/19). NGC ID# 22C4, PCGS# 2526

**1922-D Cent, MS66 Red  
Registry-Grade Condition Rarity**

- 3111 1922-D MS66 Red PCGS. CAC.** The 1922-D Lincoln cent is famous for its No D varieties, although the regular issue with a clear mintmark is itself a better date. This Premium Gem Red CAC coin is among the finest pieces certified and is rare as such. Each side displays pumpkin-orange and coppery-pink hues. The strike is sharp and there are no bothersome carbon spots. Population: 14 in 66 (1 in 66+) Red, 0 finer. CAC: 4 in 66, 0 finer (3/19).

*From The Jack-The-Knife Collection of Lincoln Cents.* NGC ID# 22C8, PCGS# 2539

**1922 No D Lincoln Cent, AU50  
Die Pair 2, Strong Reverse**

- 3112 1922 No D, Strong Reverse, FS-401, AU50 PCGS.** Die Pair 2, showing a strong reverse. On the obverse, the second 2 in the date is sharper than the rest of the numerals. Lincoln's portrait is poorly defined on this variety and is unreliable for determine a state of wear. The wheat ears on the reverse are more telling. This AU piece displays smooth chocolate-brown surfaces and pleasing eye appeal. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

**1922 No D Cent, AU50  
FS-401, Strong Reverse**

- 3113 1922 No D, Strong Reverse, FS-401, AU50 PCGS.** Die Pair 2. The second 2 in the date is sharp, an identifier for this coveted *Cherrypickers'* variety. The walnut-brown surfaces are free from noteworthy marks, and the lines in the wheat ears are sharp. For Die Pair 2, the mintmark was lapped from the die. Die Pairs 1 and 3 have weak mintmarks, usually apparent upon careful examination. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

- 3114 1923 MS67 Red PCGS. 30th Anniversary Green Label Holder.** Dazzling mint luster just radiates from mint-fresh surfaces on each side of this Superb Gem Red 1923 Lincoln cent. A bright, yellow-gold interior on the obverse cedes to mint red and lemon hues near the borders, while the reverse has a deeper orange-gold center. The strike is sharp, and eye appeal is superb. Population: 25 in 67 (4 in 67+) Red, 2 finer (2/19).

*From The Jack-The-Knife Collection of Lincoln Cents.* NGC ID# 22CA, PCGS# 2545

**1924-D Cent, MS65 Red  
Among the Finest Known  
Ex: Mershon**

- 3115 1924-D MS65 Red PCGS.** Ex: Tom Mershon Collection. This semikey Lincoln cent issue is scarce in all grades, and much in great demand from Lincoln collectors. Full Red Gems such as the present specimen are rare. According to Lange's *The Complete Guide to Lincoln Cents*, "Even lower quality uncirculated 24-D's are very few and far between and these usually have defects of one sort or another. The strike is generally weak to moderate—but seldom really sharp; the color is generally splotchy and/or deeply toned to a reddish brown—with accompanying spots. Fully brilliant and spot-free examples are very scarce."

This example boasts no such distractions, with bright orange-red surfaces front and back, no observable carbon, and a sharp strike that shows slight weakness only on the 4 in the date. Like many examples of this issue, the reverse is rotated about 20 degrees from the obverse. To Lincoln cent collectors, the Mershon pedigree is a definite plus. Population: 45 in 65 (6 in 65+) Red, 1 finer (2/19).

*Ex: Tom Mershon Collection / Central States Signature (Heritage, 5/2005), lot 5345; FUN Signature (Heritage, 1/2007), lot 812.*

*From The Jack-The-Knife Collection of Lincoln Cents.* NGC ID# 22CD, PCGS# 2554

**1925-D Cent, MS65+ Red  
Rarely Offered Finer**

- 3116** 1925-D MS65+ Red PCGS. CAC. Faint die polish lines in the fields of this high-end Gem attest to an early die state. The coin is well-struck and displays satiny copper-red and orange mint luster with only a few scattered pepper specks. The 1925-D is scarce in this grade and rare with CAC endorsement. Finer pieces are nearly uncollectible. Population: 81 in 65 (6 in 65+) Red, 2 finer. CAC: 19 in 65, 1 finer (3/19).  
*From The Jack-The-Knife Collection of Lincoln Cents.* NGC ID# 22CG, PCGS# 2563

- 3117** 1928-S MS65+ Red and Brown PCGS. Small S. San Francisco issues from the 1920s are difficult to locate in full Red, but the present well-struck and unblemished Gem comes close. Both sides are mostly orange-gold, with slight mellowing to tan over the high points and in the central reverse field. Population: 29 in 65 (6 in 65+) Red and Brown, 1 finer (3/19). NGC ID# 22CT, PCGS# 2592

**1930-S Lincoln Cent, MS67 Red  
Among the Finest Certified Examples**

- 3118** 1930-S MS67 Red PCGS. This spectacular Superb Gem Lincoln cent exhibits well-detailed design elements and blazing mint luster on both sides. The original red surfaces are free of mentionable distractions and show no trace of carbon. Overall eye appeal is tremendous. Population: 8 in 67 Red, 0 finer (2/19).  
*Ex: Central States Signature (Heritage, 4/2015), lot 3368, where it realized \$7,637.50.*  
*From The Jack-The-Knife Collection of Lincoln Cents.* NGC ID# 22CZ, PCGS# 2611

**1931 Cent, MS67 Red  
Among the Finest Certified**

- 3119** 1931 MS67 Red PCGS. Although plentiful in lower grades, the 1931 Lincoln cent is a condition rarity at the Superb Gem level, where it is in the highest demand among Registry Set collectors. This piece glows with satiny copper-orange mint luster and it is devoid of bothersome carbon spotting. A finer 1931 cent may not exist. Population: 36 in 67 (6 in 67+) Red, 0 finer (3/19).  
*From The Jack-The-Knife Collection of Lincoln Cents.* NGC ID# 22D2, PCGS# 2614

**1931-D Cent, MS66+ Red  
A Top Example With CAC Approval**

- 3120** 1931-D MS66+ Red PCGS. CAC. Both sides are fully Red with rich copper-orange color. Hints of violet add considerably to the eye appeal, especially at the left obverse border. Satiny-smooth surfaces are arguably clean for the grade, hence the Plus designation and CAC approval sticker. Population: 53 in 66 (5 in 66+) Red, 1 finer. CAC: 14 in 66, 0 finer (3/19). NGC ID# 22D3, PCGS# 2617

**1931-S Lincoln Cent, MS66 Red  
Registry Set Contender**

- 3121** 1931-S MS66 Red PCGS. CAC. From a small mintage of 866,000 pieces, the 1931-S Lincoln cent is a scarce issue in MS66 condition, and PCGS has graded no examples in finer grades with the Red designation (3/19). This delightful Premium Gem exhibits sharply detailed design elements and impeccably preserved original red surfaces that radiate vibrant mint luster throughout. NGC ID# 22D4, PCGS# 2620

- 3122 1933 MS67+ Red PCGS.** This stunning Superb Gem exhibits fiery orange luster and bold design motifs with amazing eye appeal on both sides. Rarely is an example found in such pristine condition. Population: 78 in 67 (11 in 67+) Red, 0 finer (3/19).  
*From The Jack-The-Knife Collection of Lincoln Cents.* NGC ID# 22D7, PCGS# 2629

**1934-D Cent, MS67 Red  
Among the Finest Pieces Known**

- 3123 1934-D MS67 Red PCGS. CAC.** This carbon-free Superb Gem showcases rich copper-orange luster across the interiors with cherry-red border hues. The satiny surfaces are free of abrasions and still show faint die striations, indicating an early die state. The coin is sharp and eye-appealing. No numerically finer 1934-D cents are known. Population: 49 in 67 (4 in 67+) Red, 0 finer. CAC: 10 in 67, 0 finer (3/19).  
*From The Jack-The-Knife Collection of Lincoln Cents.* NGC ID# 22DA, PCGS# 2638

- 3124 1943 MS68 PCGS.** Among the finest 1943 steel cents certified, this Registry-grade MS68 coin displays full detail and impeccable preservation. The silver-white surfaces are satiny aside from an area of shiny planchet (mint made) near the O in ONE. Eye appeal is pleasing. Population: 54 in 68, 0 finer (2/19).  
Ex: Long Beach Signature (Heritage, 5/2003), lot 5408, which realized \$1,380.  
*From The Jack-The-Knife Collection of Lincoln Cents.* NGC ID# 22E4, PCGS# 2711

**1943-S Cent, CAC-Endorsed MS68  
Tied for Finest Certified**

- 3125 1943-S MS68 PCGS. CAC.** The finest-known 1943-S steel cents grade MS68, and they are scarce. CAC-approved coins in this grade are rare. Offered here is a stellar Registry coin and an unsurpassed type candidate. Fully struck design elements complement silvery-white surfaces, which are virtually flawless. Eye appeal is spectacular. Population: 88 in 68, 0 finer. CAC: 35 in 68, 0 finer (2/19). NGC ID# 22E8, PCGS# 2717

**1943-S Steel Cent, MS68  
Rare Top-Grade PCGS CAC Coin**

- 3126 1943-S MS68 PCGS. CAC.** This exemplary steel cent type coin harnesses all of the incredible satin luster that is the hallmark of this issue in high grade. CAC-endorsed, it displays sharp motifs and frost-white surfaces. A hint of reflectivity is evident in the reverse fields. No finer 1943-S steel cents are known. Population: 88 in 68, 0 finer. CAC: 36 in 68, 0 finer (3/19).  
Ex: Long Beach Signature (Heritage, 5/2003), lot 5417, which realized \$1,800.  
*From The Jack-The-Knife Collection of Lincoln Cents.* NGC ID# 22E8, PCGS# 2717

**1944-D/S Cent, FS-512, MS67+ Red  
Type Two Overmintmark Variety**

- 3127 1944-D/S FS-512, Type Two, MS67+ Red PCGS.** Two unused San Francisco obverse dies for 1944 Lincoln cents were sent to Denver, where the D mintmark was punched on top of the S. The FS-512 or Type Two variant has the S visible beneath the upright of the D. This is an outstanding Superb Gem that has brilliant and highly lustrous orange mint frost with exceptional eye appeal. Population: 1 in 67 (1 in 67+) Red, 0 finer (3/19). NGC ID# 2734, PCGS# 37837 Base PCGS# 2725

- 3128 1955 Doubled Die Obverse, FS-101, AU58 NGC.** A momentarily circulated golden-brown example of the famous *Guide Book* variety. Marks are minor and carbon is inconsequential. All obverse legends exhibit a remarkable spread. Housed in a circa-2000 holder. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

1955 Doubled Die Cent, MS63 Brown  
Attractive Original Patina

- 3129 1955 Doubled Die Obverse, FS-101, MS63 Brown PCGS. Lovely original colors on this Select Brown example include copper-orange, olive-brown, and burgundy, with occasional hints of rose throughout. The strike is sharp and contact marks are minimal. FS-101 is a popular variety that is visible to the unaided eye. It is one of the most dramatic mint errors in the Lincoln cent series. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

1955 FS-101 Cent, MS63 Brown  
Doubled Die Obverse

- 3130 1955 Doubled Die Obverse, FS-101, MS63 Brown PCGS. CAC. Mint red lingers within the legends and outlines the devices. The open fields and high points are chocolate-brown. The reverse displays a quartet of subtle spots, near the E and T in CENT, the R in AMERICA, and above the right stem. No marks are remotely relevant. A well-struck Select example of the famous and dramatic doubled die mint error. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

1955 FS-101 Cent, MS64 Brown  
Doubled Die Obverse

- 3131 1955 Doubled Die Obverse, FS-101, MS64 Brown PCGS. CAC. The famously broad spread on the obverse legends instantaneously identifies this popular *Guide Book* variety. Smooth, glossy Brown surfaces will delight the most discerning collector. Steel accents adorn each side. Reverse definition is excellent, while the portrait exhibits unimportant and expected softness. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

1955 Doubled Die Cent, MS64 Brown  
Remarkably Clean, Carbon-Free Surfaces

- 3132 1955 Doubled Die Obverse, FS-101, MS64 Brown NGC. CAC. Golden-brown and apple-green intermingle across this lustrous and remarkably clean near-Gem. No carbon is evident, even when viewed beneath a loupe. The obverse die doubling is dramatic, characteristic of this famous, significant, and highly collectible mint error.  
Ex: FUN Signature (Heritage, 1/2009), lot 513, where it sold for \$3,593.75. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

1955 Doubled Die Obverse Cent  
MS63 Red and Brown, FS-101

- 3133 1955 Doubled Die Obverse, FS-101, MS63 Red and Brown PCGS. The open areas and highpoints are cobalt-blue, while fire-red illuminates recesses. The coruscating surfaces are free from detractors. The FS-101 1955 cent is the most famous of all doubled die varieties, and displays a remarkable spread throughout the obverse legends. NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

1955 Cent, MS64 Red and Brown  
Doubled Die Obverse  
Attractive, Glossy Surfaces

- 3134 1955 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. The 1955 Doubled Die is by far the best known error coin in U.S. numismatics, and it has long been considered a part of the Memorial Reverse cent series. This is an especially attractive example that has roughly equal parts red and brown color on each side. As a result, the surfaces are glossy. Each side is nearly spot-free, an unusual attribute for this issue. NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

**1970-S Doubled Die Cent, MS65 Red and Brown  
Large Date, FS-101**

- 3135** 1970-S Large Date, Doubled Die Obverse, FS-101, MS65 Red and Brown NGC. Large Date 1970-S cents were extensively saved by collectors, but very few have been found with the Doubled Die Obverse. The pivot point must have been close to the date as there is little doubling in that area; however, there is considerable spread between the letters in IN GOD WE TRUST. The obverse displays deep cherry-red mint luster, while the reverse is several shades darker and tends more toward brown. Both sides appear carbon-free, the grade derived from a couple of marks rather than spotting. Census: 5 in 65 Red and Brown, 0 finer (2/19). NGC ID# 22GN, PCGS# 37998 Base PCGS# 2938

**1970-S Cent, MS64 Red  
Large Date, FS-101 Doubled Die Obverse**

- 3136** 1970-S Large Date, Doubled Die Obverse, FS-101, MS64 Red NGC. This widely die doubled variety shows a strong spread on the date, LIBERTY, and IN GOD WE TRUST. Examples are rare. NGC has seen a piece on only 31 occasions, just seven of which were certified as Red. This near-Gem displays satiny copper-red surfaces and sharp devices. A few faint tinges of bluish toning cling to the upper reverse border. FS-101 Census: 3 in 64 Red, 4 finer (1/19). NGC ID# 22GN, PCGS# 37999 Base PCGS# 2939

**Complete Nine-Piece Set of  
1972 Cent Cherrypickers'  
Doubled Die Obverse Varieties**

- 3137** Nine-Piece Set of 1972 Doubled Die Obverse Cents, FS-101 to FS-109. The *Cherrypickers' Guide* lists nine different doubled die obverse varieties of 1972 Philadelphia cents, and the present lot includes one of each. The set includes: FS-101 MS67 Red PCGS, the famous *Guide Book* variety, a virtually pristine orange-red Superb Gem; FS-102 MS66 Red PCGS, splendid peach-red color, a fleck below the R in LIBERTY; FS-103 MS65 Red PCGS, exemplary pumpkin-gold color, minor carbon on reverse exergue; FS-104 MS64 Red and Brown PCGS, mostly olive-brown with red in protected regions, a scarce and contested variety; FS-105 MS65 Red PCGS, magnificent orange-gold color; FS-106 MS65 Red PCGS, exemplary peach-red surfaces; FS-107 MS65 Red PCGS, a few tiny gray freckles across lustrous fire-red surfaces; FS-108 MS65 Red PCGS, among the stronger doubled die varieties, outstanding color and quality; and an FS-109 MS66 Red PCGS, only the tail of the 2 is die doubled, a beautiful orange-red Premium Gem. (Total: 9 coins)

1972 Cent, MS67 Red  
FS-101, Doubled Die Obverse

- 3138** 1972 Doubled Die Obverse, FS-101, MS67 Red PCGS. A spectacular Superb Gem of this famous doubled die variety. All obverse legends exhibit a remarkable spread. The orange-red surfaces are practically immaculate. An intricate strike and bright mint luster further attest to the quality. Population for all 1972 cents: 65 in 67 (1 in 67+) Red, 1 finer (3/19). NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

1972 Doubled Die Cent, MS67 Red  
Important Naked Eye Variety

- 3139** 1972 Doubled Die Obverse, FS-101, MS67 Red PCGS. Like the 1955 Doubled Die cent, this 1972 version can be viewed without magnification, making a highly popular and important variety. There are actually multiple 1972 Doubled Die obverse varieties, but FS-101 was the first to be discovered, and remains the most popular of all those varieties. This example is exquisite, with brilliant and satiny orange mint luster and nearly spot-free surfaces. Population: 66 in 67 Red (1 in 67+ Red), 1 finer (3/19). NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

1995-D FS-101 Lincoln Cent, MS67 Red  
Doubled Die Obverse  
The Finest PCGS Certified

- 3140** 1995-D Doubled Die Obverse, FS-101, MS67 Red PCGS. The motto, IN GOD WE TRUST, is clearly doubled on this amazing Superb Gem that is the only MS67 Red FS-103 cent that PCGS has certified (3/19). This piece has rich orange mint luster with noticeably stippled surfaces from die erosion as struck. Scattered spots are consistent with the grade. Here is an incredibly important opportunity for those collectors seeking the finest available Lincoln cents. PCGS# 38111 Base PCGS# 3130

SMS LINCOLN CENT

1964 SMS Cent, SP65 Red and Brown  
Rare Satin Finish Issue

- 3141** 1964 SMS SP65 Red and Brown PCGS. Needle-sharp detail and satin luster characterize this rare 1964 issue. It is unknown how many were struck, and the survivorship is small. PCGS lists only 23 submissions in all grades. It also unclear why these satin finish coins were struck in 1964, as they are not part of any official Special Mint Set production. One theory suggests that they are experimental strikes for the 1965 coinage. The earliest sets of five coins, cent through half dollar, began appearing at auction in the early 1990s. It is believed that they were originally in the estate of Mint Director Eva Adams and were acquired by Lester Merkin. The cent offered here is luminous and attractive with mostly copper-red color. A few faint wisps of burgundy toning on the obverse earn the Red and Brown color designation. Population: 2 in 65 Red and Brown, 0 finer; 6 in 66 Red, 10 finer (3/19). From a complete five-piece set of 1964 SMS coinage, cent through half dollar, offered in this sale as individual lots. PCGS# 3283

PROOF LINCOLN CENTS

- 3142** 1913 PR66 Red and Brown PCGS. Riotous blue and violet toning overwhelms the underlying mint red of this eye-stopping Premium Gem matte proof. The sharp strike holds its ground, while marks and abrasions are unseen on the finely grained fields or fully brought up devices. We have not seen a more visually memorable 1913 red and brown proof. Population: 56 in 66 (6 in 66+) Red and Brown, 9 finer (3/19). NGC ID# 22KW, PCGS# 3316
- 3143** 1913 PR66 Red PCGS. Rich copper-orange color flows over both sides of this well-struck matte proof, shimmering with unimprovable luster. The coin is nearly mark-free and shows one mentionable spot under the TY of LIBERTY. Housed in an old green label holder. Population: 44 in 66 (3 in 66+) Red, 7 finer (3/19). Ex: Long Beach Signature (Heritage, 2/2006), lot 359, which realized \$2,530. NGC ID# 22KW, PCGS# 3317

1914 Cent, PR66+ Red and Brown  
Rare CAC-Approved Example

- 3144** 1914 PR66+ Red and Brown PCGS. CAC. Well-balanced copper-orange, burgundy-red, and delicate chestnut hues adorn each side of this high-end Premium Gem proof, complementing the sharp strike and near-flawless preservation, which is recognized by CAC. A lone fleck near the 1 in the date is noted as a pedigree marker. Eye appeal is outstanding. Population: 46 in 66 (2 in 66+) Red and Brown, 8 finer; 23 in 66 Red, 10 finer. CAC: 24 in 66, 6 finer (3/19). NGC ID# 22KX, PCGS# 3319

- 3145 1916 PR64 Brown PCGS.** Broad, squared rims frame this needle-sharp, Choice proof, which has a wire rim along the left edge of the obverse. Luminous matte surfaces are free of all distractions except for a sizable carbon spot in the obverse field above the E in LIBERTY. Rich olive-brown hues cover much of each side, although coppery-orange undertones emerge on the obverse. NGC ID# 22KZ, PCGS# 3324

**1916 Cent, PR64 Red and Brown  
Scarce Final-Year Matte Proof Issue**

- 3146 1916 PR64 Red and Brown NGC.** Surrounded by the necessary flat, squared-off rim characteristic of all genuine 1916 matte proofs, this richly colorful Red and Brown example displays purple and blue overtones that overlay deep, brick-red coloration. The finely textured surfaces are sharply struck and free of any distractions. The reverse color is a bit less intense than the obverse, but adds vibrant fire-orange to the palette. Eye appeal is terrific. Census: 23 in 64 Red and Brown, 34 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 22KZ, PCGS# 3325

**1936 Satin Finish Cent, PR66 Red  
Just One Numerically Finer Example Certified**

- 3147 1936 Type One—Satin Finish PR66 Red PCGS.** Satin proofs were struck early in the year, and population figures suggest the Type One Satin Finish proofs are slightly scarcer than the Type Two fully mirrored variety. Flame-orange and lemon-yellow colors play on the smooth and highly lustrous surfaces of this Premium Gem proof. A pair of deep-orange toning spots exist — one above the date, the other below LIBERTY, along with a few pinpoint flecks on the reverse. The strike is extra-sharp. Population: 43 in 66 (4 in 66+) Red, 1 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 22L2, PCGS# 3332

- 3148 1936 Type Two — Brilliant Finish PR65 Red PCGS. CAC.** Vivid copper-orange, rose, and golden-yellow hues adorn the glimmering surfaces of this Gem Red Brilliant Finish proof, complementing a sharp strike. Under a loupe, a few tiny pepper specks are visible, but the overall eye appeal is outstanding for the grade, hence the CAC endorsement. NGC ID# 22L3, PCGS# 3335

**1936 Lincoln Cent, PR66 Red  
Brilliant Finish, Spectacular Mirrors**

- 3149 1936 Type Two — Brilliant Finish PR66 Red NGC.** The gleaming, all-brilliant finish of this 1936 Type Two proof is a stunning contrast to the more sedate satin finish Type One proofs struck earlier in the year. Vibrantly reflective surfaces radiate blaze-orange color, with a lava-like sheen that flows across the deeply mirrored fields with a funhouse effect. There are only three or four microscopic, pinpoint flecks on the reverse seen with a loupe, but they are unseen in-hand. Eye appeal of this Premium Gem is exceptional. Census: 13 in 66 Red, 3 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 22L3, PCGS# 3335

**1941 Lincoln Cent, PR67 Red  
Interesting Coloration**

- 3150 1941 PR67 Red NGC.** The obverse is a consistent orange-gold, but the reverse takes a more radical approach, with light salmon patina in the center complementing some almond-gold coloration, all well within the confines of the Red designation. Both sides are expectedly free of any contact. NGC Census: 12 in 67 (1 in 67+), 0 finer (3/19).  
*Ex: Dallas Signature (Heritage, 10/2008), lot 249.* NGC ID# 3H34, PCGS# 3350

- 3151 1950 PR67 Red Ultra Cameo NGC.** Most proof 1950 Lincoln cents either lack cameo contrast or show only moderate contrast. Red Ultra Cameo pieces are scarce, and they are rare in Superb Gem condition. This Registry-grade coin displays luminous frost across Lincoln's portrait and the wheat ears, producing dramatic contrast with the liquidlike fields. Both sides are fully struck and untuned, showing original copper-pink color. Census: 21 in 67 Red Ultra Cameo (2 in 67+), 1 finer (2/19). NGC ID# 22LA, PCGS# 93359

**1990 No S Cent, PR68 Red Ultra Cameo  
Beautifully Preserved Registry Coin**

- 3152 1990 No S, FS-101, PR68 Red Ultra Cameo NGC.** A small number of 1990 proof sets were issued with cents that lacked a mintmark for the San Francisco Mint. This is a nearly flawless example with original copper-pink color and dramatic cameo contrast. The coin is fully struck and deeply mirrored. The 1990 No S proof cent is one of the most popular modern Mint errors, which had collectors searching their proof sets for an example in the years following its discovery. Census: 33 in 68 Red Ultra Cameo, 26 finer (2/19). NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

**1990 No S Cent, PR69 Red Deep Cameo  
Guide Book Variety**

- 3153 1990 No S, FS-101, PR69 Red Deep Cameo PCGS.** A proof cent die used at the San Francisco Mint in 1990 was put into production without the customary S mintmark, an oversight that is quite fantastic when one considers how many inspections proof dies went through before being put into service. The number of No S proofs known is small, and high-end examples such as this piece are rare. The coin is fully struck and essentially flawless, showing rich copper-orange mint luster and an orange-peel effect in the fields. NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

**TWO CENT PIECES**

- 3154 1864 Small Motto, FS-401, MS64 Red and Brown NGC.** Small Motto 1864 two cent pieces are elusive compared to other issues in the series. Only the low-mintage 1872 issue is comparatively difficult to acquire. This Choice Red and Brown coin displays impressively sharp devices and satiny mint luster. Copper-orange surfaces yield dappled burgundy and violet toning on each side. NGC ID# 22N8, PCGS# 38233 Base PCGS# 3580
- 3155 1865 MS66 Red and Brown PCGS. CAC. Plain 5.** A peach-red Gem with slight mellowing of color on the obverse exergue. Mark-free and lustrous. The dies were somewhat out of parallel, causing an intricate strike on the left borders while the right margins show incompleteness. A plentiful date in most grades but not in the present quality. Population: 53 in 66 (4 in 66+) Red and Brown, 1 finer. CAC: 42 in 66, 0 finer (3/19). NGC ID# 22NA, PCGS# 3583

- 3156 1866 MS66 Red and Brown PCGS.** A beautifully preserved coin, among the finest Red and Brown pieces certified. A full Red designation might have been achieved were it not for a dusting of chestnut color in the centermost areas. The majority of each side is copper-gold and lustrous. A well-struck coin, save for some softness on the horizontal shield lines. The obverse has an intriguing radial die crack from the rim at 2 o'clock along the top of the arrowhead. Population: 17 in 66 (1 in 66+) Red and Brown, 0 finer; 15 in 66 (2 in 66+) Red, 0 finer (3/19). NGC ID# 3XHP, PCGS# 3589

**1866 Two Cent Piece, MS66  
Pristine Red and Brown Surfaces**

- 3157 1866 MS66 Red and Brown PCGS. CAC.** The virtually pristine surfaces of this delightful Premium Gem display a mix of original red, light brown, and crimson patina with vibrant mint luster underneath. The design elements are well-detailed, with a touch of the usual softness on the banner. Population: 17 in 66 (1 in 66+) Red and Brown, 0 finer. CAC: 10 in 66, 0 finer (3/19). NGC ID# 3XHP, PCGS# 3589

**1871 Two Cent, MS65 Red  
Clean, Pinpoint-Sharp Example**

- 3158 1871 MS65 Red PCGS.** The date, shield, leaves, wreath, and legends all display pinpoint detail. Each side is softly lustrous with copper-orange color and an impressive lack of bagmarks or other abrasions. A small planchet void occurs within the vertical shield recess at the central obverse. The 1871 is scarce in Gem Red condition and becomes an essentially inaccessible rarity any finer. Population: 15 in 65 (1 in 65+) Red, 4 finer (3/19). NGC ID# 22NE, PCGS# 3611

## PROOF TWO CENT PIECES

### 1865 Two Cent, PR67 Red and Brown A High-End NGC Registry Coin

- 3159 1865 PR67 Red and Brown NGC.** No Red proof 1865 two cent pieces are certified at NGC, making this Superb Gem Red and Brown coin one of the finest at that service (2/19). It displays incredible sharpness and deeply reflective fields. Both sides have a greenish-gold hue with coppery undertones, earning the Red and Brown designation. Eye appeal is outstanding, as it should be for this lofty grade. Census: 3 in 67 Red and Brown, 0 finer (2/19). NGC ID# 274U, PCGS# 3628

### 1869 Two Cent, PR65 Red High-End for the Assigned Grade

- 3160 1869 PR65 Red NGC. CAC.** The surfaces of this Gem proof two cent are virtually pristine, with bright and smooth mirrored fields and sharply struck devices. Brilliant copper-red surfaces display a blush of reddish-orange color, and each side is free of all but a few irrelevant, infinitesimal carbon flecks. The green CAC endorsement sticker is clearly deserved, and the coin is housed in a flawless previous generation NGC holder with an intact, exposed hologram on the reverse. Census: 14 in 65 Red, 10 finer. CAC: 7 in 65, 2 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 274Y, PCGS# 3641

- 3161 1872 PR65 Red and Brown PCGS.** The circulation strike 1872 two cent piece is a key date with a mintage of only 65,000 coins. Many collectors opt for an attractive proof as a more affordable alternative in high grade. This Gem Red and Brown coin displays razor-sharp detail and reflective fields. Original copper-orange color complements a balance of burgundy and lilac-blue toning. Eye appeal is outstanding. NGC ID# 2752, PCGS# 3649
- 3162 1872 PR66 Red and Brown PCGS.** Mint red color is plentiful beneath a blizzard of tan-brown toning specks that evenly blanket both sides. Mirroring of the fields beneath the patina shines through, and the eye appeal is strong for this Red and Brown proof. In high-grade circulation strike format, the 1872 is a series key, and the issue is almost equally challenging at the Premium Gem level and beyond. Population: 40 in 66 (3 in 66+) Red and Brown, 2 finer (3/19). NGC ID# 2752, PCGS# 3649

### 1873 Closed 3 Two Cent, PR65 Brown Multicolor Toning

- 3163 1873 Closed 3 PR65 Brown PCGS.** The Closed 3 logotype is believed to represent original proofs of 1873, while the Open 3 variety is a later restrike. This Gem Brown coin displays sharp motifs and mirrored fields with vivid plum, olive-green, gold, and blue toning. Neither side exhibits bothersome contact marks. Population: 24 in 65 Brown, 12 finer (3/19). NGC ID# 2753, PCGS# 3651

### 1873 Two Cent, PR64 Red and Brown Proof-Only Key, Closed 3

- 3164 1873 Closed 3 PR64 Red and Brown PCGS.** The two cent series culminates with a proof-only issue that represents the key to the entire set. The *Guide Book* reports an estimated production of 600 pieces, including both Closed 3 and Open 3 types. Deep coppery color includes iridescent accents. The fields are flashy, though contrast is minimal. High-end for the grade with little evidence of contact or carbon. NGC ID# 2753, PCGS# 3652

### 1873 Two Cent, PR64 Red and Brown Colorful Closed 3 Representative

- 3165 1873 Closed 3 PR64 Red and Brown PCGS. CAC.** Closed 3 proof two cents are regarded as originals, while Open 3 coins have been called restrikes. About 600 pieces were struck in all. This gorgeous near-Gem enjoys a mix of bright copper-orange, rose, and violet color over flashy fields and razor-sharp devices. Undeniably high-end and housed in an old green label holder.  
*From The William Rehwald Proof Set Collection.* NGC ID# 2753, PCGS# 3652

1873 Closed 3 Two Cent  
PR65 Red and Brown

- 3166 1873 Closed 3 PR65 Red and Brown NGC. Fiery copper-orange surfaces are significantly more Red than Brown. Flashy fields display eye-catching reflectivity and stand in stark contrast to the fully struck devices, although the cameo effect is insufficient for a formal designation. The estimated mintage for this proof-only issue, including Closed and Open 3 types, is 600 coins. NGC ID# 2753, PCGS# 3652

1873 Two Cent, PR65 Red and Brown  
'Original' Closed 3 Type

- 3167 1873 Closed 3 PR65 Red and Brown PCGS. According to Breen's *Proof Encyclopedia*, "It is probable that some of the unsold originals [Closed 3] were melted after April 1, 1873 when the new Coinage Act became effective, abolishing the denomination and changing weights of silver coins." Amber and golden-brown surfaces maintain considerable coppery color, explaining the designation. Violet accents also appear over flashy fields and expectedly sharp devices on this Gem two cent proof. NGC ID# 2753, PCGS# 3652

THREE CENT SILVER

1851-O Three Cent Silver, MS66  
Finest at PCGS and CAC

- 3168 1851-O MS66 PCGS. CAC. A single issue in the entire three cent silver series was produced at a branch mint: the 1851-O. The New Orleans facility coined 720,000 pieces that year. Most coins saw significant circulation, but Mint State examples remain collectible through MS64. This Premium Gem ranks among the finest examples at PCGS and CAC. Central strike detail is slightly soft, but the legends, including the mintmark, are sharp. Gunmetal-blue and golden toning covers most of each side, except for the obverse star, which remains frosty. Population: 35 in 66 (4 in 66+), 0 finer. CAC: 21 in 66, 0 finer (3/19). NGC ID# 22YY, PCGS# 3665

1854 Three Cent Silver, MS65  
CAC-Approved Type Two Coin

- 3169 1854 MS65 PCGS. CAC. The year 1854 saw the debut of the Type Two three cent silver, with outlines around the star on the obverse. This Gem example is scarce, and it is rare with the CAC green label. Finer examples seldom come available. This outstanding type is sharp and satiny with dusky olive-gold toning over each side. Population: 55 in 65 (1 in 65+), 19 finer. CAC: 26 in 65, 15 finer (3/19). NGC ID# 22Z3, PCGS# 3670

- 3170 1855 MS64 PCGS. Splashes of blue, gold, and rose toning accompany areas of light silver on the obverse, with emerald and gold toning on the reverse of this Choice Mint State Type Two three cent silver piece. Somewhat weakly defined at the lower obverse and upper reverse. Population: 50 in 64, 27 finer (3/19). NGC ID# 22Z4, PCGS# 3671

1857 Three Cent Silver, MS65+  
Rarely Seen Finer

- 3171 1857 MS65+ NGC. CAC. Despite the substantial mintage of over 1 million pieces, the 1857 three cent silver piece is an elusive issue in MS65 condition and finer coins are rare. This Plus-graded Gem exhibits well-detailed design elements, with just a touch of softness at the peripheries, and dramatic clash marks on both sides. Attractive shades of pale gold toning enhance the well-preserved surfaces, with vibrant mint luster underneath. Census: 35 in 65 (1 in 65+), 12 finer. CAC: 9 in 65, 11 finer (3/19). NGC ID# 22Z6, PCGS# 3673

**1861 Three Cent Silver, MS67 ★  
Rarely Seen Finer**

- 3172 1861 MS67★ NGC.** The central design elements of this delightful Superb Gem are sharply detailed, but a touch of softness shows on some peripheral elements, like the U in UNITED and some star centers. Dramatic clash marks are evident on both sides. The impeccably preserved surfaces are toned in shades of lavender and sea-green, with vibrant mint luster underneath. Census: 29 in 67 (1 in 67★), 8 finer (2/19).  
From the *Lake County Collection*. NGC ID# 22ZA, PCGS# 3679

**1862/1 Three Cent Silver, MS67  
Among Finest Certified**

- 3173 1862/1 FS-301 MS67 NGC. CAC.** The *Cherrypickers' Guide* credits John Cobb as discoverer of the 1862/1 in 1963. The upright of the 1 has low relief but is apparent between the ball and base of the 2. A die crack through the 1, and a die line from the lowest tip of the star, are also diagnostic for the variety. This pristine Superb Gem exhibits an intricate strike and displays multicolor aquamarine, chestnut-gold, and cherry-red toning. Census: 14 in 67 (1 in 67★), 0 finer. CAC: 8 in 67, 0 finer (3/19). NGC ID# CBR7, PCGS# 38580 Base PCGS# 3681

**1864 Three Cent Silver, MS65+  
Prooflike High-End Surfaces**

- 3174 1864 MS65+ PCGS.** This prooflike, high-end Gem three cent silver is brightly mirrored and attractively toned in teal-blue and peach-gold hues. As often seen, die clashing visits both sides of the coin, but the strike is nevertheless sharp except for a few of the reverse stars. Both the eye appeal and technical quality are terrific. From a scant mintage of 12,000 pieces. Population: 2 in 65+, 33 finer (2/19). NGC ID# 22ZE, PCGS# 3684

**1867 Three Cent Silver, MS66  
Prooflike Surfaces**

- 3175 1867 MS66 NGC.** These silver coins, which once flooded the channels of American commerce, disappeared amid the hoarding of gold and silver during the Civil War. By 1863, the Mint had ceased mass production of these diminutive subsidiary pieces, striking small batches every year just so they would have a few on hand when needed to pay off depositors. In 1867, only 4,000 coins were minted. All examples of this date are scarce, with just 121 grading events at NGC and PCGS combined. Premium Gems are rare and nearly impossible to upgrade.

This well-struck example displays prooflike tendencies, with glassy fields and moderately frosted motifs. Mostly brilliant surfaces showcase glints of original golden color, and there are just a couple of ticks around the star. Census: 3 in 66, 2 finer (3/19). NGC ID# 22ZH, PCGS# 3687

- 3176 1870 MS64 PCGS.** This Choice Mint State piece features a bold strike and reflective fields beneath light gold toning splashes on its brilliant silver surfaces. Only 3,000 were minted and few survive in higher Mint State grades with an average certified grade just below MS60. Population: 16 in 64, 20 finer (3/19). NGC ID# 22ZL, PCGS# 3691

**1871 Three Cent Silver, MS66+  
Seldom Offered Finer**

- 3177 1871 MS66+ PCGS.** The Mint State population of the 1871 three cent silver is dispersed throughout the grade spectrum, although pieces grading finer than MS66 are somewhat rare. This Plus-graded coin displays semiprooflike fields and well-detailed motifs, with only trivial softness in the central shield. A trace of champagne toning graces the well-preserved surfaces. Population: 34 in 66 (4 in 66+), 15 finer (3/19). NGC ID# 22ZM, PCGS# 3692

**PROOF THREE CENT SILVER**

**1857 Three Cent Silver, PR65  
Probably Fewer Than 75 Proofs Extant**

- 3178 1857 PR65 PCGS.** CAC. This elusive Type Two three cent silver proof was struck the year before the Mint began regular sales of proof sets to collectors. An unknown quantity was struck, but probably fewer than 75 specimens are known. Soft blue-violet patina dominates the obverse and is joined by orange-gold and beige hues on the reverse. This piece displays great overall eye appeal. Three minute marks appear on the lower part of the last stand of the III in the denomination. Population: 10 in 65 (1 in 65+), 5 finer. CAC: 14 in 65, 2 finer (2/19).  
*Ex: FUN Signature (Heritage, 1/2013), lot 3288; Central States Signature (Heritage, 4/2013), lot 4142, where it brought \$11,162.50. NGC ID# 27C4, PCGS# 3704*

**1863/2 Three Cent Silver, PR64 Cameo  
Rare Overdated Guide Book Variety**

- 3179 1863/2 PR64 Cameo PCGS.** CAC. Strong magnification shows what is believed to be the downstroke of a 2 within the lower loop of the 3 in the date. Walter Breen characterized these as restrikes, saying they were "struck after original 1863 and 1864 proofs, but before at least some 1864 business strikes." We have handled remarkably few of these overdates over the years, an indication of the minority of proofs that were struck from these overdated dies. Each side is mostly brilliant with faint traces of peripheral golden color. The fields are remarkably reflective, enhancing stark contrast against the frosted devices. Population: 7 in 64 Cameo, 7 finer. CAC: 4 in 64, 7 finer (2/19).  
*Ex: Dallas Signature (Heritage, 10/2012), lot 3348, where it brought \$8,225. NGC ID# 22ZP, PCGS# 83713*

- 3180 1863 PR65 PCGS.** Only 460 proof three cent silver pieces were struck in 1863. Full sharpness and reflective fields are the hallmarks of this Gem proof, showing needle-sharp definition across the shield, border stars, arrows, and olive branch. No die lapping is seen in the recesses of the C, giving this piece the eye appeal that the unimpeded design presents. Blue-green and lavender border toning cedes to near-brilliant champagne interiors. Population: 25 in 65 (1 in 65+), 20 finer; 7 in 65 Cameo, 8 finer (2/19). NGC ID# 7VZF, PCGS# 3712

**1866 Three Cent Silver, PR66  
Vivid, Multicolor Toning**

- 3181 1866 PR66 PCGS.** CAC. From a mintage of 725 pieces, this spectacular Premium Gem proof exhibits sharply detailed design elements and deeply reflective fields throughout. The impeccably preserved surfaces are blanketed in attractive shades of emerald-green and cerulean-blue toning. Eye appeal is terrific. Population: 22 in 66 (1 in 66+), 2 finer. CAC: 9 in 66, 2 finer (3/19). NGC ID# 27CC, PCGS# 3716
- 3182 1870 PR64 NGC.** This attractive Choice proof exhibits sharply detailed design elements throughout and the well-preserved surfaces include deeply reflective fields under shades of lavender-gray and jade toning. Census: 87 in 64, 69 finer (2/19). NGC ID# 27CF, PCGS# 3721

**3183 1873 PR64 PCGS.** A final-year proof-only issue with a scant production of 600 pieces. This intricately impressed example has exemplary surfaces. The centers are pearl-white and the borders show blushes of apple-green and chestnut-gold. Encased in an old green label holder.

**From The William Rehwald Proof Set Collection.** NGC ID# 27CJ, PCGS# 3724

**3184 1873 PR64 Cameo NGC. CAC.** The sharply detailed frosty design elements contrast boldly with the reflective fields of this impressive Choice proof, creating a noticeable cameo effect, despite the attractive shades of emerald-green and cerulean-blue toning that blanket the lightly marked surfaces. Census: 22 in 64 Cameo, 33 finer. CAC: 9 in 64, 33 finer (3/19).

**From The William Rehwald Proof Set Collection.** NGC ID# 27CJ, PCGS# 83724

## THREE CENT NICKEL

**1880 Three Cent Nickel, MS67+  
None Finer, Glistening Mint Brilliance**

**3185 1880 MS67+ PCGS. CAC.** Production began to dwindle toward the middle part of the three cent nickel series. The 1879 and 1880 claim the first truly low mintages after a couple of proof-only emissions (21,000 coins for this issue). This Plus-graded and CAC-endorsed Superb Gem appears even finer than the lofty grade implies. Lustrous, virtually pristine surfaces offer glints of golden color amid glistening mint brilliance. Population: 44 in 67 (3 in 67+), 0 finer. CAC: 16 in 67, 0 finer (3/19). NGC ID# 275C, PCGS# 3748

## PROOF THREE CENT NICKELS

**3186 1865 PR64 Cameo NGC.** The date is repunched west, similar to the business variety FS-302, but without the advanced die cracks associated with that *Cherrypickers'* entry. One shallow flan imperfection is noted on the cheek. The first-year 1865 is a key date in proof format, and this brilliant and flashy example is certain to command bidder attention.

**From The William Rehwald Proof Set Collection.** NGC ID# 275K, PCGS# 83761

**3187 1876 PR66 Ultra Cameo NGC.** Cameo examples of this issue are rather infrequently seen, especially those given an Ultra/Deep designation. Frosty devices standing out amidst the mirrored fields of this Premium Gem confirm its Ultra status. Essentially untoned, sharply struck, and nicely preserved. Census: 8 in 66 Ultra Cameo, 3 finer (2/19).

**Ex: Central States Signature (Heritage, 4/2010), lot 421, realized \$3,220.** NGC ID# DA69, PCGS# 93772

## 1877 Three Cent Nickel, PR64 Elusive Proof-Only Key Issue

**3188 1877 PR64 NGC.** Minor proof sets issued in 1877 contained three standout issues — the 1877 cent, plus the proof-only three cent nickel and proof-only Shield nickel. This three cent piece almost certainly was once part of a minor proof set, or possibly one of the silver proof sets that also contained the minor denominations. Just 900 pieces were struck. This near-Gem example was well-preserved, with subtly mirrored fields and a full strike. Faint lilac and gold accents add eye appeal to the pleasing nickel-blue surfaces. Housed in an early NGC holder (no barcode) with hologram intact.

**From The William Rehwald Proof Set Collection.** NGC ID# 275X, PCGS# 3773

## SHIELD NICKELS

**3189 1867 Rays, Repunched Date, FS-301, AU55 PCGS. CAC.** The *Cherrypickers' Guide* describes the repunching on the date as, “the top of a 1 is evident far to the west of the primary 1, and the top of a 7 is evident far to the east of the primary 7.” This Lightly worn Choice AU specimen displays lightly abraded surfaces, under hints of lavender-gray and pale gold toning. Population (for the variety): 2 in 55, 2 finer (3/19). NGC ID# 22NY, PCGS# 38319 Base PCGS# 3791

**3190 1873 Open 3 MS65+ PCGS. CAC.** A Plus-graded Gem representative of the Open 3 variety, with sharply detailed design elements and a network of peripheral die cracks on the upper obverse. This coin displays well-preserved, lustrous surfaces, under pleasing shades of lavender-gray and pale gold toning. Population: 47 in 65 (7 in 65+), 13 finer. CAC: 18 in 65, 9 finer (3/19). NGC ID# 22P8, PCGS# 3800

## 1873 Open 3 Shield Nickel, AU55 FS-1301, Large Over Small Date

**3191 1873 Open 3, Large Over Small Date, FS-1301, AU55 PCGS. CAC.** The *Cherrypickers'* reference states: “This is a very rare variety, always sought by the many Shield nickel specialists.” The smaller 3 is evident between the primary 73 in the date. This CAC-endorsed Choice AU example displays satiny champagne-gray surfaces with strong detail. There are no mentionable abrasions. NGC ID# 22P8, PCGS# 38394 Base PCGS# 3800

1873 Closed 3 Shield Nickel, MS65+  
Rare CAC-Approved Example

- 3192** 1873 Closed 3 MS65+ PCGS. CAC. The central devices are sharply detailed, although the rims are not fully squared due to a slightly incomplete strike. This high-end Gem displays semireflective fields and warm golden toning. Eye appeal is outstanding. The 1873 Closed 3 Shield nickel is scarce in this grade and rare finer. Only a handful of pieces are CAC endorsed. Population: 50 in 65 (21 in 65+), 23 finer. CAC: 9 in 65, 1 finer (3/19). NGC ID# 22P7, PCGS# 3801

- 3193** 1875 MS66 PCGS. A conditionally rare Premium Gem example of this Shield nickel issue, showing full strike sharpness and satiny, champagne-tinted mint luster. An array of peripheral die cracks is visible on the obverse around the date, and a series of tiny marks below IN GOD prevents an even finer numeric designation. Population: 16 in 66 (2 in 66+), 1 finer (3/19). NGC ID# 22PA, PCGS# 3804

- 3194** 1876 The Bleeder, FS-401, MS63 PCGS. A mint engraver botched recutting of the vertical shield stripes on the working obverse die. Four lines extend far into the horizontal shield lines, including one that reaches the shield border. *Cherrypickers'* calls it "the only known variety of its kind in the Shield nickel series." Well struck and coruscating with smooth surfaces and dusky olive-gray toning. Population: 3 in 63, 3 finer (3/19). PCGS# 569428 Base PCGS# 3805

- 3195** 1883/2 FS-303 AU58 PCGS. CAC. The base of an errant 2 is between the 83. A retained cud below the 18 in the date confirms the specific overdate variety. This silver-gray representative momentarily serviced commerce, apparent as a hint of wear on the upper horizontal shield stripes. Free from relevant contact. Population: 7 in 58, 6 finer (3/19). PCGS# 38414 Base PCGS# 3813

## PROOF SHIELD NICKELS

- 3196** 1866 Rays PR64 NGC. CAC. The Rays subtype was struck only during the first two years of the series. The 1867 Rays proof is a great rarity, which focuses proof type demand on the 1866. The present fully struck near-Gem is smooth, satiny, and lightly toned. Housed in a former generation holder. CAC: 13 in 64, 18 finer (3/19). *From The William Rehwald Proof Set Collection.* NGC ID# 276G, PCGS# 3817

1873 Shield Nickel, PR67 Cameo  
Closed 3

- 3197** 1873 Closed 3 PR67 Cameo PCGS. An estimated 1,100 proof Shield nickels were struck early in 1873, all with the Closed 3 in the date. This spectacular Superb Gem exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices. The impeccably preserved surfaces show hints of pale gold toning, with outstanding eye appeal. Population: 4 in 67 (1 in 67+) Cameo, 0 finer (3/19). NGC ID# 276P, PCGS# 83827

- 3198** 1876 PR67 NGC. Fully struck and pristine, this marvelously preserved Superb Gem exhibits lovely toning variations over each side, in pastel shades of gold, lavender, and steel-blue. The fields are only mildly reflective, but the attractive coloration and exquisite preservation of the piece make that seem less important. The majority of extant proof 1876 Shield nickels fall into the PR60-PR64 grade range. Census: 6 in 67 (1 in 67+, 1 in 67★), 0 finer (2/19). *Ex: Dallas Signature (Heritage, 11/2005), lot 529, realized \$2,990.* NGC ID# 4S39, PCGS# 3830

1877 Nickel, Colorful PR64  
Proof-Only Shield Nickel Issue

- 3199** 1877 PR64 PCGS. As a proof-only issue, the 1877 Shield nickel claims the smallest mintage of the series. A reported 900 pieces were struck for use in proof sets, although the actual mintage might have been slightly higher according to some researchers. This is near-Gem example, with ruby-red, orange, and lilac-gray toning that subdues any mirroring in the fields. The strike is pinpoint-sharp throughout both sides of this highly attractive and well-preserved proof. Housed in a first-generation "rattler" PCGS holder. *From The William Rehwald Proof Set Collection.* NGC ID# 276U, PCGS# 3831

**1877 Shield Nickel, PR65**  
Only Proofs Coined This Year

- 3200 1877 PR65 NGC.** Only 900 Shield nickels were struck in 1877, all in proof format. This Gem survivor displays sharp detail and a dusting of golden-amber toning. As usual for this issue, the fields are satiny rather than deeply reflective. A popular proof-only Shield nickel essential for a complete date set of this series. NGC ID# 276U, PCGS# 3831

**1877 Shield Nickel, PR65**  
Key Proof-Only Issue

- 3201 1877 PR65 PCGS.** The 1877 Shield nickel is a proof-only issue and an acknowledged key to the series. Only 900 examples were struck to satisfy collector demand. This attractive Gem proof exhibits sharply detailed design elements and well-preserved surfaces, with a mix of hazy reflectivity and satiny mint luster in the fields. PCGS has graded 48 numerically finer examples (2/19). NGC ID# 276U, PCGS# 3831

**1877 Shield Nickel, PR66+**  
Pastel-Toned Key

- 3202 1877 PR66+ PCGS.** Delicate pastel toning graces uncommonly reflective fields on this high-end Premium Gem proof, complementing sharp design elements. Eye appeal is outstanding. The 1877 Shield nickel was only produced in proof format, to the tune of just 900 pieces. Population: 48 in 66 (3 in 66+), 1 finer (3/19). NGC ID# 276U, PCGS# 3831

**1877 Shield Nickel, PR62 Cameo**  
Only 900 Proofs Struck

- 3203 1877 PR62 Cameo NGC.** The 1877 Shield nickel was only struck in proof format, and coinage was limited to just 900 pieces. Among known examples today, Cameos are in the minority. This piece displays fully struck details and moderately reflective fields. Contrast is apparent on each side amid a hint of light golden toning. Eye appeal is excellent for the grade. NGC ID# 276U, PCGS# 83831

**1877 Nickel, PR66 Cameo**  
Proof-Only Key to the Set

- 3204 1877 PR66 Cameo NGC.** The well-known 1877 Shield nickel is a proof-only issue produced to the lowly extent of 900 pieces. It serves as one of the popular and challenging keys to the set. This marvelous Premium Gem representative with Cameo contrast remains entirely black-and-white. It features deep field reflectivity and frosted devices that show complete design detail. A sizeable lintmark (as-made) appears at 4 o'clock on the reverse. There are five finer Cameo submissions at NGC (3/19). NGC ID# 276U, PCGS# 83831

**1881 Nickel, PR67+ Cameo**  
Finest at PCGS in This Category

- 3205 1881 PR67+ Cameo PCGS. CAC.** Only 68,000 Shield nickels were struck for circulation in 1881. Proof production represented another 3,575 pieces. Given that PCGS has only certified four specimens in Deep Cameo, including three Superb Gems, this is essentially the finest 1881 proof nickel available to collectors. Frosted design elements appear to float over the watery mirrors. Totally brilliant and void of mentionable contact. Population: 34 in 67 (6 in 67+) Cameo, 0 finer. CAC: 30 in 67, 0 finer (3/19). NGC ID# 276X, PCGS# 83836

## LIBERTY NICKELS

- 3206 1885 AU58 NGC.** An outstanding collector-grade example of this key Liberty nickel issue, showing decidedly prooflike fields and near-brilliant color. Only the faintest touch of high-point friction is observed on each side. Partial definition is visible on the corn ear to the left of the wreath bow, and the border stars are sharp. NGC ID# 2773, PCGS# 3846

### 1885 Nickel, MS66 Warm Golden Toning

- 3207 1885 MS66 PCGS.** Ex: Richmond Collection. The 1885 Liberty nickel is the key to the series, commanding a strong premium even in low circulated grades. The mintage of less than 1.5 million pieces is only the second lowest in the series, but the 1885 is scarcer overall than the 1912-S, which is the one lower-mintage date (238,000 pieces). This Premium Gem example displays a full strike and vibrant luster. Warm golden toning blankets each side. Population: 95 in 66 (57 in 66+), 4 finer (3/19).  
Ex: Richmond Collection, Part II (David Lawrence, 11/2004), lot 1225; ANA Signature (Heritage, 8/2018), lot 3253, where it realized \$6,308.40. NGC ID# 2773, PCGS# 3846

- 3208 1891 MS66 PCGS.** This spectacular Premium Gem exhibits unusually sharp definition on the lower wreath and the impeccably preserved surfaces show highlights of lavender-gray and pale gold toning, with vibrant mint luster throughout. Population: 37 in 66 (7 in 66+), 2 finer (3/19). NGC ID# 2776, PCGS# 3852

### 1912 Liberty Nickel, MS66+ Tied for Finest Certified

- 3209 1912 MS66+ PCGS. CAC.** Orange-gold toning warms the satiny, almost flawlessly preserved surfaces of this high-end, CAC-endorsed Premium Gem. The strike is moderately sharp, although a few obverse border stars and the lower-left portion of the wreath are a trifle soft. The 1912 is the last regular-production issue in the series from this mint, and it is scarce in MS66. No Superb Gems are known, making MS66+ coins such as the present the finest pieces available. Population: 59 in 66 (3 in 66+), 0 finer. CAC: 13 in 66, 0 finer (3/19). NGC ID# 277N, PCGS# 3873

### 1912-D Nickel, Sharp MS66 Only One Coin Finer at PCGS

- 3210 1912-D MS66 PCGS.** The 1912-D Liberty nickel is the first issue of this denomination struck at the Denver Mint, and it is the only D-mint issue of this design type. Examples are readily available through MS65, but Premium Gems are scarce, and only a few finer pieces are known. This Registry-grade coin displays a remarkably sharp strike on the stars and wreath, with softly frosted luster and light golden toning. Population: 64 in 66 (6 in 66+), 1 finer (3/19). NGC ID# 277P, PCGS# 3874

- 3211 1912-S MS65+ PCGS.** The usual satin luster of the 1912-S Liberty nickel is on full display on this Plus-graded Gem, unaffected by abrasions. Each side has a delicate lavender hue with golden borders. Strike weakness affects Liberty's temple and the corresponding lower-left portion of the wreath, as usual, but there are no other imperfections on this coin. Finer 1912-S nickels are scarce. Population: 45 in 65+, 50 finer (2/19). NGC ID# 277R, PCGS# 3875

## PROOF LIBERTY NICKELS

### 1884 Nickel, Glittering PR68 Cameo

- 3212 1884 PR68 Cameo NGC.** This is an exceptionally well-preserved Superb Gem proof from a mintage of 3,942 specimens. It is tied with two others for finest at NGC and bests all Cameo submissions at PCGS (3/19). Glittering, untuned surfaces exhibit profound field reflectivity. Essentially void of post-Mint contact. NGC ID# 22PV, PCGS# 83882

1885 Nickel, PR67+ Cameo  
Most Famous Date in the Series

**3213 1885 PR67+ Cameo NGC.** Collectors for whom a similarly well-preserved business strike is out of reach might want to consider this gorgeous Superb Gem Cameo proof with captivating field-device contrast. Both sides are entirely brilliant, enhancing field reflectivity and the effect of thick mint frost over the motifs. The regular commercial mintage of 1.4 million nickels was supplemented with a production of 3,790 proofs in 1885. Census: 18 in 67 Cameo (3 in 67+, 2 in 67★), 1 finer (3/19). NGC ID# 277T, PCGS# 83883

**3214 1885 PR64 Deep Cameo PCGS.** While proof 1885 nickels are not rare in the absolute sense, they enjoy much of the desirability of the business strikes of this date, as high grade Uncirculated coins are so scarce. This piece has exceptionally deep mirrors in the fields and there is a significant overlay of mint frost on the devices that provides stark cameo contrast. The slightest hint of rose toning is present. Population: 1 in 64 Deep Cameo, 4 finer (3/19). Ex: Long Beach Signature (Heritage, 9/2004), lot 5797, which realized \$2,357.50; Long Beach Signature (Heritage, 2/2005), lot 5913, which realized \$1,955.

From The William Rehwald Proof Set Collection. NGC ID# 277T, PCGS# 93883

1895 Nickel, PR66 Cameo  
Lovely Pastel Toning

**3215 1895 PR66 Cameo NGC.** Delicate pastel rainbow hues form concentric rings around the obverse of this Premium Gem Cameo proof, complementing a light peach interior. The reverse has pastel peach, sky-blue, and lilac color. This is a fully struck proof with modest field-device contrast. Census: 6 in 66 Cameo, 0 finer; 2 in 66 Ultra Cameo, 0 finer (3/19). NGC ID# 2785, PCGS# 83893

1896 Liberty Nickel, PR67  
Registry Set Contender

**3216 1896 PR67 PCGS.** This spectacular Superb Gem proof exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces include deeply reflective fields, under low-intensity shades of sea-green and lilac toning. The 1896 proof Liberty nickel claims a mintage of 1,862 pieces. Population: 5 in 67 (1 in 67+), 0 finer (3/19). NGC ID# 2786, PCGS# 3894

**3217 1897 PR67 Cameo PCGS. CAC.** The obverse boasts distinctive golden-tan woodgrain toning, while the reverse is less intensely imbued with similar coloration. Both sides exhibit good contrast between the frosted devices and reflective fields. One tiny contact mark is noted on Liberty's jaw, but this remains an exceptional piece. Population: 20 in 67 (5 in 67+) Cameo, 3 finer. CAC: 19 in 67, 4 finer (2/19). NGC ID# 2787, PCGS# 83895

BUFFALO NICKELS

1913-D Type One Nickel, MS67  
Multicolor Patination

**3218 1913-D Type One MS67 NGC.** Iridescent narrow bands of lime-green, cherry-red, and sun-gold alternate across the obverse margin. The remainder of this Type One nickel is also toned, but in more conventional olive-gray, powder-blue, and lavender shades. Well struck, though the reverse periphery appears blurry due to die wear. Census: 29 in 67 (4 in 67+, 1 in 67★, 1 in 67+★), 1 finer (3/19). NGC ID# 22PX, PCGS# 3916

**1913 Type Two Nickel, Top-Graded MS67  
Powder-Blue and Golden Patina**

- 3219 1913 Type Two MS67 PCGS.** The overall impression for this introductory Type Two issue is crisp, if slightly incomplete on the usual areas, including the braid, LIBERTY, and the bison's shoulder. The Superb Gem assessment reflects this coin's unsurpassed technical quality and lovely powder-blue and golden toning, which lightly covers softly frosted surfaces. Population: 40 in 67 (7 in 67+), 0 finer (3/19). NGC ID# 22PZ, PCGS# 3921

**1915-D Nickel, Golden MS66  
Nearly Uncollectible Finer**

- 3220 1915-D MS66 NGC.** Like most Buffalo nickel issues, the 1915-D is only an available date through MS64, and it is scarce in MS65. Finer than that, the date is rare. This Premium Gem displays luminous original luster and rich rose-gold toning with a few mint-green accents. Some minor weakness is noted on the centralmost high points, but the peripheral details and legends are sharp. Surprisingly, no mentionable die erosion is evident in the fields. Census: 13 in 66, 2 finer (3/19). NGC ID# 22R8, PCGS# 3928

**1915-S Nickel, MS66  
Mostly Brilliant With Golden Accents**

- 3221 1915-S MS66 PCGS. CAC.** Mostly brilliant surfaces display the faintest accents of golden color, especially at the upper reverse. The date and bison's head are bold, while LIBERTY, the braid, and the lower reverse show a touch of incompleteness. Softly frosted with trivial flecks. From a relatively low mintage of 1.5 million coins. Population: 36 in 66 (1 in 66+), 3 finer. CAC: 15 in 66, 1 finer (3/19). NGC ID# 22R9, PCGS# 3929

- 3222 1916-S MS65 PCGS. CAC.** Traces of golden luster decorate the natural nickel-gray surfaces of this Gem 1916-S. Nearly 12 million pieces were struck, and while slight die wear is seen on this well-struck example, the central devices are sharp and pleasing. The date area shows narrow machine doubling. CAC endorsed for its high quality surfaces and eye appeal. PCGS has seen just 45 numerically finer pieces (3/19). NGC ID# 22RC, PCGS# 3933

- 3223 1918/7-D FS-101 Fine 15 NGC.** The tiny die crack above the braid is apparent, as is the thick downstroke of the underdigit 7. Along with the 1916 Doubled Date, the 1918/7-D is key to the Buffalo nickel series, and this unblemished dove-gray representative will please the advanced collector. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

- 3224 1920 MS66+ PCGS. CAC.** With a mintage exceeding 63 million pieces, the 1920 issue varies widely in quality and eye appeal. This high-end Premium Gem with the PCGS Plus designation and CAC approval ranks near the top of the chart, apparently struck with fresh, properly spaced dies. Gleaming ice-blue toning displays iridescent accents. The strike is sharp — the Indian's hair strands are well-defined, and the bison's head, shoulder, and musculature are deeply struck. Bright-satin luster flows across smooth fields and devices. Population: 16 in 66+, 19 finer. CAC: 47 in 66, 2 finer (3/19). NGC ID# 22RP, PCGS# 3944

**1920-S Nickel, MS65 ★  
Intense Border Patination**

- 3225 1920-S MS65★ NGC.** Concentric bands of red, jade-green, and orange-gold alternate around the borders of this lustrous and mark-free Gem. We note a small spot above the bison, and minor inexactness of impression above the braid and on the bison's head, as one would expect from this strike rarity. The 1920-S is also a conditionally rare branch issue at the MS65 level. Census: 16 in 65 (2 in 65★), 5 finer (3/19). NGC ID# 22RS, PCGS# 3946

- 3226 1925-D MS64 NGC.** Scarce in circulated grades and elusive in Choice Mint State or finer, the 1925-D is a prototypical "strike rarity" of the mid-1920s when nickels were struck in haphazard fashion, often with worn or widely spaced dies. This Denver Mint example is sharper than most — particularly on the reverse, where the bison puts its best foot forward with an above-average strike. The obverse shows finely grained surfaces that retain soft mint luster. Marks are few and eye appeal is strong for this near-Gem 1925-D. NGC ID# 22S3, PCGS# 3955

- 3227 1926 MS67 PCGS.** Iridescent colors at the margins join ice-blue highlights across smooth, nickel-gray surfaces of this Premium Gem 1926. More than 44 million pieces were struck, most of which go begging for a sharp strike, although this example is exceptionally crisp and well-produced. Only on rare occasions does an MS67 Buffalo nickel make an appearance, and when it does a flurry of bidding is sure to follow. Population: 55 in 67 (6 in 67+), 0 finer (3/19). NGC ID# 22S5, PCGS# 3957

- 3228 1927-S MS64 PCGS.** Tinges of green and red appear throughout mainly olive-gold toning on this Choice 1927-S nickel. The strike is remarkably sharp for the issue, and die erosion in the fields is minimal. This San Francisco issue is plentiful in MS64, but PCGS lists only 44 finer submissions (3/19), which may include duplications. NGC ID# 22SA, PCGS# 3962

- 3229 1935 MS67+ PCGS.** Nary a mark exists on the crisply struck, nickel-gray obverse with attractive ice-blue overtones, and only a few tiny, microscopic ticks have found their way onto the bison's shoulder. The reverse strike is equally sharp from a die just starting to show slight erosion nearing the margins. Eye appeal is strong throughout this high-end Superb Gem nickel. Population: 24 in 67+, 2 finer (3/19). NGC ID# 22SN, PCGS# 3974

**1935-D Nickel, MS67  
Tied for Finest at PCGS**

- 3230 1935-D MS67 PCGS.** This is one of the finest of the 12 million 1935-D nickels struck and nearly 3,000 pieces sent in to PCGS for certification. Only 12 example have achieved Superb Gem status at that service, including one in MS67+, but none are finer (3/19). Both sides exhibit golden accents and satiny mint luster without any obvious marks to speak of. Well-detailed on the hair braid and bison's shoulder. NGC ID# 22SP, PCGS# 3975

**1935-D Nickel, Toned MS67  
Registry-Grade Rarity**

- 3231 1935-D MS67 NGC.** A rare Superb Gem example of this late-series Denver issue, second to only one finer representative at NGC and PCGS combined. Luminous satin mint luster engulfs the well-struck devices, and the fields are remarkably devoid of the heavy die erosion that typically affects branch mint issue in this series. Rich golden toning on each side bleeds to a deeper rose hue in the centers. Census: 6 in 67, 1 finer (3/19). NGC ID# 22SP, PCGS# 3975

- 3232 1936-S MS67+ NGC.** One of the finest-certified examples of this late-series San Francisco issue, showing satiny original luster shining through warm honey-gold toning. Other than some minor weakness above the Indian's hair braid, the strike is sharp, and neither side exhibits a mentionable abrasion. Ideal for Registry Set collectors. Census: 34 in 67 (5 in 67+, 4 in 67★), 0 finer (2/19). NGC ID# 22SU, PCGS# 3979

**1938-D Buffalo Nickel, Lightly Toned MS68  
Scarce Registry-Grade Example**

- 3233 1938-D MS68 NGC.** The 1938-D is a favorite type coin issue, being available for a price in the lofty MS68 grade and often showing stellar luster and eye appeal. This lightly toned coin displays delicate lilac-blue interiors with lemon-gold margins. Trivial strike weakness affects the Indian's hair above the braid, while the bison's shoulder is similarly weak. Nonetheless, the preservation is nearly flawless, and eye appeal is exceptional. Census: 32 in 68 (1 in 68+, 8 in 68★, 1 in 68+★), 0 finer (2/19). NGC ID# 22T2, PCGS# 3984

**1938-D Buffalo Nickel, MS68  
Top-Grade Type Coin**

- 3234 1938-D MS68 PCGS.** The popular type coin of the series, the 1938-D Buffalo nickel is plentiful in grades through MS67. It is rare in MS68, but it is at least collectible this fine, unlike most other dates. The piece offered here displays delicate pastel toning over luminous satin surfaces. Eye appeal is spectacular. Population: 34 in 68 (2 in 68+), 0 finer (2/19). NGC ID# 22T2, PCGS# 3984

- 3235 1938-D/D MS67+ PCGS. CAC.** The mintmark is prominently repunched west, evident inside the loop and adjacent to the upright. The variety is overshadowed by FS-511 through FS-515, all considered D/S overmintmarks, but the present repunched mintmark also merits enshrinement in *Cherry-pickers'*. A well struck and pristine Superb Gem bathed in apple-green and lilac-red toning. As of (3/19), PCGS has certified 23 as MS67+ with none finer. CAC: 25 in 67, 0 finer (3/19). NGC ID# 22T2, PCGS# 93984 Base PCGS# 3984

## PROOF BUFFALO NICKELS

### 1913 Buffalo Nickel, PR64 Type One Reverse

- 3236 1913 Type One PR64 PCGS. CAC.** Type One proofs are among the most popular Buffalo nickels, with merely 1,520 pieces struck in all. This finely textured near-Gem shows thin golden toning across the upper-right obverse and satiny brilliance over the lower-left, with the two split nearly evenly in half. Both shades combine across the reverse. The entire effect, in tandem with the excellent preservation and full strike, is highly appealing.  
*From The William Rehwald Proof Set Collection.* NGC ID# 278R, PCGS# 3988

### 1913 Buffalo Nickel, Splendid PR66 Excellent Type One Example

- 3237 1913 Type One PR66 PCGS. CAC.** This delightful Type One Premium Gem proof nickel displays a needle-sharp strike and outstanding surfaces. Subtle glints of golden luster warm the finely textured, nickel-gray fields and devices, which exhibit colorful iridescence when viewed at an advantageous angle. The extraordinary surface quality becomes clear under close examination, and increases with every viewing as the nuances of strike and visual appeal are revealed. A splendid representative of the one-year type. NGC ID# 278R, PCGS# 3988

- 3238 1913 Type Two PR66 NGC. CAC.** Scarcer than its similarly dated Type One counterpart, the 1913 Type Two is the rarest issue in the early proof Buffalo Nickel series after the 1916. The finely granular texture of the satin-finished surfaces is readily evident under a loupe, and it helps to confirm this coin's status as a proof striking. Of course, the superior striking quality (all devices are razor sharp in detail) is also indicative of a proof delivery. The reddish-golden surfaces are free of even a single mentionable blemish. CAC: 44 in 66, 42 finer (2/19). NGC ID# 278S, PCGS# 3990

- 3239 1914 PR65 PCGS.** This pinpoint-sharp specimen displays delicate almond-gold toning. Patient study with a loupe locates a few minuscule flecks. Only 1,275 proofs were produced. Certified in an old green label holder.  
*Ex: Long Beach Signature (Heritage, 2/2007), lot 2708, which realized \$1,725.* NGC ID# 278T, PCGS# 3991

- 3240 1914 PR66 PCGS.** A needle-sharp Premium Gem matte proof, this outstanding 1914 Buffalo nickel displays luminous natural luster with delicate gold and pastel toning overall. Neither side has bothersome contact marks. The 1914 proof is scarce in finer condition. NGC ID# 278T, PCGS# 3991

- 3241 1916 PR64 PCGS.** Razor-sharp definition is evident on all the design elements of this impressive Choice proof, with well-preserved surfaces that display subtle matte luster, under shades of lime-green and ice-blue toning. From a matte proof mintage of 600 pieces.  
*From The William Rehwald Proof Set Collection.* NGC ID# 278V, PCGS# 3993

- 3242 1936 Type One — Satin Finish PR66 PCGS. CAC.** Pastel lime-green and straw-gold toning adorns lustrous and well-struck surfaces. A minor flan imperfection on the Indian's neck provides an identifier for this otherwise flawless specimen. Certified in an old green label holder.  
*From The William Rehwald Proof Set Collection.* NGC ID# 278X, PCGS# 3994

- 3243 1936 Type One — Satin Finish PR67 PCGS.** Sky-blue and sunset-gold toning glistens with bold mint luster throughout this Superb Gem satin finish proof. Struck early in the proof mintage sequence, Type One proofs with their satiny texture and super-smooth, deeply struck surfaces command equal footing with the Type Two brilliant proofs. This example is especially vibrant and attractive. PCGS reports just 49 numerically finer satin proofs (3/19). NGC ID# 278X, PCGS# 3994

- 3244 1936 Type Two — Brilliant Finish PR66 NGC. CAC.** After an initial run of Satin finish proof cents and nickels, the Mint changed to the more familiar Brilliant finish, which proved much more appealing to collectors. This gorgeous Type Two specimen offers excellent preservation and undeniable eye appeal. Occasional whispers of dusky green-gold toning adorn nickel-gray surfaces.  
*Ex: ANA Signature (Heritage, 2/2008), lot 343, where it realized \$2,990.* NGC ID# 278Y, PCGS# 3995

- 3245 1936 Type Two — Brilliant Finish PR66 NGC. CAC.** After a two-decade gap in production, proof Buffalo nickels were struck during 1936. They were first coined with a satin finish, but later strikes had the brilliant finish favored by modern collectors. This sharply struck and lightly toned specimen displays a minor retained lamination near the P in PLURIBUS. Encapsulated in a prior generation holder.  
*From The William Rehwald Proof Set Collection.* NGC ID# 278Y, PCGS# 3995

### 1937 Buffalo Nickel, PR68 Important Type Offering

- 3246 1937 PR68 PCGS.** Collectors of proof type coins need to consider four different Buffalo nickel issues, the matte proof 1913 Type One, the matte proof Type Two struck from 1913 to 1916, the satin proof 1936, and the brilliant proof struck in 1936 and 1937. This extraordinary Superb Gem with flawless, spot-free proof surfaces is a lovely representative of the brilliant proof Buffalo nickel with wisps of gold and lilac toning. The strike is full and the eye appeal is outstanding. Population: 42 in 68 (2 in 68+), 1 finer (3/19). NGC ID# 278Z, PCGS# 3996

**1937 Nickel, PR64 Cameo  
Rare Contrasted Proof**

- 3247 1937 PR64 Cameo PCGS.** Hints of gold and blue toning reside on the brilliant surfaces of this Choice Cameo proof Buffalo nickel that features a bold strike and obvious field-to-device contrast. Few Buffalo nickels have ever earned the Cameo designation. Population: 2 in 64 Cameo, 12 finer (3/19). NGC ID# 278Z, PCGS# 83996

**1937 Nickel, PR67 Cameo  
Outstanding Contrast**

- 3248 1937 PR67 Cameo PCGS.** Field-to-device contrast is rarely found on the proof coins issued from 1936 to 1942, a true statement across all denominations. For example, PCGS has certified more than 3,800 brilliant proof Buffalo nickels, yet only 14 coins carry the Cameo designation, and two of those are offered in the present sale. This Superb Gem has impressive contrast with exceptional eye appeal. Population: 8 in 67 (1 in 67+) Cameo, 0 finer (3/19). NGC ID# 278Z, PCGS# 83996

**JEFFERSON NICKELS**

**1945-P Nickel, Toned MS67  
FS-801, Doubled Die Reverse**

- 3249 1945-P Doubled Die Reverse, FS-801 (formerly FS-030), MS67 NGC.** Die doubling is evident on most reverse lettering, but it is most prominent on MONTICELLO and FIVE CENTS. This Superb Gem displays shimmering original luster. Vivid forest-green, crimson, gold, and cottonwood-green hues adorn each side, and there are no bothersome abrasions. The strike is generally sharp, although the steps of Monticello are only partially complete. NGC ID# 22TX, PCGS# 38505 Base PCGS# 4173

- 3250 1949-S MS66+ Full Steps PCGS.** The 1949-S is scarce with Full Steps definition. This Plus-graded Premium Gem is ideal for the Registry Set collector, showing beautifully preserved satin mint luster cast in delicate pastel toning. Eye appeal is outstanding. Population: 37 in 66 (7 in 66+) Full Steps, 5 finer (3/19). NGC ID# 22UD, PCGS# 84040

**1952-D Nickel, MS67 Full Steps  
Tied for Finest Certified**

- 3251 1952-D MS67 Full Steps PCGS.** Only about 12% of all Mint State PCGS submissions for the 1952-D Jefferson nickel have been designated as Full Steps. This Superb Gem is tied with three other coins in that category for finest certified (3/19). It is also the plate coin for PCGS CoinFacts. Rings of blue, green, yellow, and rose-violet toning surround untuned centers. There are predictably few marks, and the impression is razor-sharp. We note two specks of aqua residue on the obverse, one in front of the forehead and another below the star between LIBERTY and the date. NGC ID# 22UL, PCGS# 84047

- 3252 1954 MS66 Full Steps PCGS.** Only about 1 in 200 1954 nickels have Full Steps, making this Premium Gem example a rarity among other high Mint State pieces. A thin band of blue border toning adds eye appeal to the golden-gray obverse surfaces, while the reverse displays colorful iridescence when viewed at an angle. Population: 17 in 66 Full Steps, 0 finer (3/19). NGC ID# 22US, PCGS# 84052

**SMS JEFFERSON NICKEL**

**1964 SMS Nickel, SP67+ Full Steps  
Distinctive Satin Finish Rarity**

- 3253 1964 SMS SP67+ Full Steps PCGS.** The satin finish is readily observed on this high-end Superb Gem, complementing a delicate tinge of light champagne toning over the sharp devices and flawless fields. PCGS designates this a Special Mint Set coin, although the five-coin sets of satin finish 1964 coinage that surfaced in the early 1990s are not known to have ever been in any special packaging from the Mint, and official coinage of Special Mint Sets did not occur until 1965. The SMS 1964 Jefferson nickel is rare. PCGS reports only 19 submissions for all grades combined, including likely duplication. This is the only Plus-designated Full Steps coin at PCGS. Population: 6 in 67 (1 in 67+) Cameo, 7 finer (3/19). From a complete five-piece set of 1964 SMS coinage, cent through half dollar, offered in this sale as individual lots. NGC ID# 56E9, PCGS# 84170

## PROOF JEFFERSON NICKEL

1938 Jefferson Nickel, PR67 Cameo  
Rare as a Cameo

- 3254** 1938 PR67 Cameo NGC. A brilliant, boldly struck, and beautifully preserved example of the first-year proof Jefferson nickel. The portrait and Monticello are frosty. Proof coins from the 1930s and 1940s rarely exhibit cameo contrast. The 1938 proof Jefferson is singularly important with the Cameo designation, as just three such pieces are reported by NGC and PCGS combined, all in PR67. Census: 2 in 67 Cameo, 0 finer (2/19).  
*Ex: ANA Signature (Heritage, 8/2016), lot 3563, which realized \$4,700. NGC ID# 279W, PCGS# 84175*

## EARLY HALF DIMES

- 3255** 1794 V-2, LM-2, R.5, VG10 NGC. All legends are bold on this first-year Flowing Hair half dime. Powder-blue and straw-gold toning visits lightly marked and evenly worn surfaces. Two small reverse rim nicks near 2 o'clock provide identifiers. NGC ID# 22ZT, PCGS# 38582 Base PCGS# 4250

1794 Flowing Hair Half Dime, VF20  
V-2, LM-2, Great Problem-Free Example

- 3256** 1794 V-2, LM-2, R.5, VF20 NGC. Attribution points for this scarce first-year Flowing Hair half dime die variety include the leaf tip under the center of the U, and the R in LIBERTY mostly right of the forecurls. The reverse was previously paired with a different obverse to strike LM-1, the only variety rarer than this one. Medium gray patina covers each side. Liberty's portrait retains good detail, as does the eagle's right (facing) wing. All legends are bold. Multiple shallow pinscratches are barely detectible. NGC ID# 22ZT, PCGS# 38582 Base PCGS# 4250
- 3257** 1794 V-4, LM-4, R.4 — Scratch — PCGS Genuine. VF Details. The few straight, hair-thin lines on the portrait appear to be mint-made adjustment marks, but short moderate scratches are noted below Liberty's chin and at the bottom of her throat. This forest-green, steel-gray, and lavender example is well-defined for the VF level.

1795 Half Dime, Fine 15  
V-5, LM-8, Flowing Hair Type Coin

- 3258** 1795 V-5, LM-8, R.3, Fine 15 NGC. The absence of an inner or outer berry below the U in UNITED, and star 9 away from the Y in LIBERTY serve as diagnostic indicators for the V-5, LM-8 die variety. This second-year Flowing Hair representative served its intended role in commerce and shows considerable wear. Nevertheless, outlines of the legends, including the date, and the central elements remain strong. Smooth deep gray surfaces with a handful of planchet flaws.  
*From the Lake County Collection. NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251*

1795 Flowing Hair Half Dime, VF25  
V-5, LM-8, Attractive Patina

- 3259** 1795 V-5, LM-8, R.3, VF25 PCGS. The radial crack to the bridge of Liberty's nose is a pick-up point for this popular Flowing Hair Valentine variety. Forest-green, autumn-brown, and cream-gray toning embraces this nicely defined and attractive early silver type coin. Marks are limited to a solitary thin line below the left (facing) wing. NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251
- 3260** 1795 V-5, LM-8, R.3 — Repaired — ANACS. XF40 Details. The exact area of repair is unspecified, although we note some anomalous tooling and a void at the central portrait in the area of Liberty's ear. A few old obverse scrapes exist — one between Y of LIBERTY and star 9, and another above stars 5 and 6. The coin is otherwise sharp with pleasing bluish-gray toning, and only minor additional marks exist over the well-defined surfaces.

1795 Flowing Hair Half Dime, XF Details  
V-5, LM-8, Type Coin

- 3261** 1795 V-5, LM-8, R.3 — Cleaned — PCGS Genuine. XF Details. The prominent die crack on this variety stretches from the Y in LIBERTY down into Liberty's face and neck, although on this piece it is lightly worn on the portrait. The usual strike weakness affects Liberty's lower hair strands and the eagle's left (facing) wing. Both sides are essentially untuned and have a glossy appearance from being cleaned. The reverse is rotated about 45 degrees clockwise.

1795 V-5, LM-8 Half Dime, AU Details  
Toned Flowing Hair Type Coin

- 3262** 1795 V-5, LM-8, R.3 — Scratched — ANACS. AU Details, Net XF40. A couple of old pinscratches in Liberty's hair prevent a numeric grade on this AU-level LM-8 half dime. On the reverse, a hairline scratch arcs over the eagle's head, different from the mint-made planchet adjustment marks that are visible on the eagle's breast and wings. The usual strike weakness affects Liberty's lower hair strands and the eagle's left (facing) wing. Both sides have rich blue and lavender-gray toning that produces strong eye appeal.  
*Ex: Dallas Signature (Heritage, 7/2006), lot 529, which realized \$2,530. NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251*

1795 V-4, LM-10 Half Dime, XF45  
Flowing Hair Type Coin

- 3263** 1795 V-4, LM-10, R.3, XF45 NGC. This LM-10 coin represents the earlier die state of the variety, with peripheral cracks on the obverse and heavy clash marks in the fields. Later, a cud breaks away above the TY in LIBERTY and the clashed marks are faded by die lapping. This coin is well-detailed and shows deep olive-gray patina. A few old, thin pinscratches join mint-made adjustment marks on Liberty's neck, while adjustment marks are much more prominent on the reverse. NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

1796 Half Dime, VF20  
LIKERTY, V-1, LM-1

- 3264** 1796 LIKERTY, V-1, LM-1, R.3, VF20 PCGS. A silver-gray and straw-gold representative of the challenging two-year Draped Bust, Small Eagle type. The upper reverse dentils are worn, but the eagle's wings are nicely defined. Marks are surprisingly absent overall, though we note a brief rim depression on the reverse at 5 o'clock. LM-1 is the *Guide Book* LIKERTY variety, named for a defective letter B punch. NGC ID# 22ZX, PCGS# 38596 Base PCGS# 4254

1796 Half Dime, Sharp XF40  
LIKERTY, V-1, LM-1

- 3265** 1796 LIKERTY, V-1, LM-1, R.3, XF40 PCGS. Both the top and bottom curves of B in LIBERTY are incomplete, and LI is distant from B to quickly identify the LM-1 LIKERTY variety. Although the die marriage is scarce, it is not nearly as rare as the other 1796 variety, the LM-2 overdate. The total reported mintage for 1796 half dimes was just 10,230 pieces. This slate-gray example displays pleasing blue overtones and finely granular surfaces. All of the motifs are sharply defined for the XF grade, with no large marks and full rims. Population: 10 in 40, 57 finer (2/19). NGC ID# 22ZX, PCGS# 38596 Base PCGS# 4254

1800 Half Dime, XF40  
V-2, LM-3, LIBEKTY

- 3266** 1800 LIBEKTY, V-2, LM-3, R.4, XF40 PCGS. Gunmetal-gray and blue toning yields to pale gold at the margins on the obverse, while the reverse is somewhat lighter with golden highlights over silver-lilac shades. The R in LIBERTY is widely open. Die buckle at BUS of PLURIBUS extends from the top of the shield to field star 12. A scarce and popular *Guide Book* variety. Population (both LIBEKTY varieties): 7 in 40, 35 finer (3/19).  
*Ex: Houston Signature (Heritage, 12/2015), lot 3087, which realized \$4,700. NGC ID# 2326, PCGS# 38603 Base PCGS# 4265*

1800 Half Dime, AU58  
V-2, LM-3, LIBEKTY *Guide Book Variety*

**3267** 1800 LIBEKTY, V-2, LM-3, R.4, AU58 PCGS. The 1800 Draped Bust half dime claims a total reported mintage of 40,000 pieces, with four different die varieties known for the date. This coin represents the scarce LM-3 variety, with the incomplete R in the obverse legend (LIBEKTY) and the leaf joined to the left upright of the second A in AMERICA. The obverse die was used again to strike the LM-4 variety, while the reverse was used previously to coin the LM-1 and LM-2 varieties.

This near-Mint survivor retains much of its original design detail, showing just a trace of actual wear. The reverse strike is typical of the issue, with some incompleteness on the central stars and buckling from the left shield point to the beak. Slate-gray and steel-blue surfaces are lightly abraded. Traces of mint luster shine through the patina. Population: 9 in 58 (1 in 58+), 15 finer (2/19).

Ex: ANA National Money Show / Donald E. Bently Collection (Heritage, 2-3/2014), lot 3787, where it realized \$9,106.25. NGC ID# 2326, PCGS# 38603 Base PCGS# 4265

1801 Half Dime, XF40  
V-2, LM-2, Late Die State

**3268** 1801 V-2, LM-2, R.4, XF40 PCGS. The late die state with wedge-shaped cuds over the 8 in the date and the LIB in LIBERTY. These cuds diverted metal flow during the strike, and as a result the A in STATES and the reverse border from 6 to 8 o'clock are lightly brought-up. Nonetheless, the eagle and portrait are richly detailed. Gunmetal-gray surfaces are unblemished and attractive. Population (all varieties): 2 in 40, 22 finer (3/19).

Ex: Central States Signature (Heritage, 4-5/2016), lot 3179, where it realized \$4,500.25. NGC ID# 2327, PCGS# 38606 Base PCGS# 4267

1801 Bust Half Dime, AU50  
V-1, LM-2, Early Die State

**3269** 1801 V-1, LM-2, R.4, AU50 PCGS. A charming cream-gray, powder-blue, and straw-gold example of this scarce Heraldic Eagle date. Portions of the shield are lightly brought up, but the overall strike is good. No marks are apparent. The LM-2 obverse endured dramatic die failures during its run. However, the present coin displays only clash marks near the portrait, and breaks in the dentils below the bust tip and near obverse stars 11 and 12. NGC ID# 2327, PCGS# 38606 Base PCGS# 4267

1803 Bust Half Dime, VF25  
Large 8, V-2, LM-3

**3270** 1803 Large 8, V-2, LM-3, R.3, VF25 PCGS. Rich gunmetal-gray patina encompasses much of this evenly defined Heraldic Eagle type coin. The high points are stone-white. Nearly all of E PLURIBUS UNUM is readable. Careful evaluation is required to locate the few minor abrasions. An identifier for LM-3 is a floating arrowhead, without any trace of a shaft below. NGC ID# 2329, PCGS# 38609 Base PCGS# 4269

**3271** 1803 Large 8, V-2, LM-3, R.3 — Scratched, Cleaned — ANACS. XF Details. A scratch from Liberty's forehead to the cheek and an overall old cleaning earn the net grade by ANACS. This is otherwise a sharply defined LM-3 variety, which is scarce above the VF level. Like many early half dimes, strike doubling is visible particularly at the top of the Large 8 and at Liberty's ribbon ends. Such bounce doubling can occur at different orientations and directions for the variety, sometimes much more dramatic than this example.

## BUST HALF DIMES

**1832 Capped Bust Half Dime, MS66**  
**V-5, LM-8.4, Virtually Mark-Free**  
**Ex: Green, Newman**

**3272 1832 V-5, LM-8.4, R.3, MS66 NGC.** Ex: "Col." E.H.R. Green. On this die state buckling weakens the US in PLURIBUS. This essentially immaculate example is sharply struck except for the first two stars. Toned jade-green, lilac-red, and chestnut-gold with the richest shades on the obverse. Census: 62 in 66 (2 in 66+, 4 in 66★), 10 finer (3/19) for all 1832 varieties.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$1.75; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33046, where it realized \$4,406.25. PCGS# 38673 Base PCGS# 4279

**3273 1833 V-7, LM-1, R.3, MS65+ PCGS.** Light and attractive wheat-gold and navy-blue toning graces this semiprooflike Gem. The strike is needle-sharp, and no marks are evident. A tiny fleck of aqua residue is west of the date. An outstanding representative of the Capped Bust type. NGC ID# 232F, PCGS# 38686 Base PCGS# 4280

## SEATED HALF DIMES

**3274 1842 MS66 PCGS. CAC.** Evenly toned in shades of aquamarine and reddish-gold, the frosted surfaces of this Premium Gem 1842 radiate strong mint luster. The coin is sharply struck from faintly clashed dies. The large mintage of 815,000 pieces yields precious few Premium Gem or finer examples, and fewer still with the outstanding, CAC-endorsed eye appeal of this coin. Population: 10 in 66 (2 in 66+), 1 finer. CAC: 9 in 66, 1 finer (3/19). NGC ID# 2332, PCGS# 4330

**1842-O Half Dime, Near-Gem**  
**FS-301, Repunched Date**

**3275 1842-O Repunched Date, FS-301, MS64 PCGS.** The 8 and 2 are lightly repunched, evident beneath the upper loops. The 1842-O is a better date in all grades, and Mint State examples are rare. This gently coruscating and unabraded near-Gem displays butter-gold and lilac patina. Misaligned dies allows a sharp strike on the lower obverse, while Liberty's head and the bottom of the bow are softly brought up. Population: 0 in 64, 0 finer (3/19).

Ex: Dallas Signature (Heritage, 11/2007), lot 491. NGC ID# 385A, PCGS# 145428 Base PCGS# 4331

**1853 Seated Half Dime, MS66**  
**Exceptional No Arrows Example**

**3276 1853 No Arrows MS66 PCGS.** Vivid shades of sea-green and lavender toning visit the impeccably preserved surfaces of this delightful Premium Gem. The design elements are sharply detailed and vibrant mint luster shines through the patina. The No Arrows half dime is more elusive than its Arrows counterpart, with a limited mintage of 135,000 pieces. Population: 12 in 66 (1 in 66+), 2 finer (3/19). NGC ID# 233M, PCGS# 4351

**1857 Half Dime, MS67**  
**None Numerically Finer at PCGS**

**3277 1857 MS67 PCGS. CAC.** More than 7.2 million Seated half dimes were struck at the Mint in 1857, making this one of the most accessible dates in the entire series. Splashes of deep mauve patina appear over the brilliant, frosted surfaces of this Superb Gem. A bit of strike softness occurs on the last couple of stars. Population: 17 in 67 (2 in 67+), 0 finer. CAC: 13 in 67, 0 finer (3/19). NGC ID# 233S, PCGS# 4365

**3278 1858 MS67 NGC.** This plentiful Philadelphia issue is often chosen as a type coin, however, it is conditionally rare in MS67 and nearly uncollectible finer. This Superb Gem displays frosty, unabraded luster and boldly rendered design elements. Natural gold, mint-green, peach, and ocean-blue toning covers each side. Census: 26 in 67 (2 in 67★), 3 finer (2/19). NGC ID# 233U, PCGS# 4367

**3279 1873 MS66 PCGS. CAC.** Cerulean-blue and pale-gold toning visits the impeccably preserved surfaces of this delightful Premium Gem. The design elements are well-detailed and traces of prooflike reflectivity shine through the intense, colorful patina. The important CAC endorsement moves it up among similarly graded survivors. Population: 9 in 66 (1 in 66+), 3 finer. CAC: 4 in 66, 5 finer (3/19). NGC ID# 5CMH, PCGS# 4404

## PROOF SEATED HALF DIMES

1871 Half Dime, PR67 Ultra Cameo  
960 Examples Struck

- 3280** 1871 PR67 Ultra Cameo NGC. Perhaps the ultimate Seated Liberty half dime for a date or type collection. The surfaces are fully brilliant on both sides. Deeply mirrored fields and lustrous, richly frosted devices provide a desirable black-on-white cameo appearance, so highly prized by collectors. Census: 4 in 67 Ultra Cameo, 0 finer (2/19).  
*Ex: New York Signature (Heritage, 6/2005), lot 5341, realized \$7,475. NGC ID# 2368, PCGS# 94454*

- 3281** 1872 PR66 PCGS. The 1872 was a high-mintage issue for circulation strikes, and 950 proofs were struck. The Bowers reference *Seated Silver Coins* suggests that unsold proofs, rather than being melted, were instead offered to coin dealers. This is a magnificent proof striking, almost perfectly preserved beneath vibrant royal-blue toning that yields to reddish-gold shades at the lower-right quadrant on the obverse, and at the wreath center on the reverse. Flashy mirrored finish surrounds the motifs. Population: 8 in 66 (1 in 66+), 1 finer (3/19). NGC ID# 2369, PCGS# 4455

- 3282** 1873 PR66+ NGC. CAC. Reflectivity shimmers beneath the colorful patina of ocean-blue and straw-gold on this high-end Premium Gem example. This is a wonderful, well-struck coin displaying strong eye appeal. Census: 25 in 66 (1 in 66+), 10 finer. CAC: 10 in 66, 3 finer (3/19).  
*Ex: Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33085, which realized \$2,585. NGC ID# 236A, PCGS# 4456*

## EARLY DIMES

1796 JR-1 Dime, Good 6  
Collector-Grade Type Coin

- 3283** 1796 JR-1, R.3, Good 6 NGC. The usual die state with a rim cud at star 1 on the obverse. Some examples of this variety are also cracked horizontally through the eagle's right (facing) wing, but the advanced state of wear on this coin prevents detection of any die cracks. Surprisingly, the rims are complete on both sides save for a short stretch along the lower reverse. The central devices are boldly outlined. Tinges of lavender and sea-green color emerge within the otherwise olive-gray patina.  
*From the Lake County Collection. NGC ID# 236B, PCGS# 38742 Base PCGS# 4461*

1796 Dime, JR-1, Fine 15  
Problem-Free and Original

- 3284** 1796 JR-1, R.3, Fine 15 PCGS. CAC. JR-1 is a distinctive variety, exhibiting a heavy rim cud below star 1 and a radial die crack through the E in AMERICA. This is a collectible mid-grade example, suitable for type or date purposes. The strike is even, and both sides retain complete border dentils with strong central devices. Problem-free surfaces show deep steel-gray and gunmetal-blue patina.  
*Ex: Summer FUN (Heritage, 7/2015), lot 3072, where it brought \$6,462.50. NGC ID# 236B, PCGS# 38742 Base PCGS# 4461*

1796 JR-1 Dime, XF40  
First Regular Issue for the Denomination

- 3285** 1796 JR-1, R.3, XF40 PCGS. The berry under the upright of the E in UNITED, the leaf tip under the O in OF, and another leaf tip close to the I in AMERICA identify this reverse, which is unique to the collectible JR-1 die marriage. As usual, a cud appears at star 1. Liberty's curls and drapery, and the eagle shows impressive definition. The border elements are equally strong. Gunmetal-gray patina covers each side. The 1796 dime represents the first regular issue for this denomination in U.S. coinage. The Draped Bust, Small Eagle design was only used for two years. NGC ID# 236B, PCGS# 38742 Base PCGS# 4461

1796 JR-2 Dime, XF Details  
Attractive Small Eagle Type Coin

- 3286** 1796 JR-2, R.4 — Cleaned — NGC Details. XF. The centers are frosty and exhibit a cameo effect relative to the broad ocean-blue and autumn-brown peripheries. A well-defined example without mentionable abrasions. The surfaces are lightly granular and mildly bright. Except for the very rare 1792 disme pattern, the 1796 was the first year of the dime denomination, and one of only two years with a Small Eagle reverse. NGC ID# 236B, PCGS# 38743 Base PCGS# 4461

**3287 1796 JR-3, R.5, AG3 NGC.** Dusky golden-brown and powder-blue patina embraces this better-variety first-year dime. More detailed than customary for the About Good grade, though stars 9-13, RICA, and the TY in LIBERTY are well-worn. No marks are distracting. NGC ID# 236B, PCGS# 38744 Base PCGS# 4461

**3288 1796 JR-4, R.4, AG3 PCGS.** The U.S. Mint first struck dimes, quarters, and quarter eagles in 1796. The dimes are the most available, but nonetheless rare. This example has mostly intact legends, though the bottom of the date and the tops of AMERICA have faded into the rims. The almond-gold and ocean-blue surfaces are microgranular. One thin mark between the 17 in the date.  
*From The Morris Collection.* NGC ID# 236B, PCGS# 38745 Base PCGS# 4461

**1796 JR-6 Dime, VF20**  
**Introductory Issue, Nice for the Grade**

**3289 1796 JR-6, R.3, VF20 PCGS.** This variety "is the second most common die marriage and is scarce to very scarce. It can be identified by die cracks through the 179 in the date, the widely spaced LIBERTY, and berries below T1 and T2," according to Zack, Scuderi, and Sherrill (2015). Probably several hundred pieces survive. This is a wonderfully preserved VF representative with severe die cracks on each side. Iridescent accents complement the lightly marked steel-gray surfaces. The borders and eagle are strongly detailed. Housed in a green label holder. NGC ID# 236B, PCGS# 38747 Base PCGS# 4461

**1805 Five Berries Dime, XF40**  
**JR-1, Draped Bust Type Coin**

**3290 1805 5 Berries, JR-1, R.3, XF40 PCGS.** JR-1 is the scarcer Five Berries variety. Rich dove-gray, cobalt-blue, and medium-brown toning envelops this early silver type coin. The obverse shows a few thin marks concealed by the patina. A sharp strike exists despite isolated softness on the upper right portion of the shield. Wear is minimal.

*Ex: FUN Signature (Heritage, 1/2007), lot 2539, which realized \$2,530; Houston Signature (Heritage, 12/2015), lot 4207, which realized \$2,350. NGC ID# 236R, PCGS# 38768 Base PCGS# 4478*

**3291 1805 4 Berries, JR-2, R.2, XF40 NGC.** The two die pairs for the year are distinguished by the number of berries on the reverse branch. The JR-1, 5 Berries reverse is slightly scarcer, but both varieties are elusive in any grade. The portrait and central portion of the eagle show impressive detail over light steel-gray surfaces. All legends remain strong, and an area of deeper toning occurs along the left obverse border. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

## BUST DIMES

**3292 1820 Large 0, JR-8, R.3, AU58 PCGS. CAC.** Blue-green and lilac-red patina enriches the lustrous borders of this briefly circulated Bust dime. Marks are absent, though each side has a couple of unimportant flan streaks, as made. For all Large 0 varieties, CAC: 5 in 58, 8 finer (3/19). NGC ID# 236X, PCGS# 38779 Base PCGS# 4492

**1820 Capped Bust Dime, VF20**  
**Rare JR-12 Variety**  
**Only About a Dozen Pieces Known**

**3293 1820 Medium 0, JR-12, R.6, VF20 PCGS.** By far, JR-12 is the rarest 1820 dime variety. Only about a dozen pieces are known, and a search of our archives reveals we have handled just two other appearances of the variety in the past 20+ years, including the Jules Reiver discovery coin. This is a problem-free VF20 example, evenly toned in rich, slate-gray shades, with lighter silver-gray areas at points of wear. Sharp definition remains on the wing feathers and Liberty's hair strands for the assigned grade. The surfaces are smooth and attractive throughout both sides. Population (for the variety): 1 in 20, 3 finer (3/19). PCGS# 38790 Base PCGS# 4493

**1821 Large Date Dime, MS64**  
**JR-1, Clean and Attractively Toned**

**3294 1821 Large Date, JR-1, R.2, MS64 PCGS. CAC.** JR-1 shows star 8 nearly touching the peak of Liberty's cap, and the D in UNITED aligned with the beginning of the scroll. This is one of seven Large Date die marriages. Three Small Date varieties are also known. The obverse displays violet and olive-gray patina with iridescent splashes around the borders. Similar colors grace the reverse in more of a mottled fashion. The hair curls are sharp, as are the right-side stars. Clean for the grade.

Population (all varieties): 22 in 64, 2 finer. CAC: 6 in 64, 3 finer (2/19). NGC ID# 236Y, PCGS# 38791 Base PCGS# 4496

1823/2 Dime, JR-1, MS63  
From the Pittman Collection

- 3295** 1823/2 Small E's, JR-1, R.3, MS63 NGC. Ex: Pittman. This is an exceptional Select Mint State example of the scarce 1823/2 JR-1 dime, struck at a time of minimal coin production in Philadelphia. Most details are sharp, although typical weakness appears among the hair curls alongside Liberty's cheek and neck. Strong magnification reveals a few scattered surface marks beneath the lovely gold, rose, blue, and green toning that appears on each side. Two denticles at star 10 are merged in this late die state.  
Ex: David Bullowa (9/27/1947); John Jay Pittman (David Akers, 10/1997), lot 553. NGC ID# 2372, PCGS# 38802 Base PCGS# 4498

1832 Capped Bust Dime, MS65  
High-Grade JR-4 Example

- 3296** 1832 JR-4, R.3, MS65 PCGS. CAC. While Obverse 3 was used on other varieties this year, the Reverse C pairing is distinctive with the wide spacing between SO, identifying the JR-4 variety. The JR-4 variety is one of seven known die marriages for the year, and all seven are similar in rarity. Four of those are rated R.3 and the other three are R.2. This is a lovely Gem example with olive and pale gray color over satiny silver luster. Population (for the date): 18 in 65 (1 in 65+), 4 finer. CAC: 10 in 65, 2 finer (2/19).  
Ex: Long Beach Signature (Heritage, 2/2005), lot 6193, realized \$3,737.50; Central States Signature (Heritage, 4/2011), lot 5066, realized \$8,912.50; Pittsburgh Signature (Heritage, 10/2011), lot 3475, realized \$8,625. PCGS# 38858 Base PCGS# 4521

1835 JR-5 Dime, MS64  
Brilliant and Beautiful

- 3297** 1835 JR-5, R.1, MS64 PCGS. The date is entered further west than on the other eight die marriages. Additionally, the flag of the 5 is straight and narrow. This brilliant Choice Capped Bust type coin is slightly subdued but shows only trivial surface imperfections. The strike is sharp except on the claws and fletchings. NGC ID# 237F, PCGS# 38883 Base PCGS# 4527

1836 JR-1 Dime, MS64  
Golden-Russet Rim Toning

- 3298** 1836 JR-1, R.3, MS64 PCGS. Narrow spacing between 10 and C. on the reverse confirms the attribution. Three varieties were used to strike nearly 1.2 million dimes in 1836, although that production total probably includes many coins dated 1835. This magnificent Gem enjoys glowing golden-russet patina around the margins that cedes to untuned centers. Well-struck and carefully preserved. NGC ID# 4DEF, PCGS# 38888 Base PCGS# 4528

SEATED DIMES

1853 Arrows Dime, Toned MS66+  
Lustrous Type Coin

- 3299** 1853 Arrows MS66+ NGC. Deep crimson and olive-gray toning covers this satiny Arrows type coin, but it leaves the luster luminous and attractive. Neither side has bothersome abrasions and the strike is sharp. The 1853 Arrows dime is a common date with a mintage of more than 12.1 million coins. Nonetheless, it is conditionally scarce in MS66 and rare finer. Census: 41 in 66 (2 in 66+, 1 in 66★), 17 finer (3/19). NGC ID# 2398, PCGS# 4603

- 3300** 1853-O Arrows, F-101, R.3, AU58 PCGS. One of only two Arrows O-mint issues, along with its 1854-O successor. The 1853-O mintage was the largest for New Orleans dimes since 1842. Nonetheless, the issue is rare in Mint State, with only 13 pieces designated as such by PCGS. The present example comes close, since the peach-gold and sea-green borders teem with luster. PCGS# 537998 Base PCGS# 4604

**1854 Arrows Dime, MS66**  
Seldom Offered This Fine

- 3301 1854 Arrows MS66 PCGS.** Luminous original mint luster engulfs this Premium Gem Arrows type coin, illuminating ice-blue and lavender-peach toning on each side. Liberty's head and the ribbon ends are a trifle soft, but the remainder of each side is well-struck. The 1854 Arrows Seated Liberty dime is rarely offered this fine. Population: 16 in 66 (1 in 66+), 2 finer (3/19). NGC ID# 239A, PCGS# 4605

**1856-S Dime, AU53**  
Better Date in All Grades

- 3302 1856-S F-101, R.5, AU53 PCGS.** Only one die pair is known for the 1856-S dime, which boasts a small mintage of only 70,000 coins. This is a semikey date in all grades, commanding a premium even in the low circulated levels. Offered here is a slate-gray AU example with luster in the fields. The strike is sharp and little wear is present on the devices. Population: 4 in 53, 16 finer (3/19). NGC ID# 238W, PCGS# 538089 Base PCGS# 4613

- 3303 1857-O MS65 PCGS.** Minimally toned and frosty with complete obverse detail. The surfaces are beautifully preserved and show just a handful of luster grazes in the fields. With a mintage of more than 1.5 million pieces, the 1857-O is one of the more available New Orleans dime issues, though Gems are scarce. Population: 15 in 65, 12 finer (2/19).  
*Ex: Houston Signature (Heritage, 11/2007), lot 60329, where it realized \$2,300. NGC ID# 238Y, PCGS# 4615*

**1876 Seated Liberty Dime, MS68**  
Among the Finest Certified

- 3304 1876 MS68 NGC.** Type One Reverse. This coin is a magnificent MS68 example with superlative toning and incredible eye appeal. Iridescent shades of aquamarine and rose prevail on the obverse and similar tones highlight the reverse, with some accents of champagne-gold. The surfaces are pristine even under close examination with a loupe, and considerable field-device contrast is evident. This coin, encapsulated in an early NGC holder that some would call a "no-line fatty," should prove a popular target for multiple bidders. From a proof mintage of 1,150 pieces. Census: 1 in 68 (1 in 68★), 0 finer (2/19).  
*Ex: Summer FUN Signature (Heritage, 7/2011), lot 3425, realized \$11,500; Mid-Winter ANA Signature (Heritage, 10/2012), lot 3990, realized \$8,812.50. NGC ID# 23CZ, PCGS# 4679*

- 3305 1878 Type Two Reverse, F-105, R.4, MS66 PCGS. CAC.** Deep cobalt-blue toning consumes the reverse, as well as the lower and right obverse periphery. A smooth and satiny Premium Gem. The strike is good, though shy of complete. For all 1878 die varieties, Population: 4 in 66 (1 in 66+), 4 finer. CAC: 3 in 66, 2 finer (3/19). PCGS# 538631 Base PCGS# 4685

- 3306 1878-CC Type Two Reverse, F-104, High R.4, MS61 PCGS.** A Top 100 Variety. Struck with a lapped and shattered reverse die, where the lower-left ribbon and portions of the adjacent maple leaf are entirely missing. A pair of diagnostic die lines identify the F-104 obverse, with a diagonal die line that pierces the upper-right shield, and another that runs from Liberty's thumb above the shield to the shoulder. This is a brilliant Mint State example of the scarce die marriage, entirely untuned with subdued mint luster and a few tiny marks. PCGS# 538640 Base PCGS# 4686

**1880 F-102a Dime, MS67+**  
Colorful Patina, Low Mintage

- 3307 1880 F-102a, R.4, MS67+ PCGS.** A colorfully patinated Superb Gem. The obverse is golden-brown with an apple-green periphery. The upper reverse is aquamarine, while ruby-red crosses the lower half of the reverse. The strike is good, and the lustrous surfaces are smooth. Just 36,000 pieces were struck, since the U.S. Mint was occupied with Morgan dollar and Liberty gold production. Population: 17 in 67 (1 in 67+), 2 finer (3/19). NGC ID# 23AT, PCGS# 538644 Base PCGS# 4688

- 3308 1891 MS67 NGC.** Richly patinated aquamarine and mahogany-brown. The lustrous surfaces are clashed but free from perceptible contact. A good strike further confirms the quality. A lovely final-year type coin. Census: 22 in 67 (3 in 67★), 1 finer (3/19). NGC ID# 23BD, PCGS# 4706

## PROOF SEATED DIMES

- 3309** 1859 F-101, R.4, PR64 NGC. CAC. An upward slanting date is characteristic of F-101. This brilliant and crisply struck Choice proof dime has pleasing surfaces and excellent eye appeal. Cameo contrast is more prominent on the obverse than the reverse. Housed in a circa-2000 holder. CAC: 11 in 64, 20 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 23CD, PCGS# 538999 Base PCGS# 4748

- 3310** 1860 PR64+ Cameo PCGS. CAC. F-101, R.3. A brilliant proof, with extremely faint speckled gold haze that slightly diminishes the contrast between frost-white motifs and the reflective fields. The strike is suitably sharp for a proof — especially on the wreath, which is razor-sharp. This is a borderline Gem Cameo proof, one of 1,000 pieces struck. Many of those did not survive, since unsold proofs were placed in circulation. Population: 1 in 64+ Cameo, 24 finer. CAC: 5 in 64, 15 finer (2/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 23CJ, PCGS# 84753

### 1869 Seated Liberty Dime, PR67 Ex: Eugene Gardner

- 3311** 1869 F-105, R.3, PR67 NGC. The long flag on the 1 in the date and a strong die scratch in the upper section of the lower shield under the B of LIBERTY identifies the variety. A number of the 600-piece mintage of 1869 proof dimes have survived to the present day. Examples can be obtained through near-Gem without too much difficulty, after which it becomes quite challenging. This delightful Superb Gem exhibits rich peach-orange patina over the central obverse, ceding to translucent cobalt-blue at the margin. The latter color palette dominates the reverse except for peach and olive-green along the lower-right margin. The design elements are sharply defined, and both sides have been well cared for. Census: 5 in 67 (1 in 67★), 0 finer (3/19).  
Ex: Summer FUN Signature (Heritage, 6/2008), lot 735, realized \$4,600, Eugene Gardner Collection, Part II (Heritage, 10/2014), lot 98295, realized \$3,172.50. NGC ID# 23CT, PCGS# 539023 Base PCGS# 4762

### 1873 Arrows Dime, PR67 Cameo Lovely High-End Survivor

- 3312** 1873 Arrows PR67 Cameo NGC. F-102, R.4. Between the two varieties of the proof 1873 dime, the later With Arrows production was smaller. Just 800 pieces were struck compared to 1,100 coins for the No Arrows design. The Arrows variant's desirability puts further pressure on the small supply, particularly in higher grades. This lovely Superb Gem proof has outstanding contrast, unencumbered by warm peripheral russet-brown patina. Neither the flash of the deep mirrors nor the frost across the devices are diminished. Census: 2 in 67 Cameo (1 in 67 ★), 0 finer (11/18). NGC ID# 23DH, PCGS# 84769

### 1876 Dime, PR67 ★ Only One Specimen Certified Finer

- 3313** 1876 Type One Reverse, F-101, R.4, PR67★ NGC. Type One Reverse. Anticipating an increase in demand because of the country's centennial celebrations, the Mint produced a generous mintage of 1,150 proof Seated Liberty dimes in 1876. This spectacular Superb Gem is among the finest survivors, with razor-sharp definition on all design elements, deeply mirrored fields, and a vivid mix of gold, blue, and lime-green toning. Census: 4 in 67 (1 in 67★), 1 finer (2/19).  
Ex: Central States Signature (Heritage, 4/2012), lot 3818, realized \$7,331.25. PCGS# 539037 Base PCGS# 4773

- 3314** 1889 PR67 NGC. We do not want to mislead anyone into thinking this is a Cameo coin, but there is a slight bit of contrast between the fields and devices on each side. Close examination with a loupe confirms the Superb grade of this piece, as it lacks any mentionable contact marks. Census: 8 in 67 (1 in 67★), 2 finer (3/19). NGC ID# 23DE, PCGS# 4786

## BARBER DIMES

### 1897-O Barber Dime, MS67 Registry Grade Specimen

- 3315 1897-O MS67 PCGS.** The 1897-O Barber dime is collectible in most Mint State grades, but go out and try to acquire a Superb Gem example and collectors may have to wait years just for a bidding opportunity. The obverse of this Superb Gem is brilliant save for a few small blobs of russet toning in the right field — the remnant of an ancient partial print. The center of the reverse is mostly white with peripheral steel blue and golden-brown toning. Both sides have immaculate surfaces and frosty mint luster. Population: 5 in 67 (1 in 67+), 0 finer (3/19).

Ex: Long Beach Signature (Heritage, 2/2007), lot 2941; Central States Signature (Heritage, 5/2007), lot 2075 NGC ID# 23E4, PCGS# 4813

### 1898 Dime, Toned MS67 Registry-Grade Condition Rarity

- 3316 1898 MS67 PCGS. CAC.** The 1898 Barber dime is a common date overall, but in MS67 it is rare. This CAC-approved Superb Gem is tied for the finest at PCGS. Radiant cartwheel luster engulfs sharp design elements and near-pristine fields. Each side has beautiful yellow-gold, sea-green, blue, and lilac toning. A lone contact mark immediately beneath Liberty's eye is all that keeps this piece from an even finer grade. Population: 6 in 67, 0 finer. CAC: 6 in 67, 0 finer (3/19). NGC ID# 23E6, PCGS# 4815

### 1906-O Dime, MS67 ★ Spectacular Quality

- 3317 1906-O MS67★ NGC.** Radiant mint luster resides beneath a veil of mixed violet-rose, turquoise, and cobalt-blue patina. Strike detail is nearly complete with just a hint of softness on the right corn kernels. One tick on the cheek serves as a pedigree marker. Most 1906-O dimes are well-circulated. Census: 11 in 67 (2 in 67★, 3 in 67+), 1 finer (3/19). NGC ID# 23EZ, PCGS# 4840

- 3318 1914-S MS66 PCGS.** Ex: Lily Nicole Collection. A sharply detailed Premium Gem, with impeccably preserved surfaces that radiate vibrant mint luster under delicate shades of lavender and pale gold toning. Population: 20 in 66 (2 in 66+), 3 finer (3/19). Ex: Central States Signature (Heritage, 4/2015), lot 3974, which realized \$1,880. NGC ID# 23FV, PCGS# 4867

## MERCURY DIMES

### 1916-D Mercury Dime, AU Details Sharp Central Definition

**3319 1916-D — Cleaned — NGC Details. AU.** The wear on this coin seems to be from the cleaning, which leaves each side glossy and toned a light golden hue. Detail is sharp overall, and the horizontal fasces bands are at least mostly split. The 1916-D Mercury dime boasts a mintage of only 264,000 coins and is the key date to the series. NGC ID# 23GY, PCGS# 4906

**3320 1917-S MS66 Full Bands PCGS.** Blaze-white fields and devices display strong, brilliant-silver mint luster. This vibrant 1917-S is sharply struck to earn the Full Bands designation, which is worth a significant premium at the Premium Gem level. Near-flawless surfaces and impeccable preservation create outstanding eye appeal. Population: 73 in 66 (2 in 66+) Full Bands, 14 finer (3/19). NGC ID# 23H4, PCGS# 4915

**3321 1920-S MS64 Full Bands PCGS.** Full, rounded bands indicate a sharp central strike on this brilliant 1920-S dime. The peripheral impression is not quite as strong, with slight weakness from die wear along the reverse border. This lustrous near-Gem shows a few microscopic carbon flecks but is otherwise untoned, with strong visual appeal. PCGS has seen just 53 Full Bands examples in finer grades (3/19). NGC ID# 23HD, PCGS# 4933

### 1921-D Dime, MS64 Full Bands Popular Semikey

**3322 1921-D MS64 Full Bands PCGS.** The low-mintage 1921-D dime is a semikey in all grades, commanding a strong premium even in heavily circulated condition. High-grade survivors with Full Bands definition are always popular with collectors. The lower obverse displays dappled crimson patina, while the remaining surfaces maintain their brilliance. The central bands show complete separation, and the other motifs and legends are similarly well-defined. NGC ID# 23HF, PCGS# 4937

### 1935 Mercury Dime, MS68 Full Bands Registry Grade Example

**3323 1935 MS68 Full Bands PCGS.** This magnificent MS68 Mercury dime exhibits razor-sharp definition on all design elements, with fully split and rounded bands on the fasces. The impeccably preserved surfaces are lustrous and appealing, with vivid highlights of emerald-green and lavender-gray toning. Population: 17 in 68 Full Bands, 0 finer (2/19). NGC ID# 23JC, PCGS# 4993

### 1936 Mercury Dime, MS68 Among the Finest Full Bands Examples

**3324 1936 MS68 Full Bands NGC.** Pleasing highlights of greenish-gold and ice-blue toning visit the impeccably preserved surfaces of this magnificent MS68 example, with vibrant mint luster underneath. The design elements are sharply detailed, with fully split and rounded bands on the fasces. Eye appeal is terrific. Census: 12 in 68 (1 in 68★) Full Bands, 0 finer (3/19). NGC ID# 23JF, PCGS# 4999

**3325 1939-S MS67 Full Bands NGC.** Struck from fresh dies, this Superb Gem Full Bands example displays satiny mint luster with faint die polish lines still evident in the fields. The sharpness is complete throughout the critical centers. No mentionable toning is present. Superb Gem 1939-S Mercury dimes are scarce with Full Bands, and only two pieces are finer than the present at NGC and PCGS combined. Census: 12 in 67 Full Bands, 1 finer (2/19). NGC ID# 23JT, PCGS# 5021

**3326 1944 MS67+ Full Bands PCGS. CAC.** This Plus-graded Superb Gem exhibits sharply detailed design elements, with fully split and rounded bands on the fasces. The virtually pristine, lustrous surfaces show a few subtle hints of amber and pale gold toning on close inspection. PCGS has graded five numerically finer Full Bands examples (2/19). NGC ID# 23KB, PCGS# 5051

---

1944-D Mercury Dime, MS68+ Full Bands  
Among the Finest Certified

- 3327 1944-D MS68+ Full Bands PCGS. CAC.** This magnificent Plus-graded MS68 example exhibits razor-sharp definition on all design elements, with fully split and rounded bands on the fasces. The impeccably preserved surfaces radiate vibrant mint luster, with highlights of emerald-green, cerulean-blue, and lavender toning. Eye appeal is terrific. No Full Bands examples have been certified in higher numeric grades (3/19). NGC ID# 23KC, PCGS# 5053

---

PROOF MERCURY DIMES

- 3328 1936 PR67 NGC.** Ex: M.L. Middleton Collection. Proof Mercury dime production was limited to a seven-year run between 1936 and 1942. Mintages rose every year, which makes the 1936 key to the proof series. This razor-sharp Superb Gem is brilliant save for a few pinpoint flecks near the designer's monogram. Census: 88 in 67 (2 in 67+, 4 in 67★), 3 finer (3/19). NGC ID# 27DG, PCGS# 5071

---

1941 Dime, Border-Toned PR68  
High-End Proof Type Coin

- 3329 1941 PR68 PCGS.** A magnificent Registry-grade example of this proof issue, among the finest coins certified at PCGS. NGC lists just two numerically finer pieces. Essentially flawless, each side is deeply reflective and sharp throughout with brilliant interiors. Golden border toning attractively frames each side. Eye appeal is exceptional. Population: 32 in 68, 0 finer (3/19). NGC ID# 27DM, PCGS# 5076

---

1942 Dime, PR66  
Rare Cameo Designation

- 3330 1942 PR66 Cameo PCGS. CAC.** Appreciably frosted over the devices, the fields present a splendid backdrop of deep, watery reflectivity. As befits the grade, the smooth surfaces are hairline-free, and the eye appeal benefits even further from a razor-sharp strike. Delicate, mottled, golden and silver-gray iridescence drifts over both sides. The cameo finish is noteworthy for a proof Mercury dime, and, indeed, this is the only PR66 example graded at PCGS (3/19). Ex: Santa Clara Signature (Heritage, 11/2002), lot 6987; Fall ANA Signature (Heritage, 10/2012), lot 3592. NGC ID# 27DN, PCGS# 85077

---

ROOSEVELT DIME

---

1951 Dime, MS68 Full Bands  
Vivid Obverse Toning

- 3331 1951 MS68 Full Bands NGC.** This is a stellar Registry coin, among the three finest seen by NGC, and rivaled in this grade by just two others at PCGS. The strike is bold and the preservation equally impressive, but the chief visual attribute of this piece is its vibrant obverse toning which spans the color spectrum from sun-gold to deep pine-green, and including shades of lavender-blue, violet, and russet; the reverse is more evenly colored in rose-gold hues. Census: 4 in 68 (1 in 68★ Full Bands, 1 in 68+★), 0 finer (3/19). NGC ID# 23L2, PCGS# 85097

## SMS ROOSEVELT DIME

1964 SMS Dime, SP66  
Rare Satin Finish Issue

- 3332 1964 SMS SP66 PCGS.** A razor-sharp satin finish Premium Gem example of the 1964 SMS dime. Special Mint Sets were issued in place of proof sets from 1965 to 1967. However, in the 1990s, a number of five-coin sets from 1964 surfaced with similar finishes. All coins from these sets are rare. This Premium Gem SMS dime displays razor-sharp detail and a dusting of champagne-lavender toning with no surface abrasions. Eye appeal is outstanding. PCGS lists 23 grading events for the 1964 SMS dime in all grades, although likely duplication is represented in these figures. Population: 4 in 66, 16 finer (3/19).

*From a complete five-piece set of 1964 SMS coinage, cent through half dollar, offered in this sale as individual lots. PCGS# 5220*

## PROOF ROOSEVELT DIME

1983 No S Dime, PR70 Ultra Cameo  
Rarely Seen Registry Coin

- 3333 1983 No S PR70 Ultra Cameo NGC.** We have only handed examples of the 1983 No S proof dime in pristine PR70 Ultra Cameo condition on a handful of occasions since 1993, attesting to the issue's significant rarity in this ultimate grade. Frosted motifs and profoundly reflective fields deliver stark contrast and terrific eye appeal. Census: 7 in 70 Ultra Cameo, (3/19). NGC ID# 28ZN, PCGS# 95265

## TWENTY CENT PIECES

- 3334 1875 MS64 NGC. BF-1, R.1.** As usual, the right side of the 1 is right of the shield point, typical of most 1875 twenty cent proofs and circulation strikes. Dusky violet, tan-gold, and gunmetal-blue toning produces elegant eye appeal. Most impressive is the absolutely complete impression. A remarkable near-Gem from a mintage of 38,500 coins. NGC ID# 23R5, PCGS# 5296

1875-CC Twenty Cent, MS63  
Richly Toned

- 3335 1875-CC MS63 NGC. BF-2, R.1.** Ex: "Col." E.H.R. Green. The 1875-CC twenty cent, along with the 1876-CC, is among the 12,359 pieces ordered melted March 19, 1877. Deep golden-brown, steel-blue, and lavender toning bathe the lustrous surfaces of this Select coin. The design elements are well-struck save for the usual softness on the upper wings.  
Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$5.00; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33163, where it sold for \$4,406.25. NGC ID# 23R6, PCGS# 5297

- 3336 1875-S MS65 PCGS. BF-11, R.3.** The upper loop of a misplaced 8 is visible in the dentils below the primary 8 on this variety. On the reverse, a tiny vertical die line down from the eagle's talon through the fletching aids in identification. As a date, the 1875-S twenty cent piece is a type coin, and this Gem example is quite appealing. Although a trifle weak around the obverse border stars, the central devices are well-struck. Each side has just a hint of light golden color. NGC ID# 23R7, PCGS# 5298

1876 Twenty Cent, MS64  
Dusky Violet and Cobalt-Blue Toning

- 3337 1876 MS64 PCGS. CAC. BF-2, R.2.** About 80% of all 1876 twenty cent pieces show doubling on STATES and a slightly downward-sloping date, as here. Few, however, are anywhere near as attractive as this near-Gem. Original dusky violet and cobalt-blue toning allows frosty luster to percolate through the overlay. Uniformly razor-sharp. CAC: 21 in 64, 19 finer (3/19). NGC ID# 23R8, PCGS# 5299

**1876 Twenty Cent Piece, MS64  
Old 'Rattler' Holder, Gold CAC**

- 3338 1876 MS64 PCGS. Gold CAC.** Spectacular iridescent toning imbues both sides of this near-Gem with intense colors. Topaz-blue and fuchsia-pink dominate the eye, while additional colors and shades emerge with each change in viewing angle. A needle-sharp strike adds to the overall eye appeal. The coin is housed in a first-generation "rattler" holder and carries CAC's important Gold seal. The frosted surfaces radiate mint luster, while marks are limited to a short nick above the eagle's head. NGC ID# 23R8, PCGS# 5299

**1876 Twenty Cent, Frosty Gem  
Only 14,750 Coins Minted**

- 3339 1876 MS65 NGC. BF-2, R.2.** A diagonal line in the gown above the 6 and faint doubling on parts of the reverse legend identify the die pair, which was used to strike as much as 80% of the 14,750 1876 twenty cent pieces. This frosty, silver Gem shows pale blushes of thin golden color and a needle-sharp impression without mentionable softness. Expectedly clean and attractive with a single luster disturbance below star 1 that poses no distraction. NGC ID# 23R8, PCGS# 5299

**PROOF TWENTY CENT PIECES**

**1875 Twenty Cent, Toned PR64**

- 3340 1875 PR64 PCGS. CAC. BF-1, R.1.** The die scratch in the lower part of the shield is a simple attribution marker for this plentiful die marriage. Mint officials coined 1,200 proof twenty cent pieces during the denomination's first year of issue. This Choice specimen boasts rich toning over reflective fields and razor-sharp relief elements. Shades include violet, blue, green, and gold. CAC: 5 in 64, 10 finer (3/19).  
**From The William Rehwald Proof Set Collection.** NGC ID# 27GZ, PCGS# 5303

**1875 Twenty Cent Piece, PR63 Cameo  
First Year of This Short-Lived Type**

- 3341 1875 PR63 Cameo PCGS.** A razor-sharp strike attends both sides of this brilliant and contrasted proof twenty cent piece. Mirrored fields show a few light marks and isolated hairlines, but these are minor and do not diminish the excellent eye appeal. The bold reverse is particularly crisp and unmarked. Wisps of transparent gold toning add a natural touch to the brilliant-white fields and devices. Population: 28 in 63 Cameo, 37 finer (3/19). NGC ID# 23X7, PCGS# 85303

**1875 Twenty Cent Piece, PR64 Deep Cameo  
Extraordinary Field-Device Contrast**

- 3342 1875 PR64 Deep Cameo PCGS.** First-year of this short-lived and curious type coin. This will make a wonderful type coin for some lucky collector. The fields are extraordinarily deep, as often found on twenty cent proofs, and the devices are thickly frosted. The result is the Deep Cameo effect that PCGS has recognized. Each side is brilliant except for a light, thin ring of golden around the margins. Population: 1 in 64 Deep Cameo, 2 finer (3/19). NGC ID# C2FF, PCGS# 95303

**1875 Twenty Cent Piece, BF-2  
PR64 Deep Cameo**

- 3343 1875 PR64 Deep Cameo PCGS. BF-2, R.4.** Inaugural year of the four-year denomination. A sharply struck and undisturbed near-Gem. The fields are extraordinarily deep, as sometimes seen on twenty cent proofs, and the devices are thickly frosted. The result is the Deep Cameo effect that PCGS has recognized. Each side is brilliant except for a light, thin ring of golden-brown around the margins. Population: 1 in 64 Deep Cameo, 2 finer (3/19).  
*Ex: Long Beach Signature (Heritage, 9/2013), lot 6334, which realized \$8,225.* NGC ID# C2FF, PCGS# 95303

1876 Twenty Cent, PR63 Cameo  
Appreciable Field-Device Contrast

- 3344** 1876 PR63 Cameo PCGS. BF-1, R.4. A lovely Select Cameo example of this proof issue, showing a sharp strike and appreciable contrast. Faint hairlines in the fields limit the grade but do little to impact the eye appeal. Cameo proofs are scarce overall, and Deep Cameos are rarely seen at any grade level. Population: 28 in 63 Cameo, 56 finer (3/19). NGC ID# 27H3, PCGS# 85304

1876 Twenty Cent, PR64 Cameo  
Excellent Proof Type Coin

- 3345** 1876 PR64 Cameo NGC. BF-2, R.2. Not all proofs were sold in the Centennial year, contrary to Mint expectations. Excess proofs were released into circulation — especially for the twenty cent pieces, which are often seen in circulated grades. In contrast, this is a Choice Cameo proof example, exceptionally well-preserved, with attractive russet and amber-gold border toning. The strike is needle-sharp. Census: 20 in 64 Cameo, 33 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27H3, PCGS# 85304

1876 Twenty Cent, PR65 Cameo  
Peripherally Toned

- 3346** 1876 PR65 Cameo PCGS. BF-1, R.4. Arcs of deep violet and cobalt-blue toning surround brilliant centers and add visual interest to this already impressive two-toned specimen. Few proofs from this year could generate greater eye appeal than this unquestioned Gem. Population: 12 in 65 (1 in 65+) Cameo, 12 finer (2/19).  
*Ex: Central States Signature (Heritage, 5/2005), lot 6837, where it sold for \$8,050.* NGC ID# 27H3, PCGS# 85304

1876 Twenty Cent, PR65 Cameo  
Colorful Proof Type Coin

- 3347** 1876 PR65 Cameo PCGS. BF-3, R.4. The richly toned surfaces offer exquisite contrast between the glittering fields and frosty devices. Fully detailed and free from all but the most discreet flaws. The obverse has deep and vibrant blue color in the fields with hints of gold over the devices. The reverse offers intermingled blue and russet color with similar gold toning on the eagle. A pair of denticles are curiously missing near 10 o'clock on the obverse rim, between stars 4 and 5. Exceptional eye appeal for this briefly minted, odd denomination type coin. Population: 12 in 65 (1 in 65+) Cameo, 12 finer (2/19).

*Ex: Atlanta ANA Signature (Heritage, 4/2006), lot 508; FUN Signature (Heritage, 1/2007), lot 897; Baltimore ANA Signature (Heritage, 7-8/2008), lot 171; Central States Signature (Heritage, 4-5/2010), lot 2073, which realized \$8,625.* NGC ID# 27H3, PCGS# 85304

1877 Twenty Cent Piece, PR64  
Proof-Only Issue  
Lowest-Mintage in the Series

- 3348** 1877 PR64 NGC. CAC. BF-1, R.3. The denomination was discontinued for circulation, and all 1877 twenty cent pieces were struck in proof format. A mere 510 pieces were produced. This Choice survivor displays vibrant, steel-blue accents at the borders, yielding to pale-russet and golden hues across glassy, reflective fields. The central motifs are mostly frost-white, and contrast boldly against the mirrored fields. A few tiny obverse marks and hair-thin abrasions are seen with a loupe, yet this CAC-endorsed near-Gem proof has plentiful eye appeal. Census: 48 in 64, 47 finer. CAC: 12 in 64, 14 finer (3/19).

*From The William Rehwald Proof Set Collection.* NGC ID# 27H4, PCGS# 5305

**1877 Twenty Cent Piece, PR62 Cameo  
Proof-Only Series Key Issue**

- 3349 1877 PR62 Cameo PCGS. CAC. BF-1, R.3.** One of two proof-only issues in the short-lived series, the 1877 proofs are highly prized among specialists and scarcer overall than the 1878 proofs. Just 510 proofs were struck, and nearly a third of those may have been melted upon abolishment of the denomination. This is a brilliant example with strong cameo contrast. Faint hairlines limit the numeric grade, but the eye appeal is far above average as confirmed by its CAC endorsement. Population: 6 in 62 Cameo, 67 finer. CAC: 2 in 62, 23 finer (2/19). NGC ID# 27H4, PCGS# 85305

- 3350 1878 — Altered Surfaces — PCGS Genuine. Proof, Unc. Details. BF-1, R.3.** A proof-only date with a scant production of 600 pieces. This sharply struck specimen has the first-glance appearance of a pristine white-on-black cameo proof, but the surfaces are lacquered.

**1878 Twenty Cent Piece, PR64  
Rare 'Doily' Holder**

- 3351 1878 PR64 PCGS. BF-1, R.3.** The sole dies for this final-year, proof-only date. The borders exhibit light autumn-brown toning. The sharply struck surfaces display frosty motifs and glassy fields. A modern certification would undoubtedly yield a Cameo designation, but the coin is housed in a rare second-generation "doily" holder, in use at PCGS only between September and October 1989. The holder has a piece-out on its top left. The August 8, 2018 Doily Census (posted at <https://forums.collectors.com/discussion/967317/the-new-doily-census-2016>) does not list any 20 cent pieces. **From The William Rehwald Proof Set Collection.** NGC ID# 27H5, PCGS# 5306

**BUST QUARTERS**

**1815 B-1 Quarter Dollar, MS62  
Lustrous and Appealing for the Grade**

- 3352 1815 B-1, R.1, MS62 NGC.** Tompkins Die State 4/2, clashed above the date. This is a lustrous example of the sole 1815 quarter dollar die variety, showing a bold strike with delicate lilac and olive-gold toning. Surprisingly for the grade, no significant abrasions are seen. However, a loupe reveals some faint hairlines on each side that prevent a finer designation from NGC. NGC ID# 23RG, PCGS# 38942 Base PCGS# 5321

**1818 Quarter, MS63  
B-2, Lightly Toned**

- 3353 1818 B-2, R.1, MS63 NGC.** Tompkins Die State 2/1. Lumps surround the base of 2 in 25 C., and a long, circular die crack exists above the cap, from star 7 to star 10. Star 13 is widely repunched. This lightly toned Select Uncirculated quarter shows none of the die clashing that represents a later die state. Silver luster glows beneath the pale-gold toning. A few tiny marks are seen on the frosted, well-struck surfaces. B-2 is the most-available 1818 variety, making it a great selection for type. NGC ID# 23RH, PCGS# 38943 Base PCGS# 5322

- 3354 1818 B-4, R.2 — Cleaned — PCGS Genuine. AU Details.** Tompkins Die State 4/2 with a vertical crack across the portrait to the rim near 11:30. The dusky wheat-gold and stone-gray surfaces lack detracting marks but are moderately subdued. A well-defined example of this conditionally challenging date.

- 3355 1818 B-6, R.4 — Cleaned — NGC Details. AU.** Tompkins Die State 1/3. Reverse cracks are extensive but do not pass through the shield or the first A in AMERICA. Attractive peach-gold, jade-green, and plum-red patina graces the peripheries of this lightly circulated and minimally marked scarcer variety example. Select portions of the eagle lack a full strike, but the coin exhibits greater eye appeal than implied by the NGC notation.

- 3356 1820 Large 0, B-1, R.4 — Cleaned — NGC Details. XF.** Tompkins Die State 1/1, without a die chip inside the 2 in 25 C. Medium to deep cream-gray toning is consistent across this better variety Capped Bust quarter. The surfaces are dull but free from blemish. The claws and curls display moderate wear.

- 3357 1820 Small 0, B-5, R.5 — Cleaned — NGC Details. XF.** Tompkins Die State 2/1. A rare late die state with a rim cud between stars 3 and 4. Faint hairlines are apparent beneath the deep walnut-brown and apple-green toning, but marks are confined to a rim nick near star 13, and the eagle's wings are well defined. The strike shows softness on Liberty's curls and the eagle's neck.

**3358** 1821 B-3, R.2, AU50 PCGS. Tompkins Die State 2/1. Medium aquamarine, gunmetal-gray, and golden-brown toning envelops this unblemished Capped Bust quarter. Minor obverse hairlines require patience and magnification to locate. Wear is minimal and the eye appeal is attractive. NGC ID# 23RM, PCGS# 38965 Base PCGS# 5331

**3359** 1821 B-3, R.2, AU55 PCGS. CAC. Tompkins Die State 2/1. Rich gunmetal-gray toning blankets lightly abraded surfaces. This briefly circulated and nicely struck Capped Bust type coin is problem-free and will please the veteran specialist. Among all 1821 die varieties, CAC: 3 in 55, 11 finer (3/19). NGC ID# 23RM, PCGS# 38965 Base PCGS# 5331

**1825/4(2) Quarter, Near-Mint  
B-2 Early Die State, Rich Tan Toning**

**3360** 1825/4(2) B-2, R.2, AU58 PCGS. Tompkins Die State 1/1. All 1825-dated quarters are overdates. The scarce B-1 is the 1825/2 *Guide Book* variety, while the more available B-2 and B-3 correspond to the 1825/4 entry. A charming Borderline Uncirculated example that displays well struck and lightly marked surfaces beneath a medium to deep veneer of autumn-brown and forest-green toning. NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336

**1825/4(2) Quarter, AU58  
B-2, Smooth and Sharp**

**3361** 1825/4(2) B-2, R.2, AU58 PCGS. Tompkins Die State 1/1. Dusky steel-gray toning joins almond-gold and forest-green accents across the smooth surfaces of this near-Mint quarter. Silver luster shines through wherever an opening in the rich patina allows. A thoroughly original and attractive example of the Browning-2 variety, sharply struck from perfect dies. The overdate is inscrutable as always, with the 5 over either a 2, 3, or 4, or a combination thereof. Ex: *FUN Signature* (Heritage, 1/2017), lot 3900, which realized \$5,875. NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336

**3362** 1825/4(2) B-3, R.3 — Cleaned — PCGS Genuine Secure. AU Details. Tompkins Die State 5/5. A heavy crack journeys through the base of UNITED, and extends to the rim through the U and D. A rare late die state. A richly defined steel-gray quarter without any distracting marks. The surfaces are minutely granular but will please most observers.

**1834 Capped Bust Quarter, MS63  
Popular B-1, FS-901 Variety**

**3363** 1834 O Over F in OF, B-1, FS-901, R.1, MS63 PCGS. Some recutting shows on OF and there is no period after C in the denomination, identifying the B-1, FS-901 variety. This was the second use of the reverse die and lapping makes the recutting less obvious than it was on the earlier 1833 B-2 variety. This attractive Select specimen exhibits well-detailed design elements and shows the dramatic clash marks at Liberty's ear. Shades of lavender-gray toning blanket the lightly marked surfaces, with original mint luster underneath. Population: 27 in 63 (1 in 63+), 51 finer (3/19). Ex: *New York Signature* (Heritage, 10/2015), lot 4240, which realized \$4,230. NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353

**1834 B-4 Capped Bust Quarter, MS64  
Beautifully Toned and Prooflike**

**3364** 1834 B-4, R.1, MS64 PCGS. Tompkins Die State 3/4, heavily cracked, especially on the reverse, but not yet clashed on the obverse. Star 10 is repunched on this obverse die. This Choice Mint State example is prooflike and beautifully toned, showing blue and violet border hues around warm orange-gold interiors. Every detail is sharply brought up. As a date, the 1834 Capped Bust quarter is scarce this fine and rare in higher grades. Population: 42 in 64, 9 finer (3/19). NGC ID# 23RZ, PCGS# 38995 Base PCGS# 5353

**1835 B-1 Quarter, MS63  
Beautiful Toning**

**3365** 1835 B-1, R.1, MS63 PCGS. CAC. Tompkins Die State 1/2, with a downward-sloping die crack from the A in STATES to RIC in AMERICA. This is the most plentiful die variety for the highly collectible 1835 quarter. Each side is sharply struck and attractively toned in gunmetal-blue and lavender-gray patina with golden-orange accents. Radiant underlying mint luster. Population (all varieties): 22 in 63, 22 finer. CAC: 3 in 63, 9 finer (3/19). NGC ID# 23S2, PCGS# 38997 Base PCGS# 5354

**1838 Bust Quarter, MS62  
B-1, Minimal Marks**

- 3366** 1838 B-1, R.1, MS62 PCGS. B-1 is the final Capped Bust quarter die variety, though half dollars of the design were coined into 1839. This sea-green and golden-brown representative is satiny and only lightly abraded. The eagle and portrait are well struck, but a few stars show incompleteness. An opportunity for the advanced silver type collector. NGC ID# 23S5, PCGS# 39015 Base PCGS# 5357

**1856-S/S Seated Liberty Quarter, AU Details  
Elusive Guide Book Variety**

- 3370** 1856-S/S Large Over Small S, Briggs 4-E, FS-501 — Surfaces Smoothed — PCGS Genuine. AU Details. The remnants of an undertype small S are clearly visible below the large primary S mintmark, identifying the rare *Guide Book* and *Cherry-pickers'* variety. The variety was discovered in the 1960s and pictured in *Don Taxay's Counterfeit, Mis-Struck and Unofficial U.S. Coins*. An early auction appearance was in lot 648 of the 57th Auction (New Netherlands, 12/1963):

"1856 'S'. Large over Small S, the smaller mintmark being plainly visible within and to the r. of the large one. Just about Fine. Evenly worn, with minimal handling marks and practically full LIBERTY. One of only two known, the other being Roy Hill's discovery coin, which is also worn, and which has excited considerable excitement at convention displays. A major discovery, worth any price that can be paid for it! Enlarged Plate."

The 1856-S/S is still rare today, as PCGS and NGC have combined to certify only 43 examples between them, including an unknown number of resubmissions and crossovers (2/19). The variety is unknown in Mint State and most examples seen are in the Good-Very Good grade range. The present coin is one of the top two or three finest examples, despite the noted smoothing in the field, near star 10. The design elements were strongly impressed and show just a trace of high-point wear, and the pleasing lavender-gray surfaces are remarkably free of abrasions. The finest-known AU58 NGC example from the Eugene Gardner Collection sold for \$28,200 in a Heritage auction in 2014. Discerning collectors should bid accordingly.

**SEATED QUARTERS**

**1842-O Small Date Quarter, VF35  
Rarest O-Mint Issue in the Series**

- 3367** 1842-O Small Date VF35 PCGS. CAC. Briggs 1-A. Larry Briggs listed the 1842-O Small Date quarter as High R.6 in Fine and Very Fine grades in his 1991 reference, *The Comprehensive Encyclopedia of United States Seated Liberty Quarters*. Perhaps 200 to 250 piece survive in all, making this the rarest New Orleans Seated quarter. Each side enjoys attractive patina with lighter fields and device, and deep hues within the hidden areas. LIBERTY is strong, as is most feather detail. A mark right of star 3 identifies this coin. Population: 3 in 35, 11 finer. CAC: 3 in 35, 2 finer (3/19). NGC ID# 23SN, PCGS# 5403

- 3368** 1853/53 No Arrows, Briggs 1-A, FS-301, VG8 ANACS. All genuine 1853 No Arrows quarters show repunching on 53 in the date, visible even on this well-worn survivor. With only 44,200 pieces struck compared to more than 15 million With Arrows coins, this is a key issue in all grades. BERT is clear on the shield, and outlines of all the major design elements are strong. Violet-gray patina. Housed in a small-sized holder. NGC ID# 23TA, PCGS# 395930 Base PCGS# 5421

- 3369** 1853 Arrows and Rays MS63 PCGS. A lustrous coin with mottled russet and olive-gold toning, this Select Arrows and Rays type coin displays pleasing eye appeal. The central devices are well-struck, while the border stars exhibit mild softness. A collector-grade Mint State coin. PCGS# 5426

- 3371** 1862-S AU53 PCGS. The 1862-S is one of several rare San Francisco Mint quarters from the 1860s. All are low-mintage issues; here, just 67,000 pieces were struck. The coins entered circulation and stayed there, and few went into collector hands because mintmarks were ignored by most numismatists. This sharply struck and lightly toned About Uncirculated coin has silver-gray surfaces with slight deepening to golden-gray around the raised devices. Marks are limited to a few tiny abrasions and minor marks. Population: 4 in 53, 43 finer (3/19). NGC ID# 23TW, PCGS# 5457

**1864-S Seated Quarter, VF30  
Scarce, Low-Mintage Key Issue**

- 3372 1864-S VF30 PCGS.** Rare in all grades and one of the keys to the Seated quarter series, the 1864-S had a mintage of just 20,000 pieces — most of which circulated to attrition in the “hard money” dependent West Coast economy. The low mintage explains much of its popularity and scarcity in all grades. This example is evenly worn over each side, with all letters of LIBERTY sharp and much detail present throughout the wing feathers. Light-gray surfaces display deeper gray accents around the peripheries. Population: 6 in 30, 25 finer (3/19). NGC ID# 23TZ, PCGS# 5460

**1875 Quarter, MS66  
Attractively Toned and Lustrous**

- 3373 1875 MS66 PCGS. CAC. Briggs Unlisted.** Type Two reverse, narrow serifs on As. The right side of the 1 in the date aligns with the shield point. The Specie Resumption Act resulted in a massive increase of silver subsidiary coinage production beginning in 1875. More than 4.2 million quarters were minted that year. This exquisitely preserved Premium Gem is lightly struck over the centers, but the date, stars, and arrowheads are strong. Attractive violet-gray and blue-green patina dominates the smooth, lustrous surfaces. Population: 23 in 66 (1 in 66+), 5 finer. CAC: 7 in 66, 4 finer (3/19). NGC ID# 23UX, PCGS# 5498

**1876 Seated Liberty Quarter, MS67  
One Certified Numerically Finer**

- 3374 1876 MS67 NGC.** The Type Two Reverse, identified by narrow feet on the A in STATES. Light golden-brown color graces the margins of this lustrous and exceptionally preserved Superb Gem. Boldly struck, the peripheral legends, stars, and the eagle are especially well defined. The 1876 is not a rarity by Seated quarter standards, yet few pieces have survived with such outstanding quality. Census: 5 in 67 (1 in 67★), 1 finer (2/19). NGC ID# 23V2, PCGS# 5501

- 3375 1877-S MS65 NGC.** The 1877-S Seated Liberty quarter claims a mintage of nearly 9 million pieces, but the issue is definitely elusive at the MS65 grade level. This attractive Gem is well-preserved, with sharply detailed design elements and intense natural toning on both sides. Census: 33 in 65, 10 finer (2/19). NGC ID# 23V7, PCGS# 5506

- 3376 1877-S MS66★ NGC.** The obverse is prooflike, and the reverse is semiprooflike. The finish on this branch mint Premium Gem is likely the reason it coaxed the scarce Star designation from NGC. Crisply struck and brilliant with exceptionally unabraded surfaces. NGC ID# 23V7, PCGS# 5506

**1879 Quarter, Brilliant Superb Gem  
13,600 Coins Struck**

- 3377 1879 MS67 NGC. Briggs 1-A.** A die lump appears in the upper part of the third vertical shield recess on the reverse. The Mint dropped quarter dollar production to a meager 13,600 coins in 1879. None were needed for circulation, and there was far more focus on the manufacture of Morgan dollars at that time. This bright, totally brilliant Superb Gem was strongly struck and quickly set aside and preserved. There are no marks to mention. Census: 25 in 67 (2 in 67★, 1 in 67+★), 7 finer (3/19). NGC ID# 23VB, PCGS# 5511

**1880 Quarter, Brilliant MS67  
Low-Mintage Date**

- 3378 1880 MS67 NGC. Briggs 1-A.** Type Two Reverse. The entirely brilliant, snow-white surfaces display a layer of intense mint frost over each side. The striking definition is crisp and nearly full on both obverse and reverse. Immaculate surface preservation is, however, perhaps the single most impressive feature of this conditionally rare Superb Gem. Census: 11 in 67 (1 in 67+, 1 in 67★), 5 finer (3/19).  
*Ex: Baltimore Signature (Heritage, 3/2009), lot 1056, where it sold for \$3,737.50.* NGC ID# 23VC, PCGS# 5512

**1887 Quarter, MS66  
Wholly Untoned**

- 3379 1887 MS66 PCGS. Briggs 1-A.** All 10,000 circulation-strike quarters from 1887 feature a horizontal die scratch in the lower part of the shield. Delightful eye appeal is the defining quality of this Premium Gem, as is excellent preservation. Frosty luster shines from wholly untoned and essentially unabraded surfaces. Population: 25 in 66 (1 in 66+), 16 finer (3/19). NGC ID# 23VK, PCGS# 5519

**1890 Seated Liberty Quarter, MS66+  
Low-Mintage Late Series Issue**

- 3380 1890 MS66+ PCGS. CAC. Briggs 2-B.** From a small Philadelphia mintage of 80,000 pieces, the 1890 Seated Liberty quarter is scarce-to-rare in all Mint State grades. This Plus-graded Premium Gem exhibits well-detailed design elements, with touch of the usual softness on the stars and Liberty's head. The well-preserved surfaces are blanketed in shades of sea-green and lavender-gray toning, with prooflike reflectivity underneath. Population: 28 in 66 (4 in 66+), 32 finer. CAC: 10 in 66, 10 finer (3/19). NGC ID# 23VP, PCGS# 5523

**PROOF SEATED QUARTERS**

- 3381 1858 PR63 Cameo NGC.** Cameo proof 1858 Seated Liberty quarters are rare, and no Ultra Cameos are reported at NGC. This Select example is sharp and brilliant with appreciable contrast on both sides. Scattered minuscule strike-throughs limit the grade, but are not bothersome overall. Census: 3 in 63 Cameo, 10 finer (3/19). NGC ID# 23WK, PCGS# 85554
- 3382 1860 PR64 Cameo NGC. Briggs 9-H.** A nicely mirrored near-Gem that displays satin luster and icy devices. Brilliant save for minor carbon near the Q in QUAR. The left-side stars are incompletely brought up, but the remainder of the strike is sharp. Census: 5 in 64 Cameo, 11 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 23WM, PCGS# 85556
- 3383 1861 PR64 NGC. Briggs 7-E.** A fully struck near-Gem proof with satiny devices and deeply mirrored fields. Only modest contrast is apparent on each side, preventing a Cameo designation. Warm golden toning graces the fields and devices. Census: 24 in 64, 26 finer; 0 in 64 Cameo, 3 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 23WN, PCGS# 5557

- 3384 1863 PR64 NGC. CAC.** Struck at the height of the Civil War, the 1863 has the lowest proof mintage of any date between 1859 and the end of the Seated series. This crisply struck Choice quarter features lightly toned centers, but the margins exhibit dramatic golden-brown, fire-red, and apple-green patina. Certified in a former generation holder. CAC: 6 in 64, 9 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 23WR, PCGS# 5559

- 3385 1864 PR64 PCGS.** Strong contrast exists between the smoothly mirrored fields and well-frosted devices, while a thin border of steel-blue toning surrounds dappled amber-gold fields that embrace the silver-white central motifs. A few delicate hairlines are scattered beneath the toning, and visible only with the aid of a loupe. The eye appeal is excellent for this Civil War-era proof. Just 470 proofs were struck. Housed in a previous-generation blue label holder, with barcode on the back. Population: 61 in 64 (1 in 64+), 21 finer (2/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 23WS, PCGS# 5560

**1865 Quarter, PR64 Ultra Cameo  
Bold Contrast, Final No Motto Proof**

- 3386 1865 PR64 Ultra Cameo NGC. Briggs 3-B, Doubled Die Reverse.** Narrow die doubling is visible at the bottom of QUAR on the reverse. This is a brilliantly mirrored proof, with bold, frosted devices and strong cameo contrast throughout both sides. The strike is razor-sharp on the devices, set against flashy fields for optimal contrast. A few faint hairlines provide little distraction and are consistent with the near-Gem grade. Less than a dozen finer examples exist in Deep or Ultra Cameo format. Census: 2 in 64 Ultra Cameo, 2 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 23WT, PCGS# 95561

**1866 Motto Quarter, PR66 Cameo  
Brilliant and Well Struck**

- 3387 1866 Motto PR66 Cameo PCGS. Briggs 2-B.** All raised elements are boldly struck and frosty. The coin is brilliant throughout, and the mirrored fields confirm the Cameo designation. The flashy surfaces appear essentially pristine. From a proof mintage of 725 pieces, only a few dozen examples have been certified as Cameo or Deep Cameo. Population: 4 in 66 Cameo, 2 finer (3/19). NGC ID# 23WX, PCGS# 85565

- 3388 1867 PR64 PCGS. Gold CAC. Briggs 2-B.** A glance at the (3/19) CAC population report confirms that exactly one proof 1867 quarter bears the coveted gold CAC seal. This stone-white near-Gem shows softness on the right-side stars, though the rest of the design is boldly brought up. Cameo contrast is blatant, but denied by the old green label holder.  
*From The William Rehwald Proof Set Collection.* NGC ID# 23WY, PCGS# 5566

**1867 Seated Liberty Quarter, Toned PR67  
Rarely Offered This Fine**

- 3389 1867 PR67 NGC. Briggs 2-B.** An outstanding Superb Gem proof from a mintage of just 625 pieces. The luminous obverse has a blend of lemon-gold and orange with a touch of blue at the rims, while the gleaming reverse offers vivid aqua, sapphire, and rose patina. Only a handful of proof 1867 quarter dollars are known this fine. Census: 6 in 67 (2 in 67★), 2 finer (2/19).  
*Ex: ANA Signature (Heritage, 8/2007), lot 673, which realized \$1,840; FUN Signature (Heritage, 1/2011), lot 3438, which realized \$2,300; ANA Signature (Heritage, 3/2011), lot 3527, which realized \$2,070.* NGC ID# 23WY, PCGS# 5566

- 3390 1868 PR64 NGC. CAC. Briggs 2-B, Flynn-RPD-001.** The 1 in the date is lightly repunched north. A die lump beneath the B in LIBERTY provides a secondary marker. Radiant white devices contrast with mirrored fields, though the former generation holder lacks a Cameo designation. Dappled lavender and cobalt-blue toning dominates the margins. CAC: 3 in 64, 9 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 23WZ, PCGS# 5567

- 3391 1873 Arrows PR64 NGC. CAC. Briggs 5-D.** Impressive peach-gold, electric-blue, and lavender-red toning illuminates the margins of this low-mintage proof quarter. Although business strikes of the issue are available, a mere 500 Open 3, Arrows proofs were produced. Cameo contrast is apparent, though undesignated because the coin is encased in a prior generation holder. CAC: 9 in 64, 5 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 23XR, PCGS# 5574

- 3392 1874 Arrows PR64 NGC. CAC. Briggs 5-D.** A two-year type coin, the Arrows, Motto design is common in typical circulated grades, but proofs are challenging, limited to mintages of 500 pieces in 1873 and an additional 700 pieces in 1874. This is a brilliant and well struck example that boasts noticeable cameo contrast unmentioned by the circa-2000 holder. CAC: 7 in 64, 9 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 23XS, PCGS# 5575

**1874 Arrows Quarter, PR65  
Originally Toned Two-Year Proof Type Coin**

- 3393 1874 Arrows PR65 NGC.** The 1874 Arrows quarters are somewhat more available today than their 1873 counterparts due to their larger proof production, 850 pieces versus 540 for the 1873 Arrows. This makes them a popular and obvious target for type collectors. This is a lovely, fully struck Gem that shows original patina consistent with the other Newman Collection examples of this era, the product of decades of meticulous preservation in a Wayne Raymond album. Highly attractive. Census: 38 in 65, 31 finer (3/19).  
*Ex: Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33199, where it brought \$6,756.25.* NGC ID# 23XS, PCGS# 5575

- 3394 1875 PR64 PCGS. CAC. Briggs 4-E.** Type One Reverse with wide feet on the letter As. The 5 in the date is repunched within the loop. This nearly white near-Gem displays distinction between the fields and devices, although it lacks a Cameo designation. A crisp strike except on a few star centers. Certified in a green label holder. CAC: 6 in 64, 7 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 23X7, PCGS# 5576

- 3395 1875 PR64 Cameo NGC. Briggs 4-E.** Type One Reverse. The upper stars lack a complete impression, but the overall strike is good. A dusting of wheat-gold toning confirms the originality of this lightly abraded and nicely mirrored near-Gem. Census: 15 in 64 Cameo (2 in 64+), 14 finer (2/19). NGC ID# 23X7, PCGS# 85576

**1876 Quarter, PR67 Cameo  
Mirrored, Jet-Black Fields**

- 3396 1876 PR67 Cameo NGC.** Aside from some minor dusky color on the reverse, this Superb Gem proof quarter appears exactly as it would have immediately after falling from the coining press 143 years ago. Thickly frosted and fully impressed devices against mirrored, jet-black fields produce a highly appealing Cameo effect. A lint mark left of star 11 is as-made. One of 1,150 proofs struck during this centennial year. Census: 7 in 67 Cameo (1 in 67★), 0 finer (2/19). NGC ID# 23X8, PCGS# 85577

**1883 Quarter, PR66 Cameo  
Rare High-End Example**

- 3397** 1883 PR66 Cameo PCGS. Briggs 1-A, Flynn-MPD-001, the proof dies. The proof 1883 quarter dollar is scarce in Cameo grades, and a handful of Deep Cameo coins at PCGS do not grade as high numerically as this Premium Gem Cameo. The coin is fully struck and virtually untuned, showing frost-white devices against liquidlike fields. Eye appeal is spectacular. Population: 14 in 66 (1 in 66+) Cameo, 8 finer (2/19). NGC ID# 23XE, PCGS# 85584

**BARBER QUARTERS**

**1893-S Quarter Dollar, MS66+  
Condition Census Piece**

- 3398** 1893-S MS66+ PCGS. The 1893-S quarter dollar is scarce in Mint State, and such pieces are typically seen only in the MS62 to MS64 grade range. This high-end Premium Gem is obviously a condition rarity and an important Registry Set opportunity. Exceedingly sharp definition appears on all of the usual weak spots, such as the eagle's talons and right (facing) shoulder and the peripheral obverse stars. Light golden interiors cede to deeper russet border toning. A single tick behind Liberty's eye appears to be what limits the grade. Population: 5 in 66 (2 in 66+), 2 finer (3/19). NGC ID# 23XY, PCGS# 5606

- 3399** 1896-O MS63 PCGS. The 1896-O is much scarcer in Mint State than its Philadelphia cousin. This lustrous and unmarked example has a good strike and exhibits superior eye appeal. A narrow arc of russet-brown toning visits the right obverse border. Encapsulated in a first generation "rattler" holder. Population: 14 in 63, 24 finer (3/19). NGC ID# 23Y8, PCGS# 5614

**1896-S Quarter Dollar, XF45  
Some Luster Remains**

- 3400** 1896-S XF45 PCGS. The 1896-S is one of the "Big Three" key dates in the Barber quarter series. Only 188,039 pieces were struck — the third-lowest mintage of the series. This Choice XF example is the ideal collector coin. Both sides are virtually untuned and display remnants of satin luster. High-point wear is remarkably light. Indeed, the appearance is akin to what would be expected of an AU coin, save for scattered abrasions and some hairlines in the fields that PCGS likely considered when assigning a grade. NGC ID# 23Y9, PCGS# 5615

**1901-S Quarter Dollar, Good 4  
Collector-Grade Example**

- 3401** 1901-S Good 4 PCGS. A problem-free collector-grade example of this key San Francisco issue, showing smooth battleship-gray surfaces that deepen in hue in the fields, producing the desirable circulation-cameo effect. The obverse rim is strong, while the reverse rim is a trifle weak from 2 to 8 o'clock. The central devices exhibit a bold outline and the eagle has some feather detail remaining. NGC ID# 23YR, PCGS# 5630

- 3402** 1905-O MS64 NGC. The 1905-O is a slightly better date in the Barber quarter series, particularly in Mint State. Examples grading finer than MS64 are rare. This Choice coin displays a sharp strike and luminous satin luster. Warm golden toning covers each side, and the surfaces are attractively clean for the grade. Census: 16 in 64, 5 finer (2/19). NGC ID# 23Z3, PCGS# 5640

**1906-O Quarter, MS66+  
Sharp and Strongly Struck**

- 3403** 1906-O MS66+ PCGS. CAC. With a mintage in excess of 2 million coins, the 1906-O quarter is collectible through Premium Gem condition. Anything finer than this doubly recognized high-end example is rare. Dusky toning in shades of violet, gold, and blue lightly colors impressively sharp and beautifully preserved surfaces. Population: 41 in 66 (19 in 66+), 7 finer. CAC: 16 in 66, 6 finer (3/19). NGC ID# 23Z7, PCGS# 5644

**1907-O Barber Quarter, MS67  
Registry Grade Example**

**3404 1907-O MS67 PCGS.** Despite the large mintage of more than 4.5 million pieces, the 1907-O Barber Quarter is conditionally rare at the MS67 grade level. This spectacular Superb Gem exhibits well-detailed design elements and vibrant mint luster, under pleasing shades of magenta and golden-tan toning. Population: 6 in 67 (1 in 67+), 0 finer (3/19). NGC ID# 23ZA, PCGS# 5647

**3405 1909-O XF45 PCGS.** One of the elusive issues in the Barber quarter series, with an average certified grade of just VF20. This piece has natural blue and slate surfaces with underlying gold patina. Population: 13 in 45, 74 finer (3/19). NGC ID# 23ZJ, PCGS# 5655

**1909-O Quarter, Choice AU  
Blue-Gray and Golden Patina**

**3406 1909-O AU55 PCGS.** Bluish-gray surfaces exhibit hints of gold that are almost entirely confined to the reverse of this Choice About Uncirculated New Orleans quarter. A touch of friction on the forecurls and cheek determine the grade, but the stars, tailfeathers, and fletchings remain bold. There is one pedigree marker on the lower part of the shield. Population: 4 in 55, 60 finer (3/19). NGC ID# 23ZJ, PCGS# 5655

**1909-O Quarter, MS62  
Razor-Sharp Reverse**

**3407 1909-O MS62 PCGS.** This semikey New Orleans issue is one of the few Barber quarters with a mintage below 1 million coins (712,000 to be exact). Examples are especially elusive in Mint State. Subdued silver surfaces show bluish accents and fine hairlines that explain the grade. Complete definition on the reverse is exceptional not just for an O-mint Barber quarter, but for one from any mint. Population: 11 in 62, 43 finer (3/19). NGC ID# 23ZJ, PCGS# 5655

**3408 1913-S VG10 NGC.** The rare 1913-S may be easier to find in Uncirculated grades than in problem-free VG10 such as this smoothly worn, well-defined coin. Warm-gray surfaces deepen around the raised devices, while full rims remain. Four full letters of LIBERTY are visible, plus portions of BER. There are no distracting marks, and the reverse looks a full grade finer than the assigned VG level. Census: 24 in 10, 70 finer (3/19). NGC ID# 23ZW, PCGS# 5666

**1913-S Quarter, AU Details  
Key S-Mint Issue**

**3409 1913-S — Repaired — PCGS Genuine. AU Details.** Among the “Big 3” Barber quarter issues, the 1913-S has a lower mintage (by far) than either the 1896-S or the 1901-S. It is not the rarest of the three, yet the 1913-S is equally in demand in all grades. This example shows several areas of repair and tooling on and near the portrait. The central obverse motifs are overly glossy from polishing, and the reverse shows evidence of high point polish as well. Some pale-gold and gray toning remains in the fields, and About Uncirculated sharpness survives.

**3410 1915-S MS66+ PCGS.** A moderately low mintage of 704,000 coins aided in the limited survival of high-grade representatives of this issue, with Premium Gems being rare. A blush of light champagne toning warms softly frosted surfaces on this well-preserved MS66+ piece, while razor-sharp design definition only adds to the immense visual appeal. Population: 25 in 66 (3 in 66+), 4 finer (3/19). NGC ID# 2424, PCGS# 5672

**PROOF BARBER QUARTERS**

**1893 Quarter, PR66+ Cameo  
Proof Barber Type Coin**

**3411 1893 PR66+ Cameo PCGS.** A scarce, high-end Cameo example of the 1893 proof Barber quarter, showing strong contrast and a bold strike. Each side displays a kiss of delicate champagne toning, with a halo of deeper russet around the outer peripheries. The preservation is outstanding on this early proof Barber type coin. Population: 19 in 66 (4 in 66+) Cameo, 22 finer; 7 in 66 (1 in 66+) Deep Cameo, 8 finer (3/19). NGC ID# 2428, PCGS# 85679

**3412 1894 PR64 NGC. Gold CAC.** The (3/19) CAC census indicates that only a single proof 1894 quarter has secured the elusive gold CAC seal. This fully struck near-Gem displays attractive medium sea-green and autumn-brown toning. The motifs appear frosty beneath their delicate palette of colors.  
**From The William Rehwald Proof Set Collection.** NGC ID# 2429, PCGS# 5680

- 3413 1896 PR64 PCGS. Gold CAC.** A razor-sharp near-Gem with comprehensive light wheat-gold and lime-green toning. Pristine save for a faint graze on the lower cheek. A lintmark (as issued) near star 1 provides an identifier. Housed in a first-generation "rattler" holder. Gold CAC: 1 in 64, 1 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 23Y7, PCGS# 5682

**1896 Barber Quarter, PR67 Cameo  
Only 762 Examples Struck**

- 3414 1896 PR67 Cameo NGC.** The 1896 proof Barber quarter claims a modest mintage of 762 pieces and few survivors can match the quality and eye appeal of the present coin. This delightful Superb Gem exhibits razor-sharp, frosty design elements that stand out in sharp contrast to the deeply mirrored fields. A few delicate wisps of pale gold toning accent the flawless surfaces. Census: 26 in 67 Cameo (2 in 67+, 1 in 67★, 2 in 67+★), 10 finer (3/19).  
*Ex: New York Signature (Heritage, 10-11/2015), lot 4282, which realized \$2,820.* NGC ID# 59JB, PCGS# 85682

**1901 Barber Quarter, PR67  
Delightful Cameo Example**

- 3415 1901 PR67 Cameo PCGS. CAC.** The Mint would switch to an all-brilliant finish for proof coins in 1902, making this issue the last where Cameo surfaces were seen with any frequency. This spectacular Superb Gem exhibits sharply detailed, richly frosted design elements that contrast profoundly with the deeply mirrored fields, creating a dramatic cameo flash when this coin is tilted in the light. Population: 24 in 67 (11 in 67+) Cameo, 2 finer. CAC: 17 in 67, 3 finer (3/19). NGC ID# 242G, PCGS# 85687
- 3416 1903 PR66 PCGS.** This is a brilliant Premium Gem proof, clearly cameo-like on the obverse, which features incredibly deep, smooth mirrors free of any hairlines or distractions. The reverse is equally sharp but less-deep, where die polish lines exist and slightly diminish the reflectivity. Both sides are fully struck and frosted throughout the devices. Eye appeal is excellent. Population: 25 in 66 (1 in 66+), 23 finer (3/19). NGC ID# 242J, PCGS# 5689

**1908 Quarter, PR68  
Among 545 Proofs Struck**

- 3417 1908 PR68 NGC.** The Mint struck 545 proof quarters in 1908. This is one of the few survivors to have reached the PR68 level, and it is clear to see why. Unmarked surfaces offer beautiful shades of dusky blue, violet, and rose-gold patina over each side, and the fields maintain terrific flashiness beneath the toning. That the strike is full should come as no surprise. Census: 7 in 68 (2 in 68★), 0 finer in this category (3/19). NGC ID# 242P, PCGS# 5694

- 3418 1911 PR66 NGC.** Lush orange, reddish-gold, and lime-green patination is more extensive and takes on deeper hues on the reverse of this Premium Gem — a sharply struck proof that is wholly original and marvelously preserved. Census: 28 in 66 (1 in 66★), 29 finer (3/19).  
*Ex: FUN Signature (Heritage, 1/2015), lot 4697; New York Signature (Heritage, 10/2015), lot 4290.* NGC ID# 242T, PCGS# 5697

**STANDING LIBERTY QUARTERS**

**1916 Standing Liberty Quarter, XF45  
Lovely Example of the Series Key**

- 3419 1916 XF45 NGC.** One of the 52,000 Standing Liberty quarters struck in 1916 but released into circulation the following year alongside the 1917-dated coins. Softness on the date, leg, head, and shield are typical, but this important first-year key is significantly better-preserved than the average survivor. Muted silver surfaces with golden accents show partial luster on the reverse. A slim pincscratch occurs between stars 4 and 5 on that side. A really nice example for an advanced collection. NGC ID# 43XR, PCGS# 5704
- 3420 1917 Type One MS66+ Full Head PCGS.** Luster is satiny on this piece, and under a loupe each side displays minute texture consistent with the general look of the Type One quarter. This piece is sharp and beautifully preserved with light golden and blue-gray toning. Only a few tiny contact marks are evident upon close examination. NGC ID# 242Z, PCGS# 5707
- 3421 1917 Type One MS66 Full Head PCGS. CAC.** Satiny mint luster shows no mentionable abrasions as it illuminates well-struck design elements. Each side has original golden patina across the interiors, with daubs of russet-olive around the borders. Eye appeal is pleasing. The 1917 Type One often comes bright white or with light golden toning. Pieces with heavier toning such as this appeal to a range of series specialists. NGC ID# 242Z, PCGS# 5707

**1917 Quarter, MS67 Full Head  
Type One Standing Liberty Design**

- 3422 1917 Type One MS67 Full Head PCGS.** This incredible Superb Gem represents the two-year Type One design issued in 1916 and 1917. The design was modified during the second year of production to preserve Liberty's modesty, according to some, or to send her to war, according to others. This lovely piece has pristine surfaces with frosty silver luster enhanced by delicate peripheral gold toning. Population: 93 in 67 (8 in 67+) Full Head, 0 finer (3/19). NGC ID# 242Z, PCGS# 5707

- 3423 1918 MS65 Full Head PCGS.** A satiny Gem example with sharp head detail and well-defined shield rivets. The trade-off with regards to the strike is a weakly impressed date, which is often seen on the 1918 Standing Liberty quarter. A dusting of olive-gold toning appears on the obverse, while the reverse has a dusting of deeper blue-gray patina. There are no distracting abrasions. NGC ID# 2437, PCGS# 5721

**1918 Quarter, MS66 Full Head  
Scarce This Fine**

- 3424 1918 MS66 Full Head PCGS.** The 1918 Standing Liberty quarter often comes sharp, although Full Head pieces are scarce as fine as the MS66 grade level. This Premium Gem is fully developed on the head and date, and the shield rivets only have a small point of weakness. A trace of light golden toning graces otherwise brilliant, satiny mint luster. Population: 57 in 66 (6 in 66+) Full Head, 15 finer (3/19). NGC ID# 2437, PCGS# 5721

**1918-S Quarter, MS67  
None Numerically Finer**

- 3425 1918-S MS67 NGC.** The 1918-S is usually found without Full Head definition (97% of the time by Cline's estimation) but rarely as fine as this gorgeous Superb Gem. Liberty's head, the tops of the date digits, and rivets 3 and 4 are typically incomplete. The feathers on the leading edge of the eagle's wing are crisp, however, as is the chainmail. Totally brilliant and thickly frosted. Census: 5 in 67, 0 finer (3/19). NGC ID# 2439, PCGS# 5724

- 3426 1920-D MS64 PCGS. CAC.** The 1920-D is rare with a sharp strike. This CAC-approved near-Gem shows the usual weakness on Liberty's head and the shield, and the top of the date blends into the pedestal. Satiny with a touch of champagne-lilac toning and no major abrasions. NGC ID# 243F, PCGS# 5736

**1923-S Quarter Dollar, MS64  
Elusive San Francisco Issue**

- 3427 1923-S MS64 PCGS.** This key date is challenging in circulated condition, although Mint State examples are frequently available for a price. This near-Gem displays satiny mint luster and warm golden and rose toning. No significant abrasions are seen, although the usual strike weakness affects the shield rivets and Liberty's head. The top of the date blends into the pedestal. Eye appeal is pleasing. NGC ID# 243K, PCGS# 5744

**1928-S Quarter, MS67 Full Head  
Among the Finest at PCGS**

- 3428 1928-S MS67 Full Head PCGS.** A beautiful example of this late-series San Francisco issue, showing incredibly luminous and frosty mint luster that is devoid of even a single mentionable flaw. Delicate olive-gold border toning leaves the interiors essentially brilliant. Liberty's head and toes are sharp, and the shield has above-average definition. The 1928-S is rare this fine with Full Head detail, and none are finer at PCGS. Population: 27 in 67 (3 in 67+) Full Head, 0 finer (3/19). NGC ID# 243Z, PCGS# 5771

**1930-S Quarter, MS67 Full Head  
Scarce This Fine**

- 3429 1930-S MS67 Full Head PCGS.** This frosty, golden-toned Superb Gem is just about as flawless as Standing Liberty quarters can be found. Each side displays luminous mint luster and is devoid of contact marks, even on the high points of the devices. Liberty's head detail just qualifies as full, although the shield rivets are a trifle weak as always. Eye appeal is pleasing. Population: 34 in 67 (5 in 67+) Full Head, 1 finer (3/19). NGC ID# 2446, PCGS# 5781

## WASHINGTON QUARTERS

### 1932 Washington Quarter, MS67 Inaugural Year of Issue, None Finer

- 3430 1932 MS67 PCGS.** The 1932 quarter is not only a popularly sought-after first-year issue, it also boasts one of the lower mintages in this long-running series. Merely 5.4 million coins were struck. Many were saved and survive in MS64, MS65, and MS66, but the issue becomes a significant condition rarity at the Superb Gem level. This is one of 10 coins so-graded at PCGS. There are another five MS67 submissions at NGC. Both firms have yet to encounter a finer example (3/19).

The surfaces of this frosty piece are partly brilliant and partly toned in a thin veneer of gold and powder-blue. Washington's hair and the eagle's feathers are boldly struck. Magnification yields just a handful of microscopic flecks. NGC ID# 2447, PCGS# 5790

- 3431 1932-S MS65 PCGS.** An umbrella of rainbow toning yields to dappled iridescence on the obverse of this attractively toned 1932-S. The reverse is stone-white with tiny carbon dot on the right (facing) wing. The strike is sharp throughout, making this low-mintage Gem an excellent addition to an advanced Washington quarter set. NGC ID# 2449, PCGS# 5792

### 1940 Quarter, MS68 Sole Finest at NGC

- 3432 1940 MS68 NGC.** This MS68 Washington quarter reigns alone atop the NGC Census for the date — a consideration that should not be underestimated among Registry builders. Dusky shades of pastel blue and gold patina reside over the frosty surfaces of this Superb Gem. Each side showcases full strike detail and a just a couple of microscopic ticks that go unseen without a loupe. Census: 1 in 68, 0 finer (3/19). NGC ID# 244U, PCGS# 5811

### 1948-D Quarter, MS68 The Finest Certified

- 3433 1948-D MS68 NGC.** This amazing Superb Gem is the finest 1948-D quarter that has been certified. In fact, it is the only MS68 submitted to either grading service (3/19). This sharply defined piece has brilliant and frosty silver luster beneath lovely gold and iridescent toning splashes on the obverse, and iridescent mottling on the reverse. NGC ID# 245M, PCGS# 5837

### 1951-D Quarter, MS67+ Beautifully Toned Registry Coin

- 3434 1951-D MS67+ PCGS. CAC.** Blended rainbow hues encircle the peripheral regions of this Plus-graded Superb Gem Registry coin, while the centers show warm yellow-gold color. The strike is bold and a few trivial surface grazes are almost indistinguishable amid the vibrant, frosty luster. Only a single coin is finer at either of the leading grading services. Population: 72 in 67 (9 in 67+), 1 finer (2/19). Ex: ANA Signature (Heritage, 8/2015), lot 4900, where it sold for \$6,462.50. NGC ID# 245X, PCGS# 5847

**1959 Quarter Dollar, MS67+  
CAC-Endorsed Registry Coin**

- 3435** 1959 MS67+ PCGS. CAC. This glistening Registry coin displays satiny surfaces with a dusting of sea-green and golden toning, the latter color mainly concentrated in the margins. Plus-graded, this piece is tied with one other for the finest at PCGS, and it is among only a dozen coins in this grade with CAC endorsement, and none finer. Population: 22 in 67 (2 in 67+), 0 finer. CAC: 12 in 67, 0 finer (3/19). NGC ID# 246H, PCGS# 5866

**1961-D Quarter, MS67  
Tied for the Finest Certified**

- 3436** 1961-D MS67 PCGS. A Set Registry collectors' dream coin, this lovely 1961-D is tied for the finest that PCGS and NGC have certified. Both sides exhibit brilliant silver luster with splashes of rich gold toning, the obverse adding brilliant emerald toning to the mixture. Population: 9 in 67 (1 in 67+), 0 finer (3/19). NGC ID# 246N, PCGS# 5871

**SMS WASHINGTON QUARTER**

**1964 SMS Quarter Dollar, SP66  
Special Strike Rarity**

- 3437** 1964 SMS SP66 PCGS. A small number of five-coin 1964 cent through half dollar sets surfaced in the early 1990s, featuring a satiny finish and significantly sharper strikes than the regular issues of that year. No official Special Mint Sets were issued in 1964, and the coins that surfaced in the 1990s are not known to have been distributed in any special packaging. However, their striking characteristics earn an SMS designation from PCGS. This Premium Gem example of the quarter dollar displays a delicate tinge of pastel color over bold design elements and satiny fields. The certified population totals are likely inflated by resubmissions. We have not handled an SMS 1964 Washington quarter since the ANA Signature (Heritage, 3/2011), lot 3623. Population: 12 in 66, 14 finer (3/19). From a complete five-piece set of 1964 SMS coinage, cent through half dollar, offered in this sale as individual lots. PCGS# 5974

**PROOF WASHINGTON QUARTERS**

- 3438** 1938 PR67+ NGC. CAC. A Registry-grade example, with pale-gold at the borders and deeply mirrored, silver centers. Mint frost is absent on most proofs from the late 1930s, and this coin is no exception in that regard, with sharply struck, glossy central motifs. This high-end Superb Gem with CAC endorsement is virtually pristine, one of the few so-graded or finer at NGC. Census: 1 in 67+, 7 in 67★, 15 finer. CAC: 46 in 67, 3 finer (3/19). NGC ID# 27HR, PCGS# 5977

**1953 Washington Quarter, PR68  
Registry Grade Deep Cameo Specimen**

- 3439** 1953 PR68 Deep Cameo PCGS. The sharply detailed, richly frosted design elements of this magnificent PR68 specimen contrast profoundly with the deeply mirrored fields to create an intense cameo effect. The brilliant surfaces are virtually pristine and eye appeal is terrific. This coin should find a home in the finest collection or Registry Set. Population: 13 in 68 Deep Cameo, 0 finer (3/19). NGC ID# 4C5K, PCGS# 95985

**EARLY HALF DOLLARS**

**1794 O-101a Half Dollar, VG8  
Pleasing Interior Detail for the Grade**

- 3440** 1794 O-101a, T-7, High R.3, VG8 NGC. Tompkins Die State 1/5. The familiar O-101 and O-101a varieties represent the only 1794 half dollar pairing that is considered somewhat plentiful, ideal for type purposes. The present late die stage example is well-worn, although the eagle is fully outlined and Liberty's portrait shows some hair detail. Uniform steel-gray toning blankets each side. The lower obverse rim merges with the stars, but the date is clear. The reverse rim is bold. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1795 O-102 Half Dollar, VF20  
Two Leaves, Well Defined

- 3441** 1795 2 Leaves, O-102, T-26, R.4, VF20 PCGS. Tompkins Die State 2/1. The obverse is predominantly powder-blue. The reverse has an almond-gold center and a broad sky-blue border. This glossy Flowing Hair type coin appears significantly sharper than the VF20 level, and displays noticeable luster within the curls and wings. The obverse displays several lengthy faded thin marks, along with a small roundish dig above the Y in LIBERTY. Encapsulated in an old green label holder. NGC ID# 37NX, PCGS# 39215 Base PCGS# 6052

1795 Flowing Hair Half Dollar, VF25  
O-106, T-30, Condition Census Coin

- 3442** 1795 2 Leaves, O-106, T-30, R.6, VF25 PCGS. Tompkins Die State 1/2. This scarce variety in the 1795 Flowing Hair series is one of 31 die marriages confirmed from 19 obverse dies and 22 reverse dies. The O-106 (T-30) variety was struck late in the series, and the reverse die failed quickly — first developing a heavy die crack from I in AMERICA through the eagle to the edge above the first A in STATES. This example is an intermediate die state, with a well-defined obverse and the prominent die crack on the reverse. It is a Condition Census example with even, bluish-gray toning and faint golden accents throughout both sides. A lens reveals remnants of some faint adjustment marks along the right-hand border that do not extend beyond the stars, plus scattered, light hairlines and a few tiny marks.

**From The Morris Collection.** NGC ID# 24E7, PCGS# 39222 Base PCGS# 6052

1795 Half Dollar, VG8  
Rare O-114 Two Leaves Variety

- 3443** 1795 2 Leaves, O-114, T-15, R.6, VG8 PCGS. Tompkins Die State 1/1. Most surviving examples of this rare variety are well-worn. This is a collector-grade VG8 coin with smooth problem-free surfaces and boldly outlined devices. The border dentils are complete on each side. Old-time sea-green and golden hues adorn the fields, leaving the relief elements with light golden patina. NGC ID# 24E7, PCGS# 39230 Base PCGS# 6052

- 3444** 1795 2 Leaves, O-116, T-11, R.4, VG8 PCGS. Tompkins Die State 2/2. The primary attribution marker is the reverse berries arranged 7x9, including one below A(MERICA). The deep charcoal-gray fields and lighter motifs produce an appealing circulated-cameo effect. Moderately abraded with mildly granular borders and a small circular dig on the reverse at 4:30.

*Ex: Long Beach Signature (Heritage, 9/2007), lot 1437, where it brought \$1,610.* NGC ID# 24E7, PCGS# 39232 Base PCGS# 6052

1801 O-101 Half Dollar, VF20  
Heraldic Eagle Reverse

- 3445** 1801 O-101, T-2, R.3, VF20 PCGS. Tompkins Die State 3/3. Several large die lumps/rust defects are scattered throughout the reverse of this O-101 (T-2) example, diagnostic of its advanced die state. The first A in AMERICA is free of the adjacent wing feathers. Steve Tompkins suggests the reverse die was prepared much earlier than 1801, perhaps when other Heraldic Eagle reverses were implemented by the Mint for other denominations. This is a pleasing collector-grade example of the scarce date, which has a reported mintage of just 30,289 pieces. Silver-gray surfaces deepen to golden-gray at the margins. A thin, diagonal planchet defect extends from star 6 to the 8 in the date. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**1802 Half, Attractively Toned VF20  
O-101, T-1, Low-Mintage Issue**

- 3446** 1802 O-101, T-1, R.3, VF20 PCGS. Pleasing autumn-gold and bluish-gray toning enhance the golden-gray surfaces of this low-mintage 1802 early half. Aside from a few moderate abrasions — one at star 4, the others near OF and the eagle's right (facing) wingtip — the surfaces are minimally marked for the VF20 level. Sharp definition remains throughout both sides. Together with the 1801 date, the first two half dollar issues of the 19th century make a formidable duo of scarce Draped Bust issues, always in great demand by series collectors. NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

**1802 O-101 Half Dollar, XF Details  
Well-Detailed With Uniform Color**

- 3447** 1802 O-101, T-1, R.3 — Edge Damaged — PCGS Genuine. XF Details. Only one die variety is known for the 1802 half dollar, responsible for the entire 29,890-coin mintage of this date. Offered here is a well-detailed XF coin with an even strike and deep olive-gray and slate patina. Scattered abrasions appear on each side but are not particularly bothersome. A puncture on the edge at about 9:30 (relative to the obverse) prevents a numeric grade, although it is unobtrusive in its location.

- 3448** 1803 Small 3, Large Reverse Stars, O-104, T-4, R.3, XF40 NGC. Tompkins Die State 2/3. The Small 3 is distinguished from the Large 3 by its lack of the upper-left serif that is present on the Large 3 style. There is a faint crack from ST through the clouds. Traces of luster reside in the recesses of this medium gray half dollar. Generally well detailed, and devoid of significant abrasions. NGC ID# 24EF, PCGS# 39274 Base PCGS# 6067

- 3449** 1805/4 O-101, T-4, R.3, VF25 PCGS. CAC. Tompkins Die State 1/1. B. Max Mehl once said the 1805/4 half dollar was as close as anyone could get to owning an 1804 dollar, which is a little like calling the 1805/4 a “poor man’s Mercedes.” Actually, it is one of the most impressive overdates of the Bust half series, and many collectors try to assemble all of its Overton varieties and die states. This O-101 is among the most available die marriages. It displays deep, ebony-brown fields surrounding light-gray devices, with a sharp strike and the important CAC endorsement. NGC ID# 24EH, PCGS# 39290 Base PCGS# 6070

- 3450** 1806/5 O-102, T-7, High R.3, XF45 NGC. Tompkins Die State 2/2. Deep steel-blue and autumn-brown toning blankets this unblemished and pleasing Choice XF Draped Bust half. A small rim flaw between the IB in LIBERTY is of mint origin. Circulation wear is moderate and the portrait is fairly sharp, though the area near the eagle's head is incompletely brought up. NGC ID# 24EK, PCGS# 39298 Base PCGS# 6077

**1806 O-109 Draped Bust Half, Original AU50  
Pointed 6, No Stem, Strong Eye Appeal**

- 3451** 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU50 PCGS. Tompkins Die State 1/2. Immediately identifiable by the lack of a stem through the eagle's right claw, the O-109 (Tompkins-15) die marriage is easily the most available 1806 variety. This About Uncirculated example retains much of its mint luster for the AU50 level. The coin is struck from an early die state, before the dies were heavily clashed. Pleasing silver-gray surfaces show few marks or abrasions. High-point wear on Liberty's temple curls, ribbon, and central reverse accompanies slight weakness at the left-hand stars. The balance of the strike remains sharp. An oval toning spot is noted at the rim, right of the date. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

**1806 Draped Bust Half, AU50  
Pointed 6, No Stem, O-109**

- 3452** 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU50 PCGS. CAC. Tompkins Die State 4/3. The Pointed 6 in the date coupled with the No Stem reverse identifies the popular O-109 variety. This attractive AU specimen shows just a trace of high-point wear, with an interesting die crack below the date, another connecting stars 3, 4, and 5, and some dramatic clash marks below the bust and at Liberty's throat. The lightly abraded surfaces retain much of their original mint luster, with highlights of champagne-gold and lavender toning.

*Ex: FUN Signature (Heritage, 7/2016), lot 3499, which realized \$4,935.*

**Selections from the Jim O'Neal Collection.** NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

1806 O-109 Bust Half, AU58  
Sharp, Medium Gray-Brown Surfaces

- 3453** 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU58 NGC. Tompkins Die State 2/2. The No Stem Overton-109 variety is the most easily found die marriage among the 30 known 1806 varieties. This is a richly toned example with near-Mint State sharpness. A trace of wear on Liberty's bust, cheek, and curls above the temple as well as light rub on the eagle's head and clouds prevent a fully Uncirculated grade. The strike is sharp from clashed dies. Crisp details on the motifs join sharp dentils and strong rims for ideal eye appeal. Faint mint luster remains beneath all-encompassing grayish-brown toning. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

1806 O-109a Half Dollar, AU53  
No Stem, Pointed 6

- 3454** 1806 Pointed 6, No Stem, O-109a, T-15, R.3, AU53 PCGS. Tompkins Die State 5/3. Two 1806 half dollar die marriages lack a stem. The Knob 6 T-2 is a famous rarity, but the Pointed 6 T-15 is an available *Guide Book* variety. The present piece is the scarcer Overton subvariety with a bold radial crack through obverse star 12 toward the bust. The gunmetal-blue and steel-gray surfaces show noticeable luster, and are smooth aside from a hair-thin line above the second U in UNUM. NGC ID# 24EJ, PCGS# 39311 Base PCGS# 6073

- 3455** 1806 Pointed 6, Stem, O-119, T-27, R.3, XF45 PCGS. Tompkins Die State 2/2. An available Point 6, Stem variety of the 1806 half dollar, ideal for type collections or date representation. This Choice XF coin displays minor strike softness in the centers and on the left-hand stars, as usual for the variety, but it has little wear. Lavender-gray interiors cede to gold and sea-green border toning, earning this coin high marks for eye appeal. NGC ID# 24EJ, PCGS# 39323 Base PCGS# 6071

1806 Half Dollar, MS62  
Very Scarce O-123  
High Condition Census

- 3456** 1806 Pointed 6, Stem, O-123, T-23, Low R.5, MS62 PCGS. CAC. Tompkins Die State 1/2. This obverse is recognized by the 1 and 6 attached to the bust, used also for O-124, O-128, and the newly discovered O-130. This is the only 1806 obverse that has both digits clearly touching the curl and drapery. At Low R.5, O-123 is the most common of the four die marriages, and the only one known to Al Overton when he published his first reference. This attractive Mint State example has frosty silver luster beneath a thin veil of ivory and gold toning. The centers are lightly brought up, but the remainder of the strike is bold. Herrman's Autumn 2018 revision lists three Mint State specimens, with the present piece tied with the Queller example, and below only the Green/Newman example.  
*Ex: Alpine Numismatics (9/2003); Westmoreland County Collection / FUN Signature (Heritage, 1/2008), lot 1394; Boston ANA Signature (Heritage, 8/2010), lot 3141, which realized \$12,650.*  
**Selections from the Jim O'Neal Collection.** NGC ID# 24EJ, PCGS# 39329 Base PCGS# 6071

**1806 Pointed 6 Half Dollar, VG10  
Rare O-126 Die Variety  
With Stem Reverse**

- 3457** 1806 Pointed 6, Stem, O-126, T-26, Low R.7, VG10 PCGS. Tompkins Die State 1/2. O-126 is a rare variety, with a dozen pieces listed in Tompkins' census. On the reverse, the upper right pair of olive leaves point between the RI in AMERICA. This piece last appeared at public more than a decade ago. Each side displays natural circulation-cameo color with lighter devices and deeper gray fields. Detail is consistent with the grade, and each side has complete border dentils. Eye appeal is outstanding for this grade and variety. Ex: *Westmoreland Co. Collection; Sheridan Downey (private sale); ANA Signature (Heritage, 7-8/2008), lot 469, which realized \$5,750; Bayside NY Collection; Don Frederick.* PCGS# 39333 Base PCGS# 6071

- 3458** 1807 Draped Bust, O-103, T-11, R.3, AU50 PCGS. Tompkins Die State 2/2. The obverse has a fine die crack from star 7 to LI and the top of the head. No reverse die cracks are evident. A delightful example, this scarce 1807 Draped Bust half dollar has bright, untuned silver surfaces that retain hints of luster. The devices are slightly subdued, and both sides show multiple die clashing. NGC ID# 24EM, PCGS# 39340 Base PCGS# 6079

**BUST HALF DOLLARS**

- 3459** 1807 Capped Bust, Bearded Goddess, O-111b, R.5 — Tooled — PCGS Genuine. VG Details. This lightly toned O-111b Bearded Goddess shows considerable wear. Remnants of an extended die crack is visible at Liberty's eye, a late state of the famous chin-to-chest crack that forms the Bearded Goddess "beard." Tooling is visible primarily on the reverse, where small areas beneath the eagle's head and left (facing) wing show areas of smoothing, as well as a few other minor areas near the scroll. Still, this is an eminently collectible example of a classic Bust half variety, always in demand.

**1807 Capped Bust Half Dollar, AU58  
O-112, 50 Over 20 Guide Book Variety**

- 3460** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU58 NGC. Overton-112 is the more plentiful of the two varieties that make up the 50 Over 20 Guide Book listing. This About Uncirculated example displays light golden toning and vibrantly lustrous surfaces with only slight high-point friction on the devices. The strike is sharp on most design elements, save for the eagle's head which is a trifle weak. The border stars are well-defined. NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

**1807 Half Dollar, Near-Mint  
O-112, 50 Over 20 Variety**

- 3461** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU58 PCGS. A curve west of the upright of the 5 in 50 C confirms the blundered denomination variety. An absent-minded engraver began to enter the denomination as a quarter, but recognized the error after the 2 was impressed. This stone-gray, powder-blue, and wheat-gold Borderline Uncirculated representative displays clash marks but lacks abrasions. The strike shows softness on the eagle's head and the top of the left (facing) wing. NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

**1807 Capped Bust Half Dollar, XF45  
Scarce O-114 Large Stars Variety  
Important for Type**

- 3462** 1807 Capped Bust, Large Stars, O-114, R.3, XF45 PCGS. A diagnostic die lump beneath the stem of 7 in the date confirms the scarce O-114 Large Stars variety. This is a lightly toned example, with lilac-gray surfaces and glints of amber-gold at the margins. Struck from clashed dies, the coin is reasonably sharp on the obverse, while the reverse is less sharp at the scroll, eagle's head, and left (facing) leg. Tiny marks from circulation include a light pinscratch from the midpoint of Liberty's bust to the edge left of the date. Population: 14 in 45, 38 finer (2/19). NGC ID# 24EN, PCGS# 39361 Base PCGS# 6088

- 3463** 1809 Normal Edge, O-103, R.1, AU58 PCGS. Walnut-brown and cobalt-blue toning drapes this coruscating near-Mint half dollar. The strike is crisp except near the drapery clasp, and marks are confined to a trio of faint hair-thin lines west of Liberty's ear. NGC ID# 24ES, PCGS# 39392 Base PCGS# 6092

1809 O-106 Half Dollar, MS64  
Rich Sea-Green and Lilac Toning

- 3464** 1809 Normal Edge, O-106, R.3, MS64 PCGS. Comprehensive sea-green and lilac toning blankets this unblemished near-Gem. A die crack connects stars 1-7, the usually seen die state. The reverse shows a straight die line protruding up into the wing from the right shield corner, characteristic of O-106. A strong strike appears throughout, although several of the obverse stars on the obverse, and the letter tops on the reverse, are drawn toward the rim. The present coin is within Stephen J. Herrman's Autumn 2018 Condition Census for O-106.  
**Selections from the Jim O'Neal Collection.** NGC ID# 24ES, PCGS# 39395 Base PCGS# 6092

- 3465** 1809 III Edge, O-109a, R.2, AU53 PCGS. A heavy die crack through the middle of AMERICA is a pick-up point for this experimental edge variety. A cream-gray and sea-green representative. The borders display luster, and the sole mentionable contact is a hair-thin diagonal line on Liberty's neck. NGC ID# 24ES, PCGS# 39387 Base PCGS# 6094

- 3466** 1809 III Edge, O-111a, R.2, AU55 PCGS. Silver-gray surfaces retain a good amount of mint luster. This O-111a example is struck from a late die state, with several reverse die cracks and weak dentils on both sides. Some old, deep build-up is noted at stars 5 and 6, and within Liberty's curls. Finely granular surfaces with perimeter flowlines confirm the late die stage. NGC ID# 24ES, PCGS# 39389 Base PCGS# 6094

- 3467** 1811/10 O-101, R.1, AU53 PCGS. Since evidence of the overdate is subtle, specialists instead identify the 1811/10 variety by the broad die line or "spike" from the top of Liberty's cap. The curls show moderate wear, but both sides display substantial cartwheel luster, and no marks are noticeable. Tan-gold and sea-green toning is limited to the margins. NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

1811 Small 8 Half Dollar, O-105a, MS64+  
Condition Census Quality, Ex: Friend

- 3468** 1811 Small 8, O-105a, R.2, MS64+ PCGS. CAC. Ex: Friend. The variety is easier to diagnose from the reverse die, where a small patch of die lumps are evident on the upper left portion of the eagle's shield. This later die state is more common than the early state and features a broad, arcing die crack that begins and ends at 5 on the lower reverse, passing through TES in STATES along the way. This is a well-struck, lustrous near-Gem example with clean, unabraded surfaces and lovely lavender-gold and blue-gray coloration. Listed in Stephen J. Herrman's Autumn 2018 Revision as #4 in the O-105a Condition Census.  
*Ex: Dale Friend; Long Beach Signature (Heritage, 6/2014), lot 4511; Long Beach Signature (2/2017), lot 3766, which realized \$14,100.*  
**Selections from the Jim O'Neal Collection.** NGC ID# 24EU, PCGS# 39428 Base PCGS# 6097

- 3469** 1811 Small 8, O-108, R.2, AU58 PCGS. The gap between the final two 1s in the date is wider than the spaces between the other digits, and a small line extends from the lower-right (facing) wingtip. Considerable mint luster remains on the silver-gray, finely grained surfaces of this nearly Mint State About Uncirculated O-108 half. Struck from worn dies, with weakness at the peripheries and a lack of dentils around much of the coin. A flat spot at the upper-right edge is the result of an irregular planchet, which was thin in that area and incompletely struck. NGC ID# 24EU, PCGS# 39431 Base PCGS# 6097

**1811 O-109 Half Dollar, MS62  
Small 8, Toned and Lustrous**

- 3470** 1811 Small 8, O-109, R.2, MS62 PCGS. The toning transitions seamlessly from reddish-orange to deep blue and violet hues over each side, intermixed with splashes of brilliance. Soft mint luster shines through, illuminating this largely well-struck half dollar. The heavy radial crack through the left border of the first S in STATES is diagnostic for Overton-109. NGC ID# 24EU, PCGS# 39433 Base PCGS# 6097

- 3471** 1812 Large 8, O-103, R.1, AU58 PCGS. Vertical die lines above the eagle's left (facing) shoulder are diagnostic for Overton-103. Peach-gold, cherry-red, and jade-green toning fills the peripheries of this partly lustrous and minimally abraded Capped Bust half dollar. Mildly granular near the A in STATES. NGC ID# 24EW, PCGS# 39446 Base PCGS# 6100

**1812 O-109a Bust Half, MS64  
First Generation Holder, Gold CAC**

- 3472** 1812 Large 8, O-109a, R.2, MS64 PCGS. Gold CAC. Struck from a late state of clashed dies, this near-Gem half is nevertheless sharply struck and crisply defined throughout both sides. Only the dentils are weak, surrendering to the late die state. Vibrant silver luster glows beneath a thin veil of lilac-gray toning. The coin exudes Mint-fresh originality. Housed in a first generation "rattler" PCGS holder, and sporting the coveted gold CAC seal, the present half dollar ranks fourth on Stephen J. Herrman's Autumn 2018 Revision Condition Census.

*Ex: Hamilton Collection, Part IV / New York Signature (Heritage, 10/2016), lot 5267, which realized \$12,925.*

**Selections from the Jim O'Neal Collection.** NGC ID# 24EW, PCGS# 39456 Base PCGS# 6100

- 3473** 1812 Large 8, O-110, R.1, AU58 PCGS. Dusky golden-brown and dove-gray encompass this satiny and minimally marked Capped Bust type coin. A hint of high point wear on the curls and the top of the eagle's head. Struck from multiply clashed dies. *Ex: FUN Signature (Heritage, 1/2015), lot 4849, which realized \$1,880.* NGC ID# 24EW, PCGS# 39457 Base PCGS# 6100

1815/2 O-101 Half Dollar, VF Details  
Key to Capped Bust Date Set

- 3474** 1815/2 O-101, R.2 — Altered Surfaces — PCGS Genuine. VF Details. The sole die pair used to strike 47,150 half dollars for this key date issue. All pieces feature traces of an underdigit 2 beneath the primary 5 in the date. Overton-101 is split into two distinct die states, this one lacking a crack through the denomination, setting it apart from O-101a. However, both sides are heavily clashed. This smooth, lightly circulated example was cleaned at some point. The borders have since developed attractive blue, green, and crimson-gold patina.

1815/2 O-101 Half Dollar, Toned XF40  
Elusive With CAC Endorsement

- 3475** 1815/2 O-101, R.2, XF40 PCGS. CAC. The slightly more plentiful early die state of this lone 1815 half dollar variety, without the reverse die crack through the denomination. This coin is well-detailed in the centers, although the border stars exhibit the usual weakness. Faded multicolor toning forms concentric circles on the obverse, leaving the reverse with a light golden hue. Eye appeal is pleasing for the grade. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

1815/2 O-101 Half Dollar, XF45  
Key Date, Seldom Seen Finer

- 3476** 1815/2 O-101, R.2, XF45 PCGS. No die cracks characteristic of the later O-101a die state are noted, but both sides have minor clash marks, as always. This piece is deeply toned with a blend of tan and dark emerald on the obverse, lighter gold and tan on the reverse. The 1815/2 is the key issue to a date set of Capped Bust half dollars, in-demand regardless of grade and infrequently seen finer than the piece offered here.  
Ex: ANA National Money Show Signature (Heritage, 3/2011), lot 4435, where it realized \$6,325. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

1815/2 O-101 Half Dollar  
AU Details, Date Set Key

- 3477** 1815/2 O-101, R.2 — Cleaned — PCGS Genuine. AU Details. The 1815 (which shows a trace of a 2 underdigit) is key to a date collection of Capped Bust half dollars. A single die pair completed the low mintage of 47,150 pieces. This unmarked olive-gray example is evenly microgranular but shows minimal indications of wear. The fields display multiple sets of bold clash marks, as usual for the date.

1815/2 O-101 Half Dollar, AU50  
Guide Book Overdate

- 3478** 1815/2 O-101, R.2, AU50 PCGS. The only die variety of the 1815 half dollar is an overdate, showing remnants of a 2 around the 5. This AU coin is in an early die state without the crack through the lower reverse. The centers are sharp, although the borders are weakened. The lower right reverse has some mint-made planchet roughness. This slate-gray coin displays lavender and golden border toning. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108
- 3479** 1819/8 Small 9, O-101, R.1, MS61 PCGS. Dusky aquamarine and butter-gold toning drapes this satiny and lightly abraded half dollar. The sharply struck surfaces show substantial mint sheen. A popular *Guide Book* variety with obvious remnants of an 8 underdigit near the ball of the 9. NGC ID# 24FC, PCGS# 39555 Base PCGS# 6118

- 3480** 1819 O-113, R.1, AU58 PCGS. The near-brilliant surfaces exhibit plentiful mint luster on both sides, with faint areas of silver-gray toning on the obverse and a few scattered gray streaks (possibly grease from the minting process) on the reverse. A sharp strike contributes to the substantial eye appeal. NGC ID# 24FB, PCGS# 39552 Base PCGS# 6117
- 3481** 1819 O-113, R.1, MS62 NGC. A plentiful variety, suitable for date or type purposes. This Mint State 1819 O-113 half dollar displays a sharp strike on the stars and central devices, with original golden toning overall. Additional midnight-blue color clings to the extreme outer peripheries. Eye appeal is pleasing, as no significant abrasions are readily obvious. NGC ID# 24FB, PCGS# 39552 Base PCGS# 6117

**1821 O-107 Half Dollar, MS63**  
**Scarcest Variety for the Year**

- 3482 1821 O-107, R.3, MS63 PCGS.** This variety, the scarcest for the year 1821, shows the tip of star 7 pointing to the edge of Liberty's cap. Steel-blue tones around the margins blend with peach-gold, rose, and lavender-gray patina toward the centers. The stars and upper curls on the obverse show sharp detail. The eagle's feathers are slightly softer. Void of singular marks to mention. NGC ID# 24FF, PCGS# 39586 Base PCGS# 6128

**1823 Half Dollar, Choice AU**  
**O-101a, Patched 3**  
**Popular Guide Book Variety**

- 3483 1823 Patched 3, O-101a, R.1, AU55 PCGS.** A distinctive variety, the O-101a Patched 3 is even more popular due to its inclusion in the *Guide Book* as a separate entry. A briefly circulated Choice AU example. The strike shows softness on the right-side stars and the A in STATES. Silvery surfaces display ample luster and are remarkably clean.  
*Ex: FUN Signature (Heritage, 1/2014), lot 4434, which realized \$4,112.50. NGC ID# 24FJ, PCGS# 39621 Base PCGS# 6133*

**1824 Half Dollar, O-108a, MS64**  
**Ex: Green, Newman**

- 3484 1824 O-108a, R.2, MS64 NGC.** *Ex: "Col." E.H.R. Green.* A lovely coin from the Newman Collection that served time in an album. Peach-gold, cherry-red, and apple-green grace the obverse of this lustrous piece with exceptional eye appeal. The brilliant reverse is basically untuned with frosty luster. Liberty's profile is lightly doubled, a feature often seen in the half dollars of 1823 and 1824.  
*Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$3.00; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33587; Long Beach Signature (Heritage, 1/2015), lot 3127, where it realized \$4,465. NGC ID# 24FK, PCGS# 39630 Base PCGS# 6137*

**1824 Half Dollar, O-116, MS63**  
**Clean for the Grade**

- 3485 1824 O-116, R.3, MS63 PCGS.** A die scratch in the upper-left shield corner helps attribute the plentiful O-116 variety. This Select Uncirculated example just misses out on the Condition Census, though the brilliant, highly lustrous surfaces are notably clean for the grade. Liberty's curls and the eagle's feathers and talons exhibit pinpoint definition. A blush of thin violet-gold toning occurs at the lower left obverse. NGC ID# 24FK, PCGS# 39638 Base PCGS# 6137

**1824 O-117 Half Dollar, Toned MS65+  
High Condition Census for the Variety**

**3486** 1824 O-117, R.1, MS65+ PCGS. CAC. A pair of tiny tines protrude off the left wing, and the lower-left serif of the D in UNITED is tucked beneath the adjacent E to identify the Overton-117 variety. Star 7 nearly touches the front of Liberty's cap just above the headband, and star 13 is close to the curl. The Autumn 2018 Steve Herrman Census shows a single MS66 example at the top (66,65+,65,65,65,64+), placing this Plus-graded and CAC endorsed example in second place among the finest-known Condition Census examples.

Reddish-orange, blue, and gold accents surround the raised elements to add vibrant color alongside dappled lilac-gray toning. Bright mint luster resides beneath the toning. A loupe reveals only two or three tiny marks anywhere on the coin — none of any significance. The strike is generally sharp despite die wear, with the stars slightly drawn to the edge and flowlines through the legend on the reverse. Slight weakness at Liberty's cap folds and at a few star centers is characteristic of the variety, as is minor blending on the scroll, talons, and the top of the denomination.

*Ex:* New England Museum Collection; New Orleans ANA Auction (Stack's-Bowers, 5/2013), lot 355; Philadelphia ANA Signature (Heritage, 8/2018), lot 5137, which realized \$13,200.

**Selections from the Jim O'Neal Collection.** NGC ID# 24FK, PCGS# 39639 Base PCGS# 6137

**1826 Half Dollar, O-118a, MS64  
Gold CAC, Old Green Label Holder**

**3487** 1826 O-118a, R.1, MS64 PCGS. Gold CAC. The stars are quite close to the milling, and the date is compact and evenly spaced. The reverse shows A higher than M in AMERICA. The O-118a state, as here, shows a die crack joining NITED STATES and ERICA. The surfaces of this piece are silvery with a dusting of cinnamon patina. The strike is bold, if not quite absolute on the high points of a few of the hair curls, and complements a notable absence of abrasions. The Gold CAC label indicates that that firm considers this piece viable at the MS65 grade level (which is certainly not a stretch, given the obvious quality on display). Housed in an old green label holder.

*Ex:* Hamilton Collection, Part II/Long Beach Signature (Heritage, 9/2016), lot 5508, which realized \$10,575.

**Selections from the Jim O'Neal Collection.** NGC ID# 24FM, PCGS# 39692 Base PCGS# 6143

**3488** 1827/6 O-102, R.1, MS61 PCGS. Three overdate varieties exist out of the 47 die marriages used to strike nearly 5.5 million 1827 Bust halves. All three overdates share the same obverse die, but only the O-102 has a diagnostic "apostrophe" die break to the right of the second A in AMERICA. Original and pleasing orange-gold toning deepens to bluish-gray at the margins of this sharply struck MS61 example. The overdate feature and the reverse die crack are clear. NGC ID# 24FP, PCGS# 39752 Base PCGS# 6147

**1827 Half Dollar, MS64  
Square Base 2, O-118, Few Finer**

**3489** 1827 Square Base 2, O-118, R.3, MS64 PCGS. Overton-118 is identified by the arrowhead virtually touching the final A in AMERICA and the long extension of the shield line right of the point. Only two MS65 coins and an MS65+ are finer than this near-Gem on the Condition Census. Vibrant luster shines through ocean-blue and lavender toning. Clean and well-struck with evidence of die erosion around the borders. NGC ID# 24FN, PCGS# 39715 Base PCGS# 6144

**3490** 1828 Square Base 2, Small 8s, Large Letters, O-117, R.1, MS62 PCGS. The C in 50 C has a recut serif, diagnostic for Overton-117. The obverse is lightly toned almond-gold and silver-gray. The reverse is moderately deeper and displays ocean-blue patina near the rim. The strike is bold except on the first four stars. NGC ID# 24FR, PCGS# 39771 Base PCGS# 6151

**1829/7 O-101a Half Dollar, MS64  
Condition Census Example**

**3491** 1829/7 O-101a, R.1, MS64 PCGS. The 9 in the date is cut over an underlying 7. A tine on the apex of the shield, pointing left, distinguishes O-101 from the other 1829/7 variety, O-102. This example in a late die state with such extensive die lapping that the arrow shafts and right (facing) leg feathers are nearly removed. Softly lustrous with delicate antique patina and smooth fields. A spot of toning on the jaw line identifies this particular near-Gem. According to Steve Herrman's Autumn 2018 listing, this near-Gem example of Overton-101a ranks solidly in the Condition Census for the popular overdate variety. NGC ID# 24FT, PCGS# 39808 Base PCGS# 6155

**3492** 1829 Small Letters, O-117, R.2, MS62 PCGS. The scribe line along the dentils below the date is weak on this coin due to die wear around the border. Nonetheless, the border stars and central devices are sharp. Satiny luster cartwheels around each side, illuminating a hint of golden toning. Some faint slide marks on the high points of the portrait determine the grade, although the eye appeal of this piece surpasses expectations for the grade. NGC ID# 24FS, PCGS# 39803 Base PCGS# 6154

**1830 Half Dollar, O-101, MS65  
Second in Condition Census**

**3493** 1830 Small O, O-101, R.1, MS65 PCGS. CAC. Dr. Glenn Peterson attributes Overton-101 by its partly filled A in STATES. According to the Autumn 2018 Revision of the Stephen J. Herrman Condition Census, this half dollar places number two for O-101, trailing only Eliasberg's example. The coruscating cream-gray surfaces appear pristine upon cursory evaluation, and even a thorough study beneath a loupe shows only trivial indications of contact. A crisp strike further ensures the quality. A virtually unimprovable Gem that would be a highlight of any Bust half dollar holding.

*Ex: Rev. Dr. James G. K. McClure Collection / Long Beach Signature (Heritage, 6/2016), lot 4519; Dallas Signature (Heritage, 10/2016), lot 3130; FUN Signature (Heritage, 1/2017), lot 4302, which realized \$14,687.50.*

**Selections from the Jim O'Neal Collection.** NGC ID# 24FU, PCGS# 39810 Base PCGS# 6156

**1830 Small O Half, Lustrous MS64+  
High-Census O-102 Example**

- 3494** 1830 Small O, O-102, R.3, MS64+ PCGS. The O-102 variety is rare in high grades, with few appearances in our archives and a Condition Census that tops out at the MS65 grade. This high-end Choice Uncirculated example is just a half-notch below the Gem level, with full strike and smooth, nearly mark-free surfaces. Pearlescent bluish-gray toning accompanies bright silver luster. The 8 in the date is thinly recut at the outside lower loop, and a tiny tine extends from the eagle's breast feathers at the right mid-shield point to confirm this sneaky-scarce variety. NGC ID# 4DBZ, PCGS# 39811 Base PCGS# 6156

**1831 Capped Bust Half, O-109, MS65  
Ideal Type Coin, Colorfully Toned**

- 3495** 1831 O-109, R.1, MS65 PCGS. This Gem example of the plentiful O-109 die pairing exhibits frosty luster beneath beautiful pewter-gray, gold, and blue toning on each side, with excellent design details and outstanding surfaces. Marks are limited to a few tiny ticks near the back of the eagle's head and a minuscule abrasion below the drapery. Nearly all O-109 examples show weakness at PLUR within the scroll and at TA of STATES, visible here as well. Few pieces are finer. NGC ID# 24FV, PCGS# 39845 Base PCGS# 6159

- 3496** 1831 O-110, R.2, MS64 PCGS. Pleasing lilac-gray toning displays faint golden accents and deep-gray overtones on the high points for an original old-silver look that never fails to attract seasoned Bust half collectors. The strike shows some peripheral softness at the cap and drapery folds, and especially at the scroll where LURIB of PLURIBUS and the A in STATES are incomplete. The eagle's plumage is sharp except for minor blending at the talons and the top of the denomination. Choice Uncirculated examples such as this one are tied at the low-end of the Autumn 2018 Herrman Condition Census for the O-110 variety. NGC ID# 24FV, PCGS# 39846 Base PCGS# 6159

**1831 O-118 Half Dollar, MS65  
Top of the Census**

- 3497** 1831 O-118, R.3, MS65 PCGS. CAC. Probably the finest known of the variety. We offered the only other listed MS65 example (according to the Autumn 2018 edition of Steve Herrman's census) in our March, 2004 Portland, Oregon Signature auction. The current coin is sharper on the scroll — which is always weakly struck for the variety — and the motifs are exceedingly sharp throughout both sides of this lustrous Gem. Bronze-gold and blue toning rolls across the frosty and nearly mark-free, silver surfaces. CAC endorsed with impressive quality and eye appeal.  
*Ex: Long Beach Signature (Heritage, 6/2016), lot 4521; FUN Signature (Heritage, 1/2017), lot 4316, which realized \$8,225.*  
**Selections from the Jim O'Neal Collection.** NGC ID# 24FV, PCGS# 39855 Base PCGS# 6159

**1832 Half Dollar, Near-Gem  
Small Letters, O-115  
Rich Multicolor Patina**

- 3498** 1832 Small Letters, O-115, R.1, MS64 PCGS. Iridescent blue-green, autumn-brown, and dove-gray toning encompasses this satiny high-grade Capped Bust type coin. The fields are well preserved, and the cheek shows only a single light thin mark. The left-side borders show occasional incompleteness of strike. A Condition Census example worthy of the finest specialized holding. NGC ID# 24FW, PCGS# 39874 Base PCGS# 6160

1833 O-113 Half Dollar, MS65+  
Finest-Known Example of the Variety

- 3499** 1833 O-113, R.2, MS65+ NGC. The finest O-113 half dollar documented, this Plus-graded Gem displays radiant luster and beautiful toning. Stephen Herrman's Condition Census lists another Gem, an MS65 NGC coin that last appeared in a 2007 Superior sale (Elite-Milwaukee, 8/2007), lot 185, but not this coin. This piece surpasses that one by the margin of the Plus designation. Pastel shades of multicolor toning cover each side, and there are no bothersome abrasions. Under a loupe, a few pepper specks are visible. Sharply struck and beautifully preserved. Census (all varieties included): 31 in 65 (3 in 65+, 1 in 65★), 8 finer (2/19). NGC ID# 24FX, PCGS# 39902 Base PCGS# 6163

1834 O-108 Half Dollar, MS65+  
Large Date, Small Letters

- 3500** 1834 Large Date, Small Letters, O-108, R.2, MS65+ PCGS. CAC. The horizontal shield lines extend into both the left and right wings, characteristic of this available but conditionally elusive variety. The Autumn 2018 Revision of Stephen J. Herrman's Condition Census omits the present half dollar, but it would rank #2 on his Overton-108 roster, trailing only the MS67 NGC Ariagno example. The lustrous surfaces are close to brilliant, but display faint chestnut patina across the margins. The major motifs are fully impressed, though the obverse periphery shows incompleteness usual for the die pairing. The fields are essentially immaculate, and only delicate contact on Liberty's neck precludes an even finer grade. **Selections from the Jim O'Neal Collection.** NGC ID# 24FY, PCGS# 39912 Base PCGS# 6165

**3501 1834 Small Date, Small Letters, O-109, R.1, MS64 NGC.** O-109 shows repunching on star 10, an aid in attribution. This near-Gem Capped Bust type coin displays sharp border stars and central devices with rich satin luster. Original blue-green, rose, gold, and mint hues adorn each side, masking any trivial contact marks that limit the grade. Eye appeal is outstanding. NGC ID# 24FY, PCGS# 39913 Base PCGS# 6166

**3502 1834 Small Date, Small Letters, O-114, R.1, MS62 Prooflike NGC.** Recutting on stars 3 and 4 is one of the many diagnostics for this Small Date, Small Letters die marriage. Each side exhibits thin violet and blue patina over still-brilliant surfaces with blatantly Prooflike fields. Liberty and the eagle are razor-sharp. Mushiness over PLU is normal for all O-114 coins. NGC ID# 24FY, PCGS# 39918 Base PCGS# 6166

---

**1835 O-107 Half Dollar, MS64+  
Single Finest Certified**

**3503 1835 O-107, R.1, MS64+ PCGS.** An evenly struck, high-end near-Gem with well-defined central devices but minor peripheral softness. The coin shows vibrant luster and merely a hint of olive and gold patina. The surfaces are uncommonly free from contact. Overton-107 is common in circulated grades, but it is rare in Mint State, and the present piece is listed as the single-finest certified in Stephen J. Herrman's Autumn 2018 revision.

Ex: Long Beach Signature (Heritage, 6/2017), lot 3663, which realized \$8,225.

**Selections from the Jim O'Neal Collection.** NGC ID# 4EKB, PCGS# 39933 Base PCGS# 6168

---

---

**1836 O-104a Half Dollar, MS65  
Tied for Finest in Condition Census  
Ex: Newman, Green**

**3504 1836 Lettered Edge, O-104a, R.3, MS65 PCGS. CAC.** Stars 11 and 13 are repunched, and an elliptical die crack near UNITED STATES OF AM confirms the Overton subvariety. Richly toned golden-brown, apple-green, and ruby-red peripheries cede to silver-gray fields and gunmetal-tinged motifs. The present Gem is from the fabled collections of "Colonel" Green and Eric Newman. It is tied atop the Autumn 2018 Revision of the Stephen J. Herrman Condition Census, along with the MS65 PCGS CAC example we auctioned as lot 886 in our October 2008 Dallas Signature.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$3.00; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33678, which realized \$12,925.

**Selections from the Jim O'Neal Collection.** NGC ID# 24G2, PCGS# 39942 Base PCGS# 6169

---

## REEDDED EDGE HALF DOLLARS

### 1836 Reeded Edge Half Dollar, GR-1, VF35 Well-Detailed Steam Press Coin

- 3505** 1836 Reeded Edge, GR-1, R.2, VF35 PCGS. The 1836 Reeded Edge half dollar is a low-mintage and historic issue, being the first struck on the new steam press at the Philadelphia Mint. The new press employed a closed collar, which allowed the edge device to be impressed during striking rather than as a separate process before, but which also — because of the need to eject the struck coin by dropping it freely from the closed collar — eliminated the ability to have edge lettering. A reeded edge was substituted. This nicely detailed example has uniform gray patina and is generally satiny with pleasing eye appeal. A loupe reveals faint granularity in portions of the fields, which apparently does not affect the PCGS grade. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

### 1836 GR-1 Reeded Edge Half Dollar, XF40 Lovely Album-Toned Surfaces

- 3506** 1836 Reeded Edge, GR-1, R.2, XF40 PCGS. Here is a wonderfully original collector-grade 1836 Reeded Edge half with multicolor album toning on both sides — among the first half dollars struck on the Thonnelier steam press. The small reported mintage of 1,200 pieces seems understated according to grading events, and some researchers believe the actual mintage is higher. Among Bust half collectors, the exact mintage is less important than finding a high quality example. This rainbow-toned example certainly qualifies as an exceptional coin for the grade. Moderate wear and small marks are grade-appropriate, and the eye appeal is terrific.  
*Ex: Summer FUN Signature (Heritage, 7/2016), lot 3568, which realized \$3,055. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175*

### 1836 Reeded Edge Half, GR-1, AU55 Amber Border Toning

- 3507** 1836 Reeded Edge, GR-1, R.2, AU55 NGC. This is a boldly detailed survivor with only light wear over the highpoints of the design. Both sides are lightly toned around the borders with reddish-golden accents. Remnants of original luster are seen in the fields and, although lightly abraded from circulation, the surfaces do not possess any singularly distracting handling marks. An altogether pleasing representative of this always-in-demand Reeded Edge half.  
*Ex: Long Beach Signature (Heritage, 9/2005), lot 3201, which realized \$3,737.50. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175*

- 3508** 1837 GR-14, R.1, MS63 PCGS. A readily available Reeded Edge variety, this Select Uncirculated GR-14 example displays an array of die cracks on both the obverse and reverse to confirm its latest die state. The reverse is a particularly late die state, with a full complement of die cracks as described in the Dick Graham reference. The obverse is heavily cracked through the date. Nicely lustrous with natural golden-gray toning, the coin ranks securely at the midpoint of the GR-14 Condition Census. NGC ID# 24G4, PCGS# 531060 Base PCGS# 6176

### 1838 GR-15 Half Dollar, MS65 Unmarked and Originally Toned

- 3509** 1838 GR-15, R.3, MS65 NGC. Die lumps west of the D in DOLLAR aid the attribution of this reeded edge Bust half dollar. Medium cream-gray and golden-brown toning blankets satiny and surprisingly smooth surfaces. Generally well struck, though the upper reverse dentils are merged. Despite a generous mintage, the 1838 becomes rare in the present quality. Census: 18 in 65, 5 finer (3/19). NGC ID# 24G5, PCGS# 531096 Base PCGS# 6177

- 3510** 1839-O GR-1, R.1, XF45 PCGS. GR-1 is the only readily obtainable New Orleans Capped Bust die variety. The marriage is known for a repunched mintmark and lengthy cracks across both peripheries. The present cream-gray example displays bright luster throughout the legends and about the stars. No marks are worthy of singular comment. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

- 3511 1839-O GR-5, High R.4, XF40 PCGS.** Amazingly, the GR-1 variety accounts for 95% of all known 1839-O examples. Five die marriages are identified in Dick Graham's reference, although two of the varieties are essentially uncollectible, each with an R.8 rating. This GR-5 example is scarce-to-rare, and unknown in Mint State. Graham states, "Finding an original, no problem coin in any grade will be a very difficult task ..." A notable display of die cracks indicates the coin was struck from a shattered obverse die in its near-terminal state. Steel-gray toning intermixes with blue and pale-gold hues, with solid XF definition throughout both sides. The GR-5 die pair is underappreciated and, in our opinion, undervalued. The Graham Condition Census for unimpaired coins is 55,55,50,45,40,35.

Ex: *August ANA Auction (Stack's Bowers Galleries, 8/2016)*, lot 428. NGC ID# 24G7, PCGS# 531110 Base PCGS# 6181

## SEATED HALF DOLLARS

### 1839 Half Dollar, AU50 Single-Year No Drapery Type

- 3512 1839 No Drapery, WB-101, Die Pair 4, R.4, AU50 NGC.** Two tiny die lines behind Liberty's right (facing) heel are the only usable diagnostic markers for this No Drapery die marriage. All inaugural 1839 halves of this type are popular, representing a single-year design. Drapery was later added by Robert Ball Hughes, who made other modifications. This lightly circulated representative shows blue, crimson, and gold patina around the edges. The silvery centers display a slightly soft impression and a bit of friction. Census (all No Drapery varieties): 13 in 50, 79 finer (3/19). NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

- 3513 1840-O Small Letters, Large O, WB-104, Die Pair 8, R.5, MS64 NGC.** Ex: Eliasberg-Richmond. A scarce die pair, with reengraved obverse dentils that were enlarged to the extent that the outer star points nearly touch (and in some cases do touch) the dentils, as does the rock support. Bill Bugert suggests that the New Orleans Mint modified the obverse die to increase its life, and the die did indeed go on to yet another use as Die Pair 9. This near-Gem example has a formidable pedigree and a sharp obverse strike. The reverse (in the reverse die's second and final use) is not quite as sharp, showing several radial die cracks and hints of die fatigue. Iridescent colors appear on both sides, framed by blue borders and mellowed by champagne hues throughout the centers. NGC and PCGS combined show just one finer example of the 1840-O Small Letters type. NGC Census (all Small Letters varieties): 6 in 64, 0 finer (2/19). NGC ID# 24GN, PCGS# 572006 Base PCGS# 6235

- 3514 1842-O Small Date, Small Letters, WB-101, Die Pair 1, R.5, VF20 PCGS.** Scarcer than its Medium Date, Medium Letters counterpart and always in demand by type collectors, the Small Date, Small Letters variant (Reverse of 1839) is highly sought in all grades. Two Small Date varieties exist, each assigned a R.5 rating in the 2011 Bill Bugert reference. This example shows a Large O mintmark placed high and left beneath the feather tip. Pleasing old-silver toning covers both sides of this problem-free coin, perfect for a midgrade collection. Tiny marks are seen with magnification, but none are individually significant, and the motifs are sharp for the VF20 grade. Population (Small Date varieties): 7 in 20, 51 finer (2/19). NGC ID# 24GV, PCGS# 572015 Base PCGS# 6238

### 1844-O Doubled Date Half Dollar, VF35 WB-103, FS-301

- 3515 1844-O Doubled Date, WB-103, Die Pair 22, FS-301, R.4, VF35 PCGS.** One of the most obvious die-punching blunders in U.S. history, easily visible to the unaided eye and a *Guide Book* favorite. The digits embedded in the base of Liberty's figure remain plain on this moderately worn coin, faintly luminous under pale blue, gold, and rose patina across a gray base. A problem-free example with good eye appeal.

Ex: *Central States Signature (Heritage, 4/2012)*, lot 4447, which realized \$2,300. NGC ID# 24H2, PCGS# 145817 Base PCGS# 6247

### 1847/(6) Seated Half Dollar, VF35 Rare *Guide Book* Variety, FS-301

- 3516 1847/(6) Late Die State, WB-102, Die Pair 9, R.5, FS-301, VF35 PCGS.** This popular *Guide Book* and *Cherrypickers'* variety features remnants of an earlier 1846 date punched southwest of 1847. The reverse shows numerous die cracks, diagnostic of Die Pair 9. Bright gray patination covers each side, with grade-consistent friction over the devices. Population: 4 in 35, 10 finer (2/19). Ex: *Chicago Signature (Heritage, 8/2014)*, lot 4434, realized \$8,225. PCGS# 511892 Base PCGS# 6258

- 3517 1851 WB-101, WB-6, R.4 — Improperly Cleaned — NGC Details. Unc.** The obverse shows an arching crack from the shoulder across Liberty's head to star 8, and the top of the first A in AMERICA exhibits die damage and a possible attempt to repair it. The 1851 is a semikey issue with a small mintage of 200,750 coins. This piece has been polished to an unnaturally bright sheen, but some toning has since developed and the devices are razor-sharp. A pedigree mark appears the lower part of Liberty's shield.

- 3518 1851 Repunched Date, WB-103, Die Pair 2, R.4, XF45 NGC.** A tiny tine off the flag of the first 1 in the date and a remnant of a previous digit between 5 and the second 1 account for the Repunched Date designation, although prominent machine doubling makes it look like all digits are recut. The reverse shield shows an array of vertical lines through the horizontal shield lines confirms the die pair. Golden-gray toning deepens around the raised elements, giving this Choice XF example nice eye appeal. A strong strike shows grade-consistent wear, while scattered light marks and a few faint hairlines occupy the fields. A scarce, low-mintage Philadelphia date — many were melted prior to adjustment of the half dollar weight in 1853. NGC ID# 24HJ, PCGS# 572080 Base PCGS# 6266

**1852 Half Dollar, MS64  
WB-101, Die Pair 1**

- 3519** 1852 WB-101, Die Pair 1, R.4, MS64 NGC. Ex: Richmond Collection. Three die pairs are identified for the mintage of 77,130 half dollars in 1852, all produced from a single obverse die and three reverse dies. Survivors are elusive in all grades as many were melted prior to the 1853 weight reduction of subsidiary silver coins. Delicate gold toning fails to impede the brilliant and frosty mint luster of this sharply defined Choice Mint State example that exhibits die polish at the lower left obverse. Census: 5 in 64, 7 finer (3/19). NGC ID# 24HL, PCGS# 572083 Base PCGS# 6268

**1853-O Half Dollar, MS62  
Arrows and Rays**

- 3520** 1853-O Arrows and Rays, WB-101, MS62 NGC. Light magenta toning is intermingled with frosty silver mint luster on this highly important New Orleans half dollar that was coined after passage of a Mint Act in February 1853 that lowered the authorized weight and silver content of subsidiary silver coinage from the half dime through the half dollar. Survivors from the 1.3 million coin mintage are few and far between in Mint State grades. Census: 12 in 62, 17 finer (3/19). NGC ID# 24JK, PCGS# 572086 Base PCGS# 6276

**1855/54 Arrows Half Dollar, MS63  
FS-301, Listed in the *Guide Book***

- 3521** 1855/54 Arrows, WB-102, FS-301, MS63 PCGS. Recutting occurs on the upper loop of the 8, and around the middle parts of both 5s in the date. In 1993, Wiley and Bugert designated this variety as Low R.7 in Mint State. Indeed, there are only three coins at this level at PCGS, with six pieces finer (2/19). It is likely that a few other undesignated coins, like this example, exist. Both sides are frosty and untuned with minimal field chatter. The upper obverse, Liberty's sandal, and the eagle's left (facing) talon are incomplete, but the rest of this Select half dollar is crisp. NGC ID# 24JN, PCGS# 413720 Base PCGS# 6282

- 3522** 1855-S Arrows, WB-101, Die Pair 3, R.5 — Cleaned — NGC Details. AU. The introductory S-mint half dollar issue is much scarcer than its mintage suggests. The present half dollar has luster throughout the motifs but the fields are extensively tooled with pinscratches and the coin is glossy from cleaning. We note a sequence of four reeding marks (or similar) that start near star 1 and repeat on Liberty's arm, above the shoulder, and at the nose. The coin is otherwise well-struck with traces of gold toning.

- 3523** 1861-O CSA Obverse, WB-102, Die Pair 11, R.3, FS-401 — Cleaned — NGC Details. AU. The popular CSA die crack from the right of star 7 to the bridge of Liberty's nose is especially pronounced on this coin, and the crack is visible below the chin to the shoulder as well. The obverse die had its first use striking this die marriage (paired with a normal federal reverse). Its second use made it famous — paired with the so-called Confederate Reverse, of which just four pieces are known. This sharp example was cleaned, and displays steel-gray toning that masks some underlying hairlines. The coin retains eye appeal and strong About Uncirculated definition. The date runs sharply uphill, a characteristic often lost when focused on the renowned die crack.

**1867 Half Dollar, MS64  
Vibrant Multicolor Toning**

- 3524** 1867 WB-101 MS64 NGC. CAC. Magnificent peach-gold, electric-blue, and cherry-red toning illuminates this sharply struck Seated half dollar. Unobtrusive contact on the right obverse field precludes a higher grade. The surfaces are prooflike, and die characteristics match Breen's second proof variety (1989). Ideal for the connoisseur, and housed in a former generation holder. Census: 7 in 64, 1 finer. CAC: 4 in 64, 4 finer (2/19). PCGS# 572177 Base PCGS# 6321

**1867 Half Dollar, Richly Toned MS66  
Extremely Rare So Well-Preserved**

- 3525** 1867 WB-101 MS66 PCGS. CAC. Light wheat-gold and rose-red toning deepens near the rims. A sharply struck and practically mark-free specimen. Seldom does an 1867 Seated half dollar appear at auction with surfaces as smooth and eye appeal as compelling as this Premium Gem. In fact, this is the only MS66 representative we have auctioned. Heritage has also had the pleasure of handling the single finest MS68 PCGS example, lot 98506 in our October 2014 auction of the Eugene H. Gardner Collection, Part II. Considering that coin's importance as one of the finest surviving pre-1879 Seated halves, we would be surprised if it reappeared at auction anytime soon, making this the finest example available to Registry collectors and Seated half enthusiasts. Population: 3 in 66, 2 finer. CAC: 2 in 66, 1 finer (2/19).

*Ex: Long Beach Signature (Heritage, 1/2004), lot 5918; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98683, which realized \$14,100.*

**Selections from the Jim O'Neal Collection.** PCGS# 572177 Base PCGS# 6321

**1870-CC Half Dollar, VF Details  
First-Year Carson City Key Date**

- 3526** 1870-CC WB-101, Die Pair 5, R.6 — Cleaned — NGC Details. VF. The date slopes up to the right, as does the mintmark with the fletching over the serif of the first C. Bill Bugert estimates that fewer than 200 of these first-year 1870-CC half dollars survive, mostly in well-circulated condition and often with various surface problems. This VF Details piece is characteristic for the issue, showing even wear and slightly muted, lightly hairlined surfaces. Accents of gold appear around the devices. A key, low-mintage issue with only 54,617 pieces struck. NGC ID# 6466, PCGS# 572190 Base PCGS# 6328

- 3527** 1871-CC WB-101, Die Pair 6, R.4, VF30 NGC. The date is low, narrowing the variety attribution to just two possibilities among the seven die pairs. This coin shows a distinctive lump to the upper left of S in TRUST within the scroll, confirming the WB-6 die pair. Golden accents add interest to the cream-gray surfaces, while smooth obverse wear accounts for the VF30 designation. Marks are minimal for the grade, and the coin's strong reverse details approach XF definition. The 1871-CC is notably scarce-to-rare in all grades, regardless of variety. NGC ID# 646D, PCGS# 572196 Base PCGS# 6331

**1873 Half Dollar, VF20  
Rare No Arrows, Open 3 Variant**

- 3528** 1873 No Arrows, Open 3, WB-101, VF20 NGC. The No Arrows, Open 3 is the rarest half dollar variant from any mint in 1873. Although the reported mintage is 214,200 pieces, that total seems erroneous, with Bowers claiming it has "no validity at all." However many were struck, probably most of them were melted after the standard weights of subsidiary coinage were increased on April 1, resulting in the Arrows coinage. Probably 125 or so examples avoided the melting pot. This one features deep charcoal-gray patina with golden high-point accents. Well-worn, but a terrific example of this challenging type. Census: 1 in 20, 10 finer (3/19). PCGS# 572206 Base PCGS# 6337

- 3529** 1873-CC No Arrows, Small CC, WB-101, Die Pair 1, R.3, VF30 NGC. Struck with a Closed 3, as are both of the 1873 No Arrows varieties. The No Arrows variant is scarce in all circulated grades, and seldom seen in problem-free VF condition. This is a pleasing midrange example of the type, with medium-gray toning and faint-orange overtones that deepen on the reverse. The coin is minimally abraded and highly attractive despite a seemingly long stint in circulation. Census (both varieties combined): 3 in 30, 29 finer (3/19). NGC ID# 24KC, PCGS# 572214 Base PCGS# 6338

**1873 Small Arrows Half Dollar, MS65**  
**Exceptional Type Coin**  
**Ex: Eugene Gardner, Jack Lee**

- 3530** 1873 Small Arrows, WB-107, MS65 PCGS. Delicate toning at the upper obverse shows flecks of red-violet and blue, while the balance of the coin is brilliant with light golden-orange patina near the rims. The obverse strike is full, showing sharp detail on the stars and Liberty's portrait; the only area of minor weakness is over the eagle's claws. A conditionally rare type coin that will prove difficult to upgrade. Population: 16 in 65, 4 finer (2/19).

Ex: FUN Signature (Heritage, 1/2005), lot 30220; Jack Lee Collection, Part III / Dallas Signature (Heritage, 11/2005), lot 2141; Rarities Sale (Bowers and Merena, 1/2010), lot 383; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98691, which realized \$12,925. **Selections from the Jim O'Neal Collection.** NGC ID# 2XVM, PCGS# 572212 Base PCGS# 6343

- 3531** 1873-CC Arrows, Small CC, WB-102, Die Pair 3, R.4 — Cleaned — NGC Details. AU. The date is positioned to the right, with Large Arrows and an Open 3. A wedge-shaped die lump appears in Liberty's gown folds, upper-right of the scroll end. This is a sharply defined example of the popular Carson City issue, with slightly granular surfaces and deep, golden-gray toning that obscures an old cleaning. PCGS# 572215 Base PCGS# 6344

**1874-CC Half Dollar, AU Sharpness**  
**Popular Arrows Type, Low Mintage**

- 3532** 1874-CC Arrows, WB-101, Die Pair 3, R.4 — Cleaned — NGC Details. AU. A die lump under the lower curl and a tine off the top of the eagle's head are just two of the diagnostic indicators that aid in attribution. The 1874-CC Arrows half is a scarce Carson City issue with only 59,000 coins struck. Most of those entered into the channels of commerce, leaving few high-grade survivors for today's collectors. This piece displays AU sharpness and deep shades of blue, violet, and golden-orange toning over hairlined surfaces. The effect is the result of a cleaning that prevents a numeric grade. NGC ID# 24LB, PCGS# 572221 Base PCGS# 6347

**1874-CC WB-102 Seated Half, VF25**  
**Rare Die Pair, 'Railroad Tracks' Die State**

- 3533** 1874-CC Arrows, Railroad Tracks Reverse, WB-102, Die Pair 3a, R.6, VF25 NGC. Just 59,000 pieces were struck at the Carson City Mint, a low mintage accomplished by three die marriages. Among the varieties, the late die state of the WB-3 die pair is by far the scarcest and most popular of the 1874-CC Arrows halves. Curious die damage on the reverse at TES of STATES resembles a pair of railroad tracks, thus the well-accepted nickname for the variety. This is a lovely VF25 example with natural, light-gray toning on the high points and richly toned warm-gray fields. Both sides are sharply defined for the assigned grade, with excellent eye appeal. A few tiny rim nicks are noted, but they are minor and provide no distraction. A seldom seen variety, in great demand among Seated half specialists. PCGS# 572222 Base PCGS# 6347

**1876 Seated Liberty Half, MS65**  
**Popular Centennial Issue**

- 3534** 1876 Open Bud, WB-101, MS65 NGC. Type One Reverse. From a large centennial mintage of 8.4 million pieces, the 1876 Seated Liberty half dollar is surprisingly rare in Gem condition. This well-detailed specimen exhibits strong, but subtle, mint luster, under shades of golden-brown, lavender, and grayish-blue toning. Census: 13 in 65, 4 finer (2/19). NGC ID# 645N, PCGS# 572234 Base PCGS# 6352

**1876 Seated Liberty Half, MS67 ★  
Finest at NGC, Ex: Gardner**

**3535 1876 Open Bud, WB-101, MS67 ★ NGC. CAC.** As a general rule, mintages of silver coins at all the mints reached high levels during the mid- to late 1870s, the result of the silver-rich Comstock Lode. However, despite a large production total of 8.4 million pieces, the 1876 Seated Liberty half dollar is prohibitively rare at the MS67 grade level. This impressive Superb Gem exhibits flawless surfaces with exquisite gold, blue, violet, and rose toning on both sides. This piece displays a nearly full strike and excellent eye appeal, with only a few trivial marks hidden in the design elements. Census: 1 in 67 (1 in 67★), 0 finer. CAC: 2 in 67, 0 finer (2/19).  
*Ex: Jason Carter: purchased by Eugene Gardner (7/2008); Eugene Gardner Collection, Part II (Heritage, 10/2014), lot 98517, where it realized \$11,456.25. NGC ID# 645N, PCGS# 572234 Base PCGS# 6352*

**3536 1877-CC Closed Bud, Medium CC, WB-103, Die Pair 13, R.2, MS63 PCGS.** Struck from heavily clashed dies, with two sets of clash marks evident. Sharp detail complements vibrant satin luster. The interiors of this Select 1877-CC half dollar are brilliant, while the borders display daubs of violet, blue, and orange-gold toning. The 1877-CC is collectible in Mint State, although it becomes conditionally elusive in grades finer than the present. NGC ID# 24KL, PCGS# 572250 Base PCGS# 6356

**3537 1877-CC Closed Bud, Medium CC, Repunched Date, WB-104, Die Pair 12, R.3, MS62 PCGS.** The base of the 77 is repunched. Light wheat-gold and powder-blue patina endows surprisingly smooth and semiprooflike surfaces. The reverse is clashed, from a mishap during production of Die Pair 11. Certified in an old green label holder.

*Ex: R.M. Smythe, Sale 208; Richard J. Chouinard Collection, Part Two / Long Beach Signature (Heritage, 2/2005), lot 7085, which realized \$920. NGC ID# 24KL, PCGS# 572251 Base PCGS# 6356*

**1877-S Half Dollar, Attractive MS66  
One Coin Finer at PCGS**

**3538 1877-S Open Bud, Micro S, WB-101, Die Pair 7, R.3, MS66 PCGS.** Two tiny parallel die lines in the shield above (LI)BE(RTY) and a lump above the C in AMERICA confirm this Open Bud, Micro S die marriage. Frosty mint luster shines through layers of blue, violet, and peach-orange color. This strongly defined Premium Gem half dollar is a fantastic, top-quality survivor from a mintage of 5.3 million coins. Population (all varieties): 35 in 66 (3 in 66+), 1 finer (3/19). PCGS# 572252 Base PCGS# 6357

**1878 Half Dollar, MS65 CAC  
Colorfully Patinated  
Ex: Eugene Gardner Collection**

**3539 1878 WB-101 MS65 PCGS. CAC.** Ocean-blue, rose-red, lemon-gold, and lilac patina endows lustrous and sharply struck surfaces. The green CAC sticker affirms the eye appeal, while close inspection with a loupe confirms the grade. Die cracks pass through portions of both peripheries. The mintage of 1,378,400 pieces was likely accomplished early in the year, before the advent of the Morgan dollar. Population: 11 in 65, 5 finer. CAC: 4 in 65, 3 finer (2/19).  
*Ex: Purchased from Joseph O'Connor (11/2008); Eugene Gardner Collection, Part IV (Heritage, 10/2015), lot 98701, which realized \$8,225.*

**Selections from the Jim O'Neal Collection.** NGC ID# 24KN, PCGS# 572256 Base PCGS# 6358

**1878-CC Half Dollar, AU50  
Rare Low Mintage Issue**

- 3540 1878-CC WB-101, Die Pair 1, R.4, AU50 PCGS. CAC.** A single die pair coined the entire 62,000-piece mintage of the 1878-CC. Production presumably ended abruptly with the advent of the Morgan dollar, though unlike the 1878-S, enough examples reached the public to ensure the issue is rare yet collectible. This gunmetal-gray and wheat-gold final-year Carson City half dollar is well defined and generally smooth, though we note a single hair-thin line above the eagle's right (facing) shoulder. Population: 6 in 50, 22 finer. CAC: 1 in 50, 5 finer (3/19). NGC ID# 24KP, PCGS# 572257 Base PCGS# 6359

**1878-CC Half Dollar, Choice AU  
Among the Finer of 250 Survivors**

- 3541 1878-CC WB-101, Die Pair 1, R.4, AU55 NGC.** One die pair coined all 62,000 half dollars at the Carson City Mint in 1878. Seated half expert Bill Bugert estimates that "perhaps 250 coins are now known, many of which are low grade, cleaned, and/or damaged." The dearth of high-grade survivors puts a premium on Choice examples such as this lightly toned, sharply defined coin. Traces of gold-tinged mint luster and occasional areas of semiprooflikeness add appeal to the silver-gray patina. Census: 3 in 55, 7 finer (3/19). Ex: *Long Beach Signature* (Heritage, 9/2016), lot 4108, where it brought \$5,405. NGC ID# 24KP, PCGS# 572257 Base PCGS# 6359

**1890 Half Dollar, Colorful MS65  
Prooflike Fields**

- 3542 1890 WB-101 MS65 PCGS. CAC.** The 1890 was the last of the low-mintage half dollar issues brought about by the Bland-Allison Act of 1878, which shifted much of the Mint's focus from minor denominations to the hefty silver dollar. Only 12,000 1890 halves were struck, solely at Philadelphia. This Gem example is scarce. Sharp design elements and prooflike fields complement original multicolor toning that delivers strong visual appeal. Population: 18 in 65 (1 in 65+), 18 finer. CAC: 4 in 65, 10 finer (3/19). NGC ID# 24L5, PCGS# 572275 Base PCGS# 6372

**PROOF SEATED HALF DOLLARS**

**1841 Seated Half, PR58  
Rare Early Proof, Ninth-Known Specimen**

- 3543 1841 PR58 NGC.** The estimated survival of 1841 proofs is typically pegged at 8 to 10 coins. We have confirmed eight such pieces, including one each at the Smithsonian Institution and the American Numismatic Society, which are permanently impounded in those collections. This briefly circulated example is a ninth confirmed specimen, struck from the correct proof dies. The date shows recutting on all four digits — especially the first 1, clearly recut at its base. Brilliant, moderately abraded surfaces retain substantial evidence of the original mirrored fields, while the strike is extra-sharp. A few tiny rim nicks and light field chatter attest to its time in circulation. Census: 1 in 58, 6 finer (2/19). NGC ID# 27T3, PCGS# 6385

- 3544 1859 PR64 NGC.** Other than a touch of weakness on Liberty's temple and the adjacent two stars, this Choice proof 1859 Seated half dollar is sharp and it glimmers with mirrored fields. Light golden and sea-green toning paints the borders, leaving the interiors nearly untoned. Census: 28 in 64, 28 finer (3/19). Ex: *The William Rehwald Proof Set Collection*. NGC ID# 27TJ, PCGS# 6413

**1860 Seated Half, PR64 Cameo  
Low Proof Population, CAC Endorsed**

- 3545 1860 PR64 Cameo PCGS. CAC.** Ex: Stokely Collection. Type Two Reverse. Attractive honey-brown toning embraces the borders of this sharply struck, well-mirrored near-Gem proof. A few vertical hairlines are detected on the right obverse field. Although 1,000 proofs were struck, the majority of the issue went unsold and was either melted, or placed into circulation. As a result, proofs from 1860 are scarcer than many later dates in the series with lesser productions. CAC endorsed. Population: 7 in 64 Cameo, 14 finer. CAC: 3 in 64, 5 finer (3/19). Ex: *Denver Signature* (Heritage, 8/2006), lot 414. Ex: *The William Rehwald Proof Set Collection*. NGC ID# 27TK, PCGS# 86414

- 3546 1861 PR64 NGC.** A hint of lilac toning on the lower obverse margin denies full brilliance. This suitably struck near-Gem is unblemished and prominently mirrored. The cameo contrast is significant, although unrecognized by NGC. In a circa-2000 holder. Census: 23 in 64, 26 finer (3/19). Ex: *The William Rehwald Proof Set Collection*. NGC ID# 27TL, PCGS# 6415

**1862 Seated Half, PR64 Cameo  
Razor-Sharp, Near-Brilliant Proof**

- 3547 1862 PR64 Cameo PCGS.** Flashy silver mirrors show a mere hint of gold toning that gathers on the rims, and faintly intrudes onto the coin's Choice surfaces in isolated areas. A group of three or four tiny pinprick marks near star 5 and a few delicate hairlines mix with Mint-made die polish lines. The full strike could not be sharper on either side, while frosted devices provide bold contrast with the smooth, glassy fields. Population: 15 in 64 (1 in 64+) Cameo, 8 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27TN, PCGS# 86416

- 3548 1863 PR64 PCGS.** A glittering, vibrant near-Gem proof, with glassy-mirrored fields and dramatic border toning. Rich shades of cobalt-blue blend seamlessly with vivid orange-gold interiors. The obverse is particularly dazzling, with die polish lines visible beneath the toning that contribute to the radiance. Civil War era half dollars seldom circulated, with most survivors in near-Mint State or finer Uncirculated grades plus perhaps 300 or so surviving proofs. This is a pinpoint-sharp Choice proof, housed in a previous-generation blue label PCGS holder with barcode on the back. Population: 49 in 64, 17 finer (2/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27TP, PCGS# 6417

- 3549 1864 PR64 NGC.** A sharp collector-grade example of this low-mintage proof issue (470 coins struck). The devices are satiny and offer modest contrast against the mirrored fields, although no significant cameo effect is produced. A delicate golden hue warms each side. Census: 49 in 64 (1 in 64+), 19 finer; 14 in 64 (1 in 64★) Cameo, 6 finer; 1 in 64 Ultra Cameo, 1 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27TR, PCGS# 6418

**1864 Seated Half, PR65 Cameo  
Attractively Toned, Few Are Finer**

- 3550 1864 PR65 Cameo NGC.** This wartime proof issue is elusive in full Gem condition, and it is especially scarce with distinct cameo contrast. A wide window of champagne toning deepens toward the borders, where a tight frame of steel-blue patina bounds the smooth, mirrored fields and fully struck, frosted motifs. Originally toned surfaces show a few delicate hairlines, none of which are distracting, and Liberty's gown folds and upper-most curls are razor-sharp. The natural eye appeal is exceptional. Census: 5 in 65 Cameo (1 in 65★), 1 finer; 0 in 65 Ultra Cameo, 1 finer (2/19). NGC ID# 27TR, PCGS# 86418

**1865 Seated Liberty Half Dollar, PR64  
Elusive Cameo Example, Full Proof Strike**

- 3551 1865 PR64 Cameo NGC.** Popular as the final No Motto issue of the Seated half proof series, just 500 1865 proofs were struck. This is a razor-sharp Choice example, nearly brilliant, with a halo of gold toning at the rims. The devices are fully struck and well-frosted to earn the Cameo designation, while nicely mirrored fields reveal only a few wayward hairlines under a strong loupe and no meaningful distractions. The eye appeal is that of an even finer grade. Census: 10 in 64 Cameo, 18 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27TS, PCGS# 86419

- 3552 1866 Motto PR64 Cameo NGC.** Splendid aquamarine, golden-brown, and magenta toning consumes the borders of this intricately impressed and profoundly mirrored half dollar. Minor field hairlines are all that limit the grade. Just 725 proofs were issued. Census: 12 in 64 Cameo (1 in 64+), 8 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27TZ, PCGS# 86424

**1867 Half Dollar, PR66  
Multicolor Toning, Full Strike**

- 3553 1867 PR66 NGC.** Apple-green, rose-red, and sun-gold toning endow this iridescently toned Premium Gem. The reverse periphery displays dappled lavender freckles. The sharply struck surfaces are devoid of detractions. An outstanding Motto proof type coin. A mere 625 proofs were struck. Certified in a circa-2000 holder. Census: 5 in 66, 1 finer (3/19). NGC ID# 27U2, PCGS# 6425

- 3554 1867 PR64 Cameo PCGS.** A limited mintage of 625 proof half dollars was accomplished in 1867, and Cameo survivors are rarely seen in any grade. This example shows pleasing field-device contrast, with warm golden toning over both sides. The design elements are fully brought up, giving this piece exceptional eye appeal, despite a few faint, grade-consistent hairlines in the fields. Population: 14 in 64 (1 in 64+) Cameo, 19 finer (3/19).  
*Ex: Houston Money Show Signature (Heritage, 12/2014), lot 4083.*  
*From The William Rehwald Proof Set Collection.* NGC ID# 27U2, PCGS# 86425

- 3555 1868 PR64 PCGS. CAC.** Radiant white devices and legends display ready contrast with glassy fields, though the age of the green label holder prevents a Cameo designation. Light honey-gold patina graces the peripheries, but this well-preserved Choice half dollar is mostly brilliant. CAC: 13 in 64, 6 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27U3, PCGS# 6426

**1870 Half Dollar, PR66  
Iridescently Toned**

- 3556 1870 PR66 PCGS. CAC.** A spectacularly patinated Premium Gem. The pristine surfaces display vivid shades of ocean-blue, fire-red, and butter-gold. The strike shows only slight blending of impression on the eagle's left (facing) claw. A few hair-thin planchet marks (as made) emerge beneath a loupe on the high points of Liberty's legs. CAC: 3 in 66, 1 finer (3/19). NGC ID# 27U5, PCGS# 6428

**1871 Half Dollar, PR66  
Few Comparables**

- 3557 1871 PR66 PCGS. CAC.** The scarcity of high-grade business strikes puts substantial pressure on premium quality proofs like the one offered here. This flashy specimen is elegantly toned in violet, sea-green, ice-blue, and golden patina, with an area of brilliance anchored around Liberty's knee. One of 960 pieces struck, few of which compare. Population: 5 in 66, 0 finer in non-Cameo. CAC: 3 in 66, 0 finer (3/19). NGC ID# 27U6, PCGS# 6429

- 3558 1872 PR64 Cameo NGC.** Golden-brown, cherry-red, and blue-green peripheral patina endows this well struck proof half dollar. The mirrored fields contrast with the lightly toned devices. Careful rotation reveals only minor obverse hairlines. In a circa-2000 holder. Census: 6 in 64 Cameo, 15 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27U7, PCGS# 86430

**1873 Arrows Half Dollar, PR64  
Low-Mintage, Two-Year Type**

- 3559 1873 Arrows PR64 PCGS. CAC.** This two-year type is highly sought-after in proof format. While the *Guide Book* reports a production of 800 pieces, Breen, Boosel, and others suggest only 550 proof Arrows half dollars were struck in 1873. Frosty, high-contrast centers meld with light golden patina at the rims. Contact is well-hidden within the shield and drapery. Certified in a green label holder. Population: 45 in 64, 11 finer in non-Cameo. CAC: 2 in 64, 3 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27UU, PCGS# 6434

**1874 Arrows Half Dollar, PR64  
Brilliant Surfaces, Two-Year Type**

- 3560 1874 Arrows PR64 NGC.** The Mint Act of 1873 was the impetus for the short-lived Arrows type in 1873 and 1874. A nominal increase in weight of the dime, quarter, and half dollar prompted the addition of arrows at either side of the date to signify the weight change. All proofs are the Small Arrows type, while circulation strikes overwhelmingly have Large Arrows, although there are rare instances of Small Arrows or Large over Small Arrows varieties among the business strikes. This brilliant proof is boldly struck with Choice surfaces. A few delicate hairlines dictate the assigned grade. Census: 50 in 64, 23 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27UV, PCGS# 6435

- 3561 1875 PR64 NGC. CAC.** The iridescent brick-red, powder-blue, and almond-gold peripheral toning is more prominent on the obverse than the reverse. The devices are icy and demonstrate undesignated cameo contrast with the smooth fields. The strike shows only unimportant inexactness. Encased in a prior generation holder. CAC: 6 in 64, 13 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27U9, PCGS# 6436

- 3562 1876 PR65★ NGC.** Exquisite ocean-blue and golden-brown toning dominates the obverse, and the reverse periphery. This lovely Gem appears practically pristine save for a tick on Liberty's cheek. As of (2/19), only three proof 1876 halves have received a star designation (bestowed for superior eye appeal) from NGC.  
*Ex: Long Beach Signature (Heritage, 6/2004), lot 8415; Central States Signature (Heritage, 5/2005), lot 7220, which realized \$2,530.* NGC ID# 27UA, PCGS# 6437

**1876 Half Dollar, PR67 Cameo  
Exceptional Centennial Issue**

- 3563 1876 PR67 Cameo NGC.** An extraordinary Superb Gem Cameo proof, this Seated Liberty half dollar exhibits amazing contrast between the frosty silver devices and lightly toned fields. The surfaces are impeccably preserved and splashes of gold and violet toning add to the outstanding eye appeal of this centennial issue. Census: 2 in 67 Cameo, 0 finer (2/19).  
*Ex: Long Beach Signature (Heritage, 2/2013), lot 3815, realized \$10,575.* NGC ID# 27UA, PCGS# 86437 Base PCGS# 86437

- 3564 1877 PR64 PCGS. CAC.** Type Two Reverse, as usual for the issue. Forest-green, fire-red, and peach-gold patina illuminates the margins of this flashy half dollar. The centers are practically brilliant. Devoid of detractors, and well struck save for the eagle's left (facing) ankle. CAC: 5 in 64, 7 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27UC, PCGS# 6438

**1877 Seated Half, Partially Toned PR65  
Only 510 Proofs Struck**

- 3565 1877 PR65 PCGS. CAC.** The 1877 half dollar is a study in contrasts. More than 8.3 million pieces were struck for circulation, but only 510 proofs were produced. Remarkably few of the proofs have survived in Gem or finer grades. This is a deeply mirrored example that retains much brilliance with scattered green and reddish-russet patina over each side. The strike is pinpoint-sharp throughout, and there are no obvious contact marks. Population: 10 in 65, 6 finer. CAC: 3 in 65, 4 finer (2/19).  
*Ex: Long Beach Signature (Heritage, 6/2013), lot 4535, where it sold for \$3,818.75. NGC ID# 27UC, PCGS# 6438*

- 3566 1879 PR64 NGC. CAC.** Type One Reverse, with an open bud below the branch, as usual for proofs of this date. An untoned white-on-black specimen that nonetheless lacks a Cameo designation. The strike shows only unimportant blending on the eagle's left (facing) ankle.  
*From The William Rehwald Proof Set Collection. NGC ID# 27UE, PCGS# 6440*

- 3567 1880 PR64 NGC. CAC.** Icy motifs and glassy fields ensure white-on-black contrast, though the coin is undesignated as such due to its former generation holder. The interiors remain brilliant, but the borders display narrow arcs of golden-brown, navy-blue, and plum-red.  
*From The William Rehwald Proof Set Collection. NGC ID# 27UF, PCGS# 6441*

- 3568 1880 PR65 NGC. CAC.** Rich aquamarine, lilac-red, and rose-gold toning embrace this undisturbed and impressive Gem. The strike shows slight blending on the fletchings, but the eye appeal is exceptional nonetheless. Housed in a former generation holder. CAC: 11 in 65, 15 finer (3/19). NGC ID# 27UF, PCGS# 6441

**1880 Half Dollar, PR66 Cameo  
Beautifully Toned**

- 3569 1880 PR66 Cameo PCGS.** Proof 1880 half dollars are rare this fine with cameo contrast, and this Premium Gem is a full grade point finer than the highest-graded Deep Cameo coin at PCGS. The devices are fully struck and frosty, set against deeply reflective fields that glimmer with sun-gold, violet, and blue toning. Eye appeal is spectacular. Population: 16 in 66 (3 in 66+) Cameo, 0 finer (2/19). NGC ID# 27UF, PCGS# 86441

- 3570 1881 PR64 PCGS. CAC.** Type One Reverse. 1881 was the final year that proofs were struck with an Open Bud reverse, presumably from a leftover die made in 1876 or before. 1881 proofs were also struck from Type Two (Closed Bud) dies. The present Choice specimen exhibits substantial contrast, though the circa-2000 precedes the extension of the Cameo designation to the Seated half series. Peripherally patinated in delicate tan, rose, and aqua shades.  
*From The William Rehwald Proof Set Collection. NGC ID# 27UG, PCGS# 6442*

- 3571 1881 PR65 NGC.** *Ex: Eliasberg.* Peripherally toned in peach-gold, electric-blue, and plum-red shades. The undisturbed surfaces show minor blending of impression on the eagle's claws and fletchings. Housed in a circa-2000 holder.  
*Ex: William Dickinson Collection (S.H. & H. Chapman, 3/1894), lot 353; J.M. Clapp; John H. Clapp; Clapp Estate; Louis E. Eliasberg, Sr.; Eliasberg Estate; Louis E. Eliasberg, Sr., Collection (Bowers and Merena, 4/1997), lot 2052, which realized \$1,650. NGC ID# 27UG, PCGS# 6442*

- 3572 1884 PR64 Cameo NGC.** NGC lists no Ultra Cameo proof 1884 half dollars. This Choice Cameo coin is modestly contrast with a delicate lilac hue that cedes to ocean-blue around portions of the borders. The strike is sharp and eye appeal is pleasing. Census: 13 in 64 Cameo, 20 finer (3/19).  
*From The William Rehwald Proof Set Collection. NGC ID# 56LN, PCGS# 86445*

**1885 Half Dollar, PR65 Cameo  
Nearly a Deep Cameo**

- 3573 1885 PR65 Cameo PCGS.** This brilliant Gem Cameo proof has impressive field-to-device contrast, and borders on the Deep Cameo designation, in our opinion. Both sides are deeply mirrored around lustrous devices with grade-consistent contact marks of no consequence. Population: 21 in 65 (3 in 65+) Cameo, 34 finer (3/19). NGC ID# 27UL, PCGS# 86446

**1886 Half Dollar, PR65+ Cameo  
High-End With CAC Approval**

- 3574 1886 PR65+ Cameo PCGS. CAC.** A mintage of 886 proof Seated Liberty half dollars was achieved in 1886 to accompany a small business-strike production of 5,000 pieces. This impressive high-end Gem is virtually fully struck, except for a touch of trivial incompleteness on the head and highest stars. Frosty devices contrast boldly against reflective fields, with attractive hints of pale gold toning on each side. Population: 12 in 65 (2 in 65+) Cameo, 8 finer. CAC: 9 in 65, 6 finer (3/19).  
*Ex: Central States Signature (Heritage, 4/2012), lot 4549; Central States Signature (Heritage, 4/2013), lot 2286, where it brought \$4,406.25. NGC ID# 27UM, PCGS# 86447*

**1887 Half Dollar, PR64  
Colorful 'Target' Toning  
Green CAC, Old NGC Slab**

- 3575 1887 PR64 NGC. CAC. WB-101.** While the circulation strike mintage was small (5,000 pieces), the production of proofs was only slightly diminished to 710 pieces. This is a vibrantly toned proof, with rainbow shades evenly distributed in concentric fashion throughout both sides. A few faint hairlines visit the Choice surfaces, and a sharp strike adds to the strong eye appeal. CAC endorsed for quality. Census: 41 in 64, 38 finer. CAC: 5 in 64, 16 finer (3/19). *From The William Rehwald Proof Set Collection.* NGC ID# 27UN, PCGS# 6448

- 3576 1888 PR64 NGC. CAC.** Honey-gold, lilac-red, and cobalt-blue shades endow the borders. A well-preserved Choice Seated half that boasts icy motifs and darkly reflective fields. Without a Cameo designation, due to the age of the former generation holder. CAC: 6 in 64, 15 finer (3/19). *From The William Rehwald Proof Set Collection.* NGC ID# 27UP, PCGS# 6449

- 3577 1888 PR64 Cameo PCGS.** Delightful peach-gold, fire-red, and ocean-blue patina endows the borders. The fields are lightly toned and the well-struck devices are frosty. We note a hair-thin line near the first two stars, but the eye appeal is nonetheless exceptional. Population: 23 in 64 Cameo, 21 finer (2/19). *Ex: Houston Signature (Heritage, 12/2008), lot 753, which realized \$2,530.* NGC ID# 5H74, PCGS# 86449

**1888 Half Dollar, PR67 Cameo  
Beautiful Border Toning**

- 3578 1888 PR67 Cameo NGC.** Cameo contrast endows each side of this Superb Gem, although it is slightly less blatant on the obverse due to the intrusion of vivid violet and ocean-blue toning in the margins. The reverse has similar border color, although it clings to the peripheries. Both sides have golden interiors. This piece is boldly struck and delightfully well preserved. The proof 1888 half dollar is rare this fine. Census: 5 in 67 (1 in 67★) Cameo, 0 finer; 0 in 67 Ultra Cameo, 1 finer (2/19). NGC ID# 5H74, PCGS# 86449

- 3579 1889 PR64 NGC. CAC.** Beautiful powder-blue, wheat-gold, and plum-red toning enriches both borders. The devices are icy and mostly brilliant. The strike is above average. White-on-black contrast is irrefutable, but the prior generation holder lacks a Cameo designation. CAC: 7 in 64, 12 finer (3/19). *From The William Rehwald Proof Set Collection.* NGC ID# 27UR, PCGS# 6450

**1890 Seated Half, PR65 Cameo  
Target Toned on Each Side**

- 3580 1890 PR65 Cameo NGC.** Concentric rings of color in different hues surround silver centers on each side of this Gem Cameo proof, more bluish on the obverse and rich reddish-copper on the reverse. The partially untuned central devices heighten significant contrast. Superb eye appeal for this proof and a prize for color collectors. Census: 12 in 65 Cameo, 14 finer (2/19). *Ex: Orlando Signature (Heritage, 7/2013), lot 5014, where it realized \$3,965.63.* NGC ID# 27US, PCGS# 86451

**1890 Half Dollar, PR64 Deep Cameo  
Brilliant Centers, Rim-Toned**

- 3581 1890 PR64 Deep Cameo PCGS. CAC.** Only 590 proof 1890 half dollars were struck in addition to a paltry 12,000 strikes for circulation. This coin represents a curious quirk of certification: It is the only Deep Cameo certified in PR64 at either major service (2/19). The coin is very close to PR65, and the CAC sticker gives a good indication of the high-end nature of the piece. The only mark that prevents a higher grade is a shallow scrape in the left obverse field. Each side retains brilliant centers with golden-brown patina surrounding the margins. NGC ID# 27US, PCGS# 96451

**BARBER HALF DOLLARS**

**1892 Half Dollar, Toned MS66  
Attractive First-Year Type Coin**

- 3582 1892 MS66 PCGS.** Rich, multicolor toning includes shades of ruby-red, orange, forest-green, and azure-blue across the softly lustrous surfaces of this Premium Gem 1892 Barber half. Although the mintage was curtailed at 934,000 pieces in favor of quarters and dimes, many examples of the new design were saved and even Premium Gem examples are merely scarce, not rare. This is an originally toned example with a sharp strike and nearly mark-free surfaces. Population: 56 in 66 (10 in 66+), 15 finer (2/19). NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

**3583 1892-O MS63 PCGS.** This is a well-struck example of the first-year New Orleans issue, showing satiny surfaces that have a hint of reflectivity in the obverse fields. No major abrasions are seen on this piece, although the toning is thick on each side which may influence the PCGS grade. Colors include gold, russet, olive, and lavender-blue. Population: 38 in 63, 63 finer (2/19). NGC ID# 27UW, PCGS# 6462

**3584 1897-S — Artificial Toning — NGC Details. Unc.** A better date in all grades, the 1897-S is challenging to secure in Mint State. This well-struck half dollar displays a reed impression below the chin but is otherwise smooth. The cheek exhibits light parallel roller marks, as produced. The centers are straw-gold, and the borders display blue-green shades. NGC ID# 24M2, PCGS# 6479

### 1900-S Half Dollar, MS66 Major Condition Rarity This Nice

**3585 1900-S MS66 PCGS.** The population of the 1900-S dwindles from more than 2.5 million half dollars originally struck to perhaps four of five pieces at this level and only a couple in higher grades. This fantastic Premium Gem is strongly detailed around the rims, including the fletchings and talons, with softness limited to the centers. Lustrous surfaces display blended lavender-gray and pale sea-green patina. Population: 4 in 66 (1 in 66+), 1 finer (3/19). NGC ID# 57PC, PCGS# 6488

**3586 1909 MS65 PCGS.** A well-preserved Gem that boasts booming luster and impressive eye appeal. The dappled apple-green toning deepens near the rims. The strike is good despite a hint of softness on the fletchings. Certified in a green label holder. Population: 64 in 65 (1 in 65+), 17 finer (2/19). NGC ID# 24N8, PCGS# 6516

### 1911-S Half Dollar, MS66 Spectacular Mint Luster Only One Coin Finer at PCGS

**3587 1911-S MS66 PCGS.** Every bit a Premium Gem, this 1911-S Barber half dollar displays radiant luster that shimmers with just the slightest tilt beneath a light. Warm sun-gold toning emerges from the borders and lightens as it nears the centers. This coin is sharp throughout each side and has no mentionable abrasions. Eye appeal is magnificent. The 1911-S Barber half dollar is rare this fine, and PCGS and NGC each report only a single higher-grade representative. Population: 9 in 66 (2 in 66+), 1 finer (3/19). NGC ID# 24NF, PCGS# 6523 Base PCGS# 6523

### 1914-S Half Dollar, Frosty MS66 None Numerically Finer

**3588 1914-S MS66 PCGS. CAC.** Fully struck and completely brilliant surfaces are among the best preserved of the nearly 1 million 1914-S half dollars minted. Brightly frosted mint luster washes over each side, producing a captivating visual effect. A reed mark on Liberty's neck above the 9 and another on the left side of the shield are the only ones we can spot. Population: 9 in 66 (3 in 66+), 0 finer. CAC: 11 in 66, 0 finer (3/19). NGC ID# 24NP, PCGS# 6531

## PROOF BARBER HALF DOLLARS

**3589 1892 PR64 NGC. CAC.** The first-year Barber half dollar has the highest proof mintage of the type, but fully struck examples with light original peripheral toning are always in demand. The portrait is frosty throughout, although reverse contrast is less conspicuous. Certified in a former generation holder. CAC: 4 in 64, 14 finer (3/19). *From The William Rehwald Proof Set Collection.* NGC ID# 24NU, PCGS# 6539

### 1892 Half Dollar, PR66 Deep Cameo A Rarity With Such Stark Contrast

**3590 1892 PR66 Deep Cameo PCGS.** The first-year 1892 half dollar is one of the most collectible issues in the Barber series with a relatively large mintage of 1,245 pieces. Deep Cameo specimens are all rarities, however, and this piece is in the top echelon of survivors. Blushes of golden color occur over the thickly frosted motifs and glassy fields without interrupting the natural brilliance of this Premium Gem proof. Population: 5 in 66 (1 in 66+) Deep Cameo, 2 finer (3/19). NGC ID# 3TG8, PCGS# 96539

**3591 1893 PR64 Cameo PCGS.** Light golden toning warms the borders on this near-Gem Cameo proof, complementing sharp devices and appreciable field-device contrast. A circular orange-gold spot of toning is present on the leaves to the left of LIBERTY. Population: 30 in 64 (4 in 64+) Cameo, 56 finer; 1 in 64 (1 in 64+) Deep Cameo, 14 finer (3/19). *From The William Rehwald Proof Set Collection.* NGC ID# 6UKV, PCGS# 86540

**3592 1894 PR64 PCGS. CAC.** From a mintage of 972 pieces, this attractive Choice proof is sharply detailed in most areas, with a touch of the usual softness on the right (facing) shield point. The well-preserved, reflective surfaces show hints of lavender and sea-green toning at the peripheries. *From The William Rehwald Proof Set Collection.* NGC ID# 24NW, PCGS# 6541

**1894 Barber Half Dollar, PR66  
Elusive Cameo Example**

- 3593 1894 PR66 Cameo PCGS.** Ex: Friend. One of the more popular dates as a proof because of the general availability today of what remains of the 972 proofs struck. However, this is not one of the more available dates with cameo contrast, especially among the dates from the 1890s. This is a magnificent coin that shows strong field-to-device contrast even beneath the rich layers of toning. The obverse has golden-rose hints that are surrounded by cobalt-blue at the margins. The reverse has the same cobalt-blue color spread evenly over the entire side. An immensely attractive coin with strong eye appeal. Population: 22 in 66 (3 in 66+) Cameo, 6 finer (3/19). Ex: *FUN Signature* (Heritage, 1/2007), lot 4607; *FUN Signature* (Heritage, 1/2015), lot 5072. NGC ID# 24NW, PCGS# 86541

- 3594 1897 PR64 Cameo PCGS.** CAC. Vivid highlights of sea-green, lavender-gray, and cobalt-blue toning visit the peripheries of this attractive Choice proof. The design elements are sharply detailed throughout and the deeply mirrored fields contrast boldly with the frosty devices. Population: 27 in 64 (2 in 64+) Cameo, 46 finer. CAC: 5 in 64, 19 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 24NZ, PCGS# 86544

**1897 Half Dollar, PR67 Cameo  
Remarkably Preserved**

- 3595 1897 PR67 Cameo NGC.** CAC. Although well known as a year when many proofs exhibit lavish cameo contrast, the level of preservation on this Superb representative combined with the dazzling eye appeal make it especially desirable. Untoned centers give way to hints of golden peripheral toning, only adding to the remarkable visual effect. Census: 15 in 67 Cameo (3 in 67★), 7 finer. CAC: 3 in 67, 2 finer (2/19).  
Ex: *Long Beach Signature* (Heritage, 6/2006), lot 1736, where it realized \$6,325. NGC ID# 24NZ, PCGS# 86544

**1899 Barber Half, PR65 Cameo  
Beautiful Mirrors, Brilliant Surfaces**

- 3596 1899 PR65 Cameo PCGS.** CAC. This brilliant and contrasted proof displays beautiful mirrorlike fields that are virtually free of hairlines, and the few die polish lines are subtle and invisible without magnification. The frosted motifs are fully struck and contrast boldly with the reflective fields. About a half dozen pinpoint milk spots exist, most of which are near the left obverse margin, but they are tiny and nondistracting. We seldom see a Gem brilliant proof so sharp and well-preserved. CAC endorsement echoes the accolades. NGC ID# 24P3, PCGS# 86546

- 3597 1900 PR64 NGC.** CAC. The obverse border displays only narrow crescents of fire-red and navy-blue near the rim, but the reverse shows the same peripheral colors much more prominently. Radiant motifs exhibit undeniable contrast with glassy fields, though the former generation holder precludes a Cameo designation. CAC: 13 in 64, 8 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 24P4, PCGS# 6547

- 3598 1900 PR64 Cameo NGC.** Delicate gold toning visits the mirrored fields and lustrous devices of this lovely Choice Cameo proof that has excellent field-to-device contrast. In fact, this piece is a borderline Deep Cameo proof. Census: 24 in 64 Cameo (1 in 64+), 51 finer (3/19). NGC ID# 24P4, PCGS# 86547

**1905 Half Dollar, PR67  
Array of Iridescent Tones**

- 3599 1905 PR67 PCGS.** CAC. An array of peach-orange, violet, and blue tones coalesce over each side, producing an eminently appealing effect. A hint of duskiness in the fields limits reflectivity, which is normally minimal for post-1902 Barber proof coinage. Preservation is fantastic. Population: 16 in 67 (1 in 67+), 1 finer. CAC: 10 in 67, 1 finer (3/19). NGC ID# 24P9, PCGS# 6552

1907 Half Dollar, Toned PR67  
Eye-Appealing and Conditionally Rare

**3600 1907 PR67 PCGS.** Few proof 1907 Barber halves have cameo contrast, and none are designated as Deep Cameo by PCGS. This Superb Gem non-Cameo is a high-end Registry coin, with only one piece finer at PCGS. Both sides have a dusting of greenish-gold toning across the interiors, ceding to more vivid multicolor hues around the borders, particularly the obverse borders. The strike is sharp and the preservation is virtually flawless. Eye appeal abounds. Population: 12 in 67 (1 in 67+), 1 finer; 5 in 67 Cameo, 0 finer (2/19). NGC ID# 24PB, PCGS# 6554

**3601 1909 PR64 Cameo PCGS. CAC.** A hint of straw-gold toning near DOLLAR precludes full brilliance. The frosty motifs exhibit an exemplary strike. Carbon is confined to a fleck or two near the arrowheads. Just 650 proofs were produced. CAC: 4 in 64, 17 finer (3/19).  
*Ex: FUN Signature (Heritage, 1/2007), lot 4637, which realized \$1,495.*  
**From The William Rehwald Proof Set Collection.** NGC ID# 24PD, PCGS# 86556

1909 Half Dollar, PR67 Cameo  
Seldom Found So Clean and Contrasted

**3602 1909 PR67 Cameo PCGS.** Both sides of this Superb Gem Cameo proof are essentially all-brilliant with just a few specks of color near star 7 on the obverse and at the lower reverse. Contrast and strike definition are unsurprisingly bold. The 1909 proof half dollar derives from a mintage of 650 pieces. Population: 12 in 67 Cameo, 3 finer in this category (3/19). NGC ID# 24PD, PCGS# 86556

**3603 1913 PR64 NGC.** This sharp Choice proof displays deeply reflective fields and satiny devices. Subtle cameo contrast is apparent on the reverse. Both sides are nearly brilliant across the interiors with golden-amber border toning. On the obverse, an identifying line of amber and blue toning runs diagonally across Liberty's cheek.  
**From The William Rehwald Proof Set Collection.** NGC ID# 24PH, PCGS# 6560

WALKING LIBERTY HALF DOLLARS

**3604 1916 MS65 PCGS.** Soft mint luster emanates from surfaces uniformly toned in a thin veil of golden-gray color. The devices are typically struck and full thumb separation is apparent on the branch hand. Void of obvious marks. Collectors appreciate the first-year status of the 1916 and its low mintage of 608,000 coins. NGC ID# 24PL, PCGS# 6566

1916-S Walking Liberty Half, MS65+  
Popular First-Year Issue

**3605 1916-S MS65+ NGC.** From a low mintage of 508,000 pieces, the 1916-S Walking Liberty half dollar becomes scarce at the MS65 grade level, and finer coins are rare. This Plus-graded Gem exhibits a better-than-average strike, with clear separation between Liberty's thumb and fingers on the wreath hand and just a touch of softness on the eagle's leg. The well-preserved surfaces are lustrous and appealing. Census: 66 in 65 (3 in 65+), 15 finer (3/19). NGC ID# 24PN, PCGS# 6568

**3606 1917-D Reverse Mintmark MS62 PCGS.** A well-struck, satiny example with only light handling marks that limit the grade. Deep lavender-gray and light golden toning blankets each side, accenting the design elements. NGC ID# 24PS, PCGS# 6571

1917-S Half Dollar, MS62  
Obverse Mintmark

**3607 1917-S Obverse Mintmark MS62 NGC.** Numerous crisscrossing die polish lines in the fields of this piece produce a satiny, shimmering appearance that masks any minor grade-limiting abrasions. The coin is untoned and well-struck with pleasing eye appeal. Obverse Mintmark coins are scarce in Uncirculated condition, although this piece remains accessible by most Walking Liberty half dollar collectors. NGC ID# 26G7, PCGS# 6572

**1917-S Half Dollar, MS64  
Obverse Mintmark**

- 3608 1917-S Obverse Mintmark MS64 PCGS. CAC.** The 1917-S Obverse is the scarcest of the five mintmark variations of this date, and it is among the scarcest dates in the series in Mint State after the 1919-S. This attractive near-Gem exhibits potent luster and is well-struck overall, but it lacks absolute high point definition (as do almost all early Walkers). A hint of light golden toning graces each side.  
*Ex: FUN Signature (Heritage, 1/2013), lot 4874, which realized \$6,462.50. NGC ID# 26G7, PCGS# 6572*

- 3609 1917-S Reverse Mintmark MS63 PCGS.** Mattelike luster characterizes this Select 1917-S Reverse Mintmark half dollar, while the design elements show generally strong definition aside from weakness on Liberty's head. A few daubs of olive-gold peripheral color are evident, while the majority of each side displays a delicate pastel hue. NGC ID# 24PU, PCGS# 6573

- 3610 1917-S Reverse Mintmark MS63 PCGS. CAC.** With more than five times the mintage of its scarce Obverse Mintmark counterpart, the 1917-S Reverse Mintmark variety is seen less often in Mint State grades than expected. This Select Uncirculated example with CAC endorsement displays original russet, gold, and blue-gray toning with silver luster shining through. The strike is slightly weak through the centers, but the coin is otherwise sharp with no significant abrasions. NGC ID# 24PU, PCGS# 6573

- 3611 1917-S Reverse Mintmark MS64 PCGS.** With roughly five times the mintage of Obverse Mintmark variety, the 1917-S Reverse has a surprisingly similar population in near-Gem and finer grades. Attractive original iridescence deepens dramatically at the borders of this lustrous, well-preserved Choice Uncirculated coin. There are no mentionable marks, and the strike is sharp for the issue, which seldom exceeds 70% definition. PCGS has certified just 65 numerically finer examples (3/19). NGC ID# 24PU, PCGS# 6573

- 3612 1917-S Reverse Mintmark MS64 PCGS.** Branch Mint Walking Liberty half dollars had the mintmark placed on the obverse in 1916, and that placement continued part way through 1917 until the location was moved to the reverse, creating five varieties for the year. This Choice Mint State piece has frosty luster and brilliant, untuned surfaces. The strike is typical for the issue. An important condition rarity with just 65 numerically finer PCGS submissions (3/19). NGC ID# 24PU, PCGS# 6573

- 3613 1918-S MS64 PCGS.** This attractive Choice specimen exhibits well-detailed design elements, with just a touch of the usual softness on the wreath hand and eagle's leg. The well-preserved, lustrous surfaces show a few highlights of golden-tan toning. PCGS has graded 39 numerically finer examples (3/19). NGC ID# 24PX, PCGS# 6576

**1918-S Half Dollar, MS64  
Brightly Frosted and Brilliant**

- 3614 1918-S MS64 PCGS. CAC.** Although the 1918-S has the highest mintage among pre-WWII Walker halves, it ranks among the more conditionally elusive issues in the series. Strike definition is always problematic, and this near-Gem is no exception in that regard. However, it does grade nine points higher than the average 1918-S survivor, and anything finer is scarce. Each side is brightly frosted and brilliant with minimal field marks. NGC ID# 24PX, PCGS# 6576

**1919 Walking Liberty Half, MS64  
Low-Mintage Philadelphia Issue**

- 3615 1919 MS64 PCGS.** The 1919 Walking Liberty half dollar is one of the more challenging issues from the early Philadelphia series, with a mintage of 962,000 pieces. This attractive Choice specimen exhibits a sharper than average strike, with full definition on the wreath hand. The well-preserved surfaces are lustrous and lightly toned, with outstanding eye appeal. NGC ID# 24PY, PCGS# 6577

**1919 Half Dollar, MS64+  
Conditionally Elusive**

- 3616 1919 MS64+ PCGS.** The 1919 Walking Liberty half dollar, one of the scarce early P-Mint issues, had a mintage of 962,000 coins, and a rather low survival rate. This Choice Mint State example has gold, rose, blue, green and amber toning accompanying splashes of silver brilliance on the obverse with a nearly brilliant reverse showing faint traces of gold toning. A beauty. NGC ID# 24PY, PCGS# 6577

**1919-D Walking Liberty Half, AU58  
Conditionally Rare in High Grade**

- 3617 1919-D AU58 PCGS.** From a smallish mintage of 1.1 million pieces, the 1919-D Walking Liberty half dollar was not a well-produced issue and few high-quality examples have survived. This attractive near-Mint specimen shows little actual wear, but the piece exhibits the usual softness on the central devices. The lustrous, lightly toned surfaces are lightly abraded. NGC ID# 24PZ, PCGS# 6578

**1919-S Half Dollar, MS63+  
Splendid Original Surfaces**

- 3618 1919-S MS63+ PCGS. CAC.** The central devices are typically weak on the Walkers from the first few years. Such is the case with this Select Mint State 1919-S, although the thumb at the center of the obverse is nearly fully outlined, suggesting a stronger than normal strike. This pleasing piece has natural ivory surfaces with frosty mint luster and delicate gold toning that gathers near the borders. NGC ID# 24R2, PCGS# 6579

**1920-S Half Dollar, MS64  
Elusive in High Grades**

- 3619 1920-S MS64 PCGS.** A blush of golden color along the left obverse border and a dark toning spot on the eagle's trailing leg interrupt the otherwise total brilliance of this Choice Uncirculated 1920-S Walking Liberty half dollar. Numerous mint-made die polish lines appear within the upper reverse legend. Liberty's head, branch hand, and the top portions of the date digits show incompleteness, as usual. Softly frosted luster radiates over each side. Most of the 4.6 million 1920-S half dollars struck saw extensive circulation. NGC ID# 24R5, PCGS# 6582

**1921 Half Dollar, MS64  
High-End for the Grade**

- 3620 1921 MS64 PCGS.** Detail is impressively sharp on this Choice 1921 Walker, especially on Liberty's head and branch hand, and on the eagle's trailing leg. Softly frosted luster shimmers in-hand, illuminating delicate pastel tones on each side. The coin is exceptionally well preserved for the grade, producing eye appeal that rivals some Gems that we have seen. NGC ID# 24R6, PCGS# 6583

- 3621 1921-D VF35 NGC.** Just 208,000 pieces were struck — the lowest mintage of any Walking Liberty half — making the 1921-D a true demand rarity within the series. This Choice VF example is a terrific collector-grade coin, sharply defined and minimally marked for the grade. Pleasing old-silver color deepens slightly around the raised elements. NGC ID# 24R7, PCGS# 6584

**1921-D Walking Liberty Half, AU55  
Low-Mintage Key**

- 3622 1921-D AU55 PCGS. CAC.** From a memorably low mintage of 208,000 pieces, the 1921-D Walking Liberty half dollar is one of the most challenging issues of the series in Mint State grades. This attractive Choice AU specimen exhibits some light high-point wear on the well-detailed design elements and the lightly abraded surfaces are lustrous and softly toned. NGC ID# 24R7, PCGS# 6584

**1929-S Half Dollar, MS65+  
Brilliant With Crisp Detail**

- 3623 1929-S MS65+ PCGS.** Nearly twice as many Walking Liberty half dollars were struck at the San Francisco Mint in 1929 as were produced in Denver, but the two issues are about equally available. Actually, the S-mint coins slightly edge out the Denver halves in Mint State condition. This high-end Gem is brilliant with crisp detail on Liberty's head and sandals. The branch hand, upper gown lines, and the eagle's leg feathers are a touch soft. Minor chatter in the field near (LIBER)T(Y) defines the grade.  
*Ex: FUN Signature (Heritage, 1/2016), lot 5776, where it realized \$2,585. NGC ID# 24RD, PCGS# 6590*

- 3624 1938-D MS66 PCGS.** The 1938-D Walking Liberty half dollar was heavily saved by collectors when knowledge of its low mintage of 491,600 pieces became widespread. This delightful Premium Gem exhibits sharply detailed design elements in most areas, with just a touch of the usual softness on the wreath hand. The well-preserved, lustrous surfaces show a few hints of beige toning. PCGS has graded 51 numerically finer examples (3/19). NGC ID# 24RV, PCGS# 6605

**1939 Half Dollar, MS68  
Delicately Toned Registry Candidate**

- 3625 1939 MS68 NGC.** An available date overall, the 1939 Walking Liberty half dollar is conditionally rare in MS68, the finest numerical grade achieved at either leading certification service. This piece is a must-have Registry coin. Satiny luster yields golden toning, sharp design elements glisten amid cartwheel luster, and a lack of abrasions confirms the incredible technical quality. Census: 22 in 68 (1 in 68★), 0 finer (2/19). NGC ID# 24RW, PCGS# 6606
- 3626 1942 MS67+ PCGS. CAC.** This Plus-graded Superb Gem exhibits unusually sharp definition on Liberty's wreath hand, with clear separation between the thumb and fingers. The virtually pristine surfaces are lustrous and appealing. PCGS has graded seven numerically finer examples (3/19). NGC ID# 24S6, PCGS# 6614 Base PCGS# 6614

**1944-D Half Dollar, Satiny MS67+  
CAC-Approved Registry Coin**

- 3627 1944-D MS67+ PCGS. CAC.** This Denver issue is usually available in MS67, but Plus-graded coins are rare. PCGS and NGC each report only a single finer representative (3/19). This CAC coin displays a bold strike and satiny, champagne-tinted mint luster. Eye appeal is outstanding. A prime Registry Set contender and among the finest collectible examples of the date. NGC ID# 24SD, PCGS# 6622 Base PCGS# 6622
- 3628 1945-D MS67+ NGC.** Satin-smooth with softly lustrous, pearlescent-silver surfaces and a sprinkling of golden-gray patina, this high-end Superb Gem half is boldly struck for a 1945-D, an issue that will never win any awards for the quality of its strike. The attractive surfaces are nearly mark-free, and this Denver Mint date is seldom seen in a finer grade. Census: 9 in 67+, 3 in 67★, 2 in 67+★, 3 finer (3/19). NGC ID# 24SG, PCGS# 6625
- 3629 1945-D MS67+ NGC. CAC.** The 1945-D Walking Liberty half dollar is plentiful in MS67, but coins with the Plus designation are rare and highly sought-after for Registry Sets. Only four coins are numerically finer at NGC (three coins) and PCGS (one coin) combined, increasing the importance of the current piece. This is one of the finest coins to receive CAC endorsement (2/19). The strike is sharp, and the frosty surfaces showcase brilliant, blazing cartwheel luster. Eye appeal is exceptional. NGC ID# 24SG, PCGS# 6625

- 3630 1945-S MS67 NGC.** Knob S. The skirt lines are unusually well struck for this World War San Francisco issue. Liberty's head is also sharp. Only the branch hand shows softness. The lustrous and practically pristine surfaces are bathed in fire-red, aquamarine, and lavender shades. NGC ID# 24SH, PCGS# 6626

**1946-D Half Dollar, MS67+  
Attractive Border Toning**

- 3631 1946-D MS67+ PCGS.** The 1946-D Walking Liberty half dollar is only marginally scarce in MS67, but at PCGS, just 10 coins in this grade are Plus-designated. Neither PCGS nor NGC list a finer example (3/19). This coin is boldly struck and luminous with original mint luster. A faint champagne hue over the interiors cedes to vivid gold and multicolor toning around the borders. A beautiful two-sided toning display. NGC ID# 24SK, PCGS# 6628
- 3632 1946-S MS67+ NGC.** Original, satiny mint luster illuminates the faintest trace of light golden toning on this high-end Superb Gem, with a few flecks of russet apparent around the outer peripheries. Typical of the issue, minor strike softness affects Liberty's head, the branch hand, and the eagle's trailing leg. Nonetheless, eye appeal is in keeping with the grade. Census: 80 in 67 (2 in 67+, 4 in 67★), 0 finer (2/19). NGC ID# 24SL, PCGS# 6629
- 3633 1946-S MS67 PCGS. CAC.** Knob S. Peripherally patinated in golden-brown and sea-green freckles. The centers remain white. Well struck for an S-mint Walker, although the branch hand fingers are blended. Careful rotation reveals only delicate marks. Population: 91 in 67 (4 in 67+), 0 finer. CAC: 36 in 67, 0 finer (2/19). NGC ID# 24SL, PCGS# 6629
- 3634 1946-S MS67 PCGS. CAC.** The 1946-S Walker, common in lower grades, is conditionally scarce in MS67 and rare so fine with CAC endorsement. This piece displays shimmering original luster and unabraded surfaces. Although some strike weakness is apparent in the usual places, the coin is appealing due to light golden toning across the interiors and sea-green and amber hues around the borders. Population: 94 in 67 (4 in 67+), 0 finer. CAC: 36 in 67, 0 finer (3/19). NGC ID# 24SL, PCGS# 6629
- 3635 1947 MS67 PCGS.** The obverse displays dramatic lemon-gold, cherry-red, and lime-green patina. The reverse border displays similar but less ostentatious colors. The central reverse is powder-blue. This final-year Walking Liberty half dollar exhibits potent luster and is remarkably close to pristine. Population: 90 in 67 (10 in 67+), 0 finer (3/19). NGC ID# 24SM, PCGS# 6630
- 3636 1947 MS67 PCGS. CAC.** Not particularly well-produced by the Philadelphia Mint, most 1947 halves are weakly struck with no more than 60% definition on the strike-sensitive areas of the motifs. This Superb Gem example is far sharper than that, with attractive reddish-tan accents over silver-blue, smooth surfaces. CAC endorsement confirms the high quality. Neither grading service has certified any numerically finer 1947 pieces (3/19). NGC ID# 24SM, PCGS# 6630

**1947-D Half Dollar, MS67+  
Gorgeous Final-Year Registry Coin**

- 3637 1947-D MS67+ NGC. CAC.** The eye appeal of this terrific Superb Gem matches its outstanding, nearly unsurpassed technical quality. Rich crimson, orange, violet, yellow, and green hues appear mottled over satiny, smooth surfaces with splashes of brilliance throughout. Strong detail is noted on Liberty's head and branch hand. Census: 64 in 67 (7 in 67+, 4 in 67★), 1 finer. CAC: 28 in 67, 0 finer (3/19). NGC ID# 5ESK, PCGS# 6631

**PROOF WALKING LIBERTY  
HALF DOLLARS**

- 3638 1936 PR65 PCGS.** A needle-sharp Gem example of the first proof Walking Liberty half dollar. Proof coinage amounted to only 3,901 pieces in 1936, and this issue is the scarcest proof Walker in high grade. This Gem is deeply mirrored and has a light champagne hue on each side. Modest cameo contrast is apparent on the obverse. NGC ID# 27V4, PCGS# 6636

- 3639 1936 PR65 PCGS.** Original Gem proofs are rare in the context of the 1936-1942 series. This piece displays an occasional speckle of tan-gold color over highly reflective, well-preserved surfaces. The design elements are crisply impressed throughout, as expected from a proof. Strong overall eye appeal.  
*Ex: National Money Show Signature (Heritage, 3/2007), lot 1156, where it sold for \$4,887.50. NGC ID# 27V4, PCGS# 6636*

- 3640 1936 PR65 PCGS. CAC.** *Ex: Norweb.* A brilliant Gem that exhibits substantial contrast between the glassy fields and frosty motifs. Struck during the first year of Walking Liberty half dollar proof production. The key date of the proof series.  
*Ex: Norweb Collection, Part III (Bowers and Merena, 11/1988), lot 3703, which realized \$5,940. NGC ID# 27V4, PCGS# 6636*

**1936 Half Dollar, PR66  
Blushes of Pastel Color**

- 3641 1936 PR66 PCGS. CAC.** Certified Acceptance Corporation has endorsed this Premium Gem proof for its quality within the grade. Both sides appear pristine with blushes of pastel blue, violet, green, and gold throughout. Eye appeal is excellent. From the first proof mintage in the Walker half dollar series (3,901 specimens). Encapsulated in a green label holder.  
**From The William Rehwald Proof Set Collection.** NGC ID# 27V4, PCGS# 6636

**1938 Half Dollar, PR68  
Tied for the Finest Certified**

- 3642 1938 PR68 NGC.** *Ex: M.L. Middleton Collection.* A gorgeous Superb Gem proof, this brilliant mirrored half dollar exhibits wispy peripheral gold toning that frames the bright silver centers with a trace of contrast between the fields and devices. Census: 55 in 68 (8 in 68★), 0 finer (3/19). NGC ID# 27V6, PCGS# 6638

**1939 Walking Liberty Half, Brilliant PR68**

- 3643 1939 PR68 NGC.** The obverse of this high-end proof favors a Cameo designation, although the reverse is less-contrasted. Both sides are brilliant and almost flawlessly preserved, and also show a sharp strike. A truly beautiful proof Walker. NGC has certified only a single numerically finer representative (2/19).  
*Ex: FUN Signature (Heritage, 1/2012), lot 5955. NGC ID# 5ESU, PCGS# 6639*

- 3644 1940 PR67+ PCGS. CAC.** The Mint struck 11,279 proof Walking Liberty half dollars in 1940. Superb Gem survivors are plentiful to a certain extent, although Plus-graded CAC coins are scarce. The piece offered here displays full definition and deeply reflective fields. Light golden toning on each side complements daubs of autumn-orange and russet around the borders. NGC ID# 27V8, PCGS# 6640

- 3645 1940 PR68 NGC.** Exquisite peach-gold toning dominates the obverse, along with glimpses of lime-green and cherry-red patina. The reverse is brilliant except for russet-brown patina along the rim. Fully struck and flashy. The designer's monogram was hand-engraved on the working reverse die, similar to the FS-901 1944-D. Certified in a circa-2000 holder. Census: 59 in 68 (4 in 68★), 0 finer (3/19). NGC ID# 27V8, PCGS# 6640

- 3646 1941 PR67+ NGC. CAC.** No AW. A majority of proof 1941 half dollars lack the designer's monogram, which was inadvertently lapped away during die preparation. A brilliant Superb Gem with smooth, glassy fields and an intricate strike.  
*Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4041; Long Beach Signature (Heritage, 9/2013), lot 4316, which realized \$1,298.38. NGC ID# 24SP, PCGS# 6641*

**1941 Walking Liberty Half, PR68  
Popular No AW Monogram Variant**

- 3647 1941 PR68 NGC. CAC.** No AW monogram. Although both sides of this Superb Gem proof have toning that is best described as wispy, the presentation is multihued, suggesting a fog-shrouded rainbow. Only one piece is numerically finer at NGC, there are no finer examples certified at PCGS. Census: 84 in 68 (18 in 68 ★, 1 in 68+ ★), 1 finer (2/19).

*Ex: December Signature (Heritage, 12/2011), lot 3094; ANA Signature (Heritage, 8/2016), lot 4967. NGC ID# 24SP, PCGS# 6641*

- 3648 1942 PR68★ NGC.** The year 1942 saw the final proof coinage in the Walking Liberty half series. The mintage was high — 21,120 coins — and many pieces exhibit outstanding strike quality. In fact, NGC lists six Cameos in grades from PR62 to PR67. This Star-graded PR68 coin nearly earns a Cameo designation as well, although NGC opted to grant it a Star instead as the reverse contrast is slightly less prominent than the obverse, where Liberty's satiny figure stands out from the mirrored fields. This proof is fully struck and virtually flawless with a light golden hue over each side. NGC lists eight numerically finer 1942 proofs (2/19). NGC ID# 282G, PCGS# 6642

- 3649 1942 PR68 NGC. CAC.** Both sides display compelling peripheral arcs of fire-red, orange-gold, powder-blue, and apple-green toning. The fields and devices show light olive-gray hues. A well-struck and immaculate final-year proof type coin. NGC ID# 282G, PCGS# 6642

**FRANKLIN HALF DOLLARS**

**1949-S Franklin Half Dollar, MS67  
Registry Grade Full Bell Lines Example**

- 3650 1949-S MS67+ Full Bell Lines PCGS. CAC.** Iridescent shades of lavender-gray, sea-green, and golden-tan toning blanket the impeccably preserved surfaces of this Plus-graded Superb Gem, with vibrant mint luster underneath. The design elements are sharply detailed, with full definition on the bell lines. Population: 12 in 67 (3 in 67+) Full Bell Lines, 0 finer. CAC: 8 in 67, 0 finer (2/19). NGC ID# 24SV, PCGS# 86655 Base PCGS# 86655

**1952-D Franklin Half Dollar, MS67  
Tied for Finest With Full Bell Lines**

- 3651 1952-D MS67 Full Bell Lines NGC.** Shades of sea-green, lavender-gray, and magenta toning blanket the surfaces of this spectacular Superb Gem, with most of the color on the obverse. The design elements are sharply detailed, with full definition on the bell lines. Vibrant mint luster shines through the patina. Census: 2 in 67 Full Bell Lines, 0 finer (3/19). NGC ID# 24T4, PCGS# 86662

- 3652 1952-S MS67 PCGS.** Even without Full Bell Lines, the 1952-S Franklin half dollar is scarce in MS67, and no numerically finer pieces are reported at PCGS (2/19). This example is beautifully frosted and virtually flawless, glowing with luminous mint luster on each side. The obverse displays a faint lilac hue across the interiors with gold at the peripheries. On the reverse, vivid crimson and forest-green borders surround mottled olive interior toning. Population: 34 in 67 (4 in 67+), 0 finer; 3 in 67 Full Bell Lines, 0 finer (2/19). NGC ID# 24T5, PCGS# 6663

- 3653 1956 MS67 Full Bell Lines PCGS. CAC.** Since no numerically finer 1956 halves with Full Bell Lines have been seen by either service, the CAC endorsement of this Superb Gem coin takes on added importance. Originally toned in iridescent shades with red, forest-green, and pale-blue hues, this smoothly frosted Registry-quality coin offers superior eye appeal. Population: 49 in 67 (3 in 67+) Full Bell Lines, 0 finer. CAC: 39 in 67, 0 finer (3/19). NGC ID# 6L33, PCGS# 86671

**1958-D Half Dollar, MS67 Full Bell Lines  
Exceptional Toning**

- 3654 1958-D MS67 Full Bell Lines PCGS.** This Superb Gem remained in his cardboard Mint Set holder for many years, or it was stored in a paper envelope for decades. Either way, it has acquired stunning green, blue, gold, and rose toning, and displays an exceptional strike. This example is tied for the finest that PCGS has graded and we can't imagine any with a higher degree of aesthetic appeal. Population: 89 in 67 (7 in 67+) Full Bell Lines, 0 finer (2/19). NGC ID# 5HNM, PCGS# 86675

**1960-D Half Dollar, MS66 Full Bell Lines  
Lovely Obverse Toning**

- 3655** 1960-D MS66 Full Bell Lines PCGS. Iridescent apple-green, lemon-gold, and fire-red shades alternate about the obverse. The reverse remains brilliant. The dramatic end-of-roll obverse toning will please the experienced collector. Lustrous and crisply struck with exemplary preservation. Population: 48 in 66 (3 in 66+) Full Bell Lines, 1 finer (2/19). NGC ID# 24TM, PCGS# 86679

**PROOF FRANKLIN HALF DOLLARS**

**1950 Half Dollar, PR66 Cameo  
Scarce First-Year Issue**

- 3656** 1950 PR66 Cameo NGC. CAC. The 1950 is seldom found with contrasted surfaces, and is highly collectible as such. This is a splendid, razor-sharp Premium Gem that has fully frosted devices and seamless mirrored fields. The surfaces are untuned and devoid of mentionable contact marks. Census: 74 in 66 Cameo (2 in 66+, 4 in 66★), 21 finer. CAC: 40 in 66, 18 finer (3/19). Ex: ANA Signature (Heritage, 7/2005), lot 6501, where it realized \$2,760. NGC ID# 6L9N, PCGS# 86691

**1954 Half Dollar, PR68 Ultra Cameo  
Tied for Finest at Both Grading Firms**

- 3657** 1954 PR68 Ultra Cameo NGC. The population of top-graded PR68 Ultra or Deep Cameo 1954 half dollars is limited to 16 submissions each at NGC and PCGS. That total is probably somewhat inflated by unsuccessful attempts at a higher grade. The stark black-and-white surfaces are impressive for a relatively early Franklin half. Typical die polish lines appear on the portrait and bell. Census: 16 in 68 Ultra Cameo (1 in 68+★), 0 finer (3/19). NGC ID# 27VE, PCGS# 96695

**1955 Franklin Half, PR68 Deep Cameo  
Among the Finest at PCGS**

- 3658** 1955 PR68 Deep Cameo PCGS. CAC. This magnificent PR68 Franklin half dollar exhibits sharply detailed, richly frosted design elements that contrast profoundly with the deeply reflective fields to create an intense cameo effect. The brilliant surfaces are impeccably preserved and overall eye appeal is terrific. Population: 39 in 68 (1 in 68+) Deep Cameo, 0 finer. CAC: 27 in 68, 0 finer (2/19). NGC ID# 27VF, PCGS# 96696

- 3659** 1956 Type One PR68 Cameo NGC. The low relief eagle identifies the scarcer Type One reverse. This spectacular PR68 example exhibits sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields. The brilliant surfaces are impeccably preserved. NGC ID# 24TV, PCGS# 86686

**KENNEDY HALF DOLLAR**

**1964 Kennedy Half, MS67+  
None Certified Finer**

- 3660** 1964 MS67+ PCGS. Type One Reverse. 1964 half dollars were struck in prodigious quantity, to help satisfy the demand from mourners of the late president. Many were melted circa-1980 when silver prices peaked. Few are as close to pristine as the present Superb Gem, which displays exquisite orange-gold and aquamarine peripheral patina. Population: 81 in 67 (5 in 67+), 0 finer (2/19). NGC ID# 27WH, PCGS# 6706

**PROOF KENNEDY HALF DOLLAR**

- 3661** 1964 PR69 Ultra Cameo NGC. Type Two Reverse. A stone-white and pristine example of the introductory-year proof Kennedy half dollar. Frosty devices rise in full detail above prominently mirrored fields. Ideal for the advanced Registry collector. NGC ID# 24WF, PCGS# 96800

**End of Session One**

# SESSION THREE

## EARLY DOLLARS

- 3990** 1795 Flowing Hair, Two Leaves, B-4, BB-14, R.4, PCGS Genuine. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VG specimen with a few old hits in the right obverse field that prevent a numeric grade. Smooth slate-gray surfaces are the order of the day, and the coin is otherwise pleasing. Wear is even on the obverse, while the reverse border is slightly weak in places. An affordable Two Leaves *Guide Book* type coin.

1795 Flowing Hair Dollar, Fine 15  
Two Leaves Variant, B-1, BB-21

- 3991** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, Fine 15 PCGS. Bowers Die State I. Russet and royal-blue toning combine for richly toned fields throughout this Choice Fine early dollar. Smoothly worn, light-gray devices provide welcome contrast with the deep patina. The devices are well-defined for the assigned grade, and marks are limited to a few light ticks and stray hair-thin lines. A minor rim ding at 2 o'clock on the obverse is the sole mark of individual note. The BB-21 variety is a popular Two Leaves die marriage for Flowing Hair type, and features a mis-entered 1 beneath 7 in the date — visible with a loupe on this example. *From The Morris Collection.* NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

1795 Flowing Hair Dollar, Fine 12  
Three Leaves, B-5, BB-27

- 3992** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Fine 12 NGC. Bowers Die State III. The long bar in the field near the top curl identifies the popular BB-27 variety. The BB-27 is one of the most available varieties of the series. This impressive specimen exhibits some interior detail in the upper and lower portions of Liberty's hair, but most of the middle portion is worn smooth. The pleasing surfaces are remarkably smooth, with highlights of amber and lavender-gray toning at the peripheries. *From the Lake County Collection.* NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 Flowing Hair Dollar, Fine 12  
B-5, BB-27, Three Leaves Reverse

- 3993** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Fine 12 PCGS. Readily attributed by the broad die line or “bar” behind the highest neck curl. Deeply toned in blended sea-green, gunmetal-blue, and almond-gold shades. Evenly worn and generally smooth though we note thin marks near the upper-left stars and UNITED. *Ex: Long Beach Signature (Heritage, 2/2007), lot 3585; Long Beach Signature (Heritage, 9/2012), lot 4618.* NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 Flowing Hair Dollar, VF30  
B-5, BB-27, Three Leaves

- 3994** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF30 PCGS. CAC. Bowers Die State II, as often seen on this plentiful Three Leaves issue. The CAC-approved coin offered here is ideal for representing the Flowing Hair design type, as most major details are intact. The coin is well-struck and does not have any significant planchet adjustment marks other than a couple of diagonal ones across the central reverse. A few small scratches are also visible in this area. Hints of gold and olive accent otherwise champagne-gray surfaces and eye appeal is pleasing. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

- 3995** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Plugged — NGC Details. XF Bowers Die State II, with a die line beneath the left stem that extends toward rim. The raised die line in the left obverse field easily identifies this plentiful variety. XF sharpness remains, but the coin has been holed and plugged at 12 o'clock. The E in LIBERTY is reconstructed.

**1795 Draped Bust Dollar, VF Details  
B-14, BB-51, Off-Center Portrait**

- 3996** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2 — Obverse Scratched — NGC Details. VF. "Bowers Die State II," clashed. A *Guide Book* variety with the bust of Liberty off-center in the obverse die. This piece is evenly worn with natural pewter-gray patina that lightens over the relief elements. A couple of old pinscratches in the obverse field beneath Liberty's chin prevent a numeric grade for this otherwise attractive Draped Bust type coin. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

**1795 Draped Bust Dollar, XF40  
B-14, BB-51, Off-Center Bust**

- 3997** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, XF40 PCGS. Die State II, clashed. This is a famous *Guide Book* variety, one of only two Draped Bust die pairings produced in 1795. The present piece is evenly struck and well-centered, showing complete dentils around each side. Interior sharpness is excellent for the grade, and the surfaces are smooth and problem-free. Hints of gold emerge from pleasing pewter-gray toning. Remnants of adjustment marks can be seen along the right-hand obverse border and within the recesses of Liberty's hair curls.  
Ex: FUN Signature (Heritage, 1/2016), lot 4194, where it brought \$6,756.25. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

**1795 Draped Bust Dollar, VF20  
Centered Portrait, B-15, BB-52**

- 3998** 1795 Draped Bust, Centered, B-15, BB-52, R.2, VF20 PCGS. Bowers Die State IV. The two 1795 Draped Bust dollar die varieties are quickly identified by the centering of the portrait (or lack thereof). This is the second variant (BB-52) in a late die state with a knife-like extension on the large break in Liberty's hair right of the ribbon. Smooth fields display mostly medium gray patina with faint golden accents. The highest areas of Liberty's hair and bust, and the eagle show normal wear for the grade. Three as-made adjustment marks occur at the central reverse. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

- 3999** 1795 Draped Bust, Centered, B-15, BB-52, R.2 — Repaired - Whizzed — ANACS. VF35 Details. Bowers Die State IV. The surfaces show microporosity in the fields, while the devices are overly smooth from whizzing. Light-gold toning deepens to golden-tan and gray shades at the borders for a surprising amount of eye appeal. Sharp definition remains intact for the motifs, which are smoothed at the high points but well-defined in most other aspects. This is an affordable yet well-detailed 1795 Centered Bust dollar.

**1796 Silver Dollar, VG10  
B-4, BB-61, Small Date, Large Letters**

- 4000** 1796 Small Date, Large Letters, B-4, BB-61, R.3, VG10 NGC. Bowers Die State I. This stone-gray Small Eagle silver dollar displays hints of charcoal toning in design recesses. Some hair definition remains, and all legends are bold. A slight rim knock above the E in LIBERTY provides the sole mentionable mark. The only collectible 1796 Large Letters variety, since Bolender-6 is a formidable rarity. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

- 4001** 1796 Small Date, Large Letters, B-4, BB-61, R.3 — Altered Surfaces — PCGS Genuine. VF Details. Bowers Die State I. Dusky chestnut-brown and stone-gray toning blanket this moderately circulated Small Eagle early dollar. We note a cluster of wispy marks on the reverse exergue, and a letter V entered below the second S in STATES. Parallel adjustment marks (as made) cross the central obverse.

**1796 Small Date, Large Letters Dollar, VF30 Details  
B-4, BB-61**

- 4002** 1796 Small Date, Large Letters, B-4, BB-61, R.3 — Cleaned — ANACS. VF30 Details. Bowers Die State I. Mostly pearl-white, though the obverse shows pale tan freckles. The left obverse field is somewhat glossy, the eagle's body is a bit bright, and the surfaces exhibit occasional microgranularity. Mentionable marks are confined to small edge knocks at 3 o'clock and 5:30 on the obverse, and at 5:30 on the reverse.

**1797 B-1, BB-71 Silver Dollar, XF45  
Ten Stars Left, Six Stars Right**

- 4003 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, XF45 NGC.** Only three die varieties are known for the 1797 silver dollars, and each is a distinctive *Guide Book* type. This Choice XF has 10 stars left of the portrait, and six stars right. Noticeable luster remains in the light gray fields of this attractive Small Eagle dollar, with light peripheral gold and blue toning. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

**1797 Draped Bust Dollar, Fine 15  
9x7 Stars, Large Letters, B-1, BB-73**

- 4004 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, Fine 15 PCGS.** Bowers Die State IV, with several die cracks through the hair ribbon and a light crack through the second T in STATES. The 9x7 arrangement of the obverse stars and the Large Letters in the reverse legend identify the variety. The high points of the design show extensive wear, but some interior detail can still be distinguished in the hair near the neck and the drapery lines. The pleasing lavender-gray surfaces are lightly abraded. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

**1798 Heraldic Eagle Dollar, Toned AU53  
Pointed 9, B-13, BB-108**

- 4005 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, AU53 NGC.** Bowers Die State IV. Struck from a late state of the obverse die and from a lightly relapped reverse die. The BB-108 variety is readily available in grades through the About Uncirculated level, but is rare when Uncirculated. This AU53 example is richly toned in bluish-brown shades with golden highlights in protected areas. Traces of mint luster survive. Sharply defined and well-centered, this example shows a few light marks commensurate with the grade. It retains nice, original eye appeal. NGC ID# 24X6, PCGS# 40025 Base PCGS# 40018

- 4006 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, VF25 NGC.** Bowers Die State II. Weakness at the borders makes confirmation of the reverse die state challenging. The obverse shows smooth wear, particularly along the tops of LIBERTY and the upper dentils. Likewise, the reverse lacks definition along the rims and the tops of the legend. The centers are far sharper, with original brownish-gray toning evenly distributed throughout both sides. There are no distracting or heavy marks. NGC ID# 24X6, PCGS# 40030 Base PCGS# 40018

- 4007 1798 Large Eagle, Pointed 9, B-14, BB-122, R.3, Fine 15 NGC.** Bowers Die State IV. A dull crack travels up from star 2 to star 6, and another crack connects the centers of stars 4 and 5. BB-122 is a collectible die pair with the leaf tip under the left foot of the I in AMERICA and the arrowhead under the left foot of the N in UNITED. Olive accents accompany the varying shades of steel-gray patina that dominate this Draped Bust dollar. Design detail is good for the grade, and marks are minimal. NGC ID# 24X6, PCGS# 40039 Base PCGS# 40018

**1799 B-18, BB-154 Dollar, XF45  
7x6 Stars, 60 to 100 Pieces Extant**

- 4008 1799 7x6 Stars, B-18, BB-154, R.4, XF45 PCGS.** Bowers Die State III. The usual die state with a heavy crack through the space between (UNIT)ED to the scroll and wing. Bowers describes a key diagnostic marker in italics in his updated *Silver Dollar Encyclopedia* (2013): "Highest curl on top of head is centered under right edge of E and space between E and R, the farthest right of any 1799 obverse." He also calls this the "second rarest die variety of 1799" after BB-151, with just 60 to 100 pieces extant. This partly lustrous Choice XF dollar is sharp everywhere except the very centers. Shades of antique golden-gray patina attractively cover each side. NGC ID# 24X7, PCGS# 40046 Base PCGS# 6878

**1799 B-12, BB-160 Silver Dollar, AU58  
Sans Berries Reverse**

**4009** 1799 7x6 Stars, B-12, BB-160, R.3, AU58 NGC. Bowers Die State IV, also known as Bolender-12b. The obverse die, used only for BB-160, shows most of the Die State IV cracks recorded in the Bowers reference, with a short curved die crack from star 10 to the border that is not mentioned for any die state. The reverse die was used for BB-158 and BB-159, then lapped, removing the berries, and used for BB-160 and BB-161. The majority of surviving examples from these dies exhibit myriad obverse die cracks. This near-Mint representative has rich gold-gray toning with blue overtones and nearly full underlying luster. A highly appealing representative. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

**4010** 1799 7x6 Stars, B-6, BB-162, R.4, VF30 PCGS. Bowers Die State IV. A very scarce die marriage often attributed by the radial die crack on the reverse at 1 o'clock. This appealing midgrade silver-gray representative displays a field tick beneath the chin and a narrow mark on the shield, but otherwise shows only incidental contact. NGC ID# 24X7, PCGS# 40053 Base PCGS# 6878

**4011** 1799 7x6 Stars, B-17, BB-164, R.2, VF25 PCGS. Bowers Die State II, with a die crack through UN in UNITED. This impressive VF25 example shows the left side of the drapery worn smooth in places, but much interior detail remains intact in Liberty's hair. The pleasing lavender-gray surfaces are lightly abraded. Population (for the variety): 5 in 25, 13 finer (3/19). NGC ID# 24X7, PCGS# 40055 Base PCGS# 6878

**4012** 1799 7x6 Stars, B-17, BB-164, R.2, VF25 PCGS. Bowers Die State IV. A multitude of reverse die cracks determine the late (but not latest) die state. This is a smoothly worn VF example, with evenly distributed golden-gray toning and sparse areas of deep build-up around the raised devices. The strike is minimally off-center south on the obverse, north on the reverse. A few small marks are incidental at this grade level, while all of the motifs are well-detailed for the assigned grade. NGC ID# 24X7, PCGS# 40055 Base PCGS# 6878

**4013** 1799 7x6 Stars, B-8, BB-165, R.3, VF25 PCGS. Bowers Die State II. A charming silver-gray representative with occasional glimpses of deeper toning. Only a few ticks are apparent, though the rim near 2 o'clock displays two minor knocks. The URI in PLURIBUS is worn, but the remainder of the legends are sharp. NGC ID# 24X7, PCGS# 40056 Base PCGS# 6878

**4014** 1799 7x6 Stars, B-9, BB-166, R.1, VF30 PCGS. Bowers Die State V. Bolender-9 is often called the "Apostrophe" variety, due to a narrow, vertical die break after the second S in STATES. The obverse is equally memorable, because of lengthy spindly die cracks near the chin and right-side stars. An attractive midgrade example bathed in rich blue-green, golden-brown, and steel-gray shades. *From The Morris Collection.* NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

**4015** 1799 7x6 Stars, B-14, BB-167, R.3, VF20 NGC. Bowers Die State II. The reverse and the obverse border are steel-gray, but the obverse field and portrait are stone-white. Sharper than usual for the VF20 level, with all letters in E PLURIBUS UNUM distinct. The surfaces are refreshingly unabraded, though the obverse has a few slight rim knocks, most noticeable above the Y in LIBERTY. NGC ID# 24X7, PCGS# 40058 Base PCGS# 6878

**1800 B-16, BB-187 Dollar, VF35**

**4016** 1800 B-16, BB-187, R.2, VF35 PCGS. Bowers Die State III. Doubling at the base of (UNI)T(ED), die lumps near the second S in STATES, and star 7 is distant from L(IBERTY), diagnostic of BB-187. The middle die state features a curved die crack from the second 0 in the date to star 10, and a small die break between ES in STATES. Bright silvery surfaces display even friction over the high points, but the stars and hair curls remain bold. Each side shows numerous wispy marks. NGC ID# 24X9, PCGS# 40073 Base PCGS# 6887

**4017** 1800 B-8, BB-188, R.4, VF30 PCGS. Bowers Die State IV. The coloration of this midgrade BB-188 dollar is especially pleasing, olive-gray and tan-gold toning in the fields with lighter hues over the worn relief elements. The strike is sharp, and bold detail remains on the devices. There are no adjustment marks, and the only mentionable flaws are a few light marks on Liberty's neck and cheek. Visual appeal exceeds expectations. *Ex: Dallas Signature (Heritage, 10/2016), lot 3935, which realized \$2,115.* NGC ID# 24X9, PCGS# 40074 Base PCGS# 6887

- 4018** 1800 AMERICA1, B-19, BB-192, R.2, VF25 NGC. Bowers Die State III. The more plentiful of the two AMERICA1 varieties and an important *Guide Book* coin. This midgrade BB-192 dollar displays attractive slate-gray coloration that deepens in the protected portions of the fields. The strike is sharp and even, well-centered with complete border dentils on each side. Wear is consistent with the grade, but the design elements retain excellent detail for the VF level. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

**1800 B-19, BB-192 Silver Dollar, AU Details  
Famous AMERICA1 Reverse**

- 4019** 1800 AMERICA1, B-19, BB-192, R.2 — Cleaned — NGC Details. AU. A stray die line follows AMERICA on the reverse die, suggesting the unusual AMERICA1 spelling. There is no conclusive proof for the source of the unusual die line. Some have suggested a widely repunched final A, but the curves in the die line are different than the curves in the A punch. Here is another numismatic mystery waiting for a solution. This light gray silver dollar has been cleaned with matte-like surfaces.

- 4020** 1800 Dotted Date, B-14, BB-194, R.3 — Repaired, Whizzed — ANACS. XF40 Details. Bowers Die State IV. An important *Guide Book* variety, the BB-194 Dotted Date die marriage is always in demand among early dollar collectors. This example has overly smooth, stone-white surfaces with medium-gray patina outlining the stars and other raised elements. Some faint tooling on Liberty's portrait and in the nearby fields requires a loupe for viewing. The motifs are well-defined despite the noted whizzing and the coin's late die state.

**1800 10 Arrows Dollar, VF30  
B-15, BB-195, High-End Example**

- 4021** 1800 10 Arrows, B-15, BB-195, R.4, VF30 PCGS. CAC. Bowers Die State I, with bold dentils and die lumps between the final S in STATES and the O in OF. The presence of 10 arrows on the reverse, three of which are detached, confirms this scarce die pair. This pleasing VF Draped Bust dollar features delicate steel-gray and golden-tan patina over smooth, well-detailed surfaces. High-end for the grade, as affirmed by the CAC endorsement. NGC ID# 24X9, PCGS# 40080 Base PCGS# 6891

**1802 Narrow Date Dollar, XF40  
B-6, BB-241, Colorful Patina**

- 4022** 1802 Narrow Date, B-6, BB-241, R.1, XF40 PCGS. Bowers Die State III. Rich power-blue, plum-red, and chestnut-brown toning accompany this well-defined Heraldic Eagle type coin. Marks are absent save for unobtrusive lines beneath the branch stem and west of the shoulder curl. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

- 4023** 1803 Large 3, B-6, BB-255, R.2, VG10 NGC. Bowers Die State I. The obverse is unique to this die pair. It features repunching on the base of the 3. Alternating shades of light and dark gray patina are natural and appealing, generating good eye appeal for an otherwise well-circulated coin. Partial portrait and feather detail remains. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

**1803 Draped Bust Dollar, XF40  
Sharp Detail, Large 3, B-6, BB-255**

- 4024** 1803 Large 3, B-6, BB-255, R.2, XF40 PCGS. Bowers Die State I, with no visible die cracks through the right-side obverse stars. This lightly circulated 1803 Draped Bust dollar displays a sharp strike and little wear, appearing high-end for the grade. Mottled lavender-gray and olive-gold toning on each side complements remnants of satiny luster, and there are no bothersome abrasions. The reverse is rotated slightly counterclockwise. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

## GOBRECHT DOLLARS

1836 Gobrecht Dollar, XF Details  
Judd-60 Original, Scarce Die State B

- 4025** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Cleaned — NGC Details. XF. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Die State B. This early die state is characterized only by a single die chip between two dentils above the second A in AMERICA. Put another way, what it *lacks* is the usually seen diagonal clash mark above the eagle's wing, as well as the rim nick(s) on the rim above the T in STATES, and as such this is a scarce die state. The surfaces show obvious signs of cleaning and each side displays muted gray patina. Still, a relatively well-detailed Gobrecht dollar that has claims to rarity and will be of interest to the specialist.

1836 Gobrecht Dollar, Unc Details  
Judd-60, Die Alignment II

- 4026** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Altered Surfaces — PCGS Genuine. Unc. Details. Silver. Die Alignment II (center of Liberty's head opposite ES in STATES). Die State E. The rim nick is plainly evident above the A in STATES, as is the die chip between two dentils above and slightly to the right of the R in DOLLAR. Both Coin Alignment and Medal Alignment dollars are believed to have been struck in the final week of 1836. All medallion-oriented dollars appear to be related. The strike detail is remarkably strong on the obverse, only displaying slight softness on a few stars on the lower reverse. The surfaces appear to have been cleaned and stained, meriting the Altered Surfaces disclaimer. The fields show moderate reflectivity and each side is lightly toned and somewhat hazy. A well-detailed for the Gobrecht dollar collector who hasn't found a scarce DAIL coin yet.

## SEATED DOLLARS

1841 Seated Dollar, MS63+  
Second-Year of Issue

- 4027** 1841 MS63+ PCGS. CAC. OC-2, R.1. OC Die State b/a. This is the second and final use of Obverse 1 and only use of Reverse A. A fantastic example of this second-year issue. Subtle chestnut toning accents both sides and the fields boast significant reflectivity. Liberty's head and a few stars are a bit weak, but the reverse is boldly defined. This appealing piece is among the finest certified at either NGC or PCGS. Population: 30 in 63 (4 in 63+), 7 finer. CAC: 8 in 63, 7 finer (3/19). NGC ID# 24YB, PCGS# 6927

1847 Seated Dollar, MS64  
Frosty Original Surfaces

- 4028** 1847 MS64 PCGS. OC-2, R.1. An impressive and totally original Seated dollar, this Choice Mint State 1847 displays lovely pewter-gray surfaces with delightful champagne and pale blue patina. Some weakness of the central motifs is evident, mostly along the upper edge of each wing on the reverse. The 1847 is rare this fine, and only a few higher-grade pieces are known. Population: 11 in 64, 5 finer (3/19).  
*Ex: Long Beach Signature (Heritage, 2/2009), lot 1592; New York Signature (Heritage, 10/2015), lot 3379, which realized \$5,875. NGC ID# 24YJ, PCGS# 6934*

- 4029** 1848 — Improperly Cleaned — NGC Details. Unc. OC-1, R.2. The 1848 is an underrated issue with a low mintage of 15,000 coins. It is one of the most elusive Seated dollars to locate in Mint State. This piece is clearly Uncirculated, with unworn, fully struck devices and semireflective fields. However, it has been cleaned and shows a somewhat muted appearance. Reddish-gold toning encircles the rims.

- 4030** 1850 — Cleaned — NGC Details. Unc. OC-1, R.3. Repunched 0. A Top 30 Variety. Osburn-Cushing die state b/e. Bright and untuned with light hairlines and a few scattered marks, this sharply struck dollar has wide rims and partial reflectivity in the fields. Just 7,500 circulation strikes were struck from a single die marriage, confirmed by repunching at the lower left side of 0 in the date, and a prominent die line within the reverse shield that angles down left-to-right in the horizontal shield lines.

**4031 1859-S XF45 PCGS. CAC. OC-1, R.2.** The date is left, and the first two digits are repunched. OC-1 represents about 80% of the estimated 800 surviving 1859-S Seated dollars. This lightly circulated Choice XF example features mixed olive and golden-gray patina that speaks to its originality. Minor grade-consistent marks exist on each side. A low-mintage issue — just 20,000 pieces were struck. Population: 46 in 45 (1 in 45+), 87 finer. CAC: 3 in 45, 6 finer (2/19). NGC ID# 24YZ, PCGS# 6948

**4032 1860-O MS62 NGC. OC-2, R.1.** Osburn-Cushing Die State a/c. An early die state example that shows light repunching on the date, especially above the 0. A charming silver-gray Seated type coin. The strike is crisp, and marks are far fewer in both quantity and severity than is usual for this typically bagmarked issue. NGC ID# 24Z3, PCGS# 6950

**4033 1860-O MS62 PCGS. OC-2, R.1.** An available variety for this popular Seated Liberty type coin, showing brilliant, vibrant mint luster and a hint of field reflectivity. The usual minor softness is seen on the border stars and Liberty's temple, but the reverse eagle is sharp. Scattered light abrasions account for the grade but do not distract. NGC ID# 24Z3, PCGS# 6950

### 1862 Silver Dollar, MS63 Challenging in High Grade

**4034 1862 MS63 PCGS. OC-1, R.3.** Date placement is the most obvious identifier of this variety. The 1862 Seated dollar is scarce in attractive Mint State condition, and coins grading finer than the present are rare. This piece displays a sharp strike and semireflective fields. Lilac-toning graces each side. Abrasions are minimal save for a linear mark in the field above the eagle's head. Population: 20 in 63 (3 in 63+), 18 finer (3/19). NGC ID# 24Z5, PCGS# 6952

**4035 1865 XF40 PCGS. OC-4, High R.4.** A Top 30 Variety. Die State d, showing faint die cracks around the reverse. Not many series have the across-the-board scarcity shown by nearly the entire date run of Seated Liberty dollars. This moderately circulated example is lightly toned with a recovering patina, where a bit of golden luster remains among the stars and legend. The coin is nicely detailed for the grade.

*Ex: ANA Signature (Heritage, 8/2014), lot 4658, where it sold for \$1,880. NGC ID# 24Z8, PCGS# 6955*

### 1866 Seated Dollar, Toned MS64 First With Motto Issue

**4036 1866 Motto MS64 PCGS. OC-1, R.2.** A Top 30 Variety. All 1866 Motto Seated dollar circulation strikes showcase repunched dates and die doubling on the reverse mottos. Save for a bit of softness at the upper obverse and lower reverse, the design is fully rendered on this near-Gem. Both sides are flashy and semireflective with ice-blue, golden-orange, and violet patina. Perhaps 1,000 representatives survive in all but rarely this well-preserved. Population: 25 in 64 (2 in 64+), 8 finer (3/19). NGC ID# 24Z9, PCGS# 6959

**4037 1870-CC — Cleaned — PCGS Genuine. PCGS Details. XF. OC-8, High R.4.** The 1870-CC is the first and least rare of the four Carson City Seated dollar issues, yet the tiny mintage of 12,462 pieces ensures that survivors are insufficient to meet type demand from Old West collectors. This gunmetal-gray and golden-brown example displays patches of hairlines, along with a few unobtrusive rim bumps and a hair-thin horizontal mark near star 12.

**4038 1870-CC — Obverse Scratched, Reverse Planchet Flaw — NGC Details. AU. OC-9, Low R.4.** A sharply defined example of the first-year Carson City silver dollar. Sea-green and rose-red accents alternate across slightly glossy surfaces. Moderate thin marks near star 13 and the 0 in the date correspond to the NGC notations, along with a flan flaw on the rim above the A in STATES and a minor lamination near the left (facing) wingtip.

### 1870-CC Dollar, Problem-Free AU53 Inaugural Year of Nevada Production

**4039 1870-CC AU53 PCGS. OC-9, Low R.4.** The Medium CC mintmark is unique to this die pair. From a mintage of just 12,462 pieces, first-year Carson City dollars are scarce, and a majority of survivors have impairments such as cleaning, corrosion, or damage. But the present briefly circulated and problem-free example is minimally abraded and exhibits attractive tan-gold patina. Luster illuminates the drapery, plumage, and legends.

*Ex: FUN Signature (Heritage, 1/2016), lot 4373, where it realized \$6,462.50. NGC ID# 24ZE, PCGS# 6964*

**4040 1871 MS61 PCGS. OC-10, R.2.** A centered date and a die scratch between WE are attribution keys for the die marriage. This unworn and partly lustrous Motto type coin exhibits light silver and golden-gray patina. The high points show a hint of strike softness, and abrasions are distributed evenly over each side. NGC ID# 5DNV, PCGS# 6966

### 1871 Silver Dollar, MS62 Unblemished Motto Type Coin

**4041 1871 MS62 NGC. OC-5, R.2.** Iridescent powder-blue and straw-gold patina envelops this minimally marked and satiny silver dollar. One small spot is above Liberty's raised elbow. The strike shows incompleteness on Liberty's hair, but the remainder of the strike is crisp. The 1871 was the first silver dollar issue with a mintage of more than a million pieces, but a supermajority of survivors are in circulated grades. NGC ID# 5DNV, PCGS# 6966

**1872-CC Seated Dollar, AU55  
Low-Mintage Carson City Issue**

**4042 1872-CC AU55 PCGS. OC-1, High R.3.** A tiny mintage of 3,150 pieces ensures the rarity of the 1872-CC dollar. Collectors of the day lived in the East and ignored mintmarks, and since the 1872 had a mintage of more than 1.1 million pieces, few 1872-CC dollars were saved. The present steel-gray and olive-gold example displays only light rub on Liberty's curls. Abrasions are minimal, generally limited to a single thin line on the drapery above Liberty's foot. Certified in an old green label holder. Population: 14 in 55, 24 finer (3/19).

*Ex: Pellegrini Collection / FUN Signature (Heritage, 1/2016), lot 4384; Central States Signature (Heritage, 4/2016), lot 3701, where it realized \$8,812.50. NGC ID# 24ZK, PCGS# 6969*

**PROOF SEATED DOLLARS**

**1859 Seated Dollar, Sharp PR64  
Visually Impressive**

**4043 1859 PR64 NGC. CAC. OC-P1, R.3.** Osburn-Cushing Die State a/a. Repunched 1 in the date. Numerous die polish lines mingle with occasional hairlines beneath gold-toned fields that display splashes of reddish-tan and bluish-gray patina. A pinpoint-sharp strike accompanies the frosted devices, which offer stark contrast against the glassy-smooth fields. The overall visual effect is dramatic and memorable, recognized by CAC approval of this near-Gem proof. Census: 44 in 64 (1 in 64+), 39 finer. CAC: 10 in 64, 5 finer (3/19).

*From The William Rehwald Proof Set Collection. NGC ID# 252D, PCGS# 7002*

**1860 Seated Liberty Dollar, PR63  
Dies Used for Proofs and Business Strikes**

**4044 1860 PR63 PCGS. OC-P1, R.2.** Osburn-Cushing Die State a/a. After striking 1,330 proof Seated Liberty dollars, the same dies were used to produce business strike coinage, making it difficult to distinguish between prooflike regular-issue coins and true proofs of this date. This sharply detailed Select specimen exhibits lightly marked surfaces that include deeply reflective fields, with highlights of lavender-gray and russet-gold toning. Light die lines are evident in the upper shield recesses and a long strike-through shows in the field above the eagle's head. Population: 42 in 63, 58 finer (3/19). NGC ID# 252E, PCGS# 7003

**1860 Seated Dollar, PR64  
Popular Antebellum Proof Issue, CAC**

**4045 1860 PR64 NGC. CAC. OC-P1, R.2.** Osburn-Cushing Die State a/a. First use of the die marriage was to strike 1,330 proofs. Later, the dies were used to strike circulation strikes, so there are few pick-up points to differentiate proofs from prooflike coins struck for circulation. Flashy mirrors set against well-frosted devices plus an extremely sharp strike help confirm this piece is a proof, as do a few Mint-related lint marks on Liberty's portrait. Faint-gold patina deepens slightly at the borders, with occasional small bluish accents that add to the eye appeal. CAC endorsed. Census: 41 in 64 (1 in 64★), 25 finer. CAC: 11 in 64, 11 finer (3/19).

*From The William Rehwald Proof Set Collection. NGC ID# 252E, PCGS# 7003*

1860 Silver Dollar, OC-P1  
Gem Cameo Proof

- 4046** 1860 PR65 Cameo NGC. OC-P1, R.2. The proof 1860 silver dollar is scarcer than implied by its mintage of 1,330 pieces. NGC has graded just 143 pieces, and many of those are likely resubmissions. Breen (1988) stated, "527 sold, rest melted." Gems are undeniably rare, particularly with noticeable cameo contrast. The nicely struck surfaces show medium tan-gold and silver-gray patina. The borders display narrow arcs of apple-green. An impressive specimen that lacks the hairlines and lint marks seen on lower-graded examples. Census: 3 in 65 Cameo, 9 finer (3/19). NGC ID# 252E, PCGS# 87003

1861 Seated Dollar, PR64  
Rich Patina, Low Survival Rate

- 4047** 1861 PR64 PCGS. OC-P2, High R.4. The second of two reverse dies used to strike proof Seated dollars in 1861 has a tiny die lump on the stem left of the talon. Osburn and Cushing suggest only 250 proofs survive from a mintage of 1,000 coins, writing: "Proofs are much rarer than the mintage of 1,000 would indicate. ... Apparently, as many as 600 were melted to obtain silver for lower denomination coinage. Because of this the survival rate is much lower than the rates for subsequent years." This near-Gem is richly toned in deep cobalt-blue, violet, and golden patina. Minor hairlines beneath the color pose no distraction at all. Population: 27 in 64 (1 in 64+), 9 finer (3/19). *From The William Rehwald Proof Set Collection.* NGC ID# 252F, PCGS# 7004

1862 Seated Dollar, PR64  
Challenging, Low-Mintage Date

- 4048** 1862 PR64 NGC. PC-P1, Low R.5. Osburn-Cushing Die State a/a. The 1862 issue is scarce in both circulation strike and proof formats. Just 12,000 pieces were struck for circulation, while the proof mintage was limited to 550 pieces. Proofs far outnumber the surviving population of Uncirculated circulation strikes, making the 1862 issue challenging in all respects. This lovely mirrored proof is draped in evenly dispersed, golden toning throughout both sides. The frosted figure of Liberty is unmarked and contrasts boldly with glassy fields. The reverse shows less contrast, and slight weakness exists at the eagle's left (facing) wing top. A few delicate hairlines are scattered beneath the toning. Eye appeal for this near-Gem proof is strong. Census: 43 in 64 (1 in 64★), 24 finer (3/19). *From The William Rehwald Proof Set Collection.* NGC ID# 252G, PCGS# 7005

**1863 Seated Dollar, PR64 Cameo  
Fully Struck, Low-Mintage Proof**

- 4049** 1863 PR64 Cameo NGC. OC-P2, Low R.4. Osburn-Cushing Die State a/a. A low-mintage Civil War date, the 1863 silver dollars were struck in small quantity. Just 460 proofs were produced, of which perhaps 300 pieces survive. This is a highly contrasted near-Gem, with frost-white devices on smooth fields, which show a combination of die polish lines and a few wayward hairlines. There are no other marks to report, and a sharp strike renders full details on each side. Census: 15 in 64 Cameo (1 in 64+★), 8 finer (3/19). *From The William Rehwald Proof Set Collection.* NGC ID# 252H, PCGS# 87006

**1864 Seated Liberty Dollar, PR64 Cameo  
Only 470 Proofs Struck**

- 4050** 1864 PR64 Cameo PCGS. OC-P2, High R.4. Osburn-Cushing Die State a/a. A few scattered soft-gray flecks and faint traces of golden toning do little to lessen the overall brilliance of this largely untuned, Cameo proof. Sharply struck, frosted devices contrast boldly with the mirrored fields. Five die marriages are known for 1864 silver dollars, four of which were used to strike 470 proofs. A single die pair produced all 31,170 circulation strikes. This glittering, original proof shows occasional die polish lines and the bottom horizontal shield line extending left beyond the shield border into the wing. Population (all proof varieties): 19 in 64 (2 in 64+) Cameo, 6 finer (3/19). *From The William Rehwald Proof Set Collection.* NGC ID# 252J, PCGS# 87007

**1865 Dollar, Bright and Frosty PR64  
Doubled Die Obverse and Reverse**

- 4051** 1865 PR64 PCGS. CAC. OC-P2, R.3. A Top 30 Variety. Die doubling on the reverse is most evident at the top of UNI, while doubling on the obverse shows on the lower hem of Liberty's gown. Both sides are bright and frosty with blatant white-on-black contrast that PCGS has failed to mention on the holder. Fully struck, as not all Seated dollar proofs are, with only trivial hairlines above the date and a few other places. *From The William Rehwald Proof Set Collection.* NGC ID# 252K, PCGS# 7008

**1866 Seated Dollar, PR64  
Original, Lightly Toned Surfaces, CAC  
First-Year Motto Proof**

- 4052** 1866 Motto PR64 NGC. CAC. OC-P2, R.3. Osburn-Cushing Die State a/a. Smooth, mirrored fields display dappled grayish-blue toning accents amid original, pale-gold patina, giving this near-Gem Motto dollar excellent eye appeal. The transitional reverse Motto die saw its first use in 1866, and continued to be used by the Mint for several years on proof varieties dated 1867 through 1870. The obverse had just one other use — on the ultra-rare, famous 1866 No Motto variants, of which only two pieces are known. This example is sharply struck and attractive, with CAC endorsement. Census: 65 in 64, 22 finer. CAC: 10 in 64, 6 finer (3/19). *From The William Rehwald Proof Set Collection.* NGC ID# 5GDV, PCGS# 7014

**1867 Seated Liberty Dollar, PR64  
Brilliant Mirrors, Strong Contrast, CAC**

- 4053** 1867 PR64 PCGS. CAC. Osburn-Cushing Die State a/a. A single die pair was used for all 625 proofs, seen here in its early state with large unfinished areas on the reverse within the olive leaves. Fully struck, this is a brilliant, glassy-mirrored proof that features strong, undesignated cameo contrast between the frosted devices and the surrounding reflective fields. The Choice surfaces have a few scattered, delicate hairlines mixed in with die polish lines, but no marks or other distractions. Housed in a previous generation green label PCGS holder, with CAC endorsement. Population: 64 in 64 (2 in 64+), 18 finer. CAC: 7 in 64, 5 finer (3/19). *From The William Rehwald Proof Set Collection.* NGC ID# 252N, PCGS# 7015

1868 Dollar, PR64  
Starkly Contrasted, All-Brilliant

- 4054** 1868 PR64 PCGS. CAC. OC-P2, High R.3. The obverse is the second one used to strike proofs in 1868, identified by the tripled 1 and repunched 8s in the date. The reverse was employed from 1866 through 1870. An estimated 300 OC-P2 examples survive compared to 150 OC-P1 specimens, for a total of 450 1868 proof dollars extant. A thick coating of frost over the devices generates stark contrast against the reflective fields, although this piece is undesignated as a Cameo. Brilliant with mint-made die polish lines in the fields and a trace of softness on the eagle's left (facing) leg. *From The William Rehwald Proof Set Collection.* NGC ID# 252P, PCGS# 7016

1869 Seated Liberty Dollar, Toned PR64

- 4055** 1869 PR64 PCGS. OC-P2, R.4. Osburn-Cushing Die State a/a. A small mintage of 600 proof Seated Liberty dollars was accomplished in 1869, using three obverse and two reverse dies. This attractive Choice proof offers sharply detailed design elements in most areas, with just a touch of softness on the eagle's left (facing) wing and leg. The lightly marked surfaces are enhanced by shades of powder-blue, lavender-gray, greenish-gold, and violet toning, with reflective fields underneath. Population: 59 in 64, 24 finer (3/19). NGC ID# 252R, PCGS# 7017

1869 Seated Liberty Dollar, Sharp PR64

- 4056** 1869 PR64 PCGS. OC-P3, Low R.4. Osburn-Cushing Die State a/a. Among four proof die pairs, OC-P3 is the most frequently seen, and can be confirmed by a log die line within the dentils below the date, which angles upward left-to-right and points at 9. On the reverse, narrow die doubling is visible on the scroll and at IN of the motto. This is a beautifully mirrored, mostly stark-white proof with strong contrast between the frosted motifs and the deeply reflective fields. A full strike complements the smoothly mirrored fields. A few faint, pale-orange toning spots near star 1 and a few tiny marks above the cap at the dentils are seen under a loupe. Some wispy, delicate field lines are seen when viewed in light. Housed in a previous-generation blue label holder (barcode on the back). Population: 59 in 64, 24 finer (2/19). *From The William Rehwald Proof Set Collection.* NGC ID# 252R, PCGS# 7017

1870 Seated Dollar, PR64  
Pleasing Field/Device Contrast

- 4057** 1870 PR64 PCGS. OC-P1, Low R.3. Osburn-Cushing Die State a/a. Faint traces of golden-gray patina visit the lightly toned surfaces of this Choice proof Seated dollar. A generous proof mintage of 1,000 pieces was struck, from a total of three proof die marriages. Nicely mirrored fields surround frosted devices of this example, although the previous generation green label PCGS holder does not recognize the considerable cameo contrast. The Choice surfaces are unmarked save for a few random, delicate hairlines tiny ticks, none of which are the least concerning. Population: 54 in 64, 23 finer (3/19). *From The William Rehwald Proof Set Collection.* NGC ID# 252S, PCGS# 7018

1871 Seated Liberty Dollar, PR64  
Sharply Struck, Colorfully Toned

- 4058** 1871 PR64 NGC. OC-P1, R.2. Osburn-Cushing Die State a/a. Peach-gold, lavender, and pale-blue toning overlays the mirrored surfaces of this Choice original proof dollar. More than 1 million circulation strikes required 14 die marriages, while two additional die pairs were used to strike 960 proofs. The strike is appropriately sharp for a proof on this near-Gem example, and while some light hairlines exist beneath the toning, there are no significant marks. The portrait is particularly smooth, frosted, and problem-free. Census: 30 in 64, 26 finer (3/19). *From The William Rehwald Proof Set Collection.* NGC ID# 252T, PCGS# 7019

1872 Seated Dollar, PR64  
Frosty Motifs, Glassy Fields, CAC

- 4059** 1872 PR64 NGC. CAC. OC-P1, Doubled Die Reverse, R.2. Osburn-Cushing Die State a/a. A Top 30 Variety. While 14 die marriages were required to strike more than 1.1 million 1872 circulation strikes, just a single die pair was used for 950 proofs. The motto is die doubled at IN GOD WE TRUST and along the scroll edge. This brilliant example displays flashy mirrored fields and well-frosted devices for strong cameo contrast (undesigned on the holder). A razor-sharp strike complements the smooth, minimally hairlined fields and Choice, unmarked motifs. CAC endorsed. Census: 43 in 64, 22 finer. CAC: 9 in 64, 6 finer (3/19). *From The William Rehwal Proof Set Collection.* NGC ID# 252U, PCGS# 7020

1873 Seated Dollar, PR64  
CAC-Approved Final-Year Example

- 4060** 1873 PR64 PCGS. CAC. OC-P1, R.3. Top 30 Variety. Strong die doubling occurs on the reverse motto. The Mint was engaged in the production of both Seated and Trade dollar proofs in 1873. A total of 600 of this type were manufactured, all the from the same set of dies. About 60% of that mintage is believed extant. The faintest golden hues cling to the borders, and a dark toning spot appears left of WE. The rest of this Choice proof dollar is brilliant with stark contrast between the mirrorlike fields and frosty motifs. Population: 35 in 64 (1 in 64+), 19 finer. CAC: 9 in 64, 4 finer (3/19). *From The William Rehwal Proof Set Collection.* NGC ID# 252V, PCGS# 7021

TRADE DOLLARS

1873-CC Trade Dollar, AU58  
Much Better Carson City Issue

- 4061** 1873-CC AU58 ANACS. Wide CC Mintmark. The strike is much sharper than usually seen on an 1873-CC Trade dollar, with full feathers on the eagle's right (facing) leg and sharp facial definition on Liberty, framed by stronger hair detail than normal. A bit of high-point wear and scattered, tiny marks signify a short stay in circulation. Pleasing mint luster survives beneath an attractive skin of translucent, golden-gray toning, with reddish undertones seen on the reverse. Just 124,500 pieces were struck, many of which were lost to export or returned to U.S. shores with chopmarks. NGC ID# 252X, PCGS# 7032

1875-CC Trade Dollar, MS62  
Type One Reverse

- 4062** 1875-CC Type One Reverse MS62 PCGS. The Type One Reverse is the more often seen 1875-CC Trade dollar variety, showing a berry under the eagle's right (facing) claw. Overall, the 1875-CC is one of the more plentiful Trade dollars from this Mint, ideal for type collectors of Carson City coinage. This piece is well-struck save for weakness on the eagle's right (facing) foot, and it shows satiny original luster. Deep olive-gold and russet toning covers each side. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038
- 4063** 1875-S Type One Reverse MS63 PCGS. Large S. Much nicer than the typical Mint State Trade dollar, the present lustrous and brilliant example has a good strike and surprisingly few marks. The obverse displays a few wispy hairlines. Myriad slender die cracks traverse the margins. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

**1876 Trade Dollar, MS65**  
**Low-Mintage Centennial Issue**

**4064 1876 Type One Obverse, Type One Reverse, MS65 NGC.** Fully defined, the surfaces are untuned and sparkle with mint brilliance. The obverse field is semi-reflective, the reverse is satiny. Exceptionally well-defined throughout; there are no obvious or objectionable abrasions on either side of this lovely Gem type coin. Scarcer than one might imagine in this grade. Census: 15 in 65, 6 finer (2/19).

Ex: *Denver Signature* (Heritage, 8/2006), lot 3769, Realized \$6,900. NGC ID# 2539, PCGS# 40110 Base PCGS# 7041

**1876 Trade Dollar, MS64**  
**Full Strike, Smooth Appearance**

**4065 1876 Type One Obverse, Type Two Reverse, MS64 NGC.** Period after FINE. A fully struck near-Gem patinated in original and attractive cream-gray and lime-green shades. Cartwheel sheen traverses both sides, and the fields and devices are remarkably void of abrasions. The rims display slight knocks, most apparent near the date. A desirable Centennial-year type coin. NGC ID# 2539, PCGS# 40111 Base PCGS# 7041

**1876 Trade Dollar, MS64+**  
**Lustrous Type Coin**

**4066 1876 Type One Obverse, Type Two Reverse, MS64+ PCGS.** A glimmer of reflectivity is evident in the fields on this high-end near-Gem, although a strong cartwheel effect also presides over each side. This coin is sharp around the borders but lacks definition on Liberty's bust and the eagle's right (facing) foot. The mostly untuned surfaces have light golden toning on the obverse. The reverse is brilliant in the center with rose-gold and sea-green border toning. NGC ID# 2539, PCGS# 40111 Base PCGS# 7041

**1876-CC Trade Dollar, MS61**  
**Type One Obverse, Type Two Reverse**

**4067 1876-CC Type Two Reverse MS61 NGC.** Tall CC. An interesting coin, the nearly untuned obverse contrasts markedly with the dappled orange-russet and charcoal patina that adorns the reverse. There is some light color at the upper right obverse border, and every feature on both sides exhibits needle sharp striking definition. The scattered, grade-defining abrasions include a shallow scrape in the left reverse field. Still, a desirable coin for the grade with a pleasing semiprooflike finish.

Ex: *Andy Geosits Collection of Trade Dollars / Long Beach Signature* (Heritage, 9/2002), lot 7251, where it sold for \$2,760. NGC ID# 4EML, PCGS# 40113 Base PCGS# 7042

**1878-CC Trade Dollar, VF35**  
**Key-Date Circulation Strike**

**4068 1878-CC VF35 PCGS. Breen-5822.** All 97,000 1878-CC Trade dollars were struck before February of that year, when the denomination was abolished in circulation-strike format (proofs were made through the mid-1880s). This represents one of the most challenging keys to the set. Deep-gray patina includes golden accents around the motifs. Expected marks and friction appear on each side, although this piece is high-end for the VF grade range. NGC ID# 253M, PCGS# 7047

**4069 1878-CC — Cleaned — NGC Details. XF. Breen-5822.** Apart from the non-collectible 1884 and 1885 proofs, the first and final Carson City issues are the keys to the Trade dollar series. This stone-gray representative is hairlined and displays moderate wear, but is without any consequential marks. NGC ID# 253M, PCGS# 7047

**4070 1878-S MS64 PCGS.** A sharp near-Gem example of this final San Francisco Trade dollar. The devices are satiny and attractive, set against prooflike fields that display pastel lavender and peach toning. Eye appeal is outstanding for the grade on this Trade dollar type coin. NGC ID# 253G, PCGS# 7048

**PROOF TRADE DOLLARS**

**4071 1873 PR61 PCGS.** A brilliant first-year proof, this 1873 Trade dollar displays deeply reflective fields. The top of Liberty's head and several border stars are a trifle weak, as is the eagle's right (facing) leg. Scattered hairlines and a few light marks limit the grade, but none are individually bothersome. NGC ID# 27YJ, PCGS# 7053

- 4072 **1873 PR63 PCGS.** When held at an angle, the dusky toning that covers this Select first-year proof reveals flashy and appealing cobalt, violet, and golden color. There are a couple of contact marks in the right obverse field that pose no distraction. Expectedly sharp, except for the eagle's right (facing) leg and talon. NGC ID# 27YJ, PCGS# 7053

**1873 Trade Dollar, PR64  
First Year of Issue**

- 4073 **1873 PR64 PCGS. CAC.** This first-year proof Trade dollar enjoys a smallish mintage of 600 or 865 pieces, the total depending on which researcher one consults. Every element of William Barber's design is as sharp as expected. Minimal golden toning graces the borders, leaving the interiors brilliant and contrasted. A long, as-made die scratch travels through the lower part of Liberty's gown above the ankle. Population: 30 in 64, 7 finer. CAC: 6 in 64, 2 finer (3/19).

*From The William Rehwald Proof Set Collection.* NGC ID# 27YJ, PCGS# 7053

- 4074 **1874 PR63 PCGS.** Period after FINE. Glimmering fields attest to the proof status of this Select 1874 Trade dollar despite moderate strike weakness on the eagle's right (facing) leg and talons and Liberty's torso. The stars and Liberty's head are sharper. Deep, mottled toning in shades of olive, gold, russet, and aquamarine blanket each side, masking any minor contact marks that limit the grade. NGC ID# 27YK, PCGS# 7054

**1874 Trade Dollar, PR63  
Light Toning, Strong Contrast**

- 4075 **1874 PR63 PCGS. CAC.** Period after FINE. Housed in an early generation "rattler" holder, this Select Proof Trade dollar displays CAC endorsement and strong cameo contrast, with mirrored fields that surround the frosted raised motifs. A pale veil of peach-gold toning deepens slightly at the borders. Light hairlines exist, which enter into assigned PR63 grade, yet the strike is razor-sharp and there are no sizeable marks. This is a sharp example of a surprisingly scarce proof issue, since many pieces went unsold and were released at face value at the start of the new year. Not many pieces were saved. Population: 56 in 63, 59 finer. CAC: 2 in 63, 13 finer (2/19). NGC ID# 27YK, PCGS# 7054

**1874 Trade Dollar, PR64  
Mintage of 700 Proofs**

- 4076 **1874 PR64 PCGS.** Powder-blue and golden patina covers most of each side without completely inhibiting field-device contrast. The raised design elements display a thick layer of mint frost that contributes to the unmentioned cameo effect. There are minor hairlines on each side, as usual, but no obvious contact marks. Population: 45 in 64 (2 in 64+), 14 finer (3/19).

*From The William Rehwald Proof Set Collection.* NGC ID# 27YK, PCGS# 7054

- 4077 **1875 PR60 NGC.** Type Two Reverse. Period after FINE. A fully struck and untuned specimen. Delicate field hairlines emerge beneath a lens, but no marks are apparent with the unaided eye. The fields are nicely mirrored although slightly subdued. NGC ID# 27YL, PCGS# 7055

**1875 Trade Dollar, PR64 Cameo  
Notably Sharp Strike for the Issue**

- 4078 **1875 PR64 Cameo NGC.** While many of the Type I/II Trade dollar proofs are weak at the top of Liberty's head, this example is sharply struck, as are the adjoining stars. The reverse is equally sharp. The 1875 Trade dollars struck in Philadelphia rank among the scarcest of the circulation strike issues, a legacy of the low mintage (218,200 pieces struck), and many of those may have circulated domestically. Proofs, on the other hand, had a more normal mintage (officially 700 pieces). This nearly brilliant proof emits a faint golden sheen from the glittering, smoothly mirrored fields. Frosted devices contrast moderately with the reflective surfaces. Eye appeal is equaled only by the outstanding technical quality. Census: 25 in 64 Cameo (1 in 64+), 18 finer (3/19).

*From The William Rehwald Proof Set Collection.* NGC ID# 27YL, PCGS# 87055

- 4079 **1876 PR63 PCGS.** Type One Obverse, Type Two Reverse. Period after FINE. The lower reverse displays a broad arc of blue-green toning. The upper obverse shows a narrow curve of aquamarine patina. The remainder of this Select proof is mostly brilliant, though hints of butter-gold are present. Nicely struck and flashy with pleasing preservation. NGC ID# 27YM, PCGS# 7056

- 4080 **1876 PR63 NGC.** Type One Obverse, Type Two Reverse. Period after FINE. Faint straw-gold toning confirms the originality of this flashy Centennial-year specimen. Both sides display delicate hairlines but no marks are apparent. The motifs are frosty, although the circa-2000 holder omits a Cameo designation. NGC ID# 27YM, PCGS# 7056

**1876 Trade Dollar, PR64**  
**Attractive and Well-Preserved for the Grade**

- 4081 1876 PR64 PCGS. CAC.** Type One Obverse, Type Two Reverse. Period after FINE. The scroll end points left, Liberty's branch hand has three fingers and a thumb, and no berry is present under the eagle's right (facing) claw. This proof Trade dollar is highly appealing with bold, if undesignated contrast and faint accents of golden-orange color mainly around the obverse rims. There are a few fine hairlines but not much else that prevents an even higher grade.  
**From The William Rehwald Proof Set Collection.** NGC ID# 27YM, PCGS# 7056

**1876 Trade Dollar, PR65**  
**Vivid Multicolor Toning**

- 4082 1876 PR65 NGC.** Type One Obverse, Type Two Reverse. This deeply toned Gem Trade dollar displays apple-green, rose-red, sun-gold, navy-blue, and plum-mauve shades once it is rotated beneath a light. The strike is virtually full, and the fields appear undisturbed beneath the blanket of multi-colored patina. Census: 13 in 65, 7 finer (2/19).  
**Ex: Fort Worth Signature (Heritage, 3/2010), lot 1266, realized \$6,325.** NGC ID# 27YM, PCGS# 7056

**1877 Trade Dollar, Border-Toned PR64**  
**Substantial Field/Device Contrast, CAC**

- 4083 1877 PR64 NGC. CAC.** Scarce in high grades from a small reported mintage of just 510 proofs, the 1877 Trade dollar commands a premium among collectors. This is a lovely near-Gem example. Frosted devices are set on deeply mirrored fields, with a band of rich, amber-gold toning at the margins, plus occasional light-blue accents at the rims. A few tiny marks and wispy hairlines are visible under a loupe. Liberty's hair over the ear shows slight blending of the strands, but all else is sharply struck throughout both sides. Strong eye appeal helps earn the CAC endorsement. Census: 58 in 64, 23 finer. CAC: 4 in 64, 11 finer (3/19).  
**From The William Rehwald Proof Set Collection.** NGC ID# 27YN, PCGS# 7057

- 4084 1877 PR62 Cameo PCGS.** Even more crisply struck than expected with razor-sharp definition apparent on virtually every design element, including the dentils. Strong cameo contrast is evident on both sides, with frosted white devices set against the illimitable reflectivity of jet-black fields. Faint cloudiness and a few wispy hairlines in the fields define the numerical grade of this pleasing proof specimen.  
**Ex: Long Beach Signature (Heritage, 2/2007), lot 3723; Long Beach Signature (Heritage, 2/2013), lot 3635; Orlando Signature (Heritage, 7/2013), lot 5117.** NGC ID# 27YN, PCGS# 87057

**1877 Dollar, PR64 Cameo**  
**Dramatic White-on-Black Contrast**

- 4085 1877 PR64 Cameo PCGS. CAC.** Frosty, untuned devices provide blatant contrast against the dramatically mirrored fields. This fully struck specimen has only the slightest field imperfections. A meager 510 proof Trade dollars were struck in 1877, and many survivors undoubtedly lack the eye appeal and distinct white-on-black contrast of this piece. Population: 20 in 64 (3 in 64+) Cameo, 9 finer. CAC: 6 in 64, 8 finer (2/19).  
**Ex: Summer FUN Signature (Heritage, 7/2009), lot 798; ANA National Money Show (Heritage, 2-3/2014), lot 3980, where it realized \$6,756.25.** NGC ID# 27YN, PCGS# 87057

- 4086 1878 PR60 NGC.** While the western branch mints struck Trade dollars, the Philadelphia Mint had no reason to issue any circulation strikes, and it struck only 900 Trade dollar proofs, which were included in the silver proof sets. The 1878 Morgan dollar proofs were sold separately for \$1.25 each plus postage. (Starting in 1879, the Trade dollar proofs were dropped from the silver proof sets and were sold separately.) This 1878 Trade dollar proof is sharply struck, with shallow mirrors and pale-gold toning. Some wispy hairlines occupy the fields. NGC ID# 27YP, PCGS# 7058

**1878 Trade Dollar, PR64**  
**First of the Proof-Only Issues**

- 4087 1878 PR64 PCGS.** No 1878 circulation strikes were made at the Philadelphia — only 900 proofs — although a small mintage of 1878-CC Trade dollars was struck in Carson City, and more than 4 million 1878-S Trade dollars were produced at the San Francisco Mint. The 1878 proofs are technically the first of the proof-only Trade dollar issues. This near-Gem example is sharply struck with a few wispy hairlines and faint bits of gray and gold toning. The strike is extra-sharp throughout both sides, with noticeable contrast between the frosted devices and mirrored fields. Population: 75 in 64, 28 finer (3/19).  
**From The William Rehwald Proof Set Collection.** NGC ID# 27YP, PCGS# 7058

**1878 Trade Dollar, PR64+  
Elusive Cameo Example**

- 4088 1878 PR64+ Cameo PCGS. CAC.** Although some business strikes were produced at the branch mints, production of Trade dollars at the Philadelphia Mint was limited to 900 proof examples in 1878. This attractive, high-end Choice representative displays frosty design elements with razor-sharp definition that contrast boldly against deeply mirrored fields. The surfaces show a few minor contact marks and wisps, but none are of any real importance. Population: 31 in 64 (1 in 64+) Cameo, 15 finer. CAC: 12 in 64, 9 finer (2/19). NGC ID# 27YR, PCGS# 87058

**1879 Trade Dollar, PR64  
Only 1,500 Pieces Produced**

- 4089 1879 PR64 PCGS.** This impressive near-Gem proof enjoys excellent field-device contrast despite the lack of a Cameo designation. Each side first appears brilliant, while a hint of peripheral rose-tinted color becomes apparent upon closer inspection. A proof-only issue, just 1,500 specimens of the 1879 were ever produced.  
*Ex: Houston Signature (Heritage, 12/2009), lot 955; ANA Signature (Heritage, 8/2010), lot 5193, where it realized \$4,025. NGC ID# 27YR, PCGS# 7059*

**1879 Trade Dollar, Vibrant PR64  
Second of the Proof-Only Issues**

- 4090 1879 PR64 PCGS.** Only proofs were struck in 1879 for the Trade dollar, with circulation strikes discontinued in favor of an avalanche of Morgan silver dollars. Numismatic interest in the proof-only Trade dollars did not hit its stride until late in the year, when 581 proofs were struck in December alone. A total of 1,541 proofs were struck for the year. This is a lightly toned, deeply mirrored, and fully struck example. Dappled pale-gold toning complements the glass-smooth, flashy fields. Housed in an old green label holder, this proof has eye appeal and high-quality surfaces that suggest an even finer grade.  
**From The William Rehwald Proof Set Collection.** NGC ID# 27YR, PCGS# 7059

**1879 Trade Dollar, PR65  
Undesignated Contrast**

- 4091 1879 PR65 NGC.** Beginning in 1879, Trade dollar production was limited to proof strikes like this Gem. NGC has failed to acknowledge the moderate contrast plainly visible on each side. Mildly frosted devices stand out against a backdrop of gold-tinged mirrors. Attractive, carefully preserved, and expectedly well-defined. NGC ID# 27YR, PCGS# 7059

**1879 Trade Dollar, PR65 Cameo  
Flashy Fields Under Rose and Gold Toning**

- 4092 1879 PR65 Cameo PCGS.** A distinct minority of proof-only 1879 Trade dollar are certified in Cameo or Deep Cameo categories. This starkly contrasted Gem Cameo specimen from a mintage of 1,541 pieces enjoys flashy fields under rich shades of rose-violet and golden toning. Thickly frosted devices enhance the effect and the overall eye appeal. Population: 21 in 65 (2 in 65+) Cameo, 18 finer (3/19). NGC ID# 27YR, PCGS# 87059
- 4093 1880 PR60 NGC.** Bolstered by strong demand by dealers and speculators, a large proof-only mintage of 1,987 Trade dollars was struck in 1880. This PR60 example shows slight weakness at Liberty's head and at stars 5 through 13, although the reverse is sharp. Olive-gold toning flakes surround the devices, especially the eagle and reverse legends, while a few scattered hairlines are seen in the mirrored fields. NGC ID# 27YS, PCGS# 7060
- 4094 1880 PR62 PCGS.** A fully struck, brilliant proof Trade dollar with deeply reflective fields and satiny devices. Moderate hairlines on each side earn a budget-friendly PR62 grade, although subtle cameo contrast is also apparent, especially on the reverse. NGC ID# 27YS, PCGS# 7060

**1880 Trade Dollar, PR63  
Strong Mirrors Under Colorful Toning**

- 4095 1880 PR63 PCGS.** Not only was the 1880 Trade dollar the highest-mintage proof issue in the series, its production of 1,987 specimens was also the highest for any dollar-denominated proof issue until the silver-clad Eisenhower dollars of 1971. Nevertheless, the absence of any circulation strikes in 1880 puts added pressure on survivors, particularly nice ones like this piece. Each side boasts strong mirrors beneath blue-green, gold-rose, and silver-slate patina. A few minor hairlines are seen.  
*Ex: Central States Signature (Heritage, 4-5/2009), lot 937, where it realized \$2,760. NGC ID# 27YS, PCGS# 7060*

**1880 Trade Dollar, PR64  
Brilliant Surfaces, Proof-Only Issue**

- 4096 1880 PR64 NGC.** Speculators and collectors helped boost the proof-only mintage of 1880 proof Trade dollars to an unprecedented level of 1,987 pieces. Many high-grade pieces were preserved as a result. This brilliant example is fully white with significant contrast between flashy-mirrored fields and smoothly frosted devices. A speckling of foggy-white flecks has only a minor effect on the mirrored fields, while the strike is suitably sharp throughout both sides.  
*From The William Rehwald Proof Set Collection. NGC ID# 27YS, PCGS# 7060*

**1880 Trade Dollar, PR64  
Vivid, Multicolor Toning**

- 4097 1880 PR64 PCGS. CAC.** Vivid shades of sea-green, russet, and powder-blue toning blanket the obverse surfaces, with darker cobalt-blue and violet-gray on the reverse. This sharply detailed Choice proof exhibits well-preserved surfaces, with deeply reflective fields that shine through the patina. From a proof-only mintage of 1,987 pieces. NGC ID# 27YS, PCGS# 7060

- 4098 1880 PR60 Cameo PCGS.** A pleasing PR60 example of this proof-only issue, with well-detailed design elements that show a touch of softness on the star centers. The reflective, lightly toned fields contrast boldly with the frosty devices. Some hairlines are present in the fields, but no large or distracting contact marks are evident. NGC ID# 27YS, PCGS# 87060

- 4099 1881 PR60 NGC.** Brilliant and nicely mirrored, this untuned proof is one of 960 Trade dollars issued in proof-only format in 1881. The previous year's speculative buying had disappeared, and the number of proofs returned to normal. This is a sharply struck example — moreso than many 1881 proofs — with glassy reflectivity and faint hairlines that influence the assigned grade. NGC ID# 27YT, PCGS# 7061

**1881 Trade Dollar, PR64  
Sought-After Proof-Only Issue**

- 4100 1881 PR64 PCGS.** The 1881 had a mintage of only 960 pieces and is a highly collectible, sought-after date among the later proof-only issues. This piece exhibits remarkably deep proof mirrors despite the depth of toning seen over each side. Dusky light gray patina covers the surfaces, with underlying multicolored iridescence that produces an eye-appealing effect. Void of obvious contact marks.  
*Ex: Long Beach Signature (Heritage, 6/2010), lot 898, where it brought \$4,312.50. NGC ID# 27YT, PCGS# 7061*

**1881 Trade Dollar, PR65  
Deeply Toned Proof-Only Example**

- 4101 1881 PR65 NGC.** The 1881 Trade dollar is a proof-only issue with a reported mintage of 960 pieces. A richly toned Gem example, this piece reveals several shades of color including teal, copper, orange, plum, and gray. Luster emerges beneath the patina on large portions of the coin. The design elements exhibit an expectedly needle-sharp strike, adding to the appeal. Census: 39 in 65, 27 finer (3/19).  
*Ex: Houston Signature (Heritage, 12/2013), lot 3703, which realized \$6,756.25. NGC ID# 27YT, PCGS# 7061*

1881 Trade Dollar, PR64 Cameo  
Sharp Proof-Only Issue, CAC Endorsed

- 4102 1881 PR64 Cameo NGC. CAC.** Liquidlike, unfathomably deep mirrors surround the central devices of this dazzling Cameo proof. One of 960 pieces struck in 1881 (a proof-only year for the defunct Trade dollar), this exceptional near-Gem earns the cameo designation more from its deeply reflective fields than the lightly frosted devices. Nearly brilliant on the obverse, the reverse shows some speckled-gold toning that includes tan-gold overtones. The strike is far above average for an 1881, just shy of full details including Liberty's problematic head. CAC endorsement confirms the quality. Census: 32 in 64 Cameo (2 in 64+), 53 finer. CAC: 14 in 64, 16 finer (3/19).

*From The William Rehwald Proof Set Collection.* NGC ID# 27YT, PCGS# 87061

1882 Trade Dollar, PR64  
Translucent Golden Color

- 4103 1882 PR64 PCGS. CAC.** Although the denomination had been abandoned for circulation four years earlier, the Mint continued to strike Trade dollar proofs in 1882 (1,097 pieces). A skin of translucent golden color faintly accents otherwise brilliant surfaces, including glassy fields and nicely frosted motifs. Housed in a green label holder with a matching CAC approval sticker for quality within the grade.

*From The William Rehwald Proof Set Collection.* NGC ID# 27YU, PCGS# 7062

1882 Trade Dollar, PR63 Cameo  
Light Golden Color

- 4104 1882 PR63 Cameo PCGS.** An eye-appealing Cameo proof, this 1882 Trade dollar has light gold toning over fully and deeply mirrored fields. Frosty and lustrous devices showcase every individual design element in needle-sharp detail. One of 1,097 specimens struck in proof format only.

*Ex: Dallas Signature (Heritage, 10/2009), lot 889, where it realized \$3,450.* NGC ID# 27YU, PCGS# 87062

1883 Trade Dollar, PR64  
Noticeably Contrasted, CAC Endorsed

- 4105 1883 PR64 NGC. CAC.** Significant contrast between the frost-white devices and deeply mirrored fields gives this Choice Trade dollar a cameo look, but the Cameo designation is absent on its previous generation NGC holder, which pre-dates such an attribution. CAC endorsement recognizes the coin's high quality and outstanding eye appeal. A thin crescent of gold toning visits the rims on both sides, but the surfaces are essentially brilliant and show only untuned silver reflectivity and a razor-sharp strike. There are no marks of consequence.

*From The William Rehwald Proof Set Collection.* NGC ID# 5DP8, PCGS# 7063

1883 Trade Dollar, PR64 Cameo  
High-End From the Final Collectible Issue

- 4106 1883 PR64 Cameo PCGS.** Blazing, frosty surfaces appear both on the verge of a higher grade and a Deep Cameo designation. A few minor field ticks seemingly preclude the Gem level, but this sparkling near-Gem boasts excellent eye appeal. The proof-only 1883 — the final collectible issue in the series — was struck to the extent of 979 coins. Population: 36 in 64 (5 in 64+) Cameo, 39 finer (2/19).

*Ex: ANA Signature (Heritage, 8/2010), lot 5210, where it realized \$4,312.50.* NGC ID# 27YV, PCGS# 87063

## MORGAN DOLLARS

- 4107 1878 8TF Lines in LIB, VAM-2, MS65 Prooflike NGC. CAC.** A slender band of golden-brown resides near the rims, and the portrait displays light steel-gray toning. Impressively preserved and sharply struck with flashy fields and considerable appeal.

*Ex: Central States Signature (Heritage, 4/2011), lot 5590, which realized \$1,840.* NGC ID# 253H, PCGS# 133785 Base PCGS# 7072

**1878 8TF Morgan Dollar, MS64+  
Deep Mirror Prooflike Specimen**

- 4108 1878 8TF Lines in LIB, VAM-2, MS64+ Deep Mirror Prooflike PCGS. CAC.** A Plus-graded Choice specimen from the first year of the Morgan design, this coin shows the 8 tailfeathers reverse used early in the year. The 8TF issue accounts for less than 10% of the Philadelphia mintage for the year. This Plus-graded Choice specimen offers sharply detailed, frosty design elements and deeply reflective prooflike fields. The brilliant surfaces are well-preserved and most attractive. Population: 40 in 64 (3 in 64+) Deep Mirror Prooflike, 4 finer. CAC: 5 in 64, 0 finer (1/19).  
*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 253H, PCGS# 40120 Base PCGS# 97073

- 4109 1878 8TF Spiked Eye, VAM-3, MS65 Prooflike PCGS.** Minor die markers near Liberty's eye attribute the variety. This sharply struck first-year Morgan dollar displays light peripheral peach patina. The fields and devices are snow-white. The preservation is outstanding, even for the rigid requirements of the designated grade. Housed in a first-generation "rattler" holder. NGC ID# 253H, PCGS# 40121 Base PCGS# 7073

- 4110 1878 7/8TF Strong, VAM-38, MS64 Deep Mirror Prooflike PCGS.** A brilliant Choice first-year Morgan dollar. The specialist-familiar VAM-38 doubled tailfeathers variety, with five "extra" feathertips and a partially lapped tail. This example is significant for its flashy fields and crisp strike. Liberty's cheek is smooth, though the left obverse field displays moderate contact. PCGS# 40220 Base PCGS# 97079

**1878 Morgan Dollar, MS66  
Reverse of 1878  
VAM-100-2, Top 100**

- 4111 1878 7TF Reverse of 1878, VAM-100-2, Type One Obverse MS66 PCGS.** A Top 100 Variety and a Top 30 1878 Variety. A thin skin of golden-gray toning confirms the original surfaces of this lustrous and appealing Premium Gem. Doubling at the top of E PLURIBUS UNUM includes Liberty's eyelid. The A in DOLLAR shows no line in its top opening, signifying Reverse A (Reverse B has a diagonal line in that opening). This is a sharply struck coin, with only a few minuscule marks and a razor-sharp strike. NGC ID# 253K, PCGS# 133832 Base PCGS# 7074

**1878 Morgan Dollar, MS65 Prooflike  
Top 100 Variety, VAM-141, Reverse of 1878**

- 4112 1878 7TF Reverse of 1878, Triple Star, VAM-141, MS65 Prooflike PCGS.** A Top 100 Variety. The spectacularly tripled star right of the date identifies the obverse, which is shared between VAM-117 and VAM-141. Only the later variant has a broken O in GOD. A few hints of golden color complement otherwise brilliant surfaces. Noticeable contrast exists between the bold devices and reflective, well-preserved fields. Population for the variety: 2 in 65 Prooflike, 0 finer in this category (3/19). NGC ID# 253K, PCGS# 40302 Base PCGS# 7075

- 4113 1878-CC MS65 Prooflike PCGS.** A first-year Carson City Morgan dollar with reflective fields and crisply struck devices. The brilliant surfaces are exceptionally void of abrasions, since contact is confined to wispy marks on Liberty's face.  
*Ex: Long Beach Signature (Heritage, 9/2004), lot 8292, which realized \$3,680.* NGC ID# 253M, PCGS# 7081

**1878-CC Morgan Dollar, MS66 Prooflike  
Perfect for a Top Registry Set**

- 4114 1878-CC MS66 Prooflike PCGS. CAC.** Prooflike survivors from this first-year issue represent a small fraction of 1878-CC Morgan dollars available on the market. All examples are struck with this reverse, showing parallel upper arrow feathers and a Small CC mintmark — the only year this design was employed in Nevada. Brilliant and needle-sharp, this Registry-grade coin maintains fantastic depth of field with few abrasions for the grade. A couple of superficial roller marks on the chin are typical and as-made at the Carson City facility. Population: 13 in 66 (3 in 66+) Prooflike, 0 finer. CAC: 3 in 66, 0 finer (2/19).  
*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 253M, PCGS# 7081

**1878-S Morgan Dollar, MS67  
None Finer at NGC, One Finer at PCGS**

- 4115 1878-S MS67 NGC.** Smooth, semireflective fields and an equally smooth, frosted cheek on Liberty accentuate the needle-sharp strike of this Superb Gem 1878-S. One-by-one, Liberty's hair strands are sharply defined from the top forecurl to the ear, and on to lower-most curls beneath the neck truncation. The eagle's plumage and talons are similarly sharp. Brilliant silver luster radiates from the nearly unmarked surfaces, with a tiny abrasion at the point of the neck the sole sign of obverse contact. A few tiny ticks on the eagle and beneath the eagle's tail are visible with a loupe. Census: 37 in 67 (6 in 67★), 0 finer (2/19). NGC ID# 253R, PCGS# 7082

- 4116 1879 MS66 NGC.** The obverse displays intense layers of steel-blue, purple, and rhubarb-red toning, while the reverse shows amber-orange shades at the margins around a brilliant, silver-white center. Both sides are lustrous and nearly mark-free, with the obverse luster somewhat tempered by the intense toning. NGC has certified just seven numerically finer pieces, none of which can equal the unique coloration of this Premium Gem (3/19). NGC ID# 253S, PCGS# 7084

- 4117 1879 MS66 PCGS.** Light gold peripheral toning surrounds the gray-brilliant centers. The strike is sharp overall, except for the usually seen weakness in the center of the obverse. A few minute obverse marks are noted, and a speck of grease was struck into the left-reverse field.

*Ex: Long Beach Signature (Heritage, 2/2010), lot 513; Central States Signature (Heritage, 4/2010), lot 1288; Beverly Hills Signature (Heritage, 11/2014), lot 4518.* NGC ID# 253S, PCGS# 7084

**1879 Dollar, MS66+  
Finest With CAC Approval**

- 4118 1879 MS66+ PCGS. CAC.** The 1879 proves much scarcer in the highest Uncirculated grades than its San Francisco counterpart. All-brilliant surfaces shimmer with cartwheel mint luster. The cheek and fields are incredibly clean, even for this impressive level. A touch of central softness is inconsequential. PCGS reports seven finer submissions, while there are none finer that boast a CAC sticker (3/19). NGC ID# 253S, PCGS# 7084

**1879-CC Morgan Dollar, MS63  
Challenging Branch Mint Issue**

- 4119 1879-CC MS63 PCGS.** The 1879-CC Morgan dollar is the first really elusive issue of the series, from a low mintage of 756,000 pieces. This impressive Select specimen offers well-detailed design elements, with just a trace of blending on the hair above the ear. The lustrous surfaces are lightly marked for the grade, with subtle highlights of pale gold and lavender toning. NGC ID# 253U, PCGS# 7086

1879-CC Dollar, MS63 Deep Mirror Prooflike  
Stand-Out Carson City Semikey

- 4120** 1879-CC MS63 Deep Mirror Prooflike PCGS. CAC. Normal Mintmark. This coin would stand out in any advanced Morgan dollar collection. It is a Select Uncirculated example of the semikey 1879-CC, one of 756,000 pieces struck, with dramatic Deep Mirror Prooflike contrast. PCGS has graded nearly 10,000 1879-CC dollars, but less than 1% of those submissions have been awarded a DMPL designation. Bowers explains that while the 1879-CC is sometimes seen with partial contrast, the surfaces are often dusky. Seldom is field-device contrast as stark as it is here.

Every raised design element features a thick coat of mint frost. Faint roller marks appear over the centers, where detail is trivially incomplete. Minimally abraded fields are profoundly reflective, and the overall effect is enhanced by the total absence of color. Population: 18 in 63 Deep Mirror Prooflike, 22 finer. CAC: 2 in 63, 4 finer (2/19).

*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 253T, PCGS# 97087

1879-CC Morgan Dollar, AU58  
Famous Capped Die Variety

- 4121** 1879-CC Capped Die, VAM-3, AU58 PCGS. A Top 100 Variety. The remnants of an undertype CC are visible beneath the primary mintmark, identifying the popular Capped Die variety. This impressive near-Mint example displays lightly marked, lustrous surfaces, under shades of lavender-gray and golden-tan toning. Just a trace of wear is evident on the well-detailed design elements. The 1879-CC is a challenging issue in the Carson City series. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC Dollar, MS60  
Capped Die, VAM-3, Top 100 Variety  
Old Rattler Holder, CAC

- 4122** 1879-CC Capped Die, VAM-3, MS60 PCGS. CAC. A Top 100 Variety. The crude attempt to efface a Small CC mintmark beneath its primary Large CC mintmark makes the VAM-3 one of the most memorable varieties of the entire Morgan dollar series. This lightly abraded example is sharply struck and housed in an early generation PCGS "rattler" holder, with fewer marks than expected on the lustrous, frosted surfaces. CAC endorsement adds to the appeal. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC Capped Die Dollar, MS62  
VAM-3, Popular With Collectors

- 4123** 1879-CC Capped Die, VAM-3, MS62 PCGS. A Top 100 Variety. The 1879-CC is one of the more challenging Nevada mint Morgan dollars to obtain, and this famous Large CC over Small CC is particularly popular with collectors. With the exception of Liberty's ear and the hair strands just above it, this brightly frosted Mint State dollar is well-struck. Scattered marks, including a few grazes on the cheek, define the grade. Totally brilliant. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1879-CC VAM-3 Dollar, MS62**  
**The Capped Die Top 100 Variety**

- 4124 1879-CC Capped Die, VAM-3, MS62 PCGS.** An essential piece of the Top 100 VAM variety collection, the Capped Die issue is in constant demand in all grades. This example is well-struck and brilliant, showing satiny mint luster with a few abrasions on Liberty's cheek that limit the grade. The fields are better-preserved. This variety is believed to be a CC/CC mint alteration and is listed in the *Guide Book* as such. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1879-CC VAM-3 Dollar, MS63**  
**Famous Capped Die, Top 100 Variety**

- 4125 1879-CC Capped Die, VAM-3, MS63 NGC.** A Top 100 Variety. The famous Capped Die variety shows a Large CC mintmark punched over the pitted remnants of a Small CC. A reading mark on the cheek is certainly the only thing preventing an even higher grade for this Select Carson City dollar. The fields are well-preserved, and frosted mint luster rolls over entirely brilliant surfaces. Pinpoint-sharp over the ear and breast feathers. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

- 4126 1879-O MS65 NGC.** Scarce in Gem condition and rare any finer, the 1879-O saw a mintage of more than 2.8 million pieces until silver bullion ran out at the newly reopened and refurbished New Orleans Mint. This is a brilliant, vividly lustrous example, sharply struck, with remarkably clean fields and a just a few light grazes on Liberty's cheek. Eye appeal is strong. NGC reports just nine numerically finer pieces (3/19). NGC ID# 253X, PCGS# 7090

**1879-O Dollar, MS65**  
**Radiant Untoned Example**

- 4127 1879-O MS65 PCGS. CAC.** Between PCGS and NGC, the average certified 1879-O dollar grades fractionally higher than MS61. Most Mint State examples fall within the range of MS62 to MS64, while comparable Gems are much more elusive. That is especially true of CAC-approved representatives. Brilliant surfaces awash in radiant satin luster display strong definition. The slightest bit of softness over Liberty's ear, where roller marks appear, is entirely normal. Lightly clashed. NGC ID# 253X, PCGS# 7090

- 4128 1879-S Reverse of 1878, VAM-43, MS64 PCGS.** A Top 100 Variety. VAM-43 is attributed by diagonal die lines on the right (facing) wing and the dentil below the 1 in the date. The Second Reverse, with a flat uppermost arrow feather, is much scarcer than its Third Reverse counterpart. A lustrous and lightly toned Choice silver dollar with smooth fields and a lightly marked portrait. NGC ID# 253W, PCGS# 133864 Base PCGS# 7094

**1879-S Dollar, MS68**  
**Frost, Fully Struck Type Coin**

- 4129 1879-S MS68 PCGS.** This famous type coin issue claims a mintage in excess of 9 million pieces and only becomes scarce in this remarkably high grade. Frosty, fully struck surfaces are accented with faint wisps of reddish-gold color around the rims. The devices stand out against pristine fields, generating a hint of semiprooflike contrast. None numerically finer at either PCGS or NGC (2/19). NGC ID# 253X, PCGS# 7092

**1879-S Dollar, MS66+ Deep Mirror Prooflike**  
**Dusky Violet and Golden Patina**

- 4130 1879-S MS66+ Deep Mirror Prooflike PCGS. CAC.** This second-year San Francisco Morgan dollar issue is well-known for its availability in virtually any grade. Deep Mirror Prooflike representatives are more elusive, becoming genuinely scarce at this level and rare any finer. Dusky violet and golden patina encircle brilliant interiors on each side. The central motifs present a thick layer of mint frost that generates the noted contrast against reflective, beautifully preserved fields. Population: 62 in 66 (1 in 66+) Deep Mirror Prooflike, 8 finer. CAC: 14 in 66, 0 finer (2/19). *From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 45PS, PCGS# 97093

- 4131 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS.** A Top 100 Variety. The most prominent overdate of the Morgan dollar series, with strong remnants of the 79 apparent. VAMs 3 and 4 were the last stand of the Second Reverse and its parallel upper arrow feather. A lustrous stone-white Gem with a sharp strike and moderate facial grazes. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

- 4132 1880/79-CC Reverse of 1878, VAM-4, MS63 Prooflike PCGS.** A Top 100 Variety. This flashy silver dollar is mostly brilliant, though a few freckles of deep autumn-brown toning are noted on the obverse rim near 4 and 11 o'clock. The strike is sharp, and the reverse is well preserved. The popular Second Reverse overdate variety. NGC ID# AP7P, PCGS# 41131 Base PCGS# 7109

**1880-CC Dollar, VAM-5, MS66+  
8 Over High 7, Cartwheel Luster**

**4133 1880-CC 8 Over High 7, VAM-5, MS66+ PCGS. CAC.** A Top 100 Variety. The second 8 is punched over a clear underlying 7. Fully brilliant surfaces feature rolling cartwheel mint frost. The effect is outstanding. Faint roller marks appear over incompletely struck centers. There are a few ticks on the eagle's breast but virtually none in the fields on either side. Only 10 1880-CC 8 Over High 7 submissions are graded higher at PCGS (3/19). NGC ID# 2542, PCGS# 133877 Base PCGS# 7102

**4134 1880-CC 8 Over Low 7, VAM-6, MS65 PCGS.** A Top 100 Variety. Peach-gold patina endows the margins of this otherwise lightly toned Gem. The lustrous surfaces are exceptionally smooth, even for the MS65 level. The strike is crisp, and the underdigit 7 is readily apparent. A popular Carson City *Guide Book* variety. NGC ID# 2542, PCGS# 133878 Base PCGS# 7104

**4135 1880-CC 8 Over Low 7, VAM-6, MS66 PCGS.** A Top 100 Variety. The variety is undesignated on the PCGS insert, but the crossbar and downstroke of the underdigit 7 is blatant. A lustrous and virtually brilliant Premium Gem that boasts remarkably smooth fields. The incompletely impressed centers display light vertical roller marks, as produced. NGC ID# 2542, PCGS# 133878 Base PCGS# 7104

**4136 1880-CC MS66 PCGS.** Third Reverse, as are all non-overdate 1880-CCs. Boldly struck, with good definition over Liberty's ear, and only a bit of weakness to the reverse. The reverse fields are largely free of even trivial marks, with only a couple by the arrowheads noted. Two carbon spots are seen on the obverse, with a few smaller ones on the reverse near the mintmark, but they aren't distracting. Liberty's thickly frosted portrait is smooth and attractive. NGC ID# 2542, PCGS# 7100

**4137 1880-CC MS66 PCGS.** The central strike is weak, so it isn't immediately obvious this is a Reverse of 1879. However, the surfaces display exceptional, thick mint frost, a typical trait for Carson City dollars. Each side is remarkably free from abrasions. A thin lunule of the 7 underdigit can be seen with a loupe just below the second 8 in the date. NGC ID# 2542, PCGS# 7100

**4138 1880-O MS64 NGC.** From a mintage of 5.3 million pieces, the 1880-O Morgan dollar is readily available in MS64 condition, but finer coins are conditionally elusive. This attractive Choice example is sharply detailed throughout, with lightly marked surfaces that radiate vibrant mint luster. NGC has graded 20 numerically finer examples (2/19). NGC ID# 2543, PCGS# 7114

**4139 1880-O MS64+ PCGS.** Small or Micro O. The 1880-O is a famous conditional rarity, collectible in MS64 but far more costly as a full Gem. This lustrous, brilliant, and sharply struck example comes close to MS65 quality, but shows one small tick on the cheek below the eye. NGC ID# 2543, PCGS# 7114

**4140 1880-O MS64+ PCGS. CAC.** This Plus-graded Choice Morgan dollar exhibits a sharp strike for a New Orleans issue, with just the slightest trace of blending on the hair above the ear. The lightly marked brilliant surfaces are lustrous and appealing. PCGS has graded 49 numerically finer examples (3/19). NGC ID# 2543, PCGS# 7114

**1880/79-O Morgan Dollar, MS64  
Deep Mirror Prooflike Specimen**

**4141 1880/79-O VAM-4, Crossbar, MS64 Deep Mirror Prooflike PCGS.** A Top 100 Variety. The remnants of an undertype 79 are visible beneath the last two digits in the date and the reverse exhibits a Small O mintmark, identifying the popular VAM-4. The deeply reflective prooflike fields of this attractive Choice example contrast boldly with the sharply detailed frosty design elements and the brilliant surfaces are lightly marked throughout. Population: 4 in 64 (1 in 64+) Deep Mirror Prooflike, 0 finer (1/19). *From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 356J, PCGS# 41288 Base PCGS# 97117

**1880-S Morgan Dollar, Toned MS67+  
Beautiful CAC Type Coin**

**4142 1880-S MS67+ PCGS. CAC.** High-grade 1880-S Morgan dollars are always in demand as type coins, and there is added attention for attractively toned pieces. This Superb Gem-Plus PCGS coin, CAC approved for outstanding quality, displays vivid rainbow toning over the obverse and gold color around the reverse borders. Sharp design elements complement radiant cartwheel luster, producing immeasurable eye appeal. A faint graze on the cheek below Liberty's eye is all that prevents virtual perfection. NGC ID# 2544, PCGS# 7118

**1880-S Morgan Dollar, MS68  
Multicolor Border Patina**

**4143 1880-S MS68 NGC.** The upper serif of the Large S mintmark is repunched. Golden-brown, powder-blue, and fire-red toning endows the peripheries, though the lustrous fields and devices are close to brilliant. A boldly struck and practically pristine representative of the widely collected Morgan dollar series. NGC ID# 2544, PCGS# 7118

**1880-S Morgan Dollar, MS68  
An Exemplary Type Coin**

- 4144 1880-S MS68 NGC.** The ultimate Morgan dollar type coin, few would argue, would be one of the 11 certified MS69 examples of the 1880-S. However, these coins are essentially uncollectible due to their value and rarity. Perhaps the “next best thing” is this MS68 coin, a formidable acquisition in this grade and virtually flawless in its own right, yet at least accessible for many collectors. Envision a coin with unsurpassed sharpness, dazzling luster, untuned surfaces, and just the faintest evidence of surface contact to make the whole thing seem real — that is this coin. It has incredible eye appeal, equal to its incredible preservation. NGC ID# 2544, PCGS# 7118

**1880-S Silver Dollar, MS68  
Large S, CAC Seal**

- 4145 1880-S MS68 PCGS. CAC.** Large S. 1880-S silver dollars are known for their quality, and the present Superb Gem is virtually as nice as they come. The sharply struck and brilliant surfaces teem with luster, and the fields are essentially immaculate. An outstanding Morgan type coin. CAC has confirmed only a single example numerically finer (3/19). NGC ID# 2544, PCGS# 7118

**1880-S Morgan Dollar, MS68+  
CAC-Approved Registry Contender**

- 4146 1880-S MS68+ NGC. CAC.** The 1880-S Morgan dollar is often available in MS68, albeit for a price, since it is one of the most plentiful dates in the series overall and a popular type coin. However, MS68 coins with a Plus designation are rare, and merely a handful of finer pieces are known. For most collectors, the current offering is the finest grade obtainable for the 1880-S dollar. The coin is brilliant, sharp, and radiant lustrous. Essentially flawless surfaces dazzle the viewer from all angles. Census: 7 in 68+, 27 in 68★, 5 finer. CAC: 167 in 68, 1 finer (2/19). NGC ID# 2544, PCGS# 7118

**1880/9-S Dollar, MS66 Deep Mirror Prooflike  
VAM-11, Hot 50 Variety**

- 4147 1880/9-S VAM-11 MS66 Deep Mirror Prooflike PCGS.** Ex: Larry Shapiro. A Hot 50 Variety. Medium S. Die polish lines within the upper-right quadrant of the 0 are diagnostic of this so-called overdate. The coin is fully struck, with the raised design elements covered in a layer of mint frost surrounded by deeply reflective, mirrorlike fields. A few blushes of pale golden color complement the largely brilliant surfaces. Population: 17 in 66 (2 in 66+) Deep Mirror Prooflike, 3 finer (2/19). PCGS# 41508 Base PCGS# 97123

- 4148 1881 MS66 PCGS.** There are only nine Superb Gems graded at PCGS and NGC combined, placing considerable pressure on survivors at this level. Each side features bright mint frost with glints of gold around the denticles. Incomplete over Liberty's ear, but trivially so. Six coins finer at PCGS (2/19). NGC ID# 2546, PCGS# 7124

- 4149 1881 MS66 NGC.** A brilliant and highly lustrous Premium Gem that is crisply struck and free from substantial contact. Considerably scarcer than the lower-mintage 1881-CC in this grade.  
Ex: *Central States Signature* (Heritage, 5/2004), lot 8263, where it sold for \$2,012.50. NGC ID# 2546, PCGS# 7124

**1881 Morgan Dollar, MS66+  
Attractively Toned Both Sides  
Just Six Pieces Finer at PCGS**

- 4150 1881 MS66+ PCGS.** A rich ring of cerulean-blue toning yields to translucent gold fields and frosted silver centers of this high-end Premium Gem 1881. More than 9 million pieces were struck, most of which went straight into storage, and apparently this piece rested undisturbed until distributed several decades later. Marks are virtually nonexistent, and the strike is sharp with just a touch of weakness above the ear. Eye appeal is terrific. Population: 29 in 66+, 6 finer (2/19). NGC ID# 2546, PCGS# 7124

**1881 Dollar, MS65 Deep Mirror Prooflike  
Original Mottled Toning, None Graded Higher**

- 4151 1881 MS65 Deep Mirror Prooflike PCGS.** Original mottled gold and russet toning joins crisply defined, frosted devices on each side. The fields feature profound mirrored reflectivity, and there are only two small ticks on Liberty's face that merit mention. Although the surfaces compare to those of a proof, this Gem DMPL circulation strike is rarer than any coin in that format. Population: 10 in 65 (2 in 65+) Deep Mirror Prooflike, 0 finer (2/19).

Ex: FUN Signature (Heritage, 1/2003), lot 7850; ANA Signature (Heritage, 8/2012), lot 6612; Dallas Signature (Heritage, 10/2012), lot 4761; Dallas Signature (Heritage, 3/2013), lot 3774, where it realized \$11,162.50.

From *The Perfection Collection of DMPL/Prooflike Morgan Dollars*. NGC ID# 3RG7, PCGS# 97125

**1881-CC Dollar, All-Brilliant MS67  
Perennially Popular**

- 4152 1881-CC MS67 NGC.** This brilliant and semiprooflike Superb Gem is well-struck and devoid of significant marks. The 1881-CC is a perennial favorite among collectors for several reasons: its Carson City origin, its mintage below 300,000 pieces, and its availability in attractive Mint State grades, courtesy of the GSA hoard. Rare any finer.

Ex: New York Signature (Heritage, 6/2005), lot 5987. NGC ID# 2549, PCGS# 7126

**1881-CC Dollar, Superb Gem  
Brilliant, Lustrous, and Bold**

- 4153 1881-CC MS67 NGC. VAM-2.** A fully struck stone-white Carson City Superb Gem that boasts dazzling luster and unabraded fields. Only delicate contact on the cheek precludes an even finer grade. The mintage of the 1881-CC is less than the 1889-CC and 1893-CC keys, though the GSA hoard has made the issue available in quality Mint State. NGC ID# 2549, PCGS# 7126

**1881-CC Dollar, Brilliant MS67  
Swirling Cartwheel Luster**

- 4154 1881-CC MS67 PCGS.** The hair over Liberty's ear, the eagle's breast feathers, and the talons exhibit razor-sharp detail. Each side features swirling cartwheel luster without any suggestion of color whatsoever. The cheek and adjacent fields are unmarked. This Carson City dollar represents the pinnacle of collectibility for the issue. PCGS has seen merely five finer submissions, while NGC has seen four (2/19). NGC ID# 2549, PCGS# 7126

**1881-CC Silver Dollar, MS67  
A High-End Carson City Type Coin**

- 4155 1881-CC MS67 PCGS.** This sharp Superb Gem is vibrantly lustrous and frost-white, showing only a few microscopic ticks that prevent an even finer grade. The 1881-CC is a popular and elusive issue in Superb Gem condition, and only four pieces are reported finer than this one at PCGS and (3/19). NGC ID# 2549, PCGS# 7126

- 4156 1881-CC MS65 Deep Mirror Prooflike PCGS. VAM-6.** A well-struck snow-white Gem of the popular and low mintage Carson City issue. Marks are mostly relegated to a minor scuff above the eagle's head. The fields are mirrored and the motifs are frosty, ensuring impressive cameo contrast. Only about 5% of '81-CC dollars are certified as DMPL.

Ex: Houston Signature (Heritage, 12/2013), lot 4033, which realized \$2,820. NGC ID# 2547, PCGS# 97127

- 4157 1881-CC MS65 Deep Prooflike NGC. VAM-2.** A pearl-white Gem that boasts an intricate strike and dazzling field reflectivity. Remarkably void of contact, even for the exacting standards of the MS65 level. The second-lowest mintage among Carson City Morgans. Census: 66 in 65 (3 in 65★) Deep Prooflike, 13 finer (3/19).

Ex: Long Beach Signature (Heritage, 2/2006), lot 1887, which realized \$1,840. NGC ID# 2547, PCGS# 97127

- 4158 1881-CC MS65 Deep Mirror Prooflike PCGS. VAM-3.** Light butter-gold toning graces the borders of this prominently mirrored and well-preserved Carson City silver dollar. The flashy fields and well-struck motifs remain brilliant. One small fingerprint is near the M in UNUM. Certified in a first-generation "rattler" holder. NGC ID# 2547, PCGS# 97127

**1881-CC Dollar, MS66+ Deep Mirror Prooflike  
Two Coins Finer at PCGS**

**4159 1881-CC MS66+ Deep Mirror Prooflike PCGS. CAC.** Nearly 150,000 1881-CC Morgan dollars were released by the Treasury during the early 1960s, paving the way for generations of collectors to collect these coins in high grades. The issue is readily available through the Premium Gem grade level, and even Superb Gems can be had without too much difficulty. Collectibility changes significantly in Deep Mirror Prooflike. Comparable representatives are scarce and highly sought-after, while finer coins are prohibitively rare.

This totally brilliant Nevada mint dollar enjoys thickly frosted, well-struck devices surrounded by mirrorlike fields that nevertheless display a hint of cartwheel luster. A touch of softness over the ear is normal. Population: 69 in 66 (4 in 66+) Deep Mirror Prooflike, 2 finer. CAC: 9 in 66, 0 finer (2/19).

*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 2547, PCGS# 97127

**1881-O Morgan, MS65 Deep Mirror Prooflike  
Among the Finest Known**

**4160 1881-O MS65 Deep Mirror Prooflike PCGS.** Deep Mirror Prooflike 1881-O Morgan dollars are usually found no finer than MS64. This Gem is conditionally rare, and none are known finer. The strike is bold, accented by a hint of light golden toning. Deeply reflective fields offer stark cameo contrast. Population: 19 in 65 (1 in 65+) Deep Mirror Prooflike, 0 finer (2/19). NGC ID# 2548, PCGS# 97129

**1881-S Morgan Dollar, MS68  
Semiprooflike and Virtually Flawless**

**4161 1881-S MS68 NGC.** This 1881-S Morgan is, in a word, spectacular. All of the hallmarks of the 1881-S dollar — razor-sharp detail, blazing luster, exceptional preservation — are on full display on this piece, joined furthermore by almost fully prooflike field mirroring. The devices are frosty, and neither side is mentionably toned. A remarkable coin that courts the viewer's eye, this piece will be a hallmark of a fine Morgan dollar or type collection. NGC lists a single finer non-Prooflike coin (2/19). NGC ID# 2549, PCGS# 7130

**1881-S Dollar, Radiant MS68  
Virtually Unimprovable for Type**

**4162 1881-S MS68 PCGS.** Frosted and sharply struck — with just a trace of golden toning between 2 and 3 o'clock on both the obverse and reverse — this near-brilliant Superb Gem represents the high production quality enjoyed by most 1881-S dollars. It is an ideal type coin with essentially mark-free surfaces and flashy mint luster. Despite numerous MS68 pieces seen for the issue, the 1881-S is a great rarity any finer. PCGS has certified just two numerically finer examples, and NGC has seen just one (2/19). NGC ID# 2549, PCGS# 7130

1881-S Dollar, MS68  
Ideal Type Coin

- 4163 1881-S MS68 NGC.** That a large silver dollar from 1881 could be so well-preserved never ceases to amaze, though it is not atypical to find examples of this S-mint issue in MS68 condition. The service has even seen one coin in MS69 (2/19). Cartwheel luster rolls over all-brilliant surfaces that show pinpoint detail over the centers. There are just a couple of flecks in the right reverse field. An ideal type coin. NGC ID# 2549, PCGS# 7130

1881-S Morgan Dollar, MS66  
Deep Mirror Prooflike Type Coin

- 4164 1881-S MS66 Deep Mirror Prooflike PCGS. CAC.** From a well-produced mintage of 12.7 million pieces, the 1881-S Morgan dollar is a favorite choice of type collectors. This delightful Premium Gem exhibits sharply detailed, frosty design elements that contrast boldly with the flawless prooflike fields. Housed in a green label holder. Population: 91 in 66 (6 in 66+) Deep Mirror Prooflike, 7 finer. CAC: 14 in 66, 0 finer (1/19).

*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 2549, PCGS# 97131

1881-S Dollar, MS67★ Deep Prooflike  
Dramatic Contrast and Eye Appeal

- 4165 1881-S MS67★ Deep Prooflike NGC.** A brilliant, unabraded and eye-catching Deep Prooflike type coin, easily earning a Star designation from NGC for out standing visual appeal. Stark cameo contrast is equally displayed by both sides, and the devices are well-struck. Under a loupe, a few faint grazes on Liberty's cheek are detected, although the glistening luminance of the Liberty portrait's luster is the chief visual characteristic. A tiny mint-made grease streak reaches from star 3 toward the dentils. Census: 9 in 67 (2 in 67★) Deep Prooflike, 2 finer (2/19). NGC ID# 2549, PCGS# 97131

1882-CC Dollar, MS67  
None Finer at NGC

- 4166 1882-CC MS67 NGC.** The plentiful 1882-CC Morgan dollar with a mintage of 1.1 million coins, of which more than half were distributed as part of the 1970s GSA release, can be found without difficulty through MS66. Coins of this quality are scarce and impossible to upgrade; No MS68 submissions are reported at NGC (3/19). Blue, violet, and golden toning progresses from the rims toward brilliant centers, with the effect being slightly more pronounced on the obverse. Clashed on each side and trivially incomplete over the centers. NGC ID# 254S, PCGS# 7134

1882-CC Dollar, MS67  
Undisturbed Mint Brilliance

- 4167 1882-CC MS67 PCGS.** Few Carson City issues are more appropriate for type representation than the 1882-CC. This blazing, untuned Superb Gem enjoys dazzling cartwheel frost and undisturbed mint brilliance. The strike is virtually complete. A remarkable example in every respect, surpassed by a single coin at PCGS. Population: 99 in 67 (4 in 67+), 1 finer (3/19). NGC ID# 254S, PCGS# 7134

1882-CC Dollar, MS67  
One Coin Certified Finer

- 4168 1882-CC MS67 PCGS.** Frosty mint luster illuminates the golden-orange and ice-blue toning around the borders of this magnificently preserved Carson City dollar. Strike softness appears on the strands over Liberty's ear and on the breast feathers. Both sides are clashed. A single example is graded numerically finer at PCGS, and none are better at NGC (3/19). NGC ID# 254S, PCGS# 7134

- 4169 1882-CC MS65 Deep Mirror Prooflike PCGS.** Here is an oddity among Morgan dollars — a Deep Mirror Prooflike Carson City coin with toning that covers the obverse in shades of sea-green, sun-gold, and lavender without impeding the reflectivity of the fields. The reverse is brilliant. Both sides of this Gem are well-struck and well-preserved, showing outstanding visual appeal. NGC ID# 254B, PCGS# 97135

**1882-CC Morgan, MS66+ Deep Mirror Prooflike  
One Finer Coin at PCGS**

- 4170 1882-CC MS66+ Deep Mirror Prooflike PCGS. CAC.** The 1882-CC Morgan dollar claims a mintage of 1.1 million pieces, a smallish production total in absolute terms, but fairly substantial in the context of the series. In addition, the 1882-CC enjoyed an especially high survival rate, as most of the coins were held in government storage until the GSA sales of the 1970s. The coins were well-produced, making the 1882-CC a plentiful issue in high grade, and many examples are seen with prooflike surfaces. However, the 1882-CC is scarce at the MS66 grade level, with Deep Mirror Prooflike surfaces, and finer coins are virtually unobtainable.

This spectacular Plus-graded Premium Gem exhibits razor-sharp definition on all design elements and the impeccably preserved, brilliant surfaces include deeply reflective prooflike fields that contrast profoundly with the frosty devices. Overall eye appeal is terrific. We expect intense competition from Registry Set enthusiasts when this lot is called. Population: 83 in 66 (4 in 66+) Deep Mirror Prooflike, 1 finer. CAC: 8 in 66, 0 finer (2/19).

*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 254B, PCGS# 97135

- 4171 1882-O MS66 PCGS.** Frosty, blazing mint luster engulfs this Premium Gem 1882-O Morgan dollar, complementing a lack of abrasions on either side. Slight strike weakness is evident on the hair above Liberty's ear, but the coin is otherwise well-struck. Population: 90 in 66 (11 in 66+), 7 finer (3/19). NGC ID# 254C, PCGS# 7136

**1882-O Dollar, MS66 Prooflike  
Fully Struck at the Centers**

- 4172 1882-O MS66 Prooflike PCGS. CAC.** New Orleans silver dollars are notorious for soft strikes, particularly at the centers, yet the present piece is fully impressed. In addition, it lacks the bagmarks seen on most 1882-O Morgans, and to further separate this coin from the pack, the fields exhibit pronounced reflectivity. Highly attractive and virtually untuned aside from a single spot on the cheek and scattered blushes of golden color. Housed in a green label holder. Population: 6 in 66 Prooflike, 0 finer. CAC: 1 in 66, 0 finer (2/19).

*Ex: Dr. Volker Dube Collection (Heritage, 2/2005), lot 7226; Chicago Signature (Heritage, 8/2011), lot 7312, where it brought \$10,925.*

*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 254C, PCGS# 7137

- 4173 1882-O/S Recessed, VAM-4, MS64 PCGS.** A Top 100 Variety. A bold diagonal line within the New Orleans mintmark confirms the "O/S Strong" variety. VAM-4 is seen more often than VAM-4, and both are regarded as the Strong overmintmark, while VAM-5 is called the Weak overmintmark. A lustrous and minimally marked almond-gold example. Well struck from rusted dies. NGC ID# 254D, PCGS# 133891 Base PCGS# 7138

- 4174 1882-S MS65 Deep Mirror Prooflike NGC.** Light peripheral toning does not intrude on the brilliant silver centers, which display deeply mirrored fields and sharply struck motifs. A sparkling, misty haze surrounds some of the devices. The coin is richly reflective with a few minor contact marks on each side, but Liberty's cheek is clean and smooth. The eye appeal is outstanding. Census: 72 in 65 (1 in 65+) Deep Mirror Prooflike, 8 finer (3/19).

*Ex: Central States Signature (Heritage, 5/2003), lot 6477. NGC ID# 254F, PCGS# 97141*

- 4175 1883 MS67 PCGS.** This spectacular Superb Gem exhibits sharply detailed design elements in most areas, but just a trace of blending is apparent on the hair above the ear. The virtually pristine surfaces radiate vibrant mint luster throughout. PCGS has graded only five numerically finer examples (2/19). NGC ID# 254G, PCGS# 7142

**1883 Silver Dollar, MS67+  
Untoned and Lustrous**

- 4176 1883 MS67+ PCGS.** This amazing Morgan dollar has brilliant luster and untuned silver surfaces with exceptional eye appeal. The obverse die was in use for a long time when this piece was struck, now exhibiting several obverse die cracks and fine die rust that gives Liberty's portrait a stippled appearance. PCGS has examined only five finer submissions (2/19). NGC ID# 254G, PCGS# 7142

1883 Dollar, MS66 Deep Mirror Prooflike  
Ex: D.L. Hansen Collection  
None Graded Finer

**4177** 1883 MS66 Deep Mirror Prooflike PCGS. CAC. Ex: D.L. Hansen Collection. Dave Bowers has rightly pronounced the 1883 Morgan dollar a plentiful issue in most any grade. The population data bears that out. However, he significantly overestimates the availability of the 1883 in Prooflike and, particularly, Deep Mirror Prooflike condition. Survivors of this quality are major rarities, residing in only the most advanced collections, as did this Premium Gem. Satiny smooth and overtly reflective fields surround frosted motifs on each side. Strike definition is bold, but perhaps the most impressive feature is the lack of distracting abrasions. Population: 16 in 66 (2 in 66+) Deep Mirror Prooflike, 0 finer. CAC: 7 in 66, 0 finer (2/19).

*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 254G, PCGS# 97143

1883-CC Silver Dollar, MS67  
Outstanding Preservation

**4178** 1883-CC MS67 PCGS. VAM-5B. A popular die marriage among specialists, collected in five stages as VAM-5 through VAM-5D. A hint of wheat-gold visits the lower obverse field, but this thoroughly lustrous Superb Gem is mostly white. Crisply struck and uncommonly free from contact. The 1882-CC through 1884-CC are regarded as Carson City type coins, with most better examples originally from the GSA auctions of the 1970s. NGC ID# 254J, PCGS# 7144

1883-CC Dollar, Fully Struck MS67  
VAM-3A, Nearly Impossible to Improve

**4179** 1883-CC MS67 PCGS. VAM-3A. Widespread dispersals of the 1883-CC during the GSA release of the 1970s explains the collectibility of the issue through MS66. In Superb Gem, this Carson City product becomes scarce, and it is practically impossible to upgrade with only five numerically finer pieces at PCGS (2/19). Cartwheel luster, total brilliance, and full strike characteristics define this MS67 example. The N is clashed below the chin, and a raised dash appears below the second 8 in the date. NGC ID# 254J, PCGS# 7144

1883-O Dollar, MS67  
Among the Finest Known

**4180** 1883-O MS67 PCGS. This brilliant, frosty Superb Gem is among the finest known examples of this typically plentiful New Orleans issue, and it is conditionally scarce as such. No Prooflike or Deep Mirror Prooflike coins are listed at PCGS finer than MS66+. This piece is sharp and well-preserved, with only a small mark in the field near Liberty's chin preventing a Plus designation. Population: 93 in 67 (10 in 67+), 0 finer (2/19). NGC ID# 254J, PCGS# 7146

**1883-O Silver Dollar, Brilliant MS67  
Intense Luster and Eye Appeal**

**4181 1883-O MS67 PCGS.** Somewhat available at the MS67 grade, but nonexistent any finer, the 1883-O seldom qualifies for high marks in all the critical areas: surface quality, strike, and eye appeal. This Superb Gem example displays nearly pristine, frosted fields and brilliant, snow-white luster. The strike is sharp for an 1883-O, with just a touch of central weakness at the eagle's breast and above the ear. A glass reveals an overall speckling of microscopic die rust throughout both sides, invisible without magnification. Population: 93 in 67 (10 in 67+), 0 finer (2/19). NGC ID# 254J, PCGS# 7146

**1883-O Dollar, MS67+  
Among the Finest at Both Firms**

**4182 1883-O MS67+ PCGS.** The widely available 1883-O is anything but in this unsurpassed state of preservation. This is one of only 10 MS67+ representatives at PCGS, and none are graded finer (3/19). The radiant obverse is brilliant with blushes of thin color along the upper border, while the reverse is entirely toned in pale lavender and peach-gold patina. As sharp as a New Orleans dollar comes. NGC ID# 254J, PCGS# 7146

**1883-O Dollar, MS66+ Deep Mirror Prooflike  
Spectacular Cameo Contrast, None Finer**

**4183 1883-O MS66+ Deep Mirror Prooflike PCGS. CAC.** In *A Guide Book of Morgan Silver Dollars*, Bowers writes that a Deep Mirror Prooflike example of the 1883-O "with cameo contrast is a joy to behold." Indeed, this spectacular Premium Gem has the look of a proof, with fully struck motifs that stand out fully against the jet-black fields. Dusky remnants of a partial print appear at the upper obverse. This coin possesses magnificent eye appeal, and is the single finest example at PCGS by the margin of the Plus designation. Population: 26 in 66 (1 in 66+) Deep Mirror Prooflike, 0 finer. CAC: 3 in 66, 0 finer (2/19).  
*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 254J, PCGS# 97147

**1883-S Dollar, Choice Uncirculated  
Far Above-Average Preservation**

**4184 1883-S MS64 PCGS.** The Uncirculated population of 1883-S Morgan dollars is skewed heavily toward the lower Mint State grades, namely MS61 through MS63. The issue becomes more elusive in MS64, although it remains collectible at that level. In Gem condition the 1883-S transitions from accessible to out-of-reach. This brilliant near-Gem features frosty cartwheel luster and crisp central definition. Small marks on the lower portrait limit the grade. PCGS reports 24 higher grading events (2/19).  
*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 254K, PCGS# 7148

**1883-S Morgan Dollar, Challenging MS64**

**4185 1883-S MS64 PCGS.** The 1883-S is a conditionally challenging S-mint dollar, even though 6.25 million pieces were minted. It is seldom seen above MS63 and such pieces are always in demand by advanced collectors. This piece has pinpoint striking details, as seen on earlier S-mint dollars, paired with the bright, flashy luster this issue is known for. Minimally abraded, the otherwise brilliant surfaces show just a touch of russet color at the margin on each side. PCGS has graded 24 numerically finer examples (3/19).  
*Ex: Long Beach Signature (Heritage, 2/2006), lot 1950, realized \$3,220.* NGC ID# 254K, PCGS# 7148

**1883-S Morgan Dollar, MS64 Prooflike  
Scarcer S-Mint Issue in High Grade**

**4186 1883-S MS64 Prooflike ANACS.** The early San Francisco Morgan Dollars, 1878-S to 1882-S, are available in quantity in Gem and higher grades. A mintage of 6,250,000 pieces would appear to place the 1883-S in the same league as its San Francisco predecessors. However, this is not the case, since the 1883-S (and the even scarcer 1884-S) never emerged in large numbers in Mint State from the Treasury or Redfield hoards. The issue must have largely circulated, or was melted to conform to the Pittman Act. Although scarce with any finish, the 1883-S is a noted rarity with prooflike fields. The present well-struck piece has flashy fields, attractive peripheral honey color, and is well-preserved despite a solitary small mark beneath the eye. NGC ID# 254K, PCGS# 7149

**1884 Dollar, MS66+ Prooflike  
Conditionally Rare at This Level**

- 4187 1884 MS66+ Prooflike PCGS. CAC.** This brilliant dollar is sharply struck and thoroughly Prooflike on each side. A few blushes of violet color appear at the rims, while marks are absolutely minor for the grade. Dave Bowers reports that "some prooflike [1884 Morgan dollars] exist and are in the distinct minority." The population figures confirm the rarity of this Premium Gem. Population: 10 in 66 (2 in 66+) Prooflike, 1 finer. CAC: 3 in 66, 0 finer (2/19).

Ex: *Summer FUN Signature* (Heritage, 7/2015), lot 4221, where it brought \$2,585.

From *The Perfection Collection of DMPL/Prooflike Morgan Dollars*. NGC ID# 267J, PCGS# 7151

**1884-CC Dollar, MS67  
VAM-7A, Key Variety for the Issue**

- 4188 1884-CC MS67 PCGS. VAM-7A.** The die gouge on the cheek, crack through the date, doubling on 18, and massive die break above ATES OF identify VAM-7A. Nearly 800,000 Uncirculated 1884-CC dollars were distributed during the General Services Administration's sales of the 1970s, making this a plentiful issue through MS66. Comparable examples are much more challenging, and they are practically impossible to upgrade. This Superb Gem is totally brilliant and nearly full struck. Softness is limited to the eagle's left (facing) talon. PCGS reports three finer submissions (3/19). NGC ID# 8BBF, PCGS# 7152

**1884-CC Silver Dollar, MS67  
Frosty and Brilliant**

- 4189 1884-CC MS67 PCGS.** The 1884-CC dollar, plentiful through MS65, becomes elusive in higher grades and is almost non-existent above the MS67 level. The typical Mint State coin has numerous abrasions and bagmarks from handling during years of storage in Treasury vaults. Each Treasury audit would cause the bags of Morgans to be tossed about with detrimental effects to the coins. This frosty example has splendid and fully brilliant surfaces. Preservation is a cut-above. There are just three coins finer at PCGS (2/19). NGC ID# 8BBF, PCGS# 7152

- 4190 1884-CC MS66 Deep Mirror Prooflike PCGS.** The 1884-CC Morgan is an abundant coin in most Mint State conditions; even Prooflike and Deep Mirror Prooflike examples through MS65 are available. Premium Gems with a designated deep mirrors will require more searching. Russet and grayish-green patina is slightly deeper and more extensive on the obverse, while the strike is sharp throughout. The deeply mirrored surfaces are free of all but the tiniest of marks. PCGS and NGC combined have graded just seven DMPL coins in numerically higher grades (3/19). NGC ID# 254M, PCGS# 97153

- 4191 1884-CC MS66 Deep Mirror Prooflike PCGS.** A brilliant high-grade Carson City type coin. The crisply struck devices demonstrate notable contrast with the flashy fields. Scattered contact in the fields and chin merit only passing mention. Much of the mintage for the '84-CC emerged from GSA sales, yet the issue is scarce in the present condition. PCGS reports just three numerically finer DMPL examples (3/19). NGC ID# 254M, PCGS# 97153

**1884-CC Dollar, MS66+ Deep Mirror Prooflike  
Captivating Visual Quality**

- 4192 1884-CC MS66+ Deep Mirror Prooflike PCGS. CAC.** Carson City dollars manufactured in 1884 were mainly held in storage until their release during the early 1960s, accounting for the issue's collectibility, even at this high level. George Morgan's famous design stands out boldly against the mirrorlike fields on this captivating Premium Gem. Totally brilliant, thickly frosted, and well-struck with a few faint roller marks on the chin. PCGS reports three finer submissions (2/19).

From *The Perfection Collection of DMPL/Prooflike Morgan Dollars*. NGC ID# 254M, PCGS# 97153

- 4193 1884-O MS67 NGC.** Available in lesser grades but scarce at the Superb Gem level, the 1884-O is virtually unobtainable any finer than the MS67 grade. This brilliant and frosted coin radiates bright cartwheel luster over smooth and attractive surfaces, with a minimum of tiny marks too obscure to mention. Housed in a Ken Bressett signature holder. Just two numerically finer examples exist at PCGS and NGC combined (3/19). NGC ID# 254N, PCGS# 7154

**1884-O Dollar, MS67  
Ideal for an Advanced Registry Set**

- 4194 1884-O MS67 PCGS.** Like many other so-called "common date" Morgan dollars, this issue becomes scarce at the Superb Gem grade level. Only one finer example has ever been certified by PCGS (2/19). This is a frosty Registry-grade dollar with fully brilliant surfaces and above-average definition on the design elements. Among the finest quality examples available to collectors. NGC ID# 254N, PCGS# 7154

- 4195 1884-O MS67 PCGS. CAC.** Mint luster is uncharacteristically frosted throughout this gorgeous, CAC-approved Superb Gem. A lack of toning enhances the cartwheel effect, heightening the visual appeal. A trifle soft at the central obverse, but strong on the other side. One coin is numerically finer at PCGS (2/19). NGC ID# 254N, PCGS# 7154

**1884-O Morgan Dollar, MS66**  
**Spectacular Deep Mirror Prooflike Surfaces**

- 4196 1884-O MS66 Deep Mirror Prooflike PCGS.** Prooflike examples of the 1884-O Morgan dollar are not hard to locate, but examples with the contrast displayed by this coin are rare. The well-struck, frosty devices stand out boldly against the mirrored fields. A few wisps of golden-tan toning are evident, and a few minor hairlines can be detected on both sides. Housed in a green label holder. Population: 68 in 66 (4 in 66+) Deep Mirror Prooflike, 2 finer (3/19).  
*Ex: Central States Signature (Heritage, 4/2011), lot 5694, realized \$4,025. NGC ID# 256X, PCGS# 97155*

**1884-S Dollar, MS61**  
**Famously Challenging in Mint State**

- 4197 1884-S MS61 NGC.** Dusky golden-gray accents and soft mint luster grace each side, although this Uncirculated example of the conditionally rare 1884-S dollar remains largely brilliant. Incompleteness occurs over the centers and on the upper part of Liberty's cheek. Abrasions are scant. NGC ID# 254P, PCGS# 7156
- 4198 1885 MS66 Deep Mirror Prooflike PCGS.** A brilliant Gem with dazzling mirrored fields and frosted central devices. A hint of faint golden patina is seen over each side. This is a well-struck and imposing Morgan dollar, not really rare in Deep Mirror Prooflike, but scarce this fine. PCGS reports just one numerically finer coin in DMPL (3/19). NGC ID# 45WM, PCGS# 97159

**1885 Morgan Dollar, MS66**  
**Registry Grade Deep Mirror Prooflike Example**

- 4199 1885 MS66 Deep Mirror Prooflike PCGS. CAC.** Morgan dollar production declined dramatically at San Francisco and Carson City in 1885, so the Philadelphia Mint struck a staggering total of 17.7 million examples to meet the requirements of the Bland-Allison Act. The coins were well-made, but the issue is more difficult to locate in high grade than the large production total would indicate. This sharply detailed Premium Gem exhibits well-preserved surfaces, with deeply reflective prooflike fields that contrast profoundly with the frosty devices. PCGS has graded only one Deep Mirror Prooflike example in higher numeric grade (1/19).  
*From The Perfection Collection of DMPL/Prooflike Morgan Dollars. NGC ID# 45WM, PCGS# 97159*

- 4200 1885-CC MS66 PCGS.** Multiple bands of rainbow color decorate the upper reverse and add tremendous eye appeal to this thoroughly lustrous Premium Gem 1885-CC. The obverse is exceptionally smooth, though Liberty's cheek and the upper-reverse field display wispy contact. The fields are otherwise semireflective and nearly unmarked. NGC ID# 254S, PCGS# 7160
- 4201 1885-CC MS66 PCGS. VAM-3.** Dynamic luster, a good strike, smooth surfaces, and a mere hint of apricot toning all combine to confirm the quality of this high-grade Carson City silver dollar. The 1885-CC ranks among the lowest mintage business issues of the series, though it is affordable courtesy of a GSA hoard dispersed during the 1970s. NGC ID# 254S, PCGS# 7160
- 4202 1885-CC MS66 NGC. VAM-2.** Frosty, untuned luster is original across both sides of this Premium Gem 1885-CC dollar. The centers show minor incompleteness, and the hair above the ear displays faint roller marks (as issued) when studied under a loupe. A lack of abrasions confirms the high grade. NGC ID# 254S, PCGS# 7160

**1885-CC Dollar, MS67**  
**Five Finer Coins at NGC**

- 4203 1885-CC MS67 NGC.** Ken Bressett Signature holder. More than half of the 228,000-coin mintage was stored after production and subsequently released during the GSA sales of the 1970s. The issue only becomes scarce in Superb Gem condition, but the coins at that level are in high demand. A hint of dusky gold color over unmarked silver surfaces attests to the coin's originality. Swirling mint luster and a sharp strike appear on each side. NGC reports five finer submissions (3/19). NGC ID# 254S, PCGS# 7160

**1885-CC Morgan Dollar, MS67  
Exceptional Branch Mint Type Coin**

**4204 1885-CC MS67 PCGS.** The 1885-CC Morgan dollar claims an enticingly low mintage of 228,000 pieces, but much of the production was held in government storage until the GSA sales of the 1970s, making the issue readily available in high grade today. The 1885-CC is scarce at the MS67 grade level, however, and finer coins are rare. This delightful Superb Gem is sharply detailed and impeccably preserved, with vibrant mint luster and terrific eye appeal. PCGS has graded one numerically finer example (2/19). NGC ID# 254S, PCGS# 7160

**4205 1885-CC MS65 Deep Mirror Prooflike PCGS. VAM-3.** A brilliant Gem with exemplary field reflectivity and a bold strike. A lens reveals only minor surface imperfections. The lowest mintage Carson City Morgan issue, and scarce in Deep Mirror Prooflike format. NGC ID# 254S, PCGS# 97161

**1885-O Morgan, MS66 Deep Mirror Prooflike  
Registry Grade Example**

**4206 1885-O MS66 Deep Mirror Prooflike PCGS. CAC.** Light lemon toning adorns the borders of this deeply mirrored Premium Gem. Crisply struck for a New Orleans issue, and beautifully preserved, the cheek and neck show only trivial signs of contact. Overall eye appeal is terrific. Certified in a green label holder. Population: 55 in 66 (5 in 66+) Deep Mirror Prooflike, 1 finer (2/19).

*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 254T, PCGS# 97163

**1886 Morgan Dollar, MS68  
Warm Original Toning  
A Registry Set Condition Rarity**

**4207 1886 MS68 NGC.** The availability of the 1886 Morgan dollar — a common date in most grades — falls off sharply above MS67. The only MS68 coins certified are non-Prooflike pieces, as seen here. They are also rare and are of the utmost importance to Registry Set collectors. The coin offered here is almost flawless, showing the typical satin luster of the 1886 issue amid warm golden toning on the obverse. Powder-blue, lavender, and orange-gold toning covers the reverse. This is a well-struck coin with tremendous eye appeal, among the finest 1886 dollars certified. Census: 33 in 68 (3 in 68+, 2 in 68★), 0 finer (2/19). NGC ID# 254V, PCGS# 7166

**1886 Dollar, MS67 Prooflike  
Faint Dusting of Original Color**

**4208 1886 MS67 Prooflike PCGS. CAC.** Less than 2% of all 1886 Morgan dollar submissions at PCGS have received a Prooflike or Deep Mirror Prooflike designation, attesting to the issue's relative scarcity with any sort of field reflectivity or cameo appearance. A faint dusting of original golden color graces otherwise brilliant surfaces practically devoid of imperfection and fully struck to boot. Population: 3 in 67 Prooflike, 0 finer. CAC: 1 in 67, 0 finer (2/19). *From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 254V, PCGS# 7167

**1886 Morgan Dollar, MS66  
Rare Deep Prooflike Example**

**4209 1886 MS66 Deep Prooflike NGC.** The 1886 Morgan dollar boasts a huge mintage of nearly 20 million pieces, making it an available issue in high grade and a favorite choice of type collectors. However, few examples seen have Deep Prooflike surfaces. This delightful Premium Gem exhibits sharply detailed, frosty devices that contrast profoundly with the deeply reflective prooflike fields. Census: 13 in 66 (2 in 66★) Deep Prooflike, 6 finer (3/19). NGC ID# 254V, PCGS# 97167

**1886 Morgan Dollar, MS66★  
Elusive Deep Prooflike Specimen**

- 4210 1886 MS66★ Deep Prooflike NGC. CAC.** Beautiful butter-gold, powder-blue, and rose-red toning dominates the impeccably preserved reverse surfaces of this spectacular Premium Gem. The obverse is brilliant and exhibits impressive cameo contrast between the reflective fields and the sharply detailed frosty devices. Census: 13 in 66 (2 in 66★) Deep Prooflike, 6 finer (3/19).  
*Ex: Sacramento Signature (Heritage, 3/2011), lot 3980, realized \$2,070. NGC ID# 254V, PCGS# 97167*

- 4211 1886-O MS63 PCGS.** Despite a mintage in excess of 10.7 million coins, the 1886-O Morgan dollar is a better date in Uncirculated condition. Offered here is a collectible Select representative. Finer pieces are scarce. The devices are well-struck, complementing cartwheel luster and golden toning. On the reverse, additional hues of sun-orange and olive-green are apparent. NGC ID# 254W, PCGS# 7168

**1886-O Dollar, MS64  
Prohibitive in Better Condition**

- 4212 1886-O MS64 PCGS.** An average 1886-O dollar survives in lightly circulated condition, though Mint State coins exist in sufficient quantities through MS63 to satisfy most collectors. Those who require a better-quality example have virtually no choice but to locate a near-Gem, as only three finer pieces in MS65 are graded at both services combined (all are at PCGS) (2/19). The fields are impressively clean on this brilliant, satiny representative. Slightly incomplete definition at the centers is absolutely normal for the issue. NGC ID# 254W, PCGS# 7168

**1886-O Dollar, MS64  
Major Series Condition Rarity**

- 4213 1886-O MS64 PCGS.** The 1886-O is scarce in near-Gem and rare any finer. The lustrous surfaces are untuned except for whispers of light gold around the reverse margins. Well struck, save for minor softness on the hair above Liberty's ear. Grazes on Liberty's face, especially the nose, limit the grade. PCGS and NGC have seen only three coins that grade finer (2/19).  
*Ex: Central States Signature (Heritage, 4/2008), lot 2730, where it sold for \$7,475. NGC ID# 254W, PCGS# 7168*

**1886-S Morgan Dollar, MS65+  
Eye-Appealing and Lustrous**

- 4214 1886-S MS65+ PCGS. CAC.** The 1886-S is a better date in the Morgan dollar series, coming from a limited mintage of 750,000 coins. Pieces grading finer than MS65 are scarce and will be out of reach for many collectors. This Plus-designated Gem displays radiant cartwheel luster and a sharp strike. Exceptional preservation complements sea-green and amber toning in the margins, leaving the interiors with a light golden hue. NGC ID# 254X, PCGS# 7170

- 4215 1887 MS67 NGC. VAM-11.** A repunched date variety. The base of the 1 is widely doubled south. This lustrous and practically pristine silver type coin displays arcs of iridescent cobalt-blue, plum-red, and orange-gold toning along the right reverse margin. The right obverse dentils display similar though less prominent shades. NGC ID# 27Y3, PCGS# 7172

1887/6-O Dollar, Untoned MS64  
VAM-3, Top 100 Variety

- 4216 1887/6-O VAM-3 MS64 PCGS.** A Top 100 Variety. The remnants of the lower loop of an underlying 6 appear around the base of the 7. Strike is typically soft over the centers, but the rest of this brilliant Choice Uncirculated dollar is sharp, surprisingly so for an O-mint dollar. Field abrasions are practically unseen. There are just a couple of thin marks on Liberty's cheek and ticks on the eagle's breast and on the rim at (UN)T(ED). A satiny example of this popular *Guide Book* variety. PCGS reports one coin finer (2/19). NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

1887-S Dollar, MS64 Deep Mirror Prooflike  
Brilliant With Thin Tan-Gold Accents

- 4217 1887-S MS64 Deep Mirror Prooflike PCGS. CAC.** Most Deep Mirror Prooflike 1887-S dollars are graded in the MS62 to MS64 range. Only two coins are certified finer between the two leading services combined. The centers on this Choice offering exhibit full strike detail over the ear and the eagle's breast, and the devices on each side are delicately frosted. Brilliant, deeply Prooflike fields show flashes of original dusky tan-gold color. Population: 25 in 64 Deep Mirror Prooflike, 2 finer. CAC: 4 in 64, 0 finer (2/19). *From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 2554, PCGS# 97181

1888 Morgan Dollar, MS67  
Surprisingly Elusive in Top Grades

- 4218 1888 MS67 PCGS.** This is a surprisingly challenging issue to locate in Superb Gem condition. For perspective, we only offered seven comparable examples in 2018 and four pieces in 2017. Splashes of brick-red patina around the obverse border are the only signs of color on this frosty, otherwise brilliant Morgan dollar. The central hair strands and breast feathers show crisp detail. Free of reportable contact. Population: 52 in 67 (1 in 67+), 0 finer (2/19). NGC ID# 26KF, PCGS# 7182

1888 Silver Dollar, MS67  
None Finer at PCGS

- 4219 1888 MS67 PCGS.** The 1888 Morgan silver dollar is readily available in grades through MS66, but at MS67, the certified population thins considerably. The present Superb Gem displays bold definition on the relief elements and virtually flawless fields. Both sides are set aglow by frosty, near-brilliant luster that shows just hints of light golden toning around the extreme outer peripheries. Population: 53 in 67 (1 in 67+), 0 finer; 1 in 67 Deep Mirror Prooflike, 0 finer (3/19). *Ex: ANA Signature (Heritage, 8/2015), lot 5595, which realized \$3,760.* NGC ID# 26KF, PCGS# 7182

1888 Dollar, MS67  
Practically Unsurpassed Quality

- 4220 1888 MS67 PCGS.** The obverse rims and the area behind Liberty's cap display melded shades of golden-orange, violet, and cobalt-blue patina. A similar, if slightly subdued color pattern encircles the otherwise brilliant reverse. Frosty luster and vibrant color aside, what is perhaps most impressive about this Superb Gem is its excellent preservation, which is unsurpassed at PCGS. There is a single MS68 at NGC. Population: 52 in 67 (1 in 67+), 0 finer (3/19). NGC ID# 26KF, PCGS# 7182

- 4221 1888 MS66 Prooflike NGC.** The huge mintage of more than 19.1 million pieces resulted in remarkably few prooflike or deep mirror prooflike coins. Fewer than two dozen designated Prooflike pieces are certified by both services combined, and none in numerically finer grades. This MS66 Prooflike example is brilliant and sharply struck with only a touch of central weakness. The fields are strongly mirrored on both sides. Census: 4 in 66 Prooflike, 0 finer (3/19). NGC ID# 2555, PCGS# 7183

- 4222 1888 MS65 Deep Mirror Prooflike PCGS. CAC.** This spectacular Gem exhibits sharply detailed design elements, with a thick coat of mint frost that creates intense field-device contrast with the deeply reflective prooflike fields. The well-preserved surfaces show highlights of lavender and russet toning. Population: 56 in 65 (2 in 65+) Deep Mirror Prooflike, 12 finer. CAC: 6 in 65, 0 finer (2/19). *From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 462G, PCGS# 97183

**1888-O Dollar, MS65 Deep Mirror Prooflike  
Old Green Holder, CAC Approval**

- 4223 1888-O MS65 Deep Mirror Prooflike PCGS. CAC.** This Gem enjoys outstanding visual appeal for a New Orleans dollar. Each side is untuned and brightly frosted with overt field-device contrast. A nearly full strike softens just a touch over Liberty's ear. A tick on the upper cheek and another grazes under the eagle's right (facing) wing are the only two of note. Encapsulated in an old green label holder. Population: 67 in 65 (2 in 65+) Deep Mirror Prooflike, 6 finer. CAC: 12 in 65, 3 finer (2/19).

*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 462J, PCGS# 97185

- 4224 1888-S MS65 PCGS.** The 1888-S Morgan dollar is a condition rarity in finer grades, with just 40 PCGS certified submissions above the MS65 grade level (3/19). This lovely Gem is brilliant with frosty silver luster and excellent design definition. NGC ID# 2557, PCGS# 7186

- 4225 1888-S MS65 PCGS.** The average grade of a Mint State 1888-S is MS62, which this Gem example far exceeds. Pale-gold toning confirms the natural state of the lustrous, frosted surfaces, while a sharp strike adds to the high technical quality. Marks are limited to just a few inconsequential ticks and nicks. PCGS lists just 40 numerically finer examples (3/19). NGC ID# 2557, PCGS# 7186

**1888-S Dollar, MS65 Prooflike  
Impressive Depth of Mirroring**

- 4226 1888-S MS65 Prooflike PCGS.** Only 4% of the population of 1888-S Morgan dollars at PCGS are certified as having any degree of Prooflike or Deep Mirror Prooflike contrast. This Gem example falls into the former category. Faint roller marks appear over the central obverse. Both sides are entirely brilliant with impressive depth of field and frosty motifs. Population: 6 in 65 Prooflike, 1 finer in this contrast category (3/19). NGC ID# 349N, PCGS# 7187

**1889 Morgan Dollar, MS66+  
Appears Freshly Minted**

- 4227 1889 MS66+ PCGS. CAC.** The 1889 witnesses a 97% decline in its population at PCGS between the MS66 and MS67 grade levels. Despite a massive production of 21.7 million coins, only seven submissions are graded higher than this Premium Gem at that service (3/19). Totally brilliant and awash in swirling luster, each side exhibits a crisp impression and marvelous preservation. Inarguably deserving of the Plus designation and CAC approval sticker. NGC ID# 2558, PCGS# 7188

**1889 Silver Dollar, MS67  
None Finer at NGC**

- 4228 1889 MS67 NGC.** An enormous mintage of 21.7 million Morgan dollars was accomplished at the Philadelphia Mint in 1889, making the issue readily available in lower Mint State grades. However, many examples seen were struck from overused dies and high-grade specimens with a sharp strike are not as plentiful. At the MS67 grade level the 1889 is a prime condition rarity.

Vivid shades of sea-green and magenta toning blanket the well-preserved surfaces of this remarkable Superb Gem. Especially vibrant mint luster shines through the patina. The design elements exhibit razor-sharp definition throughout and overall eye appeal is terrific. Census: 2 in 67, 0 finer (3/19). NGC ID# 2558, PCGS# 7188

**4229 1889 MS65 Deep Mirror Prooflike PCGS.** Ex: Texas Coins. A delightful Gem Morgan dollar, with sharply detailed design elements and lightly marked surfaces that show deep prooflike reflectivity in the fields. Population: 39 in 65 (1 in 65+) Deep Mirror Prooflike, 4 finer (3/19). NGC ID# 3VWX, PCGS# 97189

**4230 1889 MS65 Deep Mirror Prooflike NGC.** This fully brilliant Gem ranks among the scarcest deep mirror prooflike examples — not just for 1889, but for all P-mint Morgans regardless of the date. Flashy silver mirrors surround nicely frosted, sharply struck devices, while marks are limited to a handful of light field abrasions and isolated nicks. This is an important opportunity for the advanced collector of DMPL or DPL Morgans — just two finer examples have been certified by NGC. Census: 11 in 65 Deep Mirror Prooflike, 2 finer (3/19).

Ex: FUN Signature (Heritage, 1/2005), lot 11442. NGC ID# 3VWX, PCGS# 97189

**1889 Morgan Dollar  
Brilliant MS65+ Deep Mirror Prooflike**

**4231 1889 MS65+ Deep Mirror Prooflike PCGS. CAC.** While this Philadelphia emission is plentiful through MS66, Deep Mirror Prooflike specimens are seldom seen, especially this nice. Total brilliance enhances contrast between the reflective fields and frosted, razor-sharp relief elements. There are impressively few field marks, and just a couple of ticks appear on Liberty's chin. Population: 39 in 65 (1 in 65+) Deep Mirror Prooflike, 4 finer. CAC: 2 in 65, 0 finer (2/19).

From The Perfection Collection of DMPL/Prooflike Morgan Dollars. NGC ID# 3VWX, PCGS# 97189

**4232 1889-CC VF30 PCGS.** An attractive midrange piece with a strong “outlining” effect with deep gold-influenced charcoal shadings around medium-gray devices. A handful of light abrasions affect the portrait and fields, but the eye appeal is strong. A great choice for this key date.

Ex: FUN Signature (Heritage, 1/2013), lot 6177, where it brought \$1,645. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan Dollar, XF45  
Lightly Abraded and Lightly Worn Key Issue**

**4233 1889-CC XF45 PCGS.** The Carson City Mint struck only 350,000 Morgan dollars in the period between when the facility was reopened on October 10 and the end of the year in 1889. As might be expected, the 1889-CC is the most elusive Carson City Morgan in today's market. This lightly worn Choice XF specimen offers lightly abraded surfaces that show some traces of prooflike reflectivity in sheltered areas. NGC ID# 2559, PCGS# 7190

**1889-CC Dollar, Choice XF  
Above-Average Detail**

**4234 1889-CC XF45 PCGS.** Untoned surfaces are bright and retain flashes of mint luster around the design elements. Light friction is most evident on the cheek, middle hair strands, and breast feathers, but this key-date 1889-CC dollar is much better-detailed than the typical survivor. Each side displays myriad hairlines, yet the only singular abrasion occurs on the lower part of the eagle. NGC ID# 2559, PCGS# 7190

**1889-CC Dollar, AU50  
Lustrous Around the Devices**

**4235 1889-CC AU50 PCGS.** Original mint luster shines from the recessed areas, while the exposed regions, including the fields and central devices, are bright and untuned. A bit of rub over the cheek, above the ear, and on the eagle's breast accounts for the grade, and each side shows moderate hairlines. The 1889-CC is, without a doubt, one of the most famous rarities in the Morgan dollar series. This lightly circulated survivor is considerably finer than usual. Encapsulated in a green label holder. NGC ID# 2559, PCGS# 7190

**1889-CC VAM-5 Dollar, AU53  
Glimpses of Luster Around the Devices**

**4236 1889-CC AU53 NGC. VAM-5.** This is the usual die pair, identified by the date set right and the left-leaning CC mintmark with the second C lower than the first. A crack from the bust tip through the lower part of 18 is indicative of a later die state, as is a clash mark at the neck-jaw juncture. This lightly circulated example of the most famous Carson City Morgan dollar retains glimpses of mint luster around the raised elements. Friction occurs over the highest points of the portrait and eagle's breast, and a few fine hairlines are seen on each side. Splashes of golden-orange toning around the borders are the only indication of color. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan Dollar, AU58  
Most Challenging Carson City Issue**

**4237 1889-CC AU58 NGC.** The Carson City Mint functioned only as an assay office for three years in the second half of the 1880s. After extensive repairs to the infrastructure were accomplished and new personnel were hired, coinage operations resumed on October 10, 1889. A small mintage of 350,000 Morgan dollars was achieved before the end of the year. Many coins were released into circulation and few were saved by contemporary collectors. Any coins held in Mint or Treasury vaults must have been released later, in a piecemeal fashion, or melted in 1918. Only a single example remained in the government stockpile at the time of the GSA sales of the 1970s. As a result, the 1889 is the most elusive Carson City Morgan dollar in today's market. This impressive near-Mint example shows just a trace of wear on the high points of the design and the lightly abraded surfaces retain traces of original mint luster, under shades of lavender-gray and golden-tan toning. NGC ID# 2559, PCGS# 7190

**4238 1889-O MS65 PCGS.** Although the 1889-O is a plentiful date, few have survived in high grades. PCGS has certified a mere 260 of these in MS65 (including 17 MS65+ pieces), and only 13 finer examples (3/19). That may seem like a significant population, but consider the 764 Set Registry collections each need an example, and thousands more collect the series as well. This Gem has brilliant and untuned silver surfaces with frosty mint luster and excellent eye appeal. NGC ID# 255A, PCGS# 7192

**4239 1889-O MS65 NGC.** The pearl-white surfaces are splendidly smooth. The hair above the ear is lightly brought up, though the remainder of the strike is good. The 1889-O has a high mintage but is rarely encountered finer than the MS65 level. Encased in a circa-2000 holder. NGC ID# 255A, PCGS# 7192

**4240 1889-O MS63 Deep Mirror Prooflike NGC. CAC.** A well-struck, cameo-contrasted Select example of this conditionally challenging New Orleans issue. Both sides are brilliant and show a good strike with light, scattered contact marks. CAC-approved Deep Prooflike coins are major rarities. Census: 31 in 63 (1 in 63+) Deep Mirror Prooflike, 27 finer. CAC: 3 in 63, 7 finer (3/19). NGC ID# 45YN, PCGS# 97193

**1889-S Dollar, MS66  
A Single Coin is Finer at PCGS**

**4241 1889-S MS66 PCGS. Ex: Jackson Hole.** This frosty dollar has brilliant surfaces with exceptional eye appeal. Both sides display swirling cartwheel mint luster without any individual marks worthy of attention. The devices are sharply struck and near-fully defined. The PCGS Population Report shows a single higher-graded example (2/19). NGC ID# 255B, PCGS# 7194

**1889-S Dollar, MS66  
Perfect for a Registry Set**

**4242 1889-S MS66 PCGS. CAC.** There are a limited number of Morgan dollar issues that claim mintages of fewer than 1 million coins. The 1889-S is one of them, and examples are unobtainable beyond the MS66 grade level. This Premium Gem enjoys cartwheel mint frost with dappled golden-russet toning around the rims. A single coin is graded finer (3/19). NGC ID# 255B, PCGS# 7194

**4243 1890 MS65+ PCGS.** A crescent of sky-blue and peach-gold toning fills the upper-right obverse corner, extending approximately one-third of the way across the smooth and frosted surface. The reverse is primarily untuned, save for faint silver-gray patina and a bit of tan-gold toning at the lower rim. High-end Gem surfaces show only incidental tiny marks, with an incomplete strike over the ear, yet sharply struck in other areas. Just five pieces are certified finer by PCGS. Population: 80 in 65+, 5 finer (3/19). NGC ID# 255C, PCGS# 7196

**4244 1890 MS65 Prooflike PCGS. CAC.** This delightful Gem Morgan dollar displays deeply reflective prooflike fields that contrast boldly with the sharply detailed frosty design elements. The lightly marked surfaces show delicate hints of lavender toning at selected angles. Population: 19 in 65 (2 in 65+) Prooflike, 1 finer. CAC: 1 in 65, 0 finer (2/19).  
*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 255C, PCGS# 7197

**4245 1890-CC MS64 PCGS.** Peach-gold, lavender, navy-blue, and olive-green toning accompanies the peripheries. The fields and motifs are nearly white. A lustrous Choice Carson City dollar with a crisp strike and refreshingly smooth surfaces. NGC ID# 255D, PCGS# 7198

- 4246** 1890-CC MS64 PCGS. In spite of its large mintage, the 1890-CC is a much better-date CC dollar, and one that is seldom offered finer than MS64. This is a bright, untoned example that is fully struck. The fields on each side display bright semireflectivity, more so on the obverse. NGC ID# 255D, PCGS# 7198

**1890-CC Morgan Dollar, MS65  
Deep Mirror Prooflike Specimen**

- 4247** 1890-CC MS65 Deep Mirror Prooflike PCGS. CAC. Ex: A Gift of Undeserved Favor. After the famously low-mintage 1885-CC and 1889-CC Morgan dollars, Carson City followed with the highest mintage for the facility and series, just over 2.3 million pieces, in 1890. Because the 1890-CC was widely distributed, however, survivorship of Mint State pieces is comparatively low. This gorgeous Gem combines boldly struck, moderately frosted silver-white devices with faintly toned, powerful mirrors. Minimally marked with outstanding eye appeal. Population: 29 in 65 (4 in 65+) Deep Mirror Prooflike, 0 finer. CAC: 5 in 65, 0 finer (2/19). Ex: *Baltimore Signature* (Heritage, 7/2008), lot 2230, realized \$18,400.  
From *The Perfection Collection of DMPL/Prooflike Morgan Dollars*. NGC ID# 45YV, PCGS# 97199

**1890-CC Dollar, MS63  
VAM-4, Tail Bar Variety**

- 4248** 1890-CC Tail Bar, VAM-4, MS63 PCGS. A Top 100 Variety. The massive die gouge that connects the fletchings to the leaves below also qualifies VAM-4 as a WOW! variety, that is to say spectacular in nature and straightforward to attribute. A large reeding mark on the chin explains the grade, while the frosty fields are otherwise minimally marked. Brightly untoned and frosty. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

**1890-CC VAM-4 Dollar, MS62 Prooflike  
CAC-Approved Tail Bar Variant**

- 4249** 1890-CC Tail Bar, VAM-4, MS62 Prooflike NGC. CAC. A Top 100 Variety. Discovered by Melvin Carmichael in August 1951, this variety has long-captured the attention of Morgan dollar enthusiasts. This magnificent example enjoys areas of spectacular multicolor toning, including a crescent along the right obverse that yields to frosty brilliance elsewhere. The fields are noticeably reflective with normal chatter for the grade. Census: 5 in 62 Prooflike, 4 finer (3/19). NGC ID# 255D, PCGS# 43338 Base PCGS# 87199

**1890-CC Dollar, MS63 ★ Prooflike  
Top 100 Variety, Tail Bar, VAM-4**

- 4250** 1890-CC Tail Bar, VAM-4, MS63 ★ Prooflike NGC. A Top 100 Variety. The VAM-4 Tail Bar variety is one of the most spectacular and recognizable in the Morgan dollar series. Bands of rainbow toning color this Select Uncirculated example with Prooflike contrast, while the remaining areas show blended golden and dusky blue-gray patina. Outstanding visual quality and totally deserving of the Star designation. Census: 4 in 63 (1 in 63★) Prooflike, 0 finer (3/19). NGC ID# 255D, PCGS# 43338 Base PCGS# 87199
- 4251** 1890-S MS66 PCGS. This impressive Premium Gem displays sharply detailed design elements and vibrant mint luster throughout, with outstanding eye appeal. A small scrape on the reverse, below AM in AMERICA, is the only mark of note. PCGS has graded eight numerically finer examples (2/19). NGC ID# 255F, PCGS# 7202

**1890-S Dollar, MS66 Prooflike  
Tied for Finest at Both Firms**

- 4252 1890-S MS66 Prooflike PCGS. CAC.** This plentiful San Francisco issue begins to pose a modest challenge in Gem condition and becomes a full-fledged rarity in MS66 Prooflike. Blushes of almond-gold color around the rims interrupt the near-total brilliance of this brightly frosted Condition Census offering. The curls over the ear and the breast feathers are fully formed. A planchet flake occurs left of star 8. Population: 5 in 66 Prooflike, 0 finer. CAC: 5 in 66, 0 finer (2/19).

*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 255F, PCGS# 7203

- 4253 1891-CC MS64 Prooflike PCGS.** The reflective fields are brilliant and display few imperfections. The cheek displays minor grazes. A nicely struck Choice example of this popular Carson City issue. Examples appeared in the GSA sales, but in much lesser quantity than the 1882 through 1884 CC-mint dates. NGC ID# 255H, PCGS# 7207

**1891-CC Dollar, MS65 Prooflike  
Glittering Untoned Example**

- 4254 1891-CC MS65 Prooflike PCGS. CAC.** Just about 20,000 1891-CC Morgan dollars are certified at PCGS, including all grades and contrast categories. Prooflike examples represent less than 3% of those submissions. This is a glittering, conditionally rare Gem example with reflective fields and well-struck, lightly frosted devices. Untoned surfaces show minimal flecks. A couple of roller marks occur on the chin. Obviously deserving of the CAC approval sticker. Population: 22 in 65 (1 in 65+) Prooflike, 2 finer. CAC: 3 in 65, 2 finer (2/19).

*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 255H, PCGS# 7207

**1891-CC Silver Dollar, MS65  
VAM-3 'Spitting Eagle'**

- 4255 1891-CC Spitting Eagle, VAM-3, MS65 PCGS.** A Top 100 Variety. Though the variety is unmentioned on the PCGS insert, the die lump below the beak confirms "Spitting" status. Both borders display orange-gold toning, but the reverse periphery exhibits deeper shades. The obverse field and portrait are brilliant. Well struck and highly lustrous. A brief reed impression below Liberty's eye, but otherwise well preserved. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

**1891-S Morgan Dollar, MS66  
Finest Prooflike Example at NGC**

- 4256 1891-S MS66 Prooflike NGC.** Here is an incredible 1891-S dollar with full prooflike surfaces, displaying lustrous, sharply detailed devices and mirrored fields on both sides. Eye appeal is terrific. This coin is tied with two other specimens at PCGS for finest certified with the Prooflike designation (3/19). Undoubtedly an extremely important condition rarity.

*Ex: Long Beach Signature (Heritage, 6/2010), lot 1143, realized \$5,750.* NGC ID# 255K, PCGS# 7211

- 4257 1891-S MS64 Deep Mirror Prooflike PCGS.** Prominently reflective fields confirm the DMPL status of this lightly toned and nicely struck San Francisco Morgan. The obverse is well preserved, and the reverse shows only unimportant marks. Certified in a green label holder. Population: 37 in 64 (1 in 64+) Deep Mirror Prooflike, 5 finer (3/19). NGC ID# 3VXL, PCGS# 97211

**1892 Morgan Dollar  
MS64 Deep Mirror Prooflike**

- 4258 1892 MS64 Deep Mirror Prooflike PCGS. CAC.** The Morgan portrait of Liberty, the eagle, and the surrounding stars and legends are all coated in a light layer of frost, creating a black-and-white effect against the Deep Mirror Prooflike fields. Unmarred by distracting chatter, this CAC-approved near-Gem showcases a strong impression and total brilliance. Population: 27 in 64 (1 in 64+) Deep Mirror Prooflike, 6 finer. CAC: 3 in 64, 0 finer (2/19). *From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 255L, PCGS# 97213

**4259 1892-CC MS63 PCGS.** The 1892-CC was not included in the GSA sales, so any large quantities of Mint State coins were released in the 1940s to 1960s, not counting the 2,500 to 3,000 coins that emerged from LaVerre Redfield's massive silver dollar hoard. This Select Uncirculated 1892-CC is frosted and lustrous with a host of tiny marks but no severe abrasions. A bold strike exists throughout both sides. NGC ID# 255M, PCGS# 7214

**4260 1892-CC MS63 PCGS. CAC. VAM-10.** A better Carson City issue, the 1892-CC was essentially absent from the GSA holdings. The present lustrous and brilliant Select example is VAM-10 with a misplaced date digit in the dentils below the 92. The fields are uncommonly smooth, and the cheek shows fewer marks than usual for the grade.

*Ex: Long Beach Signature (Heritage, 9/2015), lot 4782, which realized \$2,056.25. NGC ID# 255M, PCGS# 7214*

**4261 1892-CC MS64 PCGS.** The 1892-CC is a scarcer, late-date dollar. This is an all-brilliant near-Gem that shows the expected light abrasions on the central devices. The strike details are complete, and the mint luster is radiant and brightly lustrous, as one would expect from a Carson City product. NGC ID# 255M, PCGS# 7214

**4262 1892-CC MS64 PCGS. VAM-4A.** The mintmark is lightly repunched, and the dies are multiply clashed. This essentially brilliant Choice Carson City dollar exhibits dynamic luster and pleasing preservation. Virtually absent from the GSA sales, the 1892-CC ranks among the scarcest CC-mint issues in Mint State. NGC ID# 255M, PCGS# 7214

**4263 1892-CC MS64 PCGS. VAM-10A.** Essentially untoned except for faint golden patina at the 7 o'clock reverse border and some minor, deeply toned residue at 1 in the date. Sharply impressed and only lightly abraded for this CC-Mint issue, with frosted central devices and brilliant, cartwheel luster. Struck from the VAM-10A die pair with evidence of a possible misplaced digit beneath 9 and 2 of the date. Die clashing on both sides helps define the variety.

*Ex: New York Signature (Heritage, 10/2015), lot 4894. NGC ID# 255M, PCGS# 7214*

#### 1892-CC Silver Dollar, MS65 Attractive Multicolor Toning

**4264 1892-CC MS65 NGC.** Radiant cartwheel luster illuminates original forest-green, gold, crimson, and teal coloration on each side of this Gem 1892-CC dollar. The coin is well-struck and devoid of bothersome abrasions, producing strong eye appeal for the grade. The 1892-CC is a slightly better Carson City issue, rarely seen finer than the current Gem. NGC lists only 15 finer non-Prooflike coins (3/19). NGC ID# 255M, PCGS# 7214

#### 1892-CC Dollar, Flashy Gem

**4265 1892-CC MS65 PCGS.** Apparently, many of the 1.3 million pieces struck for this issue circulated out West. The 1892-CC is plentiful in circulated condition but scarce in better Uncirculated grades. This is an exceptionally pleasing Gem with bright, flashy mint luster and a hint of light golden toning over the obverse. The reverse remains brilliant. Sharply impressed without mentionable abrasions on either side. Forty submissions are reported finer at PCGS (2/19). NGC ID# 255M, PCGS# 7214

#### 1892-CC Morgan Dollar, MS65 Tied for Finest Prooflike Example at NGC

**4266 1892-CC MS65 Prooflike NGC.** The Carson City Mint struck more Morgan dollars than the Philadelphia facility for the first time in 1892, with a workmanlike output of 1.3 million pieces. This delightful Gem exhibits sharply detailed frosty design elements and well-preserved surfaces that show much prooflike reflectivity in the fields. Census: 4 in 65 Prooflike, 0 finer (3/19). NGC ID# 255M, PCGS# 7215

#### 1892-CC Morgan Dollar, MS63 Deep Mirror Prooflike Surfaces

**4267 1892-CC MS63 Deep Mirror Prooflike PCGS. CAC.** This amazing Carson City dollar is housed in a green label PCGS holder. It exhibits incredible contrast between deeply mirrored fields and lustrous devices. Those devices are sharply detailed, even at the centers. Here is an excellent opportunity for the advanced collector. Population: 41 in 63 Deep Mirror Prooflike, 29 finer. CAC: 3 in 63, 0 finer (1/19).

*Ex: Fort Worth ANA Signature (Heritage, 3/2010), lot 1556, realized \$4,025.*

*From The Perfection Collection of DMPL/Prooflike Morgan Dollars. NGC ID# 255M, PCGS# 97215*

**1892-O Silver Dollar, MS65**  
Few Are Known Finer

- 4268 1892-O MS65 NGC.** The 1892-O Morgan dollar has a reputation as one of the poorest-quality issues in the series with regards to strike and luster, although in *A Guide Book of Morgan Silver Dollars*, fifth edition, Q. David Bowers recalls a bag of coins in the 1970s that contained “a considerable number of fully struck gem pieces.” This MS65 coin is not quite fully struck in the centers, although it is above average. Luster is brilliant and incredibly frosty for an O-mint coin, showing only a few faint grazes under magnification. Census: 83 in 65 (7 in 65+), 5 finer; 1 in 65 Deep Prooflike, 0 finer (3/19). *Ex: Pittsburgh Signature (Heritage, 8/2004), lot 6935, which realized \$4,140; FUN Signature (Heritage, 1/2005), lot 11594, which realized \$3,565; Long Beach Signature (Heritage, 5-6/2007), lot 1577, which realized \$3,220.* NGC ID# 255N, PCGS# 7216

**1892-O Dollar, MS65+**  
Better New Orleans Issue

- 4269 1892-O MS65+ PCGS.** The Plus designation sets this piece apart from other Gem 1892-O Morgan dollars, and only about a dozen finer coins are reported by PCGS and NGC combined. In MS65+, the 1892-O is rare. This piece displays brilliant, softly frosted mint luster and largely unabraded surfaces. A touch of strike weakness affects the eagle's breast and the hair above Liberty's ear, as usual. Population: 20 in 65+, 8 finer (2/19). NGC ID# 255N, PCGS# 7216

- 4270 1892-S AU53 PCGS.** The 1892-S is one of the five key issues to the Morgan dollar series, and examples in AU are widely sought by collectors. This is a bright coin with slight reflectivity in the fields. Numerous, light abrasions are scattered across each side, but none are of individual importance. NGC ID# 255P, PCGS# 7218

- 4271 1892-S AU53 PCGS. VAM-5.** The mintmark is nicely repunched. The variety is undesignated on the holder. The 1892-S is an important conditional rarity within the Morgan dollar series. Most survivors are in VF or lower grades. A lightly circulated and minimally abraded stone-gray example with substantial luster across the borders and motifs. NGC ID# 255P, PCGS# 7218

- 4272 1892-S AU53 PCGS.** The 1892-S is the second-rarest Morgan dollar in Uncirculated condition. This AU piece retains luster in the peripheral fields, and the devices show only modest wear. Each side is bright silver-gray with a hint of light golden toning. Eye appeal is pleasing for the grade. NGC ID# 255P, PCGS# 7218

**1892-S Silver Dollar, AU58**  
Semiprooflike Fields

- 4273 1892-S AU58 NGC.** Aside from some brief field chatter and a few tiny marks and faint lines, the surfaces of this conditionally scarce 1892-S dollar are remarkably problem-free given their semiprooflike qualities. The strike is sharp and actual wear is difficult to discern. The coin is virtually untoned save for a glint of gold at the rims. A near-Mint example, challenging at this level and any finer. NGC ID# 255P, PCGS# 7218

- 4274 1892-S Doubled Date, VAM-7, AU53 PCGS.** A Top 100 Variety. The date is lightly but widely repunched. VAM-2 and VAM-7 share the same obverse die, but have a different mintmark placement. The VAM-2 mintmark is high and upright, while VAM-7 shows the mintmark lower and leaning right. Although designated as VAM-2 by PCGS, the present lot is an example of VAM-7. Of course, any AU53 1892-S silver dollar is desirable, regardless of VAM variety. The pearl-white surfaces are minimally abraded and exhibit light central wear. PCGS# 43686 Base PCGS# 7218

- 4275 1893 MS63 PCGS. VAM-2.** A conservatively assessed example of the low mintage 1893 silver dollar. Untoned and lustrous with pleasing surfaces and minor inexactness of strike at the centers. VAM-2 is a specialist-familiar variety that shows minor repunching above the 3 in the date. NGC ID# 255R, PCGS# 7220

- 4276 1893 MS64 PCGS. VAM-2.** Light wheat-gold patina accompanies this lustrous and minimally marked near-Gem. The centers show slight incompleteness, but the eye appeal is exceptional. A lower mintage Philadelphia issue, key to a date set of the series. NGC ID# 255R, PCGS# 7220

- 4277 1893 MS64 PCGS.** The 1893 is a scarcer P-mint issue with only 378,000 pieces struck. This is an all-brilliant example with smooth, satiny surfaces and far fewer abrasions than might be expected for the grade. Housed in a first-generation holder. NGC ID# 255R, PCGS# 7220

**1893 Dollar, Bright MS65**  
Extremely Difficult to Find Finer

- 4278 1893 MS65 PCGS.** This is the only Morgan dollar issue for the year that can be readily obtained in high grades, yet anything finer than this Gem should be considered unavailable. Bright, frosty, and virtually unmarked, this spectacular survivor from a mintage of 378,000 coins shows crisp definition over the centers. A touch of softness on the talons is trivial. There are only six finer submissions at PCGS (2/19). NGC ID# 255R, PCGS# 7220

**1893 Morgan Dollar, MS65**  
Conditionally Rare Any Finer

- 4279 1893 MS65 NGC.** The 1893 Morgan dollar claims a small mintage of 378,000 pieces, due to the effects of the Panic of 1893. This impressive Gem exhibits sharply detailed design elements and well-preserved, mostly brilliant surfaces, with a few subtle hints of lavender and pale gold toning. Vibrant mint luster adds to the outstanding eye appeal. Census: 79 in 65 (3 in 65+), 4 finer (3/19). NGC ID# 255R, PCGS# 7220

**1893 Dollar, MS65**  
Challenging Year, Colorful Rims

- 4280 1893 MS65 PCGS. CAC.** Ex: Sunnywood / Simpson. All four Morgan dollar issues from this economically fraught year are challenging. The 1893-P is the only one that most collectors can reasonably target at the Gem grade level. Color is confined mainly to the upper obverse border, where deep shades of golden-orange, blue, and violet toning are seen. Faint tan hues cling to the rims elsewhere, but the centers are brilliant. This well-struck dollar enjoys relatively clean fields and frost mint luster. Merely six pieces are graded higher at PCGS (2/19).  
*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 255R, PCGS# 7220

**1893-CC Morgan Dollar, MS62**  
Low-Mintage, Final-Year Issue

- 4281 1893-CC MS62 PCGS.** An attractive MS62 Morgan dollar from the final year of coinage operations at the famous Carson City Mint, this coin exhibits well-detailed design elements, with just a trace of softness on the hair above Liberty's ear. The brilliant surfaces are lustrous and lightly marked for the grade. From a low mintage of 677,000 pieces. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS63**  
Lustrous and Lightly Toned

- 4282 1893-CC MS63 NGC.** Only 677,000 Morgan dollars were produced at the Carson City Mint in the first half of 1893, before the facility was demoted to an assay office and closed for coinage operations. This attractive Select specimen is typical of the issue, with well-detailed design elements that show a trace of blending on the hair above the ear and lustrous surfaces with a modicum of bag marks in the field. A few hints of violet and pale gold toning enhance the outstanding eye appeal. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, Lustrous MS64**

- 4283 1893-CC MS64 PCGS.** Only 677,000 dollars were struck at the CC mint in 1893, mostly because of the uncertainty about the future of the mint. The uncertainty ended when the mint was reduced to an assay office beginning June 1. Bright mint luster exudes from the untuned surfaces of this near-Gem, and the design features are sharply defined. This is a significant attribute of this particular piece, as many specimens are weakly struck. Minor obverse marks prevent a Gem grade. Much sought after as the final year of the Carson City dollar series.  
*Ex: Long Beach Signature (Heritage, 5/2009), lot 1167, where it brought \$8,625.* NGC ID# 255S, PCGS# 7222

**4284 1893-O AU58 PCGS. VAM-3A.** The 1893-O is the second-lowest mintage New Orleans silver dollar, trailing only the 1846-O. The present lightly toned example displays cartwheel sheen but shows a hint of wear on the hair above the ear. Marks are minimal for the grade. A clashed letter die state with a partial N (from IN) near Liberty's neck. NGC ID# 255T, PCGS# 7224

**1893-O Silver Dollar, MS64  
Rare Any Finer**

**4285 1893-O MS64 PCGS.** All 300,000 silver dollars struck at the New Orleans Mint in 1893 were produced in January. Those that were not distributed into circulation went into storage. After the closure of the New Orleans Mint, bags of silver dollars were shipped to the Treasury building in Washington D.C., from where numerous 1893-O Morgans were paid out to the public in small groups over many years. By the time of the Treasury releases of the 1960s, no bag quantities of the date remained in government storage.

Today, the 1893-O Morgan dollar is scarce in MS64 and decidedly rare finer. In fact, Choice examples like the present are typically the finest available to collectors. This piece displays vibrant, untuned mint luster and has only faint surface grazes that prevent Gem classification. The expected strike weakness is noted on the eagle's breast and above Liberty's ear on the hair curls. PCGS lists only six finer non-Prooflike coins (2/19). NGC ID# 255T, PCGS# 7224

**1893-S Silver Dollar, Very Good  
Collectible Key Coin**

**4286 1893-S VG8 PCGS. VAM-1.** A pearl-white example of the famous key date. The obverse border has a hint of golden toning. Every Morgan dollar collector can recite the mintage of '93-S, a mere 100,000 pieces. The present coin is well circulated but all legends are bold, and the wings exhibit partial plumage detail. Problem-free save for a cluster of thin marks about the eagle's right (facing) wing. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, VG10  
Colorful Border Toning**

**4287 1893-S VG10 PCGS.** A slate-gray collector-grade example of this San Francisco key, showing attractive crescents of gold, amber, crimson, and forest-green toning along the upper obverse and lower reverse borders. Hints of gold emerge in the fields elsewhere at certain angles beneath a light. The 1893-S and its mintage of merely 100,000 coins are famous in American numismatics, making this issue one of the most sought-after of any date in any coinage series. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, Fine 12  
100,000 Coins Struck**

**4288 1893-S Fine 12 PCGS.** The 1893-S is one of the most recognizable and in-demand issues in the series across all grade levels. Here is an example that served its intended role in the channels of commerce for a number of years before being set aside. It displays the effects thereof, including peppered abrasions and blending over the devices. Colorful toning encircles the obverse border, leaving the rest of the coin untuned. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, Fine 12**  
**Moderate 'Circulated Cameo' Appearance**

- 4289 1893-S Fine 12 PCGS.** In the case of the 1893-S dollar its low mintage does correspond with its key status in the series. This is an evenly worn example whose surfaces are somewhat bright in spite of its "circulated cameo" appearance. The fields are medium gray while the devices are white. No obvious or detracting marks are apparent. NGC ID# 255U, PCGS# 7226

**1893-S Silver Dollar, VF20**  
**The San Francisco Key**

- 4290 1893-S VF20 PCGS.** Uniform tan-gray patina covers this midgrade 1893-S dollar, complementing a lack of significant abrasions. All major details remain visible despite moderate wear. The 1893-S is the key to the series in all grades and the rarest Morgan dollar in Mint State. Attractive circulated pieces such as this are in demand among a majority of date and mintmark collectors. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, VF25**  
**Appealing Problem-Free Example**

- 4291 1893-S VF25 PCGS.** Does any other issue in the Morgan dollar series command as much attention across all grades as the 1893-S? Doubtful. Only 100,000 pieces were struck, edging out every other date in circulation-strike format. This example saw a typical amount of commercial use, but it shows none of the usual surface problems. Medium-to-dark gray patina and golden accents over the worn high points produces pleasing eye appeal. Expectedly abraded. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, VF30**  
**Among the 100 Greatest U.S. Coins**

- 4292 1893-S VF30 PCGS.** A token quantity of 100,000 Morgan silver dollars was produced at the San Francisco Mint in 1893. Probably most of the coins sat in storage until they were melted under the terms of the 1918 Pittman Act, while the rest entered into the channels of commerce. This piece obviously saw circulation and shows even wear over the high points. Myriad abrasions and faint hairlines appear on each side, and the surfaces have developed pleasing olive-gold patina around the borders and within the design recesses. Ranked 38th among the *Top 100 Greatest U.S. Coins*. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, VF35**  
**Capstone in the Morgan Series**

- 4293 1893-S VF35 PCGS.** No doubt the 1893-S is one of the most famous issues in the long-running and widely collected Morgan dollar series, with a record-low production total of 100,000 coins. Even friction suggests a number of years in Western circulation. Minor hairlines are typical, and a small rim nick appears above the period between S and U at 1 o'clock on the obverse. A capstone coin for any collection. NGC ID# 255U, PCGS# 7226

**1893-S Morgan Dollar, VF35**  
**Sought-After Series Key**

- 4294 1893-S VF35 PCGS.** From a famously low mintage of 100,000 pieces, the 1893-S Morgan dollar is the rarest business-strike issue of the series. This attractive Choice VF specimen shows some wear on the well-detailed design elements, but two thirds of the hair lines between the forehead and the ear remain intact and the pleasing lavender-gray surfaces are lightly abraded. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, Problem-Free XF40  
Significantly Above-Average Quality**

- 4295 1893-S XF40 PCGS.** Well-known as the lowest-mintage and rarest commercial issue of the Morgan dollar series, the 1893-S is most often seen in Very Fine grades with problems such as cleaning or damage. The present problem-free XF example is decidedly above-average in quality. Hints of luster illuminate peripheral elements, and minimally toned surfaces show fewer than the expected number of marks. A worthy candidate for the advanced specialized collection. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, XF40  
Attractive Patina, Strong Detail**

- 4296 1893-S XF40 PCGS.** Thousands of 1893-S dollars were released for commercial usage. However, a majority of the 100,000 coins struck probably remained in storage were eventually melted. Survivors usually exist in well-worn grades through VF. Strong devices are far better-defined than average. Both sides show pleasing steel-gray patina with lighter accents on the high points. NGC ID# 255U, PCGS# 7226

**1893-S Silver Dollar, XF40  
Rarest Business Issue**

- 4297 1893-S XF40 PCGS. CAC. VAM-1.** The peach-gold toning is deepest throughout the borders of this key date Morgan dollar. Abrasions are minimal given 20 points of circulation, and luster is evident within design crevices. Slightly bright and glossy. Wear is mostly seen on the eagle's breast and the hair above the ear. Ex: *Los Angeles Signature* (Heritage, 8/2009), lot 1983, which realized \$9,200. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, XF40  
Original Surfaces**

- 4298 1893-S XF40 PCGS. CAC.** The 1893-S is the unquestioned key to the Morgan dollar series. The business strike mintage of 100,000 pieces (or possibly less, if current estimates prevail) is the lowest of any known issue struck for circulation. This piece is well-struck and retains a great deal of detail for the grade. The surfaces have toned to a light brown-gray, with faint rose accents. The only noteworthy mark is a shallow abrasion just above Liberty's head. Ex: *Central States Signature* (Heritage, 5/2007), lot 4901; *Baltimore Signature* (Heritage, 3/2009), lot 1447. NGC ID# 255U, PCGS# 7226

**1894 Morgan Dollar, MS63  
Lustrous and Lightly Toned**

- 4299 1894 MS63 PCGS.** The 1894 Morgan dollar claims one of the smallest production totals of the series, at a meager 110,000 pieces. This attractive Select specimen exhibits sharply detailed design elements throughout and the lightly marked, mostly brilliant surfaces show faint highlights of pale gold and lavender toning. Vibrant mint luster adds to the outstanding visual appeal. NGC ID# 255V, PCGS# 7228

**1894 Dollar, MS64  
Frosty With Rose-Gold Accents**

- 4300 1894 MS64 PCGS.** A mintage of 110,000 coins makes the 1894 one of the most famous and challenging Philadelphia issues in the Morgan dollar series after the 1895, of which no circulation strikes are known. Soft mint frost combines with rose-gold toning that is deepest at the lower obverse. Much of each side remains brilliant with a touch of central incompleteness and relatively smooth, minimally marked fields. PCGS counts 33 numerically finer submissions (2/19). NGC ID# 255V, PCGS# 7228

**1894-O Dollar, MS63  
Brilliant Silver Surfaces**

- 4301 1894-O MS63 PCGS.** For many collectors, MS63 is the ideal combination of quality and price in the Morgan dollar series. Most issues are far more affordable in MS63 than in higher grades, and the quality is certainly acceptable. This piece is brilliant and untuned with an above average strike for the issue, and exhibits only trivial grade-consistent marks. NGC ID# 255W, PCGS# 7230

**1894-O Dollar, MS63  
Satiny New Orleans Coin**

- 4302 1894-O MS63 PCGS.** While its mintage was greater than most other issues during the mid-1890s, a significant proportion of 1894-O dollars entered circulation. Select and finer examples can be difficult to locate. This piece is mostly brilliant with satiny mint luster. The strike is a bit soft over the centers, as expected. Scattered grazes appear throughout, the most prominent one running across the cheek of Liberty.  
Ex: *Dallas Signature* (Heritage, 12/2005), lot 2547, where it brought \$2,990. NGC ID# 255W, PCGS# 7230

**1894-O Dollar, MS64  
Bright Mint Luster**

- 4303 1894-O MS64 PCGS.** While this O-mint issue is readily available across most circulated and even lesser Mint State grades, Select and finer pieces prove elusive. This attractive near-Gem, a shining silver-white piece with soft central strike details, offers surprising visual appeal. PCGS has graded only 15 numerically finer examples (2/19).  
Ex: *ANA National Money Show Signature* (Heritage, 3/2008), lot 1148, where it realized \$7,187.50. NGC ID# 255W, PCGS# 7230

- 4304 1894-S MS64 PCGS.** Original, frosty luster illuminates essentially brilliant surfaces on this Choice 1894-S Morgan dollar. A few trivial ticks on Liberty's cheek limit the grade but pose little distraction. Minor strike weakness is seen on the eagle's breast and the hair above Liberty's ear.  
Ex: *Houston Signature* (Heritage, 12/2015), lot 3944, which realized \$2,115. NGC ID# 255X, PCGS# 7232

- 4305 1894-S MS64 PCGS. VAM-1A.** The "Worm Eye" variety with a "long vertical die gouge at eye front," as described by VAMWorld.com. A hint of butter-gold patina graces this lustrous better-date silver dollar. The cheek is remarkably smooth, though the eagle's right (facing) leg is abraded. The central strike is slightly soft. Certified in a first generation holder.  
Ex: *Dallas Signature* (Heritage, 12/2005), lot 2550, which realized \$1,610. NGC ID# 255X, PCGS# 7232

- 4306 1894-S MS64 PCGS. VAM-1A.** The popular "Worm Eye" variety, described by VAMWorld.com as having "over 45 [mint-made] scratches/gouges, [the] most on a Morgan dollar obverse die." The 1894-S is a much better date at the Choice level, and this lustrous and lightly toned example is smooth save for incidental contact on the eagle's breast. Certified in a green label holder. NGC ID# 255X, PCGS# 7232

**1894-S Morgan Dollar, MS64 Prooflike  
Rarely Seen Finer**

- 4307 1894-S MS64 Prooflike NGC.** The 1894-S Morgan dollar is more available than its Philadelphia and New Orleans counterparts, but examples with prooflike surfaces are elusive. A small dark inclusion on Liberty's cheek and minor abrasions on each side limit the numerical grade of this lovely Choice example. Both sides are fully mirrored with lustrous, sharply detailed design elements. Census: 31 in 64 Prooflike, 4 finer (3/19).  
Ex: *FUN Signature* (Heritage, 1/2010), lot 3031, realized \$1,725. NGC ID# 255X, PCGS# 7233

**1894-S Morgan Dollar, MS65 Prooflike  
Registry Set Contender**

- 4308 1894-S MS65 Prooflike PCGS. CAC.** Ex: Naples II. The 1894-S Morgan dollar is a well-produced issue, generally seen with a good strike and bold luster. Gems are nonetheless considerably more elusive than examples in MS63 or MS64. The present piece displays moderate prooflikeness, all there but insufficient for the Deep Mirror designation. The strike is sharp yet not full. There are few marks, none worthy of mention save for a tiny one below the point of Liberty's nose. Tied for the finest Prooflike specimen at PCGS. Population: 2 in 65 Prooflike, 0 finer. CAC: 1 in 65, 0 finer (1/19).  
Ex: *Chicago Signature* (Heritage, 8/2011), lot 4754, realized \$9,775.  
**From The Perfection Collection of DMPL/Prooflike Morgan Dollars.** NGC ID# 255X, PCGS# 7233

**4309 1895-O AU55 PCGS.** A cleanly struck example, the surfaces are dove-gray and somewhat subdued, but not unattractive. Orange iridescence encircles the borders of each side, more prominently on the obverse. There are only a few wispy marks on Liberty's face. There is a horizontal field gouge directly below OF on the reverse, but otherwise the coin is rather lightly abraded for the AU55 grade and exhibits pleasant eye appeal.

Ex: *FUN Signature (Heritage, 1/2003)*, lot 8158, which realized \$1,380; *Long Beach Signature (Heritage, 9/2005)*, lot 6072, which realized \$1,610. NGC ID# 255Y, PCGS# 7236

#### 1895-O Morgan Dollar, AU58 Elusive Branch Mint Issue

**4310 1895-O AU58 NGC.** The 1895-O Morgan dollar is a low-mintage issue that is seldom seen in high grade. This attractive near-Gem example exhibits a typical strike for the issue and shows just a trace of high-point wear on the well-detailed design elements. The lustrous surfaces are lightly abraded and show highlights of lavender-gray toning. NGC ID# 255Y, PCGS# 7236

#### 1895-O Silver Dollar, AU58 VAM-3A, 'Bearded Eagle'

**4311 1895-O AU58 NGC. CAC. VAM-3A.** A WOW! Variety, as listed by VAMWorld.com. The "Bearded Eagle" VAM, named after the cluster of die lumps beneath the eagle's beak. The peak of the 5 in the date is repunched. A lustrous and untoned Borderline Uncirculated example of the key New Orleans Morgan issue. Free from consequential marks, and Liberty's breast shows only a whisper of wear. NGC ID# 255Y, PCGS# 7236

#### 1895-S Dollar, AU58+ High-End Semikey

**4312 1895-S AU58+ PCGS. CAC.** Iridescent gold, ice-blue, and amber toning enhances the surfaces of this high-end AU58+ Morgan dollar. Well-detailed design elements and frosty mint luster reside beneath the patina. Only 400,000 S-mint Morgan dollars were coined in 1895.

Ex: *ANA National Money Show (Heritage, 3/2011)*, lot 4140, where it realized \$3,162.50. NGC ID# 255Z, PCGS# 7238

#### 1895-S Dollar, Choice Uncirculated Low-Mintage San Francisco Issue

**4313 1895-S MS64 PCGS.** The 1895-S Morgan dollar (400,000 coins) is not especially difficult to locate in MS64 condition, but finer grades are definitely elusive. This attractive Choice Uncirculated example displays sharply detailed design elements and frosty surfaces under pleasing shades of lavender-gray toning. Field chatter is minimal. Only one small scuff above 95 stands out. PCGS has graded 48 finer examples (2/19). NGC ID# 255Z, PCGS# 7238

#### 1895-S Morgan Dollar, MS64 Elusive Semikey Issue

**4314 1895-S MS64 PCGS.** The surfaces are mostly color-free on this better-date near-Gem Morgan dollar, showing well-frosted devices and surfaces that are surprisingly clean, save for a couple of small marks on Liberty's chin and a luster graze on the cheek. This piece offers good eye appeal throughout each side and would fit nicely into a mostly Gem set. PCGS has graded only 48 examples in higher grades of this low-mintage issue of 400,000 coins (2/19). Ex: *FUN Signature (Heritage, 1/2014)*, lot 6106, where it realized \$8,812.50. NGC ID# 255Z, PCGS# 7238

#### 1895-S Dollar, MS64 Bright and Lustrous

**4315 1895-S MS64 PCGS.** Three mints coined Morgan dollars in 1895, but only proofs were struck in Philadelphia. For those collectors who need just one Morgan from each year of issue, the 1895-O is most available in circulated grades, and the 1895-S is the one to locate for a Mint State example. This Choice example has frosty luster with a trace of light golden toning at the right obverse border. PCGS has only certified 48 finer pieces (2/19).

Ex: *Long Beach Signature (Heritage, 5/2009)*, lot 1198, where it realized \$6,325. NGC ID# 255Z, PCGS# 7238

**1895-S Dollar, Satiny MS64  
Seldom Seen Finer**

- 4316 1895-S MS64 NGC.** A hint of reflectivity in the fields does not produce a Prooflike designation, although it does give this near-Gem 1895-S Morgan dollar a satiny appearance. No abrasions mar the eye appeal, and neither side has mentionable toning other than a hint of gold around the outer peripheries. Strike sharpness is above average for the issue. NGC lists only 15 finer non-Prooflike coins (3/19).

*Ex: New York Signature (Heritage, 11/2003), lot 8644, which realized \$4,370. NGC ID# 255Z, PCGS# 7238*

**1895-S Morgan Dollar, MS64+  
Clear Cheek on Liberty**

- 4317 1895-S MS64+ PCGS. CAC.** The low mintage of just 400,000 pieces makes the 1895-S much more than just a passing interest for dollar collectors, and its reputation for bagmarks and other surface problems often raises warning flags. This borderline Gem example earns its Plus designation from PCGS for a clear cheek on Liberty and only a few minor, inconsequential marks elsewhere on its surfaces. The fields show semiprooflike flash with a whisper of pale-gold toning. As usual, the strike is a bit soft over the ear, but the eagle is fully sharp including most of the talon definition. Silver mint luster radiates boldly from the frosted central motifs. High-end, Choice examples of the issue are scarce in today's market. PCGS has graded 48 numerically finer examples (2/19). NGC ID# 255Z, PCGS# 7238

**1895-S Morgan, MS62 Deep Mirror Prooflike  
S Over Horizontal S, VAM-4**

- 4318 1895-S S Over Horizontal S, VAM-4, MS62 Deep Mirror Prooflike ANACS.** A Top 100 Variety. Highlights of sea-green, lavender, and magenta toning visit the surfaces of this impressive MS62 example. The expected number of minor contact marks are present and much prooflike reflectivity is evident in the fields. The remnants of a horizontally oriented S appear below the primary mintmark, identifying the popular VAM-4 variety. NGC ID# 255Z, PCGS# 43808 Base PCGS# 97239

**1896 Morgan Dollar, MS66  
Rare Deep Mirror Prooflike Example**

- 4319 1896 MS66 Deep Mirror Prooflike PCGS. CAC.** The 1896 Morgan dollar is not too difficult to locate with prooflike surfaces, but examples with any cameo contrast set against deep, watery mirrors are rare. This delightful Premium Gem exhibits frosty design elements and reflective fields that show white-on-black flash when the coin is tilted in the light. Only a few minor contact marks are evident, along with scattered glints of faint gold toning. Population: 24 in 66 (1 in 66+) Deep Mirror Prooflike, 1 finer. CAC: 4 in 66, 0 finer (2/19).

*Ex: New York Signature (Heritage, 3/2012), lot 3728, which brought \$8,050.*

*From The Perfection Collection of DMPL/Prooflike Morgan Dollars. NGC ID# 2562, PCGS# 97241*

**1896-O Dollar, Satiny MS63  
Scarcely Seen Finer**

- 4320 1896-O MS63 NGC.** This Select example is better-struck than the typical Uncirculated 1896-O dollar. It has slightly subdued, satiny mint luster, as usual, and each side is essentially untuned and minimally abraded. A diagonal hairline scratch on the cheek limits the Mint State rating without affecting the visual appeal. NGC reports 14 finer submissions (2/19).

*Ex: Long Beach Signature (Heritage, 2/2000), lot 5625, where it brought \$9,106.25. NGC ID# 27ZU, PCGS# 7242*

**1896-O Dollar, MS63  
Elusive in Better Grades of Uncirculated**

- 4321 1896-O MS63 PCGS.** *Ex: Shrike Set.* Although a significant mintage of nearly 5 million silver dollars was generated at New Orleans in 1896, the issue is a condition rarity as most of the production entered circulation. Mint State survivors are elusive at all numeric levels. This Select specimen is fully brilliant with frosty silver luster and entirely untuned surfaces. Marks are consistent with the grade and the strike is about average. PCGS has only certified 34 finer pieces (2/19).

*From The Shrike Set - The Karschner Collection of Morgan Dollars / FUN Signature (Heritage, 1/2011), lot 6128, where it brought \$7,187.50. NGC ID# 27ZU, PCGS# 7242*

**1896-S Morgan Dollar, MS63**  
**Elusive in Upper Mint State Levels**

- 4322 1896-S MS63 PCGS.** Although small quantities 1896-S dollars were paid out during the mid-20th century, there was never any great cache of high-grade pieces distributed. Consequently, this issue proves much more difficult to find in upper Mint State levels than most other San Francisco Morgans, with a few exceptions. As usual, this Select example displays lively mint frost and a touch of central softness, where roller marks appear. Brilliant with light chatter. NGC ID# 2564, PCGS# 7244

**1896-S Dollar, MS63**  
**Cartwheel Mint Frost**

- 4323 1896-S MS63 PCGS.** From a mintage of 5 million coins, this S-mint issue is widely recognized as a conditionally scarce semikey. Luster is characteristically frosty and vibrant, generating a cartwheel effect over all-brilliant surfaces. A few bagmarks on each side prevent a near-Gem grade for this attractive 1896-S dollar. NGC ID# 2564, PCGS# 7244

**1896-S Morgan Dollar, MS63**  
**Vivid Reverse Toning**

- 4324 1896-S MS63 PCGS.** Satiny and lightly marked for the grade, this attractive Select specimen shows just a touch of softness on the central design elements. The obverse is essentially brilliant, while the reverse is almost entirely covered by charcoal-gray and beige patina, with a few untuned spots peeking through. Housed in a green label holder.  
*Ex: Long Beach Signature (Heritage, 5/2003), lot 7681, realized \$1,322.50.* NGC ID# 2564, PCGS# 7244

**1896-S/S VAM-5 Morgan Dollar, MS64+**  
**Scarce, Sought-After San Francisco Variety**

- 4325 1896-S/S VAM-5 MS64+ PCGS. CAC.** A Hot 50 Variety. The mintmark was first punched high and right, then repunched with a faint ghost of the previous punching visible to the right and in the lower opening of the primary S. Dappled plum-gray and gold toning visits the smooth, silver-white surfaces of this near-Gem 1896-S dollar. Most of the 5 million-piece mintage was lost to the Pittman Act melts, although a few small hoards have since emerged including those in LaVere Redfield's holdings. This CAC-endorsed coin is sharp, with exceptional eye appeal adding the PCGS Plus designation to its resume. Only trivial marks exist on either side. NGC ID# 2564, PCGS# 134022 Base PCGS# 7244

**1897-O Dollar, MS63**  
**Scarce Any Finer**

- 4326 1897-O MS63 NGC.** MS61 and MS62 are the two Mint State grade levels most collectors will target. Coins as nice as this MS63 are elusive, and anything finer is scarce. Each side maintains a bright, untuned appearance, awash in satiny mint luster. Strike is predictably soft at the centers, but abrasions are less prominent than expected. The only singular imperfection is a reeding mark near the nose. NGC reports 35 finer submissions (2/19). NGC ID# 2565, PCGS# 7248

**1897-O Morgan Dollar, MS63**  
**Pleasing for the Grade**

- 4327 1897-O MS63 PCGS.** Readily available in circulated grades, the 1897-O becomes scarce in Select Mint State and is seldom offered at the MS64 level or finer. This is a worthy alternative the rarified status of near-Gem or finer 1897-Os. Frosted, brilliant surfaces show a minimum number of tiny marks for the grade, with a strike that is only briefly soft over the ear. Silver luster glows from each side. PCGS reports just 60 finer examples (2/19). NGC ID# 2565, PCGS# 7248

**1897-O Dollar, Bold MS64  
Scarce This Nice, Rare Any Finer**

- 4328 1897-O MS64 NGC.** This New Orleans issue tends to fly under the radar. It is plentiful in circulated grades, providing no trouble at all through AU58 and even lower Mint State levels. An unfortunate consequence is that few collectors appreciate its scarcity in MS64 or its rarity in Gem condition. But series specialists do recognize the 1897-O for what it is, and we expect them to bid accordingly on this strongly struck near-Gem. Each side remains untuned and satiny with a couple of thin flecks of golden color. Abrasions verge on inconsequential. Census: 27 in 64, 8 finer (2/19). NGC ID# 2565, PCGS# 7248

**1897-O Morgan Dollar, MS63  
Elusive Prooflike Example**

- 4329 1897-O MS63 Prooflike PCGS. CAC.** This impressive Select specimen is attractive for the grade, as the cheek is clean and the reverse is well-preserved. Even the obverse field is only lightly abraded. An essentially brilliant specimen that has an especially reflective reverse field. The centers are well-struck, although the left side of the wreath ribbon shows some minor softness. The 1897-O is easily obtained in lower circulated grades, but is scarce in Mint State. Representatives of the issue with true prooflike surface are irrefutably rare. Population: 5 in 63 Prooflike, 0 finer. CAC: 1 in 63, 0 finer (1/19).  
*Ex: FUN Signature (Heritage, 1/2003), lot 8175, realized \$9,200.*  
**From The Perfection Collection of DMPL/Prooflike Morgan Dollars.** NGC ID# 2566, PCGS# 7249

- 4330 1897-S MS65 Deep Mirror Prooflike PCGS. CAC.** This sharply detailed Gem features lightly toned, deeply reflective prooflike fields with intense field to device contrast. Housed in a green label holder. Population: 63 in 65 (17 in 65+) Deep Mirror Prooflike, 8 finer. CAC: 8 in 65, 0 finer (2/19).  
**From The Perfection Collection of DMPL/Prooflike Morgan Dollars.** NGC ID# 2567, PCGS# 97251

- 4331 1898 MS67 NGC.** Wholly brilliant surfaces awash in cartwheel mint frost are among the cleanest for the 1898 Morgan dollar issue. There is a touch of trivial incompleteness at the centers and on some of the peripheral letters, but the strike is otherwise sharp. Field marks and cheek abrasions are practically unseen. None numerically finer at either service. Census: 18 in 67 (1 in 67★), 0 finer (3/19). NGC ID# 2568, PCGS# 7252

- 4332 1898 MS67 NGC.** The 1898 Morgan dollar was produced in large quantities, but few Superb Gems are extant. The coin offered here is one of the finest examples seen at either of the leading grading services, with sharply detailed devices and bright mint luster. Liberty's cheek is super-smooth. The brilliant centers yield to golden patina at the rims. Census: 18 in 67 (1 in 67★), 0 finer (3/19).  
*Ex: Sacramento Signature (Heritage, 3/2011), lot 4159. NGC ID# 2568, PCGS# 7252*

**1898 Morgan Dollar, MS67  
Registry Set Contender**

- 4333 1898 MS67 PCGS. CAC.** From a substantial mintage of 5.8 million pieces, the 1898 Morgan dollar is scarce at the MS67 grade level and none have been certified in higher numeric grades (2/19). This spectacular Superb Gem exhibits sharply detailed design elements throughout and the virtually flawless surfaces radiate vibrant mint luster, with terrific eye appeal. NGC ID# 2568, PCGS# 7252

**1898 Dollar, MS66+ Prooflike  
Quality Affirmed by PCGS and CAC**

- 4334 1898 MS66+ Prooflike PCGS. CAC.** This flashy, high-end Premium Gem is well-struck with glimpses of orange toning that contribute to the eye appeal. Mirrored fields contrast against devices blanketed in a thin layer of mint frost. Production quality at the Philadelphia Mint was at its apex during the final years of the 19th century, on full display here. Population: 30 in 66 (5 in 66+) Prooflike, 3 finer. CAC: 8 in 66, 0 finer (2/19).  
*Ex: Central States Signature (Heritage, 4/2013), lot 4980, where it brought \$3,525.*  
**From The Perfection Collection of DMPL/Prooflike Morgan Dollars.** NGC ID# 2568, PCGS# 7253

- 4335 1898-O MS66 Deep Mirror Prooflike PCGS.** While moderately available in Deep Mirror Prooflike format, the 1898-O is conditionally scarce at the Premium Gem level and rare any finer. This untuned example displays brilliant mirrors and sharply struck, frosted motifs. Marks are limited to a few light abrasions near the obverse stars, and a short reeding mark beneath the eagle's right (facing) wing. Population: 50 in 66 (1 in 66+) Deep Mirror Prooflike, 3 finer (3/19). NGC ID# 2569, PCGS# 97255

- 4336 1899 MS66 PCGS.** The low-mintage 1899 is scarce in circulated grades, but Mint State examples are always available for a price. At the MS66 level, though, third-party populations thin dramatically. The present Premium Gem is well struck and lustrous with impressive preservation. The originally toned surfaces feature ocean-blue borders and golden-brown centers. NGC ID# 256C, PCGS# 7258

- 4337 1899 MS66 PCGS. CAC.** Pale violet toning provides a smooth, attractive vignette around bright silver centers of this lustrous and attractive 1899. The mintage of just 330,000 pieces never fails to attract bidders, and the issue is rare in high grades both in a conditional sense and in absolute terms. CAC endorsed, with just 23 pieces certified finer by PCGS (2/19). NGC ID# 256C, PCGS# 7258

- 4338 1899 MS66 Prooflike PCGS.** The fields are so uniformly mirrored on this Premium Gem that it could easily pass as a proof were it not for a subtle cartwheel effect that can be produced when rotated beneath a light. Fully struck design elements enjoy a delicate golden tint on each side, and the coin lacks even a single mentionable abrasion. Population: 12 in 66 Prooflike, 0 finer; 12 in 66 Deep Mirror Prooflike, 0 finer (2/19). NGC ID# 256B, PCGS# 7259

**1899 Dollar, MS66 Prooflike  
Green Label Holder, CAC Approval Sticker**

- 4339 1899 MS66 Prooflike PCGS. CAC.** The 1899 Morgan dollar is a popular low-mintage issue, and this Premium Gem with a Prooflike designation should soar to the top of the list for potential acquisitions. The obverse is remarkably free of obvious contact, and the only noticeable flaw is a patch of grazes in the right reverse field. A super coin with impressive contrast, certified in a green label holder. Population: 12 in 66 Prooflike, 0 finer. CAC: 4 in 66, 0 finer (2/19).

*Ex: Long Beach Signature (Heritage, 9/2011), lot 3765, where it realized \$3,737.50.*

**From The Perfection Collection of DMPL/Prooflike Morgan Dollars.** NGC ID# 256B, PCGS# 7259

- 4340 1899-O MS67 PCGS.** *Ex: Vanderbilt.* This gorgeous Superb Gem approaches the finest quality available, as PCGS has only certified one numerically finer piece (3/19). Both sides are nicely defined with slight weakness only over Liberty's ear. The frosty surfaces are brilliant and highly lustrous. NGC ID# 256C, PCGS# 7260

- 4341 1899-O MS67 PCGS.** From a large mintage of more than 12.2 million pieces, the 1899-O Morgan dollar is collectible in grades up to the MS67 level, but finer coins are virtually unobtainable. This delightful Superb Gem offers sharply detailed design elements and impeccably preserved surfaces, with vibrant mint luster throughout. An extensive network of peripheral die cracks encircles the reverse. PCGS has graded one numerically finer example (2/19). NGC ID# 256C, PCGS# 7260

- 4342 1899-O MS67 PCGS.** With a single MS68 graded numerically finer (2/19), collectors must target high-end Superb Gems like this instead, not that there is any sacrifice in doing so. Brilliant surfaces are nearly pristine. A touch of softness over the centers and the lower obverse border, plus a few light marks in the upper reverse field are trivial. Overall quality is unimprovable. NGC ID# 256C, PCGS# 7260

- 4343 1899-O MS67 NGC.** Attractive autumn-brown, navy-blue, and ruby-red toning confirms the originality of this lustrous and minimally marked high-grade New Orleans type coin. A good strike, though the hair above the ear is incomplete. NGC ID# 256C, PCGS# 7260

- 4344 1899-O MS67 NGC.** The availability of this New Orleans issue is challenged at the Superb Gem grade level where examples are scarce. This is among the finest non-Prooflike coins at NGC (2/19), a Registry Set collectors must-have. Shimmering mint luster engulfs the nearly pristine surfaces, leaving Liberty's cheek flawless and the fields nearly so. A blush of golden toning along the upper obverse and lower reverse rims is the only color of note. NGC ID# 256C, PCGS# 7260

- 4345 1899-O MS67 NGC.** This 1899-O is remarkably attractive for an often poorly struck, inelegant issue. Thickly frosted surfaces greet the eye with swirling luster effects, and the essentially unmarked surfaces display full brilliance. A sharp O-mint strike elicits every detail, especially with no distracting abrasions. As an issue, the 1899-O is anything but rare in Mint State, but Superb Gems are scarce and always in demand among Morgan Dollar specialists and high quality type collectors. Just a single coin (at PCGS) is certified finer, with 0 finer at NGC (3/19).

*Ex: Long Beach Signature (Heritage, 6/2005), lot 6956.* NGC ID# 256C, PCGS# 7260

**1899-S Dollar, MS66  
Registry-Worthy Example**

- 4346 1899-S MS66 PCGS.** With a mintage of 2.5 million coins, the 1899-S becomes scarce in Premium Gem condition and prohibitively rare any finer. The hallmarks of this Registry-worthy representative include total brilliance, cartwheel mint luster, and a full strike. A handful of ticks on the cheek and in the left obverse field, none greater than the size of a head of a pin, prevent an even higher grade. Eleven submissions are finer at PCGS (3/19). NGC ID# 256D, PCGS# 7262

- 4347 1900-O/CC VAM-11 MS65 PCGS.** A Top 100 Variety. This is a lustrous, snow-white Gem example of an always-popular *Guide Book* variety. The well-struck surfaces are exceptionally free from contact, even for the MS65 level. Leftover reverse dies from the downgraded Carson City Assay Office were overmintmarked and shipped to New Orleans for coinage. The diagonal crack beneath the shoulder curl is the pick-up point for VAM-11. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

- 4348 1900-O/CC VAM-11 MS65 PCGS.** A Top 100 Variety. During the dismantling of the Carson City Mint, five reverse dies were located and remintmarked for New Orleans use. Traces of the original CC remain under the O. A later die state with encircling die cracks on the reverse. A lustrous, nicely struck, and lightly toned Gem. Minor grazes on the cheek prevent a higher grade. *Ex: Dallas Signature (Heritage, 12/2005), lot 2603, which realized \$2,990.* NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

- 4349 1900-O/CC VAM-11 MS65 PCGS.** A Top 100 Variety. VAM-11 shows a weak CC under the primary O mintmark, but a curving die line in the back of Liberty's cap aids in attribution. This Gem example is in an early die state, without the die crack that later runs through the lower part of the wreath. Luster is silver and satiny, and no major abrasions are visible. Housed in a green label holder. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

- 4350 1900-S MS65 PCGS.** The 1900-S is almost always seen with thickly frosted surfaces, as found on this coin. Each side retains original mint brilliance and there are no large or objectionable abrasions present. Sharply detailed throughout. NGC ID# 256H, PCGS# 7270

- 4351 1900-S MS66 PCGS.** The 1900-S has an adequate mintage (3.5 million pieces) and thousands of coins were paid out by the San Francisco mint over a period of some 30 years. Many, however, were used for gaming purposes in Las Vegas and others entered circulation. Lower-grade Mint State pieces are abundant, but Gem and finer pieces are quite elusive today. Faint dappled gray-orange patina displays a few electric-blue accents, and the design elements are well-impressed. Nicely preserved surfaces reveal some grease-like stains (as struck) on Liberty's cheek.

*Ex: Dallas Signature (Heritage, 12/2005), lot 2604, where it realized \$2,702.50.* NGC ID# 256H, PCGS# 7270

**1900-S Dollar, MS66+  
Thickly Frosted Registry Coin**

- 4352 1900-S MS66+ PCGS.** Faint planchet striations from the draw bench appear over the slightly incomplete centers of this brilliant and thickly frosted San Francisco dollar from the first year of the century. The lack of feathers on the eagle's breast is the result of a hub change. Die cracks travel around the reverse legends and a couple of tiny field marks turn up under magnification. Wonderful mint-fresh surfaces. PCGS reports four finer submissions (2/19). NGC ID# 256H, PCGS# 7270

**1900-S Dollar, MS64 Deep Mirror Prooflike  
Rarely Offered in This Contrast Category**

- 4353 1900-S MS64 Deep Mirror Prooflike PCGS.** Of the more than 7,000 1900-S Morgan dollars certified by PCGS, a paltry nine submissions have been designated as Deep Mirror Prooflike. We last offered a PCGS-graded near-Gem DMPL representative as part of our July 2008 Summer FUN Signature event, highlighting just how seldom these pieces become available.

Parallel roller marks are most apparent on Liberty's chin, across the hair strands, and around the obverse stars. They are only occasionally seen on the reverse. Both sides remain entirely brilliant, showcasing considerable field reflectivity. Partial frost adorns the raised elements, contributing to the cameo effect. Population: 4 in 64 Deep Mirror Prooflike, 1 finer (2/19).

*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 3BGD, PCGS# 97271

**1901 Dollar, MS62  
A Prize in Uncirculated Condition**

- 4354 1901 MS62 PCGS.** Collectors should have no trouble finding an example of the 1901 Morgan dollar in circulated condition. Conversely, Uncirculated survivors are prizes to be cherished. This MS62 dollar is bright, untoned, and lustrous with good detail over Liberty's ear and on the eagle's talons. The date and other marginal elements exhibit slight softness. Scattered marks limit the technical grade. NGC ID# 256J, PCGS# 7272

**1901 Dollar, MS62  
Lightly Toned, Attractive for the Grade**

- 4355 1901 MS62 NGC.** This is an attractive, original coin with a light dusting of tan-gold patina. The 1901 is a condition rarity that normally comes bright and heavily abraded, but neither of those qualities characterize this MS62 example. Detail is good, and abrasions are scant, considering the grade. Worth a premium bid. NGC ID# 256J, PCGS# 7272

**1901 Morgan Dollar, MS62  
Condition Key**

- 4356 1901 MS62 NGC.** The conditional rarity of the 1901 dollar is well known beyond collectors of Morgans. For some reason, the 1901 and the 1884-S seem to have been "struck in AU," with precious few coins known in Mint condition. This piece is well-defined and brilliant with attractive, satiny luster. A few small, scattered abrasions account for the grade. An important coin for the Morgan dollar collector.

*Ex: Dallas Signature (Heritage, 11/2007), lot 1360, which realized \$4,312.50.* NGC ID# 256J, PCGS# 7272

**1901 Morgan Dollar, MS62**  
**Lustrous, Naturally Toned Surfaces**

- 4357 1901 MS62 PCGS. CAC.** The 1901 Morgan dollar claims a substantial mintage of 6.9 million pieces, and the issue is not difficult to locate in circulated grades, but Mint State specimens are elusive. This impressive MS62 specimen offers sharply detailed design elements and lightly marked, lustrous surfaces, under vivid shades of lavender-gray, sea-green, and golden-tan toning. NGC ID# 256J, PCGS# 7272

**1901 Silver Dollar, MS63**  
**Sought-After Condition Key**

- 4358 1901 MS63 PCGS.** The 1901 is among the more famous condition keys in the Morgan dollar series. Circulated examples of this issue are plentiful, but it becomes challenging to acquire for many collectors in the lower Mint State levels. In MS63 it is genuinely scarce, and finer coins are rare. The 1901 Morgan in Gem condition is one of the rarest dates in the series. In *A Guide Book of Morgan Silver Dollars*, fifth edition, Q. David Bowers gives the 1901 an Optimal Collecting Grade of only MS60, which vividly represents just how difficult it is to find a nice, higher-grade Mint State example of this issue. This Select representative is significantly finer than that entry-level MS60 grade, yet it is not so high-end that it is out of reach for collectors. Abrasions are light and unobtrusive. Warm golden toning on each side lightens in the centers, producing attractive eye appeal. The mint luster has a satiny texture. NGC ID# 256J, PCGS# 7272

**1901 Dollar, Brilliant MS63**  
**20th Century Condition Rarity**

- 4359 1901 MS63 NGC.** This famous 20th century condition rarity becomes challenging in MS63, a level that even most advanced collectors would argue is unrealistic to improve upon. All-brilliant, satiny surfaces exhibit minimal chatter for the grade. This 1901 Morgan dollar is typically struck at the centers with signs of die erosion in the reverse fields. There are only 20 finer submissions at NGC (2/19). NGC ID# 256J, PCGS# 7272

**1901 Dollar, Choice AU**  
**VAM-3, Doubled Die Reverse**

- 4360 1901 Doubled Die Reverse, VAM-3, AU55 PCGS.** A Top 100 Variety. VAMWorld.com notes: "This amazing VAM has an incredibly doubled reverse. The Eagle's tail feathers are strongly doubled. The variety has crossed over into the mainstream Morgan sets as a 'must have' and is listed in the *Red Book*." Partly lustrous and wholly brilliant surfaces show minimal signs of friction. Scattered hairlines are present, and there are a few identifying abrasions on the obverse. NGC ID# 256J, PCGS# 133965 Base PCGS# 7302

**1901 VAM-3 Dollar, AU58**  
**Doubled Die Reverse, Guide Book Variety**

- 4361 1901 Doubled Die Reverse, VAM-3, AU58 NGC.** A Top 100 Variety. Strong die doubling appears at the lower reverse. It is most noticeable on the wing and tail feathers, arrowheads, fletchings, and branch leaves. This popular *Guide Book* variety is practically unseen in better condition, with just a handful of pieces extant. Each side displays bright, partly lustrous surfaces. Strongly detailed and nearly unworn. Hairlines appear on the portrait and in the fields. Census: 16 in 58, 2 finer (3/19). NGC ID# 256J, PCGS# 133965 Base PCGS# 7302

- 4362 1901-O MS66+ PCGS Gold Shield. CAC.** With only eight finer Superb Gems at PCGS (2/19), this is essentially the finest example of the 1901-O dollar most collectors can target. It enjoys brilliant untuned surfaces and radiant mint luster with strong definition over the centers. A few blushes of pale gold contribute to the original eye appeal. NGC ID# 256K, PCGS# 7274

**1901-O Morgan Dollar, MS66+  
Tied for Finest Certified Prooflike Specimen**

- 4363 1901-O MS66+ Prooflike PCGS. CAC.** Thanks to a large mintage of 13.3 million pieces and a generous representation in the Treasury releases of the 1960s, the 1901-O Morgan dollar is an available issue in high grade. However, the issue is rare at the MS66 grade level, with Prooflike surfaces. This Plus-graded Premium Gem exhibits sharply detailed design elements and reflective prooflike fields, with minimal signs of contact. Population: 29 in 66 (2 in 66+) Prooflike, 0 finer. CAC: 6 in 66, 0 finer (2/19).  
*From The Perfection Collection of DMPL/Prooflike Morgan Dollars. NGC ID# 256K, PCGS# 7275*

- 4364 1901-S MS64 PCGS.** The normally thick mint frost is present on this piece, but it is partially subdued by hazy gray and slight iridescent patina over each side. There are no obvious abrasions present, and the central striking softness is not as pronounced as seen on other examples of this issue. NGC ID# 256L, PCGS# 7276

- 4365 1901-S MS64 PCGS.** The 1901-S has long been recognized as a better S-mint dollar, especially in the better grades of Uncirculated. This is an all-brilliant piece that is softly struck in the centers. Softly frosted surfaces. NGC ID# 256L, PCGS# 7276

- 4366 1901-S MS65 PCGS.** The impression was incompletely rendered directly over Liberty's ear, but the rest of this Gem San Francisco dollar is crisp. Untoned surfaces exhibit a few superficial marks in the field left of the portrait but none on the cheek to distract. PCGS reports 42 finer submissions (2/19). NGC ID# 256L, PCGS# 7276

**1901-S Dollar, Frosty MS66  
Almost Impossible to Find Finer**

- 4367 1901-S MS66 PCGS. CAC.** Unlike its Philadelphia counterpart, the 1901-S can be obtained in Premium Gem condition with some searching. Such examples are scarce, however, and they are essentially impossible to upgrade. Completely brilliant surfaces awash in vibrant mint frost deliver top-notch aesthetic appeal to match the impressive technical quality of this expertly preserved dollar. Strike detail is crisp, with clear delineation on the talons. Population: 39 in 66 (6 in 66+), 3 finer. CAC: 9 in 66, 0 finer (2/19).  
*From The Perfection Collection of DMPL/Prooflike Morgan Dollars. NGC ID# 256L, PCGS# 7276*

**1902-O Dollar, MS66 Prooflike  
Nearly Unabraded, Glassy Fields**

- 4368 1902-O MS66 Prooflike PCGS. CAC.** The 1902-O is a plentiful issue in most grades, but examples with Prooflike contrast are much more difficult to locate. While hundreds of uncontrasted coins survive at the MS66 level, only 18 Prooflike Premium Gems are reported at PCGS. This brilliant Morgan dollar boasts exceptional eye appeal. Each side maintains watery fields and strong detail, with normal softness over the centers. Singular marks are unseen. Housed in a green label holder. Population: 18 in 66 Prooflike, 1 finer. CAC: 9 in 66, 0 finer (2/19).  
*From The Perfection Collection of DMPL/Prooflike Morgan Dollars. NGC ID# 256N, PCGS# 7281*

- 4369 1902-S MS65 NGC. VAM-3.** The 02 in the date are lightly repunched. A stone-white Gem that shows dynamic luster and minor blending of impression at the centers. The obverse high points display faint roller marks, as produced. Certified in a circa-2000 holder. NGC ID# 256P, PCGS# 7282

- 4370 1903 MS67 PCGS.** The 1903 Morgan dollar was fairly well-produced, but prooflike representatives are infrequently seen. Those pieces PCGS has designated Prooflike are rare in MS66 and nonexistent in MS67. This Superb Gem is boldly struck and attractively semiprooflike on both sides. Light golden toning emerges from the peripheries, framing beautifully preserved surfaces. Among the finest at PCGS, where no examples have been graded in finer numeric grades (2/19).  
*Ex: FUN Signature (Heritage, 1/2016), lot 6113, which realized \$2,232.50. NGC ID# 256R, PCGS# 7284*

- 4371 1903 MS67 NGC.** Shimmering satin luster is untuned on this Superb Gem 1903 Morgan dollar. Sharp devices and a lack of surface abrasions add to the eye appeal. The 1903 is scarce in this grade, and NGC lists only two finer non-Prooflike coins (3/19). NGC ID# 256R, PCGS# 7284

- 4372 1903-S AU50 PCGS.** The 1903-S is usually found with attractive, lustrous surfaces. That is the rule for Mint State coins, and it holds true also (to a lesser extent) for this slightly circulated example. Each side is brilliant and there are traces of luster still to be seen surrounding the devices. There are no large or noticeable abrasions on either side. NGC ID# 256T, PCGS# 7288

- 4373 1903-S AU55 PCGS.** The 1903-S Morgan dollar is one of the most challenging issues of the series in high grade. This impressive Choice AU specimen exhibits just a trace of high-point wear and the lightly abraded surfaces are enhanced by subtle shades of lavender-gray and golden-tan toning. NGC ID# 256T, PCGS# 7288

**1903-S Dollar, Clean MS65+  
Golden Borders Around Untoned Centers**

- 4374 1903-S MS65+ PCGS. CAC.** Rings of golden toning around the obverse and reverse rims complement wholly brilliant centers. The fields and cheek are impressively unabraded on this high-quality Gem. Definition is characteristically lacking on the eagle's breast feathers, but the remaining areas show good detail. Faint remnants of a partial print appear at the lower left obverse. The 1903-S dollar was struck to the extent of 1.2 million coins and was distributed throughout the first half of the 20th century. None were left in storage by the Treasury release of the early 1960s, explaining the issue's elusive nature in higher levels.

*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 256T, PCGS# 7288

**1904 Silver Dollar, MS66+  
Fully Toned, Well Preserved  
Die Doubled Obverse**

- 4375 1904 MS66+ PCGS. CAC.** Iridescent cobalt-blue toning consumes the reverse and occupies peripheral portions of the obverse. Ruby-red and autumn-brown colors adorn much of the portrait. Cartwheel luster illuminates sharply struck and minimally marked surfaces. The 1904 can be located with relative ease in MS63, but Premium Gems are surprisingly rare, and none have been certified finer by PCGS. The nose, chin, and lips are lightly die doubled, as is the base of the earlobe, similar to VAM-5. Population: 49 in 66 (4 in 66+), 1 finer. CAC: 6 in 66, 0 finer (2/19).

*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.* NGC ID# 256U, PCGS# 7290

- 4376 1904-O MS67 NGC.** Both sides of this Superb Gem 1904-O show dramatic multicolor toning in spectacular shades of violet, blue, lemon-gold, and orange. High technical quality and a sharp New Orleans strike add to the impressive display of color. While we have seen other remarkably toned 1904-O dollars, this one ranks among the most extraordinary. NGC reports no examples in a finer numeric grade, toned or otherwise (3/19). NGC ID# 256V, PCGS# 7292

- 4377 1904-O MS67 NGC.** Red Book Tribute holder. Both sides of this brilliant Superb Gem have satin luster with reflective, nearly prooflike fields. Tied numerically for the finest that NGC has certified (3/19). NGC ID# 256V, PCGS# 7292

- 4378 1904-O MS67 NGC.** Unimprovable at this high grade level according to the population figures at PCGS and NGC, this Superb Gem 1904-O epitomizes a common coin in an uncommon state of preservation. Brilliant, highly lustrous, and boldly struck surfaces show no marks or abrasions of note, and a faint hint of gold toning at the lower reverse fails to diminish the overall blazing silver eye appeal. A deluge of 1904-O silver dollars emerged from government vaults in the 1960s and 1970s, yet remarkably few are as fine as this MS67, and none are numerically finer (2/19). NGC ID# 256V, PCGS# 7292

- 4379 1904-S AU58 PCGS.** A better San Francisco issue, although not one of the Mint's better efforts in terms of strike quality. This near-Mint example is typically soft over the ear and on the eagle's breast, yet a large amount of vibrant mint luster remains over the untoned, brilliant surfaces. Minor abrasions and a touch of wear define the grade.

*Ex: New York Signature (Heritage, 10-11/2015), lot 4968, where it sold for \$1,938.75.* NGC ID# 256W, PCGS# 7294

**1904-S Dollar, MS64**  
**Significantly Finer than Average**

- 4380 1904-S MS64 PCGS.** San Francisco silver dollars from the first decade of the 20th century are known for their scarcity in Mint State. The 1904-S is no exception. Perhaps Uncirculated bags were last in and first out of the Treasury vault. The issue could also have succumbed to destruction as part of the Pittman Act melts. This frosty, essentially untoned example has a clean cheek and a well-preserved reverse. A few wispy grazes are noted on the field near the profile.  
*Ex: Long Beach Signature (Heritage, 2/2010), lot 708, where it realized \$4,025. NGC ID# 256W, PCGS# 7294*

**1904-S Morgan Dollar, MS64**  
**Better Date in High Grade**

- 4381 1904-S MS64 PCGS.** Pearly, with light blue undertones and champagne overtones. This near-Gem 1904-S Morgan dollar displays wispy abrasions, mostly in the fields, and all fairly minor. Some strike softness in the centers is typical of the issue and is minimal on this piece. Higher-grade 1904-S dollars are scarce.  
*Ex: Long Beach Bullet (Heritage, 1/2004), lot 1667, which realized \$2,357.50. NGC ID# 256W, PCGS# 7294*

**1904-S Dollar, MS64 Prooflike**  
**Faint Cameo Contrast**

- 4382 1904-S MS64 Prooflike PCGS. CAC.** An impressive Choice Mint State specimen, this 1904-S dollar has brilliant silver surfaces without toning on either side. The fields are fully mirrored around lightly frosted devices, delivering faint cameo contrast. Population: 11 in 64 (1 in 64+) Prooflike, 4 finer. CAC: 4 in 64, 1 finer (2/19).  
*Ex: Rosemont Signature (Heritage, 8/2013), lot 4571, where it brought \$8,812.50.*  
**From The Perfection Collection of DMPL/Prooflike Morgan Dollars.** NGC ID# 256W, PCGS# 7295

**1921 Morgan Dollar, MS66 Prooflike**  
**Sole Finest at CAC**

- 4383 1921 MS66 Prooflike PCGS. CAC.** The Philadelphia Mint struck more than 44 million Morgan dollars in 1921, yet surprisingly few have been certified as Prooflike by PCGS. And among those, most grade between MS62 and MS64. This flashy Premium Gem enjoys a razor-sharp strike, brilliant surfaces with hints of light gray-green accents, and outstanding preservation. Housed in a green label holder. Population: 2 in 66 Prooflike, 1 finer. CAC: 1 in 66, 0 finer (2/19).  
*Ex: Fort Worth Signature (Heritage, 3/2010), lot 1672, where it realized \$4,600.*  
**From The Perfection Collection of DMPL/Prooflike Morgan Dollars.** NGC ID# 256X, PCGS# 7297

- 4384 1921-D MS66+ PCGS. CAC.** This Denver issue is more accessible in high grades than its San Francisco cousin, the 1921-S, but finer pieces are scarce with only 11 better examples at PCGS (2/19). This Premium Gem is sharp over the centers and somewhat softer around the rims. Brilliant and highly lustrous with beautifully preserved surfaces. NGC ID# 256Y, PCGS# 7298
- 4385 1921-S MS66 PCGS.** The mass-produced 1921-S is surprisingly difficult to find at this level, and none are finer at PCGS. NGC reports a single higher-graded representative (2/19). Each side is thickly frosted and generally brilliant. Strike detail is somewhat soft, but what stands out about this Premium Gem is the lack of abrasions. NGC ID# 256Z, PCGS# 7300
- 4386 1921-S MS66 NGC.** The 1921-S Morgan dollar can only be called scarce in MS66 condition, but finer coins are virtually unobtainable. This delightful Premium Gem exhibits sharply detailed design elements and lustrous, well-preserved surfaces. Census: 70 in 66 (3 in 66+, 3 in 66★), 1 finer (2/19). NGC ID# 256Z, PCGS# 7300

## PROOF MORGAN DOLLARS

1878 8TF Dollar, PR64 Cameo  
Low Mintage Proof Subtype

**4387** 1878 8TF PR64 Cameo PCGS. CAC. VAM-14.3, with die doubling on Liberty's eyelid and ONE DOLLAR. A scarce eight tailfeathers subtype in proof format. This near-Gem Cameo has icy motifs that rise in full detail above glassy fields. The golden-brown, jade-green, and lilac peripheral toning is particularly attractive on the reverse. From the reported mintage of 500 pieces, it appears that less than half that number have survived, if third party data and resubmissions over 30 years are considered. This piece is particularly attractive.

Ex: *Dallas Signature* (Heritage, 2/2015), lot 3188, which realized \$12,337.50.

From *The William Rehwald Proof Set Collection*. NGC ID# 2572, PCGS# 87311

**4388** 1878 8TF Spiked Eye, VAM-14.8, PR55 ANACS. According to VAMWorld.com, "The 1878-P VAM-14.8 is one of the ultra rare 8TF coins. VAM-14.8 was struck as a proof and the dies were reused as a business strike." This proof, one of 500 pieces produced, shows a touch of friction and faint hairlines. Glints of reddish-gold toning appear within the recesses. Housed in a small-sized holder. PCGS# 399358 Base PCGS# 7311

1878 7TF Morgan, PR64 Cameo  
Scarce Reverse of 1878 Proof

**4389** 1878 7TF Reverse of 1878 PR64 Cameo NGC. Mintage figures for the 1878 7TF Reverse of 1878 proof are not concrete, although conventional wisdom is that the number is small. Estimates of just 200 or 250 coins are typical. The *Guide Book* lists a mintage of just 250 coins for this issue and the Reverse of 1879 proof combined. In *A Guide Book of Morgan Silver Dollars*, fifth edition, Q. David Bowers writes: "This variety will challenge you, not only to find one in the first place, but beyond that, to get one with good eye appeal."

Offered here is a near-Gem Cameo, a rarity among Morgan dollar proofs and a more difficult coin to acquire than the 1895 proof, which is more highly heralded among collectors at large. Each side is sharp and reflective with good contrast. Russet-golden toning around the borders lightens as it reaches toward the devices, leaving the centers with a light golden hue. An important offering for the specialist of this series.

From *The William Rehwald Proof Set Collection*. NGC ID# 2573, PCGS# 87312

1879 Morgan Dollar, Well-Struck PR64  
Near-Brilliant, CAC Endorsed

- 4390 1879 PR64 NGC. CAC. While many 1879 proof Morgan dollars are toned, this near-Gem proof is largely brilliant, with only a thin halo of gold toning at the rims. Smoothly frosted central motifs contrast with the bright, mirrored fields, with a distinct white-on-black appearance when viewed at an advantageous angle. Sharply struck with no marks of consequence, even the hair over the ear is well-defined — seldom seen on 1879 proofs regardless of grade. Census: 72 in 64 (1 in 64+), 87 finer. CAC: 13 in 64, 7 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 2722, PCGS# 7314

1879 Morgan Dollar, PR65  
Attractively Toned

- 4391 1879 PR65 PCGS. Glimmering reflectivity in the fields complements the satiny luster of the devices on this Gem proof 1879 Morgan dollar, one of 1,100 pieces distributed through silver proof sets. A touch of strike weakness is noted on the hair above Liberty's ear. Light golden and lilac undertones enjoy accents of ocean-blue toning in the margins, while flecks of the same luminous color highlight the recesses of Liberty's hair. NGC ID# 2722, PCGS# 7314

1880 Dollar, PR64  
Rose, Violet, and Gold Patina

- 4392 1880 PR64 PCGS. The fields remain reflective under dusky shades of rose, violet and gold patina, delivering an eye-appealing effect despite the lack of a cameo appearance. Hairlines are scant, and the strike is predictably full. A relatively large number of Morgan dollar proofs were coined in 1880 — 1,355 pieces. NGC ID# 2724, PCGS# 7315

1880 Morgan, Brilliant PR64  
Modestly Contrasted

- 4393 1880 PR64 NGC. Hopping on the Trade dollar bandwagon, 1,355 Morgan dollar proofs were sold as part of the silver sets. This is a snow-white example, with nicely frosted central motifs and a sharp strike. The surrounding fields are slightly foggy but retain much of their flash when rotated in light. A lens reveals a number of die polishing lines and some faint hairlines, invisible to the unaided eye.  
*From The William Rehwald Proof Set Collection.* NGC ID# 2724, PCGS# 7315

1881 Morgan Dollar, PR64  
Fully Struck, Intense Mirroring

- 4394 1881 PR64 NGC. Although the quality of proofs improved in 1881, the number of coins sold was less than the previous year. Only 984 proofs were sold from 1,089 pieces struck. The remaining 105 proofs were melted. This is a brilliant near-Gem survivor, with a sparse touch of gold at the rims. The mirrored fields are smooth, deep, and flashy, while gently frosted devices just miss a Cameo designation. A wonderful, full strike makes this Choice proof extra-special. Census: 52 in 64, 68 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 2725, PCGS# 7316

1881 Morgan Dollar, Gem Proof  
Peripheral Golden Color

- 4395 1881 PR65 PCGS. Central brilliance transitions toward golden color around the rims. Partial contrast exists between the fields and devices, although the former are insufficiently reflective and the latter insufficiently frosted for a proper Cameo designation from PCGS. However, the eye appeal remains excellent for this Gem proof, one of 984 such pieces struck in 1881. An interesting curving lint mark appears near the second star right of the date. NGC ID# 2725, PCGS# 7316

1882 Morgan Dollar, PR64  
Modest Field-Device Contrast

**4396** 1882 PR64 PCGS. Flashy mirrors contrast with frosted devices for undesignated cameo contrast, perhaps because of an overall skin of pale-gold toning that deepens slightly at the rims. The Mint reports a distribution of 1,100 pieces in 1882, a generous amount, with 50 additional pieces unsold and melted. This lightly toned example is Choice and attractive, housed in a previous generation green label PCGS holder. Population: 84 in 64, 69 finer (3/19).

*From The William Rehwald Proof Set Collection.* NGC ID# 2726, PCGS# 7317

1883 Morgan Dollar, PR64  
Old Green Label Holder

**4397** 1883 PR64 PCGS. CAC. Golden rim toning encircles the borders of this clean-for-the-grade 1883 proof Morgan dollar. The untoned centers enhance field-device contrast, especially on the reverse. Wispy hairlines on Liberty's chin are faint. From a production of 1,039 pieces. Certified in an old green label holder. CAC: 10 in 64, 15 finer (3/19).

*From The William Rehwald Proof Set Collection.* NGC ID# 2727, PCGS# 7318

1883 Morgan Dollar, PR66+ Cameo  
Contrasting White Centers and Deep Mirrors

**4398** 1883 PR66+ Cameo PCGS. A strong cameo of the portrait, eagle, and letters are set against magnificent deep mirrors, making this a memorable proof dollar. Virtual perfection is evident in all the important aspects: quality of strike, contrasting frosted devices, and deeply reflective fields. A touch of clear rose-gold at the rims and on the eagle's breast accentuates the pristine silver-white appeal, but the overall impression of this coin is brilliant.

A total of 1,039 proofs were made for the year. Of these, only a few remain in this state of high preservation since, at one time, it was customary to clean proofs to maintain their brilliance. This coin escaped untouched. Population: 13 in 66 (3 in 66+) Cameo, 2 finer (3/19).

*Ex: Houston Signature (Heritage, 12/2013), lot 3758, realized \$9,400.* NGC ID# 27YV, PCGS# 87318

1884 Morgan Dollar, PR64  
Scarce With CAC Endorsement

**4399** 1884 PR64 NGC. CAC. Vibrant, well-mirrored fields have acquired a thin mantle of peach-gold, while brilliant central motifs offer moderate contrast to the surrounding reflectivity. A sharp strike adds substantially to the coin's appeal. Most 1884 proofs exist in a range from PR63 to PR64, and this CAC-endorsed example is at the top of that bracket. Finding a finer coin for the grade will be a challenge. Census: 50 in 64, 50 finer. CAC: 3 in 64, 10 finer (3/19).

*From The William Rehwald Proof Set Collection.* NGC ID# 27ZB, PCGS# 7319

1885 Morgan Dollar, PR64  
Significant Field/Device Contrast

**4400** 1885 PR64 NGC. Pale-gold toning sits on the rims, although this near-Gem proof is otherwise white with smooth, reflective fields and frosted devices. The 1885 proofs were as popular when they were struck as they are now, with only three unsold proofs from the 933-piece mintage. This example approaches cameo contrast, with deeply mirrored silver fields and frost-white motifs. A sharp strike adds to the Choice eye appeal. Census: 55 in 64, 60 finer (3/19).

*From The William Rehwald Proof Set Collection.* NGC ID# 27ZE, PCGS# 7320

1886 Morgan, Choice Proof  
VAM-15, Repunched Date

**4401** 1886 PR64 NGC. VAM-15, Repunched Date. This near-Gem 1886 proof shows repunching on the date as seen on some of the year's proofs, with the 18 and 6 narrowly recut and a dash that juts out from beneath the second 8 (VAM-15). Wisps of golden toning at the rims and margins yield to mirrored-silver centers and smoothly frosted motifs. We note a small rim bump at 8 o'clock on the reverse as the only mark of note on the sharply struck, attractive surfaces. Census: 62 in 64, 76 finer (3/19).

*From The William Rehwald Proof Set Collection.* NGC ID# 27ZF, PCGS# 7321

**1886 Morgan Dollar, PR66  
Untoned With Reflective Fields**

- 4402 1886 PR66 NGC.** Miles Standish writes in *Morgan Dollar: America's Love Affair With a Legendary Coin*: "A total of 891 Morgan Proofs were struck in 1886, with 886 of them distributed in silver Proof sets. The remaining five pieces are believed to have been melted." This wholly untuned Premium Gem proof with reflective fields and undesignated contrast appears as-struck. There are a couple of points of contact unworthy of being singled out. Census: 22 in 66, 8 finer (3/19). NGC ID# 27ZF, PCGS# 7321

**1886 Morgan Dollar, PR67 ★  
None Finer at Either Service  
VAM-15, Doubled Date**

- 4403 1886 PR67★ NGC. VAM-15.** A razor-sharp strike and impressive reflectivity throughout the glassy fields augment the richly toned, multicolored surfaces. There is an appreciable degree of contrast, but as is typical for the 1886 issue, the Cameo designation is highly elusive, and is seldom granted to a colorfully toned example. Curiously, two obverse dies were used to strike the proof dollars of 1886. This piece is from the second — and scarcer — die that shows slight doubling on the digits in the date, most notably below the top serif of the 1 and a "dash" below the second 8, designated as VAM-15. Census (both varieties): 8 in 67 (1 in 67★), 0 finer (3/19). Ex: *Long Beach Signature* (Heritage, 2/2006), lot 2389; *Summer FUN* (Heritage, 7/2011), lot 4239; *The Eugene H. Gardner Collection, Part II* (Heritage, 10/2014), lot 98269; *FUN Signature* (Heritage, 1/2019), lot 5366, where it realized \$7,200. NGC ID# 27ZF, PCGS# 7321

**1886 Dollar, PR66 Cameo  
Lightly Toned, Attractive Contrast**

- 4404 1886 PR66 Cameo PCGS.** Pale rose and violet toning paints each side, with multicolor accents around the obverse periphery and minimal patina over the centers. The effect enhances Cameo contrast between the mirrorlike fields and partly frosted motifs, particularly on the reverse. Population: 6 in 66 Cameo, 3 finer in this category (3/19). NGC ID# 27ZF, PCGS# 87321

**1887 Morgan Dollar, Lightly Toned PR64  
Just 710 Proofs Struck**

- 4405 1887 PR64 PCGS.** Only 710 proofs were struck in 1887, a reduction of 20% from the previous year's total. This lightly toned example displays areas of smooth and faint grayish-tan toning, with a needle-sharp strike. The attractive surfaces show only slight contrast between the devices and mirrored fields. A thin, curling lint mark (as struck) hangs down from the L of PLURIBUS. Housed in a previous generation blue label PCGS holder, with barcode on the back. Population: 71 in 64 (1 in 64+), 50 finer (3/19). *From The William Rehwald Proof Set Collection.* NGC ID# 27ZG, PCGS# 7322

**1887 Dollar, PR66  
Magnificent Toning, Strong Underlying Mirrors**

- 4406 1887 PR66 PCGS.** The business strike 1887 is among the most common Morgan issues, but proofs of the same date are rare, since only 710 such pieces were struck. The present immaculate specimen has a needle-sharp strike and comprehensive deep rose-red, navy-blue, and honey-gold toning. Population: 13 in 66 (1 in 66+), 6 finer (2/19). Ex: *Long Beach Signature* (Heritage, 5-6/2012), lot 4454, where it brought \$8,050. NGC ID# 27ZG, PCGS# 7322

**1888 Morgan Dollar, PR64  
Golden Rims, Brilliant Mirrors**

- 4407 1888 PR64 NGC.** The rims display a ring of pale-gold patina that barely drifts into the mirrored margins. The glassy-smooth fields retain their silver brilliance. Elsewhere, razor-sharp central devices are fully defined and smoothly frosted. Eye appeal is terrific, and overall this 1888 proof is considerably sharper and more attractive than many of the proof survivors. We note slight recutting at the 1 and first 8 in the date. Census: 46 in 64, 41 finer (3/19). *From The William Rehwald Proof Set Collection.* NGC ID# 27ZH, PCGS# 7323

- 4408 1889 PR62 PCGS.** A pleasing lower-end proof 1889 Morgan dollar, showing deeply mirrored fields and satiny devices. A blush of light golden toning on each side complements russet borders. Eye appeal is pleasing for the grade. NGC ID# 27ZJ, PCGS# 7324

**1889 Silver Dollar, PR64  
Delicately Toned**

- 4409 1889 PR64 PCGS.** Delicate gold toning visits the obverse and reverse surfaces of this Choice proof 1889 Morgan silver dollar. The surfaces appear pristine to the unaided eye, and only with magnification are the grade-limiting hairlines visible, and even then, they are not obvious. An excellent example for a date or type collection. NGC ID# 27ZJ, PCGS# 7324

**1889 Morgan Dollar, PR64  
Impressive Eye Appeal**

- 4410 1889 PR64 NGC.** A thin band of gold and blue toning encircles brilliant, sharply struck silver surfaces of this flashy near-Gem silver proof. Although the 1889 is often weak above Liberty's ear, this proof is needle-sharp and fully struck. A few delicate hairlines in the left obverse field and a few tiny marks above the eagle's head are the only inhibiting factors to an even finer grade. As it is, this is a stunning near-Gem proof with excellent eye appeal. Census: 43 in 64, 43 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27ZJ, PCGS# 7324

**1890 Morgan Dollar, PR64  
Just 590 Proofs Struck**

- 4411 1890 PR64 NGC.** Just 590 proofs were struck, a low-point of the Morgan series. This is a brilliant example, sharply struck and moderately frosted on the devices. Smoothly mirrored fields surround the central elements, but with only slight contrast. A lens reveals a touch of haziness in the fields with a few delicate lines, but the in-hand presentation is Choice and the eye appeal is strong for the near-Gem grade. Census: 35 in 64, 63 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27ZK, PCGS# 7325

**1891 Dollar, PR64 Cameo  
Elusive With Bold Contrast**

- 4412 1891 PR64 Cameo NGC. CAC.** Brilliant surfaces and strong Cameo contrast provide plenty of eye appeal for this CAC-endorsed near-Gem proof. A downtrend in proof production bottomed out in 1890, when 590 proofs were struck, and the 1891 mintage improved to a still-low 650 proofs. Slightly more than half of that mintage survives today. This attractive, untuned Cameo proof shows a bit of softness over the ear and at the eagle's breast, although the outstanding eye appeal more than compensates. Census: 14 in 64 Cameo, 46 finer. CAC: 5 in 64, 15 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27ZL, PCGS# 87326

**1891 Dollar, PR64 Ultra Cameo  
Rare With Ultra Cameo Contrast**

- 4413 1891 PR64 Ultra Cameo NGC. CAC.** NGC and PCGS combined report only seven Ultra or Deep Cameo examples of the 1891 proof Morgan dollar, matching this issue's reputation for medium or low contrast. Offered here is the lesser of the two Ultra Cameo coins at NGC, grading near-Gem. Each side displays stark field-device contrast and bold central definition. The interiors are nearly brilliant, while a halo of golden-russet toning surrounds the borders. NGC ID# 55UH, PCGS# 97326

**1892 Silver Dollar, PR64 Cameo  
Lightly Patinated and Well-Contrasted, CAC**

- 4414 1892 PR64 Cameo PCGS. CAC.** The number of proofs struck increased dramatically in 1892 upon the inclusion of Barber coinage with the silver proof sets. A hint of pale reddish-gold toning at the margins adds eye appeal to the glistening silver-mirrored fields and well-frosted devices, which offer considerable cameo contrast — particularly on the obverse. As often seen on 1892 proofs, the strike is soft over the ear but otherwise sharp, and the eye appeal is strong. CAC endorsement adds an important uptick to this coin's resume. Population: 29 in 64 (3 in 64+) Cameo, 31 finer. CAC: 7 in 64, 21 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27ZM, PCGS# 87327

1893 Morgan Dollar, Toned PR64 Cameo  
792 Pieces Struck, Few Are Finer

- 4415 1893 PR64 Cameo PCGS.** The Mint transitioned proof strikes to the hydraulic coin presses in 1893, with mediocre results. Cameo contrast was not a problem, but the quality of strike was subpar on most examples. This Choice Cameo proof is richly toned in blue, lavender, and pale-russet shades. An acceptably strong strike exists except over the ear, which shows incomplete detail. The toned surfaces are remarkably free of marks. Relatively few 1893 proofs are any finer. Population: 17 in 64 Cameo, 25 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27ZN, PCGS# 87328

1894 Silver Dollar, PR64  
Popular Coinage Date

- 4416 1894 PR64 NGC.** The Philadelphia Mint coined a mere 110,000 circulation strikes in 1894, along side 972 proofs. The low mintage total adds demand for the surviving proofs such as the Choice proof dollar. Both sides have delicate gold toning over the mirrored fields with light field-to-device contrast.  
*From The William Rehwald Proof Set Collection.* NGC ID# 2577, PCGS# 7329

1894 Morgan Dollar, PR64  
Original Toning Over Flashy Fields

- 4417 1894 PR64 PCGS. CAC.** Flashy, reflective fields emerge beneath a layer of violet and golden patina when rotated under a lamp. George Morgan's famous design is fully rendered, which in tandem with the previously mentioned qualities, delivers lovely eye appeal. The 1894 claims a mintage of 972 proofs. NGC ID# 2577, PCGS# 7329

1896 Morgan, Sharp PR64 Cameo  
Brilliant With Strong Contrast

- 4418 1896 PR64 Cameo NGC.** Our consignor mastered the art of selecting proofs at the near-Gem level, selecting only high-end specimens that approach full Gem quality. Invariably housed in older generation holders, these Choice proofs are largely brilliant with strong strikes. This splendid 1896 Cameo proof epitomizes the strategy, with a full strike and bold contrast between the pristine frosted motifs and glassy-mirrored fields. There simply are no distractions or problems of any kind, and the eye appeal is exceptional for the grade. Census: 11 in 64 Cameo, 50 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27ZT, PCGS# 87331

1896 Dollar, PR65 Deep Cameo  
Registry Set Bound

- 4419 1896 PR65 Deep Cameo PCGS.** The proof mintage of 1896 Morgan dollars was only 762 pieces, but production values were extremely high. This date is known as a vast improvement over the earlier proofs of the decade, which were often weakly struck. The present coin is a case in point, as all devices display razor-sharp definition and pronounced frosted texture. The immaculate fields show fathomless depth of reflectivity, with highlights of light gold toning. The field/device contrast provides bold cameo flash. This coin should find a home in a fine collection or Registry Set. Population: 3 in 65 Deep Cameo, 23 finer (2/19).  
*Ex: Long Beach Signature (Heritage, 6/2011), lot 4152, where it sold for \$6,900; FUN Signature (Heritage, 1/2013), lot 6383, where it brought \$7,637.50.* NGC ID# 27ZT, PCGS# 97331

1897 Morgan Dollar, PR64 Cameo  
Lightly Toned, Attractive Surfaces

- 4420 1897 PR64 Cameo PCGS.** The 1897 Morgan dollar proofs are generally well-produced from a modest mintage of just 731 pieces. This faintly toned example displays moderate contrast between the raised elements and mirrored fields to earn the PCGS Cameo designation. A few gold and grayish-blue accents visit the deeply mirrored fields and devices, which are sharply struck except for a few strands above Liberty's ear. A few delicate, hair-thin lines are visible with magnification. Population: 11 in 64 (2 in 64+) Cameo, 28 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27ZV, PCGS# 87332

1897 Morgan, PR66 Cameo  
Conditionally Rare

- 4421 1897 PR66 Cameo NGC.** Delicate honey-gold and sky-blue tints enrich this imposing and unabraded Premium Gem. The strike is intricate, particularly on the eagle's breast and the hair above the ear. The impression is only incomplete on the left (facing) claw. The portrait, eagle, and wreath all offer consistent cameo frost, and the contrast with the glassy fields is undeniable. An outstanding representative of this highly popular crown-sized proof silver type. A scant 731 proofs were struck in 1897, few of which have survived in such exemplary condition. Census: 9 in 66 Cameo, 20 finer; 0 in 66 Ultra Cameo, 2 finer (2/19).  
*Ex: Houston Signature (Heritage, 11/2007), lot 61251, which realized \$11,500.* NGC ID# 27ZV, PCGS# 87332

1898 Silver Dollar, PR65  
Natural Gray-Gold Patina

- 4422 1898 PR65 PCGS.** The proof Morgan dollars of 1898 are considered among the Mint's best work, being often sharp and contrasted. This Gem example is originally toned in slate-gray, blue, and tan-gold shades, yet underlying silver mirrors shine through the well-aged, natural patina. Frosted devices display a nearly full strike, although contrast is limited by the overall coloration. NGC ID# 27ZW, PCGS# 7333

1898 Morgan Dollar, PR64 Cameo  
High Quality Proof Issue

- 4423 1898 PR64 Cameo NGC.** A mere hint of golden toning does not interfere with the brilliance of this near-Gem Cameo proof. Bold contrast exists between the sharply struck motifs and glassy-mirrored fields. The 1898 proofs have a reputation of excellence among all Morgan dollar proofs, with exceptional mirrors, strike, and preservation by collectors who appreciate the high quality. This Choice example is no exception, and borders on an even finer grade. Census: 12 in 64 Cameo (1 in 64+), 29 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27ZW, PCGS# 87333

1899 Dollar, Vibrant PR64 Cameo  
Exceptionally Deep, Flashy Fields

- 4424 1899 PR64 Cameo PCGS.** Scarce as a circulation strike, the 1899 is reasonably available as a proof from a mintage of 846 pieces. This example displays remarkably flashy and smooth mirrors on both sides, with a rings of amber-gold toning at the margins that cede to pale-gold across the deeply reflective fields. Frost-white central motifs contrast boldly with the vibrant fields, approaching deep cameo character. The strike is razor-sharp. Population: 23 in 64 (3 in 64+) Cameo, 24 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27ZX, PCGS# 87334

1900 Silver Dollar, PR64  
Original Light-Gold Toning

- 4425 1900 PR64 NGC.** Most 1900 proofs fall in a range of PR62 to PR64. This example sits at the high end of the scale, with faint golden toning evenly present throughout both sides and a sharp proof strike. While the Mint's 1900 proofs lack the outstanding quality seen in 1898 and 1899, the Choice surfaces of this coin offer a surprising amount of contrast between the frosted central devices and mirrored fields. A Cameo designation seems possible. Census: 68 in 64, 66 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 3KYV, PCGS# 7335

1901 Morgan Dollar, Brilliant PR64  
Low Mintage of 813 Pieces

- 4426** 1901 PR64 NGC. Although proof strikes and circulation strikes are seldom viewed as interchangeable by today's collectors, the 1901 Morgan dollars present an exception. Additional pressure has always fallen upon the proofs, with their stronger strikes and excellent eye appeal compared to the many substandard circulation strikes. This is a brilliant, chromelike Choice proof, wonderfully mirrored, with a strike that shows only nominal incompleteness over the ear. Census: 71 in 64 (1 in 64★), 85 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 27ZZ, PCGS# 7336

1902 Morgan Dollar, PR64  
All-Brilliant Finish

- 4427** 1902 PR64 NGC. CAC. Almost devoid of contrast and fully brilliant, this gleaming 1902 proof is characteristic of the Mint's desired effect when it switched to the "all-brilliant" proof format. Silver shine dazzles the eye, and Liberty's portrait is especially well-struck for the issue. The individual hair strands are defined over the ear. Mirrored fields provide a jet-black backdrop, but only a thin bit of frost is seen on the cheek. The surfaces are virtually flawless, as the CAC endorsement attests. Census: 60 in 64 (1 in 64+), 100 finer. CAC: 14 in 64, 24 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 2822, PCGS# 7337

1903 Silver Dollar, PR64  
Starkly Silver, With Deep Iridescence

- 4428** 1903 PR64 NGC. CAC. Stark, silver brilliance resides beneath deeply iridescent colors that meld into bluish-gray patina among the sharply struck motifs. Virtually all 1903 proofs convey a "chromed" appearance, lacking traditional cameo contrast. This is a visually impressive coin in that regard, as confirmed by its CAC endorsement. Just 755 proofs were struck. CAC: 16 in 64, 22 finer (3/19).  
*From The William Rehwald Proof Set Collection.* NGC ID# 2823, PCGS# 7338

PEACE DOLLARS

1921 High Relief Peace Dollar, MS65  
Outstanding First-Year Type Coin

- 4429** 1921 MS65 PCGS. CAC. The luminous, golden-toned surfaces of this impressive Gem are devoid of bothersome abrasions and the design elements show above average definition on the central devices, with outstanding eye appeal throughout. The Peace dollar was only produced in high relief format in the initial year of the design and finer examples are relatively scarce in today's market. PCGS# 7356

1921 Peace Dollar, MS65  
High Relief, First-Year Issue

- 4430** 1921 MS65 PCGS. CAC. An attractive Gem representative from the first year of the design, this coin exhibits just a touch of the usual softness in the centers, due to the high relief of the motifs. The well-preserved surfaces are lustrous and appealing, with delicate highlights of golden-tan toning. Overall eye appeal is outstanding. PCGS# 7356

1921 Peace Dollar, MS66  
Single-Year High Relief Type

- 4431** 1921 MS66 NGC. This popular single-year type coin is faintly toned in wisps of gold, but the surfaces maintain near-complete brilliance and showcase vibrant, satiny mint luster. Definition is bold throughout the reverse and most of the obverse, although Liberty's hair is not quite fully rendered. Grazes and other disturbances are trivial. NGC has only seen seven finer submissions (3/19). PCGS# 7356

**4432 1921 Matte Proof Dies, VAM-1F2, MS65 PCGS.** An Elite 30 Variety. The variety is undesignated on the PCGS insert, but the die markers are unmistakable. A coruscating pearl-gray Gem that boasts uncommonly smooth surfaces. The hair over the ear shows minor incompleteness, usual for this high-relief date. PCGS# 518799 Base PCGS# 7356

**4433 1921 Matte Proof Dies, VAM-1F2, MS65 PCGS.** An Elite 30 Variety. The centers are well-struck, although the hair over Liberty's ear is not quite full. Frosted surfaces are clear of all but the most insignificant of marks. Hints of light, opaque pearlescence appear on each side. Struck from the VAM-1F2 matte proof dies also used to strike business strikes, confirmed by numerous distinct die polishing lines on both the obverse and reverse, and a hook-shaped die defect line at the top right of V in TRVST, plus collar clash of reeding indents on the reverse rim between 2 and 4 o'clock. This is a wonderful example of the important one-year High Relief type, housed in an old-generation blue-label holder with barcode on the back.

Ex: *Baltimore Signature* (Heritage, 7/2003), lot 8992; *Long Beach Signature* (Heritage, 9/2006), lot 5603, which realized \$1,840. PCGS# 518799 Base PCGS# 7356

### 1922-D Peace Dollar, MS66+ Rarely Seen Finer

**4434 1922-D MS66+ NGC.** The 1922-D Peace dollar claims a mintage of more than 15 million pieces, and the issue is collectible in grades up to the MS66 level today, but finer coins are rare. This Plus-graded Premium Gem is an excellent balance of value and quality, with sharply detailed design elements and vibrant mint luster throughout. The virtually pristine surfaces show a faint arcing die crack from the obverse rim at 8 o'clock through Liberty's neck. NGC has graded 17 numerically finer examples (2/19). NGC ID# 257D, PCGS# 7358

**4435 1922-D MS66 PCGS. CAC.** A blush of glistening lavender and champagne toning appears over each side of this Premium Gem 1922-D silver dollar. The strike is sharp, and neither side exhibits significant abrasions. PCGS records only three Superb Gems finer (3/19). NGC ID# 257D, PCGS# 7358

### 1923 Peace Dollar, CAC-Approved MS64 Spectacular Multicolor Toning

**4436 1923 MS64 PCGS. CAC.** It can legitimately be argued that, by a large margin, the rarest regular issue Peace dollar is a coin with heavy, attractive, natural toning. The date and mintmark of the coin in such a case are insignificant. The rule for Peace dollars, especially 1923 Philadelphia coins, is either full mint brilliance or light golden toning, sometimes with russet and olive flecks near the borders. Rarely is deeper toning present, and almost never is that toning attractive. Enter this piece as a glaring exception: Cartwheel luster illuminates a wide band of magenta color that curves across about 60% of the obverse, leaving the remainder cast in sun-gold, crimson, and forest-green — the latter hues flow in ribbons with Liberty's hair strands, adding an admirable pattern to the vivid colors. The reverse has similar burgundy toning in a large crescent from 8 to 2 o'clock, with the remainder bone-white as though shielded by another coin. Thus, we call this coin bag-toned, and it is one of the most colorful Peace dollars that we have seen of any issue or grade.

Ex: *Baltimore Sale* (Stack's Bowers, 3/2018), lot 3692, which realized \$1,680. NGC ID# AMPA, PCGS# 7360

**4437 1926-D MS66 PCGS. CAC.** As usually seen on the 1926-D, the strike is sharp throughout both sides. Strong mint luster illuminates attractive, frosted pale-blue and lilac-gray toning. Only a few minuscule marks exist on the smooth Premium Gem surfaces, and the coin is housed in an old green label holder with CAC endorsement. PCGS reports just eight numerically finer pieces (3/19). NGC ID# 257P, PCGS# 7368

**4438 1927-S MS64+ PCGS. CAC.** The 1927-S is one of just four Peace dollar issues with a mintage of less than 1 million coins, making it popular overall and proportionately scarce in high grade. This Plus-graded, CAC-approved near-Gem displays well-struck design elements and original satin mint luster with a hint of golden toning. The surfaces are clean and attractive. NGC ID# 26J6, PCGS# 7372

**4439 1934 MS66 PCGS.** The 1934 Peace dollar is a better date in the series, from a mintage of 954,057 pieces. This sharply detailed Premium Gem displays vibrant mint luster under shades of light gold toning. Unlike most examples seen, this coin shows only a few minor contact marks on the smooth surfaces. PCGS has graded only six coins in higher numeric grades (3/19).

Ex: *Central States Signature* (Heritage, 4/2012), lot 5867, realized \$2,185. NGC ID# 257Y, PCGS# 7375

---

**1934 Dollar, Clean MS66+**

- 4440** 1934 MS66+ PCGS. The toning may appeal to certain collectors and not others, but we like it. Plus, the underlying surfaces are spectacularly unmarked. Dappled gold and powder-blue tones cover much of each side. A streak of deep crimson color appears at the left obverse border. Sharp and rarely seen finer. There are six higher-graded submissions at PCGS (3/19). NGC ID# 257Y, PCGS# 7375

---

**1934-S Dollar, Lustrous MS63  
Long-Recognized Key Issue**

- 4441** 1934-S MS63 PCGS. Long recognized as the key to the Peace dollar series, and an issue with just over 1 million pieces struck. As with almost all 1934-S dollars, this example displays thick mint frost over each side. A few small marks and luster grazes explain the grade, but none are large enough to single out for individual mention. The surfaces are mostly brilliant, but there is just the slightest hint of golden patina present when closely examined. NGC ID# 257Z, PCGS# 7377

---

**1934-S Peace Dollar, MS63  
Conditionally Challenging Semikey**

- 4442** 1934-S MS63 PCGS. Hints of thin golden color gently accent brightly frosted, largely brilliant surfaces. Each side is boldly struck with shallow grazes and scattered bagmarks, but they do not distract. This semikey San Francisco Peace dollar derives from a mintage of just 1 million coins and is famously elusive in high grades. The average certified example falls shy of AU50. *From The Chinook Collection.* NGC ID# 257Z, PCGS# 7377

---

**1934-S Peace Dollar, MS63  
Elusive Issue in High Grade**

- 4443** 1934-S MS63 PCGS. The 1934-S Peace dollar is an important key to the series, from a mintage of just over 1 million pieces. This impressive Select specimen exhibits well-detailed design elements, with a touch of softness on Liberty's curls and the eagle's shoulder. The well-preserved surfaces radiate vibrant mint luster under low-intensity shades of golden-tan toning. NGC ID# 257Z, PCGS# 7377

---

**1934-S Peace Dollar, MS65  
Elusive Issue Any Finer**

- 4444** 1934-S MS65 PCGS. CAC. From a smallish mintage of just over 1 million pieces, the 1934-S Peace dollar is an acknowledged key to the series. The issue is somewhat scarce at the MS65 grade level, and finer coins are rare. This attractive Gem exhibits well-detailed design elements and well-preserved, lustrous surfaces, with outstanding eye appeal. PCGS has graded 33 numerically finer examples (2/19). NGC ID# 257Z, PCGS# 7377

---

**1935-S Silver Dollar, MS66  
White Obverse, Toned Reverse**

- 4445** 1935-S MS66 PCGS. Three rays below ONE. The reverse displays the variegated chestnut-gold and stone-gray toning more closely associated with classic silver commemoratives. The obverse is practically brilliant. A carefully preserved Premium Gem from the final year of the Peace dollar series. Rarely encountered any finer. NGC ID# 2583, PCGS# 7379

## SACAGAWEA DOLLAR

2000-P Cheerios Dollar, MS67  
2000 Cent Also Included

- 4446** 2000-P “Cheerios,” FS-902, MS67 PCGS. To promote the new “golden” Sacagawea dollar, the U.S. Mint released an early cache of examples to General Mills for random placement in boxes of Cheerios cereal. Most purchasers only secured a 2000 Lincoln cent, but lucky buyers also received a Sacagawea dollar. Many were spent. In June 2005, collector Pat Braddick noticed that his “Cheerios” dollar differed from the regular issue, with greater feather definition on the tail feathers. The prototype variety became a prized *Guide Book* rarity. A honey-gold Superb Gem with fully struck and unabraded surfaces. Accompanying the lot is the 2000 cent from the same Cheerios box, though no other packaging is included. Population: 50 in 67, 43 finer (2/19). (Total: 2 coins) NGC ID# 282J, PCGS# 147231 Base PCGS# 411990

## COMMEMORATIVE SILVER

- 4447** 1893 Isabella Quarter MS65+ PCGS. Brilliant with radiant cartwheel luster and a bold strike. The 1893 Isabella quarter dollar is a must-have type coin for classic commemorative collectors. Only 24,214 pieces were distributed of this World's Columbian Exposition souvenir coin. NGC ID# BYJ9, PCGS# 9220
- 4448** 1893 Isabella Quarter MS66 NGC. Swirling mint luster radiates from beneath lovely amber-red patina on the obverse, while the central reverse displays more subdued (but equally attractive) olive tones with an amber rim. A well-struck and virtually mark-free representative of this popular odd-denomination commemorative silver coin. NGC ID# BYJ9, PCGS# 9220

1893 Isabella Quarter, MS66  
Scarce CAC Type Coin

- 4449** 1893 Isabella Quarter MS66 PCGS. CAC. Pearl-white luster has elements of gold overlaid on the obverse, as well as around the reverse border. This is a fully struck Isabella quarter with a vibrant cartwheel effect and no mentionable abrasions. Examples of this important early commemorative are occasionally available in MS66, although CAC coins such as this are scarce. Finer pieces are seldom seen.  
*From The Cedar Crest Collection, Part I.* NGC ID# BYJ9, PCGS# 9220

- 4450** 1900 Lafayette Dollar MS64 PCGS. CAC. DuVall 1-B. Medium dove-gray and golden-brown toning embraces this original and well struck Choice commemorative silver dollar. Only a tick above the center of Washington's bust truncation precludes designation as a Gem. Scarce in the present quality with a CAC seal. Five die marriages of Lafayette dollars are known, each with a slightly different branch beneath the base of the Lafayette sculpture. NGC ID# BYKW, PCGS# 9222

1900 Lafayette Dollar, MS66  
Rich Original Patina

- 4451** 1900 Lafayette Dollar MS66 NGC. DuVall 2-C. Medium chestnut-gold and apple-green toning confirms the originality of this lustrous and crisply struck coin. A beautifully preserved and desirable high-grade example of the only silver dollar entry in the classic silver commemorative series. Census: 69 in 66 (4 in 66+, 2 in 66★), 11 finer (3/19). NGC ID# BYKW, PCGS# 9222
- 4452** 1937 Antietam MS67 PCGS. CAC. A delightful Superb Gem representative of this popular issue, from a distribution of 18,028 pieces. This coin exhibits sharply detailed design elements and impeccably preserved, lustrous surfaces, with a few subtle hints of golden-tan toning. PCGS has graded 25 numerically finer examples (2/19). NGC ID# BYF4, PCGS# 9229
- 4453** 1937 Antietam MS67+ PCGS. CAC. This splendid Antietam Anniversary half dollar is virtually free of marks and abrasions, with a crisp strike and dazzling mint luster. A short vignette of deep-blue and honey-brown toning visits the obverse margin, while the reverse shows just a whiff of gold patina. The PCGS Plus designation and CAC endorsement lift this Superb Gem example to the upper reaches of the Antietam population. Population: 41 in 67+, 25 finer. CAC: 152 in 67, 16 finer (3/19). NGC ID# BYF4, PCGS# 9229
- 4454** 1937 Antietam MS67+ PCGS. CAC. This Plus-graded Superb Gem exhibits sharply detailed design elements and impeccably preserved surfaces, with vibrant mint luster on both sides. Delicate shades of pale gold toning add to the terrific eye appeal. CAC endorsement accompanies the coin, which is seldom seen any finer. Population: 40 in 67+, 25 finer. CAC: 152 in 67, 16 finer (3/19).  
*From The Cedar Crest Collection, Part I.* NGC ID# BYF4, PCGS# 9229

1936-D Arkansas Half Dollar, MS67+  
Only One Coin Finer at PCGS

- 4455** 1936-D Arkansas MS67+ PCGS. CAC. The 1936-D Arkansas half dollar is scarce in MS67 and nearly uncollectible finer. This Plus-graded Registry coin displays sharp design definition and attractive original toning. Golden interiors cede to vivid multicolor borders. Neither side has mentionable abrasions. Population: 47 in 67 (5 in 67+), 1 finer. CAC: 23 in 67, 0 finer (3/19).  
*From The Cedar Crest Collection, Part I.* NGC ID# BYFA, PCGS# 9238

- 4456 1939 Arkansas MS66 PCGS. CAC.** Always challenging in high grades, the 1939 Arkansas Centennial half depicting an Indian chief and an Arkansas youth seldom comes with any degree of eye appeal. This Premium Gem is an exception, with sharply struck, brilliant centers and bright luster. Marks are exceedingly few and minor, while CAC endorsement confirms the high quality. Population: 95 in 66 (18 in 66+), 4 finer. CAC: 33 in 66, 0 finer (3/19).  
*From The Cedar Crest Collection, Part I.* NGC ID# BYFJ, PCGS# 9249

**1939-S Arkansas Half Dollar, MS67  
Tied for the Finest at PCGS**

- 4457 1939-S Arkansas MS67 PCGS.** Following the first issues of the Arkansas Centennial half dollars in 1935, contemporary collectors probably thought the series would never end, but it concluded its five year run in 1939, with just over 2,000 coins distributed from each of the three mints. Delicate gold toning and peripheral iridescence fails to impede the brilliant, satiny luster of this Superb Gem. Population: 18 in 67 (1 in 67+), 0 finer (3/19). NGC ID# BYFL, PCGS# 9251

- 4458 1935-D Boone MS67 PCGS.** This spectacular Superb Gem exhibits well-detailed design elements and impeccably preserved surfaces, with vibrant satiny mint luster on both sides. Hints of golden-tan toning add to the outstanding eye appeal. Population: 22 in 67 (1 in 67+), 0 finer (3/19). NGC ID# BYFR, PCGS# 9259

- 4459 1935/34-D Boone MS67 PCGS. CAC.** The Daniel Boone Bicentennial half dollar program lasted five years 1934-1938, with C. Frank Dunn the "sole distributor." In 1935, a secondary date of 1934 was added above PIONEER YEAR. The Denver distribution was just 2,003 coins in 1935. This is one of the high-grade, sharply struck survivors, with a crescent of gold toning at the right obverse and reverse borders, ceding to lemon-gold hues at the centers. Eye appeal is terrific, supported by CAC endorsement. Just 10 pieces are certified in numerically finer grades at PCGS (3/19).  
*From The Cedar Crest Collection, Part I.* NGC ID# BYFU, PCGS# 9263

**1936 Boone Half Dollar, MS68  
Attractive Original Toning**

- 4460 1936 Boone MS68 NGC.** Few Boone half dollars grade MS68, regardless of date. This is among the finest 1936 coins known, a nearly flawless specimen with a sharp strike and satiny toned luster. Both sides display deep red-amber and orange-gold toning, with greenish accents near the centers. Eye appeal is outstanding. Census: 8 in 68 (2 in 68★, 1 in 68+★), 0 finer (3/19). NGC ID# BYFX, PCGS# 9266

- 4461 1936-S Boone MS67+ PCGS. CAC.** Few Daniel Boone halves display attractive, original toning similar to that seen on this Plus-graded Superb Gem with CAC endorsement. Smooth, silver-gray surfaces yield to pale-yellow and rich reddish-gold shades at the right-hand obverse border. The strike is razor-sharp, and abrasions are nonexistent across the frosted surfaces. Population: 9 in 67+, 2 finer. CAC: 30 in 67, 2 finer (3/19).  
*From The Cedar Crest Collection, Part I.* NGC ID# BYG2, PCGS# 9268

- 4462 1937 Boone MS67+ PCGS. CAC.** Daniel Boone faces Blackfish, war chief of the Chillicothe band of the Shawnee tribe, on the reverse of the Daniel Boone Bicentennial half. The obverse depicts Augustus Lukeman's conception of Boone in profile portrait. This Plus-graded Superb Gem with CAC endorsement ranks among the finest survivors, with smooth and frosted pearlescent-silver surfaces and a hint of gold toning at the rims. Population: 19 in 67+, 3 finer. CAC: 55 in 67, 2 finer (3/19).  
*From The Cedar Crest Collection, Part I.* NGC ID# BYG3, PCGS# 9270

- 4463 1938 Boone MS67 PCGS.** A virtually immaculate Superb Gem. Pastel lime-green and lilac toning adorn the fields and motifs, while glimpses of russet-brown patina cling to the reverse periphery. Fully struck and outstanding. A low mintage issue. Housed in a green label holder. NGC ID# BYG6, PCGS# 9274

- 4464 1925-S California MS67 PCGS.** The popular California Diamond Jubilee half was struck in Philadelphia with an S mintmark for the San Francisco Citizens' Committee. A favorite design by Jo Mora among collectors and the public, the images of a rustic miner panning for gold and a California state symbol grizzly bear give this classic commemorative enduring appeal. Luminous surfaces are minimally marked for the issue and sharply struck, with beautiful original toning that includes pastel iridescence amplified by rainbow shades at the borders. PCGS reports just six numerically finer pieces (2/19). NGC ID# BYGA, PCGS# 9281

**1925-S California Half Dollar, MS67+  
High-End and Beautifully Toned**

- 4465 1925-S California MS67+ PCGS. CAC.** A spectacular California Diamond Jubilee half dollar, showing beautiful rainbow toning around the borders with warm golden interiors. The strike is sharp, and other than a couple of tiny ticks on the miner's shoulder, there are no discernible abrasions. The 1925-S California commemorative is scarce in MS67 and rare with a Plus designation. PCGS lists only six finer examples (3/19).  
*From The Cedar Crest Collection, Part I.* NGC ID# BYGA, PCGS# 9281

**1925-S California Half Dollar, MS68**  
Few Certified So Fine

**4466** 1925-S California MS68 NGC. One of the most iconic classic commemoratives is the California Diamond Jubilee half dollar, celebrating the 75th anniversary of California's statehood. A Forty-Niner on the obverse recalls the Gold Rush of 1849, and a walking grizzly bear — the state emblem — spans the reverse. This remarkably high-end and conditionally rare example displays satiny luster and beautiful multicolor toning. Not a single mentionable flaw is observed beneath a loupe. Census: 18 in 68 (6 in 68★, 2 in 68+★), 0 finer (2/19). NGC ID# BYGA, PCGS# 9281

**4467** 1936-S Cincinnati MS66+ PCGS. CAC. Iridescent colors emerge beneath a speckling of golden-tan patina that gives this San Francisco striking of the Cincinnati Music Center half dollar exceptional eye appeal. Seldom seen finer, the high-end Premium Gem surfaces are sharply struck, with only a few tiny marks on the high points. Nearly the entire 5,005-piece S-Mint distribution went to collectors and speculators/investors. Population: 7 in 66+, 7 finer. CAC: 16 in 66, 4 finer (2/19). NGC ID# BYCL, PCGS# 9285

**1936-S Cincinnati Half, MS66+**  
Original, Lightly Toned Surfaces

**4468** 1936-S Cincinnati MS66+ PCGS. CAC. Traces of pale pastel patina at the margins accent the prevailing rose-gray surfaces on this attractive Premium Gem Cincinnati half dollar. The open fields on the obverse, in particular, are noteworthy for a paucity of abrasions. This issue is scarce in this grade and rare finer. Population: 87 in 66 (7 in 66+), 7 finer. CAC: 16 in 66, 4 finer (3/19).  
*Ex: FUN Signature (Heritage, 1/2015), lot 11946; Central States Signature (Heritage, 4/2015), lot 6640, which realized \$4,230; Long Beach Signature (Heritage, 2/2016), lot 4420, which realized \$3,760.* NGC ID# BYCL, PCGS# 9285

**4469** 1892 Columbian MS67 NGC. Apple-green and autumn-gold toning endow the obverse. The reverse displays similar shades, but they are confined to the periphery. Crisply struck and lustrous with few imperfections. The 9 in the date appears repunched, similar to FS-303, but the date position differs. Certified in a circa-2000 holder. Census: 50 in 67 (1 in 67+, 12 in 67★, 3 in 67+★), 2 finer (3/19). NGC ID# BYGF, PCGS# 9296

**1893 Columbian Half, MS67**  
Beautiful Multicolor Toning

**4470** 1893 Columbian MS67 PCGS. CAC. Old-time toning surrounds the obverse border in multicolor hues, leaving the center silvery-white. The reverse is encompassed by multicolor toning. This Superb Gem Columbian half dollar is boldly struck and well-preserved with strong visual appeal. No 1893 coins are finer at PCGS or CAC. Population: 42 in 67 (6 in 67+), 0 finer. CAC: 20 in 67, 0 finer (3/19).

*From The Cedar Crest Collection, Part I.* NGC ID# BYGG, PCGS# 9297

**1936 Delaware Tercentenary Half Dollar**  
CAC-Approved MS67+

**4471** 1936 Delaware MS67+ PCGS. CAC. The Delaware Tercentenary half dollar, although dated 1936, celebrates the 300th anniversary of the Swedes' landing in Delaware in 1638. The dual commemorative dates 1638-1938 appear on the reverse, while the 1936 date — when the design was adopted — is on the obverse. Superb Gem examples of this issue are scarce, and PCGS lists only five coins finer than the present Plus-graded piece. This coin displays a sharp strike and satiny mint luster. Warm golden toning covers each side, save for the reverse border which has multicolor patina.

*From The Cedar Crest Collection, Part I.* NGC ID# BYGJ, PCGS# 9301

**4472** 1936 Elgin MS67+ PCGS. CAC. A ring of orange-gold, rose, blue, and crimson patina frames the borders, ceding to faint lavender-gray toning centrally. Softly frosted luster issues from the impeccably preserved surfaces, rounding out the eye appeal for which CAC has awarded a "green bean" sticker and PCGS adds its Plus designation. Finer examples are seldom available. Population: 49 in 67+, 8 finer. CAC: 101 in 67, 4 finer (3/19).

*From The Cedar Crest Collection, Part I.* NGC ID# BYGL, PCGS# 9303

**1922 No Star Grant Half Dollar, MS67  
Attractively Toned, Scarce This Fine**

- 4473** 1922 Grant No Star MS67 NGC. The No Star Grant Memorial half dollar is the more plentiful variety of this type, although it is still itself scarce in MS67 and nearly uncollectible finer. This Superb Gem showcases spectacular satin luster and preservation, cast in original golden toning that occasionally yields amber and olive hues. Trivial strike weakness on the high point of Grant's hair is typical of the issue. Census: 46 in 67 (9 in 67+, 5 in 67★), 2 finer (2/19). NGC ID# BYGP, PCGS# 9306

**1922 Grant With Star Half, MS63  
Old 'Rattler' Holder, CAC Approval**

- 4474** 1922 Grant With Star MS63 PCGS. CAC. Ice-blue and peach-gold shades are prominent across the faintly striated surfaces of this Select Uncirculated Grant With Star. Just 4,256 pieces were distributed of the With Star variant, creating a low-mintage scarcity of the classic commemorative series. Unlike many examples, this piece relatively well-preserved. The strike is bold for the issue and eye appeal is strong. Housed in an early PCGS "rattler" holder, with CAC endorsement. NGC ID# BYPP, PCGS# 9307

**1922 Grant With Star Half Dollar, MS64+  
Elusive Commemorative Variant**

- 4475** 1922 Grant With Star MS64+ PCGS. CAC. This satiny Choice Mint State Grant With Star half dollar has brilliant silver surfaces with splashes of magenta toning on the obverse. This fully lustrous piece has a surprisingly sharp strike for examples of this important variant. While PCGS has certified more than 500 examples at this grade level, only seven have earned the Plus designation (3/19). NGC ID# BYPP, PCGS# 9307

**1922 Grant With Star Half Dollar, MS65  
Low-Distribution Classic Commemorative**

- 4476** 1922 Grant With Star MS65 PCGS. Distribution of the With Star Grant Memorial half dollar amounted to only 4,256 coins, making this one of the key issues in the classic commemorative series, especially in high grade. Offered here is a Gem with bright, gold-tinted mint luster. The fields are satiny with die polish lines, as is normal for this issue. No singular abrasions are noteworthy. NGC ID# BYPP, PCGS# 9307

- 4477** 1928 Hawaiian MS64 PCGS. From a distribution of 9,958 pieces, the 1928 Hawaiian half dollar is one of the keys to the silver commemorative series. This attractive Choice example is sharply detailed and lustrous, with lightly marked surfaces that show hints of pale gold and lavender toning. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, MS66+  
Classic Commemorative Key**

- 4478** 1928 Hawaiian MS66+ PCGS. CAC. The Hawaiian Sesquicentennial half dollar commemorates the 150th anniversary of Captain James Cook's landing on the islands in 1778. Only 10,008 pieces were struck, including assay coins and a number of sandblast proofs. Premium Gem examples are scarce, and those with a Plus designation are rare. PCGS lists only four coins finer than this piece (3/19). Satiny luster and sharp design elements complement delicate lilac-blue interior toning, while the borders display olive-gold.

**From The Cedar Crest Collection, Part I.** NGC ID# BYGR, PCGS# 9309

- 4479** 1924 Huguenot MS67+ NGC. CAC. Brilliant satin luster emanates from this appealing Superb Gem Huguenot half dollar, with the reverse in particular displaying flashy cartwheel luster. Only a few small areas of light champagne toning appear, primarily at the outer peripheries. Finer examples are decidedly rare. Census: 61 in 67 (6 in 67+, 4 in 67★, 1 in 67+★), 3 finer. CAC: 26 in 67, 1 finer (3/19). NGC ID# BYGT, PCGS# 9314

**1924 Huguenot Half Dollar, MS68  
Spectacular Multicolor Toning**

**4480 1924 Huguenot MS68 NGC.** The early Dutch settlement of what is now the United States, little-known in American popular culture except as the background for the drama series *New Amsterdam*, also is the subject of the Huguenot-Walloon Tercentenary commemorative. Unfortunately, the design has been criticized over the years for including the portraits of two Huguenot martyrs (Admiral Gaspard de Coligny and William the Silent) who both died long before the 1624 settlement the coins were supposed to commemorate.

This magnificently preserved example is among the few finest known and offers unsurpassed Registry Set potential. Each side has elegant peach, plum, and steel-blue patina over amply lustrous and carefully preserved surfaces. Eye appeal is terrific. Census: 3 in 68 (1 in 68★), 0 finer (2/19). NGC ID# BYGT, PCGS# 9314

**4481 1936 Long Island MS67 PCGS. CAC.** Smooth, attractively toned surfaces depict a Dutch settler and an Algonquin Indian, while the reverse shows a Dutch vessel in full-blown sail. The coin celebrates 300 years of Long Island history, and achieved an admirable sell-through of 81,826 pieces from 100,053 coins struck. This Superb Gem ranks among the finest seen by PCGS. Population: 98 in 67 (13 in 67+), 0 finer. CAC: 70 in 67, 0 finer (3/19).

*From The Cedar Crest Collection, Part I.* NGC ID# BYGX, PCGS# 9322

**4482 1923-S Monroe MS66 PCGS. CAC.** Attractive rainbow iridescence surrounds the conjoined portraits of James Monroe and John Quincy Adams on the obverse of this Premium Gem. The Monroe Doctrine Centennial half was issued in large quantity but carelessly produced, with weak strikes and grainy surfaces. This pleasing example is far above the norm, with exceptional sharpness and eye appeal. PCGS reports just 10 numerically finer pieces (3/19).

*From The Cedar Crest Collection, Part I.* NGC ID# BYH4, PCGS# 9333

**4483 1938 New Rochelle MS66 Prooflike NGC. CAC.** Minute autumn-brown and navy-blue freckles visit the borders, but this Prooflike Premium Gem is predominantly white. A lens reveals only infrequent and inconsequential contact. Certified in a prior generation holder. NGC ID# BYDX, PCGS# 9335

**1938 New Rochelle Half Dollar, MS68  
High-End Registry Candidate**

**4484 1938 New Rochelle MS68 NGC.** The 1938 New Rochelle half dollar is scarce in MS67 and rare in MS68, with no finer pieces known. This Superb Registry coin displays a sharp strike and satiny mint luster. Amber-gold, crimson, and olive-green tab-toning adorns the reverse margins, leaving the interior mostly brilliant. The obverse is covered in the same colors as the reverse border. Eye appeal is outstanding. Census: 21 in 68 (1 in 68+, 4 in 68★, 1 in 68+★), 0 finer (3/19). NGC ID# BYDX, PCGS# 9335

**4485 1938 New Rochelle MS66 Prooflike NGC. CAC.** This delightful Premium Gem exhibits sharply detailed design elements and well-preserved surfaces that show much prooflike reflectivity in the fields. A few hints of golden-tan patina add to the visual appeal. Census: 57 in 66 (1 in 66+) Prooflike, 17 finer (3/19). NGC ID# BYDX, PCGS# 89335

**1926-S Oregon Trail Half, MS68  
Top-Grade Registry Coin**

**4486 1926-S Oregon MS68 PCGS.** Available in lower grades, the 1926-S Oregon Trail half dollar is a rarity in MS68, and it is unknown numerically finer (3/19). This is among the finest dozen pieces at PCGS, making it essential for Registry Set collectors. The satiny mint luster yields golden-green and peach toning that lightens toward the interiors. The rearmost edge of the covered wagon is incomplete, but the strike is otherwise sharp. Population: 12 in 68 (1 in 68+), 0 finer (3/19). NGC ID# BYH7, PCGS# 9341

**1921 Pilgrim Half Dollar, MS67+  
A Single Coin is Graded Finer**

**4487 1921 Pilgrim MS67+ PCGS.** Brilliant, satiny interiors cede to a ring of peripheral golden color on both sides. Die polish lines appear in the fields, and the strike is razor-sharp on the Pilgrim and the *Mayflower*. This second-year issue claims a substantially smaller distribution than its first-year counterpart, with only 20,053 pieces. Population: 58 in 67 (10 in 67+), 1 finer (3/19). NGC ID# BYHS, PCGS# 9360

**1921 Pilgrim Tercentenary Half Dollar  
Beautifully Toned MS67+**

**4488 1921 Pilgrim MS67+ PCGS. CAC.** In May 1920, Congress authorized a half dollar to commemorate the 300th anniversary of the Pilgrims' landing at Plymouth, Massachusetts. Coins struck in 1920 bore the dual date 1620 - 1920 on the reverse. A second coinage of the commemorative was issued in 1921, with the added 1921 date in the obverse field. This is a high-end CAC-endorsed example of the latter issue, which is the scarcer of the two. The strike is sharp and each side is beautifully preserved with luminous original luster. Golden-lilac interiors cede to vivid olive-gold, sky-blue, and amber-red border toning. Eye appeal is spectacular. Population: 57 in 67 (10 in 67+), 1 finer. CAC: 12 in 67, 0 finer (2/19). NGC ID# BYHS, PCGS# 9360

**4489 1936 Robinson MS67 PCGS. CAC.** Golden-brown, lilac-red, and apple-green toning enriches the margins. A razor-sharp strike and pristine surfaces further confirm the immense quality. Although a small number of pieces are graded higher, we doubt that if placed side by side with the present coin, they would provide an improvement. Certified in a green label holder. Population: 98 in 67 (7 in 67+), 2 finer. CAC: 30 in 67, 0 finer (2/19). NGC ID# BYHX, PCGS# 9369

**4490 1936 Robinson MS67 PCGS. CAC.** Sharply struck for the issue, which often lacks definition on the eagle's head, wing, and on Senator Robinson's cheekbone. All of those areas a sharp, with crisp detail on Robinson's back-of-the-head hair. Pale-blue, lime-green, yellow toning combine for exceptional eye appeal. Population: 97 in 67 (8 in 67+), 2 finer. CAC: 31 in 67, 0 finer (3/19).

*From The Cedar Crest Collection, Part I.* NGC ID# BYHX, PCGS# 9369

**1936 Robinson Half Dollar, MS68  
Arkansas Reverse**

**4491 1936 Robinson MS68 NGC.** The Arkansas Centennial half dollar was issued from 1935 through 1939. Following the initial production of 1935 Arkansas half dollars, Senator Joseph T. Robinson liked the idea of his portrait on the coins, and just over 25,000 such coins were distributed.

This Superb Gem is essentially brilliant with satiny luster and splashes of iridescent toning including gold, violet, and blue on the obverse. The brilliant reverse shows no signs of toning with exceptional mint luster. An impressive representative, tied for the finest certified. Census: 2 in 68, 0 finer (2/19). NGC ID# BYHX, PCGS# 9369

**4492 1925 Stone Mountain, Counterstamp 'OKLA 236' — Cleaned — NGC Details. AU.** Counterstamped by the Stone Mountain Confederate Monumental Association. OKLA. is near the eagle's rocky perch, the number 236 is to the left of the eagle's left (facing) wing. This particular counterstamp was unknown to Adna Wilde when he published his background and census on Stone Mountain counterstamps in 1987. He subsequently confirmed it is a genuine counterstamp struck by the Monumental Association in a letter dated July 15, 1996 that accompanies this coin. Generally bright surfaces from the light cleaning. NGC ID# BYJ6, PCGS# 9378

**1935 Texas Half Dollar, MS68**  
**One Example Finer**

- 4493** 1935 Texas MS68 NGC. The satiny, untuned central areas on each side of this Superb Gem Texas half dollar are surrounded by rings of original crimson and golden-orange patina. Strike definition is full, and there are no marks whatsoever that merit mention, as befits the grade. Census: 17 in 68, 1 finer (3/19). NGC ID# BYJA, PCGS# 9382

**1935-D Texas Half Dollar, MS68**  
**Unimprovable Quality**

- 4494** 1935-D Texas MS68 NGC. Daubs of russet and crimson color around the borders complement otherwise brilliant satin surfaces. The masterful design by Pompeo Coppini is rendered in complete detail, and there are no singular abrasions on either side. An unimprovable example of the 1935-D Texas half dollar. Census: 16 in 68 (3 in 68★), 0 finer (3/19). NGC ID# BYJC, PCGS# 9383

**1937 Texas Half Dollar, MS68**  
**Tied for NGC's Finest**

- 4495** 1937 Texas MS68 NGC. Ex: M.L. Middleton Collection. This stunning Superb Gem Texas Centennial half dollar is tied for the finest that NGC has examined in more than 30 years of numismatic certification. Boldly struck, this example shows slight weakness at the centers as always for the design. Delicate peripheral gold toning frames the brilliant and lustrous centers. Census: 9 in 68, 0 finer (3/19). NGC ID# BYJH, PCGS# 9390

**1937-D Texas Independence Half Dollar**  
**Among the Finest Certified, MS68**

- 4496** 1937-D Texas MS68 NGC. Ex: M.L. Middleton Collection. A virtually flawless, attractively toned Texas half dollar type coin and one of the finest-known 1937-D coins. NGC and PCGS combined report only a dozen 1937-D coins in this grade with none numerically finer (3/19). This piece has an above-average strike, being a trifle weak only on Victory's knee. Dusky champagne-rose interiors cede to vivid sun-orange and yellow-gold borders. Eye appeal is spectacular. Census: 9 in 68 (1 in 68★), 0 finer (3/19). NGC ID# BYJJ, PCGS# 9391

- 4497** 1938-S Texas MS67+ PCGS. This Plus-graded Superb Gem boasts a minuscule distribution of 3,814 pieces. The design elements are well-detailed and the flawless, satiny surfaces show highlights of sea-green and lavender toning. PCGS has graded three numerically finer examples (3/19). NGC ID# BYJN, PCGS# 9396

**1946-D Booker T. Washington Half, MS68★**  
**Tied for Finest Certified**

- 4498** 1946-D Booker T. Washington MS68★ NGC. The Denver Mint struck 50,000 Booker T. Washington half dollars in the first year of production, these being distributed in three-coin sets with an example each from Philadelphia and San Francisco. Examples can be easily found in grades through MS66, and MS67 coins are only marginally scarce. At the MS68 level, the issue becomes exceedingly rare, however. Straying from the typically seen brilliant or light golden luster, this high-end piece showcases vibrant multicolor toning in shades of amber, forest-green, olive-gold, and violet. The strike is sharp and any faint surface flaws are well-hidden beneath the rich patina. Census: 10 in 68 (4 in 68★, 1 in 68+), 2 finer (3/19).  
Ex: Beverly Hills Signature (Heritage, 11/2014), lot 4196, realized \$4,406.25. NGC ID# BYJS, PCGS# 9404

**1946-D Booker T. Washington Half, MS67  
Stunning Iridescence**

- 4499 1946-D Booker T. Washington MS67 PCGS. CAC.** The obverse of this Superb Gem exhibits stunning rose, emerald, violet, and golden-brown toning, while the reverse is lighter gold and iridescent toning. This extraordinary piece approaches the finest graded status, as PCGS has only certified three numerically finer examples. A bold strike has eliminated the usual planchet marks found on Washington's face. Population: 68 in 67 (12 in 67+), 3 finer. CAC: 70 in 67, 6 finer (2/19). NGC ID# BYJT, PCGS# 9405

**1947 Booker T. Washington Half, MS67  
Registry Set Contender**

- 4500 1947 Booker T. Washington MS67 PCGS.** Despite a generous distribution of 100,017 pieces, the 1947 Booker T. Washington commemorative half dollar is a rare issue in MS67 condition. This spectacular Superb Gem is vividly toned in shades of sea-green, magenta, and amber, with vibrant mint luster that shines through the patina. The design elements are sharply detailed and the surfaces are virtually flawless. Population: 12 in 67 (2 in 67+), 0 finer (2/19). NGC ID# BYJW, PCGS# 9408
- 4501 1948-S Booker T. Washington MS67+ PCGS. CAC.** A dazzling Washington commemorative from the San Francisco Mint that offers faint sea-green, russet, and violet toning over the obverse, while the reverse remains mostly brilliant. From a mintage of 8,005 pieces, this Superb Gem is sharply struck and virtually flawless. Population: 39 in 67 (4 in 67+), 0 finer. CAC: 48 in 67, 0 finer (2/19). NGC ID# BYK2, PCGS# 9414

**1950-D Booker T. Washington Half Dollar  
Sharply Detailed Superb Gem**

- 4502 1950-D Booker T. Washington MS67 PCGS. CAC.** A series of silver commemorative half dollars honoring the life and accomplishments of Booker T. Washington was authorized by Congress in 1946, and large numbers of the coins were produced at all three mints through 1951. Although many examples were sold through various distributors over the years, numismatic demand failed to meet the optimistic production totals. In 1950 the Denver Mint produced more than 12,000 specimens, but only half that number were actually distributed. The coins were poorly produced, and high-quality coins with well-struck details are elusive today.
- The present coin is a spectacular Superb Gem showing sharply detailed design elements. The pristine surfaces display hints of attractive golden-tan toning amid vibrant mint luster on both sides. Eye appeal is extraordinary. Population: 23 in 67 (1 in 67+), 0 finer. CAC: 14 in 67, 0 finer (2/19).
- Ex: Long Beach Signature (Heritage, 2/2013), lot 4026; PNG Signature (Heritage, 10/2014), lot 4060. NGC ID# BYK7, PCGS# 9421

- 4503 1950-S Booker T. Washington MS67+ NGC. CAC.** A scarce Superb Gem example of this San Francisco issue and one of the finest pieces endorsed by CAC. The coin is fully struck and satiny without surface abrasions. Mottled olive-gold toning appears on each side. Census: 75 in 67 (3 in 67+, 15 in 67★), 3 finer. CAC: 65 in 67, 0 finer (3/19). NGC ID# BYK8, PCGS# 9422
- 4504 1951-S Booker T. Washington MS67+ PCGS. CAC.** A Plus-graded Superb Gem from a small distribution of 7,004 pieces, this coin exhibits sharply detailed design elements throughout. The impeccably preserved surfaces radiate vibrant mint luster, with a few highlights of sea-green and lavender-gray toning. Population: 85 in 67 (9 in 67+), 0 finer. CAC: 64 in 67, 0 finer (3/19). NGC ID# BYKB, PCGS# 9426
- 4505 1954-D Washington-Carver MS66+ PCGS. CAC.** A scarce Premium Gem example of this late classic commemorative issue, showing satiny luster and brilliant color. The strike is sharp. Only three coins are finer at PCGS and NGC combined, and none are finer at CAC. Population: 83 in 66 (11 in 66+), 1 finer. CAC: 36 in 66, 0 finer (2/19). NGC ID# 332E, PCGS# 9443

**1936 Wisconsin Half Dollar, MS68★  
Obvious Registry Set Contender**

- 4506** 1936 Wisconsin MS68★ NGC. Attractively toned with smooth and wholly problem-free surfaces, this Superb Gem Wisconsin Territorial Centennial ranks solidly among the top two dozen pieces certified. Highly lustrous surfaces are infused with lime-green and ruby-red hues, with amber-gold shades adding to the outstanding eye appeal. This is a sharply struck piece, remarkably well-preserved, destined for the finest commemorative cabinet. Census: 2 in 68+, 8 in 68★, 1 in 68+★, 1 finer (2/19). NGC ID# BYKU, PCGS# 9447

**1936 York Tercentenary Half Dollar, MS68  
Outstanding Quality and Eye Appeal**

- 4507** 1936 York MS68 PCGS. CAC. A magnificent MS68 specimen, from a distribution of 25,015 pieces, this coin exhibits sharply detailed design elements and impeccably preserved, lustrous surfaces under delicate shades of lavender, lilac, and pale gold toning. Housed in a green label holder. Population: 34 in 68 (3 in 68+), 1 finer. CAC: 15 in 68, 2 finer (2/19). NGC ID# BYKV, PCGS# 9449

**COMMEMORATIVE GOLD**

- 4508** 1903 Louisiana Purchase, McKinley Gold Dollar MS67 NGC. This glistening Superb Gem displays sharp definition and remarkable preservation. Most of each side has fiery-orange coloration that captivates the eye, although small tinges of lilac are also visible on the obverse. NGC lists only six finer submissions (3/19). NGC ID# BYLE, PCGS# 7444
- 4509** 1903 Louisiana Purchase, McKinley Gold Dollar MS67 PCGS. An attractive, high-end example of the McKinley Louisiana Purchase gold dollar, showing a sharp strike and satiny wheat-gold mint luster. Neither side has mentionable abrasions. This issue is scarce in MS67, and PCGS lists only three finer representatives (3/19). NGC ID# BYLE, PCGS# 7444

**1903 Louisiana Purchase Gold Dollar, MS67+  
Spectacular McKinley Example**

- 4510** 1903 Louisiana Purchase, McKinley Gold Dollar MS67+ NGC. A Plus-graded Superb Gem representative of the McKinley version of the 1903 Louisiana Purchase gold dollar, from a distribution of 17,500 pieces. This delightful specimen exhibits sharply detailed design elements throughout, with virtually flawless orange and reddish-gold surfaces that display vibrant mint luster and outstanding eye appeal. NGC has graded six numerically finer examples (3/19). NGC ID# BYLE, PCGS# 7444

**1904 Lewis and Clark Gold Dollar, MS65  
Attractive Color and Luster**

- 4511** 1904 Lewis and Clark Gold Dollar MS65 NGC. CAC. From a distribution of 10,025 pieces, the 1904 Lewis and Clark gold dollar is more available than its 1905 counterpart. This attractive Gem displays sharply detailed design elements and well-preserved lemon-yellow surfaces, with vibrant mint luster on both sides. Overall visual appeal is outstanding. NGC ID# BYLE, PCGS# 7447

**1915-S Panama-Pacific Quarter Eagle, MS66**

- 4512** 1915-S Panama-Pacific Quarter Eagle MS66 NGC. The 1915-S Panama-Pacific quarter eagle claims a small distribution of 6,749 pieces and the issue is somewhat scarce in MS66 condition. This spectacular Premium Gem exhibits sharply detailed design elements and the virtually pristine orange-gold surfaces are lustrous and appealing. This coin should find a home in a fine commemorative collection. NGC ID# BYLP, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS66  
Well-Preserved, Lustrous Surfaces**

- 4513** 1915-S Panama-Pacific Quarter Eagle MS66 NGC. The 1915-S Panama-Pacific quarter eagle claims a small distribution of 6,749 pieces and the issue becomes scarce in grades above MS66. This delightful Premium Gem exhibits well-detailed design elements and well-preserved peach-gold surfaces that radiate vibrant mint luster on both sides. Eye appeal is outstanding.  
*From The Jersey Shore Gold Collection.* NGC ID# BYLP, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle  
CAC-Endorsed MS66**

- 4514** 1915-S Panama-Pacific Quarter Eagle MS66 PCGS. CAC. The 1915-S Pan-Pac quarter eagle is an iconic classic commemorative, but it is seldom found in MS66 with a CAC endorsement. Higher-graded pieces are scarce, and they are rarely seen in a PCGS holder. This Premium Gem displays sharp definition and luminous orange-gold coloration. No abrasions are visible and eye appeal excels. PCGS reports 53 finer submissions (3/19). NGC ID# BYLP, PCGS# 7450

**1915-S Pan-Pac Quarter Eagle, MS67  
Rarely Seen Any Finer**

- 4515** 1915-S Panama-Pacific Quarter Eagle MS67 NGC. From a small distribution of 6,749 pieces, the 1915-S Panama-Pacific quarter eagle was conceived and distributed by Farran Zerbe. This impressive Superb Gem exhibits well-detailed design elements and impeccably preserved orange-gold surfaces, with vibrant mint luster throughout. Overall eye appeal is outstanding for this popular gold commemorative. NGC has graded two numerically finer examples (3/19). NGC ID# BYLP, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle  
Superb Gem Example**

- 4516** 1915-S Panama-Pacific Quarter Eagle MS67 NGC. Only 6,749 Panama-Pacific quarter eagles were distributed in 1915 at the exposition held to commemorate the opening of the Panama Canal. The fair was held in San Francisco, which had just been rebuilt after the 1906 earthquake, and Farran Zerbe was the main sponsor of the coins. The obverse was designed by Chief Engraver Charles Barber, while the reverse was designed by George Morgan. The present coin is a spectacular Superb Gem, with sharply detailed devices and bright, satiny mint luster. Most examples seen are in lower Mint State grades, and Superb Gems are quite elusive. Only two coins have been certified in a higher numeric grade (2/19).  
*Ex: Summer FUN Signature (Heritage, 7/2011), lot 4427, where it realized \$10,350.* NGC ID# BYLP, PCGS# 7450

**Panama-Pacific International Exposition  
Five-Coin Copper and Glass Frame**

- 4517** (1915) Panama-Pacific International Exposition Five-Coin Copper Frame. Shreve & Co., a San Francisco jewelry firm that has been in business since the California Gold Rush, was the maker of this five-coin frame in copper and glass. Such frames were produced during 1915 to hold each of the five Panama-Pacific Exposition commemorative issues, including the half dollar, gold dollar, quarter eagle, and round and octagonal fifty dollars. The frames are rare to very rare, and a number were purportedly sold to banks, who put the framed sets on display. The present 200 mm x 250 mm frame includes a faded pink upper banner with gold lettering, and five gray informational inserts with gold lettering. The copper and glass are in excellent condition. On the back, the easel and ring are present and problem-free.

- 4518** 1916 McKinley Gold Dollar MS67 PCGS. This boldly struck canary-gold Superb Gem features a pristine reverse and a nearly immaculate obverse. The second gold dollar type depicting McKinley, the victim of an assassin at the 1901 Pan-American Exposition in Buffalo, New York. Certified in a green label holder.  
*Ex: New York Signature (Heritage, 11/2013), lot 4909, which realized \$4,259.38.* NGC ID# BYLK, PCGS# 7454

**1916 McKinley Gold Dollar, MS67+  
None Finer at PCGS**

- 4519 1916 McKinley Gold Dollar MS67+ PCGS. CAC.** The 1916 McKinley gold dollar claims a small distribution of 9,977 pieces and PCGS has certified no finer examples than the present coin (3/19). This spectacular Plus-graded Superb Gem exhibits well-detailed design elements and impeccably preserved orange-gold surfaces that radiate vibrant mint luster from both sides. Eye appeal is terrific. NGC ID# BYLK, PCGS# 7454

**1917 McKinley Gold Dollar, MS67  
Registry Grade Example**

- 4520 1917 McKinley Gold Dollar MS67 PCGS.** Despite a small distribution of 10,000 pieces, the 1917 McKinley gold dollar can be found in high grade without much difficulty. It becomes scarce at the MS67 grade level, however, and finer coins are virtually unobtainable. This delightful Superb Gem exhibits sharply detailed devices and impeccably preserved orange-gold surfaces with vibrant mint luster throughout. Population: 92 in 67 (11 in 67+), 0 finer (3/19). NGC ID# BYLL, PCGS# 7455

- 4521 1922 Grant Gold Dollar, No Star, MS66+ PCGS. CAC.** This is a sharp, high-end Premium Gem example of the Grant Memorial gold dollar, showing rich yellow-gold luster with delicate rose and lilac accents. Grant's hair is well brought up, and each side displays outstanding eye appeal. Finer pieces are scarce. NGC ID# BYLN, PCGS# 7458

- 4522 1922 Grant Gold Dollar, With Star, MS66 PCGS.** Rich, honey-gold color with yellow-gold highlights gives this Premium Gem Grant With Star exceptional eye appeal, while its sharp strike is equally impressive. The With Star and Without Star varieties have equal mintages of 5,016 pieces. Surprisingly, the With Star variant is seen more often, although only slightly so.  
*From The Jersey Shore Gold Collection.* NGC ID# BYPS, PCGS# 7459

**1926 Sesquicentennial Quarter Eagle, MS66  
Extremely Rare Any Finer**

- 4523 1926 Sesquicentennial Quarter Eagle MS66 PCGS.** From a distribution of 46,019 pieces, the 1926 Sesquicentennial quarter eagle is somewhat scarce in MS66 condition, and finer examples are virtually unobtainable. This impressive Premium Gem offers well-detailed design elements and impeccably preserved orange-gold surfaces, with vibrant mint luster throughout. PCGS has certified only one numerically finer example (2/19).  
*From The Jersey Shore Gold Collection.* NGC ID# 2FE9, PCGS# 7466

**1926 Sesquicentennial Quarter Eagle, MS66  
Subtly Frosted on the High Points**

- 4524 1926 Sesquicentennial Quarter Eagle MS66 PCGS.** Touches of frostiness on the high points add to the vibrancy of this yellow-gold and pale rose Premium Gem Sesquicentennial quarter eagle. Both sides are notably clean, the scroll on the obverse deserving special mention. PCGS has graded only one finer example, in MS67 (3/19).  
*Ex: FUN Signature (Heritage, 1/2014), lot 6257, which realized \$7,637.50.* NGC ID# 2FE9, PCGS# 7466

- 4525 Four-Piece 1997 Jackie Robinson Set Uncertified.** The set includes proof and uncirculated examples of the 1997-W five dollar gold and 1997-S silver dollar. The uncirculated 1997-S five is a key to the modern commemorative series, since only 5,714 pieces were issued. The four pristine coins are housed in their capsules of mint issue. The presentation case and certificate of authenticity are also included. NGC ID# 28UG, PCGS# 9759 Base PCGS# 9759

## MODERN BULLION COINS

### 1986-2018 Proof Silver Eagle Set PR70 Deep Cameo Includes 1995-W Key Date

- 4526 33-Piece 1986 to 2018 Proof Silver Eagle Set, PR70 Deep Cameo PCGS.** The set includes one proof Silver Eagle from each production year from 1986 to 2018 inclusive (no proof Silver Eagles were struck in 2009), plus the key-date 1995-W. From 1986 to 1992, proofs were struck at San Francisco. Regular proofs dated 1993 to 2000 were struck at Philadelphia, and in 2001, proof coinage was moved to the West Point Mint, where it remains today. This set includes the key-date 1995-W proof (originally part of a special 10th anniversary bullion coin proof set issued by the West Point Mint to the extent of only 30,125 pieces), and it also includes the 2016-W 30th anniversary Lettered Edge proof. The coins are brilliant and individually housed in mostly modern PCGS holders with a common grade of PR70 Deep Cameo. (Total: 33 coins)

- 4527 1988 Quarter-Ounce Gold Eagle MS70 NGC.** The mintage of quarter-ounce Gold Eagles was a mere fraction of the previous year's production — just 49,000 pieces vs. almost 270,000 pieces struck in 1987. The MS70 populations for the 1988 are minuscule as a result: NGC reports 108 examples, and PCGS has seen just a dozen pieces in MS70 (3/19). This example displays flawless surfaces and exquisite soft, satiny mint luster. NGC ID# 26M4, PCGS# 9820

- 4528 Four-Piece 1990 Gold Eagle Set PR70 Ultra Cameo NGC.** The set includes the 1990-P tenth-ounce \$5, 1990-P quarter-ounce \$10, 1990-P half-ounce \$25, and 1990-W one-ounce \$50. Separately encapsulated with matching grades in holders bearing the facsimile signature of Augustus Saint-Gaudens. A flawless grouping with reflective canary-gold fields and fully struck devices. (Total: 4 coins) NGC ID# 28YZ, PCGS# 9845

### 1991 Half-Ounce Gold Eagle, MS70 Few Qualify for This Flawless Grade

- 4529 1991 Half-Ounce Gold Eagle, Thomas Cleveland, Art Deco MS70 PCGS.** Only 32 of the of the nearly 2,000 1991 half-ounce Gold Eagle submissions at PCGS have been awarded a flawless grade of MS70 (3/19). This is one of them. Merely 24,100 examples were struck for the year, adding to the issue's appeal. Fully struck and perfectly preserved lemon-gold surfaces shine with soft, satiny mint luster. PCGS# 694880 Base PCGS# 9852

- 4530 Four-Piece 1993 Gold Eagle Set PR70 Ultra Cameo NGC.** The coins are individually certified in identically graded holders. The set includes: 1993-P tenth-ounce \$5; 1993-P quarter-ounce \$10; 1993-P half-ounce \$25; and a 1993-W one-ounce \$50. All coins are as made, and are flawless aside from several pinpoint strike-throughs on the upper left obverse of the one-ounce coin. (Total: 4 coins)

### 10th Anniversary Set of Proof Bullion Coins Includes the Key 1995-W Silver Eagle

- 4531 Five-Piece 1995-W 10th Anniversary Silver Eagle and Gold Proof Set.** A five-piece set of proof bullion coins issued to commemorate the 10th anniversary of the U.S. Mint's bullion coin program. The set includes one proof example each of the 1995 one-ounce, half-ounce, quarter-ounce, and tenth-ounce gold eagles from the West Point Mint, along with the key-date 1995-W Silver Eagle, which boasts a low mintage of 30,125 pieces. Original case, box, and certificate of authenticity included. (Total: 5 coins)

- 4532 1995-W Silver Eagle PR68 Deep Cameo PCGS.** From a minuscule mintage of 30,125 pieces, the 1995-W is the acknowledged key to the one-ounce Silver Eagle series. This impressive PR68 specimen offers fully struck, richly frosted design elements that contrast profoundly with the deeply mirrored fields. NGC ID# CFWX, PCGS# 9887

- 4533 1995-W Silver Eagle PR69 Deep Cameo PCGS.** Dubbed the "King of Silver Eagles," the 1995-W is certainly worthy of the distinction based on its low 30,125-piece mintage. This is a superlative example, just one notch away from perfection, richly frosted on the devices that seem to float on liquidlike, glassy-mirrored fields. This issue ranks fourth in Schechter and Garrett's *100 Greatest U.S. Modern Coins*. NGC ID# CFWX, PCGS# 9887

1995-W Silver Eagle, PR69 Ultra Cameo  
Among the 100 Greatest U.S. Modern Coins

- 4534** 1995-W Silver Eagle PR69 Ultra Cameo NGC. Schechter and Garrett ranked the 1995-W fourth among their *100 Greatest U.S. Modern Coins*, writing: "The King of the silver eagles, the 1995-W silver eagle is one of the most coveted and important of all modern U.S. coins." Stark black-and-white contrast characterizes each side. Preservation is virtually flawless. A phenomenal example of this well-known key. NGC ID# CFWX, PCGS# 9887

1995-W Silver Eagle, PR69 Ultra Cameo  
Pinnacle of Collecting in the Series

- 4535** 1995-W Silver Eagle PR69 Ultra Cameo NGC. For a quarter-century the 1995-W proof Silver Eagle has stood above all other issues as the pinnacle of collecting in this popular and ever-growing series. This near-pristine PR69 Ultra Cameo example showcases the usual thick layer of mint frost over fully struck devices. Watery, reflective fields lack even the smallest fleck. NGC ID# CFWX, PCGS# 9887

- 4536** 1995-W Five-Piece Eagle Proof Set PR69 Deep Cameo PCGS. A five-coin set of proof 1995 U.S. bullion coins from the West Point Mint, matching the denominations of the famous 10th Anniversary Set (one-ounce, half-ounce, quarter-ounce, and tenth-ounce Gold Eagles and the key date 1995-W one-ounce Silver Eagle). All coins are certified PR69 Deep Cameo, with fully struck design elements, deeply reflective fields, and virtually perfect surfaces. (Total: 5 coins) NGC ID# CFWX, PCGS# 9887

1995-W Silver Eagle, PR70 Ultra Cameo  
Sought-After Key to the Series

- 4537** 1995-W Silver Eagle PR70 Ultra Cameo NGC. The 1995-W one-ounce Silver Eagle features the classic Walking Liberty obverse by Adolph Weinman and a new Heraldic Eagle reverse by John Mercanti. Produced as part of the 10th-Anniversary Proof Bullion Coinage Set, the coins were the first proof issues struck at the West Point Mint and claim a limited mintage of just 30,125 pieces. The 1995-W is the acknowledged key to the Silver Eagle series, and it is listed among the *100 Greatest U.S. Modern Coins*.

The present coin is a technically perfect example, with fully struck design elements that exhibit a rich coat of mint frost. The deeply mirrored fields contrast profoundly with the frosty devices, creating an intense cameo effect. The impeccably preserved surfaces show no trace of toning and eye appeal is terrific.

Ex: *Long Beach Signature* (Heritage, 6/2014), lot 5014, where it sold for \$19,975. NGC ID# CFWX, PCGS# 9887

---

1995-W Silver Eagle, PR70 Ultra Cameo  
Lower Mintage Than Other Famous Key Dates

**4538** 1995-W Silver Eagle PR70 Ultra Cameo NGC. The 1995-W Silver Eagle has a lower mintage than many other famous key dates, including the 1911-D quarter eagle, 1893-S Morgan dollar, 1909-S VDB cent, and the 1916-D Mercury dime, just to name a few. A mere 30,125 pieces were sold in five-coin proof sets alongside four Gold Eagle denominations. At the time, the set's \$999 price tag was considered by many collectors to be excessive, limiting sales.

This is one of a minority of 1995-W Silver Eagles awarded a flawless PR70 Ultra Cameo assessment. Its pristine, glassy fields are beautifully textured and surround thickly frosted, fully struck relief elements. NGC ID# CFWX, PCGS# 9887

---

---

1995-W Silver Eagle, PR70 Deep Cameo  
First Issue From the West Point Mint

**4539** 1995-W Silver Eagle PR70 Deep Cameo PCGS. Whereas nearly 440,000 1995-P proof Silver Eagles were sold during the year of issue, only 30,125 collectors opted for one of the expensive five-coin sets with the 1995-W Silver Eagle. Up to 45,000 sets were authorized for sale. This technically perfect representative showcases dramatic depth of field and fully frosted motifs. Minor milk spotting occurs on each side. NGC ID# CFWX, PCGS# 9887

---

1995-W Silver Eagle, Low Mintage Key  
PR69 Deep Cameo

**4540** 1995-W Silver Eagle, 10th Anniversary Set, PR69 Deep Cameo PCGS. Silver eagle collectors were unhappy in 1995, when they were obligated to purchase four proof gold eagles (the 1995-W tenth-ounce through one-ounce) to acquire the 1995-W proof silver eagle directly from the U.S. Mint. Many boycotted the issue, and soon regretted their action as prices rose promptly in the secondary market. The issue remains the best-known key to the silver eagle series. This is an immaculate white-on-black specimen with outstanding eye appeal. PCGS# 542350 Base PCGS# 9887

---

**4541 1996 Silver Eagle MS70 NGC.** A perfect MS70 example, this 1996 American Eagle has flawless silver surfaces that exhibit a bold strike and brilliant satin luster. Registry collectors are the candidates for this Superb Gem that will enhance any specialized collection of the series. NGC ID# 26JR, PCGS# 9900

**4542 1996 Silver Eagle MS70 NGC.** Perfect, MS70 examples of the 1996 Silver Eagle bullion coin sell for strong premiums among Registry Set collectors and specialists of this series. Offered here is a brilliant, lustrous coin with a full strike and untouched surfaces. Eye appeal is outstanding. NGC ID# 26JR, PCGS# 9900

#### 1997 Quarter-Ounce Gold Eagle, MS70

**4543 1997 Quarter-Ounce Gold Eagle MS70 NGC.** The quarter-ounce 1997 Gold Eagle is a rarity certified MS70. NGC reports only 50 coins so fine, and PCGS 24 (3/19). This piece is essential for the Registry Set collector. Fully struck and flawless, the yellow-gold surfaces yield satiny mint luster and an attractive glow overall. NGC ID# 26MD, PCGS# 9916

#### 1999 Silver Eagle, MS70 Small Population at This Level

**4544 1999 Silver Eagle MS70 NGC.** Few Silver Eagles have as low a population in flawless MS70 condition as the 1999, which is surprising considering the fury of demand that year amid fears of Y2K. Perhaps a smaller percentage of the mintage went to collectors, or the Mint was more concerned with output. Both sides are exactly as expected: entirely brilliant, satiny, and unmarked with full strike. NGC ID# 26JX, PCGS# 9947

#### 1999-W Tenth-Ounce Gold Eagle, MS70 FS-401, Unfinished Proof Dies

**4545 1999-W Tenth-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS70 NGC.** The one-tenth and quarter-ounce Gold Eagles struck from Unfinished Proof Dies in 1999 represent the only major varieties in their respective series and are included among the *100 Greatest U.S. Modern Coins*. It is believed that 14,500 tenth-ounce circulation strikes were manufactured. This pristine, satiny representative enjoys light lemon-gold color and a full strike. NGC ID# 26LB, PCGS# 511606 Base PCGS# 99940

**4546 2000 Silver Eagle MS70 NGC.** The 2000 Silver Eagle is relatively scarce in MS70, the grade most sought-after among specialists of the series. This example is untuned and shimmers with satiny luster. The strike is full and the preservation is flawless. NGC ID# 26JZ, PCGS# 9949

#### 2000 Silver Eagle, MS70 Millennium Set Example

**4547 2000 Millennium Set Silver Eagle MS70 NGC.** This is one of the 75,000 Silver Eagles sold in three-piece sets. Also included in these "Millennium Sets" were the new Sacagawea dollars and \$1 Federal Reserve notes. Pristine, fully struck, all-brilliant surfaces make this a flawless Registry coin. It is one of 36 MS70 Silver Eagles at NGC with the Millennium Set designation (2/19). NGC ID# 26JZ, PCGS# 9969

**4548 2008 "Humbert Commemorative" Gem Proof Ultra Cameo NGC.** An octagonal gold piece struck from 2.5 troy ounces of "Pure California Gold." The design is similar to the K-11 fifty dollar slug of the Gold Rush period, but the fineness on the obverse has been changed to "999.9 THOUS.," and the reverse inscription reads: "HUMBERT GOLD INGOT / COMMEMORATIVE 2008 / PURE CALIFORNIA GOLD / 2.5 OZ TROY 999.9 FINE."

### COINS OF HAWAII

**4549 1847 Hawaii Cent MS62 Brown PCGS. Medcalf 2CC-2.** Crosslet 4 in date. The first official coinage for the Kingdom of Hawaii was the 1847 cent, of which approximately 100,000 pieces were struck. However, the issue never caught on locally. This is a lovely chocolate-brown example with original mint-red color within the recesses. Small ticks do not detract. Listed on page 425 of the 2019 *Guide Book*. NGC ID# 2C52, PCGS# 10965

**4550 1847 Hawaii Cent MS62 Brown PCGS. Medcalf 2CC-3.** Plain 4 in the date. This is the third rarest variety among 1847 Hawaiian cents, identified by the set of two berries under the second A in HAWAII. This MS62 example enjoys glossy mahogany-brown surfaces and strong detail throughout. There are a few trivial marks in the obverse field. Listed on page 425 of the 2019 *Guide Book*. NGC ID# 2C52, PCGS# 10965

**4551 1847 Hawaii Cent MS62 Brown PCGS. Medcalf 2CC-2.** Crosslet 4 in date. The reverse berries are arranged 7x8, one of which is directly below first A in HAWAII. The portrait of King Kamehameha III is strong, as are the wreath and legends. Lustrous with reddish-violet accents and deep brown color overall. Listed on page 425 of the 2019 *Guide Book*. NGC ID# 2C52, PCGS# 10965

**1881 Hawaii Five Cent Pattern, XF Details  
Medcalf 2CN-1, Rare Original Striking**

- 4552 1881 Hawaii Five Cents — Holed — NGC Details. XF. M. 2CN-1, KM-2.** Per Medcalf, a New Caledonia nickel mine owner met King Kalakaua during the latter's trip around the world. The mine owner ordered 200 pattern five-cent pieces from the Paris Mint. The speculation never became official, perhaps because the Hawaiian Motto was misspelled, beginning with AU instead of UA. The country name was designated as the Sandwich Islands, the British name for Hawaii. The pattern is rare today, and should not be confused with later aluminum "restrikes" from copy dies. This stone-gray example has a round hole near 12 o'clock, along with light wear, a few minor obverse rim nicks, and a hint of gray granularity on the reverse. Listed on page 425 of the 2019 *Guide Book*.

**1883 Hawaii Quarter, MS66+  
Colorful Border Patina**

- 4553 1883 Hawaii Quarter MS66+ PCGS. CAC.** Of the four 1883 Hawaii denominations, the hapaha or quarter is the most available in Mint State. But the issue becomes rare at the MS66+ level, with just eight pieces certified as such by PCGS with only 26 finer (3/19). This lustrous representative displays splendid ocean-blue and golden-brown toning throughout the borders, leaving a window of brilliance at the centers. The strike is crisp except on the upper portion of King Kalakaua's beard. NGC ID# 2C58, PCGS# 10987

**1883 Hawaii Quarter, MS67  
One Coin Graded Higher**

- 4554 1883 Hawaii Quarter MS67 PCGS.** The San Francisco Mint fulfilled an order for \$125,000 in quarter dollars for the Kingdom of Hawaii in 1883. This is the most collectible denomination in high grades, followed by the dime, half dollar, and dollar. Mottled violet, crimson, and gunmetal toning combines with areas of brilliance, permitting frosty mint luster to shine from the underlying surfaces. Bold strike. Population: 25 in 67 (3 in 67+), 1 finer (3/19). NGC ID# 2C58, PCGS# 10987

**1883 Hawaii Quarter, PR62  
Only 26 Examples Struck**

- 4555 1883 Hawaii Quarter PR62 PCGS. CAC.** The *Guide Book* lists a proof mintage of 26 pieces for the 1883 Hawaii quarter dollar. The issue is understandably rare in any grade today, with some resubmissions likely reflected in the certified population totals. PCGS and NGC combined report 22 survivors, mostly in low grades. This CAC-approved example displays a full strike and reflective fields. The interiors are essentially brilliant, but the borders show light russet-gold toning. Faint lines in the fields prevent a finer grade. Population: 3 in 62, 3 finer. CAC: 2 in 62, 0 finer (3/19). Ex: FUN Signature (Heritage, 1/2017), lot 6348, which realized \$10,575. NGC ID# 2C59, PCGS# 10989

- 4556 1883 Hawaii Half Dollar MS63 PCGS.** Golden-olive and gunmetal-blue toning appears at the upper-right obverse border and throughout the entire reverse. The remaining portion of the obverse is mostly brilliant and frosty, typical of the S-mint, where this coin was struck. Trivial grazes are generally well-hidden. NGC ID# 2C5B, PCGS# 10991

**Unique (?) Ten-Piece Denomination Set of  
'1883' Hawaii Hub Impressions, MS65 to MS66**

**4557 "1883" (Circa 1900) Hawaii Hub Impressions MS65 to MS66 PCGS.** The 1961 Gould-Bressett *Hawaiian Coins* reference refers to "a unique set of hub impressions" with each denomination (10C, 1/8 D, 1/4 D, 1/2 D, and 1 D) represented by uniface obverse and reverse strikes, for a total of ten pieces. That unique set is the present lot. The date only includes the initial 1, without any 883 digits. On each piece, the fields consist solely of myriad raised lines transferred from the hubs. The 10C, 1/8 D, and 1/4 D impressions are off-center on larger planchets. The 1/2 D and 1 D impressions are perfectly centered on proper diameter planchets. The dime and eighth dollar appear to be brass, while the three higher denominations appear struck in bronze. The PCGS inserts refer to the pieces as fantasy strikes. Per Medcalf (1990), "the hubs are impounded in the Philadelphia Mint." This lot includes:

"1883" Dime Obverse Hub Impression MS65 PCGS. Pristine aside from two small spots noted on the mustache and second I in HAWAII.

"1883" Dime Reverse Hub Impression MS66 PCGS. Rose-red and olive toning. A few pinpoint flecks at the center, but otherwise immaculate.

"1883" 1/8 Dollar Obverse Hub Impression MS65 PCGS. Tiny spots on the neck with another small spot on the forehead.

"1883" 1/8 Dollar Reverse Hub Impression MS65 PCGS. Small spots at 2:30 and beneath the AL in HAPAWALU are the sole imperfections.

"1883" 1/4 Dollar Obverse Hub Impression MS65 PCGS. As struck aside from natural olive-green and brick-red toning.

"1883" 1/4 Dollar Reverse Hub Impression MS66 PCGS. Toned mahogany-brown with an outer ring of orange-gold. Pristine surfaces.

"1883" 1/2 Dollar Obverse Hub Impression MS66 PCGS. Lilac-tinged medium brown toning. No spots or marks are observed.

"1883" 1/2 Dollar Reverse Hub Impression MS66 PCGS. Medium brown with sea-green undertones. One inconspicuous spot near the dentils at 7:30.

"1883" Dollar Obverse Hub Impression MS66 PCGS. Hints of apple-green and ruby-red visit medium brown surfaces. One subtle spot at 3 o'clock.

"1883" Dollar Reverse Hub Impression MS66 PCGS. Toned mahogany-brown with peach-red in the recesses of the legends. A couple of tiny flakes on the lower right quadrant within the coat of arms. (Total: 10 coins) PCGS# 511337

## PATTERNS

### 1850 Cap and Rays Three Cent in Silver Judd-125, PR65 Ex: Lemus-Queller Collection

- 4558** 1850 Three Cent Silver, Judd-125 Original, Pollock-147, R.4, PR65 NGC. Ex: Lemus Collection. The obverse features a Liberty cap surrounded by rays. LIBERTY is on the bottom part of the cap and the date is below. A palm branch encircles the entire reverse to form a wreath, enclosing the numeral III. UNITED STATES OF AMERICA rings the rim. Struck in silver with a plain edge. This 1850 version was modeled after Christian Gobrecht's design from 1836, which was in turn influenced by the Mexican Cap and Rays design. Sharply struck and flashy with dappled gunmetal-blue and golden-brown toning. Among the nicest specimens of this attractive design.  
Ex: Queller Family Collection Part Two (Heritage, 1/2009), lot 1533; ANA Signature (Heritage, 8/2012), lot 4343, where it sold for \$3,818.75. NGC ID# 298G, PCGS# 11536

### 1857 Cent Pattern in Copper-Nickel Judd-186, PR64

- 4559** 1857 One Cent, Judd-186, Pollock-222, High R.7, PR64 NGC. The obverse depiction of Liberty is the same as on the 1865 three cent nickel, but stars replace the peripheral legend. The reverse features the denomination within a wreath. UNITED STATES OF AMERICA does not appear on this very rare pattern. Struck in copper-nickel with a plain edge. The obverse die was also used to produced a quarter eagle pattern, Judd-189. The reverse die was earlier used on an 1853 pattern cent. Smooth, satiny surfaces exhibit a blend of olive-gold and chestnut patina, without any significant contact marks. The peripheral stars and central devices are sharp. A bit of greenish verdigris tucked into the C in CENT serves as a pedigree marker. PCGS# 11815

### 1858 Flying Eagle Cent in Copper-Nickel Judd-206, PR63

- 4560** 1858 Flying Eagle Cent, Judd-206, Pollock-242, R.5, PR63 PCGS. Snow-PT16. Paquet's Small Eagle pattern obverse is paired with the regular issue Low Leaves reverse. Struck in copper-nickel with a plain edge. The surfaces are light in color overall and obviously struck in copper-nickel with slight pastel iridescence seen on each side. The grade comes from a stippled scratch from the eagle's upper wing to the rim at 1 o'clock. NGC ID# 29BM, PCGS# 11877

### 1858 Indian Cent Pattern, PR64+ Judd-208, Five-Leaf Clusters

- 4561** 1858 Indian Cent, Judd-208, Pollock-259, Snow-PT28, R.1, PR64+ PCGS. CAC. There are four notable subvarieties of Judd-208; these include each combination of narrow or broad bust point obverses paired with either five or six leaf cluster laurel wreath reverses. The present piece pairs the broad bust point obverse with a five-leaf clusters wreath reverse. Struck in copper-nickel with a plain edge. An intricately struck and unmarked wheat-gold near-Gem. A small spot is on the wreath near 3 o'clock. NGC ID# 29BP, PCGS# 11885

### 1863 Indian Cent in Bronze Judd-299, PR65 Red and Brown

- 4562** 1863 One Cent, Judd-299, Pollock-359, R.3, PR65 Red and Brown PCGS. CAC. Medal alignment. From regular issue dies, but struck in bronze with a plain edge. A transitional pattern for the 1864 bronze No L regular issue. The fields show nice reflectivity, and there is significant mint red on each side intermixed with lime green. The devices are sharply defined throughout.  
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4552, where it realized \$1,840. NGC ID# 29ED, PCGS# 70454

**1863 Two Cent Piece in Copper or Bronze  
Judd-312, PR65+ Red and Brown**

- 4563** 1863 Two Cents, Judd-312, Pollock-377, R.4, PR65+ Red and Brown PCGS. CAC. Both the obverse and the reverse are similar to those adopted for the business strike two cent piece in 1864, except that the motto reads GOD OUR TRUST and the word CENTS is curved on the reverse. Struck in bronze or copper with a plain edge. There is very little evidence of brown on either side of this exceptional piece. Most of both the obverse and reverse is full red with a bit of pale blue in the fields.

Ex: FUN Signature (Heritage, 1/2010), lot 3737, where it sold for \$3,881.25. NGC ID# 29ER, PCGS# 70467

**1864 Motto Seated Quarter, Judd-387  
PR64 Red and Brown Cameo**

- 4564** 1864 Seated Quarter, Judd-387, Pollock-455, High R.6, PR64 Red and Brown Cameo NGC. A regular issue 1864 Seated quarter obverse is paired with the Motto reverse, first issued for commerce in 1866. Struck in copper with a reeded edge. USPatterns.com states that Judd-387 quarters "are actually restrikes made circa-1869 and into the early 1870s and offered with restrikes of other denominations in complete [off-metal] sets." A fully struck specimen with compelling contrast between the fire-red motifs and the reflective fields. One tiny spot noted on the field near Liberty's knee. NGC ID# 29HA, PCGS# 70558

**1867 Five Cent Pattern in Nickel  
Judd-570, Pollock-640, PR64 Ultra Cameo  
Rare Near-Curl Variant**

- 4565** 1867 Five Cents, Judd-570, Pollock-640, R.5, PR64 Ultra Cameo NGC. A bust of Liberty wearing a coronet and facing left dominates the obverse design. UNITED STATES OF AMERICA surrounds the periphery with the date below. The top of the 7 is close to the curl. The reverse shows 5 CENTS centered within a laurel wreath with the motto IN GOD WE TRUST at the top. CENTS is in a curved line. Struck in nickel with a plain edge. Only four pieces have been confirmed with the date close to the hair curl, according to USPatterns.com. Each side is deeply mirrored with thickly frosted, heavily contrasted devices. Fully struck, just the faintest trace of pinkish patina is seen across each side. PCGS# 506988

**1867 Three Dollar in Nickel  
Judd-597, PR58**

- 4566** 1867 Three Dollar, Judd-597, Pollock-661, R.8, PR58 NGC. The regular issue design for the 1867 three dollar gold piece. Struck in nickel with a reeded edge. At least three examples of this pattern variety are known. What is not known are the circumstances surrounding the issue of these pieces. They are alleged to be off-metal dies trial striking, but more likely is the profit motive. They were probably struck a few years later for sale to collectors. Examples are also known in copper and silver, thus the possibility that three-piece sets of these patterns were sold. Alternatively, Saul Teichman (USPatterns.com) suggests that they might be mint errors, struck on planchets intended for Shield nickels. Both denominations have exactly the same diameter, so his theory is certainly possible. The surfaces of this piece are bright with pale color. A distinctive planchet void is seen to the left of the 3 as a reliable pedigree identifier.

Ex: ANA Signature (Heritage, 8/2001), lot 8344, where it realized \$4,485; William Rau Collection / Central States Signature (Heritage, 4/2018), where it brought \$8,400.

From The Chinook Collection. NGC ID# 29MS, PCGS# 60809

1869 Standard Silver Quarter in Silver  
Judd-728, PR65 Cameo

- 4567** 1869 Standard Silver Quarter, Judd-728, Pollock-809, High R.6, PR65 Cameo PCGS. CAC. On the obverse a right-facing Liberty wears a starless tiara. A headband behind the tiara bears the legend LIBERTY in raised letters. UNITED STATES OF AMERICA borders the upper rim, with IN GOD WE TRUST on a curved ribbon below. On the reverse STANDARD SILVER borders the upper edge, with 25 / CENTS in an open oak and laurel wreath. Struck in silver with a plain edge. The fields are uncommonly deep in their reflectivity, making the cameo contrast even easier to see on this Gem. The centers are mostly brilliant and gradually deepen to rose and russet toning around the margins.  
*From The Jersey Shore Gold Collection.* PCGS# 512010 Base PCGS# 60955

1870 Standard Silver Half Dollar  
Judd-978, Copper, PR63 Brown

- 4568** 1870 Standard Silver Half Dollar, Judd-978, Pollock-1090, High R.7, PR63 Brown PCGS. A bust of Liberty faces right on the obverse with the motto IN GOD WE TRUST on a scroll below. Liberty wears a cap that is ornamented with two stars, and a ribbon that crosses her shoulder is inscribed with LIBERTY in raised letters. The initial B is seen within the folds of the ribbon behind Liberty's cap, and the legend UNITED STATES OF AMERICA is at the upper periphery. On the reverse, the denomination 50 CENTS is expressed within a wreath of oak and laurel. The date 1870 is below, the word STANDARD is above. Struck in copper with a plain edge. An intricately struck tan-brown, olive-green, and lavender-red specimen. The surfaces appear unabraded, though minute ebony freckles are distributed throughout. The radial obverse die crack at 7:30 is well advanced.  
*From The Jersey Shore Gold Collection.* NGC ID# 29Z3, PCGS# 61224

1870 Three Dollar in Copper  
Judd-1029, PR65 Red and Brown  
Ex: Green, Newman

- 4569** 1870 Three Dollar, Judd-1029, Pollock-1164, R.7, PR65 Red and Brown NGC. CAC. The regular three dollar gold dies. Struck in copper with a reeded edge. The regular dies three dollar gold pieces of 1870 include five or six known in copper, two or three in aluminum, and one in nickel composition. NGC and PCGS have combined to certify four submissions, and the Newman specimen is the finest of those. This is the only PR65 coin certified at either of the two major services. Both sides combine light orange mint color with reddish-brown and delicate blue-green patina.  
*Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$60; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part I (Heritage, 4/2013), lot 3990, where it realized \$12,337.50. NGC ID# 2A28, PCGS# 71277*

1942 Brown Plastic (Probably Bakelite) Cent  
Judd-2060 (2067), RB 42-51, SP63

- 4570 1942 Cent, Judd-2060, Pollock-4035, Low R.7, SP63 PCGS. RB 42-51. Burdette's First Reverse. Labeled as Brown Plastic and attributed as a Judd-2060, we believe this is actually a Bakelite pattern, Judd-2067. As such, Bakelite pieces show a dark brown or sometimes black appearance, and some are known with crazed surfaces. This example has medium-brown color overall and the crazing is remarkably pronounced on the obverse, much less so on the reverse. The number 5 was scratched into the lower-right obverse field, presumably signifying this was the fifth piece produced in this composition. As expected, the edge is uniformly square, but a very faint perpendicular line can just barely be made out on the lower part of the rim from the molded edge. The quantity produced is unknown. NGC ID# 2ANB, PCGS# 12215

1942 Uniface Cent, Struck in Phenolic Heavy Paper  
Judd-2060 (2066), RB 42-56 SP64  
Made by Colt Firearms

- 4571 1942 Cent, Judd-2060 (2066), Pollock-4035, Low R.7, SP64 PCGS. RB 42-56. Listed on the insert as Brown Plastic, this is instead a uniface piece that was compression molded from phenolic impregnated heavy paper. There were six different compositions, and only 10-20 pieces per lot were sent to the Mint on October 1, 1942. The batch (or lot) can be determined by the number/letter combination that was scratched into the left and right obverse fields. The left field has r2, and the right has E. Close examination with a loupe reveals tiny paper fibers that jut out at odd angles from the r2-E lot number designation. The surfaces are deep reddish-brown. A series of parallel scratches are seen on the upper part of the portrait of Liberty, but we are not certain if these are actual scratches made post-production or some sort of pre-production damage to the die or planchet. The reason for uncertainty lies in the lack of fibrous remnants in this area. The reverse on this and two other patterns were subjected to an abrasion test and had their devices eliminated, "... the discs were initially abraded with emery paper until the embossed lettering on the reverse side had been worn away ... ." Produced by the Colt Patent Firearms Manufacturing Company. NGC ID# 2ANB, PCGS# 12215

1866 'Three Dollar,' MS67 NGC  
Judd-C1866-1, Merriam Fantasy

- 4572 1866 Merriam Fantasy "Three Dollar" MS67 NGC. Judd-C1866-1, Pollock-5080, Cunningham-15-740X. The obverse depicts Lincoln facing right, with GOD AND OUR COUNTRY above, and the date below. A star at the top of the reverse joins the two wreath branches that enclose a Roman numeral III. Struck in gold with a reeded edge. This is an important piece related to the 1868-dated example that realized \$6,600 in our FUN sale in January, and this example is a point finer compared to that MS66 NGC piece. Both sides are fully lustrous with frosty lemon-yellow surfaces and excellent design definition.  
*From The Chinook Collection.*

---

1896 One Talent, Uncirculated  
Private Coinage Proposal  
Perhaps Three Examples Known

**4573** 1896 One Talent, Judd-Unlisted, Krause X#2, Uncirculated Uncertified. 37.0 mm., 32.59 grams. The obverse depicts a map of the Eastern hemisphere with the legend ARGENTUM - UNIVERSALE and the date. The reverse depicts a map of the Western hemisphere with the legend UNITED STATES OF AMERICA and ONE TALENT. These pieces, reported as one part gold to four parts silver, are attributed to Mr. Emil Greeff who was identified in a May 14, 1896 newspaper article appearing in *The Newark Daily Advocate*, repeating an article from the *New York Herald*. William Woodin displayed examples of each size at the 1914 ANS exhibition, although neither was illustrated.

In Our August 2017 ANA Sale, we offered an 1896 fifth talent, the only example of this distinctive, privately produced pattern issue that we had handled at any time in the company's history. The smaller fifth talent is 24.3 mm. and 6.5 grams, while this larger piece is 37.0 mm. and 32.59 grams. Stack's Bowers handled an example of each size in Part 23 of the John J. Ford, Jr. Collection, both earlier from F.C.C. Boyd, and a worn example of the larger size one talent piece was illustrated in the July 2, 2017 edition of the email newsletter, E-Sylum. An example of the one talent denomination was displayed at the April 11, 1934 meeting of the Brooklyn Coin Club, although its provenance is unknown. Richard Kenney mentioned and illustrated the one talent piece in the June 1962 installment of "Unofficial Coins of the World" that was published posthumously in *The Numismatist*. The illustrated piece may be a fourth example of this issue as it does not appear to match the others.

While some evidence of cleaning appears at the center of the obverse and reverse, this sharply detailed example has pleasing gold toning over its still lustrous surfaces with no evidence of wear. As one of just three examples that we know of, this opportunity is tremendously important. While not an official pattern issue of the United States, these pieces deserve a place in an advanced cabinet as experimental pieces toward an international coinage.

## CERTIFIED MODERN PROOF SETS

### 1936 Proof Set, PR60-PR63 All Pieces Are ANACS Certified

**4574 1936 Five-Piece Proof Set PR60 to PR63 ANACS.** All five coins are separately housed in small-sized ANACS holders. Included are:

**Brilliant Cent PR63 Red and Brown.** The fields show definite reflectivity and each side displays reddish-yellow and brown patina.

**Satin Finish Nickel — Corroded — Net PR60.** Attractive, light multicolored toning is seen over each side, and there is a substantial spot of corrosion at the top of the feathers on the obverse.

**Dime PR62 Full Split Bands.** The otherwise brilliant surfaces are peppered with numerous tiny specks of russet toning. The FSB designation is certainly a curious one on a proof striking.

**Quarter PR62.** The surfaces are mostly brilliant with occasional specks of russet on each side.

**Half Dollar PR63.** Just the slightest hint of toning can be seen on this first-year proof. The fields are better-mirrored than often seen on this date. (Total: 5 coins) NGC ID# 22L2, PCGS# 904750

**4575 1942 Six-Piece Proof Set, PR66 to PR67 NGC.** The coins are separately housed in holders bearing consecutive certification numbers. The set includes:

**Cent PR67 Red.** A fully struck specimen with pastel rose-red and sun-gold colors.

**Type One nickel PR66.** Intricately impressed and satiny with delicate lime-green toning.

**Type Two nickel PR67.** A pristine Superb Gem that boasts a razor-sharp strike.

**Dime PR66.** Light pink-red and lime-green toning. Contact is confined to the obverse rim near 12 o'clock.

**Quarter PR66.** The immaculate and sharply struck surfaces are close to brilliant.

**Half Dollar PR67.** Moderate cameo contrast is apparent between the glassy fields and the white motifs. (Total: 6 coins) PCGS# 904757

**4576 1950 Five-Piece Proof Set PR66 to PR68 NGC.** The coins are separately certified in holders from the same grading submission. The set includes:

**Cent PR67 Red.** Sharply struck butter-gold surfaces. Void of carbon or contact.

**Nickel PR66.** An intricately impressed specimen. Brilliant save for a few gray freckles on the reverse.

**Dime PR66.** Brilliant and beautiful with flawless preservation.

**Quarter PR68.** A stone-white and fully struck Superb Gem that appears as issued.

**Half Dollar PR67.** A lustrous white specimen with pristine fields and only a hint of incompleteness of strike on the motifs. (Total: 5 coins) PCGS# 904758

## ERRORS

### 1959-D Lincoln Cent, MS64 Struck on a Dime Blank

**4577 1959-D Lincoln Cent — Struck on a Dime Blank — MS64 PCGS.** 2.4 gm. This 90% silver first-year Memorial Reverse cent displays blushes of cherry-red, orange-gold, and forest-green toning, though a majority of the coin is brilliant. The high points show softness, as expected given the slightly smaller dime flan. Struck aligned with the collar die at 4 o'clock, where the rim is raised and complete. Portions of IN GOD WE and UNITED are off the flan, as is the L in LIBERTY.

1917 McKinley Gold Dollar, MS65  
Laminated Planchet Error

- 4578** 1917 McKinley Gold Dollar — Laminated Planchet, Reverse — MS65 PCGS. Sparkling rose and lilac patina covers each side of this lovely Gem gold dollar. A comparatively long planchet lamination runs along the top of the reverse from the R in BIRTHPLACE to the bottom of the flagpole. Mint errors on gold commemorative coins are very rare.  
Ex: ANA Signature (Heritage, 8/2004), lot 8385; ANA Signature (Heritage, 7/2005), lot 7217.

U.S. PRESIDENTS & STATESMEN

1900 'Bryan Money' Small Silver Ingot  
MS63, Very Rare Z-13, S-15

- 4579** 1900 Bryan Money, 16 to 1 Silver Ingot, MS63 NGC. Zerbe-13, Schornstein-15. Struck by Gorham Mfg. Co., this pro-Bryan variety is listed as "very rare" by Schornstein, and described as "Cast in coin silver. 18x42mm. Weight 26G." The silver-gray piece is lightly to moderately granular, as made, and displays only infrequent tiny ticks. William Jennings Bryan was the Democratic nominee in 1900, and as in 1896, ran on a platform of bimetallism at a silver-to-gold ratio of 16 to 1. His opponent, incumbent William McKinley, defended the gold standard, in effect since 1873.

LINCOLN

Large Lincoln Plaque by Brenner  
Model for Lincoln Cent

- 4580** Large Abraham Lincoln Plaque by Victor D. Brenner. Cunningham-24-190Bz. The unblemished walnut-brown bronze plaque measures 363 x 280 mm and is the largest of the Brenner Lincoln plaques without a marble backing. The reverse has two loops for wall display. Signed as "V.D. Brenner Sc[ulptor]" instead of the more familiar VDB monogram. Although the smaller 1907-dated Brenner plaques occasionally appear at auction, the present large-size variety is very rare. Cunningham states "thought to be as few as four known, including the ones with marble." The Brenner plaques came to the attention of President Theodore Roosevelt. Roosevelt asked Brenner to redesign the cent, which has since 1909 displayed a bust of Lincoln based on Brenner's plaques.

Large Gettysburg Address Plaque  
With Lincoln Medal by Brenner

- 4581** Large Gettysburg Address Lincoln Plaque. Cunningham-24-410Bz. The large uniface cast bronze plaque measures 28 x 22 inches and weighs approximately 43 pounds. It has holes in the four corners for mounting, and is topped by a narrow shelf. The Gettysburg Address is quoted in 23 lines. The plaque was made by the Gorham Company circa 1916, in response to a successful series of S. Klaber Gettysburg Address plaques. Gorham engaged Victor D. Brenner to create a 172 mm uniface medal, similar to the Lincoln cent, affixed to the upper left corner of the plaque. The golden-brown plaque displays minor hairlines on the medal, as well as light wear near the borders.

## U.S. MINT MEDAL

**1836 First Steam Coinage Medal, SP50**  
Rare, Feb. 22 Original Dies

- 4582** 1836 First Steam Coinage, Feb. 22, Bronzed Copper, Julian MT-20, SP50 PCGS. Struck from the original, perfect dies and dated Feb. 22. Preparations were made for a ceremony to celebrate the first steam coinage at the U.S. Mint, originally scheduled for February 22, 1836, the anniversary of George Washington's birthday. A keepsake U.S. Mint medal was prepared in advance of the date — the dies made and samples struck — but mechanical problems forced postponement until March 23. The reverse die was modified to the Mar. 23 date, and that medal (Julian MT-21) is scarce but available. A few medals from the original Feb. 22 date survived (Julian MT-20), but they are extremely rare. This is one of the few survivors, certified SP50. It was likely carried as a pocket piece for a short period of time, although attractive, rich-brown surfaces remain. A few light marks near the cap and slight, high-point wear do not detract from the pleasing surfaces. Population: 3 in 50, 2 finer (3/19). PCGS# 515423

## SO-CALLED DOLLAR

**1826 Erie Canal Completion Medal, MS61**  
HK-1, Struck in White Metal

- 4583** 1826 Erie Canal Completion, White Metal, HK-1, R.6, MS61 PCGS. 45mm. Several hundred Erie Canal Completion medals were struck in white metal and presented to guests and officials at the opening ceremonies on October 26, 1825. The dies were designed by Archibald Robertson and engraved by the eminent medallist Charles Cushing Wright. Examples are always popular, representing the first listing in the Hibler-Kappen *So-Called Dollars* reference. Bright, strongly defined surfaces are unworn but show evidence of oxidization. An attractive representative. PCGS# 642001

## HARD TIMES TOKEN

**1837 Feuchtwanger Three Cent, MS61**  
HT-262, New York Coat of Arms

- 4584** 1837 Feuchtwanger Three Cent, New York Coat of Arms, Low-117, HT-262, R.3, MS61 NGC. 25 mm, struck in German silver. This three cent piece by Dr. Lewis Feuchtwanger shows the New York Coat of Arms on the obverse. Feuchtwanger struck experimental pieces in one and three cent denominations, the latter being by far the scarcer. This coin is well-struck and satiny with dusky champagne-gray patina and no major abrasions. Some minor lightness of strike is noted on the legs of the figures. Listed on page 420 of the 2019 *Guide Book*. NGC ID# 2DCB, PCGS# 20002

## MINT SETS

- 4585** 1947 Mint Set Uncertified. Two examples of each issue (cents through half dollars, PDS) totaling 28 pieces in all, in original uncirculated condition — uncertified — housed in their cardboard holders of issue. An unaddressed kraft envelope contains both sets as furnished by the Mint. The coins show light to moderate toning. No 1947-S Walking Liberty halves were struck, thus two empty holes exist in one of the holders. (Total: 28 coins) PCGS# 904501
- 4586** 1947 Mint Set Uncertified. Uncertified, in cardboard holders in an unaddressed outer kraft envelope. The coins show light to moderate toning, representing two of each issue (28 pieces in all) in this double set. No 1947-S Walking Liberty halves were struck, thus two empty holes exist in one of the holders. (Total: 28 coins) PCGS# 904501

## GSA DOLLAR

**1898-O Silver Dollar, MS63**  
Housed in a Black GSA Holder

- 4587** 1898-O GSA MS63 NGC. The (2/19) NGC Census reports a total of six 1898-O silver dollars graded by the service in the black plastic holders as originally issued by the GSA. This compares favorably with, for example, the 38,236 1884-CC GSA Morgans certified by NGC. This lustrous and brilliant Select example has a typical central strike and the expected quantity of minor field and facial grazes. PCGS# 681526 Base PCGS# 7254

## End of Session Three

# SESSION FOUR

## GOLD DOLLARS

1849 D-4 Gold Dollar, MS65  
Open Wreath, Close Stars

- 4588** 1849 Open Wreath, D-4, Close Stars, MS65 NGC. Thin date numerals. Normal E in UNITED. The obverse is prooflike and the reverse is semiprooflike. The caramel-gold surfaces are surprisingly devoid of contact. The strike is intricate except on the right-side dentils. A desirable example of this briefly issued introductory design subtype. Open Wreath Census: 43 in 65 (2 in 65+), 10 finer (3/19). NGC ID# 25B9, PCGS# 521671 Base PCGS# 7502

1849-D Gold Dollar, AU55  
Colorful Pastel Toning

- 4589** 1849-D AU55 NGC. Variety 1-B. The sole Open Wreath issue from the Dahlonega facility. Light sea-green and rose-red toning enriches this minimally circulated representative. The strike is relatively bold. A few minor field marks emerge beneath a lens. A roundish strike-through (as produced) above the O in DOLLAR has no impact on the technical grade. NGC ID# 25BD, PCGS# 7507

1849-D Gold Dollar, MS60  
Ideal First-Year Branch Mint Type

- 4590** 1849-D MS60 NGC. Variety 1-B. Centered mintmark. According to Doug Winter, "between 14,995 and 19,966 examples of this variety were coined from July or August, 1849 through the end of the year. This variety is approximately twice as rare as 1-A." Although that seems contradictory, the first few thousand coins were saved to a much greater extent as souvenirs. Red-gold surfaces exhibit strong strike detail on the stars, wreath, and legends. Hairlines preclude a higher grade. NGC ID# 25BD, PCGS# 7507

1850-D Gold Dollar, AU53  
Underrated Southern Issue

- 4591** 1850-D AU53 PCGS. Variety 2-C. Doug Winter wrote in 2013: "The 1850-D is one of the rarer Type One dollars from the Dahlonega Mint. It remains underrated and undervalued in all grades." He estimates a survivorship of 125 to 175 pieces. Both sides display bright golden-yellow color and typically soft detail. Light friction and scattered marks are also seen. Challenging to obtain in any grade, but particularly above the XF grade level. NGC ID# 25BH, PCGS# 7511

1850-O Gold Dollar, MS61  
Type One O-Mint Key

- 4592** 1850-O MS61 PCGS. Variety 1. Except for the 1850-O, the Type One New Orleans gold dollar issues all had mintages that substantially exceeded 100,000 pieces. The 1850-O was a stingy 14,000 pieces, and Mint State examples are rare relative to their Philadelphia cousins. This sharply struck and nearly mark-free example has slightly subdued straw-gold surfaces. The edge and nearby rims are softly defined, likely caused by a slight rim clip. NGC ID# 25BJ, PCGS# 7512

1853 Gold Dollar, MS66  
Gleaming Example of the Type

- 4593** 1853 MS66 PCGS. Full stars, curls, and wreath leaves define this gleaming Premium Gem. Frosted yellow-gold surfaces display extraordinarily clean fields and terrific eye appeal. Gold dollars were struck in massive quantities during the early 1850s, when silver was largely driven out of circulation. More than 4 million pieces were minted in 1853. Population: 72 in 66 (9 in 66+), 13 finer (3/19). NGC ID# 25BU, PCGS# 7521

**1853 Gold Dollar, MS67  
Extraordinary Type Coin**

- 4594 1853 MS67 NGC.** A series-high mintage of more than 4 million gold dollars was achieved at the Philadelphia Mint in 1853, making the issue readily available in high grade and a popular choice of type collectors. Of course, the population thins out in grades above MS65 and MS67 specimens are condition rarities. This delightful Superb Gem exhibits razor-sharp definition on all design elements, with fine definition on Liberty's hair and the star centers. The impeccably preserved orange-gold surfaces radiate vibrant mint luster from both sides and overall visual appeal is terrific. Census: 10 in 67, 0 finer (3/19). NGC ID# 25BU, PCGS# 7521

**1855 Type Two Gold Dollar, MS63  
Popular, Short-Lived Design**

- 4595 1855 Type Two MS63 NGC.** Always in-demand as Small Head type, the 1855 has a generous mintage but a low survival rate. Relatively few Mint State pieces survive, although the Philadelphia issue seems plentiful in comparison to its branch mint counterparts. This is a frosted, highly lustrous example, with gleaming sun-gold surfaces and sharp central definition. LIBERTY is sharp within the headdress. The outer legend is less sharp, but complete except for the broken E in STATES. Die clashing is sharply visible on both sides. NGC ID# 25C4, PCGS# 7532

- 4596 1855-O AU53 PCGS. Variety 2.** The usual lapped die state, with familiar weakness on the 8 in the date — even while the remaining numerals are bold. This About Uncirculated 1855-O gold dollar represents the only Type Two issue from the New Orleans Mint. A mintage of 55,000 pieces was accomplished. This piece is well-detailed and partially lustrous with original orange- and olive-gold coloration. NGC ID# 25C7, PCGS# 7535

**1855-O Gold Dollar, AU58  
Essential Type Two Issue**

- 4597 1855-O AU58 NGC. Variety 2.** The reverse is in its later, lapped die state, as usual. The 1855-O is an essential and in-demand issue — the only Type Two gold dollar struck at the New Orleans Mint. A total of 55,000 pieces were produced. This example enjoys good detail on the headdress and lower wreath, with light yellow-gold color and glimpses of remaining luster. Minimally marked, save for a few hairlines on the obverse. NGC ID# 25C7, PCGS# 7535

**1857 Gold Dollar, MS66  
Tied for Finest at NGC**

- 4598 1857 MS66 NGC.** This is one of the seven finest 1857 gold dollars ever handled by NGC, a fact made all the more impressive by the issue's healthy mintage of 774,789 coins. Both sides are strongly struck and lightly clashed with glistening frosty luster. A lovely rose-gold Registry coin. Census: 7 in 66, 0 finer (3/19). NGC ID# 25CD, PCGS# 7544

**1857-C Gold Dollar, MS61+  
Few Certified Finer**

- 4599 1857-C MS61+ NGC. Variety 1.** A satiny and unmarked apricot-gold example. Portions of the dentils are softly impressed, but the overall strike is sharp by Charlotte standards. A lamination below the mintmark is strictly of mint origin. Struck from moderately rotated dies. The 1857-C gold dollar has a meager mintage of 13,280 pieces, and is typically encountered in XF to AU grades. NGC has certified only a baker's dozen as Mint State. Census: 7 in 61 (1 in 61+), 4 finer (3/19). NGC ID# 25CE, PCGS# 7545

**1857-D Gold Dollar, AU58  
Smooth and Partly Lustrous**

- 4600 1857-D AU58 NGC. Variety 9-L.** A refreshingly mark-free almond-gold Borderline Uncirculated example of this later and low mintage Dahlonga issue. The strike is blunt on the wreath bow and the top of Liberty's crown, but the legends are generally sharp. Coined from clashed dies. Census: 32 in 58 (1 in 58+), 20 finer (3/19). NGC ID# 25CF, PCGS# 7546

- 4601 1862 MS65+ PCGS. CAC.** This Plus-graded Gem displays razor-sharp definition on all design elements and the virtually pristine yellow and rose-gold surfaces radiate vibrant mint luster from both sides. PCGS has graded 46 numerically finer examples (3/19). NGC ID# 25CW, PCGS# 7560

**1866 Gold Dollar, MS65  
Bright, Semireflective Surfaces**

- 4602 1866 MS65 PCGS. CAC.** The 1866 gold dollar continued the string of low mintages from the Philadelphia Mint that began in 1863 with only 7,100 coins struck. This piece, as with many other 1866s, shows significant reflectivity in the fields as well as strong die clash marks. The strike is complete throughout and there are no obvious abrasions on this attractive Gem. Population: 11 in 65, 20 finer. CAC: 2 in 65, 9 finer (2/19). NGC ID# 25D2, PCGS# 7565

**1866 Gold Dollar, MS66  
Beautifully Toned, Heavy Die Clashing**

- 4603 1866 MS66 PCGS.** This toned Premium Gem gold dollar features lovely shades of rose, golden-orange, and powder-blue color. Both sides show extensive clashing in the fields. Polish lines suggest the Mint made an attempt to diminish the clash marks, but they are still relatively bold. Fully struck and nearly unmarked. From a lowly mintage of 7,100 coins. Population: 9 in 66 (2 in 66+), 11 finer (3/19). NGC ID# 25D2, PCGS# 7565

- 4604 1872 MS62 Prooflike NGC.** The 1872 gold dollar is scarce overall, coming from a mintage of only 3,500 coins. NGC has certified a dozen coins as Prooflike, plus one Deep Prooflike piece in MS63. This MS62 Prooflike coin is sharp and cameo-contrasted with bright yellow-gold color. Scattered light abrasions account for the grade. Census: 4 in 62 Prooflike, 5 finer (2/19). *From The Jersey Shore Gold Collection.* NGC ID# 25D9, PCGS# 77572

- 4605 1873 Closed 3 MS61 Prooflike NGC.** This attractive Mint State example was struck early in the year, before the Closed 3 punch was replaced. The design elements are well-detailed and the semiprooflike orange-gold surfaces show the expected number of minor contact marks for the grade. Census: 1 in 61 Prooflike, 4 finer (3/19). NGC ID# 25DA, PCGS# 77574

- 4606 1879 MS65 NGC. CAC.** A Gem with exceptional visual appeal, this piece exhibits strong luster and intermingled shades of rich gold, orange, and red. Due to the obverse die that was used for this issue, much of LIBERTY is faint or missing. Clashmarks appear on the reverse. A few tiny as-made strike-throughs are present. Census: 34 in 65 (1 in 65+, 2 in 65★, 1 in 65+★), 37 finer. CAC: 13 in 65, 13 finer (3/19). NGC ID# 25DH, PCGS# 7580

**1879 Gold Dollar, MS67  
Semiprooflike Type Three Coin**

- 4607 1879 MS67 PCGS.** A balance of luster and reflectivity adorn the pristine fields of this Superb Gem 1879 gold dollar. Moreover, the Liberty portrait is well-struck and the wreath shows weakness only on the bowknot, as usual. Lovely peach-gold hues adorn each side. The 1879 gold dollar is rare this fine, and no numerically finer examples are reported at PCGS or NGC. Population: 12 in 67 (1 in 67+), 0 finer (2/19). NGC ID# 25DH, PCGS# 7580

**1880 Gold Dollar, MS67  
Spectacular Color and Surfaces**

- 4608 1880 MS67 PCGS.** Only 1,600 gold dollars were struck in 1880, although few coins actually circulated in the 19th century. Today, Mint State coins are abundant. Nonetheless, Superb Gem examples experience strong demand as type coins due to the eye appeal that they typically present. This coin is virtually flawless, showing semiprooflike fields and radiant yellow-gold surfaces with tinges of peach-orange and rose-gold color. Not a single abrasion is noted. NGC ID# 25DJ, PCGS# 7581

**1880 Gold Dollar, MS67  
Sharp and Partially Prooflike**

- 4609 1880 MS67 PCGS.** With a mintage of just 1,600 pieces, the 1880 gold dollar seems like it should be a rarity, but nearly 1,200 pieces survive to this day. The issue was well-saved by speculators and collectors. This example is struck from the JD-2 dies, which were also used for proofs, and indeed this Superb Gem is at least partially prooflike on the obverse, and nearly fully prooflike on the reverse. The bottom-right ribbon end resembles a toothy moray eel, a tip-off that this is a circulation strike and not a proof. Extremely well-struck with full LIBERTY and overall crisp definition, the coin shows no distractions on the attractive, rich-gold surfaces with vibrant red-gold accents. Eye appeal is terrific. Housed in an old green label holder. NGC ID# 25DJ, PCGS# 7581

**1880 Gold Dollar, Lustrous MS67  
Prooflike Circulation Strike, CAC**

- 4610 1880 MS67 PCGS. CAC.** Sharply struck from unclashed dies, this Superb Gem 1880 gold dollar is prooflike and razor-sharp. Just 1600 pieces were struck, a tiny mintage that was remarkably well-saved by collectors, speculators, and jewelers. The carefully preserved rich-gold surfaces are essentially mark-free and nearly pristine, without any distractions. CAC endorsement adds to its considerable appeal. PCGS reports just 30 numerically finer examples (2/19). NGC ID# 25DJ, PCGS# 7581

**1880 Gold Dollar, MS68  
Impeccable Prooflike Example**

- 4611 1880 MS68 Prooflike NGC.** The 1880 gold dollar claims a minuscule business-strike mintage of just 1,600 pieces. As might be expected, die wear was minimal and many examples are known with prooflike surfaces. The present coin is the single finest prooflike specimen at NGC (PCGS does not certify examples as Prooflike), but there are some equal or higher-graded coins in other contrast designations at both services (3/19). The design elements are sharply detailed and the fields are deeply reflective throughout. A small planchet flake on the neck is the only visible flaw. Eye appeal is terrific. NGC ID# 25DJ, PCGS# 77581

- 4612 1889 MS67 PCGS.** The 1889 gold dollar is a favorite issue among type collectors because of its availability in high grade, and its status as the final date of the denomination. The present coin is a delightful Superb Gem, with lustrous peach-gold surfaces and a needle-sharp strike. Housed in a green label holder. NGC ID# 25DU, PCGS# 7590

- 4613 1889 MS67+ PCGS.** From a final-year mintage of 29,00 pieces, the 1889 gold dollar is somewhat scarce at the MS67 graded level, and finer coins are rare. This Plus-graded Superb Gem exhibits sharply detailed design elements throughout, and the impeccably preserved orange-gold surfaces radiate satiny mint luster on both sides. PCGS has graded 10 numerically finer examples (3/19). NGC ID# 25DU, PCGS# 7590

**PROOF GOLD DOLLARS**

**1885 Gold Dollar, PR65 Cameo  
Bold Contrast, Sharp and Attractive**

- 4614 1885 PR65 Cameo PCGS. JD-2, R.5.** This sparkling 1885 Gem Cameo comes from a substantial proof mintage of 1,105 pieces, although most of the mintage went unsold and perhaps as few as 200 pieces were actually distributed to collectors. The Bowers reference estimates 140 to 180 pieces survive. Few of those can match the bold cameo contrast of this mirrored, medium-gold example. Heavy "Longacre doubling" on the legend corresponds to the John W. Dannreuther variety. A circular lint mark below T in UNITED and a few light die polish lines are Mint-related, and the sole visible interruptions of the glassy fields. The frosted devices are sharply struck on both sides, and the reverse die is rotated counterclockwise. Population: 4 in 65 Cameo, 4 finer (3/19). NGC ID# 25EV, PCGS# 87635

**1888 Gold Dollar, PR65 Cameo  
Attractive Late-Series Type Coin**

- 4615 1888 PR65 Cameo PCGS. JD-1, High R.4.** A substantial coinage of 1,079 proof gold dollars in 1888 does not translate into ready availability in high grades today. This Gem Cameo is rare. Each side is well-contrasted with deep mirroring in the fields. Original peach-orange and yellow-gold hues adorn the mark-free surfaces, and eye appeal is outstanding. Population: 14 in 65 (2 in 65+) Cameo, 11 finer (3/19). NGC ID# 25EY, PCGS# 87638

## EARLY QUARTER EAGLE

1805 Quarter Eagle, XF45  
BD-1, Late Die State

- 4616** 1805 BD-1, R.4, XF45 ANACS. Bass-Dannreuther Die State c/b, with thin obverse die cracks. Mint records indicate that 1,781 quarter eagles were delivered by the Coiner in 1805. In *Early U.S. Gold Coin Varieties*, John Dannreuther estimates that only 100 to 150 1805 quarter eagles survive. This XF-level 1805 quarter eagle has pleasing olive-gold patina with small peach-orange overtones. Slight brightness in the fields appears to be the remnant of subtle reflectivity that existed before circulation. The strike is even and generally sharp, except in the centers. Planchet adjustment marks (mint made) appear across the reverse shield. The overall eye appeal is pleasing. NGC ID# BFVV, PCGS# 45511 Base PCGS# 7653

## CLASSIC QUARTER EAGLES

1836 Classic Head Quarter Eagle, MS63  
Script 8 Guide Book Variety

- 4617** 1836 Script 8 MS63 NGC. Breen-6143, Variety 11, R.2. A well-preserved Mint State example of this Classic Head type coin issue, showing bright yellow-gold luster and few abrasions. Nonetheless, the usual strike weakness is evident in the centers. An obverse die crack runs from star 6, through the portrait, to the rim between stars 12 and 13, and another runs through the bottom of the date. A pleasing Script 8 representative. NGC ID# 25FU, PCGS# 7694

1839 Two and a Half, AU50  
Low Mintage Philly Issue

- 4618** 1839 AU50 PCGS. Breen-6148, Variety 21, R.3. Only a single die pair is known for the final-year Philadelphia Classic quarter eagle. The mintage of 27,021 pieces is lowest of the series, excluding branch issues. This well-struck representative exhibits plentiful pockets of radiant luster. The tan-gold fields are free from detrimental abrasions. Housed in an old green label holder. NGC ID# 25G3, PCGS# 7698

**1839 Variety 21 Quarter Eagle, MS61  
Last Classic Head Issue**

- 4619** 1839 MS61 NGC. Breen-6148, Variety 21, R.3. Although past literature has discussed overdates, repunched dates, and normal dates for the 1839 Classic Head quarter eagle, there is only one documented die pair that shows a repunched 9. Doubling is also visible below the 8 on this example. The reverse die made its final appearance in 1839, having been used earlier in 1836 for Varieties 8 and 15, and in 1837 for Variety 17. This pleasing piece has full luster with intermingled orange, yellow, and olive overtones. An extremely rare issue in Mint State grades. Census: 8 in 61, 5 finer (3/19). Ex: *Heritage* (10/2012), lot 5533. NGC ID# 25G3, PCGS# 7698

**1839/39-C Two and a Half, AU50 Details  
Classic Head Charlotte Type Coin**

- 4620** 1839/39-C — Cleaned — ANACS. AU50 Details. Breen-6150, Winter-2, Variety 22, R.4. The second and final Charlotte Classic issue. Three die pairs (of approximately equal rarity) are known from the low mintage of 18,140 pieces. The most interesting is Variety 22, which shows the 3 in the date widely repunched south and both dies shattered. This is a well-defined olive-gold example with parallel hairlines apparent on both sides. NGC ID# 25G4, PCGS# 7699

- 4621** 1839/39-C — Gouged — PCGS Genuine. AU Details. Breen-6150, Winter-2, Variety 22, R.4. Struck from shattered dies and heavily die cracked on both the obverse and reverse, this interesting Classic Head Variety 22 example also shows wide recutting of 3 and 9 in the date. A series of post-mint gouges intersect the long die crack that runs above and below the eagle's beak. The coin is sharply defined with pleasing greenish-gold color, and represents a good opportunity to add this scarce two-year Charlotte type to a comprehensive early gold or branch mint set.

- 4622** 1839/39-C — Damaged — NGC Details. AU. Breen-6150, Winter-2, Variety 22, R.4. The dies are prominently cracked. Designated as VP-001 by NGC, due to the clearly repunched 39 in the date. This briefly circulated yellow-gold Charlotte Mint type coin is abraded near star 3 and the left (facing) wingtip. A couple of flan flaws are noted on the field near Liberty's chin and lips. NGC ID# 25G4, PCGS# 7699

**1839/39-C Two and a Half, AU55  
Prominent Repunched Date**

- 4623** 1839/39-C AU55 NGC. Breen-6150, Winter-2, Variety 22, R.4. The pleasing wheat-gold and aquamarine surfaces lack detrimental marks. The portrait displays a trio of small strike-throughs, as made. Nicely struck and desirable. The 3 in the date is widely repunched south. The 9 is repunched west. NGC assigns an in-house designation as VP-001. The reverse exhibits lengthy cracks through the beak and above the left (facing) wing. Two die marriages are known for the issue, despite a low mintage of 18,140 pieces. The second and final Charlotte Classic quarter eagle issue. NGC ID# 25G4, PCGS# 7699

**1839-C Two and a Half, AU58  
Low Mintage Charlotte Issue**

- 4624** 1839-C AU58 NGC. Breen-6149, Winter-3, Variety 24. The usual late die state with no berry present on the lapped branch. A Borderline Uncirculated Charlotte Mint Classic two and a half. The straw-gold surfaces are refreshingly unmarked, though Liberty's cheek displays a strike-through, as made and common for the die marriage. A faint fingerprint fragment is on the field above the eagle's neck. NGC ID# 25G4, PCGS# 7699

**1839-D Classic Two and a Half  
Sharp AU Details**

- 4625** 1839-D — Scratch — NGC Details. AU. Winter 1-A, Variety 26, R.3. A well-detailed example of this Classic Head Dahlonega issue, showing pale yellow-gold surfaces. Scattered abrasions accompany the light wear, although a couple of old scratches in the upper right reverse field prevent PCGS from assigning a numeric grade. A collectible D-mint type coin.

**1839-O Quarter Eagle, XF45  
Important New Orleans Issue**

- 4626** 1839-O XF45 PCGS. Breen-6153, Variety 28, R.4. The Low Date, Close Fraction variety. The Close Fraction is scarcer than its Wide Fraction counterpart. The 1839-O is the first New Orleans quarter eagle issue, the sole O-mint Classic issue of the series, and it is scarce due to a mintage of just 17,781 pieces. This olive-gold example exhibits moderate luster, but the fields and high points have a microgranular appearance. NGC ID# 25G7, PCGS# 7701

**1839-O Two and a Half, AU50  
Low-Mintage Southern Gold Issue**

- 4627** 1839-O AU50 PCGS. Breen-6153, Variety 28, R.4. Four lengthy die cracks on the reverse are characteristic of Variety 28, also known as the Close Fraction variant. The 1839-O is the sole New Orleans issue of the series, and has a mintage of just 17,781 pieces. This medal-turn example has bold definition and noticeable luster. The pale butter-gold surfaces show a few hair-thin lines on the left obverse. NGC ID# 25G7, PCGS# 7701

**LIBERTY QUARTER EAGLES**

- 4628** 1840 AU53 NGC. A briefly circulated example with lots of eye-catching luster. There are no marks worthy of individual mention. The star above the point of Liberty's coronet and the eagle's left (facing) leg are soft, but the remainder of the strike is bold. One of just 18,800 pieces minted. Housed in a circa-2000 holder. Ex: Long Beach Signature (Heritage, 9/2008), lot 3250, which realized \$2,070. NGC ID# 25GA, PCGS# 7717

**1840-C Two and a Half  
Mint State Sharpness**

- 4629** 1840-C — Obverse Scratched — NGC Details. Unc. Variety 1. A cursory evaluation might cause the viewer to conclude that the present lot ranks among the finest 1840-C quarter eagles. The strike is uncommonly sharp for the Charlotte Mint, and the almond-gold surfaces are generally pleasing. Study beneath a lens reveals a couple of pinscratches on each side, the most apparent behind Liberty's neck and above the eagle's head.

**1842 Two and a Half, Choice XF  
Fewer Than 60 Pieces Believed Known**

- 4630** 1842 XF45 PCGS. Only 2,823 quarter eagles were struck at Philadelphia in 1842. As a Philadelphia issue, this date is somewhat underrated. PCGS estimates that only 50 to 60 pieces are extant in all grades, making it rarer than any of the branch mint issues of this year. This is a collector-grade XF45 coin with good detail and pleasing orange-gold patina. The surfaces are lightly worn but attractive. A horizontal field mark above the fraction on the reverse is the only mentionable imperfection. Population: 6 in 45, 13 finer (3/19). NGC ID# 25GG, PCGS# 7723

**1843-C Quarter Eagle, XF45  
Large Date With CAC Approval**

- 4631 1843-C Large Date, Plain 4, XF45 PCGS. CAC. Variety 1.** Repunched 18 in the date. Two varieties are known for the 1843-C quarter eagle. This Large Date type is more collectible than its Small Date cousin, yet no more than 250 to 300 or so pieces are believed extant. Lightly hairlined surfaces display attractive reddish-gold patina and strong detail on the stars, legends and other elements, while the centers are typically soft. Two parallel linear abrasions between the eagle's head and right (facing) wing will identify this example in future appearances. CAC: 4 in 45, 18 finer (3/19). NGC ID# 7HLG, PCGS# 7728

**1847-C Two and a Half, AU55  
Sharp Design Definition**

- 4632 1847-C AU55 PCGS. Variety 1.** A sharply defined Choice AU Charlotte two and a half, ideal for an advanced Southern gold type set. An excellent strike for the under-resourced branch facility. The straw-gold surfaces show only incidental signs of contact, although a narrow mint-made lamination crosses the hairbun. The dies are moderately rotated counter-clockwise.  
*From The Jersey Shore Gold Collection.* NGC ID# 25H6, PCGS# 7745

**1856-S Quarter Eagle, MS61  
Rare in Mint State**

- 4633 1856-S MS61 NGC.** The 1856-S quarter eagle is a rarity in Mint State. This collector-grade example displays lustrous honey-gold surfaces and well-struck design elements. Light field chatter limits the grade but is not bothersome. The San Francisco Mint struck 72,120 quarter eagles in 1856, and this issue circulated extensively. Census: 14 in 61, 9 finer (3/19). NGC ID# 25KL, PCGS# 7781

- 4634 1861 New Reverse, Type Two, MS64 PCGS.** This sharp near-Gem displays frosty original mint luster with rich wheat-gold and greenish hues. Only the most insignificant signs of surface contact are apparent. The Type Two reverse has narrow, separated arrowheads, while the Type One reverse has wide arrowheads that connect at their rear points. NGC ID# 25JX, PCGS# 7794

- 4635 1861 New Reverse, Type Two, MS64 NGC. CAC.** The Type Two reverse is characterized by small lettering on the peripheral legends, as well as narrow arrowheads that are fully separated from each other. This CAC-approved near-Gem displays a sharp strike and frosty yellow-gold mint luster. Neither side has bothersome abrasions. NGC ID# 25JX, PCGS# 7794

**1861-S Quarter Eagle, MS60  
A Rarity in Mint State**

- 4636 1861-S MS60 NGC.** Most of the vast quantity of gold deposited at the Philadelphia and San Francisco mints in 1861 was converted into double eagles for the sake of efficiency. Only 24,000 quarter eagles were manufactured on the West Coast, and just a handful survive in Mint State. Ten Uncirculated coins are reported at NGC and PCGS combined, but that probably includes some duplication. This lustrous red-gold example showcases a bold impression with a hint of softness limited to the eagle's left (facing) leg. Small abrasions and hairlines are seen. Census: 2 in 60, 5 finer (3/19). NGC ID# 25JY, PCGS# 7795

- 4637 1876-S AU58 NGC.** With a mintage of only 5,000 coins, the 1876-S quarter eagle is seldom seen in any grade. This lightly circulated example retains modest rose-gold luster amid rich orange-gold patina. The lower half of the eagle shows minor inexactness of strike. Census: 46 in 58 (1 in 58+), 22 finer (2/19).  
*Ex: PNG New York Invitational Signature (Heritage, 10/2014), lot 4236, which realized \$1,880.* NGC ID# 7JS6, PCGS# 7825

- 4638 1876-S MS61 PCGS.** The California branch mint mustered a small production of 5,000 quarter eagles in 1876, making this the lowest-mintage San Francisco issue since the inaugural and extremely rare 1854-S. It is estimated that only 20 or so examples survive in Mint condition. This lustrous two and half dollar has lightly marked, semiprooflike surfaces. The peripheries are bold, though the portrait and eagle display the usual high-point incompleteness. Population: 7 in 61, 17 finer (3/19). NGC ID# 7JS6, PCGS# 7825

- 4639 1879-S MS61 NGC.** The S-mint struck 43,500 quarter eagles in 1879, but most of them circulated. Mint State survivors are rare. This bright MS61 representative is fully struck and surprisingly appealing for the grade. Underrated this fine. Census: 13 in 61, 6 finer (3/19). NGC ID# 25L3, PCGS# 7831

- 4640 1888 MS64 PCGS.** Although the mintage increased substantially over the previous eight years, only 16,098 pieces were struck. Collectors and speculators were watchful of low mintages in the late 1880s, and the 1888 quarter eagle is comparatively available in near-Gem or finer grades. This is a pleasing example, with coruscating mint luster and smooth, minimally marked surfaces. The obverse strike is needle-sharp, while the reverse shows slight weakness at its leg and right talon. Population: 62 in 64 (4 in 64+), 38 finer (3/19). NGC ID# 25LC, PCGS# 7840

## PROOF LIBERTY QUARTER EAGLE

1905 Two and a Half, PR65  
Sharp and Beautiful  
Rare in This Grade

**4641 1905 PR65 PCGS.** The certified population of the proof 1905 quarter eagle gives an unrealistic survival estimate. Only 144 pieces were struck, yet the combined PCGS and NGC census is 278 pieces. Over the past couple of decades, the grading services have varied in strictness when awarding grades to proof coins, and designating pieces as Cameos and Deep or Ultra Cameos was not always done. These factors contributed to an uncommonly high number of resubmissions, inflating the certified population for most grades. Since our Permanent Auction Archives began in 1993, we have handled a proof of this date on 73 occasions, including reappearances of several coins. Most of the pieces that we have seen graded below the Gem level. It is reasonable to estimate that fewer than 100 1905 proof quarter eagles are known.

This Gem displays full detail and liquidlike mirroring, bathed in original apricot-orange color. Under a loupe, the fields reveal no mentionable lines or marks, and eye appeal is outstanding. Population: 23 in 65, 12 finer (3/19). NGC ID# 7KG5, PCGS# 7931

## INDIAN QUARTER EAGLES

**4642 1908 MS65 NGC.** A bright yellow-gold Gem example of this first-year Indian Head type coin, showing satiny luster and sharp design elements. Only a few light field marks are evident beneath a loupe. Finer 1908 Indian quarter eagles are scarce. NGC ID# 288Y, PCGS# 7939

**4643 1908 MS65 PCGS.** A satiny yellow-gold Gem example of the first-year issue, ideal for type collectors. Incomplete engraving of the reverse on the 1908 issue makes the eagle's wing poorly detailed, but the strike sharpness is outstanding on the obverse headdress. Only unobtrusive contact marks are visible beneath a loupe. NGC ID# 288Y, PCGS# 7939

1909 Quarter Eagle, MS65  
Richly Frosted and Fully Struck

**4644 1909 MS65 PCGS.** Gem condition represents the highest collectible grade level for the 1909. The few finer Premium Gems that are out there tend to be tightly held. This piece could arguably contend with them. Light yellow-gold surfaces are richly frosted, fully struck, and beautifully preserved with one linear abrasion in the reverse field behind the eagle's neck. PCGS reports 22 finer submissions (3/19). NGC ID# 288Z, PCGS# 7940

1909 Two and a Half, MS65+  
Sharp Indian Head Type Coin

**4645 1909 MS65+ NGC.** A satiny high-end Gem example of this moderately plentiful Philadelphia issue, showing incredibly sharp detail and remarkable preservation. The yellow-gold surfaces are highly appealing. NGC has certified only a dozen Gems with a Plus designation, and there are 30 finer coins at that service (2/19). NGC ID# 288Z, PCGS# 7940

1909 Quarter Eagle, MS65+  
Incredible Color

**4646 1909 MS65+ PCGS.** Rich rose, lilac, and tangerine-orange hues adorn the luminous, unabraded surfaces of this high-end Gem 1909 Indian quarter eagle, earning it high marks for eye appeal among its peers. The strike is sharp and luster is satiny. The 1909 is occasionally available in MS65, but Plus-graded coins are scarce. PCGS lists only 22 finer submissions, all in MS66 (3/19). NGC ID# 288Z, PCGS# 7940

**1910 Two and a Half, MS65  
Rich Patina and Sharply Struck**

**4647 1910 MS65 NGC.** This is a wonderful Gem 1910 quarter eagle, with few finer coins known. The surfaces display full mint brilliance with frosty golden luster and hints of salmon toning that enhance the eye appeal. The design elements are sharp, and the surfaces display only trivial marks. NGC has only certified 17 finer examples (3/19). NGC ID# 2892, PCGS# 7941

**4648 1911-D Strong D — Altered Surfaces — PCGS Genuine. AU Details.** The cheekbone and the eagle's shoulder show slight wear, but this well-defined key date two and a half displays relatively few abrasions. The lime-green and orange-gold coloration is deemed suspect by PCGS.

**4649 1911-D — Cleaned — NGC Details. AU.** The mintmark is strong on this AU-level coin despite light high-point wear. A loupe reveals faint hairlines from a light cleaning, but the satiny straw-gold surfaces remain pleasing for the budget-conscious collector. Coming from a mintage of only 55,680 coins, the 1911-D Indian quarter eagle is a key date in all grades, even while lightly circulated pieces are frequently encountered at auction. NGC ID# 7KR7, PCGS# 7943

**4650 1911-D — Damaged — NGC Details. AU.** The Denver mintmark is bold but displays a mark on the upright. This caramel-gold key-date quarter eagle shows scant signs of wear, but a dig impacts the IBU in PLURIBUS and the eagle's breast. The left obverse margin exhibits several scratches.

**1911-D Two and a Half, AU53  
Attractive Collector Coin**

**4651 1911-D AU53 PCGS.** The olive-gold, peach-orange, and straw-yellow surfaces of this lightly circulated 1911-D quarter eagle are blatantly original, earning the coin high marks for eye appeal. Satiny luster remains in the design recesses, and the mintmark remains clear despite light wear. Attractive, original AU-level examples of this date are rare and in constant demand among Indian gold collectors. NGC ID# 7KR7, PCGS# 7943

**1911-D Indian Quarter Eagle, AU55  
Low-Mintage Series Key**

**4652 1911-D AU55 NGC.** A meager mintage of 55,680 Indian quarter eagles was accomplished at the Denver Mint in 1911, making the 1911-D the low-mintage key to the series. This attractive Choice AU specimen shows just a touch of wear on the well-detailed design elements and the all-important mintmark is faint, but clearly legible. The pleasing orange-gold surfaces are lustrous and lightly abraded. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, AU58  
Strong D, Famous Series Key Date**

**4653 1911-D AU58 PCGS.** Strong D mintmark. The mintage was low (55,680 pieces) and demand is high for the undisputed key to the Indian Head quarter eagle series. This is the Strong D variant, always preferred by a majority of collectors over its Weak D counterpart. Mint luster glows from both sides of the coin, which displays a sharp strike and attractive, medium-gold color. A pair of tiny reverse rim nicks at OF and a faint, thin mark near the mouth are the sole signs of brief circulation on this nearly Mint State example. NGC ID# 7KR7, PCGS# 7943

**1911-D Two and a Half, MS61  
Sharp Mintmark**

**4654 1911-D MS61 NGC.** This impressively sharp 1911-D quarter eagle shows a bold mintmark and a strong wire rim along the right obverse periphery. The yellow-gold surfaces are bright, with microgranular luster that is characteristic of the 1911-D. Grade-limiting field marks are light and unobtrusive. This is a pleasing lower-end Uncirculated example of the key date in the Indian quarter eagle series. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, Sharp MS62  
Clear, Strong Mintmark**

- 4655 1911-D MS62 NGC.** Exceptionally smooth surfaces and a sharp strike complement the lustrous, orange-gold surfaces of this key date Indian Head quarter eagle. The all-important mintmark is well-formed, clear at its center, and boldly struck. A tiny tick on the cheek and a well-hidden, shallow mark at stars 6 through 9 detract only from the numeric grade, since they are require a loupe to view, and the eye appeal is otherwise strong. House in a previous generation NGC holder with its hologram intact. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, MS62  
Pleasing Original Surfaces**

- 4656 1911-D MS62 PCGS.** This Mint State 1911-D quarter eagle has satiny original luster in shades of peach-gold, orange, and yellow, with minimal abrasions overall. Well-struck devices add to the eye appeal, and the mintmark is sharp. Attractive lower-end Mint State examples of this Denver key are always in demand. This piece is housed in a green label holder. NGC ID# 7KR7, PCGS# 7943

**1911-D Indian Quarter Eagle, MS62  
Sharply Detailed, Bold D**

- 4657 1911-D MS62 NGC.** From a remarkably low mintage of 55,680 pieces, the 1911-D Indian quarter eagle is the sought-after key to the series. This attractive MS62 specimen offers sharply detailed central design elements and a bold D mintmark. The pleasing lemon-yellow surfaces are lightly marked for the grade and radiate vibrant mint luster throughout. NGC ID# 7KR7, PCGS# 7943

**1911-D Indian Quarter Eagle, MS63  
Colorful, Lustrous Example**

- 4658 1911-D MS63 PCGS.** Branch mint type collectors have only three possible options in the Indian quarter eagle series, all of them from the Denver Mint. The first, and most famous branch mint issue is the 1911-D, from a series-low mintage of 55,680 pieces. While most type collectors opt for a less expensive coin than this acknowledged key issue, the 1911-D is available enough in Mint State grades to make it a viable choice for a high-end branch mint type set. Of course, the 1911-D is the most sought-after Indian quarter eagle for series specialists, as well.

This impressive Select specimen offers sharply detailed design elements throughout, with a bold D mintmark. The lightly marked orange-gold surfaces are lustrous and appealing, with hints of rose, lilac, and golden-brown patina in selected areas. NGC ID# 7KR7, PCGS# 7943

**1911-D Indian Quarter Eagle, Lustrous MS63**

- 4659 1911-D MS63 NGC.** An attractive Select representative of this well-known series key, with well-detailed design elements that show just a touch of softness on the eagle's shoulder. The vivid orange-gold surfaces are lightly marked for the grade and vibrant mint luster radiates from both sides. The all-important mintmark is a little soft, but not weak. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, MS63  
Bold Mintmark, Well-Preserved Key**

- 4660 1911-D MS63 NGC.** As far as key dates go, none compare to the 1911-D: its low mintage, surviving population, conditional rarity, and fame outside the circle of series specialists. With 55,680 pieces struck, that total is less than 25% that of the next-smallest mintage in the series — the 1914 (240,000 coins).

This yellow-gold representative in Select Uncirculated condition is far finer than most survivors and shows a bold mintmark, though no formal Strong D designation is noted on the NGC insert. Definition is equally strong on the headdress and eagle's feathers. A lustrous, well-preserved example without any severe abrasions. NGC ID# 7KR7, PCGS# 7943

**4661 1912 MS64 NGC.** The 1912 Indian quarter eagle becomes scarce in grades above the MS64 level. This attractive Choice specimen offers sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. NGC ID# 7KR8, PCGS# 7944

**4662 1914 MS63 PCGS.** A collector-grade Select example of this semikey Philadelphia issue, showing original peach-orange and olive-gold luster with luminous fields. Only a few light abrasions are present. The eye appeal of this piece far exceeds expectations for the grade. NGC ID# 7KRA, PCGS# 7946

**4663 1914 MS63 PCGS.** This Select Mint State example displays frosty orange-gold luster and hints of faint copper color. The central obverse has a weak area at the Indian's temple and the front center of the headdress. Otherwise, the strike is sharp including the eagle's shoulder and the outer ends of the headdress feathers. Marks are limited to a few delicate, minor field abrasions, while the eye appeal is excellent. NGC ID# 7KRA, PCGS# 7946

---

**1914 Indian Quarter Eagle, MS64+  
High-Quality for the Grade**

**4664 1914 MS64+ PCGS.** The 1914 is one of the three condition keys of the Indian quarter eagle series, being genuinely scarce in MS65. This Plus-graded near-Gem is of exceptional quality for the grade and will fit in well with an otherwise Gem-quality date and mintmark collection. The strike is sharp, and frosty wheat-gold mint luster reveals no mentionable abrasions as it illuminates the fields and highlights the devices. NGC ID# 7KRA, PCGS# 7946

---

**1914 Quarter Eagle, MS64+  
Needle-Sharp CAC Coin**

**4665 1914 MS64+ PCGS. CAC.** The 1914 is famous for playing second fiddle to the 1911-D quarter eagle. Still, it claims a relatively low mintage of 240,000 coins and proves scarce any finer than this high-end MS64+ with CAC approval. Needle-sharp wheat-gold surfaces glisten with soft mint frost and display fantastic preservation. Worth a premium bid. NGC ID# 7KRA, PCGS# 7946

---

**1914-D Indian Quarter Eagle, MS65  
Underrated Condition Rarity**

**4666 1914-D MS65 NGC.** The 1914-D Indian quarter eagle claims a mintage of 448,000 pieces and the issue can be found in lower Mint State grades without much difficulty. The population drops off considerably at the MS64 grade level, however, and the 1914-D is the most elusive issue of the series in grades of MS65 or better. The elusive nature of the 1914-D in high grade is not well-understood, outside of series specialists. This delightful Gem exhibits unusually sharp design elements, with fine definition on the feathers of the headdress and eagle's wing. The well-preserved orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. Census: 48 in 65 (2 in 65+), 1 finer (3/19). NGC ID# 2899, PCGS# 7947

**1914-D Two and a Half, MS65  
None Finer at PCGS**

- 4667 1914-D MS65 PCGS.** The 1914-D is one of the three most challenging quarter eagles in this series to obtain in high grades after the 1911-D and 1914. It is the only one without any coins certified above the Gem grade level at PCGS. The dies are in late states with buckling around the rims and a crack through the base of UNITED. Mint luster shimmers vibrantly from well-detailed surfaces that show top-quality preservation and just a hint of softness on the Indians lowest headdress feathers. A single mark above IN identifies this coin. Population: 53 in 65, 0 finer (3/19). NGC ID# 2899, PCGS# 7947

**1915 Two and a Half, MS65  
Green Label Holder**

- 4668 1915 MS65 PCGS.** Available overall, the 1915 Indian quarter eagle becomes moderately scarce at the Gem grade level, and it is a genuine rarity any finer. This piece displays sharp devices and deep sun-orange mint luster. Each side is satiny and devoid of bothersome abrasions. Housed in a green label holder. PCGS lists six finer representatives (3/19). NGC ID# 7KRC, PCGS# 7948

**THREE DOLLAR GOLD PIECES**

**1854-D Three Dollar, XF40 Details  
Key Dahlonega Type**

- 4669 1854-D — Tooled, Cleaned — ANACS. XF40 Details. Variety 1-A.** Essential to a Dahlonega type set, the 1854-D has a tiny mintage of 1,120 pieces and is coveted in all grades. The other Southern branch issue, the 1854-O, was also struck only in the initial year of the denomination. This moderately circulated lemon-gold example is somewhat bright from a cleaning, but marks are unobtrusive and there are no signs of repair. Luster accompanies the obverse legends. Clashed inside the wreath and below Liberty's chin. NGC ID# 25M4, PCGS# 7970

- 4670 1854-O XF40 PCGS. Variety 2.** The lower portion of the wreath is lapped, usual for the issue. The 1854-O is the only New Orleans issue of the three dollar denomination, and is thus essential for Southern gold type collectors. This wheat-gold representative displays even wear on the curls and leaves, but luster accompanies the legends, and no marks are of singular interest. NGC ID# 25M5, PCGS# 7971

- 4671 1854-O — Cleaned — NGC Details. AU. Variety 2,** the lapped die state of the lone 1854-O die pair. New Orleans struck three dollar gold pieces only in 1854, and coinage amounted to just 24,000 pieces. This AU-level survivor displays sharp detail and bright yellow-gold surfaces. Light wear in the fields gives the luster a satiny appearance. NGC ID# 25M5, PCGS# 7971

**1854-O Three Dollar, AU55  
Single-Year Type Coin**

- 4672 1854-O AU55 NGC. Variety 2.** The lapped reverse die state is the one typically encountered among first-year 1854-O three dollar gold coins from a mintage of 24,000 pieces. Light straw-gold color defines each side, and the faintest traces of mint luster remain. Detail is razor-sharp on the leaf left of the bowknot and the other wreath elements, while friction is more apparent on the obverse. Collectors will appreciate this single-year type coin.  
**From The Chinook Collection.** NGC ID# 25M5, PCGS# 7971

**1855 Three Dollar Gold, MS64  
Only a Few Finer Pieces Are Known**

- 4673 1855 MS64 PCGS.** The fields have subtle reflectivity, although they are not truly mirrored. Nonetheless, this lemon-gold near-Gem displays well-struck design elements and is devoid of significant abrasions. Eye appeal is outstanding. The 1855 three dollar gold piece comes from a fairly substantial mintage of 50,555 coins, the third-highest in the series. Yet, it is a rarity in MS64 and finer grades. Population: 33 in 64 (4 in 64+), 5 finer (3/19). *From The Chinook Collection.* NGC ID# 25M6, PCGS# 7972

- 4674 1855-S VF30 PCGS.** This die pair was used to manufacture all 6,600 business strike and the unique proof. With high-end examples being generally out of reach, this VF30 representative is a perfect collector-grade coin. The legends are strong, and each side shows rich red-gold color. A mark between the chin and the U identifies this piece. NGC ID# 7K5D, PCGS# 7973

**1855-S Three Dollar, Strong AU50  
Red and Khaki-Gold Color**

- 4675 1855-S AU50 PCGS.** A significant majority of the 6,000 three dollar gold coins struck at the Western branch mint in 1855 were put directly into local circulation, explaining the high attrition rate. Probably not many more than 200 examples survive, and the average certified representative is about XF40. Definition is impressively strong on this lightly circulated red and khaki-gold three dollar coin. Minor friction and evenly distributed ticks fail to diminish the appeal. Population: 16 in 50, 35 finer (3/19). *From The Chinook Collection.* NGC ID# 7K5D, PCGS# 7973

**1856 Three Dollar Gold, MS62  
Collectible Early Issue**

- 4676 1856 MS62 NGC.** This coin is smooth with incredibly few overt distractions for the grade level. Lively mint luster is decidedly frosty in texture, glistening over peach-gold surfaces. Well-struck with localized incompleteness on each side. Philadelphia Mint employees manufactured 25,010 three dollar gold pieces in 1856. That stands as one of the highest productions in the series. *From The Jersey Shore Gold Collection.* NGC ID# 25M8, PCGS# 7974

**1856 Three Dollar, Choice Uncirculated  
Four Coins Graded Finer**

- 4677 1856 MS64 PCGS.** Even though the Philadelphia Mint coined 26,010 three dollar gold pieces this year, the 1856 is markedly scarcer than the 1854 and 1855 in all Mint State grades. This piece has an above-average strike, although we note slight weakness on the U in UNITED. The surfaces are radiantly lustrous with orange accents that complement medium yellow-golden color. A notable opportunity for the gold specialist and a lightly marked, high-end example at the near-Gem level of preservation. Seldom seen finer at either service. Population: 34 in 64, 4 finer (3/19). *Ex: Long Beach Signature (Heritage, 6/2004), lot 6223; Beverly Hills Signature (Heritage, 11/2011), lot 4241; New York Signature (Heritage, 11/2013), lot 3823; ANA National Money Show Signature (Heritage, 3/2014), lot 4102, where it realized \$11,750.* *From The Chinook Collection.* NGC ID# 25M8, PCGS# 7974

**1856-S Three Dollar, Choice AU  
Rare Small S Mintmark**

- 4678 1856-S AU55 PCGS.** Small S. The mintmark variety is rarely encountered among 1856-S three dollar gold pieces (34,500 coins). As a whole, the issue represents the most accessible San Francisco emission in the series. Partial luster emanates from the recesses and strike detail is bold. Hairlines appear over the semireflective yellow-gold surfaces. NGC ID# 25M9, PCGS# 7975

**1856-S Three Dollar Gold, MS61  
Seldom Seen in Mint State**

- 4679 1856-S MS61 NGC.** Medium S, one of two such die pairings, the reverse die here showing an extra small arc of metal curving down and left from the bottom of the second L in DOLLARS. The 1856-S three dollar gold is an odd duck in more ways than one, as it is one of only four collectible S-mint issues in the series, along with the 1855-S, 1857-S, and 1860-S. It is, however, by far the highest-mintage of that quartet, at 34,500 coins — nearly as much as the 1874 Philadelphia issue at 41,800 pieces, usually collected as a type coin. But far fewer pieces of the 1856-S survive in high grade; they saw heavy circulation in the Old West of the 1850s and 1860s, and today the average graded coin is about Choice XF. This Mint State specimen displays generous luster over yellow-gold surfaces that show fewer marks than expected for the grade, producing strong eye appeal. Some mild strike weakness on the bowknot is typical for the issue, but overall the devices are well brought-up. Census: 12 in 61, 11 finer (3/19).

*Ex: Dallas Signature (Heritage, 3/2013), lot 4197, realized \$12,925.  
From The Chinook Collection. NGC ID# 25M9, PCGS# 7975*

**1857 Three Dollar Gold Piece, MS62**

- 4680 1857 MS62 NGC.** The 1857 three dollar gold piece had a mintage of 20,891 coins at Philadelphia in 1857, a typical mintage for the denomination in the 1850s. For many coins in other series, that mintage would equate to a significant rarity, but not so for the threes. This piece has scattered marks and inconsequential hairlines on the brilliant and frosty yellow gold surfaces with full cartwheel luster. Census: 39 in 62 (2 in 62+), 22 finer (3/19).  
*From The Chinook Collection. NGC ID# 7K5G, PCGS# 7976*

**1858 Three Dollar Gold, AU50  
Smooth, Attractive Surfaces**

- 4681 1858 AU50 NGC.** A hint of field reflectivity is evident amid the peripheral legends, although the remainder of each side displays smooth, light rub that denotes the AU50 grade. The strike is sharp and the honey-gold color is warm and pleasing. The Philadelphia Mint struck only 2,133 three dollar gold pieces in 1858, although attractive AU pieces such as this are collectible. NGC ID# 7K5J, PCGS# 7978

**1858 Three Dollar, AU58 Prooflike  
Only Example So-Designated at NGC**

- 4682 1858 AU58 Prooflike NGC. CAC .** This is the only Prooflike example of the issue certified by NGC (3/19), and even though minor friction affects the high points, the yellow-gold mirrors flash as brightly as ever. Not only are the surfaces deeply reflective and attractively contrasted, they offer added character in the form of rosy accents at the inner reverse borders. By 1858, the three dollar gold coin was a *bona fide* failure as a circulating denomination, as the mintage of just 2,133 business strikes can attest.  
*Ex: Dallas Signature (Heritage, 10/2012), lot 5788, where it realized \$11,162.50.  
From The Chinook Collection. NGC ID# 25MC, PCGS# 7978*

**1860 Three Dollar Gold, MS63  
Boldly Struck**

- 4683 1860 MS63 PCGS.** This is a luminous, frosty three dollar gold piece that grades about eight points finer than the average representative at PCGS or NGC. The yellow-gold fields are mostly smooth with some minor ticks and hairlines. Liberty's curls, headdress, and the date and denomination are bold. Population: 22 in 63 (1 in 63+), 21 finer (3/19).  
*From The Chinook Collection.* NGC ID# 25ME, PCGS# 7980

**1860 Three Dollar Gold Piece, MS63+  
Important Low Mintage Issue**

- 4684 1860 MS63+ PCGS.** One of the fascinating coinage series is the three dollar gold series minted from 1854 to 1889. It is interesting that the postage rate at the time was three cents, suggesting a parallel for the denomination. Production of these coins began strong with 138,618 coins minted at Philadelphia in 1854, and quickly diminished with about 97,000 coined the next three years, and 24,000 for the following three years. The mintage in 1860 was 7,036 circulation strikes. This Select Mint State example has pleasing surfaces with trivial marks and satiny light yellow luster. Population: 22 in 63 (1 in 63+), 21 finer (3/19). NGC ID# 25ME, PCGS# 7980

**1860-S Three Dollar Gold, XF45  
Elusive San Francisco Issue**

- 4685 1860-S XF45 NGC.** The San Francisco Mint was a sporadic producer of three dollar gold pieces in the early phase of the series. Aside from the unique 1870-S coin, all production at this mint occurred prior to the Civil War period. In 1860, San Francisco struck 7,000 three dollar pieces. This Choice XF survivor displays light wear but retains most major details. The honey-gold surfaces are smooth and have hints of luster in the most protected areas. Census: 28 in 45, 64 finer (3/19). NGC ID# 7K5M, PCGS# 7981

**1861 Three Dollar, Partly Reflective AU58**

- 4686 1861 AU58 NGC.** Reflectivity is apparent in the fields on each side, particularly within the protected areas. The open fields show numerous abrasions that reduce the mirroring seen elsewhere. Trivial wear appears on the high points, however, and this near-Mint offering from a mintage of 5,959 barely misses out on a full Uncirculated assessment. Scarce at this level.  
*From The Chinook Collection.* NGC ID# 7K5N, PCGS# 7982

**1861 Three Dollar, MS63  
Razor-Sharp Impression**

- 4687 1861 MS63 NGC.** Strike definition is surprisingly sharp for a commercial three dollar gold piece. The vertical band on the bowknot is mostly clear, and Liberty's curls and headdress show similarly crisp detail. Tinges of reddish-gold color heighten the eye appeal. Lustrous surfaces display minor hairlines in the semireflective fields. The 1861 three dollar enjoys a characteristically low mintage for the period: 5,959 coins. Although few saw genuine circulation, most survivors display the effects of handling and friction from passing through the hands of collectors and others for nearly 160 years. This is a wonderful exception. Census: 4 in 63, 7 finer (3/19). NGC ID# 7K5N, PCGS# 7982

**1862 Three Dollar Gold, AU53  
Partial Luster Remains**

- 4688 1862 AU53 NGC.** A partly lustrous About Uncirculated example of this low-mintage Philadelphia issue, showing light wear on the high points of the design and in the open areas of the fields. The 1862 three dollar piece was issued at a time when few gold coins were preserved for numismatic purposes due to the hoarding of gold and silver coinage that occurred during the Civil War. Enough examples survive to make the date collectible, but it remains scarce in high grade. NGC ID# 7K5P, PCGS# 7983

**1862 Three Dollar, MS62  
Well-Struck and Frosty**

- 4689 1862 MS62 NGC.** The estimated survivorship for the 1862 ranges from 250 pieces (Bowers and Winter) to 650 coins (CoinFacts). NGC and PCGS have graded 422 submissions combined, virtually splitting the estimates in half. This Mint State representative is well-struck and frosty with relatively few marks. A few small digs near OF likely limit the grade, but they are effectively concealed by the lettering. Census: 15 in 62, 11 finer (3/19).  
*From The Chinook Collection.* NGC ID# 7K5P, PCGS# 7983

- 4690 1863 — Improperly Cleaned — NGC Details. AU.** The dies must have clashed early, since virtually all 1863 examples show die clashing on both sides. This briefly circulated example shows numerous light abrasions and evidence of a light cleaning. Medium-gold surfaces retain pale-orange accents and traces of luster. Sharp definition remains, and the reverse is rotated 15° clockwise.

- 4691 1863 — Cleaned — ANACS. AU58 Details.** The 1863 is a low mintage date, and few were saved relative to the 1888, which has an identical business production of 5,000 pieces. This sharply struck example shows only a wisp of wear on Liberty's shoulder. The delicately hairlined semiprooflike fields are double-clashed but free from bagmarks. NGC ID# 7K5R, PCGS# 7984

**1863 Three Dollar Gold Piece, MS61  
Scarce in Mint Condition**

- 4692 1863 MS61 NGC.** The 1863 is scarce in all grades, especially in mint condition with only 30 to 40 pieces believed extant in the various grades of Uncirculated. This is a well-struck example that exhibits even yellow-gold color. A number of small abrasions are scattered over each side, and die clashing is prominent in the fields. Census: 15 in 61, 37 finer (3/19).  
*From The Chinook Collection.* NGC ID# 7K5R, PCGS# 7984

**1864 Three Dollar, AU53  
Elusive Civil War-Era Issue**

- 4693 1864 AU53 NGC.** Bowers and Winter estimated in 2005 that fewer than 200 were believed extant from a mintage of 2,600 coins, making the 1864 "one of the rarer \$3 gold pieces of its era..." This sharp AU53 representative is partly lustrous with appealing peach-gold color. Myriad ticks and a few hairlines are seen.  
*From The Chinook Collection.* NGC ID# 7HSK, PCGS# 7985

**1864 Three Dollar, MS62  
Blatantly Prooflike**

- 4694 1864 MS62 NGC.** This is a fully struck and profoundly reflective three dollar gold piece. One of the few ways to distinguish it from a proof is the repunching on 18 in the date. Each side features deep orange-gold color. Faint hairlines explain the MS62 grade. From a mintage of 2,630 coins. Census: 13 in 62, 14 finer (3/19). NGC ID# 7HSK, PCGS# 7985

**1865 Three Dollar, AU53  
Elusive Low-Mintage Issue**

- 4695 1865 AU53 NGC.** The 1865 three dollar gold piece is rare in Mint State and scarce even at the AU level. Only 1,140 coins were struck, and this issue was little-saved for any purpose other than bullion hoarding during and after the Civil War. This is a sharply struck coin with elements of reflectivity in the peripheral fields amid the border legends. A small cluster of marks in the field near Liberty's chin serves as a pedigree marker. Census: 6 in 53, 59 finer (3/19). NGC ID# 7K5S, PCGS# 7986

**1866 Three Dollar Gold, MS63+  
Reflective Fields**

- 4696 1866 MS63+ PCGS.** Three dollar production got a slight bump after the end of the Civil War, with a grand total of 4,000 pieces struck in 1866. Most coins show evidence of brief handling, but not this Select representative, which nearly qualifies for an even higher grade level. A touch of prooflike reflectivity exists in the fields. Yellow-gold surfaces showcase crisp design detail and minimal scattered marks. A hint of softness on the forecurls and bowknot is typical. Population: 10 in 63 (1 in 63+), 12 finer (3/19).  
*From The Chinook Collection.* NGC ID# 25MM, PCGS# 7987

**1866 Three Dollar Gold, MS64  
Rare High Grade Specimen**

- 4697 1866 MS64 PCGS.** The 1866 three dollar gold piece claims a small business-strike mintage of 4,000 pieces, with all the coins delivered on February 7, 1866. A small mintage of 30 proofs was also struck early in the year. The obverse die was used to strike both proofs and business strikes in 1866. The 1 in the date is strongly impressed on the business-strike die, and the second 6 in the date is partially filled on the proofs, making it easy to differentiate between the formats.

This impressive Choice example displays sharply detailed design elements throughout and the well-preserved orange-gold surfaces show the extensive parallel die striations seen on many examples of this issue. The fields exhibit a mix of satiny mint luster and prooflike reflectivity, with outstanding eye appeal. The 1866 three dollar gold is a challenging issue in all grades, and Choice specimens are rare. Population: 7 in 64, 5 finer (3/19). NGC ID# 25MM, PCGS# 7987

- 4698 1867 AU53 NGC.** The lightly abraded orange-gold surfaces of this attractive AU53 example show traces of prooflike reflectivity in sheltered areas and only light wear is evident on the well-detailed design elements. From a small mintage of 2,600 pieces. NGC ID# 25MM, PCGS# 7988

1867 Three Dollar, Well-Struck MS62  
Hints of Copper-Red Color

- 4699** 1867 MS62 PCGS. This is a pleasing-for-the-grade 1867 three dollar gold piece with copper-red accents around the legends and pinpoint definition everywhere except the bowknot and cotton bolls, which are slightly soft. A few ticks on the portrait and hairlines in the fields determine the grade, but it would be exceedingly difficult to locate and obtain a finer example of this issue (2,600 coins struck). Population: 11 in 62, 9 finer (3/19).  
*From The Chinook Collection.* NGC ID# 25MN, PCGS# 7988

1868 Three Dollar, MS62  
Limited Production of 4,850 Coins

- 4700** 1868 MS62 NGC. Three dollar gold production was characteristically limited in 1868, totaling a meager 4,850 coins. Gold did not circulate in the wake of the Civil War, partly explaining the availability of Mint State examples today. Peach-gold surfaces maintain bright, frosty luster and strong detail everywhere except the ribbon bow. Scattered hairlines. Census: 24 in 62, 11 finer (3/19).  
*From The Chinook Collection.* NGC ID# 25MR, PCGS# 7989
- 4701** 1869 AU53 NGC. The circulation strike mintage was small — just 2,500 pieces — making the 1869 scarce-to-rare in all grades. This About Uncirculated example retains a moderate amount of its original prooflike surfaces and sharp strike, although it acquired some minor field chatter during its stint in circulation. Pleasing rich-gold color remains intact. NGC ID# 25MR, PCGS# 7990

1869 Three Dollar, Reflective MS61

- 4702** 1869 MS61 NGC. Lovely yellow-gold surfaces retain considerable prooflike reflectivity in the obverse and reverse fields of this elusive 1869 three dollar gold piece. The low mintage of just 2,500 coins was sufficient to ensure that the date will always be difficult to locate in any grade, let alone Mint State. Census: 19 in 61 (1 in 61+), 6 finer (3/19).  
*Ex: FUN Signature (Heritage, 1/2009), lot 5312, where it brought \$3,737.50.*  
*From The Jersey Shore Gold Collection.* NGC ID# 25MR, PCGS# 7990

1869 Three Dollar, MS63  
One of Two Top Examples at NGC

- 4703** 1869 MS63 NGC. The 1869 three dollar gold piece is a low-mintage issue struck to the extent of only 2,500 pieces for circulation, complemented by 25 proofs. The date is rare in MS63 condition, and only three coins have been certified in higher numeric grades at NGC and PCGS combined (all at PCGS). This attractive Select example exhibits well-detailed design elements with a touch of softness on the ribbon bow, as usual. Lightly marked yellow-gold surfaces exhibit prooflike reflectivity in most areas amid a scattering of minor contact marks on both sides. Eye appeal is strong for the grade. Census: 2 in 63, 0 finer (3/19).  
*Ex: New York Signature (Heritage, 2/2014), lot 5343; ANA Signature (Heritage, 8/2014), lot 3830, where it realized \$9,987.50.*  
*From The Chinook Collection.* NGC ID# 25MR, PCGS# 7990
- 4704** 1870 AU53 NGC. A small mintage of just 3,500 pieces makes the 1870 scarce-to-rare in all grades. This straw-gold example saw brief circulation, but escaped into collector hands with only minor marks and slight wear on the high points. Soft mint luster remains in protected areas. The leaf immediately left of the date is nearly lapped away, confirming the circulation strike status of this coin. NGC ID# 7K8F, PCGS# 7991

**1870 Three Dollar Gold, AU58  
Scarce, Low-Mintage Issue**

- 4705 1870 AU58 PCGS.** From a small mintage of 3,500 pieces, the 1870 three dollar gold piece is an elusive issue, especially in high grade. This attractive near-Mint specimen exhibits just a trace of wear on the well-detailed design elements and the vivid orange-gold surfaces are lustrous and appealing, despite some minor abrasions and chatter in the fields. Population: 49 in 58 (2 in 58+), 46 finer (3/19). NGC ID# 7K8F, PCGS# 7991

**1870 Three Dollar, MS62 Prooflike  
Highly Reflective Peach-Gold Surfaces**

- 4706 1870 MS62 Prooflike NGC.** Highly reflective peach-gold surfaces feature flashy fields that contrast against devices thickly coated with mint frost. Light abrasions and field chatter limit the grade, but the eye appeal of this lovely three dollar gold piece is top-drawer. Census: 3 in 62 Prooflike, 0 finer (3/19).  
Ex: *Long Beach Signature* (Heritage, 2/2007), lot 4466, where it realized \$8,050.  
From *The Chinook Collection*. NGC ID# 25MS, PCGS# 77991

**1871 Three Dollar, MS62  
Minuscule Mintage of 1,300 Pieces**

- 4707 1871 MS62 NGC.** It is little wonder this MS62 three dollar gold piece maintains noticeable field reflectivity. Only 1,300 pieces were struck in 1871, a lower total than many proof mintages in other series. This is probably a later impression, with softness on the upper curls, cotton bolls, date, and ribbon. Nevertheless, procuring a finer example will prove immensely challenging. Census: 12 in 62 (1 in 62+), 12 finer (3/19).  
From *The Chinook Collection*. NGC ID# 25MU, PCGS# 7993

**1874 Three Dollar, MS64  
Glistening Mint Frost**

- 4708 1874 MS64 PCGS. CAC.** While the 1874 claims what would generally be considered a small mintage in the context of U.S. coinage (41,800 pieces), it is one of the more collectible issues in the three dollar series, particularly in high grades. Eye appeal is fantastic for this glistening near-Gem. Frosty yellow-gold surfaces are well-struck with few areas of softness, namely the ribbon bow. Terrific preservation for the grade and a rarity any finer. There are 21 higher-graded submissions at PCGS. CAC: 25 in 64, 6 finer (3/19).  
From *The Chinook Collection*. NGC ID# 7KDE, PCGS# 7998

**1874 Three Dollar, AU58 Prooflike  
Contrasted Orange-Gold Surfaces**

- 4709 1874 AU58 Prooflike NGC.** A few more than 3,000 1874 three dollar gold pieces are certified at NGC. Barely more than 1% of that population has been awarded a Prooflike designation. Deep orange-gold color, glassy fields, and noticeably frosted devices distinguish this AU58 Prooflike three dollar from most other survivors. Hairlines over each side are often found on comparable representatives. Census: 15 in 58 Prooflike, 19 finer (3/19). NGC ID# 25MX, PCGS# 77998

**1874 Three Dollar, MS61  
Elusive Prooflike Example**

- 4710 1874 MS61 Prooflike NGC.** Strongly lustrous and unworn with frosted, solidly struck devices that contrast with moderate mirrors. The deep yellow-gold surfaces exhibit numerous minor abrasions that restrict the grade, though the eye appeal is high for the level assigned. This higher-mintage issue is more elusive than most with Prooflike surfaces on a percentage basis. Census: 11 in 61 Prooflike, 7 finer (2/19).  
Ex: *Long Beach Signature* (Heritage, 5/2007), lot 2292, where it realized \$3,737.50.  
From *The Jersey Shore Gold Collection*. NGC ID# 25MX, PCGS# 77998

---

**1877 Three Dollar Gold, AU55 Details  
More Affordable Example of This Rarity**

- 4711 1877 — Cleaned — ANACS. AU55 Details.** After a two-year hiatus when only proof three dollar pieces were struck, a small mintage of 1,468 business strikes was issued in 1877, a year associated with reduced production of all but silver issues. Unlike other dates in the series with similar and even smaller mintages, the 1877 is a genuine rarity in all grades. This example has been obviously cleaned in the past, but does not appear to have been used in jewelry and would affordably fill in a very difficult slot in the popular three dollar gold series.  
*Ex: Dallas Signature (Heritage, 7/2006), lot 1136, where it realized \$3,047.50. NGC ID# 25MY, PCGS# 7999*

- 4712 1878 MS62 PCGS.** Shimmers of luster endow this bright yellow-gold 1878 three dollar gold piece, an eye-appealing type coin for this grade level. Although the wreath bowknot is predictably weak, the Liberty portrait is sharp. Only light, unobtrusive abrasions are visible, limiting the grade. NGC ID# 25MZ, PCGS# 8000

---

**1878 Three Dollar Gold, MS65  
Dazzling Mint Frost**

- 4713 1878 MS65 NGC.** David Bowers writes in his three dollar gold piece reference (2005), that "the typical Mint State coin is in a lower range with a generous quotient of bagmarks, probably from having been tossed around in bags stored in banks." The certified population data support Bowers' contention, as MS65 and better 1878 three dollar coins comprise a small percentage of the total number of pieces certified. This yellow-gold Gem awash in dazzling luster displays strong design features, save for the usual softness on the bowknot. A few obverse luster grazes do not take away from the coin's overall pleasing eye appeal.  
*Ex: FUN Signature (Heritage, 1/2008), lot 3118, where it realized \$19,550.*  
**From The Chinook Collection.** NGC ID# 25MZ, PCGS# 8000

---

**1879 Three Dollar, Radiant MS63  
Peach-Gold Surfaces**

- 4714 1879 MS63 NGC.** Radiantly lustrous surfaces display attractive peach-gold color imbued with hints of light green, mostly at the peripheries. An attentive strike brings about sharp definition on the design elements, and some trivial obverse marks define the grade. Both sides show prooflike tendencies, which is typical for the issue.  
*Ex: DAX Collection / Milwaukee Signature (Heritage, 8/2007), lot 3014; Heritage (1/2014), lot 6566. NGC ID# 25N2, PCGS# 8001*

---

**1879 Three Dollar, MS64+  
Crisp Strike**

- 4715 1879 MS64+ PCGS.** Glittering mint frost and peach-gold coloration throughout this high-end near-Gem make it a highly appealing example from a mintage of 3,000 coins. Each side boasts crisp strike definition, and that includes the lower part of the wreath and ribbon. Tiny ticks are minor for the grade, hence the Plus designation from PCGS. NGC ID# 25N2, PCGS# 8001

---

**1879 Three Dollar, MS64 Prooflike  
3,000 Coins Struck, Dramatic Contrast**

- 4716 1879 MS64 Prooflike NGC.** In 1879, the Mint reduced three dollar gold coin output to just 3,000 pieces, down from a record-high 82,304 examples the year before. That was because Mint officials had vastly overestimated demand for gold as the yellow metal reached parity with paper currency in late 1878 and early 1879. Dramatic contrast between the mirrorlike fields and frosted devices explains the Prooflike designation. Deep reddish-gold color is highly appealing. Census: 12 in 64 Prooflike, 1 finer (3/19).  
**From The Chinook Collection.** NGC ID# 25N2, PCGS# 78001

**1880 Three Dollar, MS64  
Popular, Low-Mintage Date**

- 4717 1880 MS64 PCGS.** The low mintage of only 1,000 pieces for the 1880 has been a strong draw for collectors for more than 100 years. This is an attractive example that exhibits significant prooflikeness in the fields with a small presence of cartwheel luster seen as well. The bright, golden-orange surfaces show a few small abrasions. Population: 65 in 64 (4 in 64+), 27 finer (2/19). NGC ID# 25N3, PCGS# 8002

**1880 Three Dollar, MS64  
Eye-Appealing Contrast**

- 4718 1880 MS64 PCGS.** Eye appeal and technical preservation are both excellent for this 1880 three dollar gold piece, one of only 1,000 coins minted. If not for a mark under the 3, an even higher grade would almost certainly be in order. Bold, lightly frosted design elements stand out noticeably against the reflective fields on each side. A terrific example of this challenging issue. *From The Chinook Collection.* NGC ID# 25N3, PCGS# 8002

**1881 Three Dollar Gold, AU53  
Only 500 Pieces Struck**

- 4719 1881 AU53 PCGS.** With a mintage of only 500 coins, the 1881 three dollar gold is one of the most sought-after dates in the series, even though it was well-saved at the time of issue. Collectible AU pieces are scarce, as are Mint State coins. This orange-gold example has rich color and hints of reflectivity in the protected regions. Strike sharpness is outstanding. Population: 11 in 53, 84 finer (3/19). NGC ID# 25N4, PCGS# 8003

**1881 Three Dollar Gold, Reflective AU58  
Lowest Mintage in the Series**

- 4720 1881 AU58 PCGS.** No other three dollar gold issue claims a smaller circulation-strike mintage than the 1881. A mere 500 pieces were struck, making this one of the keys to the series in any grade. Although the fields are lightly marked with scattered hairlines, they maintain significant prooflike reflectivity, surrounding razor-sharp devices. Wear is virtually imperceptible. Population: 21 in 58, 34 finer (3/19). *From The Chinook Collection.* NGC ID# 25N4, PCGS# 8003

- 4721 1882 Repunched Date, FS-301, AU55 PCGS.** A meager mintage of 1,500 pieces makes the 1882 scarce in all grades. All business strikes were coined from the same pair of dies, which show faint but wide repunching on the 2 in the date. This apricot-gold and olive-green Choice AU representative displays slight wear on Liberty's curls and eyebrow. Devoid of relevant contact, and housed in an old green label holder. NGC ID# 4DXC, PCGS# 145710 Base PCGS# 8004

**1882 Three Dollar Gold, AU58  
Semiprooflike Surfaces**

- 4722 1882 Repunched Date, FS-301, AU58 NGC.** The 1882 three dollar gold piece claims a small mintage of 1,500 pieces, but the issue was heavily saved by contemporary collectors, making it surprisingly available today. This impressive near-Mint specimen shows just a trace of wear on the well-detailed design elements and the lightly abraded yellow-gold surfaces exhibit a mix of satiny luster and prooflike reflectivity in the fields. NGC ID# 4DXC, PCGS# 145710 Base PCGS# 8004

1882 Three Dollar Gold Piece, MS62  
Among the Smallest Mintages in the Series

- 4723 1882 Repunched Date, FS-301, MS62 PCGS.** Although the 1882 three dollar was well-saved, its original mintage of just 1,500 coins would always limit the number of pieces available to collectors. The bowknot and wreath elements are well-struck on this Uncirculated representative. Brightly lustrous and semireflective yellow-gold surfaces show moderate hairlines.  
*From The Chinook Collection.* NGC ID# 4DXC, PCGS# 145710 Base PCGS# 8004

1883 Three Dollar, MS62  
900 Examples Minted

- 4724 1883 MS62 PCGS.** Few issues in all of American coinage enjoy mintages as low as the 1883 three dollar (900 coins struck). Examples were well-saved but many show traces of brief handling, resulting in grades ranging from AU53 to AU58. This reflective, yellow-gold representative is Uncirculated. The design elements are uniformly strong and unworn. A pinscratch between UNITED STATES and wispy hairlines in the fields prevent a higher grade. NGC ID# 25N6, PCGS# 8005

1883 Three Dollar, MS62  
Semireflective With Violet Accents

- 4725 1883 MS62 PCGS.** Bowers (2005) explains that "a good percentage of the coins [900 struck] still survive, most in AU grade, probably those acquired as gifts or souvenirs and carelessly handled." This is a lovely, well-preserved exception. Semireflective reddish-gold surfaces exhibit attractive violet accents and uniformly strong detail. Fine hairlines limit the technical grade.  
*From The Chinook Collection.* NGC ID# 25N6, PCGS# 8005

1885 Three Dollar Gold, AU53  
Prooflike Fields

- 4726 1885 AU53 PCGS.** The popular 1885 three dollar gold piece boasts a mintage of only 800 coins, the second-lowest production total in the series. Characteristic of the issue, this AU coin is prooflike, and the mirroring prevails despite light high-point friction. The devices show bold definition and each side has rich orange-gold color. NGC ID# 7KDP, PCGS# 8007

1885 Three Dollar, AU58 Prooflike  
800 Circulation Strikes Minted

- 4727 1885 AU58 Prooflike NGC.** The 800-coin circulation-strike mintage for the 1885 three dollar gold piece rivals the lowest-mintage issues in all of American coinage. It should come as little surprise that this near-Mint example displays overt Prooflike reflectivity and a virtually complete strike. Yellow-gold surfaces are lightly hairlined. Census: 2 in 58 Prooflike, 26 finer (3/19).  
*From The Chinook Collection.* NGC ID# 25N8, PCGS# 78007

- 4728 1886 XF45 PCGS.** Some slight, even wear shows on the well-detailed design elements of this attractive Choice XF specimen, and the lightly abraded yellow-gold surfaces show prooflike reflectivity in protected areas around the devices.  
*Ex: Long Beach Signature (Heritage, 6/2014), lot 5678, realized \$2,232.50.* NGC ID# 25N9, PCGS# 8008

1886 Three Dollar Gold, AU55  
Reflective and Appealing

- 4729 1886 AU55 NGC.** This Choice AU coin barely shows any friction at all, allowing the mirrored fields to gleam with nearly full reflectivity. Each side has bright yellow-gold color and sharp definition. A threadlike lintmark (mint made) is visible in the obverse field behind Liberty's head, while other scattered surface abrasions accompany the light wear. NGC ID# 25N9, PCGS# 8008

**1886 Three Dollar Gold, AU58  
Only 1,000 Pieces Struck**

- 4730** 1886 AU58 PCGS. Only 1,000 business-strike three dollar gold pieces were produced at the Philadelphia Mint in 1886, and high-grade examples are more difficult to locate than the proofs of this date. This well-detailed AU58 example displays reflective prooflike surfaces, with only minor signs of contact.  
Ex: *Central States Signature* (Heritage, 4/2012), lot 6548, where it brought \$4,025.  
From *The Chinook Collection*. NGC ID# 25N9, PCGS# 8008

**1887 Three Dollar, MS63 Prooflike  
Deeply Reflective Fields**

- 4731** 1887 MS63 Prooflike NGC. CAC. The 1887 three dollar gold piece has a reported mintage of 6,000 pieces, but S.H. Chapman notes that many examples were never distributed. This impressive Select specimen displays deeply reflective surfaces with only a few minor contact marks. If the reverse strike was just a touch sharper, this piece might easily be mistaken for a proof. Census: 3 in 63 Prooflike, 2 finer (3/19).  
Ex: *Dallas Signature* (Heritage, 10/2012), lot 5816, where it brought \$7,637.50.  
From *The Chinook Collection*. NGC ID# 25NA, PCGS# 78009

**1888 Three Dollar, MS63  
Terrific Eye Appeal**

- 4732** 1888 MS63 PCGS. The second-to-last year in the series witnessed a production of 5,000 three dollar gold coins at the Philadelphia Mint. Few of them actually circulated, and the issue can still be located in Mint State with little difficulty. Eye appeal is terrific for this sharp Select Uncirculated representative. Splashes of rich sun-gold color complement surfaces that are a shade lighter and awash in vibrant mint frost. NGC ID# 25NB, PCGS# 8010

**1888 Three Dollar, MS64  
Significant Reflectivity in the Fields**

- 4733** 1888 MS64 PCGS. The three dollar gold pieces in the 1880s became more of a novelty than a serious circulating coin. Tiny mintages were the rule, while jewelers and speculators tucked away most available examples. Many high-grade coins survive of most issues from the decade. The 1888 issue had a comparatively generous mintage of 5,000 pieces. Most display some degree of prooflikeness, although not all are as attractive and well-made as this glittering example. The fields are almost entirely prooflike and the surfaces radiate rich, honey-gold luster. A near-Gem, with no meaningful distractions.  
Ex: *ANA Signature* (Heritage, 8/2015), lot 6146, where it brought \$4,817.50. NGC ID# 25NB, PCGS# 8010

**1888 Three Dollar, MS64  
Frosty With Lilac Accents**

- 4734** 1888 MS64 NGC. The three dollar gold series was drawing toward its 1889 close as 5,000 pieces were struck in 1888. Virtually none saw any significant circulation. Most pieces survive in lower to middle Uncirculated grade levels. This is an incredibly attractive near-Gem, fully frosted and boldly struck with lilac accents across warm, yellow-gold surfaces. There are a few areas of struck-in grease and a couple of alloy spots on each side.  
From *The Chinook Collection*. NGC ID# 25NB, PCGS# 8010

**1888 Three Dollar, MS65  
Just 5,000 Pieces Struck**

- 4735** 1888 MS65 PCGS. Rich sea-green toning dominates, though recesses display hints of peach-red. This well-struck Gem possesses a virtually immaculate obverse. The reverse field shows only delicate grazes on the exergue and above DO. UNITED is clearly die doubled, as seen on all business strikes of this low mintage date. NGC ID# 25NB, PCGS# 8010

## PROOF THREE DOLLAR GOLD PIECES

### 1880 Three Dollar, PR58 Only 36 Proofs Minted

- 4736** 1880 PR58 NGC. JD-1, Low R.6. This is only proof die pair listed in John Dannreuther's recently published proof gold reference, featuring a short leaf tip right of the date. However, he notes that a few of the 36 recorded proof strikes, perhaps five pieces, may have been struck from polished circulation-strike dies. This exquisite proof with deeply reflective fields and full design detail showcases superficial hairlines and a trace of rub on the cheek.  
*From The Chinook Collection.* NGC ID# 28AN, PCGS# 8044

### 1886 Three Dollar, PR63 Cameo Low Total Mintage

- 4737** 1886 PR63 Cameo PCGS. JD-1, R.4. The mintage of the 1886 three dollar gold was only 1,000 business strikes plus 142 proof coins, but savvy collectors and dealers of the day saw the proverbial writing on the wall, anticipating the series' end by squirreling away nice examples. Probably one-third of the proof mintage and one-sixth of business strikes survive today. This Select Cameo proof offers broad eye appeal. Orange-gold surfaces display the desirable black-on-gold appearance of Cameo gold when viewed at an angle. Trivial field contact, less than might be imagined, precludes an even finer grade. Population: 6 in 63 Cameo, 16 finer (3/19).  
*Ex: Central States Signature (Heritage, 4-5/2010), lot 2233, where it realized \$11,500.*  
*From The Chinook Collection.* NGC ID# 28AV, PCGS# 88050

### 1887 Three Dollar, PR63 Cameo Coin Turn Restruck Over Medal Turn

- 4738** 1887 — Triple Struck, Reverse Rotated — PR63 Cameo NGC. JD-1, R.4. A minority of 1887 three dollar proofs exhibit medal turn, and likely represent a small mid-year delivery. Some of those specimens were sold before the incorrect turn was noticed. The remainder were struck again, with correct turn. The present piece is in that select category. The date and denomination from the initial inverted strike is apparent on the central reverse. The obverse also retains traces of the initial strike, evident slightly counter-clockwise of the shoulder curl and peripheral letters. Although designated by NGC as "triple struck," it is instead more likely that the obverse from the first strike was imperfectly aligned with the obverse die for the second strike. As for the coin itself, it is a beautiful sun-gold example with frosty motifs and smooth, glassy fields. The reverse displays a few delicate horizontal hairlines.  
*Ex: Pacific Coast Mint Error Collection (Heritage, 5/2007), lot 2794; Central States Signature (Heritage, 4/2015), lot 5290, where it brought \$9,987.50.*  
*From The Chinook Collection.*

### 1889 Three Dollar, PR62 Cameo Tremendous Contrast and Eye Appeal

- 4739** 1889 PR62 Cameo PCGS. JD-1, R.4. Proofs and business strikes show virtually identical date positions for the 1889 three dollar. The numerals are positioned fractionally further right on these specially made coins (129 proofs minted). Deeply reflective fields are typical for a proof offering, delivering tremendous contrast and eye appeal. Fully struck devices display a touch of mint frost, heightening the Cameo effect. Superficial hairlines account for the grade. Yellow-gold color is profound.  
*From The Chinook Collection.* NGC ID# 28AY, PCGS# 88053

## EARLY HALF EAGLES

### 1799 BD-6 Half Eagle, XF45 Elusive Small Reverse Stars Variety

- 4740** 1799 Small Reverse Stars, BD-6, R.5, XF45 ANACS. Bass-Dannreuther Die State d/d, with advanced die cracks on both sides. It is likely that these cracks led to the failure of both dies, as BD-6 is the last use of the obverse and the only use of the reverse. The obverse/reverse die combination is 3-D, as noted on the ANACS holder, which corresponds to the BD-6 variety designation. Only 40 to 50 examples of this die pairing are believed extant. This Choice XF example displays pleasing honey-gold patina and excellent sharpness. Light chatter is evident in the obverse details. PCGS# 519880 Base PCGS# 8081

- 4741** 1800 BD-2, High R.3 — Mount Removed — ANACS. XF40 Details. Bass-Dannreuther Die State a/a. Solder is evident on the dentils near obverse stars 12 and 13. Otherwise, this peach-gold early five is attractive. The curls and eagle display moderate wear, but distracting marks are absent.

### 1800 BD-5 Five Dollar, AU55 Partly Lustrous Red-Gold Surfaces

- 4742** 1800 BD-5, High R.3, AU55 NGC. Bass-Dannreuther Die State e/c, with a crack through IBE in LIBERTY and another through the lower part of the shield into the claws and olive branch. Attractive orange and reddish-gold color dominates this lightly circulated Choice AU half eagle. Light rub is present on the devices, which also show a bit of strike softness in the centers, but luster remains. A few adjustment marks occur over Liberty's portrait. BD-5 is a collectible variety and most easily identifiable with star 13 away from the bust and the star touching the back of the eagle's neck. It is scarce in this condition, however. NGC ID# 25NW, PCGS# 45595 Base PCGS# 8082

### 1805 Five Dollar, AU53 BD-2, Early Die State

- 4743** 1805 BD-2, R.4, AU53 NGC. Bass-Dannreuther Die State d/a. LI in LIBERTY is rusted, but the obverse remains unclashed. The crack through the 0 in the date first appears on the late-state BD-1 coins, which share the same die. The reverse, which would be used on four more 1805 and 1806 marriages, is in its earliest stage. John Dannreuther suggests 100 to 150 example of this scarce variety survive. Violet accents appear over the lightly worn high points, while the rest of this early half eagle displays medium yellow-gold color. Smooth with traces of remaining mint luster. NGC ID# 25P4, PCGS# 45616 Base PCGS# 8088

- 4744** 1807 Bust Right, BD-1, High R.4 — Ex-Jewelry — ANACS. XF45 Details. Dannreuther Die State c/d. The terminal die state with a cud over the T in UNITED. This orange-gold final-year Bust Right half eagle is nicely defined and displays hints of luster within the wings and curls. The surfaces are mildly bright and microgranular, but do not show the abrasions usually associated with jewelry usage.

**1809/8 BD-1 Five Dollar, MS61  
Better Draped Bust Date**

**4745** 1809/8 BD-1, High R.3, MS61 NGC. Bass-Dannreuther Die State b/b. A charming honey-gold representative that has a mark-free reverse and a lightly abraded obverse. Luster illuminates the borders and devices. The strike is generally good, though the high points of the portrait and eagle show minor blending. BD-1 is the sole 1809-dated die marriage, and it is considerably scarcer than the 1807 BD-8 or 1810 BD-4, the usually encountered Draped Bust Left varieties. The John Reich design can be collected as a six-piece date set, 1807 through 1812, though certain die pairings are out of reach, especially the 1810 BD-3.

*From The Jersey Shore Gold Collection.* NGC ID# BFXK, PCGS# 507603 Base PCGS# 8104

**1812 Capped Bust Left Half Eagle, AU58  
Wide 5D, BD-1 Variety**

**4746** 1812 BD-1, R.3, AU58 PCGS. Bass-Dannreuther Die State a/a. The widely spaced 5D in the denomination identifies the more available BD-1 variety, with a surviving population of 300-450 examples in all grades. The lightly abraded orange-gold surfaces of this impressive near-Mint specimen retain much of their original mint luster and the strongly impressed design elements show just a trace of high-point wear. NGC ID# 25PL, PCGS# 507601 Base PCGS# 8112

**1813 Five Dollar, AU53  
Better BD-2 Variety**

**4747** 1813 BD-2, R.4, AU53 NGC. Bass-Dannreuther Die State d/b. The more elusive of the two varieties for the year, distinguished by the position of the first S in STATES relative to the banner below. A moderately circulated example with an incomplete strike on the central reverse. The apricot-gold surfaces are generally smooth, though we note a faint field scuff between stars 11 and 12. *Ex: Long Beach Signature (Heritage, 5/2008), lot 3188; Dallas Signature (Heritage, 10/2008), lot 2048; Boston ANA Signature (Heritage, 8/2010), lot 5918, which realized \$6,900.* NGC ID# 25PM, PCGS# 45648 Base PCGS# 8116

**CLASSIC HALF EAGLES**

**4748** 1836 AU58 NGC. Breen-6509, McCloskey 2-A, R.4. A better die marriage distinguished by vertical cracks through the eagle's neck and the T in LIBERTY. Luster dominates the borders and motifs of this near-Mint Classic half eagle. The apricot-gold surfaces are surprisingly smooth, with only a slight rim knock noted above the second S in STATES. NGC ID# 25RY, PCGS# 8174

**1837 Classic Head Five, AU58  
Lustrous and Attractive**

**4749** 1837 AU58 NGC. Breen-6511, McCloskey 1-A, R.4. Large Date, Block 8. The 1837 half eagle as a date is scarce in Mint State, and high-end AU coins are only marginally more plentiful. This lustrous yellow-gold coin has near-Mint detail and shows little high-point friction. The surfaces are smooth and attractive, complementing sharply struck design elements. NGC ID# 25RZ, PCGS# 8175

**4750** 1838 AU58 NGC. Breen-6514, McCloskey 1-A, R.2. Large Arrows, Small 5. The D is left under the branch stem. Bright mint luster shines around the stars and reverse legends. Wheat-gold surfaces display small ticks but none of any singular significance. A well-struck Classic Head half eagle to represent the type. NGC ID# 25S4, PCGS# 8176

## LIBERTY HALF EAGLES

### 1840-C Five Dollar, AU53 Low Mintage, CAC Seal

- 4751 1840-C AU53 PCGS. CAC. Variety 2.** Spindly die lines near the eagle's legs distinguish Variety 2 from the similar Variety 1. A lightly circulated apricot-gold half eagle without any singularly consequential abrasions. An early Charlotte issue with a meager mintage of 18,992 pieces. CAC has confirmed just 15 examples in all grades. Population: 12 in 53, 30 finer. CAC: 1 in 53, 7 finer (3/19). NGC ID# 25VD, PCGS# 8196

### 1842-C Small Date Half Eagle, VF Details Rare Charlotte Issue

- 4752 1842-C Small Date — Altered Surfaces — PCGS Genuine. VF Details. Variety 1.** The Small Date 1842-C half eagle is significantly scarcer than the Large Date issue, with only 60 to 80 pieces believed known in all grades, according to Doug Winter. Winter writes in *Gold Coins of the Charlotte Mint*, third edition, "The 1842-C Small Date is the rarest half eagle from this mint and the rarest collectible coin from Charlotte." The VF-level coin offered here is well-detailed and displays pleasing olive-gold and honey coloration. The surfaces are microgranular when viewed with a loupe, preventing a numeric grade from PCGS.

### 1842-D Half Eagle, AU55 Small Date, Well Struck

- 4753 1842-D Small Date AU55 NGC. Variety 7-E.** A minimally worn Choice AU Dahlonega half eagle, desirable for type purposes since the strike is sharp by the standards of the branch facility. The chestnut-gold surfaces show relatively few marks, aside from a few delicate hair-thin lines near the left (facing) wing. The mintage of 59,608 pieces was divided into Small and Large Date varieties, with the former more available to today's collectors. Census: 25 in 55, 38 finer (3/19). NGC ID# 25SX, PCGS# 8210

### 1843-C Half Eagle, XF40 Hard to Find So Fine

- 4754 1843-C XF40 NGC. CAC. Variety 2.** This die marriage is identified by the mintmark placed slightly further left than Variety 1 with a spur from the right base of the E in AMERICA. Originality and eye appeal are the hallmarks of this CAC-approved Charlotte half eagle. Winter explains that similarly attractive examples in the VF to XF range are "extremely hard to find." Deep red and olive-gold hues color each side. The rims and most border elements show strong detail, but the centers are soft. A singular rim nick occurs near star 4. CAC: 2 in 40, 14 finer (3/19). NGC ID# 429H, PCGS# 8214

- 4755 1843-O Small Letters XF45 PCGS. CAC. Variety 2.** Small O mintmark. An early die state with crisp upper stars and no crack through star 12. The Small Letters variant is scarcer than its Large Letters counterpart. Only 80 to 90 pieces are believed extant in all grades. This is an original, lightly abraded Choice XF survivor with partial luster and lovely green-gold color. Population: 15 in 45, 22 finer. CAC: 3 in 45, 5 finer (2/19). NGC ID# 25T5, PCGS# 8217

### 1844-D Five Dollar, AU58 Remarkably Well-Struck

- 4756 1844-D AU58 PCGS. Variety 12-G.** This new and rare variety shows the date slightly further left with the second 4 evenly positioned between Liberty's neck truncation and the dentils. Boasting a mintage of 88,982 coins, the 1844-D is one of the more accessible D-mint fives. This is a remarkably well-struck near-Mint example with semireflective wheat-gold surfaces. The reverse is in a late die state with cracks through the legend. Population: 18 in 58, 25 finer (3/19). NGC ID# 25T9, PCGS# 8221

- 4757 1844-O AU58 NGC. Variety 1.** Eight die marriages are known for the 1844-O, which ranks among the more available New Orleans No Motto half eagle issues. This nicely struck example has a few thin parallel lines on the chin but shows few abrasions overall. The olive-gold surfaces are slightly subdued. NGC ID# 25TA, PCGS# 8222

**1845 Half Eagle, MS61  
Rare CAC-Approved Example**

**4758 1845 MS61 PCGS. CAC.** One of the more plentiful No Motto half eagles in high grade, the 1845 is nonetheless scarce in Mint State. This CAC-endorsed coin is attractive for the grade, showing only light field chatter. The strike is sharp, and the lustrous surfaces display pleasing straw-gold color. Population: 10 in 61, 42 finer. CAC: 2 in 61, 11 finer (3/19). NGC ID# 25TB, PCGS# 8223

**4759 1846 Large Date MS61 PCGS.** A rare Mint State example of this early Liberty Head issue, showing prooflike fields and sharp design elements. The bright yellow-gold surfaces have light field chatter that limits the grade but is not overly bothersome. Population (Large Date): 9 in 61, 14 finer (3/19). NGC ID# 25TF, PCGS# 8226

**4760 1847 MS61 PCGS. CAC.** The 1847 is among the more plentiful No Motto Liberty half eagles, ideal for type representation. However, few pieces are CAC endorsed in Mint State. This example is well-struck and lustrous with bright yellow-gold surfaces and light abrasions. The obverse die is terminally cracked from the obverse rim at 11 o'clock, through Liberty's hair and neck, to the rim below the 4 in the date. A second crack joins the first at the E in LIBERTY and connects to the rim at 1 o'clock. NGC ID# 25TL, PCGS# 8231

**1849-D Half Eagle, Choice AU  
Sharp for a Dahlonega Five Dollar**

**4761 1849-D AU55 NGC. Variety 25-S.** The usual variety shows the D mintmark centered between the fletching and branch stem. Definition is outstanding for a Dahlonega half eagle. The stars display full radials, and the hair curls and feathers are crisp. Even the veins on the olive leaves are clear. Each side exhibits bright yellow-gold color and myriad abrasions. From a mintage of 39,036 pieces, of which likely fewer than 200 coins survive. Census: 36 in 55, 24 finer (3/19). NGC ID# C5XE, PCGS# 8242

**4762 1850-C Weak C — Reverse Scratched — NGC Details. AU. Variety 4.** A short scrape and some adjacent small marks beneath OF angle toward the eagle's head and account for the NGC Details grade. About Uncirculated sharpness exists on the lightly abraded greenish-gold surfaces, which retain brief instances of mint luster. A few light rim ticks are noted. This 1850-C has its mintmark lightly impressed into the working die, with the date positioned far to the left and the faint mintmark far to the right. NGC ID# 25U2, PCGS# 98244 Base PCGS# 8244

**1850-D Liberty Half Eagle, AU50  
Elusive Underrated Issue**

**4763 1850-D AU50 PCGS. CAC. Variety 28-V.** From a small mintage of 43,984 pieces, the 1850-D Liberty half eagle is an underrated rarity in the Dahlonega series. This impressive AU specimen shows only light wear on the well-detailed design elements. The mintmark is in low relief, but not incomplete or weakly impressed. The lightly abraded orange-gold surfaces retain a few hints of original mint luster. Population: 26 in 50, 33 finer. CAC: 3 in 50, 5 finer (3/19). NGC ID# 25U3, PCGS# 8245

**4764 1851-D XF40 PCGS. Variety 31-W.** A pumpkin-gold Dahlonega type coin that has a few freckles of ebony patina on device high points. The slightly glossy surfaces show few marks save for a line between stars 12 and 13. The eagle's neck and lower body, as well as Liberty's curls, exhibit a strike typical of the remote branch facility. NGC ID# 25U8, PCGS# 8248

**1851-D Five Dollar, AU53  
Scarce Date, Rare Die Combination**

**4765 1851-D AU53 NGC. Variety 30-V.** A rare variety, showing the only documented use of the obverse die, which is distinctive for the far-left placement of the date. The reverse was used for two varieties in 1851, and it shows the mintmark far right, touching the branch stem. As a date, the 1851-D half eagle is scarce. Doug Winter estimates that only 135 to 185 pieces are extant. This AU-level coin has bright yellow-gold patina and is deficiently struck in the centers, as is normal for the date. Winter writes: "The 1851-D is one of the more poorly struck Dahlonega half eagles from the 1850's." Scattered abrasions accompany slight high-point wear but do not detract. NGC ID# 25U8, PCGS# 8248

**1851-D Half Eagle, AU53  
Partial Mint Luster**

- 4766 1851-D AU53 PCGS. Variety 31-W.** A peach-gold representative that shows the usual incompleteness of strike on the curls and the lower portion of the eagle. Marks are limited to a few hair-thin lines beneath the beak. The 1851-D is a popular issue for Dahlonega type collectors. Four die marriages are known, among which Variety 31-W appears often. It is attributed by the mintmark location, close to (but not touching) the bottom of the fletching. NGC ID# 25U8, PCGS# 8248

- 4767 1852-C AU50 PCGS. Variety 1.** Peach-gold and sea-green toning enrich this lightly hairlined and inoffensively abraded Charlotte Mint type coin. The strike is crisp by the standards of the branch facility, and the original eye appeal is imposing. NGC ID# 25UB, PCGS# 8251

**1852-C Five Dollar, AU53  
Original Charlotte Type Coin**

- 4768 1852-C AU53 NGC. Variety 2.** The scarcer of the two 1852-C die marriages, with the date set furthest left. Attractive orange-gold toning accompanies lightly marked surfaces, though we mention a tick on star 5 and a minor obverse rim bump at 5:30. A good strike for a Charlotte half eagle, with only slight blending on Liberty's curls and the eagle's neck.

*Ex: Central States Signature (Heritage, 5/2007), lot 3619, which realized \$2,530.*

**From The Jersey Shore Gold Collection.** NGC ID# 25UB, PCGS# 8251

**1852-D Five Dollar, AU53  
Popular D-Mint Issue**

- 4769 1852-D AU53 NGC. Variety 32-V.** The 1852-D is one of the more frequently encountered D-mint fives, its collectibility (in this case) reliably indicated by the mintage of 91,584 pieces. It is popular for type purposes because of the number of coins available in grades up to AU53. As always, the strike is soft but considerable remaining mint luster surrounds the devices. While lacking the often-seen heavy abrasions, close examination shows a number of small, individually insignificant marks. Original orange-gold color. NGC ID# 25UC, PCGS# 8252

**1853-C Five Dollar, AU55  
Luster Remains**

- 4770 1853-C AU55 NGC. Variety 1.** An early die state without the cud(s) that later form at the upper obverse. The 1853-C is considered one of the more collectible North Carolina fives, but only 300 or so examples probably survive. To be sure, demand exceeds supply. There should be multiple collectors vying for this Choice AU representative. Luster remains throughout the abraded medium yellow-gold surfaces. Detail is better on the reverse than the obverse. NGC ID# 25UE, PCGS# 8254

**1853-D Half Eagle, XF45  
Bold Orange-Gold Example**

- 4771 1853-D Large D XF45 PCGS. Variety 35-X.** Varieties 34-X and 35-X are very similar. They share a common reverse with the mintmark mostly over the V in FIVE. This obverse die has the date marginally better-centered (slightly further right). The 1853-D is the most collectible half eagle from this facility in all grades. The present Choice XF survivor has deep orange-gold color and strong definition from the centers to the denticles. Lightly worn and abraded with an arching die crack on the reverse from the U in UNITED through the leaves, fletchings, feathers, and arrowheads to the R in AMERICA. NGC ID# 25UF, PCGS# 8255

**1853-D Five Dollar, AU55  
Dahlonge Type Coin**

- 4772 1853-D AU55 NGC. Variety 34-Y.** This Choice AU example has some weakness along the left obverse and upper reverse dentils, although the remainder of each periphery is sharp. In the obverse margin, select border stars are weak. On the central devices, mild weakness appears only on the hair curls around Liberty's face and on the eagle's talons. Each side has bright greenish-gold patina with luster in the fields. Scattered light abrasions are not bothersome. NGC ID# 25UF, PCGS# 8255

**1853-D Five Dollar, MS61  
Attractive Mint State Example**

- 4773 1853-D MS61 NGC. Variety 35-X.** The 1853-D is one of the more available Dahlonge half eagles, with a mintage of 89,678 pieces several Mint State survivors. This is a pleasing MS61 example. Smooth, satiny surfaces show a minimum number of tiny marks for the grade, while the strike is sharp except at star 7 and the eagle's claws and arrow fletchings. Gleaming honey-gold color with attractive mint luster glows from each side. The rims and dentils are sharp on both the obverse and reverse, a characteristic of the scarce 35-X die variety. Census (all varieties): 22 in 61 (1 in 61+), 15 finer (2/19).  
*From The Jersey Shore Gold Collection.* NGC ID# 25UF, PCGS# 8255

- 4774 1854 MS61 NGC.** The 1854 half eagle is scarce in Mint State but collectible as a type coin. This piece displays natural wheat-gold luster and well-struck devices. Grade-limiting chatter in the fields limits the grade from NGC. Census: 14 in 61, 30 finer (2/19). NGC ID# 25UG, PCGS# 8256

- 4775 1854-C XF40 NGC. Variety 1.** Just 39,283 pieces were struck, a factor that helps make the 1854-C one of the two scarcest Charlotte Mint half eagles of the 1850s (the other is the 1856-C). This XF example displays the deep, greenish-gold color that suggests the natural coloration of most 1854-C half eagles. Orange accents surround the raised devices. Light abrasions include a Y-shaped pincscratch on Liberty's chin. Census: 9 in 40, 81 finer (2/19). NGC ID# 25UH, PCGS# 8257

**1855-S Five Dollar, AU58  
Rarely Offered This Fine**

- 4776 1855-S AU58 NGC.** The 1855-S half eagle is a rarity in the upper AU grades, and only a handful of Uncirculated pieces are reported. This near-Mint example is sharp and boasts original rose-gold and olive coloration. Barely a trace of high-point friction is discernible, although chatter in the fields likely contributes to the grade. Census: 15 in 58, 3 finer (3/19). NGC ID# 25UU, PCGS# 8265

**1856-C Five Dollar, AU58  
High-End With CAC Approval**

- 4777 1856-C AU58 PCGS. CAC. Variety 1.** Although it claims a higher mintage than the 1856-D, this Charlotte issue is roughly as scarce as its Southern counterpart. The 1856-O is considerably scarcer than either of the two. Most 1856-C fives survive in XF through AU grades, with the average coin falling fractionally shy of AU50. Mint State survivors are rare; Winter estimates just six or seven examples qualify as Uncirculated. This high-end AU58 boasts CAC approval and original, partly lustrous olive and red-gold color. Well-struck and virtually unworn with scattered abrasions. Population: 13 in 58, 8 finer. CAC: 4 in 58, 1 finer (3/19). NGC ID# 25UW, PCGS# 8267

**1857-S Five Dollar, Near-Mint  
Ex: S.S. Central America**

- 4778 1857-S AU58 PCGS. Ex: S.S. Central America.** Although not the denomination typically associated with the S.S. Central America, this attractive half eagle hails from that shipwreck. Judging by the light friction on Liberty's eyebrow and hairbun, this partly lustrous coin may have been brought aboard by a passenger. The predominantly peach-gold surfaces show rose-violet accents at the upper right and lower obverse. This lot comes with a certificate of authenticity signed by famous former fugitive Tommy Thompson, and a blue faux *Ship of Gold* book.  
*Ex: Central States Signature (Heritage, 4/2008), lot 3473, which realized \$7,475.* NGC ID# CBE7, PCGS# 8275

**1858-D Half Eagle, AU50  
Difficult Dahlonega Issue**

**4779 1858-D AU50 NGC. Variety 43-HH.** Mintages of half eagles at Dahlonega dropped annually between 1852 and 1859, an indication that the Georgian gold mines yielded diminishing returns. The 1858 production was 15,362 pieces, about one-sixth of 1852 coinage. Not surprisingly, the 1858-D is rare, particularly with attractive sun-gold surfaces and plentiful peripheral luster. The curls are lightly brought up, as usual for the facility. NGC ID# CBBT, PCGS# 8278

**4780 1859 AU55 NGC.** The 1859 Liberty Head five is scarce overall and a major rarity in Mint State. This collectible AU55 example displays sharp detail and partial luster amid natural olive-gold patina. Each side is moderately abraded, although such is typical of the issue. Census: 16 in 55, 21 finer (2/19). NGC ID# 25VB, PCGS# 8280

**4781 1859-C — Cleaned — NGC Details. XF. Variety 2.** The 1 is centered between two dentils, as is the knob of the 9. This is one of few more than 225 pieces extant from a mintage of 31,847 coins. Yellow-gold surfaces are abraded and unnaturally subdued. Obverse detail is better than the reverse, where the eagle is typically mushy. NGC ID# 25VC, PCGS# 8281

**4782 1859-C XF40 NGC. Variety 1.** The orange-gold centers are framed by cherry-red borders. The 1859-C is notorious for soft definition on the eagle, caused by an improperly annealed reverse die. However, glimpses of luster within protected areas elsewhere throughout both sides confirm that this coin shows only moderate wear. *Ex: Houston Signature (Heritage, 12/2013), lot 5034.* NGC ID# 25VC, PCGS# 8281

**4783 1860 AU55 NGC.** Only 19,763 half eagles were struck at Philadelphia in 1860, and this issue is scarce in high grade today. Mint State coins are rare. This Choice AU representative displays natural olive-gold patina and sharp detail. Light surface chatter appears on each side. Census: 41 in 55 (2 in 55+★), 33 finer (3/19). NGC ID# 25VF, PCGS# 8284

**4784 1860-D Medium D VF25 NGC.** The 1860-D is relatively available for a Dahlonega half eagle — moreso than its mintage of 14,635 pieces suggests — but it is rare in lower circulated grades such as the VF25 level. This coin is apparently the sole NGC-graded example of the grade (3/19). Smooth wear accompanies myriad small marks, which are lessened in their severity by a long time in circulation. Pleasing orange accents remain at the margins of this medium-gold coin, which retains its wide rims and strong peripheral detail. NGC ID# 25VH, PCGS# 8286

**1860-D Half Eagle, MS61  
Reflective Fields**

**4785 1860-D Medium D MS61 PCGS.** All Mint State 1860-D half eagles certified by PCGS are of this Medium D variety, and these pieces are conditionally rare. Doug Winter estimates that fewer than 275 examples of this issue survive in all grades, with as few as a dozen pieces being in true Uncirculated condition. Some duplication is likely represented in the certified population figures. The present coin displays sharp obverse stars and hair curls and is undeniably Mint State. Strike weakness on the eagle's neck is not bothersome. The bright straw-gold surfaces are lightly marked but lack severe abrasions. An appealing Mint State Dahlonega half eagle. Population: 12 in 61, 16 finer (3/19). NGC ID# 25VH, PCGS# 8286

**4786 1860-S — Cleaned — NGC Details. AU.** An early San Francisco issue, the 1860-S is even scarcer than suggested by its mintage of 21,200 pieces. As of (2/19), NGC and PCGS combined have graded just 102 examples, many undoubtedly resubmissions over the past third-century. The caramel-gold surfaces are somewhat glossy and bright, but wear is minimal, and the only relevant marks are relegated to the right obverse field. NGC ID# 25VJ, PCGS# 8287

**4787 1861 MS61 PCGS. CAC.** Original peach-gold and light orange luster adorns this CAC-endorsed Mint State coin. The strike is sharp and only light surface chatter limits the grade. Although the 1861 half eagle is among the more plentiful No Motto issues in Mint State, CAC-approved examples are scarce. CAC: 10 in 61, 40 finer (3/19). NGC ID# 25VK, PCGS# 8288

**4788 1861 MS62 NGC.** A plentiful date among No Motto half eagles, the 1861 is popular as a type coin. This piece is sharp and lustrous with natural wheat-gold coloration. Scattered abrasions limit the grade but all are light and unobtrusive. NGC ID# 25VK, PCGS# 8288

**1861 Half Eagle, MS63  
Important No Motto Issue**

**4789 1861 MS63 PCGS. CAC.** In the early days of the Civil War, most coinage issues saw diminished production, but the 1861 half eagle had the second highest production of any issue from the denomination behind the 1847. In fact, the 1847 and 1861 half eagles kept their mintage position through 1879. This lovely Select Mint State piece has brilliant yellow luster and frosty golden surfaces that exhibit only trivial marks of little consequence. Population: 48 in 63, 48 finer (3/19). NGC ID# 25VK, PCGS# 8288

- 4790 1868 AU53 NGC.** The 1868 has a tiny business mintage of 5,000 pieces, since gold coins were hoarded except in the West. Survivors are rare in all grades, since the few contemporary collectors set aside proofs. The present lightly circulated representative exhibits ample peach-tinged luster. The sole mentionable mark is a dull line over the right (facing) wing. NGC ID# 25W5, PCGS# 8315

**1875-CC Half Eagle, VF30  
Variety 2-C**

- 4791 1875-CC VF30 PCGS. Variety 2-C.** There are three varieties identified for this CC issue, and a fourth may exist but has not been seen. This example has the usual scattered marks expected for the grade level. Traces of luster appear on the honey-gold surfaces of this scarce Carson City Min half eagle. Population: 11 in 30, 49 finer (3/19). NGC ID# CFHH, PCGS# 8337

**1876 Half Eagle, AU55  
Sought-After Low-Mintage Issue**

- 4792 1876 AU55 NGC.** The 1876 Liberty half eagle boasts an extraordinarily low business-strike mintage of 1,432 pieces, making the date rare in all grades. A good amount of luster remains on the peach-gold surfaces of this Choice AU specimen. The devices are well-struck, the sole exception being the typical softness on the eagle's neck feathers. Census: 6 in 55, 11 finer (2/19).  
*Ex: FUN Signature (Heritage, 1/2014), lot 6736, realized \$5,875.*  
NGC ID# 25WW, PCGS# 8339

**1879 Half Eagle, Razor-Sharp MS64+  
Semiprooflike Tendencies**

- 4793 1879 MS64+ PCGS. CAC.** Razor-sharp devices appear throughout lively peach-gold surfaces. Frosty mint luster rolls over each side, yet the fields maintain semiprooflike tendencies that further the CAC-approved eye appeal. Quality within the grade is excellent. Anything even marginally finer would easily qualify for a Gem assessment. Population: 20 in 64 (7 in 64+), 6 finer. CAC: 13 in 64, 1 finer (3/19). NGC ID# 25X7, PCGS# 8348

**1879-CC Five Dollar, VF30  
Smooth Collector Coin**

- 4794 1879-CC VF30 PCGS. CAC. Variety 1-A.** A remarkably smooth, well-detailed VF30 example of this better Carson City issue, showing attractive olive-gold surfaces. The CAC endorsement is well-earned. Only 17,281 half eagles were struck at Carson City in 1879, and the issue circulated extensively. Mint State coins are rare and nice AU pieces are scarce. This collector-grade coin possesses impressive eye appeal for the grade. NGC ID# 25X8, PCGS# 8349

- 4795 1880-CC XF45 NGC. Variety 1-A.** Light apricot patina accompanies unblemished surfaces. Glimmers of luster surround the stars and fill the legends. The wings are well defined, though Liberty's hairbun and eyebrow display wear. The '80-CC is more available than earlier Carson City half eagle issues, yet is rare relative to its high-mintage Philadelphia cousin. NGC ID# 25XB, PCGS# 8352

**1882 Half Eagle, MS65  
Seldom Seen in Gem Condition**

- 4796 1882 MS65 NGC.** Lustrous and strongly struck with a clean reverse and only minor obverse grazes. Rim crumbling, unusual for the series, is present on the obverse between 12 and 2 o'clock. The high-mintage 1882 is plentiful in typical Mint State, but emerges as a conditional rarity at the MS65 level. Census: 36 in 65 (1 in 65+), 2 finer (3/19). NGC ID# 25XJ, PCGS# 8358

**1883-CC Five Dollar, AU58  
Conditionally Challenging CC-Mint Issue**

- 4797 1883-CC AU58 NGC. Variety 1-A.** A better Carson City date, rarely seen in any Mint State grade. High-end AU coins are scarce themselves, but they are at least collectible for most enthusiasts. This near-Mint coin displays a sharp strike and partially lustrous yellow-gold surfaces. Only light high-point friction is seen. Census: 20 in 58 (1 in 58+), 8 finer (3/19).  
*From the Lake County Collection.* NGC ID# 25XL, PCGS# 8362

**1885-S Five Dollar, MS65+  
Frosty San Francisco Representative**

- 4798 1885-S MS65+ NGC.** Luminous frost shines from this Plus-graded Gem half eagle struck at the San Francisco Mint. Definition is nearly complete, and each side gleams with eye-catching peach-gold color. A mark on star 4 and a thin line below star 8 are the only flaws that stand in the way of an even higher grade. NGC reports 13 finer submissions (3/19). NGC ID# 2Y7X, PCGS# 8368

**1885-S Five Dollar, MS65  
Popular Type Issue**

- 4799 1885-S MS65 NGC. CAC.** The 1885-S is an appealing issue for type purposes since it is squarely positioned in the middle of the 1880s and it also has a mintage in excess of 1.2 million pieces. This is an exceptionally attractive Gem whose surfaces display rich frosted mint luster and even, light reddish-gold color. The strike is strong throughout (but not quite complete), and there are only the slightest abrasions present. NGC ID# 2Y7X, PCGS# 8368

**1890-CC Five Dollar, MS61**

- 4800 1890-CC MS61 NGC. Variety 1-A.** Luster dominates the borders and devices of this pale peach-gold Carson City type coin. The strike is good, though shy of complete on the eagle's neck plumage and fletchings. No marks are remotely consequential. A mintage of 53,800 pieces ensures better-date status, though a few hundred pieces have survived in Mint State, making the issue accessible to the advanced collector. NGC ID# C5XF, PCGS# 8376

**1891-CC Half Eagle, MS62  
Frosted Wheat-Gold Example**

- 4801 1891-CC MS62 NGC. Variety 2-A.** The second 1 in the date is slightly recut at the top, and the center fold of the banner below WE is incomplete to confirm the variety. Unlike most Carson City gold, the 1891-CC is readily available even in Mint State grades up to the Choice Uncirculated level. This heavily frosted example grades a lustrous and sharp MS62, with wheat-gold coloration and essentially full details. Marks are limited to some light luster grazes and numerous tiny ticks. NGC ID# 25Y5, PCGS# 8378

**1891-CC Half Eagle, MS62  
Popular Carson City Type Coin**

- 4802 1891-CC MS62 PCGS. Variety 2-A.** A coruscating butter-gold Carson City type coin. The well-struck surfaces display distributed grazes that correspond to the MS62 level. Shallow strike-throughs near the FI in FIVE are as produced, and do not distract. Minor repunching on the flag of the second 1 in the date is diagnostic for Variety 2-A. The two die marriages are approximately equal in scarcity. NGC ID# 25Y5, PCGS# 8378

**1891-CC Five Dollar, MS62  
Sharp Candidate for Carson City Type**

- 4803 1891-CC MS62 PCGS. Variety 1-A.** The mintage of 208,000 pieces was high for the Carson City Mint, making the 1891-CC half eagle an ideal candidate for CC type. Pleasing greenish-gold surfaces are less abraded than usually seen for the issue, and a sharp strike adds to the considerable eye appeal. Fleeting traces of prooflike surface remain on both sides.  
*From The Morris Collection.* NGC ID# 25Y5, PCGS# 8378

---

1891-CC Five Dollar, Well-Struck MS62

- 4804 1891-CC MS62 PCGS. Variety 2-A.** The top of the second 1 is slightly repunched on Variety 2-A. With 208,000 pieces minted, the 1891-CC serves as the best type-coin issue among Carson City fives. This is a lustrous Uncirculated representative with frosty wheat-gold surfaces that show normal abrasions for the grade. Full radials appear on the stars. The feathers, fletchings, talons, and olive leaves are similarly strong. NGC ID# 25Y5, PCGS# 8378

---

1891-CC Five Dollar, MS63  
Ideal for Carson City Type

- 4805 1891-CC MS63 PCGS. Variety 1-A.** Radiant orange-gold luster gleams from this crisply struck and minimally abraded half eagle. Although the 1891-CC is one of the more available gold issues from the Carson City mint, most of these pieces are seen in About Uncirculated or bagmarked, lower-grade Uncirculated condition. Select Carson City gold coins of any date or denomination are highly coveted by those assembling quality type sets from the legendary Nevada Mint.

*Ex: Portland Signature (Heritage, 3/2004), lot 6247. NGC ID# 25Y5, PCGS# 8378*

- 4806 1892-CC MS61 PCGS. Variety 1-A.** Only tiny marks infiltrate the smooth and impressive surfaces of this needle-sharp five dollar gold. Soft mint luster glows beneath pleasing straw-gold coloration. The 1892-CC becomes truly scarce at the MS62 level and is rare at the MS63 grade. This attractive MS61 is an ideal alternative to higher-graded pieces that may not be as sharp or free of bagmarks. Population: 45 in 61, 67 finer (2/19). NGC ID# 25Y7, PCGS# 8380

- 4807 1892-CC MS61 NGC. Variety 1-A.** This charming, butter-gold example displays partially prooflike fields and outstanding surfaces for the assigned grade. There are no notable marks, and the strike is consistent throughout. Among the four Carson City issues from the 1890s, the 1892-CC is scarcest in better Mint State grades. NGC ID# 25Y7, PCGS# 8380

---

1894 Half Eagle, MS66+  
Among the Finest Known

- 4808 1894 MS66+ PCGS.** The 1894 is one of the important condition rarities in the Liberty half eagle series. The mintage was high enough, with 957,880 circulation strikes produced throughout the year. However, perusal of the PCGS population data reveals that this issue is rarely found in grades finer than MS63. PCGS has certified 71 in MS64 and only eight coins finer than that grade. This example features a bold strike and highly lustrous surfaces that exhibit brilliant light yellow frost on both sides. This is an extremely important opportunity for the advanced collector. Population: 3 in 66 (2 in 66+), 1 finer (3/19). NGC ID# 25YE, PCGS# 8387

- 4809 1894-O MS61 NGC. Variety 2.** The mintmark is centered between the VE in FIVE. Variety 1, which has the mintmark over the V, is about twice as available as Variety 2. The sun-gold surfaces show luster and a modicum of small abrasions. The 1894-O is the third and final New Orleans Motto five dollar issue, and has a low mintage of 16,600 pieces. NGC ID# 25YF, PCGS# 8388

**1899 Five Dollar, Lustrous MS66  
Only Two Coins Finer at PCGS**

- 4810 1899 MS66 PCGS.** A conditionally scarce Premium Gem example of this popular type coin issue, showing a sharp strike and frosty mint luster. Honey-gold interiors transition to greenish-gold borders, complementing a lack of notable abrasions. The 1899 half eagle is rarely offered finer than the current example. Population: 31 in 66 (3 in 66+), 2 finer (2/19). NGC ID# 25YS, PCGS# 8398

**1901/0-S Half Eagle, FS-301, MS65  
Collectible Guide Book Overdate**

- 4811 1901/0-S FS-301 MS65 NGC.** One of the few collectible overdates in the Liberty Head half eagle series, and highly collectible as such. The underlying 0 is clear beneath the final 1 on this frosty Gem. Strongly struck throughout the yellow-gold surfaces with minimal chatter. Die cracks appear on each side. Census: 23 in 65, 4 finer (3/19). NGC ID# 25YX, PCGS# 145720 Base PCGS# 8403

- 4812 1901-S MS66 PCGS.** A frosty Premium Gem example of this plentiful type coin issue, seldom offered in this lofty grade. The central devices are sharp, although the border stars exhibit moderate weakness. A few tiny ticks on Liberty's portrait are only seen with a glass. Population: 84 in 66 (12 in 66+), 3 finer (3/19). NGC ID# 25YX, PCGS# 8404

**1901-S Five Dollar, MS66+  
Type Coin Candidate**

- 4813 1901-S MS66+ PCGS.** An available date, suitable for type purposes, the 1901-S is conditionally scarce in MS66 and rare finer. This Plus-graded piece displays a sharp strike and softly frosted yellow-gold luster. A lone mark on Liberty's nose prevents a finer grade. Eye appeal is outstanding. Population: 84 in 66 (12 in 66+), 3 finer (3/19). NGC ID# 25YX, PCGS# 8404

**1903-S Half Eagle, MS66+  
Only One Finer at PCGS**

- 4814 1903-S MS66+ PCGS.** The 1903-S half eagle had the second highest mintage of any 20th century coin in the Liberty Head series behind the 1901-S. Production totaled 1,855,000 coins in 1903. However, less than four dozen PCGS pieces survive in MS66 or finer grades. This example has a bold strike and frosty mint luster with hints of orange patina on minimally marked surfaces. Population: 34 in 66 (11 in 66+), 1 finer (3/19). NGC ID# 25Z3, PCGS# 8408

- 4815 1906-D MS65 NGC.** An attractive Gem representative of this popular type issue, with sharply detailed design elements throughout and well-preserved orange-gold surfaces that radiate vibrant mint luster, with terrific eye appeal. Census: 67 in 65 (1 in 65+), 9 finer (3/19). NGC ID# 25ZA, PCGS# 8414

**1907 Five Dollar, MS66+  
Full Strike, Clean Surfaces**

- 4816 1907 MS66+ PCGS. CAC.** Full strike definition will impress Liberty half eagle specialists and collectors looking for an attractive type coin. The near-total absence of obvious surface marks is arguably more remarkable, as the soft yellow-gold surfaces would have been prone to acquiring bagmarks and other abrasions. Bright, frosty, and undoubtedly on the cusp of an even higher numeric grade. Population: 30 in 66 (3 in 66+), 2 finer. CAC: 14 in 66, 3 finer (3/19). NGC ID# 25ZC, PCGS# 8416

- 4817 1907-D MS65 PCGS.** Beautiful yellow-gold and peach-rose hues adorn this Gem 1907-D Liberty half eagle, complementing sharp design elements and luminous fields. The coin is highly appealing and lacks mentionable abrasions. A perfect type coin. PCGS lists 21 finer representatives (3/19). NGC ID# 25ZD, PCGS# 8417

**1908 Liberty Half Eagle, MS66  
Radiant Peach-Gold Type Coin**

- 4818 1908 MS66 NGC.** Liberty Head half eagles in Premium Gem condition are elusive regardless of date. The final-year 1908 is scarce at this level and rare any finer, even though a healthy mintage of 421,874 coins was accomplished. Peach-gold color and radiant mint frost ensure excellent eye appeal. Boldly struck with insignificant ticks and grazes that require magnification. Census: 56 in 66 (2 in 66+, 1 in 66★), 8 finer (3/19). NGC ID# 25ZE, PCGS# 8418

**INDIAN HALF EAGLES**

**1908 Indian Half Eagle, MS65  
Glowing First-Year Type Coin**

- 4819 1908 MS65 PCGS.** Few issues serve as a better type coin than the 1908 — the inaugural Pratt half eagle. This Gem glows with radiant mint frost and showcases strong detail that collectors are sure to find appealing. Notably few abrasions appear over the warm sun-gold surfaces. Twenty five examples have been certified in higher grades at PCGS out of 577,800 pieces struck (3/19). NGC ID# 28DE, PCGS# 8510
- 4820 1908-D MS64 NGC.** With roughly 12 to 15 examples of the 1908-D known in Gem condition, most collectors opt instead for a pleasing MS64 representative. This satiny, well-struck half eagle shows rich red-gold color with lilac overtones. Tiny marks only become apparent under magnification. Just six coins are reported numerically finer at NGC (2/19). NGC ID# 93KW, PCGS# 8511
- 4821 1908-D MS64 NGC.** Although plentiful in this grade, the 1908-D half eagle is rare finer, with only six coins so graded at NGC (3/19). This near-Gem displays lustrous orange-gold surfaces and few abrasions. Slight strike weakness is evident on the lower headdress feathers, but it is not bothersome. NGC ID# 93KW, PCGS# 8511
- 4822 1908-D MS64 PCGS.** The 1908-D Indian half eagle comes from a mintage of only 148,000 coins. Examples are occasionally available in MS64, but Gems are rare. This near-Gem collector coin displays natural olive-gold and peach luster with minimal abrasions. The only significant strike weakness is on the lower headdress feathers. PCGS lists only 13 finer representatives (3/19). NGC ID# 93KW, PCGS# 8511

- 4823 1908-D MS64 NGC.** Rare in Gem condition, this near-Gem 1908-D flirts with a higher grade thanks to its attractive, orange-gold color and plentiful mint luster. A few streaks and speckles of olive-gray color temper the field luster to a small extent, with some light abrasions mixed in to account for the Choice Uncirculated grade. A sharp strike exists throughout both sides. NGC reports just six numerically finer examples (3/19). NGC ID# 93KW, PCGS# 8511

- 4824 1909 MS64 PCGS. CAC.** The 1909 Indian half eagle is readily collectible in grades up to the MS64 level, but finer examples are elusive. This attractive Choice specimen offers sharply detailed design elements and well-preserved yellow and rose-gold surfaces, with vibrant mint luster throughout. NGC ID# 28DH, PCGS# 8513

**1909 Five Dollar, MS65  
Clean, Lustrous Surfaces**

- 4825 1909 MS65 NGC.** For the type collector, the 1909 Indian half eagle, though not so heavily produced as its D-mint counterpart, is still one of the most accessible dates in Gem condition, being merely scarce rather than rare at that level. Still, “scarce” in the context of the series is challenging. This lovely MS65 example has bold orange-gold luster and crisp central design definition. Remarkably smooth surfaces show no more than a handful of tiny marks, mostly in unobtrusive parts of the reverse fields. Census: 56 in 65, 6 finer (3/19).  
Ex: FUN Signature (Heritage, 1/2010), lot 2199. NGC ID# 28DH, PCGS# 8513

**1909-D Half Eagle, MS65  
Bright Mint Luster**

- 4826 1909-D MS65 PCGS.** The two Indian Head five dollar gold issues most available in high grades are the 1908 and the 1909-D. Between MS60 and MS64, the latter edges out the former in terms of availability, but the tables turn in MS65 and MS66. A uniformly bold impression combines with bright mint luster and lovely yellow-gold coloration. Wonderfully preserved. Five submissions finer at PCGS (3/19). NGC ID# 28DJ, PCGS# 8514

**1909-O Indian Five, AU53**  
Seldom Encountered in High Grade

- 4827 1909-O AU53 NGC.** From a low mintage of 34,200 pieces, the 1909-O is the only Indian half eagle from the New Orleans Mint. From the last year of coinage operations at the famous Southern facility, the 1909-O is an elusive issue in high grade. This attractive AU53 specimen shows some light wear on the high points, like the eagle's shoulder, but the pleasing orange-gold surfaces retain much of their original mint luster. NGC ID# 25ZK, PCGS# 8515

**1909-O Half Eagle, AU55**  
Collector-Grade Example

- 4828 1909-O AU55 PCGS.** The 1909-O is the rarest Indian half eagle in Mint State, and attractive AU examples are highly sought-after. With a mintage of only 34,200 pieces, the 1909-O is the only New Orleans issue in the series. Coinage was halted in early 1909, as the use of the old Louisiana branch mint as a production facility was discontinued in favor of the new Denver Mint. The 1909-O half eagle is a major key date in the Indian Head series. This Choice AU representative displays natural orange-gold patina and sharp detail with just a brush of high-point wear. Remnants of satiny mint luster glow in the design recesses. NGC ID# 25ZK, PCGS# 8515

**1909-S Indian Half Eagle, MS62**  
Scarce in Mint State

- 4829 1909-S MS62 PCGS.** Half eagles were struck at all four operating mints in 1909. The 1909-S issue boasts a mintage of 297,000 pieces, although it is a condition key in Uncirculated grades. Of the four 1909 half eagles, only the New Orleans coin is rarer in Mint State. This collectible MS62 San Francisco coin displays a sharp strike and bright yellow-gold patina. Only a few light marks are apparent beneath a loupe. NGC ID# 25ZL, PCGS# 8516

**1909-S Indian Half Eagle, MS63**  
Scarce in All Uncirculated Grades

- 4830 1909-S MS63 PCGS.** The 1909-S half eagle is much scarcer than any 1909-S VDB cent, especially in high grades. It is one of the most difficult issues in this series to find in MS60 condition or finer. This is actually the first Select representative we have handled since 2016, and a similar opportunity may not arise for some time. The headdress feathers, talons, mintmark, and eagle's shoulder show pinpoint detail. Orange-gold surfaces show ticks on and around the portrait and behind the eagle's head. The PCGS Population Report lists 27 finer submissions (3/19). NGC ID# 25ZL, PCGS# 8516

- 4831 1910 MS64 PCGS.** The date and stars crowd the bottom edge, yet this near-Gem Indian five is brightly attractive with pleasing greenish-gold color and sharply struck devices. The smooth surfaces show only a few light marks and abrasions, while the eye appeal is far above average for the Choice Uncirculated level. This P-mint issue is deceptively scarce-to-rare any finer. NGC ID# 28DK, PCGS# 8517

**1910 Indian Half Eagle, MS64**  
Attractively Smooth Surfaces

- 4832 1910 MS64 NGC. CAC.** This Choice Uncirculated half eagle occupies the optimal collector-grade slot for those seeking a sharp and attractive Mint State Indian five. Lustrous, khaki-gold surfaces display a pinpoint-sharp strike and abrasions are nearly absent from the near-Gem surfaces. CAC endorsement is a challenge for 1910 half eagles at this level or finer, although this example clearly deserves the award. NGC reports just 35 numerically finer pieces. CAC: 46 in 64, 7 finer (3/19). NGC ID# 28DK, PCGS# 8517

- 4833 1910-D MS63 PCGS.** Lustrous medium-gold surfaces take on a greenish-gray tinge at the borders of this attractive Select Uncirculated 1910-D. The strike is sharp (as expected) for this well-produced Denver five, and abrasions are less than usual for the issue. We note a few light pinscratches in the reverse fields, including a short one that curves from the motto toward the eagle's neck. The natural color and sharp definition give this coin bold eye appeal. NGC ID# 28DL, PCGS# 8518

**1910-D Five Dollar, MS64  
Overlooked and Underappreciated Issue**

**4834 1910-D MS64 NGC.** Unlike the 1910-D eagle, the half eagle is a scarce and overlooked issue. Only 193,600 pieces were struck and high grade Mint State pieces are very elusive. Only 29 coins have been so graded by NGC with a mere four pieces in finer grades (3/19). Sharply struck, this piece has rich reddish tinged mint luster and there are no obvious abrasions on either side. NGC ID# 28DL, PCGS# 8518

**4835 1910-S MS62 PCGS.** Numerous abrasions usually limit the grade of 1910-S half eagles, which are scarce-to-rare in grades exceeding MS62. This piece has great eye appeal despite its conservative grade, with vibrant orange-gold color and lilac overtones throughout the fields. While several light abrasions and tiny marks exist, they are neither severe nor bothersome, and the strike lacks sharpness only at the high points of the headdress and the lower feathers. Eye appeal is excellent. NGC ID# 28DN, PCGS# 8519

**1911 Half Eagle, Lustrous MS65**

**4836 1911 MS65 NGC.** Any Gem Indian half eagle is a rarity, more or less, even though the 1911 half eagle at this grade level is more available than most issues in the series. This piece displays a better-than-expected strike on the obverse, which frequently shows a weak impression. The reverse is also bold, and lovely reddish-gold color and strong mint luster complete the eye appeal. Census: 50 in 65, 1 finer (3/19).

*Ex: FUN Signature (Heritage, 1/2012), lot 6428, where it realized \$8,912.50. NGC ID# 28DP, PCGS# 8520*

**4837 1911-D AU55 NGC.** A collector-grade AU example of this semikey Denver issue, showing original olive-gold patina in the fields with reddish tints in the design recesses. Wear is light and the surfaces are smooth. The mintmark is worn but visible with a loupe. NGC ID# 28DR, PCGS# 8521

**4838 1911-D AU55 ANACS.** Honey-gold toning graces this briefly circulated but well-defined better-date Indian five. Marks are limited to moderate contact on the upper right reverse field. Only 72,500 pieces were produced. Certified in a small-sized holder. NGC ID# 28DR, PCGS# 8521

**1911-D Half Eagle, AU58  
Mintage of 72,500 Coins**

**4839 1911-D AU58 NGC.** The mintmark appears faintly on this semikey Denver Mint half eagle. The important thing is that it is present, confirming this coin derives from a low mintage of 72,500 pieces. Olive-gold color is deeper on the reverse. Strike softness occurs on the lower headdress feathers and the tip of the eagle's wing, as usual. Lightly hairlined, but otherwise in above-average condition. NGC ID# 28DR, PCGS# 8521

**1911-D Half Eagle, AU58  
Better Denver Issue**

**4840 1911-D AU58 NGC.** A semikey date with a mintage of only 72,500 coins, the 1911-D Indian Head five is scarce in all mint State grades. This near-Mint collector coin displays satiny yellow-gold surfaces with little discernible friction. Well-struck devices complement a lack of bothersome abrasions. Eye-appealing for the grade. NGC ID# 28DR, PCGS# 8521

**1911-S Five Dollar, MS63  
Underrated in Mint Condition**

**4841 1911-S MS63 PCGS.** A few spots of struck-in grease occur at the lower obverse and between RT in LIBERTY. Small abrasions, including one across the eagle's neck, limit the grade of this Select example. These are trivial issues for the 1911-S, which Akers once called "one of the most underrated issues of the series, if not the entire spectrum of 20th-century United States gold coins." The devices are well-rendered, and each exhibits luminous peach-gold color. NGC ID# 25ZM, PCGS# 8522

**1912 Half Eagle, MS65**  
None Numerically Finer at PCGS

- 4842 1912 MS65 PCGS.** Grading nearly five points higher than the average assessment awarded by the leading services, this Gem 1912 half eagle also ranks among the finest coins at PCGS. Softly frosted mint luster lightens the rich orange-gold color that defines this razor-sharp Registry offering. Minute abrasions are scattered over each side, without any particular blemish posing a serious distraction. Population: 65 in 65 (2 in 65+), 0 finer (3/19). NGC ID# 28DS, PCGS# 8523

**1912-S Five Dollar Indian, MS62**  
Key Condition Rarity

- 4843 1912-S MS62 NGC.** While Garrett-Guth call the 1912-S five "one of the classic rarities," more to the point it is a classic condition rarity. It is seldom found in mint condition, and when it is located strike definition is usually less than ideal. This is a lovely Uncirculated example that displays even reddish-gold color throughout. The high-point definition is not quite complete, and there are minimal abrasions present. Census: 58 in 62, 22 finer (2/19). NGC ID# 65KD, PCGS# 8524

**1912-S Half Eagle, Pleasing MS62**  
Among the Scarcest Issues in High Grades

- 4844 1912-S MS62 NGC.** Despite a mintage of 392,000 coins, this San Francisco issue ranks among the most difficult Indian half eagles to obtain in high grades. Well-detailed devices and rich orange-gold color are the defining characteristics of this pleasing example. Peppered abrasions are small and less distracting than the technical assessment might otherwise suggest. NGC shows 22 submissions finer (3/19). NGC ID# 65KD, PCGS# 8524

- 4845 1913 MS64 NGC.** Deep, rich orange-gold color provides instant eye appeal for this lustrous near-gem 1913 five. A razor-sharp strike adds technical quality, while a few light abrasions are confined primarily to the reverse fields. The 1913 is readily available in most grades, but becomes scarce any finer than the MS64 level. This Choice Uncirculated example has numerous claims to an even finer grade. NGC ID# 28DT, PCGS# 8525

**1913 Five Dollar, Smooth MS65**  
A Single Coin is Finer at PCGS

- 4846 1913 MS65 PCGS.** More than 900,000 half eagles were minted in 1913, yet the issue proves challenging at the Gem grade level. Only a couple of collectors could ever hope to upgrade a coin of this quality, with a single MS66 finer at PCGS and five such submissions at NGC (3/19). Pinpoint-sharp devices appear over smooth, honey-gold surfaces. Slim, grade-limiting ticks are mostly confined to the upper reverse field. NGC ID# 28DT, PCGS# 8525

- 4847 1914 MS64 PCGS.** A deep orange-gold hue provides color to this near-Gem half eagle. Both sides show near-complete design detail. Frosted mint luster and minimal surface abrasions round out the appeal. The 1914 Indian half eagle becomes scarce any finer than MS64, putting greater demand on coins of this quality. PCGS shows 34 numerically higher submissions (3/19). NGC ID# 28DU, PCGS# 8527

- 4848 1914 MS64 NGC.** The mintage of 247,000 is low according to all other quantities struck by the Philadelphia Mint in the Indian Head half eagle series. Only the 1929 should be considered scarcer by mintage, even though 662,000 pieces were struck — most of those never left the Mint, and were melted. This lustrous and attractive 1914 displays vibrant, orange-gold color and a sharp strike. A few wispy abrasions are seen on the obverse, while the reverse is nearly free of marks. We note a small nick on the cheek. NGC reports just 20 numerically finer examples (3/19). NGC ID# 28DU, PCGS# 8527

**1914-D Half Eagle, MS64**  
Rarely Offered Finer

- 4849 1914-D MS64 NGC.** Satiny yellow-gold luster has delicate rose tints on this near-Gem 1914-D Indian half eagle. The strike is sharp and few abrasions appear in the fields. The 1914-D is a slightly better date, although it is still collectible in MS64. Finer pieces are rare, with only 15 such coins certified at NGC (3/19). NGC ID# 28DV, PCGS# 8528

**1914-D Five Dollar Indian, MS64+  
Elusive in Higher Grades**

- 4850 1914-D MS64+ PCGS.** Lustrous green-gold surfaces provide this high-end near-Gem with strong visual appeal. This is a desirable 1914-D example from the last Denver issue of the half eagle series. The marks present are minor, with none posing a distraction. The certified population drops dramatically at the Gem level, with this piece one of only 41 graded in 64+, and 20 finer at PCGS (3/19). *Ex: Central States Signature (Heritage, 4/2014), lot 6550, where it sold for \$4,993.75. NGC ID# 28DV, PCGS# 8528*

**1914-D Five Dollar, Bold MS64+  
Great Eye Appeal, Few Finer**

- 4851 1914-D MS64+ PCGS. CAC.** Not quite a quarter-million 1914-D half eagles were struck at the Denver Mint. Few survive in better condition than MS64. The mintmark is bold on this Plus-designated and CAC-endorsed near-Gem, as are the other sunken design features. Vibrant satiny luster glistens across the warm orange-gold surfaces. PCGS counts 20 finer grading events. CAC: 50 in 64, 3 finer (3/19). NGC ID# 28DV, PCGS# 8528

**1914-S Five Dollar, MS62  
Profound Red-Gold Color**

- 4852 1914-S MS62 PCGS.** The 1914-S is essentially impossible to obtain in Gem condition, heightening demand for lower-level Mint State representatives. This well-struck MS62 coin showcases profound reddish-gold color and soft, shimmering mint luster. The field are clean, with minor ticks mostly on the reverse. Scarce any finer. NGC ID# 28DW, PCGS# 8529

- 4853 1915 MS64 NGC.** This sharply struck 1915 half eagle has unusually smooth surfaces for the issue, not finely granular as normally seen. Bright yellow-gold color beams mint luster from both sides, which are nearly free of any mentionable marks. A loupe reveals a trio of short abrasions that exist near the bridge of the Indian's nose, the only factor that might deter an even finer grade. NGC ID# 28DX, PCGS# 8530

**1915 Five Dollar, MS65  
Tied for Finest**

- 4854 1915 MS65 NGC.** This fully struck Gem five dollar exhibits bright mint luster and wheat-gold color. A diagonal abrasion through (PLU)RIB(US) is probably the only flaw standing in the way of an even higher grade. As it is, this piece ranks among the finest submissions at both services. Census: 39 in 65, 0 finer (3/19). NGC ID# 28DX, PCGS# 8530

**1916-S Half Eagle, MS63  
Final San Francisco Issue**

- 4855 1916-S MS63 PCGS.** The 1916-S represents the final half eagle issue ever manufactured at the San Francisco mint. Merely 240,000 examples were struck, and few survive above Select Uncirculated condition. Bold devices appear over softly frosted wheat-gold surfaces. There are multiple spots of struck-in grease on each side, but post-Mint contact is minimal. NGC ID# 28DY, PCGS# 8532

**1916-S Five Dollar, MS64  
Phenomenal Quality**

- 4856 1916-S MS64 PCGS. CAC.** The final collectible issue in the series, and the last before production would resume briefly in 1929, claims a mintage of 240,000 coins. Eye appeal is phenomenal, as suggested by the CAC approval sticker. A slender mark through GOD is the only one worthy of mention. Golden-orange surfaces are otherwise beautifully preserved and lustrous with strong detail on the motifs. PCGS reports 15 higher grading events. CAC: 24 in 64, 9 finer (3/19). NGC ID# 28DY, PCGS# 8532

## EARLY EAGLES

### 1801 BD-2 Eagle, AU50 Details Spines in Cap Die State

- 4857** 1801 BD-2, R.2 — Cleaned — ANACS. AU50 Details. Bass-Dannreuther Die State a/a, unclashed, but showing the typical vertical spines in Liberty's cap. The BD-2 1801 eagle is often chosen for type purposes. This AU-level coin displays little wear and is sharp save for on the right-most border of each side, suggesting an uneven strike. Moderate chatter is evident in the fields, mainly on the obverse, and the coin has the appearance of a light cleaning, despite moderately pleasing olive-gold and honey coloration. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

### 1803 BD-3 Eagle, AU Details Small Stars Reverse

- 4858** 1803 Small Reverse Stars, BD-3, R.4 — Cleaned — PCGS Genuine. AU Details. A single obverse die was combined with six different reverse dies to produce about 15,000 gold eagles in 1803, according to Mint delivery records. In *Early U.S. Gold Coin Varieties, A Study of Die States, 1795-1834*, John Dannreuther estimated that 300 to 400 1803 gold eagles survive among the six varieties. In all grades, PCGS and NGC have certified nearly 500 examples of this issue. Most of those are BD-3 or BD-5, the two most plentiful varieties of the coinage date. The other four varieties are highly elusive. This bright example has lemon-yellow surfaces with bold central devices and slight peripheral weakness. There are no clash marks on the obverse, with heavy reverse clash marks.

## LIBERTY EAGLES

- 4859** 1842-O XF45 PCGS. Variety 2. The 1842-O is a great rarity, but the second-year New Orleans ten dollar issue is comparatively affordable. This butter-gold example is nicely defined and displays many pockets of luster. The minutely granular surfaces lack mentionable marks. Population: 46 in 45, 54 finer (2/19). NGC ID# 262N, PCGS# 8587

### 1843-O Ten Dollar, AU55 Semiprooflike, Bright Yellow-Gold Surfaces

- 4860** 1843-O AU55 PCGS. Variety 4. The 1843-O is the second most frequently encountered O-mint ten from this decade, undoubtedly because of its substantial mintage of 175,162 pieces. Many of the higher grade survivors are prooflike or semiprooflike, like this piece. The surfaces are bright yellow-gold throughout with a few small abrasions scattered across each side. Population: 23 in 55, 20 finer (2/19). NGC ID# 262R, PCGS# 8589

### 1849-O Eagle, AU55 Scarce, Low-Mintage O-Mint

- 4861** 1849-O AU55 NGC. Variety 3. This scarce variety is most easily attributed by the shield ring at the top of the second set of vertical shield lines. The 1849-O ten dollar is a scarce issue with a mintage of only 23,900 pieces, second only in rarity to the 1841-O. This is a pleasing Choice AU that shows the often-seen prooflike fields. The surfaces are deeper orange-gold and numerous abrasions are peppered across each side. Census: 19 in 55, 7 finer (2/19). NGC ID# 2636, PCGS# 8602

- 4862** 1851-O AU55 PCGS. Variety 2, date low. The obverse is unclapped on this variety. Offered here is a sharply detailed Choice AU coin with semiprooflike fields and honey-gold patina. The surfaces are relatively smooth and show little wear. Eye appeal is excellent for the grade. Population: 64 in 55, 39 finer (2/19). NGC ID# 263B, PCGS# 8607

### 1851-O Ten Dollar, AU58 Attractive, High-End Example

- 4863** 1851-O AU58 PCGS. Variety 2. More than a quarter-million 1851-O tens were produced, which explains its availability in VF through the lower-end of AU. However, high-end AU examples are scarce and Uncirculated pieces are generally not obtainable. This is a bright golden-orange piece with semireflective fields on each side. The strike details are strong in the centers with slight peripheral weakness seen on the obverse stars. Population: 23 in 58, 16 finer (3/19). NGC ID# 263B, PCGS# 8607

- 4864 1853 AU58 NGC. CAC.** Mint luster remains strong across the surfaces of this briefly circulated 1853 eagle. The frosted surfaces host a number of small marks, including numerous tiny contacts on Liberty's cheek. Attractive orange-gold color adds eye appeal, while CAC endorsement supports the technical grade. NGC ID# C82G, PCGS# 8610

**1853/2' Ten Dollar, AU55  
A Guide Book Variety**

- 4865 1853/2' AU55 NGC.** This is a *Guide Book* variety and has long been considered an overdate by many, including David Akers (1980): "One variety of 1853 is an overdate, i.e., 1853/2." However, NGC notes on their VarietyPlus webpage: "There is no universal agreement that this is an overdate, but it remains of interest to collectors." Both NGC and PCGS certify examples of this variety with the 2 in quotations. This Choice AU example displays sharp detail and little wear with hints of luster in the protected areas. Pleasing straw-gold color characterizes each side. NGC ID# C82G, PCGS# 8611

- 4866 1853-O AU53 PCGS. Variety 3.** The 1853-O ten circulated extensively. Mint State survivors are decidedly rare, but attractive AU coins can still be obtained. This About Uncirculated coin displays sharp detail and little wear. Satiny surfaces have natural greenish-gold patina and scattered light contact marks. Population: 28 in 53, 44 finer (2/19). NGC ID# 263F, PCGS# 8612

**1854 Liberty Eagle, MS60  
Rarely Seen This Fine**

- 4867 1854 MS60 NGC.** From a mintage of 54,250 pieces, the 1854 Liberty eagle is an elusive issue in all grades and Mint State examples are rare. This attractive Mint State example exhibits well-detailed design elements, with just a touch of softness on the star centers. The lustrous surfaces show the expected number of minor contact marks for the grade. Census: 5 in 60, 8 finer (3/19). NGC ID# 263G, PCGS# 8613

- 4868 1854-S AU50 PCGS.** The inaugural 1854-S eagles were struck in quantity (123,826 pieces) — many survive today, although the vast majority are in circulated condition. This example shows its time spent in the rough and tumble West Coast commerce. Numerous small abrasions and marks are scattered about the surfaces, including a few light rim dings and stacking marks. Green-gold color displays attractive olive and orange accents, with solid About Uncirculated definition. NGC ID# 263K, PCGS# 8615

- 4869 1854-S AU53 PCGS.** The numismatic significance of the 1854-S should not be overlooked by collectors. These first-year coins represent important pieces of Gold Rush history. This example saw modest circulation, yet hints of luster remain. Bright yellow-gold surfaces are lightly hairlined. Abrasions are mostly superficial, however, and detail is strong. Reddish accents appear at the upper reverse. NGC ID# 263K, PCGS# 8615

**1855 No Motto Eagle, MS62  
Bright S.S. Republic Coin**

- 4870 1855 MS62 NGC. Ex: S.S. Republic.** The availability of the 1855 was significantly affected by the recovery of the contents of the S.S. Republic, especially in Mint State. Nevertheless, survivors are scarcely seen as fine as this bright, lustrous MS62 ten dollar gold piece. Obverse detail is slightly uneven, with partial star radials, while the eagle on the reverse is uniformly well-defined. Myriad abrasions throughout. NGC ID# 263L, PCGS# 8616

- 4871 1856 AU58 PCGS.** The Philadelphia Mint coined 60,490 eagles in 1856, a moderate mintage with survivors frequently encountered. This near-Mint piece has trivial marks and splashes of delicate orange toning on its lustrous yellow surfaces. Population: 32 in 58 (1 in 58+), 23 finer (3/19). NGC ID# 263P, PCGS# 8619

**1856-O Ten Dollar, AU55  
Partly Lustrous O-Mint Rarity**

- 4872 1856-O AU55 PCGS. Variety 3.** The mintmark high relative to the fletching is unique to this die pair. Raised rust lumps appear within the coronet around LIBERTY, and a die crack runs from the rim through the T in UNITED to the field. It says something that the finest example of the 1856-O ten dollar that Harry W. Bass, Jr. was able to acquire was an XF45. Only 14,500 pieces were struck, and probably no more than 120 coins survive. This bright yellow-gold Choice AU ten retains partial luster and shows good detail with trivial chatter. We note a rim bump above TE in STATES. Population: 9 in 55, 9 finer (3/19). NGC ID# 263R, PCGS# 8620

- 4873 1856-S AU53 NGC.** Medium S. The smaller of the two mintmark sizes and placements for this early San Francisco issue. The caramel-gold surfaces show minimal wear and no distracting abrasions. A wisp of struck-in grease is below the A in STATES. NGC ID# 263S, PCGS# 8621

- 4874 1857 AU55 NGC.** The 1857 Liberty ten is scarce in AU, but at this level it is still collectible by most enthusiasts. The same cannot be said of the rare and out-of-reach Mint State pieces that survive. This Choice AU example displays satiny orange-gold surfaces with hints of luster in the protected regions. The devices show trivial wear. Census: 29 in 55, 29 finer (2/19). NGC ID# 55GV, PCGS# 8622

**1858 Eagle, XF45**  
**Low-Mintage Rarity**

**4875 1858 XF45 NGC.** The 1858 is a well-known low-mintage rarity in the Liberty eagle series from a small production of 2,521 coins. One might surmise that the loss of the S.S. *Central America* the previous year affected available bullion for coinage. This piece is typical of survivors that have an average grade of just under AU50. The wheat-gold surfaces are lightly marked as expected for the grade, with delicate peripheral rose toning. This is an important opportunity for the advanced Liberty eagle collector. Census: 12 in 45, 19 finer (3/19). NGC ID# 263W, PCGS# 8625

**1860-O Ten Dollar, AU50**  
**Natural, Deep Red-Gold Color**

**4876 1860-O AU50 PCGS. Variety 2.** Two obverses were used to strike the final ten dollar gold pieces at the New Orleans Mint until 1879. This die shows lapping on the neck curls and the date positioned close to the dentils. Winter estimates 175 to 225 1860-O eagles extant. This piece enjoys natural, deep red-gold color and partial luster. Detail is good for an O-mint No Motto ten, and faint hairlines occur on each side. NGC ID# 2645, PCGS# 98631

**4877 1861 AU55 NGC.** Six-fold Bulging Bun subtype. An attractive honey-gold representative with only one mentionable mark, a thin line near star 3. The Civil War issue is available by No Motto standards, though Uncirculated examples are very scarce in absolute terms. NGC ID# 2647, PCGS# 8633

**1862 Ten Dollar, XF45**  
**Elusive in High Grade**

**4878 1862 XF45 PCGS.** The Philadelphia Mint struck just 10,960 Liberty eagles in 1862, slightly less than the 12,500 coins issued at San Francisco. These were the only operating mints in federal control in 1862. The Philadelphia issue is more plentiful than the S-mint coin, but it is nonetheless scarce in the upper circulated grades, and it is rare in Mint State. This Choice XF coin displays strong detail and bright yellow-gold surfaces. No significant abrasions are seen. NGC ID# 2649, PCGS# 8635

**1866-S Ten Dollar, XF45**  
**First With Motto Issue**

**4879 1866-S Motto XF45 NGC.** Like most other issues of the period, this first-year Motto eagle from the San Francisco Mint claims a paltry mintage of 11,500 coins and a minuscule survivorship that probably does not exceed 100 pieces. Deep red-gold color is highly appealing, compensating for small, scattered marks and a brush of high-point friction. The mintmark is faint. Census: 10 in 45, 24 finer (3/19). NGC ID# 53FR, PCGS# 8650

**1876 Liberty Eagle, XF40**  
**Low-Mintage Philadelphia Rarity**

**4880 1876 XF40 NGC.** For most of the 1870s, the Philadelphia Mint produced only a small number of Liberty eagles every year. The business-strike mintage for 1876 was a meager 687 pieces, making the issue scarce-to-rare in all grades today. This attractive XF example displays light wear on the design elements and the lightly abraded orange-gold surfaces show traces of prooflike reflectivity in sheltered areas. Census: 3 in 40, 14 finer (2/19). NGC ID# 265C, PCGS# 8674

**1876-CC Ten Dollar, Fine 12**  
**Carson City Rarity**

**4881 1876-CC Fine 12 NGC. Variety 1-A.** The 1876-CC ten is rare in all grades. Only 4,696 pieces were struck, of which an estimated 70-80 coins are believed known today. This is a heavily circulated example that displays even, bright yellow-gold color. Each side is peppered with the numerous small abrasions expected of a coin in this grade, the only exceptions are seen above Liberty's eyebrow and above star 2.

Ex: *Central States Signature* (Heritage, 4/2012), lot 6727, realized \$3,450. NGC ID# 54UL, PCGS# 8675

1880-O Liberty Ten, AU55  
Very Scarce Low Mintage Issue

**4882 1880-O AU55 NGC. Variety 2.** Although the 1880-O is less rare than the 1879-O and 1883-O, it is nonetheless a challenging issue with a scant mintage of 9,200 pieces. About 85% of survivors are Variety 1, which bears a highly placed New Orleans mintmark. Variety 2 has the mintmark entered lower, almost entirely beneath the feather tip. Both varieties were coined with the same obverse die, distinguished by die doubling toward the rim on the left-side stars. This lightly circulated sea-green and straw-gold example shows relatively few abrasions. The borders teem with luster. Census: 41 in 55, 41 finer (3/19). NGC ID# 265U, PCGS# 8689

**4883 1881-CC XF45 PCGS. Variety 1-A.** Luster illuminates peripheral elements of this low mintage Carson City eagle. Sharply defined for the Choice XF level. A lens reveals the expected number of field marks from its service in Old West commerce.  
*Ex: FUN Signature (Heritage, 1/2017), lot 6925, which realized \$2,115. NGC ID# 265X, PCGS# 8692*

1881-CC Liberty Ten, Choice AU  
Smooth and Originally Toned

**4884 1881-CC AU55 NGC. Variety 1-A.** Carson City tens from the 1890s are regularly encountered in Mint State, but issues from the 1880s become conditionally rare in AU. The present well-defined Choice AU 1881-CC eagle is toned olive-green and caramel-gold. Traces of dirt in protected areas testify to the originality. Less abraded than expected given its short service in the Western economy. NGC ID# 265X, PCGS# 8692

1881-CC Ten Dollar, MS60  
Red-Gold Color, Low Mintage

**4885 1881-CC MS60 NGC. Variety 1-A.** Frosted mint luster characteristic of the Carson City branch mint shines from red-gold surfaces. Myriad small abrasions over each side determine the grade. However, any 1881-CC ten dollar gold piece (24,015 coins struck) is scarce in mint condition. Trivial softness over Liberty's ear and the lower portion of the eagle have no effect on the appeal or importance of this offering. Census: 13 in 60, 35 finer (3/19). NGC ID# 265X, PCGS# 8692

1882-CC Liberty Ten, Near-Mint

**4886 1882-CC AU58 NGC. Variety 2-A.** A better Carson City issue, the 1882-CC has a meager mintage of 6,764 pieces, and fewer than 300 pieces are estimated to survive. Nearly all are in circulated grades, with just four pieces designated as Mint State by PCGS, none finer than MS62. The present coin is from the usually seen die marriage with traces of misplaced date digits in the dentils beneath the 88 in the date. The luminous peach-gold surfaces are well defined and show glimpses of silver-gray patina along the obverse margin. Small marks are here and there, as expected from its short stint in the Old West economy, but none are remotely consequential. Census: 34 in 58, 4 finer (2/19).  
**From The Jersey Shore Gold Collection.** NGC ID# 2663, PCGS# 8696

1884-CC Ten Dollar, AU55  
Natural Red-Gold Color

**4887 1884-CC AU55 NGC. Variety 1-A.** The elegant and unquestionably original reddish-gold color that dominates this Carson City ten will appeal to aficionados. The strike falls short of full, but the motifs display good detail without much wear to mention. Bagmarks from transport occur on each side. From a remarkably low production of 9,925 coins. Census: 38 in 55 (1 in 55+★), 35 finer (3/19). NGC ID# 266B, PCGS# 8704

**4888 1885 MS62+ Prooflike NGC.** This is an eye-catching circulation-strike example of the 1885 ten dollar gold piece, though it could easily be mistaken for a proof. The devices are fully struck and frosty, surrounded by deeply reflective fields. Orange-gold surfaces display scattered abrasions. Census: 3 in 62 (1 in 62+) Prooflike, 1 finer (3/19). NGC ID# 266D, PCGS# 78706

1888-O Ten Dollar, MS63  
Low Mintage New Orleans Issue

**4889 1888-O MS63 NGC. Variety 1.** The New Orleans Mint struck only silver dollars between 1884 and 1887, but during 1888 the facility managed to produce 21,335 gold coins, all Liberty tens. Most survivors are in AU or low Mint State grades, due to indifferent storage and shipment. But the present orange-gold Select example is well struck and satiny with fewer than the usual number of obverse field abrasions. Census: 12 in 63, 0 finer (2/19). *From The Jersey Shore Gold Collection.* NGC ID# 266L, PCGS# 8713

1890-CC Liberty Eagle, AU58  
Nice Branch Mint Type Coin

**4890 1890-CC AU58 PCGS. CAC. Variety 1-A.** The 1890-CC Liberty eagle claims a mintage of 17,500 pieces, a small production total in absolute terms, but relatively generous in the context of the Carson City series. Only light wear is evident on the well-detailed design elements but some of the usual softness is apparent on the bust. The orange-gold surfaces show some minor chatter in the fields, with prooflike reflectivity in sheltered areas. Housed in a green label holder. NGC ID# 266S, PCGS# 8718

1890-CC Eagle, MS62★  
Seldom Finer, Partially Prooflike

**4891 1890-CC MS62★ NGC. Variety 1-A.** Partially prooflike throughout both sides, this gleaming 1890-CC is a memorable example of the small Carson City mintage. Just 17,500 eagles were struck. The Garrett and Guth reference notes "A small percentage of 1890-CC eagles are prooflike." This coin is more prooflike than not, with attractive rich-gold color and a notably sharp strike. Light abrasions scattered across the reflective surfaces, and account for the assigned grade. The issue is seldom seen any finer than the MS62 level, and this coin is the sole recipient of NGC's prized Star designation for the grade. Census: 35 in 62 (1 in 62★), 6 finer (2/19).

*From The Jersey Shore Gold Collection.* NGC ID# 266S, PCGS# 8718

1891-CC Ten Dollar, MS62  
Well Struck, No Major Marks

**4892 1891-CC MS62 NGC. Variety 2-B.** Five obverse dies and four reverse dies are identified for the 103,872-coin mintage of 1891-CC eagles, and those dies were used to create five distinct varieties. Slightly less than 300,000 eagles were minted in Carson City throughout the history of that facility, and the 1891 coinage represents a little over one-third of the total, making this issue the ideal candidate for a CC type set. This well-struck khaki-gold representative displays cartwheel sheen and fewer than the anticipated number of minor marks. NGC ID# 266U, PCGS# 8720

**4893 1891-CC/CC FS-501 MS61 NGC. Variety 3-C.** The mintmark is clearly repunched. This Carson City type coin offers booming luster and a crisp strike. The reverse is minimally marked, though the obverse displays the expected number of distributed small abrasions.

*From The Jersey Shore Gold Collection.* NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

**1891-CC/CC FS-501 Eagle, MS62  
Repunched Mintmark**

- 4894 1891-CC/CC FS-501 MS62 PCGS. CAC. Variety 4-C.** Although undesignated by such as PCGS, this is the popular variety with a clearly repunched mintmark. The 1891-CC is often chosen by Carson City type collectors to represent the Liberty ten series. This sharply struck butter-gold example displays sweeping cartwheel luster and no more than the anticipated number of small abrasions. A trace of struck-in grease is limited to the area of the eagle's left (facing) shoulder. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

**1891-CC/CC Liberty Eagle, MS63  
Repunched Mintmark, FS-501**

- 4895 1891-CC/CC FS-501 MS63 NGC. Variety 3-C.** Both Cs in the mintmark are repunched east. Unbroken luster sweeps the moderately abraded apricot and sun-gold surfaces. A sharply struck representative of this popular issue. More '91-CC eagles have survived in Mint State than all other Carson City issues of the denomination combined, but nearly all of those are heavily bagmarked from indifferent storage and shipment.  
*Ex: Fort Worth ANA Signature (Heritage, 3/2010), lot 2487, realized \$4,887.50.*  
**From The Jersey Shore Gold Collection.** NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

- 4896 1892-O MS62 PCGS. Variety 1.** The New Orleans Mint did not strike any gold coins between 1889 and 1891, but in 1892 the facility coined 10,000 half eagles and 26,688 eagles. The latter issue is typically encountered in AU50 through MS62 grades, and is rare any finer. A radiant apricot-gold example with a bold strike and a smattering of minor marks.  
**From The Jersey Shore Gold Collection.** NGC ID# 266X, PCGS# 8723

- 4897 1892-O MS62 PCGS. CAC. Variety 1.** The low-mintage 1892-O is collectible in the present grade but surprisingly rare any finer. Most Mint State survivors have subdued luster and myriad small marks. The present butter-gold New Orleans ten is less bagmarked than usual, since we need mention only a field mark near the E in AMERICA. NGC ID# 266X, PCGS# 8723

**1893 Ten Dollar, MS63 Prooflike  
Flashy Fields, Full Strike**

- 4898 1893 MS63 Prooflike NGC.** Dazzling field reflectivity greets the viewer of this lemon-gold Select Liberty ten. The strike is full, and the eye appeal is attractive. The obverse field exhibits the distributed minor marks associated with the grade. Census: 27 in 63 (1 in 63+ Prooflike, 3 in 63★), 2 finer (2/19).  
**From The Jersey Shore Gold Collection.** NGC ID# 266Z, PCGS# 78725

- 4899 1893-S MS63 PCGS. Breen-7043.** Breen (1988) described the variety as "very rare," adding "entire top of extra S shows right of top of mintmark." The 1893-S becomes an important conditional rarity at the MS63 level, and is seldom encountered any finer. This lustrous butter-gold example has an intricate strike and surprisingly smooth surfaces. NGC ID# 2674, PCGS# 8728

**1895 Liberty Head Eagle, MS64+  
Nearly Qualifies for an Even Higher Grade**

- 4900 1895 MS64+ PCGS. CAC.** This MS64+ ten dollar gold piece with CAC endorsement very nearly joins the finest known examples for the issue. Grazes are minimal. Wheat-gold surfaces display radiant, swirling mint luster and crisp central definition. Hints of green and rose color produce a lovely visual effect. Population: 84 in 64 (8 in 64+), 4 finer (3/19). NGC ID# 2678, PCGS# 8732

- 4901 1895 MS61 Prooflike NGC.** The reflective fields are expectedly abraded, but the portrait is relatively smooth and there are no singular heavy marks. The design elements are sharply detailed throughout. Census: 15 in 61 Prooflike, 11 finer (2/19).  
**From The Jersey Shore Gold Collection.** NGC ID# 2678, PCGS# 78732

**1895-O Ten Dollar, Bold MS63  
Tied for Finest at PCGS**

**4902 1895-O MS63 PCGS. Variety 3.** The ball of the 9 is centered between two dentils, and the 5 is low. This Select Uncirculated eagle is boldly struck for a New Orleans representative, and satiny mint luster maintains outstanding vibrancy. Medium yellow-gold surfaces display light chatter but few notable abrasions. Most high-grade examples of the 1895-O are found between AU58 and MS61. This is one of the finest coins at PCGS. A single near-Gem is graded higher at NGC. Population: 28 in 63 (1 in 63+), 0 finer (3/19). NGC ID# 2679, PCGS# 8733

**4903 1896-S MS61 NGC.** Luminous peach-orange fields are surrounded by shimmering luster around the peripheries. A touch of high-point strike softness occurs on each side. This lower-mintage issue saw extensive circulation, and all Mint State coins are scarce. Census: 32 in 61, 13 finer (2/19).

*Ex: Central States Signature (Heritage, 5/2007), lot 3828, where it realized \$1,955.*

**From The Jersey Shore Gold Collection.** NGC ID# 267C, PCGS# 8736

**1899 Ten Dollar, MS66  
Conditionally Scarce**

**4904 1899 MS66 NGC.** The 1899 eagle is a high-mintage issue, with more than 1.26 million pieces produced. Several thousand coins have been certified through the MS64 level. The numbers drop precipitously in MS65, however, and Premium Gems such as this one are extremely scarce. The reddish-gold mint luster has just a tinge of greenish patina, and the surfaces are free from any mentionable abrasions except for the occasional luster break. The strike is razor-sharp, with a single dark fleck on the reverse between TEN and D. Census: 20 in 66, 4 finer (2/19).

*Ex: Central States Signature (Heritage, 4/2011), lot 6694, where it sold for \$7,475.*

**From The Jersey Shore Gold Collection.** NGC ID# 267J, PCGS# 8742

**1902 Liberty Eagle, Scarce MS64**

**4905 1902 MS64 PCGS.** From a business-strike mintage of 82,400 pieces, the 1902 Liberty eagle is an elusive issue in MS64 condition and finer coins are prime condition rarities. This sharply detailed Choice example displays lightly marked orange-gold surfaces with vibrant mint luster on both sides. Population: 25 in 64 (6 in 64+), 5 finer (3/19). NGC ID# 267T, PCGS# 8750

**4906 1904-O MS63 PCGS. Variety 1.** New Orleans Liberty eagles are considerably scarcer in Mint State than their Philadelphia and San Francisco counterparts. Most O-mint tens are bagmarked, but the present coruscating and well struck green-gold example shows only a few moderate marks on the cheek and left obverse field. NGC ID# 7LHK, PCGS# 8756

**1904-O Ten Dollar, MS63+  
Elusive CAC Example**

**4907 1904-O MS63+ PCGS. CAC. Variety 1.** *Ex: The Fairmont Collection.* The 1904-O Liberty eagle is scarce in MS63 and rare finer, and CAC-approved coins in any Mint State grade are elusive. This CAC coin also has a Plus designation from PCGS. It is sharp on the central devices, even if a trifle weak on a couple of select peripheral stars. Original straw-gold luster produces a cartwheel effect, and the only singular abrasion is a small mark on Liberty's cheek. NGC ID# 7LHK, PCGS# 8756

**PROOF LIBERTY EAGLES**

**1905 Proof Liberty Eagle, AU Details**

**4908 1905 — Damaged — NGC Details. Proof, AU. JD-1, R.5.** Date position is the key identifier of the proof die pair, and this coin certainly has the reflectivity in the protected portions of the fields to complement it. The die polishing on the right end of the reverse scroll noted by John Dannreuther is not immediately apparent on this piece, which has slight rub on the devices. The open areas of the fields are affected by chatter and light handling wear, preventing a numeric grade for a proof. Only 86 proof eagles were struck in 1905, and possibly 40 to 50 survive today in all grades. NGC ID# 28GC, PCGS# 8845

## INDIAN EAGLES

### 1907 No Motto Ten, MS65 Excellent Preservation and Appeal

- 4909** 1907 No Motto MS65 NGC. Smooth, finely textured surfaces glow with frosty mint luster. This orange-gold Gem exhibits sharp detail, too, but it is undoubtedly the excellent preservation and eye appeal that make this a memorable first-year offering. The 1907 is always popular with collectors. NGC ID# 28GF, PCGS# 8852

### 1907 No Motto Eagle, MS65 Scarce With CAC Approval

- 4910** 1907 No Motto MS65 PCGS. CAC. This always sought-after No Motto issue most often appears in lower Uncirculated grades and becomes decidedly more challenging at this level, especially with CAC endorsement. Hallmarks of this Gem include rich golden-yellow color and vibrant mint luster. Softness is confined to the middle forecurls and lowest headdress feathers. Well-hidden abrasions are minor for the grade. NGC ID# 28GF, PCGS# 8852
- 4911** 1908 No Motto MS61 NGC. The 1908 No Motto eagle has a mintage of 4,271,551 pieces, but its ten dollar equivalent has a much smaller emission: 33,500 pieces. This caramel-gold example has vibrant luster, a nice strike, and the expected number of unimportant marks. In a circa-2000 holder. NGC ID# 28GG, PCGS# 8853
- 4912** 1908 No Motto MS62 PCGS. Light, scattered abrasions determine the grade, but this Mint State 1908 No Motto ten is otherwise lustrous and appealing. It is well-struck and has original honey-gold patina. The No Motto Philadelphia issue of this year comes from a mintage of only 33,500 coins. NGC ID# 28GG, PCGS# 8853
- 4913** 1908 No Motto MS62 PCGS. Lustrous satin surfaces show grade-appropriate abrasions, although they are free of singular distractions. The central devices are well-struck on this No Motto Indian eagle. Only 33,500 No Motto coins were struck at Philadelphia this year. NGC ID# 28GG, PCGS# 8853

### 1908 Ten Dollar MS63 No Motto, Only 33,500 Coins Struck

- 4914** 1908 No Motto MS63 PCGS. Softly frosted mint luster issues from khaki-gold surfaces. Scattered marks are expected for the grade, but none are individually distracting. Collectors recognize the scarcity of this second-year issue and two-year type. A mere 33,500 1908 No Motto tens were minted before July 1 of that year, when IN GOD WE TRUST was added to the reverse. NGC ID# 28GG, PCGS# 8853

### 1908 No Motto Indian Eagle, MS63 Low-Mintage Issue, Two-Year Type

- 4915** 1908 No Motto MS63 PCGS. A pleasing and lustrous example of this short-lived design type, struck prior to the addition of the motto IN GOD WE TRUST on the reverse. The surfaces are light yellow-gold — virtually unmarked, save for a few microscopic ticks. Smooth fields display strong, satiny mint luster, with well-struck motifs that add to the high technical quality and bold eye appeal. Surprisingly few examples of this issue have been certified from a scant mintage of 33,500 pieces, issued before the more frequently seen With Motto eagles.  
*Ex: Dallas Signature (Heritage, 11/2005), lot 4379.* NGC ID# 28GG, PCGS# 8853
- 4916** 1908-D No Motto MS62 NGC. The surfaces of this example suggest long-term vault storage that has diminished the luster. Both sides have dark patina on lustrous light yellow surfaces. NGC ID# 28GH, PCGS# 8854
- 4917** 1908-D No Motto MS62 PCGS. An impressive MS62 specimen from the final year of the short-lived No Motto design, this coin exhibits well-detailed design elements and pleasing orange-gold surfaces with the expected number of minor contact marks for the grade. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 28GH, PCGS# 8854
- 4918** 1908-D No Motto MS62 PCGS. The Garrett and Guth gold reference suggests the 1908-D No Motto tens do not command the attention they deserve. This is a pleasing Mint State example, with finely grained surfaces that show few abrasions for the assigned grade. Soft mint luster flows across well-struck, straw-gold surfaces, with especially strong definition on the eagle and only slight weakness on the high points of the Indian's portrait. NGC ID# 28GH, PCGS# 8854

**1908-D Ten Dollar, MS63**  
**Conditionally Elusive No Motto Issue**

**4919 1908-D No Motto MS63 PCGS.** This Denver issue is easily the most challenging No Motto Indian Head eagle to locate in high grades, though its mintage nearly keeps up with the much more plentiful 1907. The mintmark is obviously repunched on this lustrous rose-gold representative. The reverse shows slightly better detail than the obverse, though the overall impression is a bit soft. Scarcely seen finer. NGC ID# 28GH, PCGS# 8854

**4920 1908-D Motto MS62 PCGS.** An attractive MS62 Indian eagle, from the first year of the popular Motto design, this coin exhibits well-detailed design elements throughout. The lustrous orange-gold surfaces are lightly marked for the grade. NGC ID# 28GK, PCGS# 8860

**4921 1908-D Motto MS62 PCGS.** The Denver With Motto Indian eagle of 1908 is much scarcer than its mintage of more than 836,000 coins suggests. Uncirculated coins are scarce finer than MS62. This collector-grade piece displays a bold strike and honey-gold luster. Only light grazes on the cheek limit the grade. NGC ID# 28GK, PCGS# 8860

**1908-D Motto Indian Eagle, MS63**  
**Elusive Issue Any Finer**

**4922 1908-D Motto MS63 PCGS.** The motto IN GOD WE TRUST was added to the design of the Indian eagle partway through the year in 1908 and the Denver Mint struck a substantial mintage of 836,500 examples of the new design. This impressive Select example displays well-detailed design elements and lustrous, lightly marked orange-gold surfaces. PCGS has graded 51 numerically finer examples (3/19). NGC ID# 28GK, PCGS# 8860

**1909-D Indian Eagle, MS63**  
**Underrated Issue in High Grade**

**4923 1909-D MS63 PCGS.** From a mintage of 121,540 pieces, the 1909-D Indian eagle is an underrated condition rarity in high grade. The issue is scarce at the MS63 grade level, and finer coins are rare. This attractive Select specimen offers well-detailed design elements and lightly marked, lustrous orange-gold surfaces. Housed in a green label holder. PCGS has graded 49 numerically finer examples (3/19). NGC ID# 28GN, PCGS# 8863

**4924 1909-S MS62 PCGS.** The lower serif of the mintmark is lightly repunched, a different variety than Breen-7108. A lustrous green-gold representative. The strike is good, and although minor marks are distributed, none are singularly significant. The 1909-S emerges as a better date in Mint State grades. NGC ID# 28GP, PCGS# 8864

**1909-S Ten Dollar, MS63**  
**Scarcer S-Mint Issue**

**4925 1909-S MS63 NGC.** Khaki-gold surfaces boasts plenty of eye appeal on this Select 1909-S eagle, an issue more elusive in higher grades than the mintage of nearly 300,000 pieces might suggest. Engaging luster cascades over mattelike surfaces, but the grade is determined by a series of near-vertical scrapes on the eagle. Census: 21 in 63, 54 finer (3/19).  
*Ex: Chicago Signature (Heritage, 8/2011), lot 5745.* NGC ID# 28GP, PCGS# 8864

**1910-D Eagle, Strong MS65**  
**Clean Peach-Gold Surfaces**

**4926 1910-D MS65 PCGS.** This Denver Mint issue is famously available in high grades and a popular choice to represent the Saint-Gaudens type. A bold impression defines each side. Rich peach-gold color is readily appealing, as is the satiny mint luster that complements it. Impressively mark-free. NGC ID# 28GS, PCGS# 8866

**1910-D Ten Dollar, MS65**  
**Exceptional Color and Luster**

- 4927 1910-D MS65 NGC.** The 1910-D is the third most frequently seen ten dollar Indian, trailing the 1932 and 1926 issues. The bright, lustrous surfaces on this piece are outstanding both technically and aesthetically. This is an example that is well suited for inclusion in either a high-quality date and mint collection or a Gem type set.  
*Ex: Central States Signature (Heritage, 5/2005), lot 8879, where it sold for \$4,675.50. NGC ID# 28GS, PCGS# 8866*

**1910-S Ten Dollar Indian, MS63**  
**Scarcer S-Mint Issue**

- 4928 1910-S MS63 PCGS.** The 1910-S Indian eagle can be located with little searching in the lower Mint State grades, but it quickly becomes scarce at the MS63 level and finer coins are rare. This highly lustrous piece displays bright yellow-gold color and is unusually clean for the grade. Only a touch of minor softness is noted on the tip of the eagle's facing shoulder. PCGS has seen 40 numerically finer examples (3/19).  
*Ex: Long Beach Signature (Heritage, 9/2014), lot 3459, where it brought \$9,987.50. NGC ID# 268D, PCGS# 8867*

**1911-D Eagle, AU58**  
**Recognized Semikey**

- 4929 1911-D AU58 PCGS.** The 1911-D ten dollar is a recognized semikey (30,100 coins struck), and scarce in all Mint State grades. This collectible near-Mint example features significant remaining luster. Barely a brush of friction appears over the well-struck motifs, and there are no singular abrasions of note. Trivial chatter in the fields is consistent with the grade. This piece will please many collectors.  
*Ex: Central States Signature (Heritage, 4-5/2016), lot 5974, where it brought \$5,170. NGC ID# 28GU, PCGS# 8869*

**1912-S Indian Eagle, MS63**  
**Lustrous, Lightly Marked Surfaces**

- 4930 1912-S MS63 PCGS.** The 1912-S is a scarce issue in the ten Indian series. It is usually encountered in XF or AU, and when found in Uncirculated grades, it is most often MS61 or MS62. This is a lustrous representative with peach and green-gold toning. Only the first two stars lack a bold strike, and there are fewer small marks than is customary for the Select level.  
*Ex: Long Beach Signature (Heritage, 9/2006), lot 3947, realized \$5,175; Chicago Signature (Heritage, 8/2011), lot 5758, realized \$7,475. NGC ID# 269G, PCGS# 8872*

**1913-S Eagle, Still-Lustrous AU58**

- 4931 1913-S AU58 NGC.** Only 66,000 Indian eagles were struck at the San Francisco Mint in 1913, a notably low mintage for a 20th century coin. Examples are available from AU through MS62 but rare any finer. Reddish-gold surfaces retain a good amount of luster. Light circulation marks do not distract.  
*Ex: Long Beach Signature (Heritage, 9/2013), lot 5328, where it realized \$3,818.75. NGC ID# 28GZ, PCGS# 8874*

**1913-S Ten Dollar, MS61**  
**Elusive San Francisco Issue**

- 4932 1913-S MS61 NGC.** The low mintage of 66,000 coins makes the 1913-S one of the semikeys to the Indian eagle series. Mint State examples of this issue are universally elusive, and it is especially difficult to find a lower-end example with pleasing visual appeal. This MS61 coin is an exception. Scattered light marks limit the grade, but original wheat-gold luster and an absence of severe abrasions place it beyond its peers in terms of aesthetics. NGC ID# 28GZ, PCGS# 8874

---

### 1914 Indian Ten, MS64+

- 4933 1914 MS64+ PCGS.** The 1914, despite having the 11th lowest mintage in the series, is plentiful in all grades from AU55 through MS63. PCGS has certified more than 2,200 examples in that grade range, but only 257 submissions that grade MS64 or higher. This example has frosty mint luster and brilliant light yellow surfaces. NGC ID# 28H2, PCGS# 8875

---

### 1914-D Ten Dollar, Vibrant MS64+

- 4934 1914-D MS64+ PCGS. CAC.** A better date in high grade, the 1914-D is seldom found at any Mint State level with CAC recognition, as this Plus-graded near-Gem has. Well-struck and vibrantly lustrous, the yellow-gold surfaces showcase outstanding eye appeal with only a few faint luster grazes that prevent a full MS65 grade. PCGS lists 47 finer submissions. CAC: 35 in 64, 17 finer (3/19). NGC ID# 28H3, PCGS# 8876

- 4935 1914-S MS61 NGC.** Satiny straw-gold surfaces show remarkably few abrasions for the grade on this 1914-S Indian eagle, although a loupe reveals slide marks on the high points of the devices that determine the NGC opinion. Nonetheless, eye appeal is excellent. The 1914-S is a better date in Uncirculated condition. NGC ID# 28H4, PCGS# 8877

- 4936 1914-S MS61 PCGS.** An impressive Mint State specimen from a mintage of 208,000 pieces, this coin exhibits well-detailed design elements and lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 28H4, PCGS# 8877

---

### 1914-S Ten Dollar Indian, MS63 Highly Lustrous Surfaces

- 4937 1914-S MS63 NGC.** The 1914-S ten dollar saw a mintage of 208,000 pieces. This Select example displays rich peach-gold patina that covers radiantly lustrous surfaces. The design elements are generally well struck, except for minor softness on the eagle's shoulder. A few minute marks limit the grade.  
Ex: *Central States Signature (Heritage, 4-5/2009), lot 3912, where it brought \$6,900.* NGC ID# 28H4, PCGS# 8877

---

### 1915 Indian Eagle, MS65 Conditionally Rare in Finer Grades

- 4938 1915 MS65 NGC.** From a mintage of 351,000 pieces, the 1915 Indian eagle is an available issue in high grade, but it does become scarce at the MS65 grade level. This spectacular Gem exhibits sharply detailed design elements and well-preserved greenish-gold surfaces, with vibrant mint luster on both sides. Census: 93 in 65 (4 in 65+, 1 in 65★), 27 finer (3/19). NGC ID# 28H5, PCGS# 8878

---

### 1915-S Ten Dollar, AU58 Scarce, Low-Mintage Issue

- 4939 1915-S AU58 PCGS.** Glowing golden-yellow luster radiates from each side of this near-Mint 1915-S eagle, from a mintage of only 59,000 pieces, third-lowest in the entire series (the 1911-D and 1911-S are lower). The 1915-S is elusive even in the higher circulated grades, as here. The few scattered marks on this piece are of little importance and do not detract from the strong eye appeal.  
Ex: *Dallas Signature (Heritage, 3/2013), lot 4357, where it sold for \$4,700.* NGC ID# 28H6, PCGS# 8879

---

### 1916-S Ten Dollar, Splendid MS63 Great Eye Appeal

- 4940 1916-S MS63 PCGS.** This is a splendid 1916-S ten with vibrant, swirling mint frost and rich, reddish-gold coloration. The design elements are well struck and only reveal a touch of weakness over the centers. Scattered small marks define the grade, but they are entirely acceptable for a Select Uncirculated specimen. A conditionally scarce issue at this level, and an issue that is elusive any finer. PCGS reports just 78 numerically finer examples (3/19).  
Ex: *Long Beach Signature (Heritage, 2/2006), lot 3196; Los Angeles Signature (Heritage, 8/2009), lot 2654.* NGC ID# 28H7, PCGS# 8880

**4941 1932 MS65 PCGS.** From a substantial mintage of 4.4 million pieces, the 1932 Indian eagle is an available issue in high grade and a popular choice of type collectors. This impressive Gem displays well-detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. Housed in a green label holder. NGC ID# 28HB, PCGS# 8884

**4942 1932 MS65 NGC.** An exquisite orange-gold Gem that boasts booming luster and few indications of contact. The strike is good and the eye appeal is undeniable. The 1932 ten is the sole readily collectible gold issue from the 1930s. Encapsulated in a prior generation holder. NGC ID# 28HB, PCGS# 8884

## LIBERTY DOUBLE EAGLES

### 1850 Double Eagle, XF45 First Issue Made for Circulation

**4943 1850 XF45 PCGS.** The double eagle denomination was authorized in 1849, but circulation strikes were first manufactured in 1850 (1.1 million pieces at the Philadelphia Mint). This numismatically important offering presents crisp detail despite light circulation. Straw-gold surfaces exhibit bright luster within the recesses and scattered abrasions over the exposed areas. A mark between the rim and star 10 is the only singular one. NGC ID# 268F, PCGS# 8902

### 1850 Twenty Dollar, AU53 Strong Central Definition

**4944 1850 AU53 NGC.** Mellow golden-orange surfaces are mostly smooth and features hints of partial luster around the motifs. Stars 1, 2, and 12 are weak, but they are the only areas where overt strike softness is present. The rest of this minimally circulated opening-year double eagle showcases bold definition, particularly on Liberty's curls, which are impressive for No Motto twenty. NGC ID# 268F, PCGS# 8902

### 1850 Twenty Dollar, Near-Mint Ex: S.S. Republic

**4945 1850 AU58 NGC.** Ex: S.S. Republic. The obverse is prooflike, and the reverse displays partial cartwheel sheen. This bold butter-gold example displays bagmarks appropriate for its grade. The (2/19) NGC Census shows 54 pieces recovered from the well-known 1865 shipwreck, but only three of those coins (1 as MS60 and 2 as MS61) were certified as Mint State. Includes original wooden presentation box and certificate of authenticity. *From The Jersey Shore Gold Collection.* NGC ID# 268F, PCGS# 8902

### 1850 Double Eagle, AU58 Razor-Sharp and Semiprooflike

**4946 1850 AU58 NGC.** The creation of the double eagle in 1850 allowed for more California gold to be converted into coins in less time. The first year of issue saw the production of 1.1 million twenty dollar gold pieces at the Philadelphia Mint. Examples are among the most sought-after coins in the series, yet they are scarce at this grade level. Yellow-gold surfaces show semiprooflike fields and razor-sharp definition that evades most Type One twenties. Imperceptible friction and scattered marks limit the assessment but not the appeal. NGC ID# 268F, PCGS# 8902

**4947 1850-O — Altered Surfaces — PCGS Genuine. XF Details. Variety 3.** New Orleans struck twenties for 12 consecutive years, then again in 1879 when the facility reopened to coin silver dollars. Despite the baker's dozen issues, the facility remains key to a mintmark set of the denomination. A nicely detailed yellow-gold example with mildly glossy surfaces. Small marks are distributed, but we note only a minor rim knock on the reverse rim at 7:30.

**4948 1851 XF45 NGC.** This impressive Choice XF Type One double eagle exhibits light wear on the tiara and Liberty's curls, but much interior detail remains intact. The lightly abraded orange-gold surfaces retain a few traces of original mint luster. NGC ID# 268H, PCGS# 8904

**4949 1851 AU55 PCGS.** Smooth yellow-gold surfaces retain elements of luster on this Choice AU 1851 double eagle, an outstanding Type One coin with good detail and eye appeal. Although more than 2 million examples of this issue were struck, it is scarce in Mint State, leading many collectors to acquire attractive AU specimens. NGC ID# 268H, PCGS# 8904

**1851 Twenty Dollar, AU58  
Significant Remaining Luster**

**4950 1851 AU58 NGC.** This second-year double eagle possesses nearly complete luster on the reverse, and luster is also faintly evident on the cheek and in the open obverse field. Refreshingly devoid of noticeable marks, though the strike is slightly soft on the left-side obverse stars. Struck from slightly rotated dies.  
*Ex: Summer FUN Signature (Heritage, 7/2012), lot 5068, where it sold for \$4,600. NGC ID# 268H, PCGS# 8904*

**1851-O Double Eagle, AU Details  
Early New Orleans Type Issue**

**4951 1851-O — Cleaned — PCGS Genuine. AU Details. Variety 1.** The date and mintmark placement, and die chips in front of the eye are diagnostic. This numismatically important second-year New Orleans dollar has been cleaned, showing hairlines on each side. Nevertheless, it maintains deep orange-gold color. Central strike definition is needle-sharp, while the borders are slightly softer. There is a pedigree marker on the rim above star 6.

**1851-O Twenty Dollar, AU Details  
Type One O-Mint Representative**

**4952 1851-O — Altered Surfaces — PCGS Genuine. AU Details. Variety 2.** Among the five facilities that struck Liberty double eagles, those with the New Orleans mintmark are scarcest. The 1851-O is often collected by those seeking a single Southern gold example of the denomination. This butter-gold example is hairlined, and a scratch near the UNI in UNITED shows signs of smoothing. A minor strike-through (as made) is south of obverse star 3.

**1851-O Double Eagle, AU55  
New Orleans Type Coin**

**4953 1851-O AU55 NGC. Variety 1.** Mintmark and date placement are the chief identifiers of this variety, one of five for the 1851-O twenty, which boasts a mintage of 315,000 coins. In AU55, this partially lustrous example displays original greenish-gold and peach-yellow surfaces with only a few singular abrasions. Little high-point wear is discernible. NGC ID# 268J, PCGS# 8905

*The New Orleans Mint*

**1851-O Liberty Double Eagle, AU58  
Early O-Mint Issue, Rare Any Finer**

**4954 1851-O AU58 NGC. Variety 1.** Ex: Eagle Collection. The 1851-O is the most obtainable New Orleans double eagle in terms of overall rarity, and it is slightly more available than the 1852-O in higher grades. This is a popular issue with type collectors, because the issue is typically seen with a better strike and nicer coloration than other O-mint double eagles. Calling the 1851-O a “common date” is, of course, a relative term; an estimated 175-225 pieces are known in the various About Uncirculated grades, the great majority in the lower range. The 1851-O is quite scarce as a properly graded AU55, rare in AU58, and very rare in any Uncirculated grade.

The present example is bright green-gold, sharply defined in the centers with the usual softness around the margins, which display some attractive orange accents. Traces of prooflike surface survive within the reverse legends. A few light handling marks are evident, the most obvious ones in front and back of Liberty’s head. Census: 76 in 58 (2 in 58+), 18 finer (2/19).

Ex: *Eagle Collection of Double Eagles* (Heritage, 1/2002), lot 4004, *Sacramento ANA Signature* (Heritage, 3/2011), lot 4901; *Dallas Signature* (Heritage, 3/2018), lot 3187. NGC ID# 268J, PCGS# 8905

**4955 1852 AU55 NGC.** Barely any wear is present on this vibrantly lustrous Choice AU example, complementing sharp devices and bright yellow-gold color. Scattered abrasions are apparent, as is expected for AU-level Type One double eagles. The 1852 is popular as a type coin. NGC ID# 268K, PCGS# 8906

**4956 1852 AU55 NGC.** Early Philadelphia double eagle issues have mintages of more than 1 million pieces, indicative of Gold Rush bullion shipped from one coast to the other. This lightly circulated green-gold representative displays ample luster and a relatively low number of abrasions. Minor rim bumps are noted near obverse star 2 and the F in OF. NGC ID# 268K, PCGS# 8906

**1852/1852 Twenty Dollar, AU58+  
CAC Seal, FS-301 Repunched Date**

**4957 1852/1852 FS-301 AU58+ NGC. CAC.** All four date digits are repunched north. A sun-gold Borderline Uncirculated example that shows only a hint of friction on Liberty’s hair. Cartwheel luster is apparent, and the moderate marks on the left obverse field do not distract. AU58+ is a high grade for the variety; NGC (as of 2/19) has certified 95 pieces, but only one in the present grade and just three coins finer as MS61. NGC ID# 268K, PCGS# 145729 Base PCGS# 8906

**1852-O Liberty Double Eagle, AU53  
Popular Branch Mint Type Issue**

**4958 1852-O AU53 NGC. Variety 1.** From a mintage of 190,000 pieces, the 1852-O Liberty double eagle is relatively available in high grade, making it a popular choice with branch mint type collectors. This attractive AU53 example exhibits just a touch of wear on the well-detailed design elements and the pleasing orange-gold surfaces show some minor chatter in the fields, with traces of prooflike reflectivity around the devices. NGC ID# 268L, PCGS# 8907

**1853 Twenty Dollar, Near-Mint  
Well Defined and Partly Lustrous**

**4959 1853 AU58 NGC.** This early Philadelphia issue has a sizeable mintage but is challenging in Mint State. The present Borderline Uncirculated double eagle has honey-gold color and no shortage of luster. Marks are relatively few, though a tick on the L in LIBERTY, and a slight rim bump near the final A in AMERICA, merit passing mention.

Ex: *FUN Signature* (Heritage, 7/2011), lot 4987, which realized \$3,450. NGC ID# 268M, PCGS# 8908

**4960 1854 Small Date XF40 NGC.** The Small Date variety of the 1854 double eagle is more plentiful than the Large Date coin, ideal for date or type representation. This lightly circulated piece displays partially lustrous fields and straw-gold coloration. Scattered abrasions are light and unobtrusive. NGC ID# 268R, PCGS# 8911

**4961 1854 Small Date XF45 PCGS.** An attractive Small Date coin with natural honey-gold patina overlaid with delicate olive accents. Detail is good for the grade and abrasions are minimal. Ideal for the collector seeking a coin with old-time coloration. NGC ID# 268R, PCGS# 8911

**4962 1854 Small Date XF45 PCGS.** Small Date. Rich, straw-gold color has an olive-gold tinge and retains a hint of luster throughout the Choice XF surfaces of this originally toned, minimally abraded 1854 twenty. Smooth wear on the high points of Liberty's curls and bun attest to the moderate time spent in Western commerce, yet most of the devices retain grade-consistent sharpness. The natural eye appeal is worth noting. NGC ID# 268R, PCGS# 8911

**1854 Small Date Double Eagle, AU58  
Lustrous Yellow-Gold Example**

**4963 1854 Small Date AU58 PCGS.** Two different size logotypes were used to impress the date on double eagle dies in 1854. This coin represents the more available Small Date variant. The design elements are sharply detailed, showing just a touch of wear on the high points. Pleasing yellow-gold surfaces exhibit a scattering of minor contact marks with vibrant mint luster on both sides. There are 36 finer grading events at PCGS (2/19).  
*Ex: Long Beach Signature (Heritage, 6/2013), lot 4829, where it brought \$4,883.75. NGC ID# 268R, PCGS# 8911*

**1854 Double Eagle, XF45  
Challenging Large Date Variety**

**4964 1854 Large Date XF45 PCGS.** The *Guide Book* now distinguishes between Large Date and Small Date varieties, with prices reflecting the relative rarity of this logotype. Winter estimates only 10% of the more than three-quarters of a million 1854 double eagles minted feature a Large Date. There are a couple of distracting linear marks on Liberty's chin and below star 4. However, surprisingly effusive remaining mint luster and medium yellow-gold color make this an appealing example of the challenging type. NGC ID# 268S, PCGS# 98911

**4965 1855 — Obverse Lamination — XF45 NGC.** The advent of the San Francisco Mint reduced mintages of twenties at Philadelphia, to about one-sixth of the 1852 production. This moderately circulated caramel-gold representative has a narrow streak of struck-in grease that extends from the E in LIBERTY to obverse star 7. Less abraded than expected, though we note an unobtrusive reverse rim knock at 3:30. NGC ID# 268V, PCGS# 8914

**1855-S Double Eagle, AU58  
Well-Preserved Surfaces, CAC Endorsement  
Ex: S.S. Central America**

**4966 1855-S Broken A, Full E, Variety 14A, AU58 PCGS. CAC.** Ex: S.S. Central America, SSCA 6263. Much like the 1856-S and 1857-S, nearly all near-Mint or Mint State 1855-S double eagles come from shipwreck recoveries — usually, from the S.S. Central America or S.S. Republic. This is a minimally circulated example, with a touch of wear on Liberty's hair bun and at the eagle's neck and wingtips. Thickly frosted and finely grained medium-gold surfaces retain considerable mint luster and overall sharpness. The sole mark of note is a small obverse rim indent with encrustation at 1 o'clock. Housed in its original gold foil PCGS holder of issue, with CAC endorsement. NGC ID# 268X, PCGS# 70040 Base PCGS# 8916

**1856 Twenty Dollar, AU55  
Scarce Philadelphia Issue**

**4967 1856 AU55 NGC.** Doug Winter has estimated that somewhere around 600 examples of the 1856 double eagle survive from a mintage of 329,878 coins. This above-average Choice AU example features strong central detail and partial remaining luster. Abrasions left of the eye and in the right reverse field are the ones we feel merit mention. NGC ID# 268Y, PCGS# 8917

**1856 Double Eagle, MS60  
Low Survival Rate, Rare in Mint State**

**4968 1856 MS60 PCGS.** The 1856 double eagle issue is scarcer than generally realized, despite a mintage of more than 329,000 coins. Only a few dozen submissions have crossed the Mint State threshold at the two leading services. This example offers fulsome, sweeping mint luster over attractive, well-struck apricot-gold surfaces. While extensive scrapes and abrasions on both sides limit the grade to basal Mint State, much eye appeal is present. Population: 4 in 60, 32 finer (2/19). NGC ID# 268Y, PCGS# 8917

**1856-S Double Eagle, MS61**

- 4969 1856-S MS61 NGC. Variety 12C.** The “Full Serif, Bold S” die variety, as designated by S.S. *Central America* numismatist Robert Evans. The origin of the present Uncirculated example is unknown, but it has the “look” of an S.S.C.A. double eagle. Careful rotation beneath a light reveals minor hairlines but no mentionable marks. A well-struck and attractive honey-gold example from the early years of the San Francisco Mint. Census: 22 in 61, 13 finer (2/19). NGC ID# 2692, PCGS# 8919

**1857 Twenty Dollar, AU58  
Underrated in High Grades**

- 4970 1857 AU58 NGC.** This Philadelphia No Motto twenty issue is underappreciated in AU and Mint State grades, providing collectors the opportunity to obtain a genuinely scarce high-end example for a reasonable price. This near-Mint representative displays razor-sharp central elements that soften toward the margins. Straw-gold surfaces are lightly abraded and retain much luster. NGC ID# 2693, PCGS# 8920

**1857 Liberty Twenty, MS60  
Elusive Issue in Mint State**

- 4971 1857 MS60 PCGS.** The 1857 Liberty double eagle claims an adequate mintage of 439,375 pieces but, unlike its 1857-S counterpart, the issue has not been well-represented in shipwreck finds. As a result, the 1857 is seldom encountered in Mint State grades. This well-detailed MS60 example exhibits lustrous orange-gold surfaces that are lightly marked for the grade. Population: 13 in 60, 58 finer (3/19). NGC ID# 2693, PCGS# 8920

**1857-S Twenty Dollar, MS61  
Ex: S.S.C.A., Better Variety 20G**

- 4972 1857-S MS61 NGC. Variety 20G.** Ex: S.S. *Central America*. A thoroughly lustrous canary-gold coin with great visual appeal for the designated third-party grade. Variety 20G is the conditionally scarce “No Serif, High S” variety, identified by a mint-uncorrected U in UNITED and a northeast placement of the mintmark. Ex: *Dallas Signature* (Heritage, 11/2005), lot 4463, which realized \$4,887.50. NGC ID# 2696, PCGS# 8922

**1857-S Double Eagle, MS65  
Spiked Shield, S.S. Central America**

- 4973 1857-S MS65 NGC. Variety 20A.** Ex: S.S. *Central America*. A pair of needle-thin die lines near the left shield border confirm the “Spiked Shield” variety, the best-known die marriage from the famous “Ship of Gold” maritime disaster. The radiant apricot-gold surfaces are remarkably devoid of abrasions, with a higher grade denied only by delicate contact on the cheekbone and bust tip. The strike is intricate and the eye appeal is outstanding. Although the S.S. *Central America*, *Brother Jonathan*, and S.S. *Republic* shipwrecks have made Type One double eagles available in nice Mint State, such pieces remain desirable as high-grade representatives of the design. Includes wooden presentation box and certificate of authenticity.  
**From The Jersey Shore Gold Collection.** NGC ID# 2696, PCGS# 8922

1857-S Twenty Dollar, MS65  
Ex: S.S. *Central America*

1857-S Spiked Shield Twenty, MS65  
Variety 20A, Ex: S.S. *Central America*

**4974** 1857-S Spiked Shield, Variety 20A, MS65 PCGS. Ex: S.S. *Central America*. SSCA 0330. A lustrous orange-gold Gem that boasts a crisp strike and splendidly unabraded surfaces. The right reverse displays medium steel-gray patina, deepest near the TY in TWENTY. The "Spiked Shield" is prevalent among high-grade '57-S twenties recovered from the famous antebellum shipwreck. It can be identified upon first glance by the pair of slender die lines near the left shield border. Probably, the variety constituted the most recent delivery of the denomination by the San Francisco Mint to local banks, at the time that the S.S. *Sonora* left the Golden State for Panama on August 20, 1857. The gold shipment crossed the isthmus before its fateful journey on the S.S. *Central America*. Housed in a gold label holder. NGC ID# 2696, PCGS# 70000 Base PCGS# 8922

**4975** 1857-S Spiked Shield, Variety 20A, MS65 PCGS. Ex: S.S. *Central America*, SSCA 0003. When head S.S. *Central America* head scientist Bob Evans began his examination of double eagles from the famous treasure, he began sorting them according to die characteristics, and assigned names to many of the reverse die traits, such as the Spiked Shield that has raised engraving lines through the lower left border of the shield. This Gem is an example of that variety, designated Variety 20A, that exhibits outstanding surfaces and frosty orange luster with full mint brilliance. This piece is sharply struck with minimal grade-consistent marks and excellent eye appeal. Housed in a gold label holder. NGC ID# 2696, PCGS# 70000 Base PCGS# 8922

**4976** 1858-S AU53 PCGS. The 1858-S double eagle is a rarity in Uncirculated grades, and such coins almost always show unsightly abrasions. This attractive AU alternative is smooth and partly lustrous with olive-gold and peach-orange hues. Detail is sharp, adding to the eye appeal.  
*From The Morris Collection.* NGC ID# 2699, PCGS# 8925

**1858-S Double Eagle, AU58  
Rich Orange-Gold Color**

- 4977 1858-S AU58 PCGS.** Medium S. Nearly full mint luster brightens the rich orange-gold surfaces of this Choice AU double eagle. Lilac accents color the recessed areas. Most of the 846,710 1858-S twenties minted found their way into circulation. Mint State examples are seldom encountered, with only 50 such pieces certified by PCGS and NGC combined. This near-Mint representative is an attractive alternative. PCGS has graded 26 finer submissions (2/19).  
*Ex: Central States Signature (Heritage, 4/2015), lot 6408, lot \$4,700. NGC ID# 2699, PCGS# 8925*

**1858-S Twenty Dollar, MS61  
Rarely Offered in Mint State**

- 4978 1858-S MS61 PCGS.** The 1858-S double eagle is rarely offered in Mint State, and only a handful of coins are known finer than this piece. Luster cartwheels in the fields, leaving the boldly struck central devices luminous. Orange-gold luster exhibits scattered abrasions consistent with the grade. Population: 18 in 61, 3 finer (2/19). NGC ID# 2699, PCGS# 8925

**1858-S Twenty Dollar, MS61  
A Rarity in Mint State**

- 4979 1858-S MS61 PCGS.** *Ex: The Fairmont Collection.* Unlike the 1857-S, the 1858-S double eagle is rare in Uncirculated condition, not benefiting from the discovery of shipwreck treasures. This piece displays peach-gold and rose-tinted luster in the fields, with greenish-gold patina where abrasions are the heaviest. Moderate abrasions on each side are typical of the grade. Few finer 1858-S double eagles are known. Population: 18 in 61, 3 finer (3/19). NGC ID# 2699, PCGS# 8925

**1858-S Double Eagle, MS61  
Two Coins Finer at NGC**

- 4980 1858-S MS61 NGC.** Medium S. Whereas other San Francisco double eagles from this period, namely the 1856-S and 1857-S, survive by the thousands in mint condition thanks to shipwreck recoveries, the 1858-S remains a rarity in Uncirculated grades. Probably few more than two dozen such pieces exist. This lustrous, yellow-gold MS61 double eagle is minimally abraded for the grade and fully struck. There are a few hairlines on each side and a planchet void (as-made) on the shield. Census: 18 in 61, 2 finer (3/19). NGC ID# 2699, PCGS# 8925

**1859-S Double Eagle, Choice AU  
Significant Mint Luster Remains**

- 4981 1859-S AU55 NGC.** CAC. Medium S. The 1859-S is a typical double eagle issue of the period, accessible in circulated grades but conditionally scarce in Mint State. This Choice About Uncirculated example retains significant luster in the fields, with well-detailed devices and bright yellow-gold color. A couple old abrasions to the right of the mintmark are the only singularly noticeable surface flaws. There is a faint dash below the 1 in the date, similar to that seen on many 1880-CC Morgan dollars.  
*Ex: Summer FUN Signature (Heritage, 7/2015), lot 3351, where it realized \$3,995. NGC ID# 269C, PCGS# 8928*

**1859-S Double Eagle, AU58  
Abundant Remaining Mint Luster**

- 4982 1859-S AU58 PCGS.** Medium S. Practically full strike detail appears on the stars, legends, and feathers, while the curls display the usual incompleteness for a No Motto twenty. Minor rub appears on the high points of this lustrous near-Mint representative. Sun-gold accents around the rims lighten to peach-gold centers. Small ticks and hairlines are noted, but none distract. The 1859-S is elusive this nice and becomes scarce any finer. NGC ID# 269C, PCGS# 8928

---

**1859-S Twenty Dollar, Appealing MS60**

**4983 1859-S MS60 PCGS. CAC.** Ex: The Fairmont Collection. This Uncirculated No Motto twenty from the San Francisco Mint has the original "crusty" look that specialists admire and appreciate. Both sides are heavily bagmarked, but detail is relatively good for the type and medium green-gold color is undeniably attractive. Population: 9 in 60, 41 finer. CAC: 6 in 60, 3 finer (3/19). NGC ID# 269C, PCGS# 8928

---

**1859-S Twenty Dollar, Original MS60**

**4984 1859-S MS60 PCGS. CAC.** Ex: The Fairmont Collection. Medium S. The 1859-S is scarce in any Uncirculated condition, with just 40 to 50 pieces believed extant across all MS levels, according to Doug Winter. This MS60 coin has the original "crusty" look that specialists appreciate. Reddish-gold surfaces maintain glowing luster around the well-detailed devices. Of the myriad abrasions, only a slender mark in the left obverse field deserves mention. CAC endorsement confirms the overall quality and eye appeal. Population: 9 in 60, 41 finer. CAC: 6 in 60, 3 finer (3/19). NGC ID# 269C, PCGS# 8928

**4985 1860 AU55 NGC.** From a mintage of 577,670 pieces, the 1860 Liberty double eagle is not as available as its 1861 counterpart in high grade, but attractive examples can be located with a little patience. This Choice AU specimen offers lustrous orange-gold surfaces, with the usual number of minor abrasions, and some light wear on the design elements. NGC ID# 269D, PCGS# 8929

---

**1860 Double Eagle, MS61  
A More-Attainable Type One Issue**

**4986 1860 MS61 PCGS.** Although hardly a common date, this issue (with a mintage of nearly 600,000 pieces) is one of the more attainable Philadelphia Mint Type One double eagles in mint condition. It is much scarcer than the 1861 issue, the most plentiful Type One twenty from this Mint. The peach-gold surfaces on this example display traces of light tan color on portions of the central devices, and exhibit some grade-limiting contact marks and scuffs on Liberty's face and neck and in the left obverse field. The design elements are bold. Population: 42 in 61, 25 finer (2/19). Ex: *Long Beach Signature* (Heritage, 6/2010), lot 1828, where it brought \$6,900. NGC ID# 269D, PCGS# 8929

---

**1860 Twenty Dollar, MS62  
Rarely Offered This Fine**

**4987 1860 MS62 PCGS.** The 1860 is the most plentiful of the three double eagles of this date in Mint State, although the majority of the Uncirculated survivorship grades no finer than MS61. This MS62 coin is rare, and finer pieces are out of reach for many collectors. Well-struck design elements and frosty peach-gold and sun-yellow luster characterize each side, while grade-limiting abrasions are minimal. Population: 14 in 62 (3 in 62+), 11 finer (3/19). NGC ID# 269D, PCGS# 8929

**4988 1860-S AU50 NGC.** Traces of luster rest in the protected areas of this AU S-mint specimen. The design elements are generally well-defined. A linear abrasion occurs on Liberty's cheek, but other abrasions are minor. Ex: *Summer FUN Signature* (Heritage, 7/2009), lot 1984, realized \$1,840. NGC ID# 269F, PCGS# 8931

**1860-S Double Eagle, AU58**  
**From the S.S. Republic Shipwreck**

- 4989** 1860-S AU58 NGC. Ex: S.S. Republic. The 1860-S is collectible in XF and AU grades, but the issue becomes rare in Mint State, despite the recovery of many Type One twenties from the 1865 shipwreck of the S.S. Republic. The present sun-gold Borderline Uncirculated example displays substantial luster, and is smooth aside from moderate contact on the left obverse field. Includes original wooden presentation box and certificate of authenticity. **From The Jersey Shore Gold Collection.** NGC ID# 269F, PCGS# 8931

**1860-S Twenty Dollar, AU58**  
**Minimally Abraded, Great Eye Appeal**

- 4990** 1860-S AU58 PCGS. CAC. Medium S. This early Type One San Francisco issue circulated extensively. Mint State survivors are rarely offered and usually have unsightly abrasions that reduce visual appeal. This CAC-approved near-Mint coin enjoys partially lustrous olive and peach-gold surfaces with bold design elements and only slight high-point friction. Few abrasions are observed, surprising considering the reputation of Type One S-mint twenties in this grade for having extensive surface contact. CAC: 38 in 58, 6 finer (2/19). NGC ID# 269F, PCGS# 8931

**1860-S Double Eagle, Rare MS61**

- 4991** 1860-S MS61 PCGS. Original orange-gold and peach luster illuminates frosty surfaces on this Mint State 1860-S double eagle. The design elements are well-struck and there is no evidence of die lapping in the recesses of the devices. Scattered light abrasions limit the grade but none are individually bothersome. The 1860-S double eagle is plentiful in circulated grades, but it becomes a great rarity in Mint State. Moreover, there are only a couple of coins known finer than MS62, and no Gems are believed to survive. In their gold coin *Encyclopedia*, Garrett and Guth write: "The 1860-S double eagle was struck in ample quantity and was a workhorse of commerce. Most of the coins struck saw heavy circulation. ... Only about two dozen Uncirculated coins are known, including examples found on the wrecks of the S.S. Brother Jonathan and S.S. Republic." Population: 16 in 61, 13 finer (3/19). NGC ID# 269F, PCGS# 8931

- 4992** 1861 XF40 NGC. Hints of luster remain in the protected areas of the fields, complementing lightly worn devices. There is a small reed mark in the upper left obverse field, but no other singular abrasions are worthy of mention. The 1861 double eagle is a popular date among type collectors, coming from a mintage of nearly 3 million pieces. NGC ID# 269G, PCGS# 8932

- 4993** 1861 XF40 NGC. A collector-grade type coin with little wear and relatively smooth surfaces. The bright yellow-gold fields retain tiny remnants of luster in the most protected areas around the peripheries. Light surface chatter is also apparent. NGC ID# 269G, PCGS# 8932

**1861 Double Eagle, AU58**  
**Well-Struck and Preserved**

- 4994** 1861 AU58 PCGS. Even a nominal amount of friction is difficult to discern over the high points of this borderline-Uncirculated twenty dollar. Mint luster is mostly undisturbed, particularly on the reverse, and the medium yellow-gold surfaces exhibit excellent preservation. Well-struck, if typically incomplete over the middle hair curls. NGC ID# 269G, PCGS# 8932

**1861 Double Eagle, AU58**  
**Attractive Color, Surfaces**

- 4995** 1861 AU58 NGC. Perhaps because of the Civil War, nearly three million double eagles were struck at Philadelphia during 1861, a record for the denomination that would stand until 1904. But original and lightly abraded near-Mint examples remain popular. This partly lustrous representative offers blended lime-green and apricot toning. The wingtips and curls show only a whisper of wear. Certified in a circa-2000 holder. NGC ID# 269G, PCGS# 8932

**1861 Double Eagle, Still-Lustrous AU58**

- 4996** 1861 AU58 NGC. Frosty luster glows around the relief elements on each side of this yellow-gold borderline-Uncirculated double eagle. Myriad abrasions and a hint of rub explain the assessment. This plentiful No Motto type coin issue was struck to the extent of almost 3 million pieces. NGC ID# 269G, PCGS# 8932

**1861 Double Eagle, AU58  
Bright and Frosty**

**4997 1861 AU58 PCGS.** The mass-produced 1861 double eagle (nearly 3 million coins) reflects heightened discoveries in the California gold fields that had to be converted into usable coinage. This near-Mint example maintains considerable brightness and a surprising degree of frosty luster over yellow-gold surfaces. There is a notable abrasion within the circle of stars on the reverse. NGC ID# 269G, PCGS# 8932

**1861 Twenty Dollar, MS61  
Type One Double Eagle**

**4998 1861 MS61 PCGS.** The 1861 double eagle was long the most available Type One issue in Mint State. However, since the salvage of several shipwrecks, especially the S.S. *Central America*, a few San Francisco issues such as the 1856-S and 1857-S are much more plentiful than they were decades ago. However, Mint State examples of those dates often carry a premium with their shipwreck pedigree. The 1861 remains a favorite for type collectors. This piece is well-struck and radiantly lustrous, showing bright yellow-gold mint luster. Moderate abrasions on Liberty's cheek limit the grade but are not overly bothersome. NGC ID# 269G, PCGS# 8932

**1861 No Motto Twenty, MS61  
Sharp, Bright, and Lustrous**

**4999 1861 MS61 PCGS.** This is a sharp, bright, and lustrous twenty dollar gold piece, well-suited to represent the No Motto type. Grazes and abrasions define the technical MS61 grade awarded by PCGS, but eye appeal is better than expected. Liberty's curls are notably strong, as are the stars on each side and the eagle's neck feathers. NGC ID# 269G, PCGS# 8932

**1861 Twenty Dollar, MS61  
Enduring Popularity as a Type Coin**

**5000 1861 MS61 NGC.** Prior to the discovery of the S.S. *Central America*, S.S. *Republic*, and S.S. *Brother Jonathan*, the 1861 Liberty double eagle was the issue of choice to represent the Type One or No Motto design double eagle. It is still a great type set choice with examples available in a wide range of grades, even up to MS65. This splendid piece exhibits rich yellow luster with frosty surfaces and minimal handling marks.  
Ex: *New York Signature* (Heritage, 10-11/2015), lot 3612, where it sold for \$5,405. NGC ID# 269G, PCGS# 8932

**1861 Twenty Dollar, MS61  
Blazing Mint Luster**

**5001 1861 MS61 NGC.** Luster is incredibly radiant on this bright yellow-gold type coin, and the reverse is far better preserved than typical for the grade. On the obverse, scattered light abrasions are apparent, but none are individually bothersome. Overall, the quality surpasses expectations for the grade on this 1861 Liberty Head twenty. NGC ID# 269G, PCGS# 8932

**5002 1862-S XF40 NGC.** Orange-gold and sea-green toning visits this moderately circulated Civil War double eagle. Pockets of luster are plentiful throughout the inoffensively abraded and evenly defined surfaces. Housed in a former generation holder. NGC ID# 269N, PCGS# 8938

**1862-S Twenty Dollar Liberty, AU58  
Still-Lustrous Surfaces**

**5003 1862-S AU58 NGC.** Ex: Duquesne. Although the 1862-S Liberty double eagle was well-represented in recent shipwreck finds, the issue remains rare in mint condition. This attractive near-Mint example exhibits lightly abraded orange-gold surfaces with much original mint luster and just a trace of wear on the well-detailed design elements. NGC has graded 34 numerically finer examples (3/19).  
Ex: *Duquesne Collection / ANA Signature* (Heritage, 8/2015), lot 6380, where it realized \$6,462.50. NGC ID# 269N, PCGS# 8938

---

1863 Twenty Dollar, AU Details  
Smooth and Satiny

- 5004 1863 — Cleaned — NGC Details. AU. The Philadelphia Mint struck fewer than 143,000 double eagles in 1863, making this issue elusive today compared to most other Type One P-mint issues. AU coins are scarce, and Mint State pieces are rare. This AU-level coin displays bold detail and smooth, luminous orange-gold surfaces. Hairlines on each side suggest a light cleaning, although there are minimal detrimental effects to the eye appeal. NGC ID# 269P, PCGS# 8939

---

1863 Liberty Double Eagle, AU50  
Attractive Color and Luster

- 5005 1863 AU50 PCGS. From a smallish wartime Philadelphia mintage of 142,790 pieces, this impressive Type One double eagle shows only light wear on the high points of the design and the vivid orange-gold surfaces are lightly abraded. Most of the original mint luster remains intact and overall eye appeal is strong. Housed in a green label holder. Population: 18 in 50, 90 finer (3/19). NGC ID# 269P, PCGS# 8939

---

1863-S Double Eagle, MS60  
Smooth Surfaces, Sharp Strike

- 5006 1863-S MS60 NGC. Breen-7216. Medium S. Splendidly smooth apricot-gold surfaces ensure the eye appeal of this Mint State Civil War double eagle. Wear is absent, and luster illuminates the margins and motifs. The issue is typically encountered in XF or AU grades, since the date preceded large shipments of gold coin to foreign bank holdings. NGC ID# 269R, PCGS# 8940

---

1863-S Twenty Dollar, MS60  
Small S, Civil War-Era Issue

- 5007 1863-S MS60 PCGS. Breen-7217. Small S. The 1863-S has a mintage that approaches 1,000,000 pieces, but Uncirculated examples are very scarce, despite small numbers recovered from the *Brother Jonathan* and the *S.S. Republic*. The pumpkin-gold surfaces show marks consistent with the MS60 level, but luster accompanies design elements. The reverse border displays interesting advanced die cracks. NGC ID# 269R, PCGS# 8940

---

1864-S No Motto Twenty, AU58  
Scarce This Nice

- 5008 1864-S AU58 PCGS. Small S. The 1864-S double eagle is a better date in high grade, scarce in AU58 through MS62, with only a handful of survivors known finer above that level. This near-Mint coin displays a bold impression for the issue, struck from unlapped dies, with frosty orange-gold luster remaining within the protected areas. Scattered abrasions accompany a brush of high-point wear. NGC ID# 269T, PCGS# 8942

---

1865 Liberty Double Eagle, AU58  
Type One Philadelphia Issue

- 5009 1865 AU58 NGC. From a modest business-strike mintage of 351,175 pieces, the 1865 Liberty double eagle was extremely rare in Mint State grades before 320 relatively high-grade specimens were recovered from the wreck of the *S.S. Republic*. This impressive near-Mint specimen shows minimal wear on the well-detailed design elements and the lightly abraded yellow and rose-gold surfaces retain traces of original mint luster. NGC ID# 269U, PCGS# 8943

**1865-S Double Eagle, MS62  
Old-Time Luster**

**5010 1865-S MS62 PCGS.** This is a lustrous Mint State coin with natural greenish-gold and wheat-colored mint luster, showing sharp design elements. A lone mark on the hair curls over Liberty's temple is worthy of note, but other abrasions are light and scattered. This piece shows numerous spindly die cracks around the obverse periphery, plus radial cracks through the 5 in the date and down from the dentils near star 7. NGC ID# 269V, PCGS# 8944

**1866 Motto Twenty Dollar, AU58  
Nearly Full Frosty Mint Luster**

**5013 1866 Motto AU58 PCGS. CAC.** Representatives from 1866 — the first year of the design that included IN GOD WE TRUST — are always popular with collectors. This near-Mint example displays sun-gold surfaces along with nearly full frosty mint luster. Surface marks are scattered throughout both sides but none are especially distracting. CAC: 24 in 58, 17 finer (2/19). NGC ID# 269X, PCGS# 8949

**1866 With Motto Double Eagle, AU55  
Lustrous First-Year Type Coin**

**5011 1866 Motto AU55 NGC.** The Philadelphia Mint struck only With Motto double eagles in 1866, and this issue has limited survivorship in Uncirculated grades. Most such pieces are heavily abraded. Offered here is a collector-grade AU55 coin with substantial field luster and bright yellow-gold surfaces. Only a brush of wear is evident across the high points of the obverse devices. NGC ID# 269X, PCGS# 8949

**1867 Type Two Twenty, MS61  
Elusive Grade Rarity**

**5014 1867 MS61 PCGS.** Jeff Garrett and Ron Guth report that the Smithsonian Institution lacks a circulation strike example of this issue. This sharply defined representative has reflective fields that exhibit trivial marks, with brilliant orange-gold luster and excellent aesthetic appeal. PCGS has only certified 58 finer submissions (2/19). NGC ID# 269Z, PCGS# 8951

**1866 With Motto Double Eagle, AU58  
Lustrous Collector-Grade Example**

**5012 1866 Motto AU58 PCGS.** Famously rare in high Mint State grades, the 1866 Motto twenty is also scarce in low Uncirculated and near-Mint conditions. This solid AU58 displays nearly full mint luster despite its short stint in circulation. Minute bagmarks pepper the surfaces, but there are no individually heavy marks, and the strike is sharp. Flashy medium-gold color mimics a fully Mint State coin. Population: 78 in 58 (4 in 58+), 65 finer (3/19). NGC ID# 269X, PCGS# 8949

**1867-S Double Eagle, Choice AU  
Scarce Large S Mintmark**

**5015 1867-S AU55 NGC.** Large S mintmark. The 1867-S either circulated widely or ended up in the melting pot — few Mint State pieces exist, although some European repatriates have achieved the low end of the Uncirculated scale. This is a brilliant, Choice About Uncirculated coin, with bright yellow-gold surfaces and mint luster in protected areas throughout both sides. Light abrasions and a few hairlines exist on the frosted surfaces. A sharp strike remains, with a bit of softness at stars 10 to 13. NGC ID# 26A2, PCGS# 8952

---

**1868-S Double Eagle, AU58**  
**Low Survival S-Mint Date**

**5016 1868-S AU58 NGC.** Surviving 1868-S double eagles seldom exceed the XF level. Most of the 837,500-piece mintage was released into West Coast circulation, and the balance of the mintage went abroad. This near-Mint example is far above average, with a sharp strike except for the date, which was weakly impressed into the die. Pale orange-gold surfaces show a group of abrasions in the lower-left obverse field, and a scattering of tiny marks elsewhere. NGC reports just 44 numerically finer pieces, most of which are repatriated coins from foreign holdings (3/19). NGC ID# 26A4, PCGS# 8954

---

**1868-S Liberty Twenty, AU58**  
**Lustrous and Lightly Worn**

**5017 1868-S AU58 NGC. CAC.** The pleasing yellow and rose-gold surfaces of this impressive near-Mint example retain most of their original mint luster and show only minor abrasions and chatter in the fields. A few amber alloy spots are evident on the reverse. The well-detailed design elements exhibit just a trace of wear on the high points. NGC has graded 44 numerically finer examples (3/19). NGC ID# 26A4, PCGS# 8954

---

**1868-S Double Eagle, AU58**  
**Lustrous, Original Color**

**5018 1868-S AU58 NGC. CAC.** Small Squat S. Most surviving 1868-S Type Two double eagles grade between XF and AU. This near-Mint twenty is undeniably at the upper end of that range, and finer coins are scarce. Blatantly original green and rose-gold surfaces radiate frosty luster that remains vibrant despite a short stint in circulation. Evidence thereof occurs in the form of barely perceptible friction. The devices display good detail, and myriad abrasions occur over each side. NGC ID# 26A4, PCGS# 8954

---

**1868-S Liberty Double Eagle, AU58+**  
**Elusive Issue in Higher Grades**

**5019 1868-S AU58+ PCGS. CAC.** The 1868-S Liberty double eagle claims a substantial mintage of 837,500 pieces. Like most Type Two twenties, the 1868-S can be found in lower circulated grades with little trouble, but high-grade specimens are rare. This Plus-graded near-Mint example shows just a trace of wear on the well-detailed design elements and the lustrous orange-gold surfaces exhibit the expected number of minor abrasions for a large gold coin that spent some time in circulation. PCGS has graded 69 numerically finer examples (3/19). NGC ID# 26A4, PCGS# 8954

---

**1868-S Double Eagle, MS60**  
**Scarce in Mint Condition**

**5020 1868-S MS60 PCGS.** Small Squat S. All Mint State 1868-S double eagles are scarce, much more so than many of the early S-mint No Motto double eagles from the late 1850s to mid-1860s. This Uncirculated Type Two example enjoys frosty mint luster and appealing peach and yellow-gold coloration. Strike detail is slightly uneven, and myriad bagmarks are scattered across each side. Population: 28 in 60, 41 finer (3/19). NGC ID# 26A4, PCGS# 8954

---

**1868-S Twenty Dollar, MS60**  
**Lustrous Fields**

**5021 1868-S MS60 PCGS.** An Uncirculated coin, although heavily abraded, earning an MS60 grade from PCGS. The 1868-S double eagle is scarce in Mint State, and only one such coin is reported finer than the MS62 level. This collector-grade Mint State coin displays well-struck devices and has lustrous peach-gold surfaces. NGC ID# 26A4, PCGS# 8954

**1868-S Twenty, MS61**  
A Mint State Rarity

- 5022 1868-S MS61 NGC.** The combined PCGS and NGC population data shows just 52 examples have been graded MS61, and only 15 are finer (2/19). The average certified grade is a hair over AU50, and the finest example in the Smithsonian Institution grades just XF45. This Mint State piece exhibits dusky yellow surfaces and full mint luster with scattered, grade-consistent marks. Census: 20 in 61, 7 finer (2/19). NGC ID# 26A4, PCGS# 8954

**1868-S Liberty Twenty, MS61**  
Mint State Type Two Example

- 5023 1868-S MS61 PCGS. CAC.** Like most Type Two double eagles, the 1868-S is not difficult to locate in circulated grades, but Mint State coins are rarely encountered. This impressive MS61 example displays well-detailed design elements, with a touch of softness on some star centers. The pleasing orange-gold surfaces retain much of their original mint luster and show the expected number of minor contact marks for the grade. Population: 33 in 61, 8 finer. CAC: 7 in 61, 2 finer (3/19). NGC ID# 26A4, PCGS# 8954

- 5024 1869-S AU58 NGC.** Small Squat S. Mint luster is vibrant on this appealing coin. Rich orange-gold coloration appears on each side, and the surfaces show only a few scattered abrasions, though some are more significant than others. The reverse die exhibits several cracks and raised lumps.

*Ex: Summer FUN Signature (Heritage, 7/2011), lot 5028, where it brought \$3,737.50. NGC ID# 26A6, PCGS# 8956*

- 5025 1870-S AU58 NGC.** The various denominations for this date-mintmark combo run the gamut from plentiful for the double eagle, to rare for the eagle, to extremely rare for the silver dollar, to unique for the three dollar gold and half dime. This near-Mint State double eagle offers lovely orange-gold surfaces with good luster and only minor, scattered abrasions that are a bit more prominent on the reverse.

*Ex: Central States Signature (Heritage, 4-5/2010), lot 3903, where it realized \$2,990. NGC ID# 26A9, PCGS# 8959*

- 5026 1870-S AU58 NGC.** Scarce in full Mint State despite numerous repatriations from foreign hoards in recent years, the 1870-S remains a challenging San Francisco Type Two twenty. Neither the Bass Collection nor the Dallas Bank Collection had an Uncirculated example of the issue. This is a still-lustrous, near-Mint example, with sharp stars and pleasing medium-gold surfaces. Liberty's hair strands are disconnected at the bun from die lapping. As expected, light marks and abrasions exist, but they are less frequent than on many higher-grade coins. NGC ID# 26A9, PCGS# 8959

**1871 Twenty Dollar, MS60**  
Scarce in Mint Condition

- 5027 1871 MS60 PCGS.** Any Mint State representative of the 1871 Type Two double eagle is conditionally scarce, with only those in MS60 and MS61 being somewhat obtainable, and even they would be a stretch for most collectors. This lustrous twenty dollar gold piece displays full star radials and a normal amount of central softness. Many small abrasions peppered over each side explain the grade. Destined for a high-end set of Liberty Head twenties. Population: 9 in 60, 17 finer (3/19). NGC ID# 26AA, PCGS# 8960

- 5028 1871-S AU58 NGC.** Small Squat S mintmark. Nearly full mint luster remains on this briefly circulated near-Mint San Francisco twenty. Brilliant, yellow-gold surfaces show a few light abrasions and field chatter, with some high point softness on Liberty's top hair strands and the bun. The stars remain sharp, and the reverse appears fully Mint State. The coin displays mint-fresh eye appeal and flash. NGC ID# 26ND, PCGS# 8962

- 5029 1872 AU55 NGC.** Bright mint luster shines effusively from this light wheat-gold double eagle in Choice About Uncirculated condition. A hint of rub and myriad ticks explain the grade, but definition remains good for a Type Two twenty. Barely more than a quarter-million pieces were struck in 1872.

*Ex: Central States Signature (Heritage, 4/2011), lot 12225, where it brought \$1,840. NGC ID# 26AD, PCGS# 8963*

**1872-CC Twenty Dollar, XF45**  
Third Year of Issue for the CC Mint

- 5030 1872-CC XF45 NGC. Variety 1-A.** Although Carson City had produced double eagles for only two years previously, the 1872-CC mintage was a respectable 26,900 pieces, and examples today are available in Choice XF to AU condition. This piece shows a single mentionable arcing scrape from below the chin, through the bust truncation and above the 72, but otherwise there are no singular marks. The yellow-gold surfaces display considerable retained luster.

*Ex: Central States Signature (Heritage, 4/2008), lot 3788; Long Beach Signature (Heritage, 9/2008), lot 4130, where it sold for \$5,175. NGC ID# 26AE, PCGS# 8964*

- 5031 1872-S AU58 PCGS. CAC.** Small Squat S. Hints of olive appear on the high points on each side of this near-Mint example. Despite a substantial production, true Mint State pieces are elusive, and this just-miss piece is the next best thing. The surfaces are frosty with nearly full luster.

*Ex: Long Beach Signature (Heritage, 2/2011), lot 4625, where it realized \$2,185. NGC ID# 26AF, PCGS# 8965*

**1872-S Liberty Twenty, AU58  
Seldom Seen Prooflike Example**

- 5032 1872-S AU58 Prooflike NGC.** Micro S mintmark. Although readily available in circulated grades through low-level About Uncirculated, the 1872-S becomes scarce in Choice About Uncirculated or finer conditions. This is a lightly circulated, brightly prooflike example, which shows fine abrasions and field chatter with a touch of wear. The fields are clearly mirrored throughout both sides, tempered by tiny marks. It is highly unusual to see this sharply struck Type Two twenty with designated Prooflike surfaces, one of only two pieces reported as such in all grades. Census: 2 in 58 Prooflike, 0 finer (2/19).  
*From The Jersey Shore Gold Collection.* NGC ID# 26AF, PCGS# 78965

**1873 Liberty Twenty, MS62  
Open 3 Variant, Scarce This Sharp**

- 5033 1873 Open 3 MS62 NGC. CAC.** The lion's share of the Philadelphia Mint's 1.7 million double eagles struck in 1873 were the Open 3 variety. Like all Type Two issues, it is scarce in Mint State and rare in Choice grade. This attractive MS62 is a couple of notches below that level, yet as its CAC endorsement suggests, it is sharp for the grade. Abrasions are a minor factor, and the rich-gold surfaces display plentiful mint luster. The eye appeal is exceptional. NGC ID# 26AL, PCGS# 8967

- 5034 1873 Open 3 MS60 Prooflike NGC.** The 1873 Open 3 double eagle is relatively plentiful, although just eight coins are designated Prooflike at NGC. This Mint State example displays a bold strike and abraded yellow-gold surfaces, consistent with the grade. The fields are deeply reflective, producing added eye appeal. Census: 2 in 60 Prooflike, 4 finer (2/19).  
*Ex: Houston Signature (Heritage, 12/2008), lot 9475, which realized \$2,012.50.*  
*From The Jersey Shore Gold Collection.* NGC ID# 26AH, PCGS# 78967

**1873-S Double Eagle, MS61  
Closed 3 Date Logotype**

- 5035 1873-S Closed 3 MS61 PCGS.** Although the change from the Closed 3 to the Open 3 occurred early in the year for all coinage denominations, the 1873-S Closed 3 is more plentiful than the Open 3 style. In all grades, PCGS has certified more than 1,600 Closed 3 examples and less than 600 Open 3 pieces. This is an excellent type coin for the Type Two design. Sharply struck and brilliant with complete luster on its yellow-gold surfaces, this lovely piece has trivial, grade-consistent marks. NGC ID# 26AL, PCGS# 8969

**1874 Liberty Twenty, MS62  
Type Two Philadelphia Issue**

- 5036 1874 MS62 NGC. CAC. Ex: Granite Lady Hoard.** While most of San Francisco burned in 1906 leaving more than half of its 500,000+ population homeless, the United States Mint building survived and earned the nickname "the Old Granite Lady." Monaco Rare Coins availed itself of the moniker, and NGC certified many Liberty Head double eagles with the Granite Lady Hoard pedigree.

This 1874 example is a better Type Two issue and is rare any finer, although as a Philadelphia issue one would think its only association with The Granite Lady is the date (the second San Francisco Mint operated from 1874 to 1937). Khaki-gold surfaces display pleasing mint luster throughout both sides and a relatively sharp strike. Abrasions are grade-consistent with a small scrape noted across the lower loop of the 8 in the date. Nice eye appeal remains, as confirmed by the CAC endorsement. Census: 23 in 62, 1 finer. CAC: 7 in 62, 0 finer (3/19). NGC ID# 26AN, PCGS# 8970

**1874-CC Double Eagle, XF45**  
**Smooth, Appealing Surfaces**

- 5037 1874-CC XF45 NGC. Variety 5-A.** The 1874-CC is moderately plentiful among Carson City double eagles, ideal for collectors seeking a single coin from this mint. Offered here is a Choice XF example with bold detail and pleasing straw-gold patina. Hints of luster remain in the protected areas of the fields, and the surfaces are surprisingly smooth for the grade.  
*From the Lake County Collection.* NGC ID# 26AP, PCGS# 8971

**1874-CC Double Eagle, AU53**  
**Popular Type Two Issue**

- 5038 1874-CC AU53 NGC. Variety 4-A.** The Carson City Mint coined double eagles intermittently from 1870 to 1893 with a total combined production of 864,128 coins from 19 different yearly issues. More than 40% of that total was minted from 1874 to 1876, including 115,085 coins in 1874. This almond-gold CC-mint twenty has a typically abraded obverse, while the reverse displays comparatively few marks. Pockets of luster are prevalent. NGC ID# 26AP, PCGS# 8971
- 5039 1874-S MS61 PCGS. Small Squat S.** This Type Two double eagle is virtually as strong as any collector could hope to obtain. Partial mint frost emanates from the protected areas on each side of this honey-gold example. Scarcely seen finer despite the plentiful 1.2 million-coin mintage. NGC ID# 26AR, PCGS# 8972
- 5040 1874-S MS61 NGC. CAC.** Scarce in attractive Mint State and rare any finer than the MS62 level, this lustrous and sharp MS61 approaches the next-finer grade level. Partially prooflike fields surround deeply struck, frosted motifs. The obligatory bagmarks are at a minimum for the assigned grade, and bright mint luster illuminates gleaming, rich-gold surfaces. CAC endorsed. NGC ID# 26AR, PCGS# 8972

**1874-S Double Eagle, MS62**  
**Rare CAC-Approved Coin**

- 5041 1874-S MS62 PCGS. CAC.** Uncirculated examples of this Type Two San Francisco issue are scarce, and only a handful of coins are known finer than the present. This is a rare piece with CAC endorsement. Original luster on each side illuminates peach-gold patina and bold devices. Scattered light abrasions limit the grade but are not individually bothersome. PCGS lists only four finer submissions. CAC: 16 in 62, 1 finer (3/19). NGC ID# 26AR, PCGS# 8972
- 5042 1875 MS61 NGC. CAC.** A lustrous Mint State example of this Type Two Philadelphia issue, boasting the coveted CAC green label, which is seldom seen on Uncirculated 1875 twenties. The devices are sharp, and grade-limiting abrasions are light and uniformly scattered. NGC ID# 2547, PCGS# 8973
- 5043 1875 MS62 PCGS. CAC.** Coinage at the Philadelphia Mint in 1875 was limited to double eagles and that was just about it, with only token mintages of other gold denominations. Date collectors assemble en masse when an Uncirculated 1875 double eagle with CAC endorsement appears, as do series collectors and gold specialists. This sharp and attractive, frosted coin has far fewer marks than often seen for an MS62, with attractive harvest-gold color and vibrant mint luster. CAC: 45 in 62, 10 finer (2/19). NGC ID# 2547, PCGS# 8973
- 5044 1875-CC — Rim Filing — NGC Details. Unc. Variety 1-B.** A well-struck, vibrantly lustrous Uncirculated example of the 1875-CC double eagle, showing light luster grazes on the obverse but no singular abrasions or distractions. Each side has rich yellow-gold color. NGC denies a numeric grade due to rim filing, which has been carefully performed to the entirety of both rims, making the coin appear as though its rims are just curiously beveled. However, the file marks are evident with a loupe.

**1875-CC Twenty Dollar, Lustrous MS62**  
Impressively Smooth, Vibrant Fields

- 5045 1875-CC MS62 NGC. Variety 1-A.** The 1875-CC is an abundant Carson City Type Two twenty, with a mintage exceeding 111,000 coins. Many European repatriates have swelled the population reports over the past two decades. As usual for any Type Two issue, it is scarce in MS62 grade and rare any finer. The added cachet of its CC mintmark adds considerably to its demand regardless of the numeric grade.

This is a particularly attractive coin, with smooth and relatively unabraded semireflective fields. The frosted head of Liberty shows only light grazes and tiny marks, while the strike is sharp except for the center of the hair bun and the surrounding stars. Pleasing medium, orange-gold color sports bright mint luster throughout both sides. NGC reports just 26 numerically finer examples (3/19). NGC ID# 26AT, PCGS# 8974

- 5046 1875-S MS62 PCGS.** San Francisco double eagles were well-traveled in the 1870s — whether they were used in foreign trade, shipped by rail eastward, or circulated in local commerce. Bagmarks from rough handling took a toll on most survivors. Rose and lilac highlights bloom from the frosted, lustrous surfaces of this colorful 1875-S twenty. A bold strike exists, as do a few light abrasions. Few pieces exceed the MS62 level despite a mintage of more than 1.2 million pieces. PCGS reports just 29 numerically finer examples (3/19). NGC ID# 26AU, PCGS# 8975

- 5047 1876-CC VF30 NGC. Variety 1-A.** A midgrade example of the popular Centennial-year Carson City issue. The caramel-gold surfaces show few marks given the coin's service in Old West commerce. Liberty's curls and the eagle's wingtips display wear commensurate with the VF30 level.

*Ex: FUN Signature (Heritage, 7/2014), lot 9295, which realized \$2,232.50. NGC ID# 26AW, PCGS# 8977*

**1876-CC Double Eagle, AU50**  
Popular Old West Issue

- 5048 1876-CC AU50 NGC. Variety 6-A.** A tiny die chip behind Liberty's eye is an identifier for this infrequently encountered die marriage. A popular Type Two Carson City issue, the Centennial-year 1876-CC is nonetheless scarce relative to its San Francisco counterpart. The present lightly circulated example is well defined and shows only a single mentionable bagmark, between obverse stars 11 and 12. NGC ID# 26AW, PCGS# 8977

**1876-CC Double Eagle, Lustrous AU58**

- 5049 1876-CC AU58 PCGS. Variety 5-A.** The obverse shows die lines within the curls at Liberty's neck, and the right edge of the second C lines up with the left edge of (TWEN)T(Y). This yellow-gold Carson City twenty dollar remains lustrous despite a touch of high-point friction. The devices are impressively crisp for a Type Two double eagle, and myriad abrasions are expected. From a mintage of 138,441 coins. NGC ID# 26AW, PCGS# 8977

**1876-CC Liberty Double Eagle, AU58**  
Lightly Abraded Semiprooflike Fields

- 5050 1876-CC AU58 PCGS. Variety 7-C.** The 1876-CC Liberty double eagle is a popular branch mint type issue, from a substantial mintage of 138,441 pieces. This impressive near-Mint specimen exhibits just a trace of wear on the high points of the sharply detailed design elements. The pleasing orange-gold surfaces show some minor chatter in the fields, with hints of prooflike reflectivity in protective areas. A die lump above the E in LIBERTY and a die crack between E and R in AMERICA identifies the variety. NGC ID# 26AW, PCGS# 8977

- 5051 1876-S MS62 NGC. Block S.** Light yellow-gold color and reflective, semiprooflike fields are the hallmarks of this Uncirculated San Francisco double eagle. Sharply struck throughout, each side shows minor chatter that explains the MS62 grade. This issue claims an average certified assessment between AU55 and AU58, and examples are scarcely seen finer than this. NGC ID# 26AX, PCGS# 8978

**5052 1876-S MS62 PCGS.** Although the 1876-S is in itself not a rare issue, nice Uncirculated pieces are sought-after for type purposes. This is a bright and lustrous Type Two twenty with a few light grazes and a pair of short reeding marks on and to the left of the portrait. The fields are remarkably free of abrasions for the assigned grade. Orange accents enhance the attractive, sharply struck surfaces. NGC ID# 26AX, PCGS# 8978

**5053 1877 MS61 NGC.** The first year of issue for the new Type Three Liberty double eagle design with the denomination spelled out in its entirety as TWENTY DOLLARS. This lustrous Mint State example is highly attractive with rich honey gold color on partially reflective surfaces.

Ex: *Dallas Signature* (Heritage, 10/2009), lot 1739, realized \$1,955. NGC ID# 2547, PCGS# 8982

---

**1877 Double Eagle, MS62  
First Type Three Issue**

**5054 1877 MS62 PCGS. CAC.** With the denomination spelled out in its entirety, the 1877 and 1877-S double eagles represent the first year of the Type Three design. This piece is extremely bright, with brilliant lemon-yellow luster and minimal handling marks. Conditionally rare, PCGS has only certified 19 finer pieces (2/19). NGC ID# 2547, PCGS# 8982

---

**1877-CC Twenty Dollar, Unc Details  
Rarely Seen in Unworn Condition**

**5055 1877-CC — Streak Removed — PCGS Genuine. Unc Details. Variety 1-A.** There is a die line at the upper serif of the E in AMERICA, and the second C is higher than the first. The reverse of this Uncirculated Carson City double eagle is bright and attractively frosted with light yellow-gold color. Central detail is soft, but the overall appeal is good. The obverse is where this coin lost out on a numeric grade. The field below the hairbun has been tooled in attempt to efface a small area of struck-in grease. A few other specks of grease are distributed across the obverse. Only 42,565 double eagles were struck at the Carson City Mint in 1877. Unworn survivors are rarely seen.

**5056 1877-S MS61 PCGS. CAC.** The surfaces are highly original and fully prooflike beneath a scattering of tiny marks and field chatter that limit the technical grade. Frosted raised devices contrast boldly with the mirrored areas that remain, while attractive orange-gold color adds to the excellent eye appeal. Given that most surviving 1877-S examples have choppy, bagmarked fields and devices, this CAC-endorsed MS61 seems head and shoulders above other coins of similar grade. NGC ID# 254B, PCGS# 8984

---

**1877-S Double Eagle, MS62  
Highly Exported Issue**

**5057 1877-S MS62 PCGS.** A large number of the 1.7 million 1877-S double eagles were exported to Europe where the coins were mishandled in vaults. As a result, this conditionally rare issue is seldom seen above the present MS62 grade level. PCGS and NGC had certified a mere 50 finer pieces (2/19). This lovely example has brilliant honey-gold luster and minimal, scattered marks. NGC ID# 254B, PCGS# 8984

**5058 1878 MS62 PCGS.** The fields are faintly prooflike under a modicum of light abrasions that appear on each side, with the surfaces largely greenish-gold plus glints of orange-gold. The 1878 is scarcely seen so fine, and seldom finer: PCGS has certified only 58 examples in MS63 or higher grades (3/19). This is sharply struck example for the issue, with crisp stars and pleasing, original surfaces for the assigned grade.

Ex: *Central States Signature* (Heritage, 4/2010), lot 3922. NGC ID# 26B3, PCGS# 8985

---

**1878-CC Double Eagle, XF40**

**5059 1878-CC XF40 NGC. Variety 1-A.** 1878 witnessed the lowest mintage for double eagles at Carson City since 1870. Most of the several hundred survivors are in circulated grades. This caramel-gold representative shows only incidental contact. The curls display moderate wear, and glimmers of luster outline the portrait, legends, shield, and stars. NGC ID# 26B4, PCGS# 8986

**1878-CC Double Eagle, XF45  
Lower-Mintage Type Three CC Issue**

- 5060 1878-CC XF45 NGC. Variety 1-A.** Compared to previous years, the number of Carson City double eagles minted in 1878 was significantly lower. Only 13,180 examples struck, and the vast majority of the survivors circulated. Significant remaining mint luster highlights the yellow-gold surfaces. The diagnostic die scratch is readily apparent on the neck of Liberty as is the check-shaped die scratch on the lower reverse. There are no mentionable marks and the design elements are well-defined.  
*Ex: Long Beach Signature (Heritage, 9/2008), lot 4206, where it realized \$6,039.80. NGC ID# 26B4, PCGS# 8986*

- 5061 1878-S MS61 NGC.** A heavily exported issue, the 1878-S has seen its surviving population increase over the past several decades as numerous pieces return from foreign holdings. This MS61 example may have traveled abroad, with a few telling bagmarks and abrasions that account for the grade. Attractive and lustrous brassy-gold surfaces are sharply struck for the issue, which often lacks definition on the stars and Liberty's hair. Here, those devices are sharp. NGC ID# 338K, PCGS# 8987

- 5062 1879 MS60 NGC.** The population of 1879 double eagles at NGC is less than half that of the 1879-S. Most survivors fall within a tight range from AU58 to MS61. This Mint State representative presents bright, frosty luster over yellow-gold surfaces that show numerous scuffs and abrasions. Eye appeal is still good. NGC ID# 26B6, PCGS# 8988

**1879-CC Double Eagle, VF30  
Scarce Carson City Emission**

- 5063 1879-CC VF30 NGC. Variety 1-A.** An early die state example with unlapped detail on the eagle's tail. A midgrade representative of this better Carson City issue. The mintage was only 10,708 pieces, less than one-tenth the production of the 1874-CC through 1876-CC issues. This dusky example has peach-gold fields and gunmetal highpoints. Both sides are refreshingly unmarked, and wear on the curls and wingtips is commensurate with the third-party grade. NGC ID# 338L, PCGS# 8989

- 5064 1879-S MS60 NGC.** Small S. Vibrant frosty luster and bold devices appear over honey-gold surfaces. Small contact marks define the grade. The 1879-S is more elusive in Mint State than its mintage might suggest.  
*Ex: Atlanta Bullet Sale (Heritage, 8/2001), lot 1651, where it realized \$356.60. NGC ID# 26B9, PCGS# 8991*

**1879-S Liberty Twenty, MS61  
Lustrous and Appealing for the Grade**

- 5065 1879-S MS61 NGC. CAC.** Scarcer than its mintage of more than 1.2 million pieces implies, the 1879-S is the rarest Type Three San Francisco issue. This Mint State example offers original, brassy-gold surfaces, with an unusually sharp strike for an 1879-S. Most of the stars are sharp, and Liberty's bun and upper hair strands are well-defined. Light field chatter and a few tiny marks join some streaky vault grime that confirms the natural patina. CAC endorsed, not often seen at this grade level. NGC reports just 53 numerically finer examples. CAC: 14 in 61, 10 finer (3/19). NGC ID# 26B9, PCGS# 8991

**1880 Double Eagle, AU58  
Important Low Mintage Twenty**

- 5066 1880 AU58 PCGS.** The 1880 had a production of just 51,456 double eagles and few survivors remain in Mint State grades. In fact, the average grade for this issue is just AU53. This near-Mint representative has a bold strike, and reflective orange-gold surfaces with scattered marks. An exceptional piece for the advanced collector. NGC ID# 26BA, PCGS# 8992

**1880 Liberty Twenty, AU55 Prooflike  
Low-Mintage Philadelphia Issue**

- 5067 1880 AU55 Prooflike NGC.** Just a trace of high-point wear is evident on the well-detailed design elements of this impressive Choice AU specimen, from a small mintage of 51,456 pieces. The bright yellow-gold surfaces exhibit the expected amount of chatter for a large gold coin that spent some time in circulation, and the fields show prooflike reflectivity in sheltered areas. Census: 3 in 55 Prooflike, 3 finer (3/19). NGC ID# 26BA, PCGS# 78992

- 5068 1880-S AU58 PCGS.** Small Squat S. 1880-S twenties with a Tall S mintmark are also available. The present pumpkin-gold near-Mint double eagle offers extensive cartwheel luster and is nicely struck. Small to moderate marks are scattered, with the most apparent near obverse star 12. NGC ID# 26BB, PCGS# 8993

**1880-S Twenty Dollar, MS62  
Rich, Original Surfaces**

- 5069 1880-S MS62 PCGS.** A brilliant and sharply struck Type Three double eagle. The devices are frosty and the fields have a texture between satiny and prooflike, with outstanding aesthetic appeal for the grade. The 1880-S long has been recognized as an important scarcity in Uncirculated condition, ever since David Akers' book on double eagles first appeared in 1982. We expect many generous bids when this beauty crosses the auction block. PCGS reports just 19 numerically finer examples (3/19).  
Ex: *Long Beach Signature* (Heritage, 6/2005), lot 8085; *Long Beach Signature* (Heritage, 6/2011), lot 4990. NGC ID# 26BB, PCGS# 8993

**1880-S Twenty Dollar, MS60 Prooflike  
An Unusual Issue to Locate With Reflective Fields**

- 5070 1880-S MS60 Prooflike ANACS.** The 1880-S is an uncommon S-mint with a Prooflike finish in the fields. We do not have access to ANACS certification data, but NGC has only certified four other pieces as Prooflike, the finest an MS62 (3/19). This is a sharply struck example with dazzling Prooflike surfaces. Rich orange-gold color, and numerous small abrasions on obverse and reverse define the numerical grade level of the piece.  
Ex: *ANA Bullet Sale* (Heritage, 8/2005), lot 1616; *FUN Signature* (Heritage, 1/2006), lot 5658. NGC ID# 26BB, PCGS# 78993

**1881-S Liberty Double Eagle, MS61  
Elusive Issue, Scarce With CAC Approval**

- 5071 1881-S MS61 PCGS. CAC.** Myriad abrasions make the 1881-S nearly unavailable at MS63 or finer grades, leaving a small window for Uncirculated coins in the MS61 to MS62 range. This CAC-endorsed MS61 ranks highly among its cohorts thanks to its lustrous and original, antique-gold color with a reasonably sharp strike. The inevitable bagmarks abound, yet the eye appeal remains strong. CAC: 7 in 61, 18 finer (2/19). NGC ID# 26BD, PCGS# 8995

**1882-CC Twenty Dollar, AU58  
Scarcer CC-Mint Issue**

- 5072 1882-CC AU58 NGC. Variety 1-B.** Liberty's shoulder curl and eyebrow confirm a momentary stint in Old West commerce, but this lemon-gold Carson City double eagle shows luster throughout design elements. Minimally abraded, and highly attractive for the Borderline Uncirculated grade. A few specks of struck-in grease (as issued) accompany the right reverse. NGC ID# 26BF, PCGS# 8997

**1882-CC Double Eagle, Near-Mint  
Minimally Marked**

- 5073 1882-CC AU58 PCGS. Variety 1-B.** No double eagles were struck at Carson City in 1880 or 1881, but the 1882-CC twenty boasts a moderate mintage of 39,140 pieces. A peach-gold and sea-green example with substantial glowing luster. There are fewer marks than anticipated for a momentarily circulated Old West double eagle, though a few specks of struck-in grease (as made) are noted near Liberty's nose and the 1 in the date.  
Ex: *Sacramento ANA Signature* (Heritage, 3/2011), lot 4970, which realized \$5,318.75. NGC ID# 26BF, PCGS# 8997

**1882-CC Twenty Dollar, MS60  
Uncirculated Examples Are Elusive**

- 5074 1882-CC MS60 PCGS. Variety 1-B.** No double eagles were struck at the Carson City Mint in 1880 or 1881. Production of double eagles resumed in 1882, with a mintage of just 39,140 pieces. The coins were well-produced, but they circulated extensively, and most examples seen today have numerous surface abrasions. The 1882-CC is actually one of the more available CC-mint issues, but Mint State coins are elusive.  
The present coin is an impressive Mint State specimen, with well-detailed design elements and an interesting die crack through the bottom of the letters in the denomination. A diagnostic of this variety is the vertical spike present in front of Liberty's eye. The pleasing orange-gold surfaces show the expected number of minor contact marks for the grade. Population: 13 in 60, 76 finer (3/19). NGC ID# 26BF, PCGS# 8997

**1882-S Liberty Twenty, MS62**  
**Elusive Issue Any Finer**

- 5075 1882-S MS62 PCGS. CAC.** Small Squat S mintmark. Orange-gold and greenish-gold hues combine for an attractive, variegated palette that provides strong eye appeal for this attractive Type Three twenty. Sharply struck with glimpses of reflectivity that yields to mint frost, the coin is reasonably well-struck and far above average in overall visual impact. MS62 is the final readily available grade level for an 1882-S, and those coins with CAC approval are few and far between. CAC: 21 in 62, 4 finer (2/19). NGC ID# 26BG, PCGS# 8998

**1883-CC Double Eagle, MS61**  
**Scarce This Well-Preserved**

- 5076 1883-CC MS61 NGC. Variety 1-B.** The mintmark is centered between the Y and D on this variety, and there are numerous horizontal die lines in the upper recesses of the shield. On the obverse, diagnostic die lines are visible between the rim and stars 12 and 13. This Mint State Carson City double eagle is vibrantly lustrous and appealing, with sharp design elements and only light, scattered surface grazes. The 1883-CC is scarce in this condition, and only a small number of finer coins are known. Census: 55 in 61, 9 finer (2/19). NGC ID# 26BH, PCGS# 8999

- 5077 1883-S MS62 PCGS.** Tall S mintmark. The 1883-S draws far less attention than the proof-only 1883 and popular 1883-CC issues, yet it is equally essential for a complete Type Three set, and conditionally rare in its own right. Smooth, satiny surfaces are minimally marked and attractive for an 1883-S, with lustrous rich-gold surfaces that emit faint olive-green accents. The underside flag of 1 in the date is narrowly recut. NGC ID# 26BJ, PCGS# 9000

- 5078 1884-CC — Cleaned — NGC Details. AU. Variety 1-A.** In 1884, the Carson City double eagle mintage was about 7% of its San Francisco cousin. The present wheat-gold example exhibits substantial luster and shows only a hint of high-point wear. The surfaces are somewhat cloudy, and the left obverse has several slender marks. NGC ID# 26BK, PCGS# 9001

**1884-CC Twenty Dollar, AU55**  
**Luminous Original Luster**

- 5079 1884-CC AU55 PCGS. Variety 1-A.** The Carson City Mint struck 81,139 double eagles in 1884, many of which were eventually used as foreign trade coins. Only one die pair was employed for production. The mintmark is slight right below the tailfeathers, with the second C over the D in DOLLAR. On the obverse, a set of crisscrossing die lines on Liberty's lower neck are diagnostic. This smooth Choice AU example displays sharp detail and has lustrous yellow-gold surfaces. NGC ID# 26BK, PCGS# 9001

**1884-CC Twenty Dollar Liberty, MS61**  
**In-Demand Type Three Issue**

- 5080 1884-CC MS61 PCGS. Variety 1-A.** A combination of low mintage (81,139 pieces struck) and the innate Carson City mystique makes any 1884-CC double eagle a subject of high demand among collectors. This attractive Mint State coin will satisfy multiple collector interests and budgets, with high-end surfaces for the assigned grade and gleaming, orange-gold coloration. Bagmarks are at a minimum and the strike is just a whisker short of full. NGC ID# 26BK, PCGS# 9001

- 5081 1887-S MS61 PCGS.** Tall S. A scarcer issue with a mintage of 283,000 pieces, the lowest for a San Francisco Liberty twenty aside from the introductory 1854-S and the briefly coined 1861-S Paquet Reverse and 1866-S No Motto double eagles. Boldly struck and lustrous with a typically bagmarked obverse.  
*Ex: Summer FUN Signature (Heritage, 7/2009), lot 2123, where it realized \$1,610.* NGC ID# 26BS, PCGS# 9007

**1887-S Twenty Dollar, MS62  
Seldom Offered Any Finer**

**5082 1887-S MS62 NGC.** Scarce-to-rare any finer, the surfaces of this MS62 1887-S display a lustrous, frosty texture that amplifies deep, rose-green color with a band of olive toning that encircles the obverse stars. Tiny marks exist, but they fade into the frosted fields and the strike is comprehensively sharp throughout both sides. NGC reports a mere 26 numerically finer pieces (3/19). NGC ID# 26BS, PCGS# 9007

**5083 1888 MS62 NGC.** Attractive medium yellow-gold color overall yields to occasional lavender accents on each side. Well-defined, highly lustrous, with few significant abrasions that barely preclude Select status.

*Ex: Summer FUN Signature (Heritage, 7/2009), lot 2927, where it realized \$2,300. NGC ID# 26BT, PCGS# 9008*

**5084 1888-S MS62 PCGS.** The first six star centers are incomplete, but the rest of this Uncirculated 1888-S double eagle is well-defined, including the hair strands, reverse stars, and eagle's feathers. Coppery accents on the reverse complement honey-gold color overall. Frosty with scattered marks. NGC ID# 26BU, PCGS# 9009

**1888-S Double Eagle, MS63  
Rich Mint Frost**

**5085 1888-S MS63 NGC.** Tall S. Examples of the 1888-S double eagle in better condition than this Select Uncirculated are scarce. This piece has excellent eye appeal for the grade. It enjoys rich, vibrant mint frost and warm orange-gold color that deepens around the rims. A sharp S-mint twenty. NGC ID# 26BU, PCGS# 9009

**5086 1889 MS61 NGC.** Peach-gold surfaces are imbued with wisps of light tan and exhibit sharply impressed design elements. Minute surface and rim marks on the obverse limit the grade. A couple of reverse grease spots are also visible. The low-mintage 1889 twenty dollar (44,070 business strikes) is a scarce issue in high grade.

*Ex: Long Beach Signature (Heritage, 2/2009), lot 3066, realized \$2,127.50; Long Beach Signature (Heritage, 5/2009), lot 1941, realized \$1,955. NGC ID# 2695, PCGS# 9010*

**1889-CC Double Eagle  
Uncirculated Sharpness**

**5087 1889-CC — Obverse Improperly Cleaned — NGC Details. Unc. Variety 1-A.** After a four-year hiatus during the first Cleveland administration, the Carson City Mint reopened in 1889 when Harrison, a Republican, became President. The facility struck only silver dollars and double eagles that year, and both issues are coveted by collectors. This pumpkin-gold example has a good strike and substantial luster. The faint obverse hairlines are easily overlooked.

**5088 1889-S MS62+ PCGS. CAC.** The pleasing orange-gold surfaces of this Plus-graded MS62 specimen show minor contact and roller marks on both sides, with vibrant mint luster throughout. The design elements are sharply detailed and the overall presentation is most attractive. NGC ID# 26BW, PCGS# 9012

**5089 1890 MS61 PCGS.** The two usually encountered Mint State grades for this Philadelphia issue are MS61 and MS62, with anything finer being prohibitive. Swirling luster illuminates rich sun-gold color on each side. Every design element is strongly rendered. Numerous small abrasions explain the grade. NGC ID# 26BX, PCGS# 9013

**1890 Twenty Dollar, MS62  
Conditionally Scarce Issue, CAC**

**5090 1890 MS62 NGC. CAC.** The mintage is on the low side (just 75,995 pieces struck), and while Mint State coins are not rare, they are more scarce than current pricing suggests. This is a CAC-endorsed MS62 example, with the original look of "vault grime" mixed in with light abrasions from bag storage and transport. A sharp strike attends the attractive, orange-gold surfaces. As usual, the 1 in the date is boldly recut north. NGC has seen just 33 numerically finer pieces. CAC: 28 in 62, 4 finer (2/19). NGC ID# 26BX, PCGS# 9013

**1890 Twenty Dollar, MS63  
Only CAC Coin for the Grade**

- 5091 1890 MS63 NGC. CAC.** Uncirculated 1890 double eagles are concentrated in MS62 and lower grades. This Select coin is conditionally scarce, and finer pieces are rare. Moreover, this is the only MS63 coin certified that has received a CAC endorsement. Vibrant, frosty cartwheel luster illuminates well-struck design elements. Grade-limiting abrasions are light and unobtrusive. Census: 29 in 63 (2 in 63+), 4 finer. CAC: 1 in 63, 3 finer (3/19). NGC ID# 26BX, PCGS# 9013

**1890-CC Double Eagle, AU50**

- 5092 1890-CC AU50 NGC. Variety 1-A.** A butter-gold Carson City twenty with lustrous legends, stars, and devices. Abrasions are trivial save for moderate contact beneath Liberty's eye. The tailfeathers are intact on this early die state example. TWENTY and PLURIBUS are minutely die doubled. A die scratch in the rays below the A in STATES provides another pick-up point for the variety. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle, AU58  
Strong Devices**

- 5093 1890-CC AU58 NGC. Variety 1-A.** The reverse is in the usual late die state with the right tailfeathers lapped. The CC mintmark is evenly spaced between the Y and D. Each side of this yellow-gold Carson City double eagle showcases strongly rendered devices and radiant cartwheel luster that rolls over minimally abraded surfaces. A collectible issue from a mintage of 91,209 coins. NGC ID# 26BY, PCGS# 9014

**1890-CC Twenty Dollar, AU58**

- 5094 1890-CC AU58 NGC. Variety 1-A.** The usually encountered late die state with a partially lapped tail. The borders are apple-green and the centers are pumpkin-gold, with one spot noted above the arrowheads. The obverse displays the expected number of small to moderate marks, though only a scuff on the jaw merits mention. The 1890-CC is the most available Carson City twenty issue of the Benjamin Harrison Administration, but demand for near-Mint examples is nonetheless substantial. NGC ID# 26BY, PCGS# 9014

**1890-CC Twenty Dollar, AU58  
Lustrous Orange-Gold Surfaces**

- 5095 1890-CC AU58 NGC. Variety 1-A.** The 1890-CC double eagle claims a mintage of 91,209 pieces, making it one of the more available issues from the famous Western mint, and a popular choice among branch mint type collectors. Just the slightest trace of wear is evident over the well-detailed design elements of this attractive near-Mint specimen. Lustrous orange-gold surfaces show many tiny abrasions on both sides but none that are singularly distracting. NGC ID# 26BY, PCGS# 9014

**1890-CC Liberty Twenty, AU58  
Partially Prooflike Western Gold**

- 5096 1890-CC AU58 NGC. Variety 2-B.** Lustrous, yellow-gold surfaces are partially prooflike and sharply struck at the central motifs, although several stars are rounded. The 1890-CC is usually heavily bagmarked, yet this example — while peppered by small marks — avoided any large or distracting abrasions. The reflective surfaces and flashy gold color offer plentiful eye appeal. The eagle's tailfeathers are complete and sharp, which suggests this coin was struck from fresh, unlapped dies. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle, AU58**  
Minimal Time in Circulation

- 5097** 1890-CC AU58 PCGS. **Variety 1-A.** A few light marks and a trace of high-point wear account for the near-Mint grade, although the mint luster is almost full, and the surfaces rival those of many fully Mint State coins. The strike is sharp throughout the gleaming, rich-gold fields and devices. This Carson City issue is always in demand for its high production quality and its usual, strong eye appeal, which are clearly on display here. NGC ID# 26BY, PCGS# 9014

- 5098** 1890-S MS62 PCGS. Medium S. Liberty's curls, the stars, and the eagle's feathers display crisp delineation. Coloration is primarily warm honey-gold with lighter mint-green and lavender accents. Marks are mostly small, though there are a few larger abrasions that limit the technical assessment. NGC ID# 26BZ, PCGS# 9015

**1890-S Double Eagle, Attractive MS63**  
Partially Reflective Fields, CAC Endorsed

- 5099** 1890-S MS63 PCGS. **CAC.** Attractive straw-gold surfaces display partially reflective fields with a few tiny marks and an overall crisp strike. The 1890-S is readily available in circulated grades — as well as in Mint State up to the MS62 level — before becoming scarce at the Select Uncirculated level or finer. This coin is housed in a previous generation green label holder with CAC endorsement. PCGS has certified just 67 numerically finer examples (3/19). NGC ID# 26BZ, PCGS# 9015

**1891-S Double Eagle, MS64**  
Conditionally Rare any Finer

- 5100** 1891-S MS64 PCGS. Medium S. The 1891-S is nearly unobtainable as a full Gem, but the present high-end Choice example provides an affordable alternative. The lustrous and well-struck surfaces display sea-green and apricot-gold shades. Only incidental abrasions are evident. The reverse shows hints of struck-in grease, as issued.  
**From The Jersey Shore Gold Collection.** NGC ID# 26C4, PCGS# 9018

**1892-CC Double Eagle, AU53**  
27,265 Coins Minted

- 5101** 1892-CC AU53 NGC. **Variety 1-A.** A small mintage of 27,265 coins makes the late-date 1892-CC double eagle a very much in-demand issue. This red-gold AU53 representative enjoys a touch of semiprooflikeness in the fields. A combination of strike completeness and light friction appears on each side, though the reverse is slightly better-detailed. Faint hairlines are also noted. NGC ID# 26C6, PCGS# 9020

**1892-CC Double Eagle, AU53**  
Sought-After Nevada Mint Issue

- 5102** 1892-CC AU53 NGC. **Variety 1-A.** The recessed areas of the obverse display deep copper-orange accents that speak to the originality of this khaki-gold Carson City double eagle, which derives from a low mintage of 27,265 pieces. Well-detailed surfaces show normal areas of incompleteness and friction on the stars and curls. Abrasions are generally small, with only a mark under Liberty's eye and a slender linear depression at the upper reverse deserving of attention. NGC ID# 26C6, PCGS# 9020

**1892-CC Double Eagle, AU53**  
Terrific Red-Gold Color

- 5103** 1892-CC AU53 NGC. **Variety 1-A.** Rich red-gold color is, without question, the defining feature of this AU53 Carson City double eagle. The stars and central elements show good detail, and glints of luster emanate from the protected areas. A mark on top of the 8 and a pinscratch in the field below RIC are attribution markers. Eye appeal is terrific. NGC ID# 26C6, PCGS# 9020

1892-CC Liberty Double Eagle, AU55  
Popular Type Three Issue

- 5104** 1892-CC AU55 NGC. CAC. Variety 1-A. An attractive Choice AU specimen of this popular branch mint issue, with just a touch of wear on the high points of the strongly impressed design elements. The lightly abraded orange-gold surfaces retain significant amounts of original mint luster and overall eye appeal is quite strong for the grade. The 1892-CC has become more available in recent years, due to discoveries in foreign holdings. NGC ID# 26C6, PCGS# 9020

1892-CC Double Eagle  
MS61 Prooflike

- 5105** 1892-CC MS61 Prooflike NGC. Variety 1-A. As of (2/19), NGC has certified only ten 1892-CC double eagles are Prooflike. There is no question that the present piece deserves that seldom-assigned designation, since both sides show impressive field reflectivity. The butter-gold surfaces are nicely struck and display a number of wispy abrasions, as expected from its MS61 grade. Unlike their silver dollar counterparts, Carson City twenties are not known for a prooflike appearance, and their rarity in such format would focus demand on the few available pieces. The last 1892-CC Prooflike offered by Heritage was back in September 2010. Census: 4 in 61 Prooflike, 1 finer (2/19).  
*From The Jersey Shore Gold Collection.* NGC ID# 26C6, PCGS# 79020

- 5106** 1893 MS63 NGC. The frosted, orange-gold surfaces radiate lime-green and rose highlights amid cartwheel mint luster. A few light marks are scattered across Liberty's portrait and the surrounding fields, but overall abrasions are few. The strike is characteristically sharp on this Select Uncirculated example, which becomes scarce just one step up on the grading scale. NGC ID# 26C8, PCGS# 9022

1893-CC Double Eagle, VF35  
Collector-Grade Example

- 5107** 1893-CC VF35 PCGS. Variety 1-A. An early die state coin without cracks at the date and through STATES. Field reflectivity remains in the protected areas, which is a rare sight on VF-level Carson City gold. Deep orange-gold and honey hues cover each side, and there are moderate abrasions, including a vertical scratch in the left obverse field. The 1893-CC double eagle was heavily exported for trade, and most survivors in AU and Mint State are repatriated coins. Coins worn to the VF grade level from domestic circulation are scarce. NGC ID# 26C9, PCGS# 9023

- 5108** 1893-S MS63 PCGS. The 1893-S Liberty double eagle enjoyed a large mintage of just under 1 million pieces, making the issue available in grades up to the MS63 level, but finer coins are definitely scarce. This attractive Select specimen offers well-detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster throughout. NGC ID# 26CA, PCGS# 9024

1893-S Twenty Dollar, MS64  
Tied for Finest at NGC

- 5109** 1893-S MS64 NGC. Nearly 1 million 1893-S double eagles were struck, yet the issue is seldom seen above MS63 condition. Comparable MS64 representatives are scarce, and just two coins are graded finer. Neither of them are at NGC; both are certified MS65 at PCGS. This near-Gem is incompletely brought-up. However, it is smooth for the assessment and features rich orange-gold color and shimmering luster. Essentially impossible to upgrade. Census: 23 in 64, 0 finer (2/19). NGC ID# 26CA, PCGS# 9024

---

**1893-S Liberty Double Eagle, MS64+  
Only Two Pieces Certified Finer**

**5110 1893-S MS64+ PCGS. CAC.** Despite the substantial mintage of 996,175 pieces, the 1893-S Liberty double eagle is virtually unobtainable in grades above the MS64 level. Many of the Mint State coins seen today were used in foreign trade and roughly handled in transit and storage, resulting in numerous contact marks and appropriately lower grades. This high-end Choice specimen offers well-detailed design elements and vibrant mint luster on both sides. The well-preserved orange-gold surfaces are free of the usual surface flaws and show a few highlights of rose color. Overall eye appeal is terrific. This coin will be a welcome addition to a fine collection or Registry Set. Population: 67 in 64 (2 in 64+), 2 finer. CAC: 11 in 64, 0 finer (3/19). NGC ID# 26CA, PCGS# 9024

**5111 1894 MS63 PCGS.** An attractive Type Three Liberty double eagle, with sharply detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster on both sides. Overall eye appeal is outstanding. NGC ID# 26CB, PCGS# 9025

**5112 1894 MS63 PCGS. CAC.** A thick layer of mint frost traps underlying, bright mint luster throughout both sides of this Select Uncirculated 1894 twenty. Marks are limited to a few shallow abrasions of the most minor kind, while the strike is sharp except at stars 8 to 10, which are inexplicably rounded. Vibrant, orange-gold color emanates from the lustrous, frosted surfaces. CAC endorsement adds to the appeal. NGC ID# 26CB, PCGS# 9025

**5113 1894-S MS63 PCGS.** The Saddle Ridge Hoard yielded 20 Uncirculated 1894-S twenties, the finest of which were four pieces in MS63 and one MS65 example. This Select Uncirculated coin is not a hoard coin, since it is housed in a light-blue label PCGS holder that pre-dates the Saddle Ridge find. Rich, orange-gold luster spins across smooth, semi-reflective surfaces, with a few light marks that determine the grade. We note a small, copper alloy spot at the reverse motto. NGC ID# 26CC, PCGS# 9026

---

**1894-S Twenty Dollar, Frosted MS64  
Seldom Seen Any Finer**

**5114 1894-S MS64 PCGS.** This San Francisco issue was the last year represented in the Saddle Ridge Hoard — 18 Mint State pieces were recovered — but all graded MS63 or less, with the exception of a single MS65. This lustrous and frosted MS64 is housed in a previous generation blue label holder, so clearly it was not a Saddle Ridge coin. Natural sun-gold surfaces display pale-green and orange accents, and few marks on the high-luster surfaces. The eye appeal is excellent. PCGS reports just five numerically finer examples (2/19). NGC ID# 26CC, PCGS# 9026

**5115 1895-S MS63 PCGS.** In a familiar refrain, the 1895-S double eagles are available through the MS63 level, before becoming scarce in near-Gem or finer conditions. This is an especially pleasing Select Uncirculated piece, with rich sun-gold color and faint green and lilac accents when rotated in light. A few light bagmarks determine the grade, yet the eye appeal suggests a finer grade level. The strike is sharp at the centers and peripheries. NGC ID# 26CE, PCGS# 9028

**5116 1895-S MS63+ PCGS. CAC.** Despite a high certified population at the Select Mint State grade level and in higher grades, few of these have passed CAC inspection. This example has satiny yellow surfaces with minimal marks for the grade. CAC: 46 in 63, 35 finer (3/19). NGC ID# 26CE, PCGS# 9028

---

**1895-S Twenty Dollar, MS64  
Crisp Detail**

**5117 1895-S MS64 NGC.** Medium S. Through MS64, the 1895-P is about three times more available than the 1895-S, which is scarcer across virtually all grade levels. The two issues are about equally rare in MS65. Only 11 examples of this San Francisco twenty are graded finer at NGC (2/19). Frosted mint luster emanates from this honey-gold near-Gem, contributing to the lovely eye appeal. The piece is well-struck with clear star radials, and crisp detail on the hair strands and eagle's feathers. Ticks and grazes determine the grade. NGC ID# 26CE, PCGS# 9028

---

**1896-S Twenty Dollar, MS64  
Rarely Seen or Offered in Finer Grades**

**5118 1896-S MS64 PCGS.** Medium S. With 1.4 million 1896-S twenties minted, nothing about this issue suggests a condition rarity. However, it is surprisingly unobtainable in MS64. There are only three pieces finer at PCGS, plus three more at NGC (2/19). The centers on this frosty near-Gem are crisp, and appealing orange-gold color adorns each side. Housed in a green label holder. NGC ID# 26CG, PCGS# 9030

**1896-S Liberty Twenty, MS64  
Condition Rarity in Finer Grades**

- 5119 1896-S MS64 NGC. CAC.** From a mintage of 1.4 million pieces, the 1896-S Liberty double eagle is somewhat scarce in MS64 condition, but finer coins are major condition rarities. This attractive Choice specimen offers well-detailed design elements and well-preserved peach-gold surfaces that radiate vibrant mint luster. NGC and PCGS have each graded just three numerically finer examples (3/19). NGC ID# 26CG, PCGS# 9030

**1897 Twenty Dollar, MS62 Prooflike  
An Uncommon Issue With Reflective Fields**

- 5120 1897 MS62 Prooflike NGC.** Some dates in the Type Three series are not that difficult to locate with prooflike fields, but the 1897 is not one of them. Only four other MS62s have been certified by NGC and two are finer, both MS63 (2/19). Only 10 lower-graded examples have been certified as Prooflike. This is a brightly reflective example that exhibits even reddish-gold color and only small abrasions are scattered across each side. Sharply struck.  
*From The Jersey Shore Gold Collection.* NGC ID# 26CH, PCGS# 79031

- 5121 1897-S MS64 NGC.** Available in MS64, the 1897-S double eagle is rarely offered finer. Just 26 coins are so-graded at NGC, including possible resubmissions (2/19). This Choice collector coin displays a bold strike and radiant, greenish-gold cartwheel luster. No major abrasions are apparent. NGC ID# 26CJ, PCGS# 9032
- 5122 1897-S MS64 NGC.** A radiantly lustrous Choice example of this late 19th century San Francisco issue, showing bold detail and original honey-gold coloration. Light marks on Liberty's cheek limit the grade. NGC has seen only 26 finer pieces, which are out of reach for most collectors (2/19). NGC ID# 26CJ, PCGS# 9032
- 5123 1898-S MS64 PCGS.** Housed in an old-generation blue label holder with barcode on the back, this sharply struck near-Gem 1898-S radiates cartwheel luster from smooth, satinlike surfaces. The lack of abrasions is unusual for an 1898-S double eagle, and suggests the surface quality of this visually impressive coin may qualify for an finer grade. NGC ID# 26CL, PCGS# 9034
- 5124 1898-S MS64+ PCGS. CAC.** This Choice Mint State double eagle is an excellent example of the plentiful date, exhibiting lovely peripheral copper toning over brilliant and frosty yellow-gold luster. The surfaces are pristine and the strike is outstanding. CAC has approved just 15 finer examples (3/19). NGC ID# 26CL, PCGS# 9034

**1898-S Double Eagle, MS65  
Few Certified Better**

- 5125 1898-S MS65 PCGS.** The 89 in the date is lightly repunched southeast. A lustrous and lovely olive-green Gem. The strike is crisp, and the reverse is uncommonly free from contact. The portrait is also surprisingly smooth. The obverse field displays delicate grazes, along with a small golden-brown spot near Liberty's forehead. The 1898-S will never be rare, but the issue is nearly unobtainable any finer. NGC ID# 26CL, PCGS# 9034

- 5126 1899 MS64 PCGS.** The strike is needle-sharp (not always the case for an 1899), while strong mint luster illuminates rich-gold color throughout both sides. This near-Gem seems to offer many characteristics of a fully Gem piece, perhaps a bit conservatively graded in its older PCGS holder. Expect spirited competition from type collectors and gold specialists, who are sure to appreciate the slightly better date at an affordable price. NGC ID# 26CM, PCGS# 9035

**1899-S Twenty Dollar, MS64  
Rare in Finer Condition**

- 5127 1899-S MS64 PCGS.** Bright yellow-gold luster engulfs this Choice 1899-S double eagle, complementing boldly struck design elements. The fields are virtually flawless, producing a radiant cartwheel effect, and only a few light marks on Liberty's cheek keep this coin from Gem classification. The 1899-S is occasionally available in MS64, but PCGS lists only four numerically finer representatives (2/19). NGC ID# 26CN, PCGS# 9036

**1899-S Double Eagle, MS64  
Natural Peach-Gold Color**

- 5128 1899-S MS64 NGC.** Medium S. Whereas the 1899 can be found through Gem condition, MS64 represents the highest collectible grade level for the 1899-S. Only 13 pieces at NGC and four coins at PCGS are finer (2/19). Natural peach-gold color graces surfaces that are distinctly free of deep or severe marks. Frosty luster generates lovely visual appeal, radiating over sharp motifs. NGC ID# 26CN, PCGS# 9036

**1899-S Twenty Dollar Liberty, MS64  
Rare Prooflike-Designated Example**

- 5129 1899-S MS64 Prooflike NGC.** Large numbers of 1899-S double eagles are known in grades from XF to MS63. Higher-grade coins are scarce, especially those with a Prooflike finish. Bright peach-gold surfaces display a splash of reddish patina in the upper-central reverse. The design elements are sharply struck, and a few minor marks prevent full Gem status. Census: 3 in 64 Prooflike, 0 finer (2/19). Ex: FUN Signature (Heritage, 1/2008), lot 4915, where it brought \$4,603.45.  
**From The Jersey Shore Gold Collection.** NGC ID# 26CN, PCGS# 79036

- 5130 1900 MS64★ NGC.** The surfaces are smooth and semireflective (bordering on prooflike), and a lens reveals just a few, featherlight abrasions in the right obverse field and isolated, tiny ticks on Liberty's portrait. The sharp strike embellishes attractive, rich-gold color dispersed evenly throughout this near-Gem twenty. The important NGC Star designation attests to the high eye appeal. NGC ID# 26CP, PCGS# 9037

**1900 Coronet Double Eagle, MS65  
Two Coins Finer at PCGS  
Struck With the New Reverse Design**

- 5131 1900 MS65 PCGS.** Although the 1904 is by far the most easily obtained Type Three double eagle in Gem condition, the 1900 is readily accessible, too, in MS65 condition. The similarities stop there, because any finer, the 1900 is virtually unobtainable at any price. This sharply struck Gem offers smooth and attractive surfaces with a minimum number of bagmarks or abrasions. Pleasing honey-gold color adds to the eye appeal. This coin is struck from a New Reverse die, with smooth back-of-the-neck feathers on the eagle's head. We believe only about one in 10 1900 double eagles have the New Reverse design. PCGS reports just two finer 1900 examples regardless of the reverse die (3/19). NGC ID# 26CP, PCGS# 9037

- 5132 1901 MS64 PCGS. CAC.** Repunching at the base of 1 in the date (with all of the digits joined at the bases by a faint die crack) makes this an interesting and unlisted late-series variety. Gleaming Choice Uncirculated, orange-gold surfaces show minimal abrasions across the frosted fields and a few small marks on Liberty's cheek, yet the eye appeal is high and the strike is uniformly sharp on both sides. Housed in a previous generation green label holder with CAC endorsement. NGC ID# 26CS, PCGS# 9039

- 5133 1901-S MS63 NGC.** Radiant yellow-gold luster is the hallmark of this attractive 1901-S double eagle. A few scattered abrasions are light and unobtrusive. The 1901-S is available through MS63, but finer pieces are scarce. This is a nice collector coin for the grade. NGC ID# 26CT, PCGS# 9040

**1902 Double Eagle, MS62  
Important Condition Rarity**

- 5134 1902 MS62 PCGS.** A mere 31,140 double eagles were coined at Philadelphia in 1902, and that is the lowest mintage of any Liberty twenty from the 20th century. This piece has brilliant and frosty yellow mint luster with scattered marks as expected at this grade level. This piece is certainly atypical, with the average certified grade just MS60. NGC ID# 26CU, PCGS# 9041

**1902 Double Eagle, MS62  
Lowest 20th Century Mintage**

- 5135 1902 MS62 PCGS.** This low-mintage 20th century issue remains underrated despite a surprisingly low mintage of just 31,140 business strikes. This canary-yellow MS62 example displays bold design definition and vibrant mint luster. While the obverse shows numerous wispy abrasions, the reverse is comparatively clean. The issue is notably scarce any finer, as one would expect from the rarest Liberty Head twenty of the 1900s.  
Ex: FUN Signature (Heritage, 1/2011), lot 7407. NGC ID# 26CU, PCGS# 9041

**1903 Double Eagle, MS65  
Complete Impression**

- 5136 1903 MS65 NGC.** Unlike the 1902, which is much scarcer than the 1902-S, this Philadelphia issue is more collectible than its San Francisco counterpart. Examples are plentiful through Gem condition, above which level the population drops precipitously to the point of being unobtainable or nearly so. A complete impression and bright mint frost define this impressive Liberty Head twenty. The fields are smooth, and there are just a few ticks on the cheek. NGC lists 12 higher submissions (2/19). NGC ID# 26CW, PCGS# 9043

**5137 1903-S MS64 PCGS.** This beautiful near-Gem has vibrant cartwheel luster, and the smooth apricot-gold surfaces lack the usual inundation of small abrasions. Worthy of serious consideration. PCGS has graded 17 pieces finer (2/19).  
*Ex: Long Beach Signature (Heritage, 5/2009), lot 1978, where it brought \$2,875. NGC ID# 26CX, PCGS# 9044*

**5138 1904 MS65 NGC.** The 1904 is readily available in nearly all Mint State grades from its large 6.2 million-piece mintage. This attractive Gem Uncirculated example is smoothly frosted with a minimum of tiny marks and a ringing-sharp strike. Lilac and reddish-orange accents add to the substantial eye appeal to the pleasing, lemon-gold surfaces. NGC ID# 26CY, PCGS# 9045

---

**1904 Double Eagle, MS65  
CAC Seal of Approval**

**5139 1904 MS65 NGC. CAC.** The 1904 has the highest mintage of any Liberty twenty issue, and thousands escaped the smelters via decades of repose in foreign bank vaults. Nonetheless, it will take a considerable effort to locate an example that surpasses the quality of the present Gem. The sharply struck and thoroughly lustrous surfaces are exceptionally smooth, and display iridescent lime-green and sun-gold hues. Housed in a circa-2000 holder. NGC ID# 26CY, PCGS# 9045

---

**5140 1904 MS61 Prooflike NGC.** NGC alone has graded more than 230,000 1904 double eagles, but only 883 pieces have been designated as Prooflike, plus another seven in Deep Prooflike (2/19). This Uncirculated twenty enjoys profound orange-gold surfaces with blatantly reflective fields and a pinpoint strike. Lightly bagmarked.  
*From The Jersey Shore Gold Collection.* NGC ID# 26CY, PCGS# 79045

**5141 1904 MS62 Prooflike NGC.** Prooflike examples of the 1904 double eagle are in the minority, although they are still collectible overall. The coin offered here is deeply reflective and sharp, showing original honey-gold color. Scattered light abrasions account for the numeric grade. NGC ID# 26CY, PCGS# 79045

**5142 1904 MS63 Prooflike NGC.** NGC has graded well-over 230,000 1904 double eagles, but only 883 submissions have been designated as Prooflike (3/19), and they are scarcely seen finer than MS63. This fully struck, deep orange-gold example is profoundly reflective with a normal amount of scattered abrasions, including a scrape across the mouth. NGC ID# 26CY, PCGS# 79045

---

**1905 Double Eagle, MS62  
Low Mintage Issue**

**5143 1905 MS62 NGC.** Demand for double eagles waned in 1905, and the Philadelphia Mint halted production after just 58,919 coins were minted. Only the 1902 had a lower mintage among 20th century Liberty twenties. This attractive Mint State piece has frosty yellow luster and minimal, grade-consistent handling marks with excellent eye appeal. NGC has only certified 20 finer pieces (2/19). NGC ID# 26D2, PCGS# 9047

---

**1905 Double Eagle, Scarce MS62  
Low-Mintage Issue, Seldom With CAC**

**5144 1905 MS62 PCGS. CAC.** The San Francisco Mint carried the burden of double eagle production in 1905, with a mintage of more than 1.8 million pieces. In comparison, this Philadelphia Mint coin is one of just 58,919 pieces struck, and it ranks highly among the scarcest post-1900 gold issues. Frosted, yellow-gold surfaces have a greenish tinge, with light field abrasions and tiny marks on the portrait. Bright mint luster provides excellent eye appeal for the MS62 grade, accompanied by CAC endorsement. PCGS has certified just 86 numerically finer pieces. CAC: 15 in 62, 6 finer (2/19). NGC ID# 26D2, PCGS# 9047

---

**5145 1905-S MS63 PCGS. CAC.** A sharply struck survivor from the 1.8 million-piece mintage, this 1905-S displays minimally marked surfaces for the issue. Medium-gold surfaces show fleeting glimpses of green and orange color, with a finely frosted texture that captures the light and adds considerable eye appeal. Many 1905-S double eagles (as well as half eagles and eagles) were melted, making the issue scarcer than expected in high Uncirculated grades. This coin is one of the few to receive CAC endorsement. CAC: 14 in 63, 21 finer (2/19). NGC ID# 26D3, PCGS# 9048

**1906 Liberty Twenty, MS62  
In-Demand, Low-Mintage Issue**

- 5146 1906 MS62 NGC.** Along with the 1902 and 1905 Philadelphia twenties, the 1906 is a low-mintage issue with just 69,596 pieces struck. This is a lustrous, medium greenish-gold example with a few light abrasions including a shallow mark between Liberty's chin and star 4. The original surfaces are otherwise only lightly abraded, contrary to most 1906 Mint State survivors. The strike is sharp throughout both sides. NGC ID# 26D4, PCGS# 9049

**1906 Twenty Dollar, MS63  
Above-Average for the Issue**

- 5147 1906 MS63 PCGS.** Generally well-struck, if slightly weak in the centers, this original Mint State example grades higher than usually found for the average 1906 double eagle (60.5). The pleasing green-gold surfaces are highlighted by satiny luster and there are minimal abrasions for an MS63.  
*Ex: Dallas Signature (Heritage, 10/2006), lot 3416, where it sold for \$6,612.50. NGC ID# 26D4, PCGS# 9049*

- 5148 1906-D MS63 PCGS.** Sharply struck with attractive greenish-gold color over richly frosted, high-luster surfaces, this first-year D-mint twenty represents an important step for the Denver branch mint. The mintage of 620,250 pieces was substantial and well-produced. The 1906-D becomes scarce and pricey in near-Gem and finer grades, making this Select Uncirculated example a good selection for many collectors. Tiny bagmarks dot the obverse fields and devices. NGC ID# 26D5, PCGS# 9050

- 5149 1906-S MS63 PCGS.** A sharp Select Mint State example with radiant cartwheel luster. Rich orange-gold and tangerine hues adorn each side, and abrasions are at a minimum. The 1906-S double eagle is available in this grade, although the population declines significantly in higher levels of preservation. NGC ID# 26F6, PCGS# 9051

**1906-S Twenty Dollar, MS64+  
Attractive Luster and Color  
Rarely Offered Finer**

- 5150 1906-S MS64+ PCGS.** Available in lower grades, the 1906-S double eagle becomes moderately elusive in MS64, and Plus-graded coins in this condition are rare. Fewer than a dozen finer pieces are known. This high-end near-Gem displays shimmering, luminous mint luster in shades of yellow-gold, peach, rose, and honey. The strike is sharp and the surfaces are devoid of bothersome abrasions. Population: 27 in 64+, 5 finer (2/19). NGC ID# 26F6, PCGS# 9051

- 5151 1907 MS64 PCGS.** The 1907 Liberty double eagle is seldom encountered in grades above the MS64 level. This attractive Choice specimen offers well-detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. PCGS has graded 24 numerically finer examples (2/19). NGC ID# 26D7, PCGS# 9052

- 5152 1907 MS64 PCGS. CAC.** Frosty mint luster displays lovely prairie-gold hues — a combination of delicate green-gold, peach, and rose highlights. Shimmering luster spans each side, complementing a bold strike. The 1907 Liberty double eagle is available in MS64, but CAC-approved coins are scarce. PCGS lists only two dozen finer pieces (3/19). NGC ID# 26D7, PCGS# 9052

**1907-D Liberty Head Twenty, MS63  
Final Year of the Liberty Head Design**

- 5153 1907-D MS63 PCGS.** The Denver Mint tried its hand on double eagles in 1906 and 1907, the only Liberty Head twenties from that mint. This is the popular final-year issue for the design, and a necessity for short sets seeking a transitional year D-mint example. Lustrous honey-gold surfaces are well-struck for the issue, with slight weakness at star 8 and the topmost strands of Liberty's hair. Marks are few and small for the assigned grade, while eye appeal is substantial. NGC ID# 26D8, PCGS# 9053

---

**1907-D Liberty Head Twenty Dollar  
Final-Year Gem**

**5154 1907-D MS65 NGC.** Denver Mint personnel manufactured 842,250 double eagles in the series' final year of issue and the facility's second year of operation. The average reported grade among certified representatives is 62.4. This Gem is considerably finer. Deep reddish-gold color provides great visual appeal, as does satiny mint luster. There are no singular abrasions to mention, and the strike is uniformly strong. NGC ID# 26D8, PCGS# 9053

**5155 1907-S MS63 PCGS.** Popularly collected as the final year in the long-running Liberty Head series, the 1907-S is an accessible issue through MS64. This Select Uncirculated representative enjoys deep sun-gold color around the borders and frosty mint luster throughout. A sharp example with undistracting bagmarks that are minor for the grade. NGC ID# 26D9, PCGS# 9054

**5156 1907-S MS63 PCGS.** The 1907-S should be more available than it actually is, given its mintage was 2.1 million pieces. Undoubtedly many were melted, accounting for its scarcity today in mint condition. This is a remarkably well-preserved example whose surfaces display gleaming golden-rose tinted mint luster. Fully struck. NGC ID# 26D9, PCGS# 9054

---

**1907-S Twenty Dollar Liberty, MS64  
Rare Any Finer**

**5157 1907-S MS64 PCGS.** Most Uncirculated 1907-S double eagles grade within the MS62 to MS63 range. Choice representatives are scarce and highly sought-after given the dearth of high-graded alternatives. This orange-gold near-Gem is marvelously preserved for the issue with clean fields and complete strike definition. PCGS has seen only 14 finer submissions (2/19). NGC ID# 26D9, PCGS# 9054

---

**1907-S Liberty Twenty, MS64  
Final-Year Branch Mint Issue**

**5158 1907-S MS64 PCGS.** Often heavily abraded, the 1907-S remains popular because of its final-year status for the Liberty Head design. This Choice Uncirculated example displays lightly marked surfaces and entrancing rose-gold coloration. Cartwheel mint luster spins across each side when rotated in light, and the strike is pinpoint sharp. While numerous MS64 pieces exist, finer coins are rare and expensive. PCGS reports just 14 numerically finer examples (2/19). NGC ID# 26D9, PCGS# 9054

---

**1907-S Double Eagle, MS64  
Conditionally Elusive, Radiant Frost**

**5159 1907-S MS64 NGC.** There are roughly one-tenth the number of 1907-S double eagles at NGC across all grades as there are 1907 twenty dollar gold pieces. This issue is elusive in near-Gem condition, and neither NGC nor PCGS have certified a coin finer than MS65 or MS65+. The obverse is slightly stronger than the reverse on this radiantly frosted double eagle. Luminous peach-gold surfaces exhibit small ticks, including one on Liberty's brow. NGC ID# 26D9, PCGS# 9054

---

**HIGH RELIEF DOUBLE EAGLES**

---

**1907 High Relief Twenty, XF45  
Wire Rim Example With Minimal Friction**

**5160 1907 High Relief, Wire Rim XF45 PCGS.** When Augustus Saint-Gaudens new design for the twenty dollar gold piece was released to banks and the public in the fall of 1907 the coin proved to be immediately popular. For some it was so popular that they couldn't part with it and carried the coin with them for months or years, proving to be a consistent conversation starter. We suspect that was the case with this particular coin. The high points show slight friction, but not as much as other XF-graded pieces we have seen. The brass-gold surfaces have glossy luster. Obvious signs of handling are apparent in the fields and there are a few small marks on Liberty's torso, but there are no overtly detracting marks on either side. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, AU55  
Bright Surfaces, Wire Rim Variant

- 5161** 1907 High Relief, Wire Rim AU55 ANACS. According to John Dryfhout, while still in school in Paris, Augustus Saint-Gaudens: "... formalized his conception of ideal beauty, relying significantly on French and Italian Renaissance art. He was especially impressed by the vitality of restrained emotion, strength with style, and elegance of expression." This vitality, strength, and elegance is especially evident in his design for the High Relief double eagle of 1907. This coin shows those design elements in the three-dimensional appearance of idealized beauty seen on the striding figure of Liberty. This particular coin displays bright surfaces overall with just a touch of friction over the high points, and there are no obvious or detracting marks. NGC ID# 26F2, PCGS# 9135

1907 High Relief Wire Rim Twenty, MS61  
Pedigreed to President Roosevelt

- 5162** 1907 High Relief, Wire Rim MS61 PCGS. This important High Relief double eagle has accompanying documentation that traces its provenance directly back to President Theodore Roosevelt. Jacob Mintz, owner of Cleveland's Mintz Detective Agency, acquired the coin directly from the president at the White House in November 1907. Mintz gave the coin to his son, who gave the coin to his own son. A satiny Mint State piece, this example has trivial grade-consistent marks on its lustrous wheat-gold surfaces. Both sides exhibit a sharp wire rim.  
*Ex: President Theodore Roosevelt (11/1907 at the White House); Jacob Mintz; Carl Mintz, Sr.; Carl Mintz, Jr.; the present consignor.* NGC ID# 26F2, PCGS# 9135

**MCMVII Wire Rim High Relief, MS62**  
**Bright and Satiny Classic Design**

- 5163 1907 High Relief, Wire Rim MS62 NGC.** One of the great successes of Augustus Saint-Gaudens' classic design for the twenty dollar gold piece was creation of a coin that looked more like a medal than a circulating coin. The combination of striking the coin in high relief and uncluttering the surfaces allowed the viewer to concentrate on the central devices, thus creating a more dynamic design.

Both Saint-Gaudens and President Roosevelt thought it best to not include mention of the deity on the new gold coins, thus removing the traditional motto *IN GOD WE TRUST*. Moving *E PLURIBUS UNUM* to the edge freed up more space, but required the use of a tripartite collar. Such a collar had never been used on a regular production coin, but had been used on pattern Morgan dollars in 1885. The success of these design decisions is readily apparent on the bright, satiny surfaces of the present coin. At first glance, this example appears to be much finer than the stated grade. A loupe reveals the yellow-gold surfaces have taken on a number of small, but individually insignificant contact marks on each side. The strike details are fully brought up throughout, and the eye appeal is excellent. NGC ID# 26F2, PCGS# 9135

**1907 High Relief Double Eagle, MS62**  
**One of the Most Popular U.S. Coins**  
**Wire Rim Variant**

- 5164 1907 High Relief, Wire Rim MS62 NGC.** If you were to pick out a coin collector at random and ask him or her which coin they would most like to own if they could only own a single coin, odds are good that Augustus Saint-Gaudens' MCMVII High Relief double eagle would come out on top. The issue is famous inside and outside of American coin collecting circles and is widely considered to be one of the most beautiful circulating issues ever produced by any country. While the modified, lower-relief versions that circulated from 1907 through 1932 are more collectible, they simply cannot match the visual impact of the short-lived High Relief issue, as close to Saint-Gaudens' original vision as most collectors could hope to obtain. This is an example of the earlier and more plentiful Wire Rim type, which constitutes roughly 70% of the 12,367-coin production. Satiny yellow-gold surfaces exhibit pinpoint definition. Minor flecks and a few contact marks do not diminish the eye appeal.  
*From The Chinook Collection.* NGC ID# 26F2, PCGS# 9135

**1907 High Relief Double Eagle, MS63**  
**Noticeable 'Finning' or Wire Rim**

**1907 Wire Rim High Relief Twenty, MS64**  
**Bright, Satiny Yellow-Gold Surfaces**

**5165 1907 High Relief, Wire Rim MS63 PCGS.** Prior to the advent of Augustus Saint-Gaudens and his few contemporaries in the late 19th century, sculpture in America was more of an artistic afterthought and when encountered it was of variable quality. Saint-Gaudens emphasis on realism transformed monumental sculpture in the United States, and the students he taught carried his influence well into the 20th century, decades after his death. As a teacher he is best remembered through the coins his finest pupils later designed, sculptors such as Adolph Weinman, James Fraser, and Laura Fraser. Saint-Gaudens' direct and realistic depictions, best exemplified by his ten and twenty dollar gold pieces, gave American sculpture and coinage at the dawn of the 20th century clearly understood figures and symbols. The sweep of the history of art would flow into abstraction around the time of World War I. However, in the earliest years of what became The American Century, Saint-Gaudens provided sculptural realism that required his finest work on a coin be struck in high relief for the twenty dollar gold piece. This example displays bright satiny surfaces and a complete strike. Only minor marks are noted, the most obvious located between 3 and 5 o'clock on the reverse rim. NGC ID# 26F2, PCGS# 9135

**5166 1907 High Relief, Wire Rim MS64 PCGS.** When Augustus Saint-Gaudens went to school in Paris in 1867 (rather than Rome or Florence), the choice of studying in the City of Light was not chosen because it was regarded as the best training ground for forward-looking sculptors. His residency in Paris actually had more to do with having French relatives who, in theory, could look after him. However, it turned out to be a fortuitous decision. He was immediately exposed to a multitude of high-quality sculptural works at the Paris Universal Exposition, which undoubtedly had a profound impression on him. His exposure to the finest sculpture in the Western World lasted ten years, in Paris and later in Rome, and influenced him to produce some of the finest monumental sculpture ever made when he returned to the United States. Curiously, it was his earlier experience as a cameo cutter that enabled Saint-Gaudens to carve superb bas-reliefs beginning in the 1870s, and later proved instrumental in his engravings for the ten and twenty dollar gold pieces, struck in high relief in 1907. This fully struck example displays rich honey-gold surfaces with the usually encountered satin-like finish. Superior surface preservation. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, MS62  
Scarcer Flat Rim Variety

**5167** 1907 High Relief, Flat Rim, MS62 PCGS. John Dryfhout described the effect of the many bas-reliefs produced by Augustus Saint-Gaudens over the course of his career:

“... the figure appears to rise out of the background, as if it had grown or emerged from there. His surfaces undulate, being raised and lowered, with much texture, capturing the play of light and shadow.”

Notice how similar his description of Saint-Gaudens' bas-reliefs is to the effect we see on the 1907 twenty dollar gold piece, struck in high relief. All the same visual and textural elements are present on each. In each case, the reliefs display a vitality that is undeniable. The deep, incised lines of the drapery on the figure of Liberty is realistic, but not overstated. It is this lifelike quality that seems to have “grown or emerged” from the background of the coin that gives the High Relief twenty its enduring popularity with collectors.

The Flat Rim variant of the High Relief double eagle was the second, corrected version. After a second warning from the Mint Director, the die faces and collar were adjusted to minimize the fin, or so-called Wire Rim. The Flat Rim twenties are several times scarcer than their Wire Rim counterparts and were struck for a much shorter time period (basically just the month of December). This piece exhibits satiny yellow-gold surfaces and bold design definition. Faint surface marks determine the grade but none are individually significant. NGC ID# 26F2, PCGS# 9136

1907 Flat Rim High Relief Twenty, MS63  
‘We Know What We Like,  
But We Don’t Know What That Means’

**5168** 1907 High Relief, Flat Rim, MS63 PCGS. An 1889 article in *The New York Times* had a lengthy summary of the state of sculpture in America, which is best summed up in its leading sentences: “It is plain that sculpture is on an entirely false basis with us. It is an exotic. It does not enter into our daily lives, nor belong to the list of luxurious necessities like water colors and oils.” Sculptor and art critic Lorado Taft made a pointed extension of this state of sculpture in America when he wrote: “... we know what we like, but we don’t know what that means.” Over a lifetime of monumental sculptures and bas-reliefs, Augustus Saint-Gaudens moved the American perception of sculpture as “exotic” to something more frequently encountered. This is especially evident with the limited production run of 12,367 double eagles struck in high relief - a three-dimensional design for coinage that was adapted from the figure of Nike (Victory) in the Sherman Monument, located at the south entrance of Central Park. Beginning in 1907, anyone who could afford a High Relief twenty dollar gold piece had immediate access to the formerly “exotic” art of sculpture. This is an especially attractive example of the High Relief by Saint-Gaudens, a coin that exhibits thick, satiny mint luster and rich reddish-tinted peach color. The strike is sharp. A faint vertical hairline scratch is seen with a loupe in the right reverse margin. NGC ID# 26F2, PCGS# 9136

## SAINT-GAUDENS DOUBLE EAGLES

- 5169 1907 MS64 NGC.** The numerous revisions to Augustus Saint-Gaudens original High Relief design by Henry Hering and Charles Barber allowed for mass production of the iconic design, which met a stern test in late 1907 when 361,667 pieces were struck. This example shows the wide rims typical of the 1907 “lowered relief” issue, with a remarkably sharp Capitol building and attractive, richly frosted sun-gold color with fleeting rose accents. A few tiny marks do not hinder the eye appeal at all. NGC ID# 26F5, PCGS# 9141

### 1907 Saint-Gaudens Double Eagle, MS66 Arabic Numerals No Motto Type Coin

- 5170 1907 MS66 PCGS.** A beautiful, shimmering Premium Gem example of this first-year Arabic numerals Saint, showing well-struck devices and few discernible signs of contact. Lovely peach-orange, yellow-gold, and wheat-colored hues adorn each side, producing outstanding eye appeal. Housed in a green label holder. PCGS lists only 19 finer specimens (3/19). NGC ID# 26F5, PCGS# 9141

### 1907 Saint-Gaudens Twenty, MS66 Attractive First-Year Arabic Date Type Coin

- 5171 1907 MS66 PCGS.** Approximately 95% of the 361,667-piece mintage was used in foreign trade. Nearly two-thirds of the coins went to Europe, while Central and South American countries received the other third. Most of the high-grade coins certified today come from the non-European countries, where they remained in the original bags or other packaging. This Premium Gem example might be one of those, or it may have been put aside and long-preserved by a U.S. collector. The lustrous surfaces show only a few, minuscule marks, while the strike is sharp on both sides. Attractive, lime-green hues accent vibrant, sun-gold color. PCGS reports just 19 numerically finer 1907 twenties (3/19). NGC ID# 26F5, PCGS# 9141

### 1907 Saint-Gaudens Twenty, MS66 Arabic Numerals Type Coin

- 5172 1907 MS66 PCGS.** The 1907 Arabic numerals Saint-Gaudens double eagle is a favorite date among type collectors. Of the three No Motto low-relief issues in the series, the 1907 is the second-most plentiful (the 1908 No Motto benefits from the Wells Fargo Hoard), but its status as the first-year issue and its distinctive wide rims earn it special significance. This Premium Gem example displays shimmering peach-gold luster with greenish and rose accents around the margins. The preservation is nearly flawless, promoting strong eye appeal. PCGS lists only 19 finer specimens (3/19). NGC ID# 26F5, PCGS# 9141

### 1908 No Motto Twenty, MS67 Lustrous and Remarkably Smooth

- 5173 1908 No Motto MS67 PCGS.** Short Rays obverse. A formidable Superb Gem of this briefly produced design subtype. The peach-gold surfaces are lustrous and remarkably smooth, with the sole exception of a small mark on the rays under the eagle. The strike is full on the Capitol building and incomplete only on the leg feathers. *Ex: Central States Signature (Heritage, 4/2013), lot 6106, where it realized \$6,168.75.* NGC ID# 26F6, PCGS# 9142

**1908 No Motto, MS68  
Wells Fargo Hoard Coin  
None Finer at NGC**

- 5174 1908 No Motto MS68 NGC.** Ex: Wells Fargo Nevada Gold. Short Rays Obverse, as are nearly all 1908 No Motto twenty dollar gold pieces from this famous 19,990-coin hoard. Remarkably, there were even more Premium Gems recovered than Gems, and hundreds of coins qualified for the MS67 grade level. This outstanding MS68 ranks among the finest collectible No Motto twenties aside from the famous 10 MS69 coins also recovered from the Wells Fargo group. The peach-gold and lavender surfaces are unsurprisingly pristine, highly lustrous, and sharply struck, except for Liberty's nose. NGC ID# 26F6, PCGS# 9142

**1908 No Motto Double Eagle, MS67  
Ex: Wells Fargo Hoard**

- 5175 1908 No Motto, Wells Fargo Nevada, MS67 NGC.** Ex: Wells Fargo Nevada Gold. Short Rays Obverse. An ideal No Motto type coin from the famous hoard brought to market at the end of the 20th century. A small planchet flake occurs below TY and two abrasions appear on the breast and below the branch stem. This glistening Superb Gem is otherwise perfect with exceptionally strong definition and gorgeous lemon-gold color. Lavender accents are also seen. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

- 5176 1908-D No Motto MS64 PCGS.** Ex: Rive d'Or Collection. Collectors should be able to obtain a near-Gem 1908-D No Motto twenty without trouble, but Gems become elusive. Satiny mint luster radiates over textured, minimally abraded yellow-gold surfaces. Detail is slightly uneven, though the Capitol is bold. *From The Chinook Collection.* NGC ID# 26F7, PCGS# 9143

**1908 Motto Double Eagle, MS64  
Conditionally Challenging**

- 5177 1908 Motto MS64 PCGS.** Ex: Rive d'Or Collection. The 1908 Motto twenty is a conditionally challenging issue, much more so than many of its contemporaries, certainly its No Motto counterpart. Frosty mint luster emanates from this minimally abraded wheat-gold near-Gem. The strike is crisp on Liberty's face and torch fingers. Small coppery alloy spots occur on each side. *From The Chinook Collection.* NGC ID# BNAK, PCGS# 9147

- 5178 1908-D Motto MS64 PCGS.** Ex: Rive d'Or Collection. Lighter centers deepen to sun-gold hues around the outer areas of this lustrous 1908-D Motto double eagle. Vibrant luster, good detail, and well-preserved surfaces contribute to the lovely visual appeal. *From The Chinook Collection.* NGC ID# 26F9, PCGS# 9148

**1908-S Double Eagle, AU55  
Choice for the Grade**

**5179 1908-S AU55 PCGS. CAC.** The most challenging double eagle for the year enjoys a series-low mintage of 22,000 circulation strikes (excluding the 1907 High Relief). Roger Burdette suggests a survivorship of 1,500 coins. The faintest trace of field reflectivity appears in the red-gold fields of this minimally circulated twenty dollar. Detail is good at the lower obverse, if not on the torch fingers and band. Lightly abraded with lovely eye appeal. Choice for the grade. NGC ID# 26FA, PCGS# 9149

**1908-S Double Eagle, MS61  
Attractive Red-Gold Color**

**5180 1908-S MS61 NGC. Ex: Rive d'Or Collection.** Well-known for its tiny mintage of 22,000 coins, the 1908-S double eagle represents the first Saint-Gaudens twenty dollar emission from the San Francisco Mint. Uncirculated coins are highly sought-after but conditionally scarce. This reddish-gold example enjoys bright, frosty mint luster that radiates from slightly baggy surfaces. Still, eye appeal is much better than expected. *From The Chinook Collection.* NGC ID# 26FA, PCGS# 9149

**1908-S Saint-Gaudens Twenty, MS62  
Low-Production Branch Mint Issue**

**5181 1908-S MS62 NGC.** The 1908-S Saint-Gaudens double eagle claims a memorably low mintage of just 22,000 pieces, making the issue scarce-to-rare in all Mint State grades. This attractive MS62 specimen is sharply detailed in most areas, but a little softness is evident on the torch. The lustrous orange-gold surfaces are lightly marked for the grade. NGC ID# 26FA, PCGS# 9149

**5182 1909/8 FS-301 XF45 PCGS.** The lower left loop of an 8 is obvious above the tail of the 9 in the date. Edgar Adams reported the variety on page 157 in the June 1910 issue of *The Numismatist*, but it was not widely collected until the 1940s. This green-gold representative shows wear on Liberty's chest and knee, but there are no relevant marks, and luster glints from design elements. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

**1909/8 Twenty Dollar, MS62  
Only Overdate of Series**

**5183 1909/8 FS-301 MS62 PCGS.** Undoubtedly many 1909/8 double eagles were incorrectly regarded as 1908 twenties by their pre-1950 owners. An apricot-gold example with gunmetal accents. Small to moderate marks are scattered but few pose a distraction. The 1909 mintage of 161,282 pieces is approximately equally divided between normal date and overdate varieties. *From The Jersey Shore Gold Collection.* NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

**1909/8 Double Eagle, MS62  
Attractive for the Grade**

**5184 1909/8 FS-301 MS62 PCGS.** A hubbed overdate, created when a working die dated 1908 was impressed with a hub dated 1909. This Mint State example of the variety is bright yellow-gold and shows well-struck design elements. Light high-point surface contact defines the grade, but no singular abrasions are visible. The only *Guide Book* variety in the series. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

**5185 1910 MS64+ PCGS. CAC.** The reported mintage of 482,000 pieces makes the 1910 Saint-Gaudens double eagle an available issue in grades up to the MS64 level, but it becomes scarce in finer grades. This Plus-graded Choice example displays well-detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster on both sides. NGC ID# 26FF, PCGS# 9154

**5186 1910-S MS64+ PCGS. CAC.** Only a tiny percentage of certified 1910-S double eagles possess a CAC seal. But the present near-Gem does, and one can see why, given its rich orange toning and vibrant cartwheel sheen. Marks are limited to distributed minor grazes. CAC: 93 in 64, 8 finer (3/19). NGC ID# 26FH, PCGS# 9156

---

**1911-D Twenty Dollar, MS66  
Scarce in Finer Condition**

- 5187 1911-D MS66 NGC.** The 1911-D Saint-Gaudens double eagle is usually available in MS66, although it is scarce finer. This piece displays a sharp strike and satiny wheat-gold mint luster. A loupe reveals only trivial signs of contact, mostly on the high points of the eagle and Liberty's figure. NGC reports 39 finer submissions (3/19). NGC ID# 26FK, PCGS# 9158

---

**1911-S Double Eagle, MS65  
Conditionally Elusive**

- 5188 1911-S MS65 NGC.** Despite a substantial mintage of more than 775,000 coins, examples of the 1911-S are rarely encountered in Gem or finer grades. In fact, NGC has only certified 32 finer pieces (2/19). This lovely Gem exhibits matte-like honey-gold surfaces with brilliant luster and outstanding eye appeal.  
*From The Jersey Shore Gold Collection.* NGC ID# 26FL, PCGS# 9159

- 5189 1913-D MS64+ NGC.** The highly lustrous and satiny surfaces of this well-preserved 1913-D show only minuscule marks. The rich-gold fields and devices are sharp — especially at the troublesome Capitol building and torch flame — while the reverse motifs are particularly crisp and unblemished. The NGC Plus designation confirms the high-end Choice Uncirculated quality. NGC ID# 26FP, PCGS# 9162

---

**1913-D Saint-Gaudens Double Eagle, MS65  
Rarely Seen Finer**

- 5190 1913-D MS65 PCGS.** Two-toned gold coins are a delight, such as this jade and red-orange tinged beautiful Gem. Rich cartwheel luster rolls around each side, and the strike is meticulous. Mentionable abrasions are simply not a factor. A well-produced and attractive example of this issue. PCGS has graded eight numerically finer examples (3/19).  
*Ex: Summer FUN Signature (Heritage, 7/2011), lot 5239, realized \$4,600.* NGC ID# 26FP, PCGS# 9162

---

**1913-S Double Eagle, MS62+  
34,000 Business Strikes**

- 5191 1913-S MS62+ PCGS.** A mintage of 34,000 business strikes stands out among the lowest in the Saint-Gaudens series. The entire production was delivered by the coiner to the San Francisco Mint superintendent on the last day of the year. Abundant frosty luster glows from this well-struck example. Bright yellow-gold surfaces are predictably abraded on the one hand, but still high-end for the grade on the other. NGC ID# 26FR, PCGS# 9163

---

**1914 Double Eagle, MS63  
Radiant, Frosty Mint Luster**

- 5192 1914 MS63 PCGS. CAC.** A well-produced issue overall, the 1914 is highly sought for type despite being a slightly better date compared to other readily available Saints. This Select Uncirculated example is deeply frosted and sharp, with a few small marks that account for the assigned grade. Mint luster cascades across vibrant, medium-gold surfaces. CAC endorsed, with high eye appeal for the grade. NGC ID# 26FS, PCGS# 9164

- 5193 1914-D MS65 PCGS.** From a mintage of 453,000 pieces, this branch mint Gem exhibits sharply detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster throughout. PCGS has graded 80 numerically finer examples (3/19). NGC ID# 26FT, PCGS# 9165

- 5194 1914-D MS65 PCGS.** The 1914-D Saint-Gaudens double eagle claims a mintage of 453,000 pieces and the issue is not difficult to locate in MS65 condition, but finer examples are elusive. The vivid orange-gold surfaces of this attractive Gem are well-preserved and lustrous, with sharply detailed devices and terrific eye appeal. NGC ID# 26FT, PCGS# 9165

- 5195 1914-S MS65 PCGS.** With a reported mintage of more than 1.4 million pieces, the 1914-S Saint-Gaudens double eagle is readily collectible at the MS65 grade level, but finer coins are somewhat scarce. This attractive Gem is sharply detailed and lustrous, with well-preserved orange-gold surfaces. NGC ID# 82KA, PCGS# 9166

- 5196 1915-S MS65 NGC.** This lovely wheat-gold and sea-green Gem offers booming luster and a sharp strike. Patience is required to locate the few minor field grazes. MS65 is the optimum grade for the issue, given the vastly higher premium above melt associated with the MS66 level. Certified in a circa-2000 holder. NGC ID# 26FW, PCGS# 9168
- 5197 1915-S MS65 PCGS.** An attractive Gem representative from the San Francisco Mint, with well-detailed design elements and well-preserved orange-gold surfaces that show only insignificant signs of contact. Overall eye appeal is outstanding. NGC ID# 26FW, PCGS# 9168
- 5198 1916-S MS64+ PCGS. CAC.** Plus graded by PCGS with CAC endorsement, this frosted and vibrantly lustrous 1916-S is extremely close to full Gem status. The few tiny marks are inconspicuous and of minor concern, and the strike is predictably sharp in most areas. Bright mint luster illuminates rich-gold color for outstanding eye appeal. NGC ID# 34NJ, PCGS# 9169
- 5199 1924 MS66 NGC.** The 1924 is always a top candidate for type, with tens of thousands certified and a reputation for great eye appeal. This spectacular Premium Gem exhibits sharply detailed design elements throughout, with bright orange-gold surfaces that show hints of lilac and vibrant mint luster on both sides. NGC ID# 26G7, PCGS# 9177
- 5200 1924 MS66+ PCGS.** A sharp strike on the top of the torch and Liberty's fingers complements high quality of luster on this high-end Premium Gem type coin. Each side displays radiant wheat-gold mint luster and is largely devoid of abrasions. Some faint slide marks on the highest points of Liberty's figure and a microscopic tick in the field below the right (facing) elbow are all that prevent a full MS67 grade. NGC ID# 26G7, PCGS# 9177
- 5201 1924 MS66+ PCGS.** Particularly frosty luster with natural yellow-gold and wheat hues complements a bold strike on this high-end Premium Gem. A loupe reveals a few scattered, unobtrusive imperfections, but the eye appeal is outstanding. Finer 1924 double eagles are only occasionally available. NGC ID# 26G7, PCGS# 9177
- 5202 1924 MS66+ NGC.** This Plus-graded Premium Gem representative exhibits well-detailed design elements and well-preserved yellow and rose-gold surfaces that display vibrant mint luster on both sides. The 1924 Saint-Gaudens twenty is an available issue in high grade and a favorite choice of type collectors. NGC ID# 26G7, PCGS# 9177
- 5203 1925 MS66 PCGS.** The 1922 through 1928 Philadelphia issues are available in quality Mint State. Nonetheless, the present lemon-gold Premium Gem stands out, due to its rich toning, dynamic luster, and bold strike. Nearly pristine save for minor contact on the sun. NGC ID# 26GA, PCGS# 9180

---

**1925 Saint-Gaudens Twenty, MS66  
Doubled Die Reverse**

- 5204 1925 Doubled Die Reverse, FS-801, MS66 PCGS.** Bold die doubling is evident on the eagle's legs and wing feathers on this important *Cherrypickers'* variety. PCGS has attributed just 40 examples of FS-801, with this MS66 coin being tied with two others as the finest (2/19). The strike is sharp, and the original orange-gold and peach luster is incredibly luminous in-hand. Under a loupe, faint mattelike texturing is evident in the fields, contributing to the unique eye appeal of the luster. Noticeable abrasions are pleasantly absent from each side. NGC ID# 26GA, PCGS# 145743 Base PCGS# 9180

- 5205 1926 MS65 NGC. CAC.** Luminous honey-gold mint luster cartwheels freely around each side on this Gem 1926 double eagle. The design elements show sharp definition, and neither side has bothersome abrasions — the eagle's wing feathers are particularly clean. A small bluish toning spot is tucked near the rim by the D in UNITED. NGC ID# 26GD, PCGS# 9183

---

**1926 Double Eagle, MS66  
Perfect for a High-End Set**

- 5206 1926 MS66 PCGS. CAC.** Scintillating mint frost and a pinpoint impression make this a terrific coin to target for a high-end set of Saint-Gaudens double eagles. Shades of peach and sun-gold are just as eye-appealing, as are the pristine fields. A total of five coins at PCGS plus eight submissions at NGC are graded numerically higher. This Premium Gem is tied for finest stickered by CAC (3/19). NGC ID# 26GD, PCGS# 9183
-

**1926 Saint-Gaudens Twenty, MS67  
Among the Finest Certified Examples**

- 5207 1926 MS67 NGC.** The Philadelphia Mint produced 816,750 Saint-Gaudens double eagles in 1926, all delivered in the first half of the year. Roger Burdette estimates the surviving population at about 125,000 examples in all grades, the great majority of them repatriated from foreign holdings. This makes the 1926 one of the more available issues of the series, but the date is conditionally rare at the MS67 grade level.

This spectacular Superb Gem exhibits sharply detailed design elements throughout. A heavy vertical die break passes through the eagle's beak on the reverse and some finer cracks are seen through the tail feathers. The light orange-gold surfaces are impeccably preserved and especially vibrant mint luster adds to the terrific eye appeal. Has not been offered in ten years. Census: 8 in 67 (1 in 67★), 0 finer (3/19).

*From The Jersey Shore Gold Collection.* NGC ID# 26GD, PCGS# 9183

- 5208 1926 Tripled Die Obverse, FS-101, MS65 PCGS.** Although undesignated as such within its first generation "rattler" holder, the present Gem is an example of the FS-501 variety with interesting die tripling on the date and nearby rays and stars. The sea-green and butter-gold surfaces are lustrous, nicely struck, and well preserved. *From The Jersey Shore Gold Collection.* NGC ID# 26GD, PCGS# 145744 Base PCGS# 9183

**1927 Saint-Gaudens Twenty, MS66+  
Surprisingly Scarce Any Finer**

- 5209 1927 MS66+ PCGS.** Aside from the 1924 issue, the 1927 is the most available date in the series. Its availability comes to an abrupt halt at the MS67 level, where PCGS has certified only 26 pieces (2/19). This example is just half a notch below that lofty grade, with extraordinarily smooth and lustrous surfaces. Orange and rose highlights dance across sun-gold fields and devices. A sharp strike exists throughout both sides, and the grade is limited by only a few tiny marks — most of which appear on the reverse. NGC ID# 26GG, PCGS# 9186

**1927 Double Eagle, MS66+  
Captivating Type Coin**

- 5210 1927 MS66+ PCGS.** The 1927 ranks among the most popular and collectible type coin issue in Augustus Saint-Gaudens' double eagle series, which was introduced in 1907 and ran until 1933. Captivating mint frost radiates from lively yellow-gold surfaces that include pleasing rose accents. Liberty's torch fingers are fully delineated, just one aspect of the strong overall strike. PCGS has graded 26 finer submissions (3/19). NGC ID# 26GG, PCGS# 9186

- 5211 1928 MS66 PCGS.** A stunning Premium Gem representative of this popular type issue, with sharply detailed design elements and impeccably preserved orange-gold surfaces that radiate vibrant mint luster with terrific eye appeal. NGC ID# 34VK, PCGS# 9189

**1928 Double Eagle, MS66+  
Scarce High Grade Example**

- 5212 1928 MS66+ PCGS.** The 1928 double eagle had the highest mintage of any twenty issued from 1850 through 1933, with 8.8 million coins, and its rarity (or lack thereof) is consistent with its mintage. That means that the 1928 is the quintessential type coin for the collector seeking a pristine example. This lovely Premium Gem has outstanding surfaces with frosty yellow luster and bold design motifs. NGC ID# 34VK, PCGS# 9189

1928 Twenty Dollar, MS66+  
Mint-Fresh Appeal

- 5213** 1928 MS66+ PCGS. CAC. For type purposes, this Premium Gem 1928 Saint offers substantial visual merit. As affirmed by the Plus designation, the frosty, mint-fresh surfaces are almost devoid of any noticeable abrasions, with only a few tiny ticks on the high points of the figure that limit the grade. Each side shows a radiant blend of rose, wheat, and lilac-gold hues, and the coin's outstanding quality even passes close scrutiny with a loupe. The 1928 is the final relatively available issue in the Saint-Gaudens double eagle series, but is seldom seen finer than this piece.  
*Ex: Summer FUN Signature (Heritage, 7/2015), lot 3402, where it realized \$5,052.50. NGC ID# 34VK, PCGS# 9189*

TERRITORIAL GOLD

(1831-34) C. Bechtler Gold Dollar, AU55  
K-1, 30 Grains

- 5214** (1831-1834) C. Bechtler Dollar, 30 G., AU55 PCGS. K-1, R.4. A through-the-coin crack at 4 o'clock adds interest to this 30-grain Bechtler gold dollar, but does not detract from its appeal. Struck before the 1834 federal devaluation of the dollar relative to gold, this is the sole Bechtler dollar of this weight. Subsequent issues were done at a weight of 28 grains and 27 grains. This example is slightly wavy but has few abrasions or other distractions. The coin displays a softly reflective, yellow-gold color with a touch of orange-gold on some of the lettering. Struck from rotated dies as often seen. Listed on page 392 of the 2019 *Guide Book*. Population: 15 in 55, 25 finer (3/19).  
*Ex: ANA National Money Show Signature (Heritage, 2-3/2014), lot 4357, where it realized \$8,812.50.*  
**From The Uptown Collection of Bechtler Territorial Gold.** NGC ID# 2B94, PCGS# 10064

C. Bechtler Gold Dollar, Original AU55  
Struck on a 30-Grain Planchet, K-1

- 5215** (1831-1834) C. Bechtler Dollar, 30 G., AU55 PCGS. K-1, R.4. One of only two distinct Christopher Bechtler gold dollars, this one struck on a 30-grain planchet and the other struck on a 28-grain flan. This piece has unquestionable original surfaces that display deeper gray-lilac patina surrounding the devices. There are no obvious abrasions on either side. Listed on page 392 of the 2019 *Guide Book*. NGC ID# 2B94, PCGS# 10064

Bechtler Two and a Half, K-13  
70G., 20C., Mint State Sharpness

- 5216** (1837-1842) C. Bechtler Quarter Eagle, 70G. 20C. — Obverse Damage, Cleaned — NGC Details. Unc. K-13, R.6. The sole two-and-a-half Bechtler variety with a 70 gram weight standard. The evenly struck almond-gold surfaces are faintly hairlined and mildly bright from a long-ago wipe. A roundish mark within the 0 in 250 is strictly assessed by NGC, but no other abrasions are of any notice. Listed on page 393 of the 2019 *Guide Book*.

1834 C. Bechtler Gold Five, AU53  
K-17, 140G., 20C., RUTHERFORD

- 5217** (1834-1837) C. Bechtler Five Dollar, RUTHERFORD, Plain Edge, AU53 PCGS. K-17, R.5. The Bechtlers were a jewelry-and-watchmaking-turned-coining family that operated in Rutherford County during the North Carolina gold rush of the 1830s and 1840s. They provided an invaluable service, converting locally mined gold ore into usable commercial coinage in three denominations: dollars, two and a half dollars, and five dollars. This large-size denomination comes in several varieties. K-17 shows 20 close to CARATS and the R in RUTHERFORD close beside the T in AT. Each side is bright with wheat-gold color and strong, minimally worn motifs. Only the obverse rim is soft from 5:30 to 10 o'clock. Small adjustment marks appear around each side. Listed on page 394 of the 2019 *Guide Book*. NGC ID# 2B9P, PCGS# 10091

A. Bechtler Gold Dollar, Original AU58  
27G., 21C., Plain Edge, K-24

- 5218** (1842-1850) A. Bechtler Dollar, 27G. 21C., Plain Edge AU58 PCGS. Kagin-24, R.3. This August Bechtler issue displays high rims and a plain edge, the most frequently seen Bechtler dollar from the era. The surfaces are slightly concave on the reverse and convex on the obverse. Struck from native Carolina gold, eye-catching reddish-orange shades cover the partially prooflike surfaces. A few light hairlines exist, as well as a minor planchet streak at the center of the obverse, and two triangular, shallow planchet voids on the reverse. Eye appeal is excellent. Population: 50 in 58, 35 finer (2/19). NGC ID# 2B99, PCGS# 10040

August Bechtler Gold Dollar  
MS61, 27G., 21C., Kagin-24

- 5219** (1842-1850) A. Bechtler Dollar, 27G. 21C., Plain Edge MS61 NGC. K-24, R.3. Cherry-red toning outlines the legends. The smooth fields are green-gold. A sharply struck example of the popular Bechtler type issue, struck by Christopher's son August. Wavy near the G in 27 G. and the base of the large 1, as often seen on these thin gold pieces. Listed on page 394 of the 2019 *Guide Book*. *From The Uptown Collection of Bechtler Territorial Gold*. NGC ID# 2B99, PCGS# 10040

**1852 Humbert Ten Dollar, MS61  
K-10a, Deteriorated Obverse Die**

- 5220** 1852 Humbert Ten Dollar MS61 NGC. K-10a, High R.6. Ranked among the more commonly seen issues among California gold pieces overall, but the K-10 variety of the 1852 Humbert ten dollar is conditionally rare in Mint State grades. The late die state of K-10 is given the K-10a designation by Kagin, and is known as the UNITED variety due to the heavy die crack through the base of UNITED. K-10 is rated Low R.4, while Kagin lists the late die state K-10a High R.6 overall. The piece offered here has a shattered obverse die with extensive cracks around the entire circumference, along with severe die rust that covers the obverse. Wear is light and each side has bright yellow-gold luster. Listed on page 398 of the 2019 *Guide Book*. Census: 2 in 61, 1 finer (2/19). Ex: ANA Signature (Heritage, 8/2007), lot 2150, which realized \$19,550. NGC ID# ANGG, PCGS# 10187

**1853 Assay Office Twenty, AU58  
K-18, 900 Thous.**

- 5221** 1853 Assay Office, 900 Thous. AU58 NGC. K-18, R.2. This moderately plentiful Assay Office twenty dollar issue was struck during a long period from March to October 1853. Numerous die pairs were used. This example displays bright yellow-gold surfaces and sharp details, with hints of luster remaining in the protected areas of the fields. Eye appeal is pleasing for the grade. Listed on page 400 of the 2019 *Guide Book*. NGC ID# ANHD, PCGS# 10013

**Circa-1900 Uniface Copper Restrike  
Mormon Ten Dollar, MS64 Red and Brown**

- 5222** (Circa-1900) Mormon Ten Dollar, Uniface Copper Restrike, MS64 Red and Brown NGC. K-4a, R.7. Plain edge. Listed on page 368 of the standard Kagin reference, and described as "restrikes probably made during the 50-year anniversary in 1898." Uniface obverse or uniface reverse strikes, in copper or lead, some gilt, were struck from the original K-1 through K-6 dies. All combinations are very rare. They were presumably produced for display purposes. The present Choice copper example has a blank reverse. The obverse is from the Kagin-3 (1849) ten dollar die with the eye of Jehovah and a Phrygian cap. The mahogany-brown surfaces are unabraded and slightly granular, as struck from a moderately rusted die.

## S.S.C.A. RELIC GOLD MEDALS

### 2001 S.S. Central America Gold Relic Medal '1855 Kellogg & Co. Fifty,' Gem Proof

- 5223** (2001) S.S.C.A. Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Proof PCGS. Struck on September 9, 2001, with a proof mintage for that date of 104 pieces. Contains 1309 grains of 887 Fine gold, obtained from melted-down Kellogg & Humbert ingots recovered circa-1988 from the S.S. *Central America* shipwreck. A pristine piece with exemplary cameo contrast. Accompanied by a glass and metal frame, and a tan California Historical Society presentation box and slipcover. NGC ID# 32DS, PCGS# 10358

### '1855 Kellogg & Co. Fifty' Gem Proof 2001 S.S.C.A. Relic Gold Restrike

- 5224** (2001) S.S.C.A. Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Proof PCGS. Struck on September 4, 2001, one of only 64 pieces with that counterstamp date. A relic medal made from California Gold Rush Kellogg & Humbert 887 Fine gold ingots recovered from the S.S. *Central America*, which sank on September 12, 1857. Fully struck and flawless with exemplary cameo contrast. Comes with Certificate of Authenticity #1511, a California Historical Society booklet, a glass and metal frame, and a tan presentation box and slipcover. NGC ID# 32DS, PCGS# 10358

## CALIFORNIA FRACTIONAL GOLD

- 5225** 1855 Liberty Round 25 Cents, BG-226A, R.5, MS65 PCGS. Die State II, with the bridge of the nose absent, but without obverse clash marks. A sharply struck peach-gold Gem, seemingly as made and the single highest-graded example of BG-226A at either leading service. The scarce Period One variety was made by French-American San Francisco jeweler Antoine Louis Nouzillet. NGC ID# 2BHZ, PCGS# 10417

### 1853 Octagonal Half Dollar, MS63 Popular 'Peacock' Variety, BG-302

- 5226** 1853 Octagonal Liberty, Peacock Reverse, 50 Cents, BG-302, Low R.4, MS63 PCGS. Breen-Gillio Die State II with light rust on the obverse field. The "Peacock" type is among the best-known in the California small denomination gold series, and is listed with a large premium as "Small Eagle With Rays" on page 413 of the 2019 *Guide Book*. It is likely that the engraver intended an eagle with glory rays, since the bird's tail is beneath the claws, but the nickname persists. The F.D. initials confirm the maker as Frontier, Deviercy & Co. A satiny olive-gold and rose-red example with a minor retained lamination left of the G in GOLD. NGC ID# 2BJ7, PCGS# 10422

- 5227** 1854 Liberty Octagonal 1 Dollar, BG-532, Low R.4, MS62 PCGS. About two-thirds of the PCGS Population for this Period One variety is certified in circulated grades. This data confirms that such pieces participated in the Gold Rush economy prior to 1855, when San Francisco first struck silver coinage. A semiprooflike lime-green and caramel-gold example that boasts smooth surfaces and an even strike. NGC ID# 2BLX, PCGS# 10509

- 5228** 1876 Indian Octagonal 25 Cents, BG-799D, R.6, MS65 Deep Prooflike NGC. Excellent detail with profoundly reflective green-gold mirrors. A carefully preserved and high-end example of this rare die pair.  
*Ex: Long Beach Signature (Heritage, 9/2010), lot 5839, where it realized \$2,760. NGC ID# 2BRP, PCGS# 10630*

- 5229** 1868 Indian Octagonal 25 Cents, BG-799T, High R.5, MS67 NGC. The berry is positioned near the foot of the R in DOLLAR. All no CAL issues were struck between 1876 and 1883, with this piece backdated to 1868 as a curiosity for collectors. The Breen-Gillio reference notes: "Usual breathtaking cameo Prooflike appearance." This Superb Gem has no formal designation, but it shows notable contrast between the razor-sharp device and rich, reflective yellow-gold fields. Census: 1 in 67, 0 finer (2/19). NGC ID# 2BS9, PCGS# 10646

- 5230** 1881 Indian Octagonal 25 Cents, BG-799BB, High R.6, MS63 PCGS. The manufacturer of this rare octagonal Indian variety is unknown, but punch linkage confirms the maker is the same as the BG-965 octagonal half. Those who collect by maker will find "Unknown Maker F" to be a stopper. This evenly struck example displays prominent clash marks but the lime and lemon surfaces are unmarked. Certified in a green label holder. Population: 4 in 63, 4 finer (2/19). NGC ID# 2BSH, PCGS# 10654

- 5231 1876 Indian Round 25 Cents, BG-881, R.5, MS66 Prooflike NGC.** A No Cal variety with berries flanking the fraction numerator. A very scarce die pair issued by Christopher Ferdinand Mohrig, a San Francisco jeweler. The prominently reflective fields are unblemished, and the strike is bold except on the feathertips and the bottom of the wreath. Census: 2 in 66 Prooflike, 1 finer (2/19).  
*Ex: FUN Signature (Heritage, 1/2008), lot 5202, which realized \$1,495. NGC ID# 2BVG, PCGS# 710742*

**1870 Liberty Octagonal 50 Cents, MS67  
BG-908, Struck by Frontier & Co.**

- 5232 1870 Liberty Octagonal 50 Cents, BG-908, R.5, MS67 PCGS.** No fraction bar is present, and the 0 in the date is under the A in DOLLAR. Concentric circular lathe lines are seen on each side and are typical for the issue produced by Frontier & Co. Both sides are partly prooflike with pleasing red-gold coloration. The crude design is relatively well-impressed. Population: 1 in 67, 0 finer (2/19). NGC ID# 2BW4, PCGS# 10766

- 5233 1876 Indian Octagonal 50 Cents, BG-951, High R.5, MS66 Prooflike NGC.** A flashy and fully struck lemon-gold Premium Gem. The fields are lightly clashed, but no abrasions or flan imperfections are apparent. A rarer Mohrig die marriage, identified by its partly lapped third headdress feather. Census: 3 in 66 Prooflike, 0 finer (2/19).  
*Ex: Long Beach Signature (Heritage, 2/2006), lot 4097, which realized \$2,070. NGC ID# 2BXK, PCGS# 710809*

- 5234 1881 Indian Octagonal 50 Cents, BG-957, Low R.6, MS65 PCGS.** From the same die pair as BG-952B, but the reverse die was lapped to partially efface CAL, which is always partial on this rare Christopher Ferdinand Mohrig marriage. The A flashy canary-gold Gem with limited granularity near star 7. The centers show slight inexactness of strike. Population: 4 in 65, 0 finer (2/19). NGC ID# 2BXU, PCGS# 10815

- 5235 1874 Indian Octagonal 50 Cents, BG-958, High R.6, MS66 Prooflike NGC.** The date is low and left, star 1 is between the chin and bust tip, and CAL is in large letters. This issue, like many of its contemporaries, was struck around 1881-1882 and backdated. This Condition Census-level Premium Gem features dramatic Prooflike contrast and deep orange-gold color. Census: 1 in 66 Prooflike, 1 finer (2/19). NGC ID# 2BXV, PCGS# 710816

**1874 Octagonal Indian Half Dollar, MS64  
BG-959, Only 10 Pieces Known in All Grades**

- 5236 1874 Indian Octagonal 50 Cents, BG-959, R.7, MS64 PCGS.** A backdated issue, actually struck 1881-1882, but dated 1874. This variety was not discovered until 1952-55, and only 10 separate examples are listed in the second edition of Breen-Gillio. The fields are deeply reflective on the obverse, less so on the reverse with considerable frost intermixed on that side. Rich golden-orange color overall with a few dabs of lilac interspersed. Population: 3 in 64, 0 finer (3/19). NGC ID# 2BXX, PCGS# 10817

- 5237 1876 Indian Round 50 Cents, BG-1065, R.5, MS66 Deep Mirror Prooflike NGC.** A lovely pumpkin-gold representative. The centers display minor softness, but the preservation is ideal. The portrait style of the Indian is characteristic of the Christopher Mohrig workshop. Census: 5 in 66 Deep Mirror Prooflike, 1 finer (2/19).  
*Ex: Internet Auction #26053 (Heritage, 5/2006), lot 13391, which realized \$3,593.75. NGC ID# 2C2G, PCGS# 910894*

**1876 Octagonal Indian-Design Gold Dollar  
BG-1115, MS62**

- 5238 1876 Indian Octagonal 1 Dollar, BG-1115, R.6, MS62 PCGS.** An attractive, nicely prooflike example of this extremely rare variety, showing deep red-gold color. A few small abrasions are present, none of which are out of context with the grade level. (Although, with a piece of this rarity, grade is nearly irrelevant). Undoubtedly a coin worthy of serious consideration for the specialist.  
*Ex: Long Beach Signature (Heritage, 9/2004), lot 8220, where it brought \$3,680. NGC ID# 2C3E, PCGS# 10926*

1876 Indian Octagonal Gold Dollar, BG-1115  
MS66 Deep Prooflike

- 5239 1876 Indian Octagonal 1 Dollar, BG-1115, R.6, MS66 Deep Prooflike NGC. The bust is tilted forward with the first feather back, and a star appears below DOLLAR. Herman J. Brand, operating at 134 Sutter Street in San Francisco, made this and similar Octagonal gold dollars. Reflective orange-gold fields show distinct reddish-accents typical of the issue. Sharp throughout, save for stars 8 and 9. NGC ID# 2C3E, PCGS# 10926

INGOTS

---

Circa 1877 North Star Silver Mining Silver Ingot  
28.5 Grams

- 5240 (Ca. 1877) North Star Silver Mining Company Silver Ingot. 28.5 grams. We have not encountered a NSSM silver ingot since 2006. In order to provide some background we reproduce a part of the description from that auction appearance from 13 years ago:

"This small, trapezoidal silver ingot is suggestive of the style of John Taylor. It is most likely from the early period of this mine and was very likely made as a souvenir at the onset of production. The mine was owned by Albert Conyers, a distant relative of Buffalo Bill Cody. The North Star Silver Mining Company was most productive from 1877-1885, but remained active through the first part of the 20th century. Much more background information can be found in Holabird's Auction # 17, page 165."

The top side is simply laid out in two lines: SILVERTON / N.S.S.M. Just after the letter M is what appears to be a letter J, but it is a flaw, probably a gas bubble, from the time of production. Light gray patina is seen over each side. The ingot measures: 28 x 13 x 6 mm.

---

San Francisco Mint Silver Ingot, 5.76 Ounces  
Type One Hallmark

- 5241 Mint of the United States at San Francisco, Type One Oval Hallmark, Medium Font # 1426, Curved Stem 9s in 999.5 Fine. 5.76 ozs. Late-1930s to mid-1940s. These are the earliest San Francisco Mint silver ingots. The serial number is medium-sized. The weight, 5.76 OZS, is stamped on the back side, as always. The hallmark is slightly off the ingot, missing just a bit of the right corner of the oval. The top side is laid out: oval hallmark / 1426 / 999.5 / FINE. The ingot measures: 50 x 30 x 10 mm. Light, even gray-lilac toning is seen on each side.

---

Cripple Creek Gold Ingot  
Larger 2.042 Troy Ounce Size

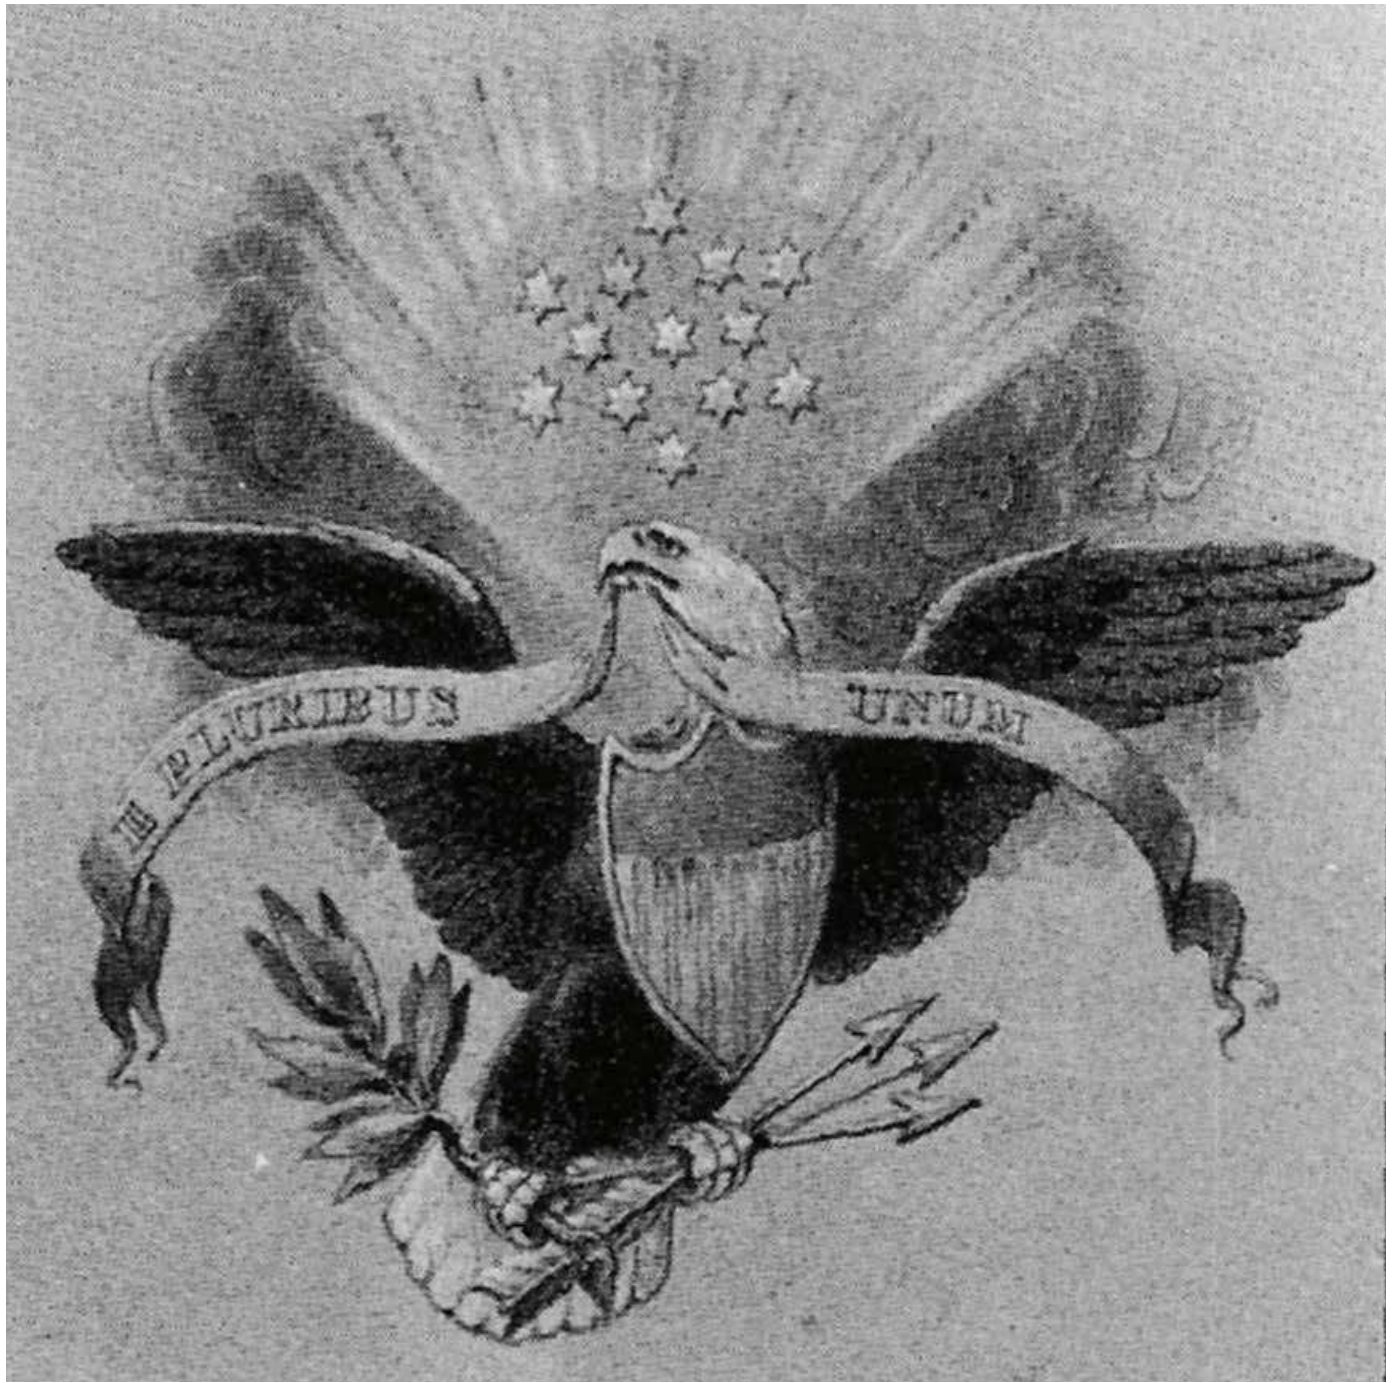

- 5242 Cripple Creek Gold Ingot. 2.042 Troy Ounces. This is a well-made example of this modern memento from this historic mining district. Rectangular in shape, as are all the examples we have seen, with the legends all laid out neatly on the top side, reading: CRIPPLE CREEK / COLORADO / 999 FINE / 2.042 TR. OZ. The sides are polished, as produced, giving the ingot a bright and pleasing appearance.

*End of Auction*

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., Heritage Auctions, Inc., Heritage Collectibles, Inc., Heritage Luxury Property Auctions, Inc., Heritage Numismatic Auctions, Inc., Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the “Auctioneer”). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
  - For Domain Names & Intellectual Property Auction lots the Buyer's Premium is Fifteen percent (15%) subject to a minimum of \$19 per lot;
  - For Animation Art, Comic, Currency, Movie Posters, Sports Collectibles, US Coin, and World & Ancient Coin Auction lots the Buyer's Premium is Twenty percent (20%) subject to a minimum of \$19 per lot, except for Sports Collectibles lots which are subject to a minimum of \$14 per lot;
  - For Wine Auction lots the Buyer's Premium is Twenty-three percent (23%) subject to a minimum of \$19 per lot;
  - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$300,000 subject to a minimum of \$49 per lot, plus twenty percent (20%) of any amount between \$300,000 and \$3,000,000, plus twelve point five percent (12.5%) of any amount over \$3,000,000.

## Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Jewelry, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction (“Bidder(s)”).
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

## Bidding Options:

8. Bids in Signature® Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled “Choose your bidding method.” For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, email, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: “How can I lose by less than an increment?” on our website. Bids will be accepted in whole dollar amounts only. No “buy” or “unlimited” bids will be accepted.

The following chart governs current bidding increments (see [HA.com/c/ref/web-tips.zx#guidelines-increments](http://www.ha.com/c/ref/web-tips.zx#guidelines-increments)).

Current Bid .....	Bid Increment	Current Bid .....	Bid Increment
< \$10 .....	\$1	\$10,000 - \$19,999 .....	\$1,000
\$10 - \$49 .....	\$2	\$20,000 - \$49,999 .....	\$2,000
\$50 - \$99 .....	\$5	\$50,000 - \$99,999 .....	\$5,000
\$100 - \$199 .....	\$10	\$100,000 - \$199,999 .....	\$10,000
\$200 - \$499 .....	\$20	\$200,000 - \$499,999 .....	\$20,000
\$500 - \$999 .....	\$50	\$500,000 - \$999,999 .....	\$25,000
\$1,000 - \$1,999 .....	\$100	\$1,000,000 - \$1,999,999 .....	\$50,000
\$2,000 - \$4,999 .....	\$200	\$2,000,000 - \$9,999,999 .....	\$100,000
\$5,000 - \$9,999 .....	\$500	>= \$10,000,000 .....	\$200,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment (“Cut Bid”) only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A “Minimum Bid” is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN “Minimum Bids” ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE “Minimum Bid”, THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. “Minimum Bids” are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the

“Minimum Bid” for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in “Good Faith” when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in “Good Faith.” Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

## Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes “good funds”: checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer.
25. Lots you purchase may be subject to taxes or fees imposed by various foreign taxing agencies. You are responsible for paying all foreign imposed taxes whether VAT, GST, etc. prior to delivery unless other arrangements are made in writing. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Should state sales tax become applicable in the state for delivery prior to delivery of the property on the invoice, the bidder agrees to pay all applicable state sales tax as required by the delivery state as of the shipping date. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

**Delivery, Shipping, and Handling Charges:**

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.xz for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item's hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:
- a. **Scope of Transit Services:** Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide a Secure Location to which the items will be delivered. NOTICE: **Auctioneer is neither an insurance company nor a common carrier of any type.**
- b. **Auctioneer's Compensation for Transit Services:** Auctioneer will provide transit services to Buyer for ¼ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
- c. **Auctioneer's Limitation of Liability for Transit Services:** You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**
35. It shall be the responsibility for the successful Bidder to arrange pick-up or shipping in a timely manner (within 10 days). Held Lots will be subject to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 20% Seller's Commission.
36. A. NOTICE OF CITES COMPLIANCE: The purchase of items made from protected species: Any property made of or incorporating endangered or protected species or wildlife may have import and/or export restrictions established by the Convention of International Trade in Endangered Species of Wild Fauna and Flora (CITES) in various countries and domestically. Plant and animal properties include (but are not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, alligator, lizard, or other wildlife. These items may not be available to ship internationally or, in some cases, domestically. Domestic bans and restrictions exist in these states: 1) California state law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California. 2) Fossil Ivory is currently banned or restricted in 5 U.S. states: New York, New Jersey, California, Hawaii, and New Mexico. By placing a bid, the bidder acknowledges that he or she is aware of any restriction in their country or place of residence and takes responsibility for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment or afford them the capacity to void their purchase or payment. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or failure to mark lots containing protected or regulated species. For further assistance, please contact client services at 1-800-872-6467.
36. B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.
36. C. Auctioneer shall not be liable for any loss caused by or resulting from:
- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles.
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

**Cataloging, Warranties, and Disclaimers:**

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. No statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. Any employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

**Release:**

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, cause of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity,

typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

**Dispute Resolution and Arbitration Provision:**

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administered by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

**Miscellaneous:**

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

**State Notices:**

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

## Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature® Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcgs.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency and PMG may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 10470, Peoria, IL 61612-0470. Third-party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the noncertified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions, call the Credit department at 877-HERITAGE (437-4824) or email: CreditDept@HA.com.

### Notice as to an Auction in New York City:

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

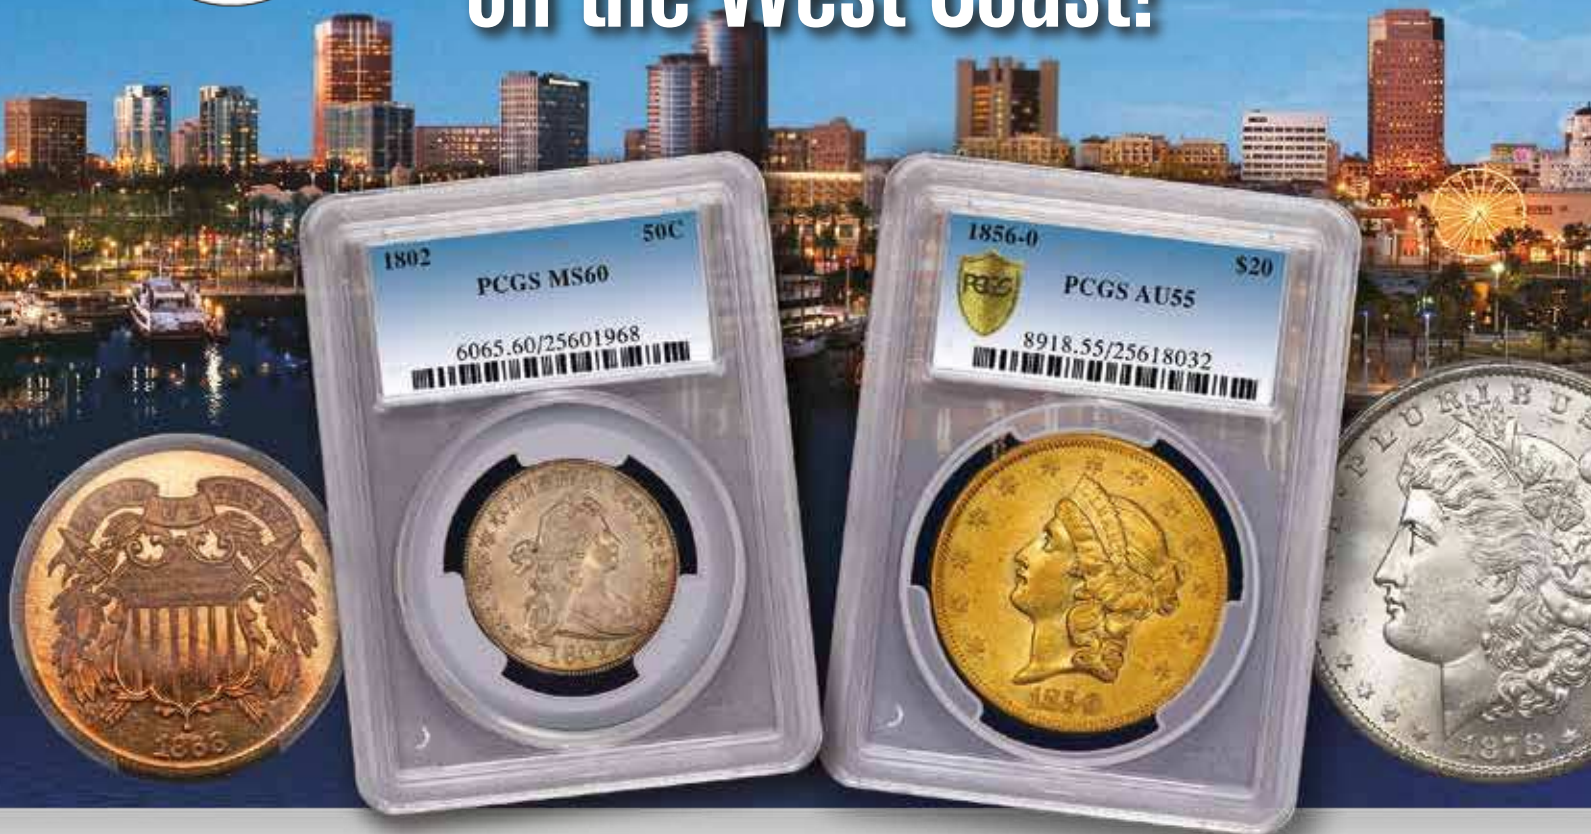

All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21, which states: The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

# "The best aspect of my experience

was the honesty and knowledge possessed by Jill Burgum. Her ability to be forthright in giving an honest estimate and understanding market conditions as they relate to the opening bid and final hammer price.

I want you to know I am extremely satisfied with the service I received from Jill and the entire Heritage team."

– David P. | Alabama

Dear Bidder,

This year marks the 80th anniversary of the Central States Numismatic Society's annual convention, and one of its highlights will be Heritage Auctions' Platinum Night event. Mark your calendar (and put a reminder in your phone) for Thursday, April 25, because we will be live from the auction floor at 7:00 pm sharp at the Schaumburg Renaissance Hotel and Convention Center.

Platinum Night includes 327 high-value lots, including these highlights to mention just a few:

- **LOT 3667:** The Judd-1 1792 Silver Center cent is an iconic, classic American rarity from the first days of the U.S. Mint, prized by collectors since the earliest days of the hobby. This coin is well-documented within the roster of 12 surviving examples, graded SP35 PCGS, CAC. Silver Center cent patterns are perhaps the most highly sought among all of the 1792 patterns that helped form the basis of the U.S. monetary system.
- **LOT 3694:** Also a famous 1792 pattern, the Judd-10 pattern dime (struck in copper with reeded edge) ranks number 13 in the Judd-10 census compiled by Pete Smith, Joel Orosz, and Len Augsburger. This piece grades SP25 PCGS.
- **LOT 3958:** This is one of the rare, seldom-seen varieties from the early days of the Bechtler private mint -- a rare offering of the Kagin-9 quarter eagle -- one of the six-known examples of the "star in field over 75 G." variety, struck from native North Carolina gold.
- **LOTS 3974 and 3975:** With new findings from the *S.S. Central America* and greater awareness of the true scarcity of gold ingots, we have witnessed a tremendous uptick in their popularity and collector value. Two great ingots are in Platinum Night. Lot 3974 is a rare Blake & Co. gold ingot, 19.15 ounces of .892 fine gold, and lot 3975 is a larger Kellogg & Humbert ingot, 48.74 ounces of .809 fine gold.

Central States always brings out a number of fine Featured Collections that add special interest and exceptional value to Heritage's Platinum Night auction, as well as to our other CSNS floor sessions and the Signature® Internet session. These important collections are easy to identify by the pedigree assigned to their lots, which recognizes the scope and importance of the consignments.

Platinum Night presents the highest-value lots from several Featured Collections. You can read more about the entire list of Featured Collections in the separate "main" catalog. Links to the different Featured Collections are available at [www.HA.com/1294](http://www.HA.com/1294). There, you can scroll through an entire Featured Collection with a single click.

This year's Platinum Night Featured Collections include:

**THE CHINOOK COLLECTION**

**THE WILLIAM REHWALD PROOF SET COLLECTION**

**SELECTIONS FROM THE JIM O'NEAL COLLECTION**

**THE PERFECTION COLLECTION OF DMPL/PROOFLIKE MORGAN DOLLARS**

**THE JERSEY SHORE GOLD COLLECTION**

**THE UPTOWN COLLECTION OF BECHTLER TERRITORIAL GOLD**

**THE MARCELLO COLLECTION, PART VI**

**THE JACK-THE-KNIFE COLLECTION OF LINCOLN CENTS**

As always, we welcome your questions and suggestions. If you have an inquiry about any of the lots offered, please contact us for candid and thoughtful advice or, if you are interested in discussing a consignment, our Consignment Directors are always pleased to be of service.

Good luck with your bids during Platinum Night and throughout your entire Central States experience!

Sincerely,

A handwritten signature in black ink, appearing to read "Greg", with a stylized flourish extending from the end.

Greg Rohan  
President

A handwritten signature in black ink, appearing to read "T. Imhof", with a stylized flourish extending from the end.

Todd Imhof  
Executive Vice-President

## SESSION TWO

### COLONIALS

#### 1652 Pine Tree Shilling, Noe-2, MS61 Large Planchet, No Pellets at Trunk Late Die State

**3662** 1652 Pine Tree Shilling, Large Planchet, No Pellets at Trunk, MS61 NGC. Noe-2, W-700, Salmon 2-C, R.5. 71.6 gn. No Pellets at Trunk. The diamond-shaped tree, tall 6 pointing straight up, and 5 positioned under LA in ENGLAND are characteristics of Noe-2, sometimes referred to as the Straight Tree variety. The last Uncirculated example from this die pair we had the pleasure of handling was the Eliasberg-Partrick coin in MS64. While that finest-known piece grades three points higher than this MS61, it lacked the complete legends seen here. It is typical to encounter these Large Planchet shillings with clipped edges — a tactic employed by Boston mint employees to reduce the weight of their product. This survivor is mostly well-rounded with a couple of obtuse angles. Glossy gunmetal surfaces show myriad raise lumps in the reverse fields and the obverse die is worn, suggesting a later striking period. A mark near the second T in MASATHVSETS is the only one of note. Listed on page 51 of the 2019 *Guide Book*. NGC ID# 5JDU, PCGS# 45370 Base PCGS# 23

**(1737) Broad Axe Higley Copper**  
**Fine Details**  
**Colonial America's First Copper Coin**  
**Crosby VIII-24, Freidus 3.2-C, W-8260**  
**From the Allison Jackman Collection**

**3663** (1737) Higley Copper, Broad Axe, J CUT MY WAY THROUGH — Environmental Damage — PCGS Genuine. Fine Details. Crosby VIII-24, Freidus 3.2-C, W-8260, R.7. Ex: Jackman Collection. Although several types of copper coins circulated in colonial America in the late 17th and early 18th centuries, none of those issues were actually minted in the new world. The St. Patrick coinage was produced in Ireland and made legal tender in New Jersey in May 1682. William Wood produced his Rosa Americana issues in England in the 1720s, along with his Hibernia coinage that was intended for circulation in Ireland. There were others, including the French colonial coinage, but all of those issues were struck in Europe. While silver coins were produced in Massachusetts in 1652, the first copper coins struck anywhere in colonial America were the 1737 Higley coppers that were minted in Connecticut.

The actual number produced will likely never be known. However, it is known that these pieces were coined of exceptionally high quality copper, often called pure copper. The high quality of the copper is one of the reasons, perhaps the main reason, that so few of these pieces exist today.

The large number of die varieties suggests a significant production. Dan Freidus discussed 15 die varieties in his outstanding 1994 article: "Die Varieties of Higley Coppers" that appeared in *The Token: America's Other Money* that was edited by Richard Doty and published in New York as part of the American Numismatic Society's Coinage of the Americas Conference. Part of his article was a registry of all known examples of each variety. Freidus enumerated 63 Higley coppers, an average of just four surviving examples per variety. While several more have turned up since the publication of his article, the population is certainly still below 80 examples.

While Freidus listed eight examples of his 3.2-C die marriage, we know of 12 examples today, and two of those are held in museum collections, one in the Smithsonian Institution and the other in the British Museum. This variety is the most plentiful of the 15 varieties, and yet just 10 pieces are available to collectors. Such is the rarity of Higley coppers.

This example has considerable detail that PCGS rates as Fine details, although other observers may suggest that the piece warrants a rating of VF details. The sable surfaces show heavy porosity that is evenly distributed across the obverse and reverse. However, the flan is complete and round with no apparent scratches, rim bumps, or other flaws. Listed on page 61 of the 2019 *Guide Book*.

Ex: Allison W. Jackman Collection (Henry Chapman, 6/1918), lot 73; later, Ted L. Craig Collection (Stack's Bowers, 3/2013), lot 198; Surf City Collection.

**Rare New Yorke in America Token**  
**Undated, Brass, VF20**  
**Rulau-E-NY-621, W-1705**

**3664** Undated TOKEN New Yorke Token, Brass, VF20 PCGS. Rulau-E-NY-621, W-1705, R.6, This rare token was issued by Francis Lovelace, the British governor of New York from 1668-1673. The obverse design features Cupid and Psyche (Crosby says Venus) under five palm trees. The mythological figures are believed to be a play on the issuer's name, and the eagle on the reverse is identical to the crest on the Lovelace coat of arms. Other facts that help establish an approximate date for the token include the spelling of the city's name. The name New Yorke was adopted in 1664, when the British occupied the city, and the final E was dropped from the spelling around 1710.

The token is farthing size, and the weight, composition, and die axis are similar to the 1670 farthing tokens of Bristol, England. The tokens may have been manufactured in Bristol, as there is no evidence that they ever circulated in this country, and those with long pedigrees have typically been found in Europe. The discovery specimen (the first described) was a pewter example located in the Hague about 1850. Today, approximately 20 pieces are known in brass, with four examples in pewter.

The present example shows even, well-balanced wear over each side. The high points are tan-yellow, and contrast sharply against the russet patina that surrounds and is seen within the recesses of the devices. The surfaces are clean and problem free, except for a few spots of corrosion on the reverse. Listed on page 59 of the 2019 *Guide Book*. Population: 1 in 20, 4 finer (3/19).

Ex: *FUN Signature (Heritage, 1/2010)*, lot 2390, where it brought \$32,200. NGC ID# AUBJ, PCGS# 226

**1787 Fugio Cent, N. 10-T, XF45**  
**1/Horizontal 1, STATES UNITED**  
**Guide Book Variety**

**3665** 1787 Fugio Cent, STATES UNITED, 1/Horizontal 1 XF45 PCGS. N. 10-T, W-6705, R.5. The 1 in the date was initially cut horizontally, then sloppily corrected. Evidence of the amateurish undertype remains plain on this Choice XF representative. This variety is always popular with collectors and listed separately in the annual *Guide Book*, known with two different reverses. Mahogany-brown surfaces are smooth and well-centered with light, even friction over the devices. The obverse is heavily clashed, and a crack extends from the reverse rim at 7 o'clock toward the central ring. Listed on page 99 of the 2019 *Guide Book*. Population: 2 in 45, 1 finer (2/19). NGC ID# 28GJ, PCGS# 886

### 1818 New Spain Jola, XF45 Lone Star Reverse

**3666** 1818 New Spain (Texas) Jola Half Real, Small Planchet XF45 PCGS. W-8540, R.6. Manuel Pardo, the Spanish governor of Texas, authorized the production of 8,000 copper coins in 1817. Those coins were soon withdrawn from circulation and replaced with an emission of 8,000 similar pieces dated 1818. The latter coins bear the initials, JAC, of Jose Antonio de la Garza. The 1818 Texas jolas were struck on large and small planchets, the latter offered here. In addition to the makers' mark, the denomination (1/2 for half real) is presented sideways, and below that appears the date. The population data is insufficient to conclude which of the two sizes is rarer, but examples are infrequently seen in the marketplace. This olive and charcoal example has excellent surfaces for one of these crudely produced coins. A glass reveals slight corrosion. The design elements are nicely centered on the planchet. Listed on page 90 of the 2019 *Guide Book*. Population for all Texas jolas: 3 in 45, 3 finer (2/19). NGC ID# 2B6G, PCGS# 661

## LARGE CENTS

## 1792 Silver Center Cent, Judd-1, SP35 First Coin Struck Inside the U.S. Mint Classic American Rarity

**3667 1792 One Cent, Judd-1, Pollock-1, High R.6, SP35 PCGS. CAC.** The Silver Center cent is one of the most famous and iconic issues of American coinage. Most numismatists believe it was the first coin actually produced inside the walls of the first U.S. Mint, although a few other patterns were struck earlier, before the Mint was actually ready for coinage operations. Its historic importance can scarcely be overstated and examples have been prized by collectors since the earliest days of the hobby.

### Design

Liberty faces right with hair flowing behind. The obverse periphery reads LIBERTY PARENT OF SCIENCE & INDUSTRY, with 1792 just below the bust. The reverse has a wreath tied with a ribbon at the bottom; ONE CENT is within. Around the rim is UNITED STATES OF AMERICA with the fraction 1/100 below. Struck in copper with a silver plug in the center, with a reeded edge. Medallion alignment. Average diameter is about 22.9 mm.

### Origin of the Silver Center Cent

The Silver Center cent was long thought to be the brainchild of Chief Coiner Henry Voigt, based on Thomas Jefferson's famous message to President George Washington on December 18, 1792:

"Th. Jefferson has the honor to send the President two cents made on Voigt's plan by putting a silver plug worth  $\frac{3}{4}$  of a cent into a copper worth  $\frac{1}{4}$  of a cent. Mr. Rittenhouse is about to make a few by mixing the same plug by fusion with the same quantity of copper. He will then make of copper alone of the same size, and lastly he will make the real cent as ordered by Congress, four times as big."

The small-size copper cent Jefferson mentioned (copper alone of the same size) may have been intended to model a fiat copper coinage as an alternative to the bimetallic coinage, while the proposed large copper pieces became known as the famous Birch cents (Judd-3 through 5). Research by Len Augsburger, Joel Orosz, and Pete Smith in their book, *1792 Birth of a Nation's Coinage*, indicates the concept for the unique dual metallic composition of the Silver Center cent may have originated with famous patriot and essayist Thomas Paine. Paine was living in London when he sent Jefferson a September 28, 1790-dated letter outlining his ideas for a national mint and coinage. Despite the obvious advantages of copper as a metal for coinage (inexpensive and easy to work with), Paine believed that "to give the cents the intrinsic value they ought to have by weight, they will be too heavy and bulky for the use they are intended for." He suggested three possible solutions to this problem:

"1st. Making silver and copper in fusion; 2d. Plating the copper with silver; 3d. Plugging the copper with silver. But against all of these, there are very capital objections."

Paine believed the bimetallic coinage was impractical and suggested issuing a fiat copper coinage of convenient size instead. The Mint would actually try most of Paine's suggestions in 1792, in the form of the Silver Center cent (Judd-1) and the Fusible Alloy cent (Judd-2), as well as a small-size fiat copper piece. As Paine predicted, all of these solutions proved impractical for actual coinage. The fiat copper pieces would not have been acceptable to the public, since they were underweight and of low intrinsic value. The Fusible Alloy cents were indistinguishable from pure copper cents and thus highly vulnerable to counterfeiting, and the mechanical problems encountered when preparing and striking the copper cents with a silver plug were too great to overcome in high-volume coinage operations.

The Mint recognized these difficulties almost immediately. It seems the few specimens actually struck were primarily intended as essay pieces, to demonstrate the design to President Washington and members of Congress. Modern testing reveals that most (if not all) of the Fusible Alloy cents were actually struck in pure copper and measurements of the silver plug on the Silver Center cent indicate it was too small to contain  $\frac{3}{4}$  cent worth of silver. No Silver Center cents were ever produced for circulation and no official mintage figures have ever surfaced. Today, we know of 12 surviving examples, most of them in relatively high grade, and a single copper setup piece struck without the silver plug.

In the end, none of the proposed cent patterns was deemed suitable for regular coinage, but the value of copper was reevaluated in 1793, and Congress lowered the specifications for the cent to 208 grains of pure copper. This made it possible to produce a copper cent with full intrinsic value that was not too large for practical purposes. The resulting "large" cents were produced the following year and served the U.S. economy admirably until 1857.

### The Present Coin

The coin offered here is a fairly recent discovery, found in a pub in the 1960s. The first owner of record was named Nigel Willmott and it has a previous auction appearance in a Glendining's sale in 1997, where it brought 28,750 British pounds. It passed through a number of well-known American numismatists and coin dealers, including Kenneth Goldman, Stuart Levine, and Anthony Terranova, before finding a home with prominent collector Martin Oghigian. The piece had been in Oghigian's estate since his death in 1998, until offered in Heritage's 2016 ANA Signature auction as Platinum Night lot 3951, which realized \$352,500.

The coin is well-centered on the reverse and slightly off-center to the south on the obverse, with only the top third of the dentils showing on the obverse. Actual wear is relatively light, and the pleasing olive-brown surfaces show only scattered, minor abrasions — the worst being a small dig above the forehead in the obverse field. The design elements were strongly impressed on the obverse, while the reverse is sharp on the peripheries and soft in the center. The silver plug is bright and stands out in dramatic contrast to the copper planchet. Altogether, a most attractive specimen of this classic American rarity.

*Ex: Nigel Willmott; Glendining's Sale (1997); Kenneth Goldman, Stuart Levine, and Anthony Terranova; Larry Stack; Martin Oghigian; Oghigian Estate; ANA Signature (Heritage, 8/2016), lot 3951, which brought \$352,500. NGC ID# 2948, PCGS# 11001*

**1793 S-2, B-2 Chain Cent, Fine 12  
AMERICA Reverse**

**3668** 1793 Chain, AMERICA, S-2, B-2, High R.4, Fine 12 PCGS. Breen Die State II. The obverse is the same die as found on the famous Chain AMERI. cent, and the reverse is the first that had AMERICA spelled in full. This was the second of five Chain cent varieties that were all struck in March 1793. Contemporary Mint documentation tells us that one-third of all Chain cents were delivered (from the coiner to the Mint treasurer) on March 1, 1793. Walter Breen suggested that that delivery of 11,178 cents was the entirety of production for the first two varieties, although there is no documentation itemized by die pairing. Mythology is the term for undocumented history. This pleasing Chain cent has faint hairlines and trivial marks that are only visible with magnification. The surfaces appear smooth and exhibit light olive patina with faint blue overtones. An exceptional piece for an advanced variety, date, or type collection. Our EAC grade VG8. NGC ID# 223F, PCGS# 35435 Base PCGS# 1341

**1793 Chain Cent, Fine 12  
S-3, B-4, AMERICA Reverse**

**3669** 1793 Chain, AMERICA, S-3, B-4, Low R.3, Fine 12 PCGS. Breen Die State III, with clash marks below the bust. The sharpness of this Chain cent is slightly finer than the overall grade that PCGS has assigned. Dark brown surfaces with lighter tan on the highpoints, especially on the obverse. The surfaces are finely granular. Abrasions are evenly distributed and of little consequence to the overall appearance of the coin. A few faint scratches and minor pitmarks are only evident with a glass. The edges, primarily on the obverse, have several minor bruises that are typical on these old pieces of copper, but insufficient to prevent PCGS from grading this piece. Our EAC grade VG8.

*Ex: Central States Signature (Heritage, 4/2008), lot 2226, realized \$19,550. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341*

## 1793 S-3, B-4 Chain Cent, AU53 From the Halpern and Loring Collections

**3670** 1793 Chain, Large R/AMERICA, S-3, B-4, Low R.3, AU53 PCGS. CAC. Ex: Halpern-Loring. The obverse die, appearing only on S-3, has a large R in LIBERTY that leans to the right, suggesting a "Leaning" R nomenclature to some. The reverse die has AMERICA spelled in full, appearing on four of the five known Chain cent varieties (S-2, S-3, S-4, and NC-1).

When Walter Breen prepared the manuscript for *Encyclopedia of Early United States Cents 1793-1814*, he built upon the work of previous students and numbered the early cent varieties in the order he believed they were struck. He took that study a step further and attempted to assign a "mintage figure" for each variety and correlate those figures with original delivery dates, presenting the actual dates for the mintage of each variety. His study seemed logical. However, the limited sample of surviving early cents, especially those of 1793, is insufficient for a statistical study. While an emission sequence is plausible on its own, any further correlation is impossible, in this cataloger's opinion.

Breen Die State III, with heavy obverse clash marks. The reverse field is wavy, especially below UNITED, a result of die resurfacing or, as Breen writes, "grinding away the clash marks." Choice surfaces exhibit chocolate-brown interspersed with light tan that offers traces of frosty luster. Some apparent field roughness is exclusively a result of the late die state, with a small patch of magenta on the reverse. A tiny reverse rim bruise at 2 o'clock is the only blemish. Our description is virtually identical to the Stack's description in 1988:

"Light brown and olive toning, with hints of original color in and around the devices on the reverse. A trifle softly struck at the centers, with a minuscule reverse rim nick. The obverse surfaces as nice and clean as anyone could expect on a large cent of this series. Apparently tied for 6th finest known of this popular variety."

This lovely cent was graded XF45 in the Halpern catalog, and that grade is equally appropriate today. Although the Loring specimen is not enumerated therein, the Bland census of the finest known examples includes five coins that grade MS63 down to AU50 and five others graded XF45, all tied for sixth finest known. Our EAC grade XF45.

Ex: Herman Halpern (*Stack's*, 3/1988), lot 2; McCawley & Grellman (8/1995), lot 134; Denis W. Loring; *Heritage* (1/2012), lot 3018; *Central States Signature* (*Heritage*, 4/2015), lot 4914, realized \$111,625. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

**1804 S-266, B-1 Cent, XF45**  
**Early Die State**

**3671** 1804 S-266, B-1, R.2, XF45 PCGS. Breen Die State I. We see no evidence of die cracks on either side of this important cent. The next die state has obverse and reverse cracks, but no rim breaks. State III has the obverse rim break, and State IV has obverse and reverse rim breaks. Bill Noyes records just five examples of 29 in the earliest die state, and none finer than VF30 based on his grading.

Although a glass reveals the usual scattered marks on the chocolate and golden-brown surfaces, they fail to prevent a PCGS grade for this piece. Most of those marks are in the reverse periphery, with a small scratch in the left obverse field. This lovely cent survives from a mintage estimated at under 100,000 coins, despite recorded delivery figures that totaled 756,838 coins. Our EAC grade VF35. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

## FLYING EAGLE CENT

**1857 Flying Eagle Cent, MS66**  
**Rarely Offered So Fine**

**3672** 1857 MS66 PCGS. The 1857 Flying Eagle cent claims a substantial mintage of 17.4 million pieces and many examples were saved by contemporary collectors for their novelty value. The coins virtually vanished from circulation during the Civil War, due to widespread hoarding, but they were seen again after the war, and many were redeemed at the Mint in the 1870s. By the 1880s they were seldom seen in everyday transactions. The issue can be found in lower Mint State grades today without difficulty, but it is rare at the MS66 level.

This delightful Premium Gem exhibits sharply detailed design elements and well-preserved copper-red surfaces with no trace of carbon. Vibrant mint luster radiates from both sides and eye appeal is outstanding. Population: 21 in 66, 0 finer (3/19). NGC ID# 226P, PCGS# 2016

## PROOF FLYING EAGLE CENT

**1856 Cent, Choice Proof  
Fully Struck, Snow-9**

**3673 1856 Snow-9 PR64 PCGS. CAC.** The first and rarest date of the small cent denomination, the 1856 was initially struck for distribution among Washington officials to demonstrate its reduced diameter. Word reached the nascent numismatic community, and collectors clamored for examples. The U.S. Mint responded with unofficial Snow-9 proof restrikes. Those pieces were coined circa-1859, and make the date more available than, for example, the proof-only 1873 three cent silver. Prices are much higher for the former, due to greater historical significance and a larger collector base for cents. This needle-sharp walnut-brown near-Gem is unabraded but shows minor retained laminations (as made) near the T in UNITED and above the left portion of the tail. Encapsulated in an old green label holder.

**From The William Rehwald Proof Set Collection.** NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

## INDIAN CENTS

**1861 Indian Cent, MS67  
Incredible Copper-Nickel Type Coin**

**3674 1861 MS67 PCGS.** PCGS has seen only a few dozen Superb Gem copper-nickel Indian cents, most of which are dated 1860, 1861, or 1862. This 1861 coin is within the Condition Census and is rare, being the ideal type coin for small cent collectors. We have not handled an 1861 cent in this grade since the Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98053, which realized \$15,275. This example is that coin's equal. Radiant tan-gold mint luster engulfs sharp devices and virtually pristine surfaces. Eye appeal is outstanding. Under a loupe, only a tiny graze is discernible on Liberty's cheek. Population: 13 in 67, 1 finer (3/19). NGC ID# 227G, PCGS# 2061

**1893 Indian Cent, MS67 Red  
Thick, Frosted Mint Luster**

**3675 1893 MS67 Red PCGS.** The mintage for 1893 cents exceeded 46 million coins. As a result, no premium is attached to examples in lower grades. But at the MS67 level, and when combined with intact red mint luster, the 1893 emerges as an important condition rarity. This is an extraordinary coin. The mint luster is thick and frosted, completely unaffected by the passage of 126 years. Rick Snow speculates that the full red coins of this date that do exist may have been from an original roll that was set aside at the time of issue. From the appearance of this piece that theory certainly is believable. Just the tiniest flyspecks of carbon can be seen on each side. The strike is strong in all areas except at the top of the headdress. Population: 2 in 67 Red, 0 finer (2/19). NGC ID# 228M, PCGS# 2186

## LINCOLN CENTS

**1909-S Lincoln Cent, MS67 Red  
Ex: Jack Lee**

**3676 1909-S MS67 Red PCGS.** Ex: Jack Lee. In the past three decades, with the advent of grading services and especially grading service population reports, many hidden rarities are now being recognized. The 1909-S Lincoln is a perfect example. In full Red preservation, PCGS has certified 515 as MS64, 500 as MS65, 203 as MS66, and just 10 pieces as MS67. The same service has graded many more 1909-S VDB cents: 1,030 as MS64, 941 as MS65, 262 as MS66, and 15 pieces as MS67. The comparison tells us that the 1909-S cent is much more elusive with full mint red color than is the 1909-S V.D.B.

While the mintage of 1,825,000 was nearly four times greater, the most devoted specialist in the popular series of Lincoln cents knows that even its widely known counterpart with designer's initials on the reverse is not as elusive as the 1909-S Lincoln in Superb Red condition. Bright reddish-golden hues dominate the surfaces of this incredible first-year San Francisco Lincoln, each side glows with rich, frosted mint luster. Close examination yields a few well-scattered, microscopic carbon flecks and a short paper-thin blemish above the Y in LIBERTY, the only appreciable difference between the coin now and when it left the dies. The strike is incredibly bold, even for this normally well struck issue. Population: 10 in 67 (1 in 67+) Red, 0 finer (2/19).

*Ex: FUN Signature (Heritage, 1/2005), lot 30114; Central States Signature (Heritage, 4/2006), lot 607; Jack Lee Registry Set / Houston Signature (Heritage, 12/2008), lot 140, where it sold for \$46,000.*

**From The Jack-The-Knife Collection of Lincoln Cents.** NGC ID# 22B4, PCGS# 2434

**1913 Cent, MS67 Red**  
**Registry Set Essential**  
**One of the 10 Finest at PCGS**

**3677 1913 MS67 Red PCGS.** Despite the mintage of more than 76 million pieces in prewar America, the 1913 Lincoln cent is seldom seen even in MS66 Red. The PCGS population in MS67 Red stands at 10 pieces — about 15% as many as the MS66 level, and Superb Gems tend to trade about 10 to 20 times as much as those in MS66.

This piece is fully struck over both sides, with no weakness in the usually seen areas. The surfaces are medium orange-gold, mellowing only slightly to a thin arc of violet near the left obverse rim. A few tiny microflecks appear only with the aid of a loupe. A Registry Set essential.

*Ex: Long Beach Signature (Heritage, 5-6/2012), lot 3184, where it brought \$25,300.*

**From The Jack-The-Knife Collection of Lincoln Cents.** NGC ID# 22BD, PCGS# 2461

**1913-D Lincoln Cent, MS66+ Red**  
**Registry Set Contender**

**3678 1913-D MS66+ Red PCGS.** From a mintage of 15.8 million pieces, the 1913-D Lincoln cent is readily collectible in lower Mint State grades, but it becomes scarce at the MS65 grade level, and finer coins are condition rarities. David Lange notes most examples seen are softly struck, as the coins were struck from worn dies and the high relief of Lincoln's shoulder created problems with metal flow.

The coin offered here is a stunning Plus-graded Premium Gem, with impeccably preserved original red surfaces. The design elements exhibit unusually sharp definition and both sides display vibrant mint luster throughout. We expect intense competition from series specialists and Registry Set enthusiasts when this lot is called. Population: 28 in 66 (4 in 66+) Red, 0 finer (3/19).

**From The Jack-The-Knife Collection of Lincoln Cents.** NGC ID# 22BE, PCGS# 2464

### 1914-D Lincoln Cent, MS65 Red Sought-After Series Key

**3679 1914-D MS65 Red PCGS.** The 1914-D Lincoln cent is a key issue in the series, from a low mintage of 1.1 million pieces. Unfortunately, despite the low mintage figure, the 1914-D was largely overlooked by contemporary collectors and few high-quality examples were saved at the time of issue. The 1914-D became better known and highly sought-after in the 1930s, with the advent of coin albums and the *Standard Catalogue*. By then, most examples had circulated extensively and few would grade better than Fine-Very Fine by today's standards.

The present coin is a delightful Gem, with original red surfaces that show no mentionable distractions and no trace of carbon. Vibrant mint luster radiates from both sides. The design elements are sharply detailed throughout and overall eye appeal is terrific. Population: 74 in 65 (10 in 65+) Red, 7 finer (3/19).

**From The Jack-The-Knife Collection of Lincoln Cents.** NGC ID# 22BH, PCGS# 2473

### 1921 Cent, MS68 Red Registry Quality

**3680 1921 MS68 Red PCGS.** With more than 39 million pieces struck, one would think the 1921 would be more available, but the number of high-end examples drops off sharply above the MS66 level. In MS67, there are only 10 pieces certified at PCGS, but in the ultimate grade of MS68 Red there are only four examples graded (2/19). This is a remarkably preserved and fully struck example of this early Philadelphia issue. The surfaces exhibit warm orange-red color over much of the obverse with deeper peripheral hues, while most of the reverse is a lighter shade of yellow-tinged red.

*Ex: Palm Beach Signature (Heritage, 11/2004), lot 5509.*

**From The Jack-The-Knife Collection of Lincoln Cents.** NGC ID# 22C6, PCGS# 2533

## 1923-S Lincoln Cent, MS65 Red No Finer Red Coins Certified

**3681 1923-S MS65 Red PCGS.** The 1923-S Lincoln cent claims a relatively small mintage of 8.7 million pieces and few high-quality specimens were saved by contemporary numismatists. In addition, the 1923-S was not a well-produced issue. David Lange notes, "Mushy coins from worn dies are the rule for the 1923-S." Accordingly, the 1923-S is an elusive issue in MS65 condition, and Gems with a sharp strike and red surfaces are rare.

The present coin is a delightful Gem, with unusually sharp (but not full) definition on the design elements. Just a touch of softness shows on the hair at the temple. The well-preserved original red surfaces are lustrous and appealing. Housed in a green label holder. Population: 16 in 65 Red, 0 finer (3/19).

**From The Jack-The-Knife Collection of Lincoln Cents.** NGC ID# 22CB, PCGS# 2548

## 1924-S Lincoln Cent, MS65 Red None Finer at PCGS

**3682 1924-S MS65 Red PCGS.** Although the 1924-S Lincoln cent claims a large mintage of 11.6 million pieces, few high-quality examples were saved by contemporary collectors and the issue is one of the most challenging of the decade in high grade. It is likely that the 1924-S was not released into circulation until 1925, which might have caused collectors to miss it when they updated their collections in 1924.

The present coin is a delightful Gem, with impeccably preserved original red surfaces and blazing mint luster on both sides. Like most examples seen, the design elements are well-detailed, with just a touch of softness on the portrait. Population: 10 in 65 Red, 0 finer (2/19).

*Ex: Houston Money Show Signature (Heritage, 12/2014), lot 3463, where it sold for \$23,500.*

**From The Jack-The-Knife Collection of Lincoln Cents.** NGC ID# 22CE, PCGS# 2557

**1925-S Cent, MS65 Red  
Tied for Finest Certified  
Ex: Mershon-Walsh-Lee**

**3683** 1925-S MS65 Red PCGS. Ex: Jack Lee. The 1925-S is among the most challenging Lincoln cent issues for the high-end enthusiast. The most problematic areas are color and strike. In his *Complete Guide to Lincoln Cents*, David Lange lays out his view: "Mint State specimens, while not rare, are usually of mediocre quality. Quite a number survive with a moderate amount of original red color, yet these are almost invariably poor strikes." Lange later notes that "... anything even approaching the gem category is of the highest rarity." Interestingly, by the standards of other references, Lange's assessment is charitable; Q. David Bowers once stated that a Red Gem representative with full details would make for "the find of the year."

As is the norm for the handful of high-grade representatives known, this elusive Gem example displays characteristic rich reddish-orange color. The strike is far superior to the typical Uncirculated survivor, with almost a complete strike. Even the wheat stalks are razor-sharp. A tiny blemish on Lincoln's cheek and another just above the 1 of the date are mentioned as pedigree markers. Seldom offered in this lofty grade, and available for the first time with two of the most distinguished pedigrees in Lincoln cent collecting. Population: 12 in 65 Red, 0 finer (2/19).

Ex: Tom Mershon #2 Registry Set / Central States Signature (Heritage, 5/2005), lot 5349; Joshua and Ally Walsh Collection / FUN Signature (Heritage, 1/2006), lot 3096; Jack Lee Estate Lincoln Cent Registry Set / Houston Signature (Heritage, 12/2008), lot 186.

**From The Jack-The-Knife Collection of Lincoln Cents.** NGC ID# 22CH, PCGS# 2566

**1982-D Small Cent, AU58  
Struck in Bronze  
Very Rare Transitional Alloy Error**

**3684** 1982-D Small Date, Bronze, AU58 NGC. 3.07 gm. The January 3, 2017 issue of *Numismatic News* reported what had long been suspected but had never been confirmed: the existence of a bronze 1982-D Small Date cent. The discoverer was Paul Malone, a collector from Minnesota. The discovery coin, graded AU58 by NGC, appeared as lot 2031 in an August 2017 Stack's Bowers auction and realized \$18,800. The present lot is a different example in the same grade. It is sharply struck and minimally abraded with medium to deep walnut-brown toning. Due to the rising cost of copper, cents transitioned from bronze to copper-plated zinc during 1982. The quality of strikes declined, and modifications were made to the obverse legends, including the date, to allow faster press production of the zinc cents. At Denver, the Small Date subtype was introduced after the remaining bronze planchets were coined. Any surviving 1982-D Small Date bronze cents are transitional alloy errors, cousins to the famous 1943 bronze cents.

## PROOF LINCOLN CENTS

### 1909 VDB Cent, PR64 Red Rarest Matte Proof Lincoln Old Green Label Holder

**3685** 1909 VDB PR64 Red PCGS. The 1909 VDB proof Lincoln cent is the rarest of the matte proofs in this series. Mint records indicate a coinage 1,194 pieces, although, as Q. David Bowers writes in *A Guide Book of Lincoln Cents*, "surviving examples, including the number seen by certification services, suggest that far fewer ever reached numismatic channels." The *Guide Book* includes a footnote that states: "400-600 estimated issued." PCGS and NGC combined report submissions of 190 coins in all grades, including possible duplication.

This Choice Red example displays luminous matte luster and incredible sharpness. Both sides are mainly yellow-gold in color, although tinges of deeper cherry-red emerge in the left-hand margins. No distractions are present. Housed in an old green label holder. Population: 10 in 64 Red, 16 finer (2/19).

**From The William Rehwald Proof Set Collection.** NGC ID# 22KR, PCGS# 3302

### 1937 Cent, PR68 Red Cameo The Single Finest Certified

**3686** 1937 PR68 Red Cameo NGC. This is the single finest-certified proof 1937 Lincoln cent, an unparalleled Registry coin and a beauty to behold. It is numerically finer than any coin at PCGS, and in the NGC *Census*, only a lone non-Cameo Red coin is numerically equal (3/19). This piece has bright strawberry-blond surfaces with deep mirrors and fully rendered design elements. Cameo contrast is apparent on each side, a scarce characteristic for the 1937 proof. One microscopic pepper speck above the 7 in the date serves as a pedigree marker. A must-have item for the advanced proof Lincoln cent collector. NGC ID# 22L5, PCGS# 83338

## LIBERTY NICKEL

### 1885 Liberty Nickel, MS67 Tied for Finest Certified

**3687** 1885 MS67 NGC. The 1885 has been recognized for more than a century as *the* coin to have, *the* key to the set of Liberty nickels. Only 1.4 million pieces were struck and pieces were set aside shortly after this tiny mintage became known; although by the time the general public was aware of it most coins of this date had been in circulation for some time. The availability of the 1885 shows a typical bell curve. At NGC, MS60 pieces show only two pieces certified, numbers gradually increase to the MS64 grade level with 74 graded, then quickly taper off to the ultimate grade of MS67 with only two pieces (2/19). Struck from a late state of the dies, this is an untoned, satiny example that is fully struck throughout. NGC ID# 2773, PCGS# 3846

## BUFFALO NICKELS

### 1916 Doubled Die Obverse Nickel, XF40

**3688** 1916 Doubled Die Obverse, FS-101, XF40 NGC. Strong doubling is evident on the date, chin, throat, feathers, and tie above the braid, identifying the popular *Guide Book* and *Cherrypickers'* variety. Although this variety was described in the *Numismatic Scrapbook Magazine* in July 1962, it was not widely known until the mid-1970s. Since the coins circulated for decades before the variety was noticed, few high-quality examples were preserved, making the issue elusive in all grades and conditions today. This impressive XF specimen shows some light wear on the bison's horn and the hair ribbon, but most interior detail remains intact. The pleasing lavender-gray surfaces are lightly abraded and the overall presentation is most attractive. Census: 7 in 40, 57 finer (3/19). NGC ID# 2TSS, PCGS# 145628 Base PCGS# 3931

**1918/7-D Nickel, AU55**  
**Key Guide Book Overdate**

**3689** 1918/7-D FS-101 AU55 NGC. The 1918/7-D Buffalo nickel is one of the keys to the series in all grades. It is a hubbing overdate, created by an obverse die being impressed with hubs of two different dates, in the same manner and likely under the same circumstances as the 1918/7-S quarter dollar. All working dies were made in Philadelphia in 1918, and mintmarks were added later when the dies were shipped out to the branch mints.

This attractive AU55 coin displays satiny olive-gray patina and little wear. Considerable strike weakness on the devices is characteristic of the variety, as is the die erosion in the fields. The overdate feature is sharp on this coin, visible to the unaided eye. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

**1918/7-D Buffalo Nickel, AU55**  
**Sought-After Key Variety**

**3690** 1918/7-D FS-101 AU55 PCGS. CAC. The “Mademoiselle from Armentières” was a popular song sung in the trenches during World War I when this important overdate variety was struck. Therein lies more than coincidence, perhaps.

Numismatists have long noted that many of the famous 20th century overdates, produced from hubbing of a single working die from two differently dated working hubs, were the product of the wartime eras of either the First or Second World Wars. It may have been that key Mint personnel were serving their nation in foreign lands when those pieces were produced, and less-skillful workers serving as replacements created the overdated die. David Lange also mentions the possibility that the 1918/7-D could be an intentionally produced variety, but that explanation seems less likely, as the first example appeared in the numismatic press only 12 years later.

This example shows good remaining luster. It appears to be a later striking as each side has heavy metal flow around the margins as well as within the recess around the Native American's eye and temple region. The devices are softly defined, as usual, and the soft gray patina has a few specks of carbon on each side. CAC: 8 in 55, 21 finer (3/19).

*Ex: Long Beach Signature (Heritage, 6/2010), lot 468; Long Beach Signature (Heritage, 9/2010), lot 3503. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939*

### 1918-D Buffalo Nickel, MS66+ Only One Finer Coin at PCGS

**3691 1918-D MS66+ PCGS. CAC.** From a mintage of more than 8.3 million pieces, the 1918-D Buffalo nickel is not too difficult to locate in lower grades, but the issue is rare at the MS66 grade level, and finer coins are virtually unobtainable. Unfortunately, the 1918-D was not a well-produced issue, and many examples seen are softly struck, with lackluster surfaces. The date is best known for the 1918/7-D overdate variety, but the normal date is a prime condition rarity in the higher reaches of Mint State.

The present coin exhibits unusually sharp definition in most areas, with just the faintest trace of blending on the bison's shoulder. The impeccably preserved surfaces radiate vibrant mint luster, with delicate hints of pale gold and ice-blue toning. Eye appeal is outstanding. Population: 31 in 66 (3 in 66+), 1 finer. CAC: 8 in 66, 0 finer (3/19). NGC ID# 22RH, PCGS# 3938

### 1920-D Nickel, MS66 Tied for Finest-Graded at PCGS

**3692 1920-D MS66 PCGS.** The 1920-D Buffalo nickel claims a large mintage of 9.4 million pieces, but the date is challenging in Gem condition. The present coin has localized strike weakness in a few areas but the central detail on the longest feather is well-defined. The mint luster is bright and vibrant with attractive traces of pale gold and ice-blue toning. Overall visual appeal is quite strong. For the vast majority of Buffalo nickel collectors, the 1920-D tops out at the MS66 level, with only one coin (NGC-certified) graded higher. Population: 6 in 66, 0 finer (2/19). NGC ID# 22RR, PCGS# 3945

## 1937-D Three-Legged Nickel, MS65 Rare and In Demand in Gem Condition

**3693 1937-D Three-Legged, FS-901, MS65 PCGS. CAC.** It is interesting to note that the *Cherrypickers' Guide* gives its highest rating of 5 for both Interest Factor and Liquidity Factor for each of the three popular Buffalo nickel varieties, the 1916 Doubled Die Obverse, the 1918/7-D, and the 1937-D Three-Legged. This seems to be out of kilter, as there are many collectors, even type collectors, who would likely consider the purchase of a 1937-D Three-Legged Buffalo in preference to the other rarer varieties; thus, we believe its Interest Factor should be even higher. The demand especially for Gem examples of the Three-Legged 1937-D can never approach the limited supply. The surfaces of this piece are bright and satiny, and each side has a layer of muted reddish-golden patina. There are no mentionable abrasions on either side, and the strike is above-average for this normally weak issue. Population: 63 in 65 (9 in 65+), 12 finer. CAC: 31 in 65, 6 finer (3/19).

*Ex: Long Beach Signature (Heritage, 6/2011), lot 3263; Central States Signature (Heritage, 4/2014), lot 5543; Dallas Signature (Heritage, 3/2016), lot 4768, which realized \$28,200. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982*

**James Earle Fraser**

## EARLY DIMES

### 1792 Pattern Disme in Copper, SP25 Judd-10, Pollock-11, Reeded Edge Only 19 Examples Traced

**3694** 1792 Disme, Judd-10, Pollock-11, High R.6, SP25 PCGS. The 1792 patterns are all rare and historically important issues that laid the foundation of the monetary system of the United States, the most efficient and successful monetary system in the history of the world. The 1792 disme (a French term, soon Americanized to dime) was an especially important denomination, as it established the decimal base of the system, freeing U.S. currency from the cumbersome calculations of the old English system of 12 cents to the shilling, 20 shillings to the pound, etc. The dismes were struck in silver (Judd-9, three examples known), copper, with a plain edge (Judd-11, three examples known), and copper, with a reeded edge (Judd-10, 19 specimens traced). The SP25 example offered here is number 13 in the Judd-10 census compiled by Pete Smith, Joel Orosz, and Len Augsburger in their seminal work, *1792: Birth of a Nation's Coinage*. Three Judd-10 specimens are included in institutional collections at the Smithsonian Institution, the Durham Museum, and Independence National Historic Park.

#### Design

Obverse: Liberty with flowing hair facing left. LIBERTY PARENT OF SCIENCE & INDUST. around, 1792 below the bust. Reverse: Eagle in flight, with outstretched wings and head to right, UNITED STATES OF AMERICA around, DISME below. Struck in copper with a reeded edge. The diameter is 22 mm, the same as the 1792 Small Pattern cents. The same planchet cutter may have been used on both issues. 57.8 grains, reverse rotated 140 degrees CCW.

#### The Present Coin

This handsome mid-grade example has been a highlight of several important collections since it first surfaced in 1997 (see pedigree below). The medium brown surfaces exhibit underlying traces of copper-red and lilac patina, with some grade-consistent abrasions in the fields on both sides. The central design elements were strongly impressed and retain much interior detail in Liberty's hair and the eagle's wings. The legends and date remain legible in most areas, but a circular depression over SCIE of SCIENCE partially obscures those letters, and some planchet flaws and rim nicks on the reverse make TED of UNITED indecipherable. The overall presentation is most attractive. This coin possesses an admirable combination of absolute rarity, pleasing appearance, and unmatched historic importance. We expect intense competition from both dime collectors and pattern enthusiasts when this lot is called.

*Ex: Gainsborough II Sale (Superior, 2/1997), lot 2646; Public Auction Sale (Stack's, 5/1998), lot 108; Stuart Levine and Anthony Terranova; purchased by Ed Price on 5/13/1998; Stuart Levine on 3/26/2001; private sale; Pre-Long Beach Sale (Superior, 5/2001), lot 1046, realized \$45,425; New York Connoisseur's Collection (American Numismatic Rarities, 3/2006), lot 37, realized \$87,400; Coin Rarities Online; Park Avenue Numismatics; private collection; Americana Auction (Stack's Bowers, 2/2014), lot 2002, realized \$211,500; ANA Convention Auction (Stack's Bowers, 8/2016), lot 3012, offered with a reserve that was not met. NGC ID# 294H, PCGS# 11026*

**1800 JR-1 Dime, MS62**  
**Extremely Rare in Mint State**

**3695 1800 JR-1, R.4, MS62 PCGS.** Field star 12 does not touch the beak, an immediate confirmation of the JR-1 variety. The reverse die served the Mint well, having been previously used to strike 1798 JR-4 dimes and 1798 BD-2 quarter eagles. A number of dual denomination reverses exist from the late 1790s and early-to-mid 1800s, when the Mint was in dire need of serviceable dies and not particularly concerned with matching up dates or denominations.

JR-1 dimes are scarce to rare, and seldom seen in Mint State. A raised dot between 1 and 8 identifies the obverse, as does the upraised B in LIBERTY, which sits high between I and E. This coin is struck from a late die state, with a die crack from the rim to the second feather of the eagle's left (facing) wing, which has formed a small cud. The 2015 Zack, Scuderi, and Sherrill reference confirms the rarity of Mint State JR-1 examples, stating "at most two are known in true MS condition." This is a richly toned, sharply defined coin, with bold details at the central motifs. Population (for JR-1 and JR-2 varieties combined): 3 in 62, 4 finer (3/19). NGC ID# 236H, PCGS# 38754 Base PCGS# 4470

**1800 Dime, JR-2, AU58**  
**Seldom Seen This Fine**

**3696 1800 JR-2, R.5, AU58 PCGS.** JR-2 is the rarer of the two 1800 dime varieties, being particularly elusive in XF and finer grades. The obverse die is shared with JR-1, while the reverse is also seen on the JR-1 1801 die pairing. The present JR-2 representative displays iridescent lavender-gray patina with areas of deeper olive and gold color in the recesses on each side. The central definition is bold, although the border denticles grow slightly soft around the upper-right periphery, a common characteristic of genuine examples. The 1800 issue in general is somewhat scarcer than is often realized, appearing at auction less frequently than most other dates in the Draped Bust type. It may be a long time before a JR-2 representative of comparable quality is again offered publicly.

*Ex: Robert Hilt; Central States Signature (Heritage, 4/2015), lot 4980, realized \$12,925. NGC ID# 236H, PCGS# 38755 Base PCGS# 4470*

### 1802 JR-4 Dime, Unc Sharpness Scarce in All Grades

**3697** 1802 JR-4, R.4 — Rim Damage — PCGS Genuine. Unc Details. A jagged, Mint-related planchet flaw to the right of 2 in the date is the initial culprit, although an attempt to repair the flaw at the opposing reverse rim may be the ultimate reason PCGS declined to give this coin a numeric grade. Regardless of variety, 1802 dimes are scarce — just 10,975 pieces were struck, and perhaps 175 to 225 examples survive in all grades and varieties.

JR-4 is the fourth and final variety, and a scarcity in circulated grades. It is rare in Mint State, with fewer than a dozen such pieces known. This example is prooflike in the fields beneath canopy of multicolor toning. Pale-blue, peach-gold, and reddish-orange patina predominates on both sides. The strike shows a bit of central weakness, and the undamaged areas of the periphery are sharp. Mint luster remains beneath the attractive toning.

## BUST DIMES

### 1827 Capped Bust Dime, MS65 Pointed Top 1, JR-12

**3698** 1827 Pointed Top 1, JR-12, R.1, MS65 PCGS. According to Mint records, a substantial mintage of 1.2 million Capped Bust dimes was accomplished in 1827, with 13 die varieties known for the date. This coin represents the popular JR-12 variety, with the 7 in the date placed low and the final A in AMERICA touching the top arrowhead. The JR-12 is an available issue in absolute terms, but it is rare in MS65 condition. This was the only use of both dies.

The present coin is a spectacular Gem, with well-detailed design elements that show a touch of softness on the star centers and the eagle's leg. The minimally marked surfaces show traces of mint luster under variegated shades of pleasing gray toning. The overall presentation is most attractive. Population (for the variety): 1 in 65, 0 finer (2/19). NGC ID# 2375, PCGS# 38822 Base PCGS# 4504

**1829 Bust Dime, Reflective MS66+ ★  
Large 10C, JR-2**

**3699** 1829 Large 10C, JR-2, R.2, MS66+ ★ NGC. This intermediate die state is characterized by die cracks from star 1 to the bust and to the upper serif of digit 1 in the date. The strike is typical for this variety and is best expressed by the authors of the JR text: "Strong obverse strike with full denticles but some softness seen in curls between eye and ear. Strong reverse strike with full feather detail on both wings." While JR-2 is a fairly common variety for the year, this is definitely an uncommon example. The fields are bright and reflective, setting off the devices with cameo-like contrast. Pale golden patina evenly covers both sides of this remarkably Premium Gem. NGC ID# 2378, PCGS# 38840 Base PCGS# 94511

**1835 Capped Bust Dime, MS65+  
Scarce JR-2 Variety**

**3700** 1835 JR-2, R.4, MS65+ PCGS. CAC. Mint records indicate a large mintage of more than 1.4 million Capped Bust dimes was achieved in 1835. In addition, die evidence suggests many 1835-dated dimes were actually struck in 1836, or even 1837, making the supply even larger than the mintage figures suggest. Nine different die varieties are known for the date. This coin represents the JR-2 variety, with a Fancy 8 in the date and the U in UNITED placed lower than the N. The JR-2 is a scarce variety, especially in high grade.

The present coin is a Plus-graded Gem, the single-finest certified example of this variety identified by either of the leading grading services (2/19). The design elements are sharply detailed, aside from a touch of softness on the arrow fletchings. The well-preserved surfaces radiate vibrant mint luster, under shades of lavender-gray and pale gold toning. Eye appeal is outstanding. PCGS# 38880 Base PCGS# 4527

## MERCURY DIMES

### 1916-D Mercury Dime, MS64 Impressively Sharp Centers

**3701 1916-D MS64 NGC.** This is a sharp near-Gem example of the key 1916-D Mercury dime, which nearly earns a Full Bands designation. There is some minor strike doubling on the peripheral legends and the mintmark, and a thin vertical die crack extends from the rim up through the tip of the branch stem into the fasces. Satiny luster is toned light golden, with occasional russet freckles visible near the borders. No disruptive abrasions are present. The Denver Mint only struck 264,000 Mercury dimes in 1916, marking by far the lowest mintage in the series. The 1916-D is the only Mercury dime issue that will be a “stopper” for collectors even in low circulated grades. Census: 10 in 64 (2 in 64+), 8 finer (2/19). NGC ID# 23GY, PCGS# 4906

### 1916-D Mercury Dime, MS66 Full Bands Few Finer, Attractive Old-Time Toning

**3702 1916-D MS66 Full Bands PCGS.** If the efforts of Theodore Roosevelt and Augustus Saint-Gaudens triggered a renaissance of American coinage, it was soon followed an age of enlightenment starting with the Mercury dimes, Standing Liberty quarters, and Walking Liberty half dollars. Somehow, the Denver Mint's earliest contribution went largely unnoticed, a mere pittance compared to the Philadelphia Mint's production of 22 million 1916 Mercury dimes. Just 264,000 1916-D dimes were struck.

The public was slow on the uptake, not recognizing the key date and mintmark combination until much later. As a result, few high-grade Mint State coins survive. This Premium Gem Full Bands example is one of the few, housed in an early-generation blue label PCGS holder with barcode on the back. Blatantly original surfaces glow with golden shades beneath pleasing, dappled-gray patina. As the Full Bands designation implies, the strike is sharp throughout both sides, with the lower diagonal band on the fasces characteristically less-rounded than the upper one. Only a few finer pieces are known. Population: 26 in 66 (3 in 66+) Full Bands, 8 finer (3/19). NGC ID# 23GY, PCGS# 4907

## PROOF TWENTY CENT PIECES

### 1920-D Dime, MS67+ Full Bands Tied for Second Finest Certified

**3703 1920-D MS67+ Full Bands NGC.** The 1920-D dime is relatively available in lower grades, and even Full Bands examples can be located for a price. But when the availability of high grade is combined with Full Bands, the number of known pieces is very small. NGC has only certified five coins in MS67 Full Bands, and PCGS has graded seven with one example finer (2/19). One of the often-seen production problems for the 1920-D dime is the prevalence of die cracks. Their absence on this coin suggests it was struck from a fresh pair of dies, and the completeness of strike indicates the dies were set close enough together to give a full strike. Most of each side is brilliant, but there is a long arc of golden-russet and sea-green toning seen along the peripheries. NGC ID# 23HC, PCGS# 4931

### 1876 Twenty Cent, PR66 Originally Toned, Great Eye Appeal

**3704 1876 PR66 PCGS. BF-4, R.4.** The top of the 1 is completely right of the shield point. The 1876 was the second year of issue for this short-lived series, and ended up as the final year of issue for circulation strikes. Only proofs were produced in the next two years. Without question, the key attribute of this high-end Gem twenty cent piece is its irrefutable originality. The surfaces are richly toned in blue, lavender, russet, and golden patina, yet the fields remain flashy and the devices still appear frosty in contrast. Fully detailed throughout. Population: 18 in 66 (1 in 66+), 0 finer (2/19). NGC ID# 27H3, PCGS# 5304

### 1877 Twenty Cent, PR64 Originally Toned Proof, CAC Endorsed

**3705** 1877 PR64 NGC. CAC. BF-1, R.3. Undeniably the key to the short twenty cent series, seemingly all 1877 proofs were either included with the silver proof sets sold (an estimated at 350 sets) or melted. A total of 510 proofs were struck, and no circulation strikes since the series was officially discontinued. Among the survivors, many coins are cleaned or otherwise impaired, leaving a small number of attractive, original examples for specialists in the short, eminently collectible series.

This near-Gem proof has the look of a coin that was long preserved in its early method of storage. Much cameo contrast exists between the frosted devices and mirrored fields, while the perimeters display deep, cobalt-blue and russet-brown shades that surround the bright-silver centers. The eye appeal is spectacular. Both sides possess a pinpoint-sharp strike, and the overall Choice proof quality is confirmed by CAC endorsement.

**From The William Rehwald Proof Set Collection.** NGC ID# 27H4, PCGS# 5305

## EARLY QUARTERS

### 1796 B-2 Quarter Dollar, Fine 15 Early Die State Small Eagle Type Coin

**3706** 1796 B-2, R.3, Fine 15 PCGS. Tompkins Die State 1/1, perfect dies. Later die states of the B-2 die pair show the obverse lapped at the hair curls and cracked through the RTY in LIBERTY. This coin is evenly worn with medium gunmetal-gray and golden-olive patina. Other than some minor weakness at about 2 o'clock on the reverse, the border dentils are complete around each side. Scattered light contact marks appear beneath a loupe, and portions of the fields appear mildly granular. The Mint struck only 6,146 quarter dollars in 1796, and then the denomination was shelved until 1804. With the Mint's limited resources in its infancy, production was focused on copper coinage, as well as on silver dollars, the preferred denomination among depositors of silver at the Mint. Quarter dollars that entered circulation in 1796 joined a host of Spanish silver pieces that were the backbone of commerce at the time, and they circulated extensively. NGC ID# 23RA, PCGS# 38920 Base PCGS# 5310

## BUST QUARTERS

**1796 B-2 Quarter, XF40**  
**Rare Cracked Obverse Specimen**  
**Fifth Finest Late-State Piece**

**3707 1796 B-2, R.3, XF40 PCGS.** The 6 nearly touches the drapery, identifying the more plentiful B-2 die marriage. This pleasing XF example has several prominent die cracks through BERTY. At least five individual, interconnected die cracks are visible through those letters, including some that reach the hair curls below LIBERTY. Although the B-2 die marriage is plentiful, with perhaps as many as 400 survivors, only a few of the late die state pieces are known.

A census of the late state coins compiled by Rory Rea, Jim Koenings, and Aram Haroutunian show 11 pieces that grade from MS63 down to VF20, and perhaps another dozen exist in lower grades. The present lovely XF specimen is not recorded in their roster, and it is probably the fifth finest known of the late die state. They record four Mint State pieces (including one that is unverified) and a single AU55 example. The next piece in their listing grades XF40 but was once plugged. This new example is the fifth finest, discounting the unverified appearance.

A wonderful pewter-gray specimen, this late state B-2 quarter has delicate gold toning on both sides with traces of pale blue. The surfaces show grade-consistent marks of no consequence. The centering is excellent and the eye appeal is strong. The advanced specialist will certainly welcome the opportunity to bid on a remarkable late die state example of the debut 1796 quarter dollar.

*Ex: Rosemont Signature (Heritage, 8/2013), lot 5575, realized \$44,062.50. NGC ID# 23RA, PCGS# 38920 Base PCGS# 5310*

**1819 Small 9 Capped Bust Quarter, MS64**  
**Just One Finer at NGC, B-3 Late Die State**

**3708 1819 Small 9, B-3, R.1, MS64 NGC.** Tompkins Die State 4/3. Four obverse dies and three reverse dies combine for four varieties of 1819 quarters — two are the Large 9 type, and two are Small 9 varieties. Browning-3 and Browning-4 represent the Small 9 variants, although B-3 was actually struck after B-4 based on die state. Few 1819 quarters of any variety are known in near-Gem or finer grades. The mintage of 144,000 pieces circulated extensively, and few high-grade Uncirculated coins survive.

This is a lustrous and sharply struck B-3 quarter, with bold obverse definition on the stars and portrait. The reverse is crisply struck as well, and shows only slight incompleteness on the eagle's talons and wing tops. B-3 and B-4 share the same reverse, which is known for wide repunching of the denomination numerals 25. The obverse exhibits its late die state, with a diagonal crack through the upper tip of the first 1 in the date that continues across the drapery and bust into the obverse field near Liberty's chin. Smooth, unabraded surfaces display attractive reddish-gold and bluish-brown toning. Census: 6 in 64, 1 finer (3/19). NGC ID# 23RK, PCGS# 402646 Base PCGS# 5325

## SEATED QUARTERS

### 1840-O Seated Quarter, MS64 No Drapery, Seldom Seen Any Finer

**3709** 1840-O No Drapery MS64 NGC. Briggs 1-A, Flynn RPD-002. An initial mintage of 382,200 pieces was struck with the original Gobrecht design, without drapery beneath the elbow. Later in the year, an additional 43,000 coins were made with drapery, giving the 1840-O two *Guide Book* entries. This is a fully struck near-Gem No Drapery quarter, with die clashing visible within the reverse shield and a widely repunched 8 in the date. Lustrous, silver-gray surfaces display pearlescent mint luster, with faint golden accents at the rims. A few minuscule marks are widely scattered about the obverse, visible with a lens. All 1840-O No Drapery coins have small dentils that are often incomplete, but on this crisply struck piece the dentils are sharp and fully formed throughout both sides. Examples of the No Drapery variant are rare in Choice Uncirculated or finer grades, with just three finer pieces reported by PCGS and NGC combined (all at NGC). Census: 5 in 64, 3 finer (2/19). NGC ID# 23SG, PCGS# 5393

### 1881 Seated Liberty Quarter, MS68 None Seen Numerically Finer

**3710** 1881 MS68 NGC. Briggs 1-A. Only 12,000 business-strike Seated Liberty quarters were struck at the Philadelphia Mint in 1881, accompanied by a generous proof mintage of 975 examples. Only one die was used for the business-strike production, identified by a sharp die scratch that shows between vertical lines 6 and 7 in the shield. The 1881 is slightly more elusive than the previous two issues in this series, which boast similarly low mintages.

The present coin is a magnificent MS68 example, with well-detailed design elements that show just a touch of the usual softness on some star centers. The impeccably preserved surfaces radiate vibrant mint luster on both sides, with subtle highlights of pale gold and lavender toning. Eye appeal is terrific. Census: 2 in 68 (1 in 68★), 0 finer (3/19). NGC ID# 23VD, PCGS# 5513

## PROOF SEATED QUARTER

**1859 Seated Quarter, Toned PR67  
Tied for Finest Non-Cameo at PCGS  
Ex: Gardner**

**3711 1859 PR67 PCGS. CAC. Briggs 2-B.** The 1859 is the first readily collectible proof issue in the Seated Liberty quarter series. The Mint struck 800 pieces, and enough survive in the lower grades that this date is obtainable for many collectors. High-grade pieces, however, are conditionally elusive, and are major rarities at the Superb Gem level.

The present offering should not be overlooked. Sharp stars surround a bold Liberty on the obverse, and the eagle's plumage and talons are crisply struck. Struck from proof dies, glassy reflectivity in the fields leaves no doubt as to this coin's proof origin, and deep aquamarine toning on the reverse complements softer golden-gray, lavender, and sea-green hues on the obverse. This PR67 piece is tied as the finest non-Cameo at PCGS, nor has NGC graded any finer non-Cameo proofs. This is one of four PR67 examples with the CAC green approval sticker. It remains housed in its previous generation, blue label PCGS holder with the barcode on the back.

*Ex: Purchased by Eugene Gardner from Joseph O'Connor (2/2008); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98379; ANA Signature (Heritage, 3/2016), lot 4847. NGC ID# 23WL, PCGS# 5555*

## BARBER QUARTER

**1901-S Quarter Dollar, VF25  
Series Key in All Grades**

**3712 1901-S VF25 NGC.** The 1901-S Barber quarter boasts one of the lowest mintages in the series (72,664 pieces) and it is the scarcest date overall. The majority of the survivorship grades no finer than Very Good, and collectible midgrade pieces are inherently rare. Offered here is a golden-tinted, satiny VF25 coin with strong remaining detail for the grade. Some old, light marks are apparent on Liberty's portrait when viewed with a loupe but they are not significant.

The 1901-S is one of the "big three" key dates in the Barber quarter series. Barber coinage was a workhorse of commerce in contemporary days, as few people preserved examples of any issue for numismatic purposes. Today, the Barber quarter series is replete with challenging acquisitions, but perhaps chief among them is the 1901-S. NGC ID# 23YR, PCGS# 5630

## STANDING LIBERTY QUARTER

### 1923 Quarter, MS67 Full Head Tied for Finest at PCGS A Condition Census Rarity

**3713 1923 MS67 Full Head PCGS.** For most issues in the Standing Liberty quarter series, MS67 Full Head is the finest grade typically collectible. Such is the case with the 1923, even though this issue is plentiful in lower grades. PCGS has seen merely eight MS67 Full Head representatives and none finer. NGC lists two MS67 Full Head pieces and two MS68 Full Heads finer (2/19). It is important to note that no MS68 Full Head coin has ever appeared at auction. Even the magnificent Just Having Fun Collection piece, which holds the record auction price realized for a 1923 quarter, grades MS67 Full Head.

This PCGS coin is an essential part of a high-ranking Registry Set. It is satiny and nearly brilliant, showing only a few flecks of russet toning in the margins. Typical of the 1923, the shield details are well brought up, although the 1 in the date is weaker than the other numerals. Liberty's head, while decidedly full by grading standards, exhibits trivial weakness at the temple, which is an almost unavoidable characteristic of the 1923. No bothersome abrasions are noted and eye appeal is pleasing. Population: 8 in 67 Full Head, 0 finer (2/19). NGC ID# 243J, PCGS# 5743

## EARLY HALF DOLLARS

### 1795 Two Leaves Half Dollar, AU50 O-121, T-2, Y Over Star

**3714 1795 2 Leaves, Y Over Star, O-121, T-2, High R.4, AU50 PCGS.** Tompkins Die State 2/1. Die clash from the eagle's wing appears in the field right of Liberty's profile. The Y in LIBERTY is cut over a star, the remnants of which remain visible and aid in variety attribution. According to Tompkins, one near-Mint example qualifies for the O-121 Condition Census, and Stephen Herrman reports that an AU50 was last offered in 2010, attesting to the conditional rarity of this 1795 die marriage.

This well-struck Flowing Hair half dollar enjoys strong detail on the portrait, wings, and even on the breast feathers, which are faintly visible. All the peripheral elements are similarly strong. Mostly light silver with golden and gunmetal accents at the rims. Adjustment marks occur around the upper-right reverse border. NGC ID# 24E7, PCGS# 39256 Base PCGS# 6052

## 1796 15 Stars Half Dollar, O-101 Problem-Free VF30 Key U.S. Type Coin

**3715** 1796 15 Stars, O-101, T-1, R.5, VF30 NGC. Amato-132. Tompkins Die State 5/1. The Draped Bust Small Eagle half dollar, bearing the dates 1796 or 1797, is one of the three keys to a collection of U.S. type coinage, the other two being the 1796 No Stars and 1808 quarter eagles. NGC reports 17 examples of the 1796 15 Stars half dollar variety, four of which are in the Very Fine 20 to 35 grade category and nine finer. PCGS shows 61 examples of the 15 Stars variety, 21 of which grade Very Fine 20 to 35 and 14 pieces finer (2/19).

This VF30 offering displays golden-gray patination accented with whispers of deeper bluish-gray and soft rose. The design elements exhibit strong definition, including considerable detail on Liberty's hair and the eagle's wing and tail feathers. The devices are nicely centered on the planchet, and dentilation is sharp throughout. The surfaces are remarkably clean for a coin that saw moderate circulation, and neither side reveals adjustment marks. Indeed, we are hard pressed to locate pedigree identifiers, though a minute mark midway between star 7 and Liberty's head will aid in this purpose, as will a light toning streak across Liberty's portrait. The diagnostic crack visible on most 1796 15 Stars examples extends from the obverse rim at 5 o'clock through the drapery to stars 15, 14, and 13 to the rim at 3 o'clock.

This is a higher-end midgrade example of this numismatic rarity, and as such is sure to elicit spirited bidding. Moderately circulated, problem-free Small Eagle halves are not seen all that often. The advanced type or date/variety collector should capitalize on this infrequent opportunity.

*Ex: Premium Numismatics fixed price list (4/2004); American Numismatic Rarities fixed price list (Spring/Summer 2004); Joseph C. Thomas Collection / Central States Signature (Heritage, 4/2009), lot 2388; Northeast Numismatics fixed price list (5/2009); Scotsman Auctions (7/2010), lot 529; Central States Signature (Heritage, 4/2015), lot 5068, where it brought \$49,350. NGC ID# 24E9, PCGS# 39261 Base PCGS# 6057*

### 1797 Half Dollar, Original Fine 12 Rare O-102 Variety The Amato Specimen

**3716** 1797 O-102, T-2, High R.5, Fine 12 ANACS. Amato 527. Tompkins Die State 1/1. The right foot of T in STATES has a leaf tip directly below its serif to confirm the scarce O-102 die pair. Draped Bust half dollars with the Small Eagle reverse comprise one of the rarest types in all of the federal series, and a greatest challenge for collectors of early coinage by die variety. Four die marriages represent the entire 1796-1797 half dollar mintage — a mere 3,918 coins in all were struck by the fledgling Mint. Of the four varieties, the 1797 O-102 die marriage is by far the most rare, with an estimated survival of about 30 pieces.

The present coin once belonged to our colleague, numismatist and Heritage cataloger Dr. Jon Amato, who passed away in August, 2017. Among his many numismatic writings and achievements, he authored the award-winning 2012 reference, *The Draped Bust Half Dollars of 1796-1797: Numismatic Background and Census*. In that book, he described this exact coin:

**“An Upstate New York Collector’s Specimen.** Moderate mark midway between star 3 and third curl from the top. Horizontal pinscratch from bottom of neck curl into hair, in line with inner point of star 3. Minor rim ding above first T of STATES, and another above space between AM in AMERICA. Faint vertical staple scratch through right (facing) wing.”

We note attractive gunmetal-gray toning that deepens into the margins, with lighter silver-gray patina on the raised devices. The coin is housed in an early generation, small ANACS holder.

*Ex: Northeast Numismatics to Jon Amato, April 1996; FUN Signature (Heritage, 1/2018), lot 4855. NGC ID# 24EC, PCGS# 39266 Base PCGS# 6060*

## 1797 O-102 Draped Bust Half, XF Details Rarest of the Small Eagle Halves

**3717 1797 O-102, T-2, High R.5 — Surfaces Smoothed — PCGS Genuine. XF Details. Amato Unlisted.** The Overton-102 (T-2) 1797 Small Eagle half dollars are always in demand as the rarest variety of the rarest design type in all of U.S. silver coinage. A total of 3,918 Small Eagle halves were struck, about evenly split between the 1796 and 1797-dated coins. Two varieties of 1797 halves exist, of which O-102 is by far the rarest. The late Dr. Jon P. Amato published a comprehensive Condition Census of 1796 and 1797 half dollars in his 2012 book, *The Draped Bust Half Dollars of 1796-1797, Numismatic Background and Census*. In that ambitious book, Dr. Amato identified just 35 1797 O-102 specimens. A few additional examples have come to light since that Condition Census was released, and the present coin ranks high among the newly recorded examples based on its sharpness.

The frequently updated Census by Stephen Herrman is perhaps the most up-to-date snapshot of the finest O-102 pieces known. According to the Autumn, 2018 listing, the O-102 Census is 61,55+,55,50,50,40 as of (3/19). The XF40 in the Census is a net-graded coin by ANACS.

This example shows solid XF sharpness throughout both sides. The surfaces are granular and microscopically porous, and the obverse is a bit subdued. Random tiny rim marks exist outside of stars 9 to 13, and some noticeable scratches run downward outside stars 11 to 14. The surfaces show traces of smoothing to minimize scratches and small marks in the obverse fields and on Liberty's portrait. On the reverse, a few Mint-made adjustment marks radiate inward from the margins, plus some light pinscratches exist beneath the eagle's right wing. Faint hairlines from a past cleaning remain.

In hand, the coin is sharp for the date and variety. No more than a handful of O-102 examples exceed it in that regard. This is an important opportunity for the variety specialist to obtain a visually impressive example of the rare and challenging variety. For many who seek to complete the rare superfecta of all four 1796-1797 Small Eagle varieties, it presents a chance to acquire the only true "stopper" in that short set, a major accomplishment achieved by only a small number of advanced early half collectors.

### 1801 O-102 Half Dollar, AU58+ High Condition Census for the Variety

**3718 1801 O-102, T-1, High R.4, AU58+ NGC.** A Condition Census example of the variety, showing lustrous fields and sharp central devices with only a brush of friction. Several border stars are weakly defined. Both sides of this lightly marked and satiny near-Mint coin display sea-green and golden toning. The 1801 half dollar overall is rare in Uncirculated condition and scarce in the upper AU grades. Overton-102 coins are in the minority. The finest O-102 example known is the Green/Newman coin, graded MS64 NGC. Stephen Herrman lists a scratched AU58 coin as the second finest of the variety. This fresh example, a Plus-graded and problem-free AU58 coin, will be an important acquisition for the Bust half dollar specialist. Census (both varieties included): 4 in 58 (1 in 58+), 2 finer (3/19).

*Ex: Frontenac (Bowers and Merena, 11/1991), lot 3021. NGC ID# 24ED, PCGS# 39268 Base PCGS# 6064*

## 1805/4 O-101 Draped Bust Half, MS65

Arguably The Finest Known

Ex: 'Col.' E.H.R. Green, Eric P.

Newman, Oliver Jung

**3719** 1805/4 O-101, T-4, R.3, MS65 NGC. CAC. Ex: "Col." E.H.R. Green and Eric P. Newman Collection. This amazing Gem displays brilliant-silver mint luster that shines through deep golden-brown and iridescent toning on each side. The strike is exceptionally sharp and the surfaces are splendid, with only a few inconsequential handling marks. Here is an amazing Draped Bust, Heraldic Eagle half dollar — a true centerpiece for an extraordinary collection. Careful examination reveals faint obverse clash marks, yet no die cracks or polishing lines. The reverse also shows light die clashing, yet no other die defects.

At least two unused obverse dies for half dollars were created with the 1804 date, confirmed by two different 1805/4 obverse dies that are known today. The O-101 and O-102 varieties share one of the obverses, and O-103 employs the other. While each of O-101 and O-102 die pairs is more plentiful than O-103, only about 1,000 pieces survive of all three varieties combined in all different grades. Of these, the Eric P. Newman specimen and the Eliasberg/Pogue specimen, both certified MS65, are easily the finest known 1805/4 half dollars. We believe that the Newman and Eliasberg/Pogue coins are the only two Gem examples known today, and that they are in fact the two finest 1805 half dollars that exist of any variety.

When we offered the Eliasberg coin in August 1998, that specimen was called the finest-known 1805/4 half dollar. The coin realized over \$100,000 at a time when few coins reached the six-figure mark. It more recently brought \$111,625 as part of the D. Brent Pogue Collection in May, 2015, certified MS65 PCGS.

In comparison, the present coin last changed hands in Heritage's ANA Signature Auction in August, 2014 for a record \$152,945 as part of the Oliver Jung Collection. It had previously held the record of \$152,750 when it appeared as part of our Eric P. Newman Collection, Part II (Heritage, 11/2013). It remains in its special Eric P. Newman holder as MS65 NGC, CAC.

B. Max Mehl was fond of writing that the 1805/4 half dollar was "the closest a collector could come to an 1804 half dollar." He was obviously making that statement in an attempt to borrow from the fame and fortune of the 1804 silver dollar. Today, the 1805/4 is well known to collectors and stands on its own merit as an important numismatic delicacy and an essential early type overdate. Silver deposits were minimal in 1804, as evidenced by the low production of dimes, quarters, and silver dollars (dated 1802 or 1803). There were no half dimes or half dollars minted in 1804, although half dollars were obviously intended. The finest certified 1805 Normal Date half dollars only reach the MS63 grade level, making the present coin arguably the finest 1805 half dollar available to collectors based on its outstanding pedigree and high grade (with CAC endorsement), and recent record-setting auction appearances.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$40.00; Eric P. Newman Numismatic Education Society; The Collection of Oliver Jung (Heritage, 8/2014), lot 5583; the present consignor.

**Selections from the Jim O'Neal Collection.** NGC ID# 24EH, PCGS# 39290 Base PCGS# 6070

**1805 O-111, T-3 Half Dollar, AU58**  
**Original Patina, Great Eye Appeal**  
**Ex: Queller-Byers**

**3720** 1805 O-111, T-3, R.2, AU58 PCGS. Tompkins Die State 2/2. Seldom seen in Mint State, this O-111 die marriage relatively available through the XF level, and moderately so in low About Uncirculated condition. This near-Mint example ranks third in the Tompkins Condition Census (or is tied for third), exceeded only by a single MS63+ and an MS61. This is the former Queller Family Collection coin and George "Buddy" Byers specimen — an impressive pedigree to accompany the notable sharpness and eye appeal.

Rose-gold toning with pale-blue accents provide much of the visual allure. A sharp strike attends the central motifs, with the stars characteristically flat for this variety. Remnants of die clashing are most visible beneath Liberty's chin. Much mint luster remains within the recesses of Liberty's hair and flanks the raised elements. There are no adjustment marks or significant abrasions — just a few tiny ticks here and there, certainly within expectations for the assigned grade. Only the slightest wear visits the high points. This is a special coin in an exceptional collector grade, sure to elicit strong bids from early half enthusiasts.

**Selections from the Jim O'Neal Collection.** NGC ID# 24EG, PCGS# 39285 Base PCGS# 6069

**1806 Half Dollar, O-109, MS63**  
**Pointed 6, No Stem**  
**Well-Struck, Lightly Toned**

**3721** 1806 Pointed 6, No Stem, O-109, T-15, R.1, MS63 PCGS. Tompkins Die State 2/2. A lustrous and sharp O-109, immediately recognizable as a variety by the lack of a stem through the eagle's claw. Multiple die clashing is visible on both sides, yet the strike is sharp on the central devices, and the obverse stars are only slightly drawn toward the edge. Pale, reddish-gold toning casts an attractive, translucent sheen across vibrantly lustrous surfaces.

The Pointed 6, No Stem variant is frequently seen for a Draped Bust half in low Mint State grades or in circulated condition. At the Select Uncirculated level such as this coin, it is scarce. Finer examples are rare indeed. This MS63 offers flashy eye appeal, and the few marks that define the grade are tiny and require magnification to see. Struck from an early-to-mid die state, before the formation of a die crack at star 12 into the field that defines later die states. Population: 12 in 63, 3 finer (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

## 1806 Draped Bust Half Dollar, MS61 High Condition Census O-111a Popular 6 Over Inverted 6 Variety

**3722 1806 6 Over Inverted 6, O-111a, T-11, R.4, MS61 PCGS Gold Shield.** Ex: Green, Newman. Tompkins Die State 4/5. The 1806 over inverted 6 is a popular and distressingly scarce *Guide Book* variety. The final digit of the date was initially impressed upside down on this variety, and the remains of an undertype numeral are clearly visible below the primary 6. The Choice Mint State Norweb coin (though it exhibits a disturbing planchet flaw) is easily the finest known example of this die pair, although this former Eric P. Newman coin is well within the Condition Census for the variety, and certainly in the conversation for an even higher ranking in terms of eye appeal.

The design elements are well-detailed, with some softness on Liberty's drapery and the eagle's right (facing) wing and tail. A bit of cabinet friction is noted on the wing tips, Liberty's shoulder, and highest curls. The minimally marked surfaces are naturally toned in shades of gray, lavender, and golden-brown, with strong underlying mint luster. A cud has formed above TED in UNITED, adding cachet to the coin and confirming a middle-to-later die state. A faint die crack is seen above UN, the precursor to a full cud that develops in the latest die state. This lot is an important opportunity for the advanced variety collector.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$35.00; Eric P. Newman Numismatic Education Society (*Heritage*, 11/2013), lot 33429; Charles Link; the present consignor.

**Selections from the Jim O'Neal Collection.** NGC ID# CZEY, PCGS# 39337 Base PCGS# 6078

## 1807 Draped Bust Half Dollar, MS65+ Second Finest at PCGS High Condition Census O-105 Example

**3723** 1807 Draped Bust, O-105, T-4, R.1, MS65+ PCGS. CAC. Tompkins Die State 3/2. A rare, high-end type coin from the final year of the Draped Bust design. The only Draped Bust halves that are marginally available in Mint State for type collectors are the 1806 and 1807, and these are also the only dates in the series that exist in any meaningful quantity — even if small — at the Gem level. This Plus-graded 1807 is effectively the sole second-finest at PCGS, and it is a high Condition Census example of the O-105 die pairing. The only finer examples of the variety are an MS66 NGC coin and the D. Brent Pogue MS66 PCGS example (Stack's Bowers, 5/2015), lot 1115, which realized a strong sum of \$152,750. NGC lists one additional MS66 coin, an O-110 example that appeared in our FUN Signature sale (Heritage, 1/2016), lot 5363.

This high-end MS65, however, carries the distinction of being one of only two Gems with a CAC endorsement — something not awarded to any finer example of the variety or date. This piece is also the first PCGS-graded Gem regular-issue 1807 Draped Bust half we have ever offered at auction, even though PCGS lists seven other non-Plus-graded MS65s (2/19). This coin displays a razor-sharp, even strike that defines all peripheral stars and the central reverse eagle and stars. Liberty's portrait is equally bold. This frosty, lustrous coin showcases original mint luster. The interiors have light champagne toning, but the peripheries exhibit deep russet and gunmetal-blue hues that attractively frame the devices. Only a few trivial ticks are seen under a loupe. This die state shows both dies clashed with faint peripheral cracks. Later states of the reverse exhibit advanced deterioration, as this is that die's only use. The obverse was later employed for O-106 and -107. An outstanding coin that is sure to attract competitive bidding when it crosses the auction block.

*Ex: Highland Collection/Portland ANA (Stack's Bowers, 3/2015), lot 225; Central States Signature (Heritage, 4/2016), lot 4657, which realized \$141,000.*

**Selections from the Jim O'Neal Collection.** NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

## BUST HALF DOLLARS

**1807 'Bearded Goddess' Half Dollar**  
**O-111b, About Uncirculated**  
**Ex: Link, Much Luster Remains**

**3724** 1807 Capped Bust, Bearded Goddess, Large Stars, 50/20, O-111b, R.5, AU50 PCGS. Ex: Link. In many ways, the 1807 Bearded Goddess is the unchallenged "demand rarity" of all early Capped Bust varieties — and a star of the entire Lettered Edge half dollar series. It ranks high on the wantlists of innumerable Bust half and die anomaly enthusiasts. Overall, the 1807 O-111 die marriage is remarkable in many ways — not the least of which is its rarity in both the very early and very late die stages. The early, uncracked die state is undoubtedly rarer, but the late-state Bearded Goddess wins the popularity contest hands down.

Less noticed but equally important, the denomination is blundered on the reverse, ostensibly a 5 over a mispunched 2, yet the real drawing card of this About Uncirculated coin is the long die crack that runs, Rasputin-like, between Liberty's chin and chest. On this example, it is equally strong from the headband all the way toward the bottom rim, ending left of 1 in the date. A parallel crack curves through the left-hand stars. Mint luster remains in protected areas on both sides of this smoothly worn, silver-gray example. Silver highlights gleam at the margins and among the crevices of the central motifs. The devices are well-struck for the variety, visibly so on the eagle's wings and neck, with only occasional high point incompleteness where light wear is seen. Rare this nice, arguably among the top half-dozen or so Bearded Goddess examples in the advanced die stage, and an important *Guide Book* variety (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 24EN, PCGS# 39358 Base PCGS# 39357

**1808 O-102a Bust Half, Lustrous MS65+**  
**Show-Stopping Eye Appeal**

**3725** 1808 O-102a, R.2, MS65+ PCGS. This intensely frosted O-102a displays a wide halo of violet-gray toning at the margins, which frames shimmering, virtually untuned pearlescent centers. As with the majority of O-102 half dollars from the year, radial die cracks extend out from the obverse border at 12 o'clock and 6 o'clock and nearly bisect the portrait, forming a V-shaped junction — with die chips — where the cracks meet just below Liberty's bow.

Also on the obverse, the date shows recutting at the base of 1, and 08 is noticeably closer than 180. The reverse is cracked as well, confirming the late die stage, while bits of sea-green color partially outline the eagle and decorate recesses between the shield stripes. This is a fantastic, high-end Gem 1808 Bust half regardless of die marriage, and certainly one of the finest-known O-102a examples extant. NGC ID# 24EP, PCGS# 39363 Base PCGS# 6090

**1808 Half Dollar, O-107a, MS66  
High Condition Census  
Tied for Finest From These Dies**

**3726 1808 O-107a, R.2, MS66 PCGS. CAC.** The preservation of this exceptional 1808 Bust half is far superior to most other examples of the issue, regardless of variety. Indeed, this example is tied at the top of the Condition Census for the O-107 die marriage with one other coin (the early die state Eliasberg/Kaufman coin, graded MS66 NGC). This is the late die state variant O-107a, showing a prominent rim-to-rim die crack extending across the obverse from star 5 to star 9.

Radiant, original luster illuminates dappled olive, lavender-gray, and champagne toning on each side. The central devices are well-defined, with moderate die fatigue evident around the peripheries — a legacy of the late die state. Multiple die cracks on the reverse suggest imminent die failure. We note only a faint strike-through or hair-thin scrape in front of Liberty's neck, hidden in the toning. Variety is of little significance at the Premium Gem grade level, as any 1808 half dollar is extremely rare this fine. A high-caliber coin such as the present piece is ideal for the patient type collector. Population (all 1808 varieties): 7 in 66, 4 finer. CAC: 3 in 66, 2 finer (2/19).

*Purchased from Bill Nagle (6/2002); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98629; the present consignor.*

**Selections from the Jim O'Neal Collection.** NGC ID# 24EP, PCGS# 39371 Base PCGS# 6090

**1809 O-109b Half Dollar, MS65  
Second-Finest Known, III Edge  
Ex: Hain, Pogue**

**3727 1809 III Edge, O-109b, R.4, MS65 PCGS.** This is a smooth and beautifully toned Gem example of the scarce 1809 Overton-109b variety, which has an R.4 rating in the advanced die state. A strong die crack runs through the center of AMERICA and across the arrowhead tips, with die chipping visible along the way. Die state aside, it is the extraordinary luster, colorful and rich amber-gold toning framed by iridescent shades at the borders, and near-flawless preservation of this well-struck half that excels. It is the former Hain-Pogue coin, and joins the Ebsen-Worrell-Hamilton O-109a at the Gem level. In our opinion, the Hain-Pogue O-109b ranks behind only the outstanding Buddy Byers coin among the few Overton-109 examples to reach the Gem or finer grade, regardless of die state.

This piece has the experimental III edge, as does the Byers coin — although there is some confusion about that. In the Byers sale (and in the Pogue catalog) the Byers coin is described as an XXX edge, but we have handled that coin as well, and it has the III edge device. At Gem or finer grades, such technical features are interesting but less important than the sheer beauty and quality of the coin. This wonderful 1809 speaks for itself in that regard, and we expect an appropriately strong result when the lot is called.

*Ex: Stack's, by sale, 1/1990; Hain Family Collection (Stack's, 1/2002), lot 1249; D. Brent Pogue Collection, Part II (Stack's Bowers/Sotheby's, 9/2015), lot 2008; Legend Auctions; the present consignor.*

**Selections from the Jim O'Neal Collection.** NGC ID# 24ES, PCGS# 39388 Base PCGS# 6094

## 1810 Bust Half Dollar, MS64+ Finest-Certified O-104, Early Die State

**3728** 1810 O-104, R.3, MS64+ PCGS. CAC. An impressive example of a surprisingly scarce die marriage, this is the finest-known O-104 regardless of die state. It represents an extremely early die marriage with bold obverse and reverse border details and no evidence of die cracks on either side. Highly lustrous satin surfaces display sky-blue and champagne toning that is evenly dispersed across both sides. The strike is sharp, with star 9 stubbornly flat at its center, as usually seen for the variety.

Some angled die lines extend upward from the eagle's left (facing) wing, occupying the space between the shoulder and neck. A small, smudgelike defect sits on the two top horizontal shield lines, left of the apex, to confirm the reverse die. When we last saw this coin, it was part of the outstanding Hamilton Collection, housed in an old MS63 PCGS holder with a Gold CAC label. It has since received a well-deserved upgrade. Interestingly, the same auction had an O-104a example in an old MS64 NGC holder with CAC. To our knowledge, those two coins have now flip-flopped at the high point of the Condition Census for the die marriage, which tops out at the MS64 level.

**Selections from the Jim O'Neal Collection.** NGC ID# 24ET, PCGS# 39409 Base PCGS# 6095

## 1811/10 O-101 Half Dollar, MS64+ Beautifully Toned, CAC Approved Dramatic Double Profile

**3729** 1811/10 O-101, R.1, MS64+ PCGS. CAC. Resplendent azure-blue and bronze-gold toning combine with smooth, mark-free surfaces for the Choice appeal of this "Punctuated Date" half dollar. Liberty's portrait is dramatically strike-doubled at the nose, lips, chin, and neck. The strike is for the most part razor-sharp, although the left-side stars are without the central definition — a characteristic of the O-101 die pair that helps distinguish it from the similar O-102, which has sharp left-hand stars. Cartwheel mint luster beams brightly across both sides.

Old-time collectors still call this the "18 dot 11" variety, since the overdate lacks all but a few tiny remnants. A sharp spike at the top cap fold is an equally noticeable feature of the variety. CAC-endorsed, this piece ranks at the top of the Condition Census for the O-101 based on Steve Herrman's current listing. Population (both 1811/10 varieties): 10 in 64 (4 in 64+), 1 finer. CAC: 4 in 64, 0 finer (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

**1813 Half Dollar, O-101, 50C/UNI, MS64  
Attractive Multicolor Toning, CAC  
Just One Numerically Finer at PCGS**

**3730** 1813 50 C Over UNI, O-101, R.2, MS64 PCGS. CAC. This popular *Guide Book* variety exhibits a blundered reverse die; the UNI in UNITED was erroneously engraved in place of the denomination and was only partially effaced before 50C was punched in its place. Aqua-blue toning around the obverse rim frames the golden-gray center, while the reverse displays variegated aquamarine, lavender-gray, and violet hues.

The strike is sharp with crisp star definition, and shows machine doubling on Liberty's profile. Both sides display prominent die clashing, with "ear bars" through and below the ear. The few light grazes and tiny marks are scattered over the lustrous surfaces, but they are minuscule and virtually undetectable to the unaided eye. Population: 10 in 64 (1 in 64+), 1 finer. CAC: 1 in 64, 1 finer (2/19).

Ex: New York Signature (Heritage, 7/2004), lot 6457; Eugene H. Gardner Collection / New York Signature (Heritage, 6/2014), lot 30470; the present consignor.

**Selections from the Jim O'Neal Collection.** NGC ID# 24F2, PCGS# 39473 Base PCGS# 6104

**1814/3 O-101a Half Dollar, MS64  
Usual Late Die State, CAC**

**3731** 1814/3 O-101a, R.2, MS64 PCGS. CAC. This late die state example has prominent obverse die cracks and clash marks, plus lighter reverse cracks and die clashing. The obverse cracks extend through the date, and through the stars to the left. The reverse has a delicate crack through the bottoms of UNITED.

A reasonable number of high-grade 1814/3 half dollars exist, invariably from the late die state. The finest early state examples fall in the XF-AU range, while several late die state pieces grade MS64 or finer. All of the early die state O-101 coins are extremely rare. This CAC endorsed late-state O-101a displays excellent satin luster and bold design motifs, with pale gold toning on both sides. We note a single light abrasion between Liberty's back curls and star 12. Population: 5 in 64 (2 in 64+), 1 finer. CAC: 3 in 64, 2 finer (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

## 1814 O-103 Half Dollar, MS66+ Just One Finer at PCGS, CAC Endorsed

**3732 1814 O-103, R.1, MS66+ PCGS. CAC.** Although plentiful, the O-103 variety is rarely seen without die clashing, which soon becomes heavy — especially in the left obverse field. This high-end Premium Gem example shows no die clashing on either side, and it is remarkable for that fact alone. Tall, well-dentilated rims surround smooth, hard surfaces, and the stars are well back from the edge suggesting the earliest of die states. The O-103 strike is a bit blurry at best even on the highest-graded examples, with softness at the ribbon clasp and the right-side stars. The cap folds and drapery lines are seldom crisp.

While the strike is typical here, it is easily forgiven thanks to lovely iridescent toning that colors both sides, bolstered by strong mint luster. A prominent die line between the scroll and the eagle's left (facing) wing confirms the reverse die, while similar die lines exist on the obverse below the bust point. The Steve Herrman census reads 68★, 67, 66+, 66, 66, 66. Population (all 1814 varieties combined): 5 in 66 (2 in 66+), 1 finer. CAC: 4 in 66, 1 finer (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 24F3, PCGS# 39477 Base PCGS# 6105

## 1817 O-106 Half Dollar, MS66 Ex: Earle, Eliasberg, Pogue Splendid 'Comet Head' Example

**3733 1817 O-106, R.2, MS66 PCGS.** It is hard to imagine a more distinguished pedigree than that of George H. Earle Jr., Louis E. Eliasberg Sr., and D. Brent Pogue, and it is equally challenging to improve upon this exceptional example of the interesting O-106 variety. The O-106 die marriage shows the date numerals 81 crowded together, and widely separated from the first and last digits. No other 1817 variety has a similar date configuration. An unmistakable die gouge atop the cap resembles a comet, and easily confirms the variety. The dies clashed early and often, and soon were lapped to create the equally interesting O-106a Single Leaf late die state.

This Premium Gem example was struck from an intermediate die state, with die clashing visible and several diagnostic die cracks in evidence. A few stars are drawn just slightly toward the rim, while the reverse legend shows faint flowlines among the letters. The reverse dentils are slightly weak but complete. Traces of prooflike surface remain on both sides of this splendid coin, with lovely iridescence at the borders and glowing mint luster beneath attractive lilac-gray and translucent gold toning. The coin remains housed in its silver-labeled PCGS holder from the D. Brent Pogue Collection, Part II. No Comet Head example is certified finer at PCGS or NGC (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 4DPL, PCGS# 39498 Base PCGS# 6109

### 1818/7 Small 8 Half Dollar, MS64+ O-102a, Rare This Fine

**3734** 1818/7 Small 8, O-102a, R.2, MS64+ PCGS. CAC. Three of the 15 1818 half dollar die pairings feature the 1818/7 overdate. Overton-101 and O-103 have Large 8 overdates, while O-102 is the sole Small 8 overdate variety. This high-end Choice example is the late die state variant, showing a die break in the upper loop of the second 8.

The coin is sharply struck and vibrantly lustrous. The rims and stars are complete, and the central details are comparably well-defined. A dusting of champagne and aquamarine toning on each side adds to the visual appeal. Uncirculated examples of this variety are rarely offered in any grade. This piece is the sole Plus-graded example at PCGS and carries CAC endorsement. Population: 3 in 64 (1 in 64+), 2 finer. CAC: 2 in 64, 2 finer (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 24FA, PCGS# 39537 Base PCGS# 6114

### 1818 O-112 Half, Richly Toned MS66 Tied for Finest of the Variety

**3735** 1818 O-112, R.1, MS66 PCGS. The Condition Census for Overton-112 tops out at MS66 according to both Stephen Herrman's current listing and the Parsley reference. We recently sold a different MS66 at our 2018 ANA Signature auction (the former Eliasberg-Friend coin) for a record \$27,600. This is another outstanding example of the O-112 die marriage, and an amazing occurrence to handle the two top-of-the-census coins within the past 12 months.

Rich, original patina displays cobalt-blue, reddish-gold, and pearlescent silver hues that blanket both sides, with the lighter shades framed by deep, peripheral colors. Mint luster illuminates the complex hues. A sharp strike exists throughout, witnessed by the sharp stars and crisp folds on Liberty's drapery and cap. Liberty's curls are likewise well-defined. O-112 is an interesting variety, with a cockeyed A in STATES connected to the base of the first T by a die line as if being pulled back in line with the other letters. A bold die crack curves along the lower-left reverse quadrant from beneath the denomination. NGC ID# 24F9, PCGS# 39529 Base PCGS# 6113

**1818 O-112 Half Dollar, MS66**  
**Ex: Eliasberg and Friend Collections**  
**The Finest Known of the Variety**

**3736** 1818 O-112a, R.5, MS66 PCGS. Ex: Eliasberg-Friend. According to Stephen Herrman, this is the finest known 1818 O-112 half dollar of any die state. It shows an intermediate die state that is later than some examples of O-112, but is an earlier strike than the true O-112a late die state that is considered a rarity. The Eliasberg Collection of Capped Bust half dollars was particularly memorable for its considerable number of exceptional coins, including the present Premium Gem that was conservatively graded a little over two decades ago as MS63.

A highly lustrous example, this piece has delicate golden-brown and iridescent toning over virtually flawless surfaces. The central design elements are a trifle shallow at the lower curls and clasp, although the bold peripheral details and a sharp reverse strike compensate.

Ex: George H. Earle Collection (Henry Chapman, 6/1912); John H. Clapp; Clapp Estate; Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1755; Dale Friend Collection of Bust Half Dollars / ANA Signature (Heritage, 8/2018), lot 5132; the present consignor.

**Selections from the Jim O'Neal Collection.** NGC ID# 24F9, PCGS# 39530 Base PCGS# 6113

**1819/8 Half Dollar, MS64**  
**Overton-104, Large 9, CAC**

**3737** 1819/8 Large 9, O-104, R.1, MS64 PCGS. CAC. Lightly toned and attractive, this near-Gem example of the O-104 overdate is always in demand. Rather wild recutting on star 2 — and less-dramatic recutting on star 4 — are the main obverse diagnostics for the variety. On the reverse, the E's lack their upper-left serif. This example is struck from an early die state (as usual), and shows no die crack through the arrowheads that accompanies the scarce late die stage.

As often seen, the central strike is bolder than the peripheries, with some typical weakness on select stars and on PLURIBUS. Dusky gold toning warms each side, ceding to amber-orange border hues on the reverse. The coin is highly lustrous with excellent eye appeal, and there are no distracting abrasions. Based on the most recent report from Stephen Herrman, this exact coin ranks third in the Condition Census for the O-104 variety (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 24FC, PCGS# 39559 Base PCGS# 6119

### 1819 O-112 Half Dollar, MS65 Tied For Finest of the Variety, CAC

**3738** 1819 O-112, R.3, MS65 PCGS. CAC. A Mint-made die line connects the tops of the TE in STATES, a unique pick-up point for the conditionally rare Overton-112. The numerals in the date are more widely spaced than many 1819 varieties. Dappled apple-green and chestnut-gold shades drift over lustrous, pearl-gray surfaces. The strike is bold, and the obverse stars are nearly all pinpoint sharp, save for slight softness on stars 8 and 9. Marks are confined to a few exceedingly minor grazes in the left obverse field. The natural eye appeal is terrific.

Stephen Herrman's Autumn 2018 census lists this coin at the top of the Condition Census for the variety, tied with two other Gem examples. All 1819 halves are rare in Gem or finer conditions, regardless of variety. Population (all non-overdated 1819 varieties combined): 5 in 65 (1 in 65+), 1 finer. CAC: 4 in 65, 1 finer (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 4FXD, PCGS# 39550 Base PCGS# 6117

### 1819 Half Dollar, Amazing MS65+ The Finest O-114 Example Extant

**3739** 1819 O-114, R.3, MS65+ PCGS. This high-end Gem is not only the finest of the O-114 variety — identified by a die line on the eagle's neck feathers — it ranks among the finest 1819 half dollars extant. The only finer non-overdate 1819 half known is the Pogue O-107 example in MS66. The Pogue collection also included two 1819/8 pieces in Premium Gem condition. This important Plus-graded offering should stimulate intense competition when it crosses the block.

Softly frosted mint luster shines through rich tones of autumn-gold, slate-blue, and violet. This high-end Gem is fully struck. Four small ticks appear above the eagle's left wing and head. For the variety, it ranks as the numerically finest-known according to the Steve Herrman listing and it is tied for finest based on the Donald Parsley reference. By way of the Plus designation, it is the finest on the certified population charts. Population (all Normal Date varieties included): 5 in 65 (1 in 65+), 1 finer (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 24FB, PCGS# 39553 Base PCGS# 6117

## 1820/19 O-101 Half Dollar, MS65 Top-of-the-Census Pedigree

**3740** 1820/19 Square Base 2, O-101, R.2, MS65 PCGS. Ex: Eliasberg/Kaufman/Link. The 1820 mintage of 751,122 pieces is lower than that of all other Capped Bust, Lettered Edge issues, with the exception of the 1807 (750,500 pieces struck) and the very scarce 1815/2 (just 47,150 pieces). This example is the exceptional Eliasberg/Kaufman/Link specimen, lightly toned in translucent slate-gray and vibrant gold hues. Attractive steel-blue accents at the borders join amazing cartwheel mint luster that flashes across the smooth and frosted surfaces.

As always in the Bust half series, it is the overdates that attract most of the attention from collectors. Of the two 1820/19 varieties, the Square Base 2 O-101 is the scarcer type overall, yet it offers more high-grade Mint State examples. Leading the way are two Gem Uncirculated coins that historically vie for finest-known of the variety.

The current piece competes at the top of the O-101 Condition Census with the former Suros/Pogue coin, which sold for \$47,000 in Part II of The D. Brent Pogue Collection (Stack's Bowers — Sotheby's, 9/2015). Both coins at one time resided in MS66 NGC holders, and were subsequently reholdered by PCGS — the more deeply toned Pogue specimen as MS65+ PCGS, and this lightly toned coin as MS65 PCGS. Struck from a slightly later die state with a fine crack through the lower pair of olive leaves, we suggest the present example is arguably the better-struck of the two pieces. Razor-sharp definition exists on the obverse motifs and on the eagle's plumage and talons. A few minor ticks and light lines are visible under a loupe. Population (for the O-101 variety): 2 in 65 (1 in 65+), 0 finer (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 24FE, PCGS# 39572 Base PCGS# 6125

## 1822 O-105 Half Dollar, MS65+ Beautiful Strike and Toning

**3741** 1822 O-105, R.3, MS65+ PCGS. This high-end Gem represents the usual early die state variant of O-105, yet it is conditionally rare in the present grade. Although not the finest O-105 half dollar known, this piece is solidly placed in the Condition Census, and any 1822 half dollar in MS65 is a rarity. Only a handful of coins from any die pairing are known finer.

This piece showcases a needle-sharp strike and vibrant mint luster. Rich rose-gold and sea-green hues transition to cerulean-blue before meeting lavender-gray interiors. There are no mentionable abrasions, and eye appeal is outstanding. It is the sole Plus-graded 1822 example at PCGS certified at the MS65 level. Population (all Normal Date varieties included): 11 in 65 (1 in 65+), 5 finer (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 24FG, PCGS# 39590 Base PCGS# 6129

### 1825 Half, Beautifully Toned MS66 None Finer for the O-112 Variety

**3742** 1825 O-112, R.3, MS66 PCGS. The O-112 variety is easily identified by recutting on the 2 in the date and the presence of a vertical die line on the reverse connecting the upper four horizontal shield lines near the right corner. On the reverse, AME in AMERICA are joined at the base. This example is beautifully preserved, with the frosted surfaces remarkably pristine even under magnification. Lovely multicolored peripheral toning surrounds warm golden-gray centers, imparted by an old album. The eagle's talons and the obverse stars show slight weakness (a characteristic we have noticed on all Mint State examples of the variety), but the strike is otherwise sharp.

The result is a truly outstanding coin for the date or type enthusiast. A number of 1825 half dollars are available in grades from MS62 through MS64, but at the Gem level the date becomes conditionally rare. The currently offered Premium Gem is tied with seven others (two MS66+ coins) as the finest at PCGS, regardless of die variety; at NGC, there are eight coins in this grade with four MS67 pieces certified finer (2/19). Among examples of the O-112 variety, there are none finer.

**Selections from the Jim O'Neal Collection.** NGC ID# 24FL, PCGS# 39659 Base PCGS# 6142

### 1826 O-104 Bust Half, MS66 Intermediate Die State Frosted Champagne Luster, CAC

**3743** 1826 O-104, R.3, MS66 PCGS. CAC. This highly attractive Premium Gem is an intermediate die state between O-104 and O-104a, with a reverse die crack beneath the denomination and arrowheads, but no evidence of the other reverse die crack through the base of ERICA. Apparently examples with the single reverse crack, which must be designated as O-104, are plentiful, while those with both cracks can be called O-104a, and they are quite rare.

A distinctive feature of the reverse die is the horizontal crossbars in the shield that pass over the left shield border. Most reverse dies with crossbars extending to the left facing wing have those crossbars passing under the shield border. This delightful example has frosty champagne luster across brilliant silver surfaces with splashes of gold and blue peripheral toning. For the O-104 variety, it is tied as the finest certified in Stephen Herrman's Autumn, 2018 census. Population for all 1826 varieties: 9 in 66, 3 finer (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 24FM, PCGS# 39670 Base PCGS# 6143

## 1826 Half Dollar, Outstanding MS66 Finest Certified of the O-114 Die Pair

**3744 1826 O-114, High R.4, MS66 PCGS.** A challenging die pair in all grades and die states, the O-114 — and the rare O-114' — are not listed higher than MS65 in the current Steve Herrman revision (Autumn, 2018), nor does an example exceed MS65 in the Parsley reference. Yet here is a splendid MS66 example, beautifully toned in classic album-infused shades of deep blue at the borders, ceding to pearlescent gold at the centers, with deep and abiding mint luster throughout both sides.

Seldom available in grades above About Uncirculated, the O-114 die marriage is rarely seen in any die state. The “prime” state with sharp obverse stars and no trace of filling of the upper N in UNITED is especially rare. This coin represents a more advanced die stage than the earliest strikes, with the upper stars rather flat, and all of the stars drawn to the edge. The N in UNITED is slightly filled along its upper portion into the nook where the diagonal meets its upright. An angled die line inside the upper shield sits close to a nearby die dot. This coin is the finest O-114 graded at PCGS by two points, and none are finer at NGC (3/19). NGC ID# 24FM, PCGS# 39685 Base PCGS# 6143

## 1827/6 Half Dollar, Beautiful MS66 O-102, Ex: Pogue Collection, CAC

**3745 1827/6 O-102, R.1, MS66 PCGS. CAC.** Struck from an early state of the dies, and infinitely more desirable with a bold underdigit, this resplendent 1827/6 is tied with one other example for the finest O-102 certified. Amazingly, both coins were included in the D. Brent Pogue Collection, Part III auction. This coin is perhaps the more aesthetically pleasing of the two (depending on one's individual preferences, because both are spectacular). A vibrant frame of golden toning at the margins surrounds frosted lilac-gray centers, punctuated with red, amber-orange, and violet accents. Three 1827/6 varieties exist among the 49 different die marriages for 1827 halves — O-101, O-102, and O-103. The O-103 variety is by far the rarest, with O-101 and O-102 of about equal scarcity. At the MS66 grade level, all are rare.

Most collectors opt for either an O-101 or O-102 to represent the overdate, since the outline of a remnant 6 is clearer on those varieties and high-grade pieces are more available. This coin is well-struck, with only slight weakness at the cap folds, and stars 7 to 13 lack full details at their centers. The milling blurs only slightly on this high-grade example. A few tiny marks exist near Liberty's ear and above the eagle's head are visible with a loupe. Population (all 1827/6 varieties combined): 4 in 66 (1 in 66+), 0 finer (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 24FP, PCGS# 39752 Base PCGS# 6147

### 1829/7 Bust Half, Lavishly Toned MS65 O-101, Guide Book Variety, CAC

**3746** 1829/7 O-101, R.1, MS65 PCGS. CAC. Recutting shows on all four digits in the date, with the overdate marked by remnants of the bases of the original 27 beneath the subsequent 29. This obverse is paired with a reverse die showing a long, curved flag atop the 5 in the denomination — one of three uses in the year, along with O-106 and O-107. The reverse die is not yet far enough along in die lapping to diagnose the later O-101a state.

This is a splendid Gem of this available but popular overdate, lavishly toned in stunning hues. Both sides display concentric rings of amber and sky-blue near the rims, bounding centers that offer rose, gold, and lilac color. Population (all 1829/7 varieties): 6 in 65 (1 in 65+), 1 finer. CAC: 6 in 65, 2 finer (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 24FT, PCGS# 39807 Base PCGS# 6155

### 1829 O-115 Capped Bust Half Album-Toned Gem, CAC-Endorsed

**3747** 1829 Small Letters, O-115, R.1, MS65 PCGS. CAC. This MS65 example is among the finest known of the variety with pleasing, turquoise-blue margins merging into reddish-gold hues and silver-gold centers on both sides of the coin. Clean, unabraded fields surround well-struck central devices, with the eagle especially bold and Liberty's hair fully defined. Steve Herman's Autumn 2018 report shows this coin tied for second behind a single MS66 example in the Condition Census.

The O-115 variety is identified by sharp stars cut close to the milling and by Star 7 pointing to the lower-half junction of the curl and headband. On the reverse, the shield extends into arrow feathers at the bottom and the lower-most arrowhead is recut near the shaft. A pair of pincer-like tines is visible at the tip of the branch stem above "C." Population (all non-overdate varieties): 29 in 65 (5 in 65+), 4 finer. CAC: 11 in 65, 2 finer (4/17).

*Ex: ANA National Money Show Signature (Heritage, 2/2014), lot 3904; Long Beach Signature (Heritage, 6/2017), lot 3661, which realized \$22,325.*

**Selections from the Jim O'Neal Collection.** NGC ID# 24FS, PCGS# 39800 Base PCGS# 6154

## REEDED EDGE HALF DOLLARS

### 1830 O-123 Half Dollar, Brilliant MS65+ Large 0, Frosty and Lustrous

**3748** 1830 Large 0, O-123, R.1, MS65+ PCGS. CAC. Several of the horizontal shield lines (the azure) extend well into the feathers beyond the right shield border, a characteristic of O-122, although the other diagnostics all point to O-123 as the correct variety for this mostly brilliant and frosty Gem coin. Both the left-side and right-side stars are sharp on the obverse, and the Large 0 leans left toward the 3 in the date. This coin ranks at the low end of the Condition Census according to Steve Herrman's current analysis and the Parsley reference. Population (all Large 0 varieties included): 8 in 65 (1 in 65+), 3 finer (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 24FU, PCGS# 39834 Base PCGS# 6157

### 1837 Reeded Edge Half, MS65 GR-22, Lustrous CAC Example

**3749** 1837 GR-22, R.2, MS65 PCGS. CAC. According to Walter Breen, the steam press had been the goal of Mint directors since 1797, but "for a variety of reasons, no foundry in the USA could build a steam coinage press until 1836." Actually, Thonnelier invented the press sought by the Mint in France. Philadelphians Merrick, Agnew, and Tyler imported the press in 1836. Franklin Peale of the U.S. Mint made improvements to the equipment, and after a limited trial mintage in 1836, more than 3.6 million half dollars were struck in 1837.

It is likely a number of these pieces were set aside by collectors, as several dozen 1837 Reeded Edge halves are known today in Gem and better grades. This Gem piece has the sharp strike one would expect from the closely monitored early operation of the new steam press, although it is less sharp at the top of Liberty's cap and surrounding stars, and incomplete at CE of CENTS on the reverse. The coin displays lovely, variegated toning on each side with rich, softly frosted mint luster. A tight frame of blue toning encircles the reverse, while a dappling of the same blue covers the obverse. Population (all varieties): 19 in 65 (3 in 65+), 10 finer. CAC: 16 in 65, 6 finer (2/19). Ex: FUN Signature (Heritage, 1/2009), lot 3850, which brought \$18,400.

**Selections from the Jim O'Neal Collection.** NGC ID# 24G4, PCGS# 531071 Base PCGS# 6176

## SEATED HALF DOLLARS

### 1839 GR-7 Bust Half, MS65 Colorfully Toned, Early Die State

**3750** 1839 Large Letters, GR-7, R.1, MS65 PCGS. Among the eight 1839 varieties identified by Dick Graham in his Reeded Edge halves reference, GR-7 is the most-available die marriage, but it is almost always seen in lesser grades — as are all 1839 Reeded Edge halves. Gem or finer coins are equally rare (or rarer) than the 1839-O, and only one coin is certified finer than the handful of Gem coins available from all varieties combined.

This is a splendidly toned Gem, struck from an early die state with a diagnostic die line above Liberty's eye that extends from the hair. Prominent die lumps below the bust tip and above the bust fade in later die states, but they are prominent on this coin. Sharply struck with thick mint frost, the surfaces display colorful iridescence that glows from both sides. Pale-blue and golden hues predominate, with subtle colors visible throughout the pearlescent fields and sharply struck devices. This example is tied at the top of the Dick Graham Condition Census for the GR-7 variety. Population (all varieties combined): 5 in 65 (1 in 65+), 1 finer (2/19).

**Selections from the Jim O'Neal Collection.** NGC ID# 24G6, PCGS# 531104 Base PCGS# 6179

### 1861 Seated Liberty Half Dollar, MS66+ Tied for Finest at PCGS

**3751** 1861 MS66+ PCGS. CAC. WB-101. Beautiful satiny mint luster complements surfaces that are silver-white in the center before ceding to soft, pastel lilac, lavender, and ice-blue near the rims on each side. The strike is well-impressed, showing bold to full centers on each side and good definition on Liberty's gown lines, head, face, and the rock as well as all reverse details. A pair of reeding marks show on Liberty's lower right leg but are not overt. A subtle peripheral die crack on the reverse connects a pair of olive leaves and the bottoms of HALF DOL. Despite the large mintage for the 1861 half dollars exceeding 2.8 million coins, examples in Gem or Premium Gem grades are quite elusive. Population: 21 in 66 (4 in 66+), 0 finer. CAC: 12 in 66, 0 finer (3/19). NGC ID# 24J7, PCGS# 6302 Base PCGS# 6302

**1887 Half Dollar, MS67  
Only 5,000 Coins Struck  
Tied for Finest Certified, CAC Endorsed**

**3752 1887 WB-101 MS67 PCGS. CAC.** Despite consistently low mintages throughout the 1880s, Uncirculated half dollars were set aside speculatively by collectors and dealers with an eye toward future profit. Such is the case for the 5,000 coins struck in 1887. Examples can be found with little trouble through near-Gem condition. Only in MS65 does the issue become rare, and the numerically finest coins top out at MS67 at both PCGS and NGC.

Eugene Gardner called the 1880-era halves “eye candy,” and had one other MS67 example of the 1887, which realized \$24,675 as lot 30524 in our sale of the first installment of his collection in June 2014. This is a different coin with the Gardner pedigree, equally impressive, that displays uniform blue and rose toning on the obverse, with significant rose and green concentric color on the reverse. The surfaces show prooflikeness at the margins, tempered somewhat by the attractive toning that blankets each side. The strike is sharp overall, with a bit of weakness at Liberty’s top hair strands and the flanking stars. Three tiny marks exist near star 11, visible with magnification, although the fields are otherwise pristine. Beautiful, overtly original surfaces with unsurpassed preservation make this a must-have piece for advanced collectors and Registry specialists.

*Ex: Larry Whitlow (1/2004); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98709.*

**Selections from the Jim O’Neal Collection.** NGC ID# 24L2, PCGS# 572272 Base PCGS# 6369

## BARBER HALF DOLLAR

### 1892-O Half Dollar, Specimen 66 ★ First Year of Issue

#### Very Rare Branch Mint Proof Striking

**3753 1892-O SP66 ★ NGC.** When Walter Breen compiled his definitive study of proof coinage in 1977 (updated in 1989), he included chapters covering branch mint proofs struck in New Orleans, San Francisco, Carson City, and Denver. Among New Orleans pieces were the 1895-O and 1898-O half dollars, the only two dates of the Barber half dollar series that he identified as proofs. Breen wrote: "Many of the employees of branch mints went to them from Philadelphia where they would have learned the techniques for making proofs. Any branch mint could have struck proofs, though there is no evidence that Charlotte or Dahlonega actually did. Facilities for buffing dies, strip, or blanks certainly existed, or could be improvised, and the trick of replacing a coin onto the lower die within the collar was well known." Authentication as a true branch mint proof, according to Breen, was the same as for Philadelphia Mint proofs.

The New Orleans Mint operated from 1838 until 1861, when it was closed at the beginning of the Civil War. During that period, numerous proofs were coined, beginning with the famous 1838-O half dollar. After the Mint reopened in 1879, a smaller number of branch mint proofs were produced, mostly Morgan dollars.

Among Barber half dollars, a few amazing prooflike examples appeared in the Eliasberg Collection, including an 1892-O of nearly equal quality to the present piece and an 1897-O of undeniable beauty. The existence of two similar quality 1892-O half dollars actually seems to lend credence to the possibility of these pieces being intentional branch mint proofs. They were also the first Barber half dollars, and the first half dollars struck in New Orleans since 1861. Discussing the Eliasberg coin, Dave Bowers wrote: "It is not difficult to envision a scenario in which on the first day of striking this new design at the New Orleans Mint some special pieces were made for presentation."

This example was clearly minted with great care. The planchet was undoubtedly polished to a highly mirrored finish, and the dies also show some evidence of polishing or special preparation. The nearly perfect strike shows weakness only at the junction of the right shield edge and the wing, and on the right (facing) claw and arrow feathers. Nearly identical weakness can be seen in the plate of the Eliasberg coin, further indicating that the two pieces were probably struck at the same time. The obverse die is perfect, while a few faint die cracks are barely visible on the reverse. Such die cracks may suggest that the coin was struck after initial examples from the die pair, although another possibility is that the die actually cracked before it was used to strike any coins. Slight evidence of a double strike, especially on a few reverse letters, lends further support to the branch mint proof hypothesis.

The obverse and reverse surfaces of this piece are clearly different than any other 1892-O half dollar that we have seen, again with the exception of the Eliasberg coin, and differ from any other Barber half dollar except the proofs. The coin is brilliant throughout, and the absence of color makes the finish of this piece accessible to all who view it. The fields are deep and shimmer with mirrorlike intensity, once again unlike the finish on any Barber half except a proof. The devices are frosted and, in fact, a Cameo designation would easily be justified.

Certified as a Specimen by NGC, there is ample evidence to suggest that this special half dollar was intentionally struck for a special purpose, probably as a branch mint proof.

*Ex: Central States Signature (Heritage, 4/2008), lot 2322; Central States Signature (Heritage, 4-5/2009), lot 2489; Central States Signature (Heritage, 4/2013), lot 4291, where it brought \$108,687.50. NGC ID# 27UW, PCGS# 6462*

## WALKING LIBERTY HALF DOLLARS

### 1919-S Half Dollar, Frosty MS65 Rarely Offered Finer

**3754 1919-S MS65 PCGS.** The 1919-D is a famous series condition rarity at the Gem grade level, almost uncollectible finer. Its San Francisco counterpart — offered here — is somewhat more plentiful by comparison, but it is itself a scarce date in this grade. Finer 1919-S half dollars are rarely offered. In fact, among all issues in the series, the 1919-S Walking Liberty half dollar is consistently one of the most difficult dates to locate with Gem surfaces. This piece fits the grade perfectly. Frosty, unabraded mint luster yields a tinge of golden color overall and produces a vibrant cartwheel effect. The usual strike weakness is noted on Liberty's branch hand and the eagle's trailing leg. Population: 42 in 65 (3 in 65+), 13 finer (3/19). NGC ID# 24R2, PCGS# 6579

### 1934-S Half Dollar, MS67 ★ Tied for the Finest Certified

**3755 1934-S MS67★ NGC.** PCGS has certified 10 examples in MS67, and NGC has certified eight at the same grade level. However, only this piece and one other have earned the coveted NGC Star (★) designation for exceptional eye appeal. Both sides exhibit brilliant silver luster at the centers, gradually changing to lovely gold, blue, and violet near the borders. The strike is slightly weak, yet the thumb at the center of the obverse is outlined. The surfaces are virtually flawless and the eye appeal is impressive. Census: 8 in 67 (2 in 67★), 0 finer (2/19). NGC ID# 24RH, PCGS# 6594

## PROOF WALKING LIBERTY HALF DOLLAR

### 1936 Half Dollar, Toned PR67+ Rare Registry-Grade Example

**3756** 1936 PR67+ PCGS. CAC. The Mint struck proof 1936 Walking Liberty half dollars only from 1936 to 1942, the first year being the lowest-mintage of the series at just 3,901 pieces. In Superb Gem condition, the 1936 is the rarest proof Walker. This piece is both Plus-graded and CAC-endorsed, earning it high marks for quality and eye appeal. Each side displays vivid multicolor border toning around lavender and champagne-tinted interiors. The mirroring is deep in the fields, and the satiny devices show sharp definition. PCGS and NGC each report only a single finer representative. Population: 58 in 67 (6 in 67+), 1 finer. CAC: 28 in 67, 1 finer (3/19). NGC ID# 27V4, PCGS# 6636

## FRANKLIN HALF DOLLARS

### 1952-D Franklin, MS67 Full Bell Lines Beautiful Luster and Toning The Finest PCGS Coin We Have Seen

**3757** 1952-D MS67 Full Bell Lines PCGS. Registry Set collectors will take note of this remarkable Franklin half dollar, as it represents the finest quality available for the 1952-D. PCGS and NGC combined list only seven MS67 Full Bell Lines representatives with none finer; a trio of MS67 coins without sharp bell lines is also reported at NGC, although no PCGS coins are comparable (2/19). In a PCGS holder, this piece will be of special importance for Franklin half dollar specialists. We have never before offered a PCGS coin in this grade, and we have only seen one of the NGC coins.

This piece is every bit a Superb Gem, showing frosty mint luster that is devoid of abrasions. Beautiful original toning on the obverse spans shades of sun-gold, crimson, forest-green, and russet, leaving the reverse with a delicate champagne tint that deepens around the borders. Population: 5 in 67 Full Bell Lines, 0 finer (2/19). NGC ID# 24T4, PCGS# 86662

## PROOF FRANKLIN HALF DOLLAR

### 1961 Franklin Half Dollar, MS66+ Registry Grade Full Bell Lines Example

**3758** 1961 MS66+ Full Bell Lines PCGS. CAC. At one time halves from the early 1960s were considered common and little thought was given to them. Then the Franklin half market began to develop in earnest, and these “common” coins were found to be anything but common in high grade and with Full Bell Lines. The present coin is a Plus-graded Premium Gem, with sharply detailed design elements and full definition on the bell lines. The virtually pristine, brilliant surfaces radiate vibrant mint luster throughout. Overall eye appeal is terrific. Population: 22 in 66 (3 in 66+) Full Bell Lines, 0 finer. CAC: 5 in 66, 0 finer (3/19). NGC ID# 24TN, PCGS# 86680

### 1951 Half Dollar, PR67 Deep Cameo Registry-Grade Condition Rarity

**3759** 1951 PR67 Deep Cameo PCGS. The vast majority of proof 1951 Franklin halves lack measurable cameo contrast, and only 64 coins in all numeric grades qualify for a Deep Cameo designation at PCGS. This piece is one of the three finest among that small population. Entirely brilliant, the surfaces show liquidlike mirroring in the fields with satiny, frost-white luster on the devices. The preservation is spectacular. Struck from fresh proof dies, as faint die polish lines (mint-made) are still visible with a loupe on the bell and on Franklin's portrait. Population: 3 in 67 (1 in 67+) Deep Cameo, 0 finer (2/19). NGC ID# 27VB, PCGS# 96692

## SMS KENNEDY HALF DOLLAR

### 1964 SMS Kennedy Half, SP67 Only About a Dozen Pieces Known A Magnificent Series Rarity

**3760 1964 SMS SP67 PCGS.** Certified by PCGS as a 1964 “SMS” Kennedy half dollar, this coin represents the rarest issue by far in the series. There has been much debate regarding whether or not these coins were originally issued in special sets, since they were never in any form of special Mint packaging, and official Special Mint Sets were not issued until 1965. “Sets” of 1964 coins, including special strikes of the cent through half dollar, first began appearing in Stack’s sales in the early 1990s. It is believed that most of those sets came from New York coin dealer Lester Merkin.

The 1964 SMS Kennedy half dollar is struck on a 90% silver planchet, from a single pair of dies, showing much sharper detail than the regular issue and having a satiny surface texture. Die markers include: on the obverse, a tiny apostrophe-shaped lump of extra metal protruding from the bottom edge of the crosslet of the 4 in the date; on the reverse, a discernible die polishing line connecting the bottom tip of the lower crossbar of the (O)F to the A(MERICA), and another connecting the same crossbar of the (HAL)F to the rim near the D(OLLAR). This Superb Gem example exhibits all of those markers clearly. It is one of only about a dozen pieces known. Our detailed roster includes just 11 confirmed entries, plus a few additional appearances that may or may not represent additional coins. This piece displays luminous satin surfaces with near-flawless preservation, complementing needle-sharp definition on the devices. The obverse displays a dusting of lilac-gray and pale champagne toning, while the reverse is essentially brilliant. A beautiful example of the king of Kennedy half dollars. We last sold an example of this issue in the Long Beach Signature (Heritage, 9/2016), lot 5545 — the Bristol Collection coin — which realized \$47,000. This is a must-have item for the advanced Kennedy half specialist and Registry Set collector.

*From a complete five-piece set of 1964 SMS coinage, cent through half dollar, offered in this sale as individual lots. NGC ID# 27WH, PCGS# 6844*

## EARLY DOLLARS

**1797 10x6 Stars Dollar, AU50**  
**B-3, BB-71, Large Letters**

**3761** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, AU50 PCGS. Bowers Die State III. The die state is intriguing on this piece. The right-side wreath leaves are lightly lapped at the edge, typically consistent with Die State III, however, on the obverse, the hair curl beneath the B in LIBERTY is only lightly lapped, if at all, appearing more complete than usual for the late die state. This About Uncirculated coin has little wear and displays consistent slate-gray patina with daubs of amber and blue toning amid the wreath. Strike weakness affects the left-hand stars on the obverse, but there are no visible adjustment marks.

BB-71 is a *Guide Book* variety, the only 1797 die pair with the 10x6 star orientation on the obverse. A total of three die pairs were used for coins of this date. Mint delivery figures for 1797 include only 7,776 coins, a tiny fraction of the more than 327,000 silver dollars that would be struck during the following calendar year. This coin is housed in a green label holder. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

**1799/8 Draped Bust Dollar, MS64+  
15 Stars Reverse, B-3, BB-141  
Sole Finest Graded**

**3762** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, MS64+ NGC. Bowers Die State IV. The 1799/8 B-3, BB-141 die marriage is one of six major types required for a complete set of *Guide Book* varieties. The underdigit 8 is clearly visible beneath the second 9. The 15 Stars reverse die has seven stars in the top row, six in the second, and two in the third. The end stars in the top row are mostly hidden beneath enlarged clouds that the engraver expanded to cover his embarrassing mistake. All Heraldic Eagle silver dollars from 1798 through 1804 display 13 stars on each side with a single exception: this reverse die used for 1799/8 B-3, BB-141 and 1799 B-4, BB-153.

Die state analysis allows us to determine sequencing of the BB-141 and BB-153 varieties. This is the latest die state seen for the B-3, BB-141 die marriage. The reverse has several peripheral cracks, including a terminal one below the left upright of the M to the right (facing) wing that do not appear on BB-153 representatives, proving that this overdate was struck after the Normal Date 1799 B-4, BB-153 die variety.

Even more significant, this is the finest known 1799/8 15 Stars Reverse dollar. The 1993 Bowers-Borckardt *Silver Dollar Encyclopedia* recorded an MS64, three MS63s, and 10 MS60s under Notable Specimens. The 2013 *Encyclopedia* shortened and modified the list to two MS64s and four MS63s. A more up-to-date roster includes this MS64+ representative, followed by three near-Gems and a similar number of Select Uncirculated survivors (2/19).

Both sides of this spectacular Draped Bust dollar exhibit frosty mint luster beneath splashes of mottled blue, violet and golden patina. Hints of lime-green and strawberry-red patina are further apparent under magnification. The right obverse field shows faint evidence of die sinking, with some indistinct details at the opposing point on the reverse. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

## SEATED DOLLAR

**1800 B-12, BB-184 Dollar, MS62**  
**Condition Census Example**

**3763 1800 B-12, BB-184, R.3, MS62 NGC.** “Bowers Die State III.” An unlisted die state with UNITED clashed along the left-side stars. BB-184 shows doubling on the R in LIBERTY and a defect on the E in AMERICA. In 1800, the reported silver dollar mintage amounted to 220,920 coins, and 16 die pairs have been identified. Production quality is better for this year than previous ones, with survivors showing fewer adjustment marks and better strike definition on average. Nevertheless, Mint State representatives are rare with 46 total Uncirculated submissions at NGC and PCGS combined for all 1800 dollars, regardless of variety. Probably multiple duplications are included in those figures. Bowers lists a single MS63 example finer than this piece on his Condition Census for the BB-184 die marriage, though no MS62 is included.

This is a lightly toned example with pinpoint sharpness around the borders. The central devices are just a touch incomplete and have some high-point contact that limits the grade. Antique golden-gray patina graces each side without limiting or subduing the partial mint luster that remains. Perfectly centered and void of mint-made adjustment marks. NGC ID# 24X9, PCGS# 40070 Base PCGS# 6887

**1870-CC Silver Dollar, MS62**  
**Prooflike Fields, Splendid Eye Appeal**

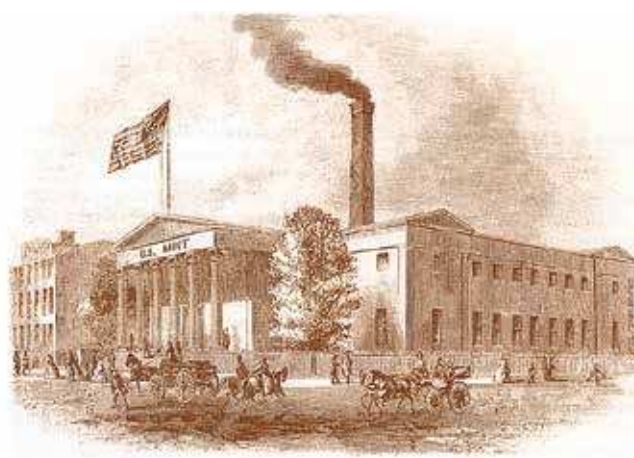

**3764 1870-CC MS62 PCGS. OC-9, Low R.4.** Osburn-Cushing Die State a/a. To think that 12,462 silver dollars would require nine die pairs seems to fail the “reasonability test,” even if it was the first year of operations at the Carson City Mint. It stands to reason that coins were struck on multiple occasions throughout the year, rather than in a single production run. With each brief striking period, dies appear to have been freshly polished and the planchets may have been polished as well, since nearly all 1870-CC dollars show signs of careful mintage. The few Uncirculated pieces that exist are nearly always prooflike, and any example certified MS62 or finer tends to be a showpiece.

According to the 2018 Osburn-Cushing reference, the present example comes from the final die pair in the emission sequence. Neither the obverse nor the reverse die was used on any other variety for the year. Attractive dappled-gold toning covers the reflective silver surfaces, with only a few tiny handling marks and a crisp strike throughout. The reverse is narrowly strike doubled, visible at the olive leaves and legends. This is an exceptionally pleasing example of the rare first-year issue, sure to bring strong bids from multiple Seated dollar enthusiasts and Carson City specialists. Population: 8 in 62, 8 finer (3/19). NGC ID# 24ZE, PCGS# 6964

## PROOF SEATED DOLLAR

---

### 1860 Seated Dollar, PR65 Cameo CAC-Endorsed Brilliant Proof

**3765** 1860 PR65 Cameo PCGS. CAC. OC-P1, R.2. Scarce and often underrated as a circulation strike, the 1860 Seated dollar proofs are equally challenging in Gem or finer grades. A single set of proof dies was later used for some circulation strikes, a source of confusion between the two formats. PCGS has identified this coin as a proof, and it is indeed struck from the only proof dies. The strike is sharp but not full, with slight weakness of the upper hair strands on Liberty's head and some rounding on stars 4 to 6.

Visually, the coin is a hands-down Gem proof, with glassy-mirrored fields and frosted devices for strong cameo contrast. A curious depression crosses the eagle's beak, apparently a strike-through (surely seen by PCGS but not mentioned), and there is a thin, short abrasion through the first S in STATES. The coin is brilliant throughout both sides with flashy fields and outstanding eye appeal. CAC endorsement adds an additional level of approval. NGC ID# 252E, PCGS# 87003

## TRADE DOLLARS

### 1877-CC Trade Dollar, MS65 High Condition Census Rarity

**3766 1877-CC MS65 NGC.** The Trade dollar was a success in the Orient, particularly with China, which by 1877 preferred the U.S. dollar over the long-prestigious Mexican dollar. Foreign demand for Trade dollars from San Francisco averaged over 687,000 coins per month, and occasionally far more. The *Mint Director's Annual Report* of 1877, stated in part:

"On the first of October last there were several hundred thousand Mexican dollars held by bankers in San Francisco. One of these bankers telegraphed to London asking the price at which Mexican dollars could be sold in that city, and received an answer that there was no demand for that coin for export, and it was being used for melting purposes. At the same time the Chinese residents in San Francisco were paying for trade-dollars 2 per cent above the price of Mexican dollars in London, both coins being nearly equal in intrinsic value. This shows a decided preference for the trade-dollar."

The newfound prestige of the Trade dollar with Chinese trade ports was rooted in the heavy silver weight of the coins, which exceeded the equivalent in U.S. subsidiary coinage by about 8.5%. This made the coins highly competitive with the Mexican dollar but unsuitable for domestic circulation. The *Annual Report* stated:

"The trade-dollar has of late entered to some extent into domestic circulation, and this for the reason that, from time to time since United States notes have appreciated nearly to par with gold, holders of silver bullion have been able to have the same manufactured into these coins, and exchange them at par for United States notes with a small profit. This fact, on becoming known, was regarded as indicating that the trade-dollar coinage was, for the time being (October last) in excess of the export demand, and led to the issuing of an order by the Secretary of the Treasury to temporarily intermit the receipt of deposits at the mints for these coins."

Trade dollar coinage at Carson City in 1877 amounted to 534,000 pieces, intended solely for export according to the law. Many were exported, but some domestic circulation occurred, supplying a number of worn coins for numismatists to acquire today. Numerous chopmarked pieces exist, having survived a trip to China in the 19th century without being melted, which was the fate of most exported dollars.

Where the 1877-CC Trade dollar becomes a collecting challenge is in Mint State, particularly above MS63 where it is genuinely rare. The Condition Census includes three coins — this MS65 NGC example, a numerically equal PCGS coin, and a Premium Gem PCGS coin (3/19). The MS66 has never appeared at auction. The MS65 PCGS coin appeared twice, first in the Dallas Signature (Heritage, 11/2005), lot 2267, where it realized \$69,000, and second in the recent FUN Signature (Heritage, 1/2019), lot 4537, where it realized a record price for the issue of \$78,000.

This remarkable example has satiny luster that displays uniform lavender-gray and champagne hues with no distracting abrasions. There are no areas of notable strike weakness, and eye appeal is pleasing. This is one of only a handful of high-end 1877-CC Trade dollars that managed to escape both export to China and domestic circulation. It may be years before an example of similar quality again appears at auction. NGC ID# 253D, PCGS# 7045

## PROOF TRADE DOLLAR

**1880 Trade Dollar, PR66  
Rare Deep Cameo Example**

**3767 1880 PR66 Deep Cameo PCGS.** Demand was high for the proof-only Trade dollar issue of 1880, sparked by a substantial speculation in the denomination that began the year before when no business-strike Trade dollars were struck at the Philadelphia Mint. Accordingly, a series-record mintage of 1,987 proof Trade dollars was accomplished that year, to satisfy collector demand. Despite the generous production total, relatively few examples have survived with Deep Cameo surfaces. This delightful Premium Gem offers razor-sharp definition on all design elements and the deeply mirrored fields contrast profoundly with the richly frosted devices. The mostly brilliant surfaces are impeccably preserved, with a few hints of pale gold and lavender toning. Eye appeal is terrific. Population: 2 in 66 Deep Cameo, 2 finer (3/19). NGC ID# 27YS, PCGS# 97060

## MORGAN DOLLARS

**1879 Morgan Dollar, MS65+  
Cameo-Contrasted Deep Mirror Prooflike**

**3768 1879 MS65+ Deep Mirror Prooflike PCGS. CAC.** The 1879 has long been a plentiful issue among Morgan dollars, even before the Treasury releases of the early 1960s. Nonetheless, its availability declines significant in Gem and finer condition. Examples are rarely seen in these grades with reflective fields. PCGS reports only a dozen Gem and finer Deep Mirror Prooflike coins, which are sought-after as Registry coins. This CAC-endorsed, Plus-graded example displays stark cameo contrast and sharp central definition. Liberty's cheek is clean and the fields show only the most microscopic grazes. No toning impedes the outstanding surfaces. Population: 10 in 65 (2 in 65+) Deep Mirror Prooflike, 2 finer. CAC: 2 in 65, 0 finer (1/19).

**From The Perfection Collection of DMPL/Prooflike Morgan Dollars.**  
NGC ID# 56ZE, PCGS# 97085

## 1879-CC Morgan Dollar, MS65 Semikey Carson City Morgan

**3769 1879-CC MS65 PCGS.** The 1879-CC Morgan dollar is perhaps most famous for the “Capped Die” variety that represents a significant portion of the survivorship. However, as a date, this is the second-rarest Carson City Morgan in high grade. The 1879-CC emerges as a true condition rarity in MS65, where a population of 150 coins at PCGS, including possible resubmissions, is but a tiny fraction of the coins in this grade for other CC-mint dates. Moreover, PCGS lists a paltry six finer coins (2/19), which most collectors will find out of reach, even if they can be located.

This lustrous Gem displays untoned surfaces and semiprooflike fields. The devices are frosty with only trivial surface grazes. Minor strike weakness on the hair above Liberty’s ear is typical of the issue. NGC ID# 253U, PCGS# 7086

## 1879-CC Silver Dollar, MS64+ Capped Die

**3770 1879-CC Capped Die, VAM-3, MS64+ PCGS. CAC.** A Top 100 Variety. The Capped Die 1879-CC Morgan dollar is, in reality, a Large over Over Mintmark variety. The area of the CC mintmark shows die tooling in an attempt to remove the undersized CC before punching the proper size mintmark. While everyone turns their attention to the reverse, examination of the obverse is also important as the 1 and 8 in the date show strong doubling above those digits. This Choice Mint State representative has brilliant and frosty silver luster with strong design definition. Both sides of this dollar are untuned. PCGS has only certified 28 examples as MS64+, and only 15 finer (3/19). NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

### 1880/79-CC Reverse of 1878 Dollar VAM-4, MS67, Tied for Finest Certified

**3771** 1880/79-CC Reverse of 1878, VAM-4, Top 100, MS67 NGC. The downstroke of the 7 is clear in the lower loop of the second 8 in the date. The 9 underdigit was apparently irregularly polished and what remains in the top of the 0 in the date does not necessarily resemble a 9, but of course, it could not be anything else. This overdated obverse was combined with the Flat Breast reverse, leftover from two years previously. Reverse of '78 dollars are uncommon in high grades and this piece is at the pinnacle of preservation. The all-brilliant surfaces are highly lustrous and free from any mentionable abrasions. Sharply struck throughout. Census: 2 in 67, 0 finer (2/19). NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

### 1881-CC VAM-2 Dollar MS67 Deep Mirror Prooflike Carson City Trophy Coin

**3772** 1881-CC MS67 Deep Mirror Prooflike NGC. VAM-2. This is an absolute trophy coin — a must-have for an advanced collector putting together a set of top-pop Morgans. The 1881-CC is a plentiful Carson City issue, with half of the 296,000 coins minted held in storage until the 1970s. Ten of thousands of uncontrasted business strikes are graded, but Deep Mirror Prooflike coins total in the hundreds. This spectacular Superb Gem is one of three top-graded examples at NGC, tied with two others at PCGS.

Aside for some lightness around the borders, where faint roller marks appear, both sides are strongly defined with complete detail over the centers. A thick covering of frost over the motifs produces stark contrast against the reflective, unabraded mirrors. NGC ID# 2547, PCGS# 97127

## 1884-CC Dollar, MS67 Deep Prooflike Unsurpassed Carson City Rarity

**3773 1884-CC MS67 Deep Prooflike NGC.** Most 1884-CC silver dollars went straight into storage, and were not released in any quantity until the 1950s. It was not until the GSA releases in the 1970s that the full extent of the government's stockpile of 1884-CC dollars was clear — nearly 85% of the 1.1 million-piece mintage was included in the sales, with more than 80% of those in Uncirculated conditions. In the February, 1980 release alone, 428,000 pieces were sold.

Despite the massive influx, the 1884-CC issue was (and still is) in strong demand. Available in most Mint State grades, it is truly rare only in MS67 or finer grades, and extremely rare in MS67 Deep Prooflike. This is one of those few pieces that have earned that unsurpassed grade, with smoothly frosted devices and stunningly brilliant, deeply mirrored fields. The strike is needle-sharp, and incomparable eye appeal completes its status among the ultimate 1884-CC condition rarities. Census: 4 in 67 Deep Prooflike, 0 finer (3/19). NGC ID# 254M, PCGS# 97153

## 1884-S Silver Dollar, MS62 Famous Condition Rarity

**3774 1884-S MS62 PCGS.** Despite the modest MS62 grade of this brilliant Mint State 1884-S Morgan silver dollar, PCGS has only certified 73 numerically finer examples (3/19). Apparently most or all of the 3.2 million examples struck at the San Francisco Mint that year entered circulation as relatively few have survived in Mint State. PCGS and NGC, combined, have certified just 806 examples that grade MS60 or finer. That is one such survivor for every 3,970 coins minted. Compare that to a hoard coin such as the 1885-CC that had a substantially lower mintage of only 228,000 coins, but a combined population of 50,301 coins in MS60 or finer, or one survivor for every four-and-a-half coins minted. This lovely piece has full cartwheel luster and brilliant, satiny silver surfaces with no toning on either side. The mostly trivial marks on each side are only obvious with strong magnification. This is an excellent opportunity for an advanced collector, it would look right at home in a collection of higher grade pieces. NGC ID# 254P, PCGS# 7156

### 1884-S Morgan Dollar, MS62 Challenging Issue in High Grade

**3775 1884-S MS62 NGC.** Production of Morgan dollars at the San Francisco Mint was a relatively modest 3.2 million pieces in 1884, down considerably from the 6.2 million examples struck the previous year. Many coins were released into circulation in the 19th century, and the issue is not difficult to locate in circulated grades today. Mint State coins are a much different story. It seems that few high-quality specimens were saved by contemporary collectors and the coins held in government storage were probably melted under the provisions of the Pittman Act in 1918. The 1884-S was not well-represented in the Treasury releases of the 1960s and the issue is scarce-to-rare in all Mint State grades today.

This impressive MS62 example exhibits well-detailed design elements, with just a trace of blending on the hair strands above the ear. The lustrous surfaces are lightly marked for the grade and the overall presentation is most attractive. NGC has graded 61 numerically finer examples (3/19). NGC ID# 254P, PCGS# 7156

Second San Francisco Mint

## 1884-S Morgan Dollar, MS63+ CAC Recognized, Conditionally Scarce Few Finer Examples Are Known

**3776 1884-S MS63+ PCGS. CAC.** *"The amount of gold and silver received for coinage or manufacture into bars varied but slightly from that deposited during the previous year. The coinage of silver was about the same, but a greater proportion than heretofore was coined at the Philadelphia and New Orleans Mints. The San Francisco Mint was principally engaged in the coinage of gold bullion." — The Mint Director's Annual Report, June 30, 1884.*

Silver dollar coinage at the San Francisco Mint in 1884 totaled 3.2 million pieces, approximately half of the previous year's mintage and the lowest production total of S-mint Morgan dollars since the inception of the series in 1878. Silver bullion purchases at the West Coast branch mint were diminished during the fiscal year "in consequence of the accumulation of silver coins at San Francisco." Silver dollars especially were stock-piled. Including coinage from all mints, in October 1884, the Treasury held in reserve more than 142 million silver dollars, of which more than 45 million were in excess of the total certificates outstanding. By contrast, only a little more than 40 million standard silver dollars were "in circulation," meaning outside of the Treasury's control.

Nonetheless, circulation seems to be where the bulk of the 1884-S dollar mintage went, and any quantities held in reserve were likely melted decades later under the terms of the Pittman Act of 1918. Worn survivors are plentiful and bring only a modest premium in low grades. However, in Mint State, the 1884-S dollar is challenging to locate, and it is decidedly scarce in MS63 and finer condition. CAC-approved coins in these grades are undeniably rare.

This Plus-graded coin showcases radiant cartwheel luster beneath a delicate champagne hue. Deeper tinges of amber toning are present around the borders, and there are remarkably few distinguished abrasions for the grade. A few faint grazes in the left obverse field appear to be all that prevent an MS64 designation. This piece is generally well-struck, although some faint, diagonal roller marks (mint made) are not fully struck out of Liberty's cheek. Eye appeal is spectacular for the issue and the grade. Population: 59 in 63 (6 in 63+), 15 finer; 1 in 63 Prooflike, 0 finer. CAC: 12 in 63, 7 finer (1/19).

*Ex: FUN Signature (Heritage, 1/2014), lot 5316, which realized \$49,937.50.*

**From The Perfection Collection of DMPL/Prooflike Morgan Dollars.**  
NGC ID# 254P, PCGS# 7156

### 1885-CC Dollar, MS67 Prooflike Tied for Finest in This Category

**3777 1885-CC MS67 Prooflike PCGS.** We have only offered two Superb Gem Prooflike examples of the 1885-CC Morgan dollar since the establishment of our Permanent Auction Archives in 1993. Both those coins were certified by NGC. This MS67 Prooflike is the first PCGS example we have seen, although for transparency it should be noted that we have offered a single MS67 Deep Mirror Prooflike back in July 2008. This is one of three such coins at PCGS with none finer. Similarly, four submissions reside atop the NGC *Census* (2/19).

Both sides are entirely brilliant with swirling cartwheel mint luster. A blush of crimson near the eagle's right (facing) talon is only hint of color. Liberty's cheek and the fields are practically unmarked. Fully struck throughout. NGC ID# 254S, PCGS# 7161

### 1887/6 VAM-2 Dollar, MS67 Well-Known *Guide Book* Variety Tied for Finest With One Other Coin

**3778 1887/6 VAM-2 MS67 NGC.** A Top 100 Variety. The lower curve of a 6 protrudes from the bottom right of the 7 in the date. The strength of the overdate is such that this variety has garnered a perennial place in the *Guide Book*, adding to its universal desirability among Morgan dollar collectors. This VAM-2 representative is tied with one other MS67 as the finest attributed by NGC; PCGS lists examples of this variety only up to MS66 (2/19). Radiant cartwheel luster and satin surfaces deliver a beautiful, luminescent effect. Well-struck design elements appear on each side, as do blushes of sea-green, lavender, and champagne toning. NGC ID# 2552, PCGS# 133908 Base PCGS# 7174

## 1889-CC Silver Dollar, AU58 Bright Mint Luster

**3779 1889-CC AU58 PCGS.** A bright, silvery-white near-Mint example of this key Carson City issue. Luster and eye appeal are akin to that expected of a low-end Uncirculated coin, although a trace of rub on the high points of this piece keeps it out of a Mint State holder. A few abrasions are visible on the cheek but none are individually bothersome. The strike is sharp. The 1889-CC is by far the most elusive Carson City issue in the Morgan dollar series, but it is also a key date in the context of all mints. The 350,000-coin mintage was produced in the final quarter of the calendar year, and many pieces were paid out into circulation. Others were likely melted in 1918, leaving a shortage of high-grade coins for collectors today. NGC ID# 2559, PCGS# 7190

## 1889-CC Morgan Dollar, MS61 Elusive Carson City Issue

**3780 1889-CC MS61 PCGS.** Only about 6% of all the 1889-CC dollars offered by Heritage over the past 15 years (more than 2,600 examples) achieved an Uncirculated grade, and of those few coins, not many pieces compare favorably with the visual appeal of this modestly graded MS61 example. Peripherally toned in blue and russet-red shades (likely from longtime album storage), the centers are brightly lustrous and sharply struck. A reeding mark at the chin to the nose is the sole mark of note, as all of the other abrasions are minor, well-scattered, and minimal for the grade.

Such originality and surface quality is seldom seen and highly valued for the 1889-CC. Storage and transport invited coin-to-coin contact, while the issue's sparse availability has always eluded collectors. Just 350,000 pieces were struck and only a small fraction of that mintage ever reached public hands. Bidders are encouraged to pay extra attention to this strictly graded Mint State opportunity. NGC ID# 2559, PCGS# 7190

### 1889-CC VAM-2 Morgan Dollar, MS63 From the Redfield Hoard

**3781 1889-CC MS63 NGC. VAM-2.** The obverse has a short, heavy die line inside the top of the E in LIBERTY on this slightly scarce VAM variety. This piece remains in the holder as sold by Paramount International Coin Corp. when they handled the Redfield silver dollar hoard in the 1970s. NGC has assigned the MS63 grade to this important piece, the rarest Carson City silver dollar in Mint State grades. This Select Mint State example features minimally marked, slightly reflective fields, and splendid peripheral gold and blue toning on the obverse. Delicate gold toning appears along the reverse border. NGC has only certified 49 finer examples of this issue (2/19). NGC ID# 2559, PCGS# 7190

### 1889-CC Dollar, MS63 Semiprooflike Fields

**3782 1889-CC MS63 PCGS.** The 1889-CC is one of the chief key dates in the Morgan dollar series, and it is one of the most challenging issues from any mint to acquire in Uncirculated condition. It is the rarest of the Carson City issues. A number of examples are reported in Prooflike and Deep Mirror Prooflike grades, and these are in high demand. The present coin, although not designated Prooflike, nonetheless shows significant reflectivity that glimmers when tilted beneath a lamp. Light golden toning around the borders accents essentially brilliant interiors. A few light abrasions account for the grade. This is easily one of the most appealing 1889-CC silver dollars that we have seen in MS63. NGC ID# 2559, PCGS# 7190

## 1889-O Morgan Dollar, MS65 Exceptional Deep Mirror Prooflike Example

**3783** 1889-O MS65 Deep Mirror Prooflike PCGS. CAC. Ex: PCGS Tour. The New Orleans Mint struck nearly 12 million Morgan silver dollars in 1889. Unfortunately, the strain of producing such a large mintage, with unavoidable die wear and relaxed quality control, shows plainly on the surviving coins today. Most examples seen are softly struck, with lackluster surfaces, and excessive bag marks. Finding even a marginally attractive specimen is a significant challenge, but the present coin is a happy exception to the rule. This spectacular Gem exhibits a decent strike, with some localized softness on the hair above the ear and sharp definition in most areas. The well-preserved surfaces include deeply mirrored prooflike fields that contrast boldly with the frosty devices. A few hints of sea-green and golden-tan toning enhance the outstanding eye appeal. Housed in an old green label holder. Population: 1 in 65 Deep Mirror Prooflike, 1 finer. CAC: 1 in 65, 0 finer (1/19).

Ex: Long Beach Signature (Heritage, 6/2010), lot 1129, which realized \$48,875.

From The Perfection Collection of DMPL/Prooflike Morgan Dollars. NGC ID# 45YN, PCGS# 97193

## 1890-O Dollar, MS66 Prooflike Registry-Grade Condition Rarity

**3784** 1890-O MS66 Prooflike PCGS. CAC. The finest surviving 1890-O Morgan dollars grade MS66, and only a few are designated Prooflike. These pieces are highly sought-after for Registry Sets, and only a handful are recognized for high-end quality with a CAC green label. This is one of those pieces. Arguably, the only finer 1890-O dollar known is a lone MS66 Deep Mirror Prooflike coin at PCGS. This Prooflike piece is deeply reflective in the fields, although a cartwheel effect remains evident in-hand. Neither side has meaningful toning other than a delicate champagne hue overall. A distinct lack of abrasions is fully appreciated with a loupe. Typical of New Orleans issues from the 1890s, this coin is a trifle weak on the central high points, but the sharpness is slightly above average overall. A truly outstanding example of this important condition rarity. Population: 3 in 66 Prooflike, 0 finer; 1 in 66 Deep Mirror Prooflike, 0 finer. CAC: 3 in 66, 0 finer (1/19).

Ex: FUN Signature (Heritage, 1/2012), lot 3351, which realized \$27,600.

From The Perfection Collection of DMPL/Prooflike Morgan Dollars. NGC ID# 2XU9, PCGS# 7201

## 1891-O Morgan Dollar, MS65 Deep Mirror Prooflike Surfaces Ex: PCGS Tour

**3785 1891-O MS65 Deep Mirror Prooflike PCGS. CAC.** Ex: PCGS Tour. One of the jaw-droppers of the touring set, this 1891-O Morgan dollar remains one of only two MS65 Deep Mirror Prooflike examples known to PCGS, with none finer (1/19). Q. David Bowers offers several interesting comments about the 1891-O issue, including this take on prooflike pieces: "Quite a few prooflike and partially prooflike coins exist, many of which are well struck (an exception to the general rule for 1891-O). DMPL coins exist, some well struck, others not."

The Bowers quote highlights two key aspects of the challenge posed by 1891-O Morgan dollars: strikes are often poor, and while Bowers is correct that Deep Mirror Prooflike examples "exist," they are far from numerous, with only a few dozen such pieces certified—certainly not enough to meet demand. Add in the complication of condition rarity, and it is little wonder that Gem examples with Deep Mirror Prooflike surfaces should be so elusive.

This piece has light layers of gold-gray toning over the deeply mirrored fields. The mildly frosted design elements are well, but not fully, struck. Heavy mint frost is not the norm for this New Orleans issue, regardless of the condition of the dies, but this piece exhibits bold field/device contrast. A few small marks visit the obverse, but the only defect warranting individual mention is on the reverse, where it seems to form an underline to the E in STATES. Overall eye appeal is terrific. Housed in a green label holder. Population: 2 in 65 Deep Mirror Prooflike, 0 finer. CAC: 2 in 65, 0 finer (1/19).

Ex: *Long Beach Signature* (Heritage, 6/2010), lot 1142, realized \$57,500.

**From The Perfection Collection of DMPL/Prooflike Morgan Dollars.**  
NGC ID# 3VXM, PCGS# 97209

## 1891-S Morgan, Spectacular Reflectivity MS65+ Deep Mirror Prooflike

**3786 1891-S MS65+ Deep Mirror Prooflike PCGS. CAC.** A well-produced mintage of 5.3 million Morgan dollars was achieved at the San Francisco Mint in 1891. Most of the coins were held in storage, to be released at later dates or melted under the provisions of the Pittman Act in 1918. The issue is not rare as a date, and examples with prooflike surfaces are available with patience, but specimens in Gem condition, with intense contrast, are rare.

The present coin displays dramatic contrast between the sharply-detailed design elements and the brightly reflective fields. The brilliant surfaces display a few hints of gold toning and some minor contact marks, none worthy of individual mention. This coin possesses exceptional eye appeal. Population: 5 in 65 (2 in 65+) Deep Mirror Prooflike, 0 finer. CAC: 1 in 65, 0 finer (1/19).

*Ex: Chicago Signature (Heritage, 8/2011), lot 7325, which realized \$20,700.*

**From The Perfection Collection of DMPL/Prooflike Morgan Dollars.**  
NGC ID# 3VXL, PCGS# 97211

## 1892-CC Morgan Dollar, MS66 Conditionally Scarce at This Grade Level

**3787 1892-CC MS66 PCGS.** Of the 1.3 million dollars struck in Carson City in 1892, those that did not circulate were either sent to the San Francisco Mint or the Treasury Building in Washington and stored for many years. Bags were paid out over the years with an estimated 50 bags released in 1955 alone. Even as late as 1982, it was still believed large quantities were available. However available the 1892-CC may be in lower grades, it is definitely not an available issue in MS66 condition. This is a remarkably smooth example with completely brilliant surfaces and the radiant mint luster one would expect for a CC dollar. Fully struck. Population: 37 in 66 (5 in 66+), 3 finer (2/19). NGC ID# 255M, PCGS# 7214

### 1892-S Morgan Dollar, AU58 Condition Rarity in High Grade

**3788 1892-S AU58 PCGS. CAC.** Ex: STP Legacy Collection. The grade-price curve of the key-date 1892-S Morgan dollar spikes dramatically in the grades of AU50 and above; lower-grade pieces are quite common, but near-Mint State and truly Uncirculated pieces are elusive and see huge demand from the hordes of series fans. The present example likely traded as Mint State prior to the advent of third-party grading and certification. The devices show a hint of rub on the obverse high points and a mere touch of clouding of the otherwise intact luster. The frosty silver-gray surfaces are distraction-free, highly lustrous, and possess undeniable eye appeal. The CAC green approval sticker present here is an important addition: Although the two leading grading services combined have seen in excess of 250 submissions in AU58, only ten of those bear the CAC sticker.

Ex: *FUN Signature* (Heritage, 1/2007), lot 1110; *Central States Signature* (Heritage, 4/2008), lot 2363; *ANA Signature* (Heritage, 8/2015), lot 4204, realized \$20,562.50.

**From The Perfection Collection of DMPL/Prooflike Morgan Dollars.**  
NGC ID# 255P, PCGS# 7218

### 1893-CC Silver Dollar, MS64 The End of an Era

**3789 1893-CC MS64 PCGS.** The Carson City Mint shut down their coinage presses in 1893 after producing 769,402 coins with a face value of \$1,485,040. The total included 677,000 Morgan dollars, 60,000 half eagles, 14,000 eagles, and 18,402 double eagles. The same year that this coin was minted, Augustus G. Heaton published *A Treatise on the Coinage of the United States Branch Mints*:

"As the new mint at Philadelphia will have a capacity equal to all existing United States Mints, it is probable that others will be greatly restricted or even abolished in no long time, and that mint marks will not only cease as an annual expense, but be a treasure in time to those who have the foresight to collect them now."

Heaton's words were prophetic, as the Carson City Mint ceased coinage operations in June 1893 with the silver dollar production. Charlotte and Dahlonega had closed at the beginning of the Civil War, and New Orleans would halt production just 16 years after Heaton's work was published.

This Choice Mint State example is an extraordinary representative of the final Carson City coinage, featuring brilliant silver surfaces, excellent design definition, trivial grade-consistent marks, and satin luster. PCGS has only certified 15 numerically finer examples of this issue (3/19).

NGC ID# 255S, PCGS# 7222

**1893-CC Silver Dollar, MS64**  
**Final Carson City Issue**  
**Rarely Offered Finer**

**3790 1893-CC MS64 PCGS.** Silver dollar production at Carson City in 1893 produced consistent six-figure deliveries through May of that year, but coinage operations were ceased on May 23, marking the end of Morgan dollar coinage with the coveted CC mintmark. Some coins entered circulation, and large quantities of others went into long-term storage at the Carson City Mint building until 1899, when they were transferred to San Francisco and the Treasury building in Washington D.C. In *A Guide Book of Morgan Silver Dollars*, fifth edition, Q. David Bowers writes that bags of Carson City dollars, which likely included 1893-CC coins, were paid out to public with little numismatic interest through the 1920s. By the time of the GSA sales of the early 1970s, only a single 1893-CC dollar remained in government vaults.

This near-Gem survivor of the final Carson City Morgan displays radiant, untoned mint luster and remarkably few abrasions. The central sharpness is impressive considering the reputation of this issue to be deficiently struck. Eye appeal is outstanding. PCGS lists only 15 finer non-Prooflike coins (2/19).

*Ex: Dallas Signature (Heritage, 12/2005), lot 2528, which realized \$12,650. NGC ID# 255S, PCGS# 7222*

**1893-CC Dollar, Evenly Toned MS64**  
**Almost Unobtainable in Higher Grades**

**3791 1893-CC MS64 PCGS.** The 1893-CC dollar is an issue that is hard for collectors to resist since it has so much going for it. It is the final year of issue for the Carson City mint, it has a relatively low mintage of 677,000 pieces, and better-grade Uncirculated pieces are a semikey issue in the Morgan series. Two problems are widely known by collectors for this issue, weakness of strike and pervasive bagmarks. This particular coin is fully struck in the centers, unlike many Mint State survivors. The surfaces do show a number of small abrasions and breaks in the luster, but the effect is largely subdued by the light golden-rose toning seen over each side. For most collectors, the 1893-CC is unattainable in higher grades. NGC ID# 255S, PCGS# 7222

### 1893-CC Dollar, Sharp MS64 Almost Unobtainable in Higher Grades

**3792 1893-CC MS64 PCGS.** The final year of the Carson City Mint's coinage operations included a mintage of 677,000 silver dollars — an issue that is rare at the Gem Uncirculated level and seldom seen with any pretense of a sharp strike. Just one coin came out of the GSA sales, and LaVere Redfield's hoard reportedly had two bags, but most of those coins were damaged by the infamous coin-counting machine used to tabulate the huge accumulation.

This near-Gem example is exceptionally Choice for an 1893-CC. Brilliant silver-white surfaces show a few light abrasions on and near Liberty's chin, but the strike is unusually sharp for the issue. Only slight blending is seen over the ear, and the eagle's talons lack full definition. The smooth fields are remarkably free of marks, with double die clashing visible on the reverse. Housed in a previous generation green label holder. PCGS reports just 15 numerically finer examples (3/19). NGC ID# 255S, PCGS# 7222

### 1893-O Morgan Dollar, MS64 Low-Mintage Branch Mint Issue

**3793 1893-O MS64 PCGS.** Dazzling luster and a trace of gold patina ensure the eye appeal of this charming Choice silver dollar. The strike is good considering the mint and era of origin, and the distributed minor obverse grazes are insufficient to challenge the grade. The reverse field is well-preserved, and the eagle's breast is void of obtrusive marks. This piece is mildly prooflike, a feature rarely noted on the 1893-O, which has the lowest New Orleans production of the type. Among O-mint issues, only the 1895-O is scarcer overall. The purpose behind the 1879 re-opening of the New Orleans Mint was to strike silver dollars. During the quarter century of O-mint Morgan dollar coinage, mintages usually exceeded millions of pieces. The 1893-O and 1895-O were the exceptions. PCGS has graded six numerically finer examples (3/19).

*Ex: Dallas Signature (Heritage, 10/2006), lot 1565, realized \$15,525. NGC ID# 255T, PCGS# 7224*

## 1893-O Dollar, MS64 Attractive, Conditionally Rare Morgan

**3794 1893-O MS64 PCGS.** Ex: Larry Shapiro. Scarcer than even the 1895-O by mintage, the 1893-O is somewhat more available than that rare New Orleans issue in Mint State. Both issues are extremely scarce at the MS64 level and nearly unobtainable any finer. While the repeal of the Sherman Silver Purchase Act in 1892 is often cited for the low mintage, supply and demand was the overriding factor. Millions upon millions of unused silver dollars were stockpiled in vaults.

This is an especially attractive 1893-O, with gleaming, pearlescent-silver centers and pleasing, deep-blue and tan-gold borders. Contrary to the mediocre strike seen on most '93-Os, this one is reasonably well-struck, with some centrally soft definition, but areas of sharpness elsewhere. The eye appeal is outstanding for an 1893-O. PCGS reports just six numerically finer examples (3/19). NGC ID# 255T, PCGS# 7224

## 1893-S Dollar, AU53 VAM-2, Light Golden Hue

**3795 1893-S AU53 PCGS. VAM-2.** Two die varieties are known among the 100,000 1893-S Morgan dollars struck. This one, the rarer of the two, has the mintmark slanted slightly to the right and raised die lines within the space between the eagle's neck and right (facing) wing. Naturally, the 1893-S is a difficult issue to locate regardless of die variety, ranking among the rarest of all Morgan dollars.

This is a lightly circulated example that retains much of its original mint luster around the motifs. Each side exhibits faint hairlines and scattered marks, but the surfaces have developed a pleasing golden hue, especially on the obverse. NGC ID# 255U, PCGS# 7226

### 1894 Morgan Dollar, MS65+ Beautifully Preserved A Major Condition Rarity

**3796 1894 MS65+ PCGS. CAC.** Ex: Sunnywood / Simpson. Smooth, softly frosted mint luster illuminates mottled sea-green, gold, and lilac-gray toning on each side of this high-end Gem as it cartwheels in-hand. Magnification fails to reveal a single notable abrasion, although a touch of the usual strike weakness is noted on the eagle's breast and above Liberty's ear. The 1894 Morgan dollar is a rarity this fine, and even more so with CAC approval as seen here. PCGS reports no Prooflike or Deep Mirror Prooflike coins in Gem or better condition. This is an important condition rarity for the Registry Set collector. We have not offered a finer example in over a decade. Population: 26 in 65 (1 in 65+), 6 finer. CAC: 8 in 65, 3 finer (1/19).

**From The Perfection Collection of DMPL/Prooflike Morgan Dollars.**  
NGC ID# 255V, PCGS# 7228

### 1895-O Silver Dollar, MS61 Third-Rarest Morgan in High Grade

**3797 1895-O MS61 PCGS.** The effects of the Panic of 1893 were still being felt in 1895 and the repeal of the Sherman Silver Purchase Act resulted in lower mintages of Morgan dollars at all U.S. Mints in succeeding years. Only 450,000 Morgan dollars were struck at the New Orleans facility in 1895 and the issue was not well-produced, as most examples seen are softly struck in the centers, with inferior luster characteristics. Few examples were saved by contemporary collectors and the issue was not well-represented in the Treasury releases of the 1960s. Accordingly, the 1895-O is the third rarest Morgan dollar in Mint State grades today.

This impressive Mint state example exhibits a better-than-average strike, with just a trace of blending on the hair strands above Liberty's ear. The lustrous surfaces are lightly marked for the grade and the overall presentation is quite attractive. NGC ID# 255Y, PCGS# 7236

## 1895-O Silver Dollar, MS61 Scarce New Orleans Issue Pleasing for the Grade

**3798 1895-O MS61 NGC.** Only 450,000 silver dollars were struck at New Orleans in 1895, all delivered in the first half of the year. A significant portion of the mintage was placed into circulation and other coins presumably went into storage. However, coins in storage were paid out over time. According to Q. David Bowers in *A Guide Book of Morgan Silver Dollars*, fifth edition, no 1895-O dollars were a part of the Treasury releases of the 1960s. This Mint State coin is inherently scarce without surface wear, although its numeric grade is about average for an Uncirculated 1895-O. Luster is satiny and a light golden blush of toning is deeper on the reverse. Central sharpness is above average for the issue. Light luster grazes on the obverse limit the grade but are not obtrusive. NGC ID# 255Y, PCGS# 7236

## 1895-O Morgan Dollar, MS62 Lovely Original Toning

**3799 1895-O MS62 PCGS.** The 1895-O Morgan silver dollar is a famous issue from the year of the proof-only Philadelphia Mint dollar that is known as the King of the Morgans. However, for collectors of non-proof silver dollars, this branch mint issue is extremely important as a major condition rarity. PCGS has only certified 180 of these in all Mint State grades (3/19). This example has impressive original toning that features rich ivory, gold, and blue on the obverse, and ivory and gold on the reverse. The toning mercifully hides the scattered, grade-consistent marks. Population: 54 in 62 (4 in 62+), 46 finer (3/19). NGC ID# 255Y, PCGS# 7236

### 1895-O Morgan Dollar, MS60 Prooflike Rare in Prooflike Mint State

**3800 1895-O MS60 Prooflike NGC.** One of the great rarities among Prooflike and Deep Mirror Prooflike Morgan dollars, the 1895-O is scarce-to-rare in any regard when in Uncirculated condition. A logical reduction in silver dollar mintages followed the government's release from the necessity of purchasing millions of dollars worth of silver bullion each month. Just 450,000 pieces were struck at the old Southern Mint, where the 1895-O is the premier O-mint issue in the Morgan series.

Michael "Miles" Standish points out, "In prooflike and deep mirror prooflike, the issue is rarer than Massachusetts Bay silver coinage." This MS60 Prooflike example is sharply struck with fully mirrored fields. Myriad light abrasions and a tiny planchet void at U of PLURIBUS are noted, yet the coin is sharply struck and no marks are singularly large or distracting. Translucent golden-tan toning casts a pale hue across the reflective fields and frosted devices, with brief light-blue overtones. NGC has seen just one finer example with Prooflike surfaces. Census: 3 in 60 Prooflike, 1 finer (3/19). NGC ID# 255Y, PCGS# 7237

### 1895-S Morgan Dollar, MS65 High-End Better Date

**3801 1895-S MS65 PCGS.** Morgan dollar production was down at all active U.S. Mints in the mid-1890s, due to the financial consequences of the Panic of 1893 and the repeal of the Sherman Silver Purchase Act. Accordingly, only 400,000 examples were struck at the San Francisco Mint in 1895, making the issue a better date in all grades. The 1895-S is rare at the MS65 grade level and finer coins are prime condition rarities.

This delightful Gem exhibits sharply detailed design elements in most areas, with just a trace of the usual softness on the hair strands above Liberty's ear. The well-preserved surfaces radiate vibrant mint luster and show highlights of sea-green and lilac toning. Eye appeal is outstanding. Population: 43 in 65 (6 in 65+), 4 finer (3/19). NGC ID# 255Z, PCGS# 7238

## 1895-S Morgan Dollar, MS66+ Prooflike Registry Grade Example Ex: Wayne Miller

**3802 1895-S MS66+ Prooflike PCGS. CAC.** There was little commercial demand for silver dollars in the national economy in 1895, as the effects of the Panic of 1893 and the repeal of the Sherman Silver Purchase Act were still being felt. Accordingly, mintage of Morgan dollars was not a priority at any of the active U.S. Mints that year. Records indicate a token mintage of 12,000 business-strike examples was accomplished at the Philadelphia Mint, but none have ever been seen by numismatists. The New Orleans facility struck a small total of 450,000 pieces and the San Francisco production was even more limited, at a meager 400,000 specimens.

The 1895-S can be found in lower Mint State grades, as a few bags were released from the San Francisco Mint in the 1942-1950 time frame, but the issue was not well-represented in the Treasury releases of the 1960s. The most plentiful source of Mint State examples is the Redfield Hoard, which included about 1,000 examples of the 1895-S. Unfortunately, the Redfield coins suffered from rough storage and handling, and a number of pieces were damaged by an improper coin counting device. Although the issue is usually seen with a decent strike and attractive mint luster, excessive bag marks and surface abrasions severely limit the supply of high grade pieces. Accordingly, the 1895-S is an elusive issue in high grade and one of the keys to the Morgan dollar series.

The present coin appeared previously in lot 5039 of the FUN Signature (Heritage, 1/2009). At that time, the PCGS holder pedigreed the coin to prominent Morgan dollar specialist Wayne Miller. Miller had an outstanding eye for quality and formed one of the finest collections of Morgan dollars of all time. A Miller pedigree is a mark of distinction for any Morgan dollar. The design elements of this Plus-graded Premium Gem are sharply detailed throughout and the devices are richly frosted, providing bold cameo contrast with the reflective fields. The impeccably preserved surfaces are essentially brilliant, with a few wisps of gold and cinnamon in selected areas. The terrific overall eye appeal and outstanding technical quality are attested by the CAC sticker. This coin is the single-finest Prooflike example in the PCGS population data, but there is one finer coin with a Deep Mirror Prooflike designation (1/19). We expect intense competition from series specialists and Registry Set enthusiasts when this lot is called.

Ex: Wayne Miller; FUN Signature (Heritage, 1/2009), lot 5039, realized \$74,750.

**From The Perfection Collection of DMPL/Prooflike Morgan Dollars.**  
NGC ID# 255Z, PCGS# 7239

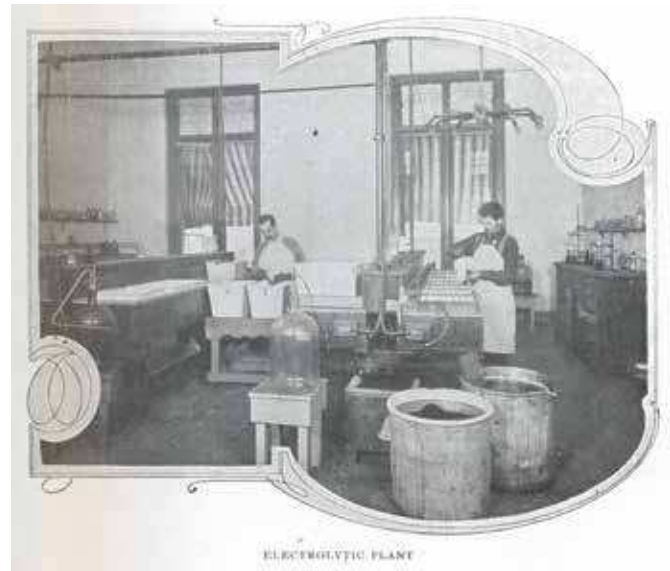

**1899-S Dollar**  
**MS65 Deep Mirror Prooflike**  
**Sole Finest DMPL Coin at CAC**

**3803** 1899-S MS65 Deep Mirror Prooflike PCGS. CAC. The 1899-S is a better date in high grade, although Gem examples can usually be located with a little patience. Nonetheless, it is rare that a Prooflike Gem comes up at auction, and Deep Mirror Prooflike Gems are almost never seen. PCGS reports only 47 grading events for Deep Mirror Prooflike 1899-S dollars, of which just six have qualified for a Gem or finer numeric grade. Moreover, the coin offered here is the sole finest Deep Mirror Prooflike 1899-S endorsed by CAC (1/19). The depth of reflectivity is impressive, and neither side exhibits obtrusive abrasions. Barely a trace of light golden color warms the mirrors. This piece has a touch of strike weakness above Liberty's ear, but the satiny devices are otherwise well-defined. A highly appealing Registry Set candidate. Population: 2 in 65 Deep Mirror Prooflike, 4 finer. CAC: 1 in 65, 0 finer (1/19).

*From The Perfection Collection of DMPL/Prooflike Morgan Dollars.*  
 NGC ID# 256D, PCGS# 97263

## 1901 Morgan Dollar, MS64 Challenging Issue in High Grade

**3804 1901 MS64 PCGS. CAC.** This is a remarkable near-Gem example of the conditionally rare 1901 Morgan silver dollar. Despite an impressive mintage of nearly 7 million coins, few have survived in any Mint State grade. Rather than the usual “strike and store” policy that affected most Morgan dollar issues, these coins were actually placed into circulation at the time of issue. Examples held in government storage almost certainly met their fate under the Pittman Act of 1918.

In his *Silver Dollar Encyclopedia*, David Bowers described the typical Mint State 1901 Morgan dollar:

“Most Mint State 1901 dollars are poorly struck and have inadequate luster. A coin that is MS-60 to MS-62 from a technical viewpoint, can be dull and unattractive. As it this were not enough, most show unsightly bagmarks. ... higher grade Mint State dollars exist but are exceedingly rare. The typical specialist in silver dollars will often find that years elapse between stocking coins in as high as MS-63 grade. Forget about MS-64 and MS-65.”

For the collector who has a serious interest in this piece, we recommend reading the above comments while viewing the coin in person. The following will be noted: While not fully struck, it is a clear exception to the usual rule of poorly struck coins. Only one or two bag marks are visible on each side, none “unsightly.” Not only does this piece display adequate luster, it is highly lustrous, fully brilliant, and most attractive. This is an attractive near-Gem 1901 Morgan silver dollar, a conditionally rare and highly desirable coin. It is almost exactly the opposite of the usually seen representative of this date. Population: 33 in 64, 3 finer. CAC: 3 in 64, 1 finer (1/19).

Ex: *Chicago Signature* (Heritage, 8/2011), lot 7346, realized \$43,125; *FUN Signature* (Heritage, 1/2013), lot 5745, realized \$44,062.50.

## PROOF MORGAN DOLLARS

### 1904-O Dollar, MS67 Deep Prooflike Best Example We Have Offered Sole Finest at NGC

**3805 1904-O MS67 Deep Prooflike NGC.** This landmark offering represents the first time we have handled a Superb Gem example of the 1904-O Morgan dollar with Deep Prooflike or Deep Mirror Prooflike surfaces. Indeed, we can find no record of any comparable example being offered. This is the lone MS67 in this contrast category at NGC. It is tied with one other at PCGS. None are finer at either service (2/19).

Each side of this dramatically mirrored and impressively frosted New Orleans Registry coin features a thin, dusky overlay with only the faintest hints of color around the upper-left obverse border. Minor softness at the centers is entirely normal for an 1904-O. The overall quality and preservation of this top-pop example is not. NGC ID# 256V, PCGS# 97293

### 1882 Morgan Dollar, Deeply Mirrored PR68 With Concentric Rings of Light Iridescence

**3806 1882 PR68 PCGS. CAC.** The 1882 proof Morgan dollars had a substantial mintage of 1,100 pieces. However, over the decades many have been cleaned; remember, it wasn't always the case that collectors and dealers valued originality. The results are predictable with just a handful of proofs from this year that still survive with intact, uncleaned surfaces. This particular coin shows the attributes of original 1882s when they are found. The strike details are completely defined over each side. Also, the depth of mirroring in the fields is profound, which gives the frosted devices a cameo contrast on each side. What prevents a Cameo designation, however, are the rings of iridescent color that encircle both obverse and reverse. An exceptionally attractive, early proof Morgan and impossible to upgrade. Population: 5 in 68, 0 finer. CAC: 3 in 68, 0 finer (2/19). NGC ID# 27Z6, PCGS# 7317

## 1882 Morgan, PR67+ Ultra Cameo Dramatic Contrast, Conditionally Rare

**3807** 1882 PR67+ Ultra Cameo NGC. The proof 1882 Morgan dollar is a well-made issue, often encountered with cameo contrast. However, coins that qualify for an Ultra Cameo designation are rare, with just 15 at NGC in all grades. Heritage has handled an Ultra or Deep Cameo coin on only 23 previous occasions, most of which were coins grading PR66 or lower. We last handled a PR67 specimen in the Long Beach Signature (Heritage, 5-6/2012), lot 4450, which realized \$17,250. This Plus-graded example is nearly a half point finer, and its eye appeal is captivating. Under a light golden hue, each side displays pristine mirroring in the fields and frosty luster on the devices. The strike is sharp, and the cameo effect is quite dramatic. Census: 5 in 67 Ultra Cameo (2 in 67+, 1 in 67★), 1 finer (3/19). NGC ID# 27Z6, PCGS# 97317

## 1890 Morgan Dollar, PR67+ Cameo Near-Flawless Surfaces, Sharp Contrast

**3808** 1890 PR67+ Cameo NGC. Bimetallism works in a financial system when gold and silver are legal tender at a fixed ratio to each other. When one metal fluctuates in value independently of the other, opportunities for arbitrage exist and traders seek to take advantage of the differing prices for the same asset — for example, Treasury Notes redeemable for either silver or gold. In 1890, the ratio of silver to gold declined from 16:1 to 20:1, and soon a run to exchange Treasury Notes for gold was rampant. Still, the Mint pounded out silver dollars by the tens of millions. Financial panic loomed. The Mint reduced the number of proofs to a near all-time low of just 590 pieces.

This Superb Gem Cameo proof is a resplendent relic of those turbulent days. The serene portrait of Liberty is frosted and unblemished, set on mirrorlike reflective fields. Metaphorically, the silver surfaces are restrained by a thin band of gold at the rims, a sign of the times. There are few numerically finer proofs in Cameo format than this immaculate representative. Census: 16 in 67 Cameo (2 in 67+), 5 finer (3/19).

*Ex: Central States Signature (Heritage, 4/2017), lot 4176, which realized \$25,850. NGC ID# 27ZK, PCGS# 87325*

### 1893 Morgan Dollar, PR67+ Spectacular Ultra Cameo Example

**3809** 1893 PR67+ Ultra Cameo NGC. The repeal of the Sherman Silver Purchase Act had a profound effect on the business-strike mintage of Morgan dollars in 1893, but the Philadelphia Mint still produced a more-or-less average sized proof mintage of 792 pieces to satisfy collector demand. The proofs were delivered quarterly, with the biggest batches in March and December. Some coins are softly struck, as the dies were spaced too far apart. However, this spectacular Plus-graded Superb Gem exhibits razor-sharp definition on all design elements, and the deeply mirrored fields contrast profoundly with the richly frosted devices to create an intense cameo effect. The impeccably preserved surfaces are essentially brilliant, with the faintest hint of pale gold toning at selected angles. Eye appeal is terrific. Census: 6 in 67 Ultra Cameo (1 in 67+), 2 finer (3/19). NGC ID# 55UK, PCGS# 97328

## 1895 Morgan Dollar, PR63 Rare CAC-Approved Example King of the Morgan Dollars

**3810 1895 PR63 PCGS. CAC.** Morgan silver dollars have long captivated numismatists for their size, heft, and their almost euphoric connection to the “Old West,” where the denomination circulated in the late 19th century. However, the “king of the Morgan dollars” is not one of the historic Carson City issues, nor one of the low-mintage San Francisco keys, but rather a Philadelphia proof — a coin whose only real tie to 19th century history is the heraldry it has received among numismatists from the earliest days of its existence.

In 1895, the Mint struck 880 proof Morgan dollars for distribution in the annual silver proof sets. However, unlike in other years, plans to strike circulation coins came and went with, at most, a brief “hurrah” that never even made it out of the Mint. Mint records indicate that 12,000 circulation strikes were made, but none have ever been known to collectors. It is often debated whether or not the coins were actually struck (and later melted) or if their “coinage” was nothing more than an accounting error on the Mint’s books. Contemporary numismatists, such as the Chapman brothers, believed that no circulation strikes were ever produced. Modern research clouds the water on this point, but with no circulation strikes known, one inherent fact remains: the 1895 Morgan dollar is only known in proof format. And therein lies its status as the “king of the Morgan dollars.” That proof mintage of 880 coins is the effective grand total mintage of the date, making this far and away the lowest-availability Morgan dollar overall.

Extant 1895 proofs run the gamut of numeric grades, and for a price, an example in most grades will eventually be made available. However, the availability of a piece is always met with feverish bidding in a live auction. In *A Guide Book of Morgan Silver Dollars*, fifth edition, Q. David Bowers writes: “The ownership of an attractive Proof is a fine thing to contemplate.”

The Select example offered here is one of only nine for the grade with CAC endorsement. Each side displays deep orange-gold, lilac, and blue-gray toning that masks any grade-limiting hairlines. The strike is sharp, and luster on the central devices is satiny. Eye appeal is pleasing. CAC: 9 in 63, 20 finer (3/19). NGC ID# 27ZR, PCGS# 7330

## 1895 Morgan Dollar, PR63 Only 880 Proofs Produced No Business Strikes Known

**3811 1895 PR63 PCGS. CAC.** According to Mint records, a modest mintage of 12,000 business-strike Morgan dollars was accomplished in 1895, accompanied by a normal-size production of 880 proofs. The fate of the regular-issue dollars is a numismatic enigma of the first order, as not one example has ever surfaced. Some numismatists believe the business strikes never existed and the reported mintage figures are simply clerical errors. Others believe the coins were struck and stored in Treasury vaults until 1918, when the entire mintage was destroyed under the provisions of the Pittman Act. In any case, the 1895 Morgan dollar is essentially a proof-only issue which has always experienced intense collector demand.

The elusive nature of the 1895 issue was recognized almost immediately by contemporary numismatists and the 1895 proof sets began appearing at auction within months of the time of issue. The cataloger singled out the rarity of the dollar in the description of lot 161 of the F. Merritt Alden Collection (S.H. & H. Chapman, 4/1896), "1895 Brilliant proof set. Dollar rare." By 1898, collector George Rice was speculating that no business-strike coins had ever been struck in the pages of *The Numismatist*. The rarity of this date has become more and more evident, with the growth in popularity of the Morgan dollar series in recent times. Today, the 1895 is recognized as one of the two most important keys to the series, along with the 1893-S. The 1895 is often called the King of the Morgan Dollars.

The present coin is an impressive Select proof, with razor-sharp definition on all design elements. The lightly marked surfaces include hazily reflective fields, under low-intensity shades of pale gold and lavender toning. Only trivial signs of contact are evident on close inspection and overall eye appeal is outstanding. Housed in a green label holder. NGC ID# 27ZR, PCGS# 7330

## 1895 Morgan Dollar, PR64 Cameo Enigmatic Proof-Only Issue In-Demand Key

**3812 1895 PR64 Cameo PCGS.** The Morgan dollar is a favorite series in American numismatics, and for good reason. A host of issues are available in high grades, while others are collectible in circulated condition but become major rarities in Mint State. A number of issues, like the 1889-CC and 1893-S are moderately available but subject to intense demand because of their attractive low mintages. This creates a interesting blend of obtainable and elusive issues that keep collectors searching.

Then there is the 1895, perhaps the most enigmatic emission in the entire set. Philadelphia Mint records show that 12,880 Morgan dollars were struck in 1895, including 880 proofs. That leaves 12,000 circulation strikes that were supposedly manufactured. There is only one problem: No such coins have ever been located. Over time, researchers drew various conclusions. Some thought the coins originally intended for circulation were never released and were eventually melted as part of the Pittman Act in 1918. Others claimed that no circulation strikes were ever made and that the entry in the Mint records was erroneous — a line of thinking that now prevails among scholars. Some researchers hedged their bets on the existence of truly Uncirculated 1895 dollars. John J. Ford wrote in the April 1950 issue of *The Numismatist*: "I'll wager that there were never 12,000 1895 Dollars or even 1,000. For my money, between 860 and 880 odd pieces ever left the confines of that stately old building in Philly. Of the 880, or whatever the exact number may be, I believe that 860 were struck in Proof and perhaps 20 in Uncirculated condition." Still, no Mint State example has been verified.

All 1895 proof dollars are extremely desirable in today's market. That applies to everything from impaired specimens to Superb Gem Deep Cameo coins. This Choice Cameo proof offers attractive lavender-gold accents over silvery surfaces, particularly evident throughout the reverse. The high standards of proof production of the era are on full display with noticeable contrast and excellent preservation. Population: 36 in 64 (3 in 64+) Cameo, 36 finer (2/19). **From The William Rehwald Proof Set Collection.** NGC ID# 27ZR, PCGS# 87330

**1897 Morgan Dollar, PR68  
Delightful Ultra Cameo Surfaces  
Tied for Finest Certified**

**3813** 1897 PR68 Ultra Cameo NGC. Only 731 proof Morgan dollars were struck in 1897. The coins were delivered quarterly, with the biggest group delivered in December, in time for the holiday gift season. The coins were uniformly well-produced and many display beautiful Cameo surfaces. This magnificent PR68 example displays razor-sharp definition on all design elements and the richly frosted devices create a profound cameo effect with deeply mirrored fields. The virtually pristine surfaces are essentially brilliant, but a few subtle highlights of pale gold toning show at selected angles. This coin is tied with one specimen at PCGS for the title of finest certified in this degree of contrast (3/19). NGC ID# 27ZV, PCGS# 97332

**1898 Morgan Dollar, PR68  
Magnificent Ultra Cameo Specimen**

**3814** 1898 PR68 Ultra Cameo NGC. By 1898, the technicians and craftsmen at the Philadelphia Mint had perfected the art of proof coinage. The Morgan dollar proofs of that date are uniformly well-produced, with sharp details and rich mint frost on the devices. Many examples have Cameo surfaces. Speaking of the 1898 Morgan dollar proofs, Mike Fuljenz notes, "This date was probably the best made in the entire series." Only 735 proofs were struck in 1898, delivered at intervals throughout the year.

Even among the high-quality proofs of 1898, this magnificent PR68 example stands out. The design elements are fully struck, with blazing white mint frost that contrasts dramatically with the deeply mirrored fields. The white-on-black cameo flash is truly startling when this coin is tilted in the light. The brilliant surfaces are impeccably preserved and overall eye appeal is tremendous. Census: 5 in 68 Ultra Cameo (3 in 68★, 1 in 68+★), 0 finer (3/19). NGC ID# 27ZW, PCGS# 97333

## GOLD DOLLARS

### 1854-S Gold Dollar, MS64 Conditionally Rare S-Mint Coin

**3815 1854-S MS64 PCGS. CAC.** Congress authorized the gold dollar in March 1849. The denomination was struck sporadically at the San Francisco Mint from 1854 through 1860, and then again in 1870, after which gold dollars were struck at the Philadelphia Mint only. The 1854-S is not only the first-year issue from this mint, it is also the only San Francisco issue of the Type One design. Just 14,632 pieces were struck. Uncirculated survivors rarely appear at auction, especially in near-Gem condition. This CAC-endorsed coin displays a razor-sharp strike and satiny brass-gold and peach mint luster. No singular abrasions are worthy of mention. Population: 11 in 64, 2 finer. CAC: 5 in 64, 1 finer (3/19). NGC ID# 25C2, PCGS# 7527

### 1854 Type Two Gold Dollar, MS65 Scarce So Fine, Luminous Surfaces

**3816 1854 Type Two MS65 NGC.** The 1854 Type Two gold dollar is one of the two most plentiful issues of the Small Head design. The design change in 1854 accompanied a reduction in planchet thickness that allowed the Mint to make this small coin 2 mm larger in diameter. However, the thinner planchet also caused strike problems, and the Type Two design was quickly replaced in 1856 with a lower relief Liberty portrait.

Type Two gold dollars in Gem condition are scarce and highly sought-after. This first-year example shimmers beneath a light, revealing original peach-gold and honey hues. The coin is fairly well struck for the type and presents outstanding eye appeal worthy of the finest gold dollar collection. Census: 25 in 65 (3 in 65+), 8 finer (3/19). NGC ID# 25C3, PCGS# 7531

## PROOF GOLD DOLLARS

### 1860 Gold Dollar, PR65 Cameo High Mintage, Low Survivorship

**3817** 1860 PR65 Cameo NGC. JD-1, R.6. The Philadelphia Mint was early in its new policy of offering proofs to the general public for greater than face value, which may explain the high mintage of 154 gold dollar proofs dated 1860. The 1859 gold dollar mintage was 80 proofs (sold in sets at face value), and the Mint might logically expect an increase in sales — although it seems unlikely the sales would almost double. Perhaps the gold dollar proofs were touted as Christmas gifts.

This is a glittering Gem Cameo proof, with glassy-smooth mirrored fields and nicely frosted devices. Attractive, medium-gold color contrasts boldly with the raised elements, while the only mentionable abrasions include a trio of faint slide marks on Liberty's cheek, visible with a loupe. The 2018 John Dannreuther reference for proof gold estimates 18 to 20 1860 proofs survive, while the Bowers' reference indicates as many as 30 pieces may exist in all proof formats. Census: 4 in 65 Cameo (1 in 65+), 2 finer (3/19). NGC ID# 25E3, PCGS# 87610

### 1860 Gold Dollar, PR66 Ultra Cameo Deeply Contrasted Early Proof Tied Finest Known, Sole Finest at NGC

**3818** 1860 PR66 Ultra Cameo NGC. JD-1, R.6. Numismatics was on the upswing in 1860, although somewhat distracted by the prospect of war. The art of coin collecting in its modern form was in its infancy, and the first few collectors of American coinage were largely focused on the "old copper" cents and half cents, Colonial coinage, and Washingtonia.

From that perspective, the Mint's reported production of 154 proof gold dollars seems unusually large, especially with only 25 to 35 pieces that survive today. John Dannreuther's recent research is even more conservative, estimating the number of 1860 proofs that survive at 18 to 20 known, and supported by a detailed roster to that effect.

Bowers notes that "perhaps Proofs were also distributed elsewhere, such as when the Japanese ambassador visited the Mint and received a full Proof set of the year, and others in his retinue possibly received single Proofs." Dannreuther quotes R.W. Julian's research that "the excess 1860 and 1861 gold proofs were sent to Melter and Refiner in January 1862 and consigned to the melting pots."

The present Premium Gem Ultra Cameo is the sole finest in this classification at NGC, and none are finer (3/19). The finest Deep Cameo at PCGS is also a sole PR66 coin. This piece is deeply contrasted with appealing medium yellow-gold color and thick mint frost against an absolute minimum of post-Mint marks. A couple of tiny lint marks in the field are as struck, as is a small indented planchet defect on the leaf left of the bow. Isolated areas of "orange peel effect" exist, due to overheating of the planchet.

Ex: *The Fairfax Collection/Central States Signature* (Heritage, 4/2013), lot 4453. NGC ID# D9KJ, PCGS# 97610

## LIBERTY QUARTER EAGLES

**1861 Gold Dollar, PR67 Cameo  
None Certified Finer**

**3819** 1861 PR67 Cameo NGC. JD-1, R.6. Although the mintage of 1861 proof gold dollars is recorded as 349 pieces the great majority was apparently melted as unsold, leaving few extant specimens. Walter Breen in his 1988 *Encyclopedia* says "probably fewer than 25 survive, some impaired." NGC/PCGS population data are more or less in line with Breen's estimates—the two services have graded 34 examples, 12 of which are Cameos (a number of these are undoubtedly resubmissions). John Dannreuther's table of significant examples includes 17 pieces, apparently all different examples.

Immaculately preserved brass-gold surfaces greet the observer of this gorgeous Superb Gem. An exacting strike delivers crisp definition to the frosted design elements that stand out against the mirrored fields. This is a wonderful example of this Civil War era specimen that is sure to draw serious attention from aficionados of proof gold coinage. Census: 2 in 67 Cameo (1 in 67+), 0 finer (3/19).

Ex: *Summer FUN Signature* (Heritage, 7/2009), lot 1291. NGC ID# 25E4, PCGS# 87611

**1844-C Quarter Eagle, MS61  
Variety 1, A Condition Rarity**

**3820** 1844-C MS61 PCGS. CAC. Variety 1. The only die pair for the year. A lustrous honey-gold specimen with distinctive green and rose overtones, this satiny specimen has a typical strike with design weakness in the usual locations, especially on the left (facing) leg on the reverse. The surfaces have few abrasions, and the overall eye appeal is exceptional. In his 2008 reference on Charlotte Mint gold, Doug Winter writes: "Due to a number of reasons, this date is typically found in lower grades than most other Charlotte quarter eagles." He estimates that only four to six Mint State examples of the 1844-C survive from a total existing population of 150 to 175 coins. Population: 3 in 61, 3 finer. CAC: 1 in 61, 1 finer (3/19). NGC ID# 25GU, PCGS# 7735

## 1848 CAL. Quarter Eagle, AU53 The Ultimate Gold Rush Souvenir

**3821 1848 CAL. AU53 PCGS.** It is widely believed that the 1892 Columbian Exposition half dollar represents the inaugural commemorative issue in United States numismatics, but one must go back 44 years for the veritable first-year souvenir coinage issue: the 1848 CAL. quarter eagle.

James Marshall's discovery of gold on John Sutter's property in January 1848 had unprecedented effects on the economy, political landscape, and demographics of the United States and shaped its history as few events have. Recognizing the massive changes about to take place, President James Polk announced in his December 5, 1848 annual address:

"The accounts of the abundance of gold in that territory are of such an extraordinary character as would scarcely command belief were they not corroborated by the authentic reports of officers in the public service who have visited the mineral district and derived the facts which they detail from personal observation."

Three days later on December 8 the first deposit of California gold arrived at the Philadelphia Mint. It was delivered by David Garter and amounted to 1,804.49 ounces after assaying. The next day, December 9, another 228 ounces of .894 fine gold arrived at the Mint, sent by R.B. Mason, Jr. from California. Regarding that delivery, Secretary of War W.L. Marcy wrote to Mint Director Robert M. Patterson:

"If the metal is found to be pure gold, as I doubt not that it will be, I request you to reserve enough of it for two medals ordered by Congress and not yet completed, and the remainder, with the exception of one or two small bars, I wish to have coined and sent with the bars to this department. As many may wish to procure specimens made with California gold, by exchanging other coin for it, I would suggest that it be made into quarter eagles with a distinguishing mark on each ... ."

After a month's delay related to assaying the gold and having the coins struck and impressed with the CAL. stamp above the eagle's head, the commemorative quarter eagles were ready on January 5, 1849. These were made from the 228 ounces delivered December 9, while the two medals to which Marcy referred were struck from gold received the day before. It is believed that 1,389 counterstamped quarter eagle were struck and that about 150, certainly no more than 200 pieces survive.

This AU53 representative in an old green holder features undeniable prooflike reflectivity in the fields. Strike detail is pinpoint-sharp around the borders and shows a touch of softness on the eagle's neck and left leg, and on Liberty's middle curls. Specks of deep reddish patina on the obverse complement rich yellow-gold color overall. Small marks are trivial. An important example of our country's first commemorative coin and the ultimate Gold Rush souvenir. NGC ID# 25HA, PCGS# 7749

## PROOF LIBERTY QUARTER EAGLES

**1902 Quarter Eagle, PR65  
Green Label Holder, Green CAC  
Subtle Cameo Contrast**

**3822** 1902 PR65 PCGS. CAC. Beginning in 1902, the Mint altered its process for finishing proof dies such that the devices seldom produced a cameo effect on the struck coin. Less than 10% of the 1902 proof quarter eagles reported by PCGS have a Cameo designation, and no Deep Cameos are reported. In their gold *Encyclopedia*, Garrett and Guth write that "most of the coins seen are less than superb." This CAC-endorsed Gem is something special for the grade, and for the issue overall. It showcases a needle-sharp strike and rich orange-gold color with wisps of brighter silvery hues throughout. Both sides have modest field-device contrast, particularly the reverse. Eye appeal is simply exceptional. Housed in a green label holder with CAC endorsement. Population: 13 in 65 (1 in 65+), 6 finer. CAC: 5 in 65, 2 finer (3/19). NGC ID# 2885, PCGS# 7928

**1907 Two and a Half, PR65  
Attractive Proof Type Coin**

**3823** 1907 PR65 PCGS. JD-1, R.4. The proof 1907 quarter eagle comes from a mintage of 154 coins, making it moderately collectible among proof Liberty Head gold issues. However, it is not as plentiful as the certification totals suggest. The combined PCGS and NGC certified population exceeds the mintage total by 76 coins. It is likely that the actual survivorship of this issue is about half what the certified total is, as John Dannreuther suggests: "100 to 120 known."

The Gem proof offered here displays a full strike and satiny devices, with deep mirroring in the fields. The bright yellow-gold color is attractive. Strong cameo contrast is apparent on the reverse, although the obverse is less well contrasted and prevents a Cameo designation from PCGS. Population: 11 in 65, 12 finer; 9 in 65 (1 in 65+) Cameo, 18 finer; 1 in 65 Deep Cameo, 1 finer (3/19). NGC ID# 7KG7, PCGS# 7933

## INDIAN QUARTER EAGLES

### 1911 Two and a Half, MS66 A Condition Census Rarity Few Ever Auctioned So Fine

**3824** 1911 MS66 NGC. Most of the Indian quarter eagles known in MS66 are dated 1908 or 1925-D. The 1911, along with many other issues, is a grand rarity in such fine condition. This is a Condition Census example. NGC reports just seven other MS66 pieces (one of which is Star-designated) and PCGS lists only one; neither service reports a finer coin (3/19). This example represents possibly the single most important opportunity for Registry Set collectors of this sale. The NGC Set Registry lists some 534 Indian quarter eagle circulation strike sets. The highest-ranked of these almost all share a common denominator: they contain a 1911 in MS66. Top-grade examples of this issue are synonymous with top-tier quality in the NGC Set Registry. The present example offers glistening satin luster and original honey-gold color. The strike is sharp, and the preservation is, in a word: exceptional. NGC ID# 7KR6, PCGS# 7942

### 1911-D Two and a Half, MS64 Satiny Rose-Gold Key Date

**3825** 1911-D MS64 NGC. According to Jeff Garrett and Ron Guth, writing in their *Encyclopedia of U.S. Gold Coins*: "The 1911-D Indian Head quarter eagle is the key to the series in all grades. It boasts not only the lowest mintage (by far), but few examples were saved at the time of issue. Most of the survivors are in lower Mint State grades, and even those often show areas of minor friction on Liberty's cheek." This near-Gem is obviously unworn. Each side exhibits crisp definition, including on the often-indistinguishable mintmark. Rose-gold color and satiny mint luster blend over well-preserved surfaces, with the usual partial wire rim along the upper obverse border. The only notable abrasions occur above and behind the eagle's head. NGC ID# 7KR7, PCGS# 7943

## 1911-D Two and a Half, Luminous MS64 Rarely Offered in Finer Condition

**3826 1911-D MS64 PCGS.** Strong D. A mintage of only 55,680 quarter eagles was accomplished at the Denver Mint in 1911, and the denomination would not be coined there again until 1914. The Mint Director's *Annual Report* for the fiscal year 1911, stated in part:

"The gold quarter eagle is a coin for which there is no demand for business uses. There is a call for them each year, about the holiday season, for gift purposes, and during the remainder of the year they drift back to the Treasury."

The 1911-D is the key date in the Indian quarter eagle series, but since commercial use of this denomination was limited, many Uncirculated survivors are known. Even so, most grade MS63 or lower. This Choice example is among the finest coins typically available to collectors, as Gems are decidedly rare — only 26 such pieces are reported at PCGS (11/18). This near-Gem is sharply struck and has a strong mintmark. Luster is wheat-gold in color and attractively shimmers across each side. NGC ID# 7KR7, PCGS# 7943

## 1911-D Quarter Eagle, Sharp MS64 High-End Surfaces, Great Eye Appeal

**3827 1911-D MS64 NGC.** The 55,680-piece mintage is by far the lowest of the series, although there are a couple of Indian Head quarter eagles that are marginally scarcer in high Uncirculated grades. Overall, the 1911-D is by far the rarest issue in all grades combined. Demand is unrelenting for any 1911-D, and those who prefer to wait for a particularly high-end coin should pay close attention to this near-Gem example.

A diagnostic raised wire rim encompasses the entire right side of the coin (a good indicator of a bold strike), while the all-important mintmark is razor-sharp, as is the eagle's feather definition and the Indian's headdress. Sparkling orange-gold color radiates from both sides, with eye appeal seldom seen for this challenging Denver mint issue. A loupe reveals only a few tiny marks, and most of those are tiny planchet irregularities. We seldom see an '11-D this Choice. NGC ID# 7KR7, PCGS# 7943

### 1914 Two and a Half, MS65 Condition Key

**3828 1914 MS65 NGC.** No Indian quarter eagle issue is truly rare in the absolute sense, although the 1911-D is a key date in all grades because of its low mintage. However, this does not hold true for the series in Gem condition. In MS65, there are three significant condition rarities that pose an obstacle for the collector seeking to complete a Gem date and mintmark collection: the 1911-D, 1914, and 1914-D. The 1911-D is the rarest Indian quarter eagle in MS65, but the two 1914 issues are not much more available. Between the two, the Philadelphia coin appears at auction slightly less frequently in Gem and better grades than the Denver issue.

This Gem 1914 Indian quarter eagle displays luminous wheat-gold mint luster that is devoid of bothersome abrasions. The strike is sharp and eye appeal is outstanding. Only a handful of finer pieces are known, which will be out of reach for most collectors. Census: 48 in 65 (1 in 65+), 3 finer (2/19). NGC ID# 7KRA, PCGS# 7946

### 1914 Two and a Half, MS65 Luminous Original Surfaces

**3829 1914 MS65 PCGS.** The 1914 is one of the rarest Indian quarter eagles in Gem condition, and it is nearly uncollectible any finer. It is a condition key in MS65. Indian quarter eagles are one of the most widely collected gold series in American numismatics, with few stoppers and a relatively short production run. The Philadelphia Mint was the most regular coiner of this series in each production year, but in 1914, only 240,000 pieces were struck — the lowest mintage in the series after the key-date 1911-D. This Gem displays frosty wheat-gold mint luster and a bold strike. Neither side has bothersome abrasions. Population: 65 in 65 (1 in 65+), 3 finer (3/19). NGC ID# 7KRA, PCGS# 7946

## PROOF INDIAN QUARTER EAGLES

### 1914 Quarter Eagle, MS65 Only Three Numerically Finer at PCGS

**3830 1914 MS65 PCGS.** The 1914 boasts the second-lowest mintage in the Indian quarter eagle series (behind only the key-date 1911-D), and is proportionately ranked as the second-scarcest in Mint State condition. At the Gem grade level, the date becomes a rarity in the context of the series, and here ranks as the third rarest date overall (trailing only the 1911-D and the 1914-D). The design elements are sharply struck throughout, though one could make a technical exception for the lowest headdress feather which ill-defined in select areas. The luster is satiny and honey-gold in color, and the well-preserved surfaces are fully deserving of the assigned Gem grade. Population: 65 in 65 (1 in 65+), 3 finer (3/19). NGC ID# 7KRA, PCGS# 7946

### 1909 Quarter Eagle, PR64 A Rarity in All Grades

**3831 1909 PR64 PCGS. JD-1, High R.4.** The PCGS estimate of fewer than 100 survivors for the 1909 proof quarter eagle is generous, likely based off of the certified population, which includes 111 submissions at PCGS and NGC combined. John Dannreuther estimates a much smaller survivorship of just 50 to 60 pieces. He writes in *United States Proof Coins, Volume IV: Gold*, "The change to the Satin (or Roman, as they are also called) style for Proofs in 1909 also saw the mintage drop significantly to 139 coins with the number sold reported as 78." This is more consistent with the auction appearance rate of this issue. Since our Permanent Auction Archives began in 1993, we have handled a 1909 proof quarter eagle on only 27 occasions, including some reappearances of individual coins.

This near-Gem example displays razor-sharp definition and luminous straw-gold surfaces. Neither side has mentionable imperfections. Population: 27 in 64, 4 finer (3/19). NGC ID# 289H, PCGS# 7958

## 1914 Quarter Eagle, PR67+ Tied for Finest at PCGS Incredibly Rare This Fine

**3832 1914 PR67+ PCGS. CAC. JD-1, Low R.5.** Proof Indian quarter eagle production dropped off toward the end of the short-lived matte proof series. Contemporary collectors were uninspired by the sandblast finish and interest in proof gold coins fizzled. In 1914, the Mint used a coarser sand for the sandblast finishing process. Walter Breen wrote in his *Proof Encyclopedia*: "Coarse sandblast finish, darker than 1913. Under a microscope the facets appear larger than on 1913." John Dannreuther supports this assessment in his recent reference work, *United States Proof Coins, Volume IV: Gold*: "The darker finish seen on 1914 quarter eagles is the result of coarser sand used in the sandblasting procedure."

Collector orders for proof quarter eagles in 1914 brought about the coinage of only 117 coins, of which perhaps only 70 to 80 pieces survive today. The combined PCGS and NGC certified population of 134 coins is highly inflated by resubmissions. Since our Permanent Auction Archives began in 1993, Heritage has handled a proof 1914 quarter eagle on only 23 occasions, including reappearances of some individual pieces. Nine of those 23 offerings have been Superb Gems, albeit all certified by NGC. This is the first PCGS-graded Superb Gem proof that we have handled, and it is only the second CAC-approved example we have seen in this grade. The only comparable past offering in our archives is the PR67+ NGC CAC coin in the Central States Signature (Heritage, 4/2015), lot 5281, which realized \$64,625. That is an auction record for this issue, and the PCGS twin offered here could easily surpass it.

This coin displays pristine matte surfaces with rich olive-gold color. The sharpness is superb and eye appeal is outstanding. PCGS lists one other PR67+ coin but none finer. This piece is also one of the three finest 1914 proof quarter eagles with CAC endorsement. A true prize for the Indian gold collector. Population: 4 in 67 (2 in 67+), 0 finer. CAC: 3 in 67, 0 finer (3/19). NGC ID# 289N, PCGS# 7963

## THREE DOLLAR GOLD PIECES

**1915 Indian Quarter Eagle, PR67**  
**Rare Final Proof Issue**

**3833** 1915 PR67 NGC. Proof Indian quarter eagles were struck for the last time in 1915, when a meager mintage of 100 coins was produced. The 1915 is considered the key to the proof series, as it is the most elusive issue in absolute terms and the second rarest in high grade. It is likely that some proofs went unsold and were either melted or released into circulation after the end of the year. In *The Gold Indians of Bela Lyon Pratt*, Allan Schein estimates the surviving population at no more than 60 examples in all grades.

This magnificent Superb Gem proof exhibits razor-sharp definition on all design elements and the impeccably preserved orange-gold surfaces show the flat matte luster typical of the series. Eye appeal is tremendous. We expect intense competition from series specialists when this lot is called. Census: 6 in 67, 2 finer (3/19). NGC ID# 289P, PCGS# 7964

**1854-D Three Dollar Gold, AU50**  
**Only Dahlonega Mint Three**

**3834** 1854-D AU50 PCGS. Variety 1-A. A small mintage of 1,120 three dollar gold pieces was accomplished at the Dahlonega Mint in 1854, the first year of the denomination. As things worked out, it was also the last, and only, year three dollar gold coins were struck at the famous Southern mint, making the issue a "must-have" for branch mint type collectors and series specialists alike. Most examples seen are in the VF-AU grade range and Mint State specimens are sought-after rarities. The coin offered here is an impressive AU specimen with well-detailed design elements that exhibit just a touch of wear on the high points. Some clash marks are evident on both sides. The lightly abraded orange-gold surfaces retain traces of original mint luster. The overall presentation is quite appealing. Population: 18 in 50, 47 finer (3/19).

**From The Chinook Collection.** NGC ID# 25M4, PCGS# 7970

**1854-D Three Dollar, AU55  
Singular Dahlonega Key  
Of Utmost Rarity This Fine**

**3835** 1854-D AU55 PCGS. *Variety 1-A*. The three dollar gold piece went into production in 1854 at three mints — Philadelphia, New Orleans, and Dahlonega. San Francisco began producing gold three dollar pieces in 1855, albeit sporadically. As for the New Orleans and Dahlonega, the 1854 coinages were to be the only production of the odd denomination at those facilities. By far the lowest mintage of the two belongs to the D-mint coin: just 1,120 pieces. Dahlonega gold authority Doug Winter estimates that fewer than 175 pieces survive in all grades today. The issue is prohibitively rare in Mint State, and attractive AU coins are auction highlights whenever offered.

The present coin displays satiny honey-gold surfaces with hints of luster in the protected areas. Central sharpness is good, although the borders are weakly defined. Doug Winter writes of this issue: "The border is nearly always softer than the center." Population: 22 in 55, 13 finer (2/19). NGC ID# 25M4, PCGS# 7970

**1854-O Three Dollar, AU58  
Only Louisiana Issue in the Series**

**3836** 1854-O AU58 NGC. *Variety 2*. This New Orleans three dollar gold piece, from one of only two Southern issues in the series, features a lapped reverse, as usual. It is one of 24,000 examples struck, all from the same set of dies. The variety attribution merely refers to the die state in this case. The 1854-O is available in the absolute sense, but ever-strong demand drives prices at the near-Mint level. Uncirculated survivors are genuinely rare.

This AU58 has bright straw-gold surfaces with partial mint luster. Strongly detailed aside from the previously mentioned lapping on 85 in the date and the ribbon below. Small abrasions peppered throughout. The NGC *Census* reports 24 finer submissions (2/19).

**From The Jersey Shore Gold Collection.** NGC ID# 25M5, PCGS# 7971

## 1854-O Three Dollar Gold, MS61 Popular One-Year Type Coin

**3837 1854-O MS61 NGC. Variety 2.** As the only three dollar gold piece struck at the New Orleans Mint, the 1854-O is a popular one-year type coin, from a mintage of 24,000 pieces. Only one pair of dies was used to strike the entire production, but Doug Winter notes two different die states, traditionally identified as Variety 1 and Variety 2. This coin represents the late die state Variety 2, with extensive lapping on the ribbon knot. The 1854-O is not as difficult to locate as the mintage figure would suggest, but collector demand far outstrips the supply for this issue and the 1854-O is rare in Mint State grades.

This attractive MS61 example exhibits well-detailed design elements, with just a trace of softness on the curls below LIBERTY and some incomplete detail on the reverse, due to the noted lapping. The pleasing orange-gold surfaces are lightly marked for the grade and both sides retain much original mint luster. Census: 11 in 61 (1 in 61+), 5 finer (3/19). NGC ID# 25M5, PCGS# 7971

## 1859 Three Dollar Gold, MS65 Exceptional Type Coin

**3838 1859 MS65 PCGS.** The 1859 three dollar gold piece claims a mintage of 15,589 pieces, a small production in absolute terms, but actually quite generous in the context of the series. The coins circulated extensively near the time of issue and examples in circulated grades are reasonably available in today's market. Lower Mint State examples are scarce and the 1859 is a condition rarity at the MS65 grade level. The present coin is a spectacular Gem, with sharply detailed design elements and nearly flawless orange-gold surfaces that radiate vibrant mint luster throughout. Eye appeal is terrific. Population: 6 in 65, 3 finer (3/19).

**From The Chinook Collection.** NGC ID# 7K5K, PCGS# 7979

### 1860-S Three Dollar Gold, MS60 Rarely Seen This Fine

**3839 1860-S MS60 PCGS.** A minuscule mintage of 7,000 three dollar gold pieces was accomplished at the San Francisco Mint in 1860 and few examples were saved for numismatic purposes. Most of the coins were released into circulation in the hard-money economy of the Western United States, where they suffered extensive wear and attrition over the years. Q. David Bowers estimates the surviving population at 100-130 examples in all grades, with the average grade in the VF range. Mint State examples are extremely rare.

The present coin is an impressive MS60 specimen, with well-detailed design elements and pleasing greenish gold surfaces that show a mix of satiny mint luster and prooflike reflectivity in the fields. The expected number of minor contact marks are evident, but the overall presentation is most attractive. Population: 1 in 60, 4 finer (3/19).

**From The Chinook Collection.** NGC ID# 7K5M, PCGS# 7981

### 1861 Three Dollar Gold, MS64 Seldom Seen This Fine

**3840 1861 MS64 PCGS.** A small mintage of 5,959 three dollar gold pieces was achieved at the Philadelphia Mint in 1861. Most of the coins released into circulation were hoarded and melted in the following years, after the financial stresses of the Civil War caused the U.S. government to suspend specie payments. Probably fewer than 250 examples have survived in all grades and the issue is a notable rarity in MS64 condition. The present coin is an impressive Choice example, with well-preserved orange-gold surfaces that show some light die striations in the fields. The design elements are sharply detailed and vibrant mint luster radiates from both sides. Eye appeal is outstanding. Housed in a green label holder. Population: 12 in 64, 4 finer (3/19). NGC ID# 7K5N, PCGS# 7982

## 1865 Three Dollar Gold, MS60 Better Date in All Grades

**3841 1865 MS60 NGC.** A paltry coinage of only 1,140 pieces earns the 1865 three dollar piece status as a better date in the series. Lightly circulated or impaired pieces are occasionally seen, but in Mint State this coin is a great rarity. NGC lists only 27 Uncirculated submissions, with the most common grade being MS61 (likely inflated by resubmissions). This collectible MS60 coin has bright yellow-gold surfaces and semireflective fields. The strike is impressively sharp, and grade-limiting abrasions are relatively light and unobtrusive to the naked eye. Census: 3 in 60, 24 finer (3/19).

**From The Chinook Collection.** NGC ID# 7K5S, PCGS# 7986

## 1870 Three Dollar Gold, MS63 Rare Issue in Mint State

**3842 1870 MS63 PCGS.** Mint records indicate only 3,500 business-strike three dollar gold pieces were struck in 1870, accompanied by an even smaller mintage of 25 proofs. As might be expected with such a small production, many business strikes have prooflike surfaces. Fortunately, the leaf to the left of the date on the reverse of the business-strike die was largely effaced in the preparation process, making it easy to differentiate between proofs and regular issues.

The present coin is an impressive Select specimen, with well-detailed design elements that show just a vestigial remnant of the leaf to the left of the date. The pleasing orange-gold surfaces are lightly marked and exhibit a mix of satiny mint luster and prooflike reflectivity in the fields. Eye appeal is outstanding. Population: 10 in 63 (1 in 63+), 3 finer (3/19).

**From The Chinook Collection.** NGC ID# 7K8F, PCGS# 7991

### 1872 Three Dollar Gold, MS64 Rich Color, Deeply Reflective Fields

**3843** 1872 MS64 PCGS. CAC. In the post-Civil War era for three dollar gold pieces, there are only two high-mintage type coins — the 1874 and 1878 — all other dates are low-mintage rarities. The 1872 falls into the latter category, as only 2,000 business strikes were produced. This near-Gem representative shows rich, even reddish-gold color with typically reflective fields and a solid strike, offering great visual appeal for the date. Only a few scattered wispy abrasions in the fields preclude an even finer designation. PCGS has certified only four examples in MS64 (one in 64+) and a single coin finer (3/19).

**From The Chinook Collection.** NGC ID# 25MV, PCGS# 7994

### 1873 Closed 3 Three Dollar, MS62 Prooflike Excellent Proof Alternative

**3844** 1873 Closed 3, MS62 Prooflike NGC. The two major varieties of 1873 three dollar gold pieces are the Closed (or Close) 3 and the Open 3. We use Closed 3 here due to numismatic tradition that began with Harry X Boosel, although the term Close 3 is more appropriate as the loops of the 3 are clearly separated. The 1873 three dollar issue is a great rarity, although the original mintage figure remains unknown. The Mint Report records 25 proofs as the only coins of the denomination struck during the year. That is clearly incorrect as a larger number of circulation strikes are known today. NGC has certified 51 pieces, including seven that are prooflike (3/19).

One of those prooflike pieces is the coin offered here, tied for third finest of the prooflike specimens behind two numerically finer Prooflike examples at NGC. This pleasing piece has brilliant yellow-gold surfaces with scattered marks and a few minor hairlines on the mirrored fields. The devices lack full detail, but show strong luster with exceptional contrast. This piece would fit nicely in an otherwise proof collection of three dollar gold pieces. Census: 2 in 62 Prooflike, 2 finer (3/19).

*Ex: Rosemont Signature (Heritage, 8/2013), lot 5823, realized \$30,550.*

**From The Chinook Collection.** NGC ID# 25MW, PCGS# 77995

## 1877 Three Dollar Gold, MS61 Low-Mintage Rarity

**3845 1877 MS61 PCGS.** Ex: South Texas. Sandwiched between the high mintage 1874 and 1878 three dollar gold issues are the proof-only 1875 and 1876 productions, and the low-mintage 1877, from a business-strike production of only 1,468 coins. The Smithsonian Institution has just one example that is graded AU58 Prooflike. This specimen from the South Texas collection is slightly finer at MS61. Although the contrast is undesignated, this example has mirrored straw-gold fields with splashes of pale blue and light orange toning. A glass is required to see the trivial hairlines and surface marks on this impressive piece. Population: 8 in 61, 6 finer (3/19).

Ex: *Rosemont Signature* (Heritage, 8/2013), lot 5824, realized \$22,325.

**From The Chinook Collection.** NGC ID# 25MY, PCGS# 7999

## 1878 Three Dollar, MS66 High Mintage, But Rarely Seen This Fine

**3846 1878 MS66 NGC.** The Mint miscalculated the public's desire to exchange paper money for gold coin. In an offer not made since 1861, anyone could exchange paper bills for gold at par — causing the Mint to shore up its supply of three dollar pieces at the end of December 1878. When the right of exchange commenced on January 1, 1879, the public preferred paper currency, and more than 82,000 three dollar gold pieces, freshly minted, remained in bank vaults. Some were returned to the Treasury in mint bags and were melted, while the rest just sat around, waiting for the price of gold to increase.

The 1878 is well-known for its scintillating, jewel-like surfaces in high grades — a characteristic shared by this outstanding Premium Gem example. Pleasing wheat-gold color is deeply immersed in mint luster and coruscated, with frosted surfaces that lock in the brilliant shine. While considered readily available among all three dollar gold pieces, this issue is surprisingly scarce in this high Uncirculated grade, and rare any finer. Census: 44 in 66 (3 in 66+, 4 in 66★, 1 in 66+★), 13 finer (3/19). NGC ID# 25MZ, PCGS# 8000

### 1882 Three Dollar Gold Piece MS65★ Prooflike Dramatic Cameo Contrast

**3847** 1882 Repunched Date, FS-301, MS65★ Prooflike NGC. The repunched date, offset north and visible mostly on the 82, identifies the circulation strike coinage dies of the 1882 three dollar gold piece, despite the present coin showing deep prooflike mirroring. The coin is sharply struck and it displays dramatic field-device contrast. Bright yellow-gold coloration complements a lack of contact marks, and eye appeal is outstanding. True cameo contrast is apparent on each side. Overall, the 1882 three dollar gold piece is rare in Gem condition, and coins designated Prooflike are in the minority. Just 1,500 pieces were struck of this issue. Census: 10 in 65 (2 in 65★, 2 in 65 Prooflike, 1 in 65★ Prooflike), 3 finer (3/19).

**From The Chinook Collection.** NGC ID# 4DXC, PCGS# 145710 Base PCGS# 8004

### 1884 Three Dollar, MS64 Prooflike Glimmering Cameo

**3848** 1884 MS64 Prooflike NGC. The 1884 three dollar gold piece comes from a trivial mintage of only 1,000 coins. NGC has seen just 53 grading events for the issue, five of which are for coins designated Prooflike. This near-Gem is the finest of the Prooflike pieces by a margin of two grade points (3/19). Bright yellow-gold surfaces produce appreciable contrast and are free of major abrasions. The strike is sharp, most notably on the wreath bow, where softness usually prevails. An outstanding example of the type and a condition rarity among 1884 coins.

*Ex: Central States Signature (Heritage, 4-5/2009), lot 3735, which realized \$10,350.*

**From The Chinook Collection.** NGC ID# 25N7, PCGS# 78006

## 1889 Three Dollar Gold, MS66 Remarkable High-End Type Coin

**3849** 1889 MS66 NGC. Although only 2,300 pieces were struck, the 1889 three dollar gold piece is a popular type coin. Few examples circulated, and a number of relatively attractive Mint State pieces are known today. Like the 1878 and other popular type coin issues, the 1889 is often found with shimmering mint luster and great color. Nonetheless, Premium Gem examples are conditionally rare, and finer pieces are almost uncollectible. This coin displays bright yellow-gold luster across the interiors, ceding to deeper orange-gold around the borders. The strike is sharp, and only a few truly faint grazes in the semireflective fields prevent an even finer grade. Eye appeal is excellent. Census: 8 in 66, 0 finer (3/19).

*From The Chinook Collection.* NGC ID# 7KDU, PCGS# 8011

## 1889 Three Dollar Gold, MS66+ Highly Lustrous and Colorful Final Year of Denomination

**3850** 1889 MS66+ PCGS. CAC. The three dollar gold denomination was discontinued after 1889, when a token business-strike mintage of 2,300 pieces was accomplished. Many of the coins were never released into circulation and were melted in the 1893-1894 time period. Super collector Virgil Brand ordered 50 specimens of the 1889 three dollar gold piece directly from the mint at the time of issue. Those coins would have been dispersed in later years, possibly providing many of the high-grade examples known to collectors today.

The present coin is a delightful Plus-graded Premium Gem, with sharply detailed design elements and vibrant, satiny mint luster on both sides. The surfaces display a rich interplay between orange-gold and lilac patina, and each side shows only minimal signs of contact with terrific overall eye appeal. Population: 14 in 66 (3 in 66+), 2 finer. CAC: 4 in 66, 0 finer (2/19). NGC ID# 7KDU, PCGS# 8011

## PROOF THREE DOLLAR GOLD PIECES

### 1854 Three Dollar, PR61 Rare First-Year Proof Only 10 to 12 Pieces Believed Extant

**3851** 1854 PR61 NGC. JD-1, Low R.7. The exact number of proof 1854 three dollar gold pieces struck is uncertain; we know of at least 15 coins that were delivered to the Secretary of the Treasury in late April 1854, but it is possible that a few more were produced later in the year, after business strike production began in early May. The combined NGC and PCGS certified populations count only 15 coins (3/19), likely including at least a few resubmissions. We estimate only about 10 to 12 examples are extant, one of which permanently resides in the Smithsonian Institution.

Our archives show only eight previous offerings of this first-year proof issue in the past decade. The present piece is numerically the lowest-grade example we have handled, and it is an ideal opportunity for the budget-minded collector to acquire this extremely rare proof issue. The design elements are fully brought up and are set against a deeply mirrored, straw-gold backdrop that delivers excellent visual appeal. Light hairlines in the fields account for the grade, but this piece is devoid of detectable contact marks. An important offering of this rare and significant proof three dollar issue. Census: 1 in 61, 3 finer (3/19).

*Ex: FUN Signature (Heritage, 1/2015), lot 4264, which realized \$30,550.*

**From The Chinook Collection.** NGC ID# 289R, PCGS# 8017

## 1864 Three Dollar Gold, PR64+ Cameo Rare Gold Proof Issue Tied for Finest at PCGS, Ex: Friend

**3852 1864 PR64+ Cameo PCGS. CAC. JD-1, High R.6.** Ex: Friend. The 1864 three dollar gold piece is an elusive issue as a date. According to Mint records, only 2,630 regular-issue examples were struck at the Philadelphia Mint, accompanied by 50 proofs. No coins were produced at the branch mints and few high-quality business strikes were saved for numismatic purposes. Although the proof mintage was more than adequate to satisfy collector demand, which was quite small at the time, the rarity of high-grade business-strikes put intense pressure on the small supply of proofs as the hobby expanded in later years.

There were many reasons for the decreased demand for proofs in 1864. The economic and political uncertainties of the Civil War caused widespread hoarding of all precious metal coinage, which was seldom seen in circulation during the war years. As a result, the U.S. government suspended specie payments late in 1861, and did not resume them until 1879. This policy prevented the Mint from accepting the government's own paper money at par in exchange for gold. Two options were open to collectors who wished to acquire gold proof sets during this era, neither of them very attractive. They could choose to pay in greenbacks at an exorbitant premium, or they could pay in gold, which usually meant dealing with a bullion broker to acquire the necessary gold coins, also at a substantial premium.

The proofing charge (first instituted in 1860), and postage, etc., continued to apply, as well. The complicated and expensive ordering process discouraged all but the most committed collectors at a time when most people had more serious demands on their personal finances. It is doubtful that all 50 gold proof sets produced in 1864 were actually distributed, as the normal mintage in surrounding years was on the order of 25-35 sets, and there is no reason to believe more than that number were sold in 1864. The unsold remainder was probably melted after the end of the year. PCGS CoinFacts estimates the surviving population at 25-35 examples in all grades, as the survival rate seems to have been higher for the three dollar coins than for the other denominations of the year. Frequency of auction appearances indicates the issue may be scarcer than population data suggests, however, and Q. David Bowers estimates only 11-14 proofs are extant. John Dannreuther offers an estimate of 14 to 16 coins.

The present example shows the diagnostic date placement, slightly left of the position on business strikes, and an unintended area of die polish on the neck, near Liberty's hair. The vivid orange-gold surfaces show just a touch of the orange-peel texture evident on the best proofs of this era. The design elements are sharply detailed, with diagnostic doubling on the ribbon bow. The frosty devices contrast boldly with the deeply mirrored fields and the well-preserved surfaces show only a few minor signs of contact. Population: 2 in 64 (2 in 64+) Cameo, 0 finer. CAC: 2 in 64, 0 finer (3/19).

Ex: Dale Friend Collection of 1864 Proof Coinage / FUN Signature (Heritage, 1/2017), lot 5833, which realized \$56,400.

From The Chinook Collection. NGC ID# 28A4, PCGS# 88027

### 1865 Three Dollar, PR65 Cameo The Finest We Have Ever Offered Only 12 to 14 Pieces Known

**3853 1865 PR65 Cameo NGC. JD-1, R.6.** JD-1 represents the original proof dies of 1865, used to strike 25 coins in March of that year. The date is centered below DOLLAR, with the upright of the 1 below the left base of the first L. Two restrikes (circa 1869-1870) exist from different dies, showing the date further left with an upward cant to the right. John Dannreuther estimates that only 12 to 14 original proofs survive. Duplication is likely represented in the 21 coins reported by NGC and PCGS. We have previously handled a proof 1865 three dollar gold piece on only four occasions. Two of those appearances were more than two decades ago. The other two were in the recent FUN Signature (Heritage, 1/2019), lots 4640 and 4641. One of those coins was a JD-1 Original, graded PR60 NGC, the other a JD-2 Restrike, graded PR61 NGC. This Gem Cameo Original surpasses them both by leaps and bounds in terms of quality.

Bright yellow-gold surfaces yield sharp, frosty design elements and liquidlike glimmering fields. There is some mint-made planchet roughness near the U in UNITED, but there are no post-mint imperfections. Contrast is good. This is one of the landmark rarities in this year's Central States Signature auction, and it represents a once-in-a-lifetime opportunity to acquire a high-end example of this truly rare proof three dollar gold piece. Census: 2 in 65 Cameo, 3 finer (3/19).

**From The Chinook Collection.** PCGS# 88028

## 1867 Three Dollar, PR66 Cameo Only 14 to 16 Proofs Extant

**3854 1867 PR66 Cameo NGC. JD-1, High R.6.** The 1867 three dollar gold has long been a rarity within the series in both proof and circulation strike format, although its rarity as a proof is far greater than often realized. Proof coinage in 1867 occurred on two occasions, in March and July, with deliveries of 25 proofs each time. All 50 pieces were struck from a single die pair, which is easily differentiated from the circulation strike dies by the placement of the date — on the proof, the upright of the 1 in the date is under the base of the first L in DOLLAR, whereas the circulation strike shows the date further left. Walter Breen, in his *Proof Encyclopedia*, listed proofs from two different die pairs, but recent studies by John Dannreuther suggest that one of Breen's varieties merely constitutes prooflike business strikes, which have been confused with proofs in the past.

PCGS estimates a generous survivorship of 25 to 30 coins. The combined certified population lists 23 submissions in all grades, including possible duplication. Dannreuther's estimate of 14 to 16 coins is in agreement with the auction appearance rate of this issue. Since our Permanent Auction Archives began in 1993, we have handled a proof 1867 three dollar gold piece on only 14 previous occasions, including three prior appearances of the Premium Gem Cameo offered here, plus six appearances of a single impaired coin. In fact, this specific coin is one of only three different problem-free 1867 proofs that we have handled during the past two decades, and it is by far the finest. Such is the rarity of the 1867 proof three dollar piece.

Both sides of this stellar coin are covered in rich, mellow orange-gold coloration, with highly reflective fields and well-frosted devices creating noticeable contrast. There are a few tiny strike-throughs on the obverse, which serve as pedigree markers for such a high-grade gold proof. Strike-throughs of this nature are common on 1867 proofs. This will be a prize acquisition for the advanced proof gold collector. Census: 2 in 66 Cameo, 1 finer (3/19).

*Ex: Central States Signature (Heritage, 4/2011), lot 5366, which realized \$69,000; Rosemont Signature (Heritage, 8/2013), lot 5833, which realized \$64,625; FUN Signature (Heritage, 1/2014), lot 5398, which realized \$58,750.*

### 1872 Three Dollar Gold, PR63 Rare Low-Mintage Date

**3855** 1872 PR63 PCGS. JD-1, R.6. The Philadelphia Mint struck only a few circulation strikes (2,000 pieces) and a mere 30 proofs in 1872. The Dannreuther proof gold reference indicates a few additional proofs may have been struck by the Mint at the request of collectors and dealers. A high proof percentage survives, although in absolute terms it is still a small number, and the proofs are rare. The date on circulation strikes is positioned slightly higher and left than the date on proofs, and obverse die characteristics are different as well, so prooflike 1872 circulation strikes should not be confused with true proofs.

This Select coin meets all the proof die criteria. Gleaming sun-gold color radiates from mirrored fields, and the strike is sharp, particularly on the obverse. Unpolished areas within the openings of some letters in the legend and inside the ribbon loops are typical of the proof dies. Some minor cloudiness in the left obverse field and above DOLLARS exists, but there are no other mentionable marks or distractions for the assigned grade. Eye appeal is undeniably strong. Population: 6 in 63, 2 finer (3/19).

**From The Chinook Collection.** NGC ID# 28AC, PCGS# 8035

### 1873 Open 3 Three Dollar, PR62 Only 13 to 18 Pieces Believed Known

**3856** 1873 Open 3 PR62 PCGS. JD-1, Low R.7. Proof 1873 three dollar gold pieces are decidedly rare. This issue is known with both the Closed 3 and Open 3 date types, although the Closed 3 variant is the rarer of the two with only four to six pieces believed known. In *The United States \$3 Gold Pieces*, Dave Bowers and Doug Winter estimate that 13 to 18 Open 3 proofs survive.

Mint records indicate a coinage of 25 proofs, struck in February 1873, and no circulation strikes. It is unclear if the reported proofs were Closed 3 or Open 3 coins, or perhaps a combination. Bowers and Winter suggest additional proofs were struck later in the year, as evidenced by a rusted die state of the Open 3 coin. Others have suggested that some coins are restrikes of later years. Despite a lack of Mint documentation, circulation strikes are also known, all showing the Closed 3 logotype.

The rarity of the proof 1873 issue is not always fully appreciated. Since our Permanent Auction Archives began in 1993, we have handled an 1873 proof on only eight occasions, including reappearances of individual pieces. This is the only Open 3 proof that we have handled in more than a decade, and we have not seen a Closed 3 proof since 2011. This PR62 Open 3 coin is sharp and deeply mirrored in the fields. Hairlines on each side limit the grade but none are particularly bothersome. Eye appeal is outstanding for the PR62 level, although the sheer rarity of this coin is its primary appeal. Population: 4 in 62, 8 finer (3/19).

**From The Chinook Collection.** NGC ID# 28AF, PCGS# 8037

### 1876 Three Dollar Gold, PR55 Briefly Circulated, Possible Pocket Piece

**3857** 1876 PR55 PCGS. JD-1, High R.5. Similar to the 1875 three dollar gold pieces, the 1876 issue was produced in proof-only format. Each of the two issues are necessities for date collectors (with no circulation strikes available), and in strong demand. The official 1876 proof mintage is 45 pieces, although the actual mintage may be between 60 and 75 pieces. No definitive count is possible — PCGS reports 46 grading events, and NGC another 29 certifications (3/19) — perhaps extra proofs were struck for the Centennial. John Dannreuther reports Virgil Brand once owned 16 1876 proof three dollar gold pieces (!).

This example is attractive with rich, orange-gold color. The surfaces retain much reflectivity despite signs of minimal circulation and light friction in the fields. The strike lacks sharpness on Liberty's curls and the bowknot, where both areas show light wear. The tallest point of the bowknot points directly at the upright of 7 in the date, confirming the JD-1 die pair. Population: 3 in 55, 28 finer (3/19).

**From The Chinook Collection.** NGC ID# 28AJ, PCGS# 8040

Melting and Molding Bullion, Circa 1870s  
(Frank Leslie's Illustrated Newspaper, April 20, 1878)

## EARLY HALF EAGLES

### 1795 Small Eagle Five, BD-3, AU58+ Reflective Fields, First-Year Coin

**3858** 1795 Small Eagle, BD-3, High R.3, AU58+ PCGS. Bass-Dannreuther Die State c/b. Several faint die marks connect the TE in UNITED to the dentils in this die state. Although BD-3 is the only use of this reverse die, it is not currently documented with a terminal die state. At the early Mint, working dies were frequently used until they were heavily cracked. It is presumed that the BD-3 reverse must have failed quickly, resulting in few or no coins struck during the terminal period. The obverse die, by contrast was employed for BD-2, -3, and -4, before an obverse crack led to its retirement.

BD-3 is a plentiful variety among early half eagles. In fact, it is believed that BD-3 represents up to one third of all surviving 1795 Small Eagle fives, all 12 die varieties included. In *Early U.S. Gold Coin Varieties*, John Dannreuther writes: "Although this is a common variety of 1795 Small Eagle coinage, one must realize *common* is a very relative term. Even if there are 200 extant for this die pairing, it is still a rare coin."

BD-3 is especially sought-after in the upper AU and in Mint State grades as a type coin to represent the Small Eagle design and the first year of gold coinage at the early Mint. This coin is one of just two Plus-graded AU58 pieces at PCGS (3/19). It boasts a sharp central strike on Liberty's hair curls with slight high-point wear on the eagle's head. The borders are also well-defined, and in the peripheries the fields display attractive prooflike mirroring beneath a light. This bright yellow-gold coin has outstanding eye appeal and no distracting abrasions. NGC ID# 25ND, PCGS# 519852 Base PCGS# 8066

## 1795 Small Eagle Five Dollar, XF Details Popular S/D Reverse, BD-6

**3859** 1795 Small Eagle, S Over D, BD-6, R.5 — **Altered Surfaces** — **PCGS Genuine. XF Details.** Bass-Dannreuther Die State b/c, in an early stage. This popular Small Eagle variety shows obvious repunching of the second S in STATES over a previously punched D. This reverse was paired with two obverses. A number of die slips are seen on the reverse, seen as “spikes” that protrude from the dentils. The surfaces are a bit overbright and covered in reddish-gold color overall, deeper around the devices. A number of smaller abrasions are scattered across each side, but none are worthy of individual mention.

## 1795 BD-9 Half Eagle, Fine 15 Early Die State

**3860** 1795 Small Eagle, BD-9, High R.5, **Fine 15 PCGS.** Bass-Dannreuther Die State a/b. No clash marks are evident on either side, although they may be obscured, while the reverse die crack of later states is not present on this piece. The obverse die was used for varieties BD-8, 9, and 10, while the reverse was also used for BD-7. The obverse was also used for the unique Heraldic Eagle variety, BD-13. Although BD-9 is a plentiful variety relative to some other 1795 half eagle marriages, less than 50 examples are known. Light yellow-gold surfaces exhibit peripheral orange toning. Both sides have old scratches and myriad surface marks of varying degree. NGC ID# 25ND, PCGS# 519858 Base PCGS# 8066

### 1795 Capped Bust Right Half Eagle, AU53 Rare Heraldic Eagle Reverse BD-15 Variety

**3861 1795 Large Eagle, BD-15, High R.5, AU53 PCGS.** Bass-Dannreuther Die State b/c, displaying branching die cracks on the lower reverse. The 1795 Heraldic Eagle (or Large Eagle) five dollar gold pieces were all struck in mid-to-late 1797 or possibly in 1798. The issue was certainly struck after the 1797 BD-5 coins according to the Bass-Dannreuther reference, but the exact striking sequence is unknown. Perhaps as many as 500 to 1,000 pieces were produced of the BD-15 die pair, but only 30 to 35 coins are estimated to survive.

The date is recut, most obviously on the 1(7)95. The 9 is positioned lower than the other numerals. On the reverse, the A of AMERICA is diagnostic, sitting on wing feather 4 unlike any other 1795 Large Eagle variety. Multiple die breaks are seen through and around the eagle's tail. The obverse die state is confirmed by a lengthy crack that starts at the edge near star 10 and proceeds down through the hat, hair, and to the neck.

No 1795 Large Eagle fives appear at auction with any frequency, although the occasional opportunity does arise. When it comes, the chances are it will be an offering of the BD-15 variety to be pursued not only by date and variety collectors, but also by those who need a 1795 example for type.

Sharp detail remains throughout the surfaces of this appealing, green-gold coin. The fields display prooflike reflectivity in sheltered areas — especially on the margins surrounding the stars and legend. Liberty's cap and hair strands are boldly detailed. The eagle shows a touch of the usual weakness at the head, neck, and scroll center. The wings and wingtips, shield, and talons are crisp and frosted. The fields and devices show only minor abrasions commensurate with the About Uncirculated designation. Early gold specialists of all disciplines will be on high alert when this attractive lot is called.

*Ex: Robert Hilt, Liberty USA Collection / FUN Signature (Heritage, 1/2015), lot 4277, as AU53 NGC, brought \$76,375; Central States Signature (Heritage, 5/2016), lot 4775, realized \$64,625. NGC ID# 25NK, PCGS# 519869 Base PCGS# 8075*

## 1800 BD-2 Five Dollar, MS62 Fully Struck, Semireflective Fields

**3862** 1800 BD-2, High R.3, MS62 PCGS. CAC. Bass-Dannreuther Die State c/d. This late die state was probably terminal, and is characterized by the short die crack from the tip of the eagle's wingtip to the adjoining dentil. Although there are five varieties known of the 1800 five dollar, only four are collectible. This Blunt 1 obverse was mated with four different reverse dies. This particular variety was struck before any of the other Blunt 1 combinations. Of the 7,500 to 12,500 pieces estimated minted of this die variety, it is estimated that around 200 examples are known today. Most likely the dies were lapped shortly before this coin was struck, as seen by the bright, semireflective fields on each side. The strike is complete throughout with especially noteworthy detail on the hair of Liberty. The bright yellow-gold surfaces show just a hint of light reddish patina. NGC ID# 25NW, PCGS# 45592 Base PCGS# 8082

### 1800 BD-5 Half Eagle, MS64 Conditionally Rare Type Coin Intermediate Die State

**3863 1800 BD-5, High R.3, MS64 PCGS.** Bass-Dannreuther Die State d/b, an early stage. On the reverse, die cracks are evident at the R in AMERICA, and the I and D in UNITED, but the crack through the bottom of the shield has not yet formed. On the obverse, the bisecting die crack of the terminal die state (e/c) is beginning, visible to the left of the 1 in the date and behind Liberty's cap. The crack through the IBER in LIBERTY is carried over from previous uses of this obverse die for BD-2, -3, and -4. The only half eagles struck from this obverse die that do not show the IBER crack are early examples of BD-2.

BD-5 is one of the three moderately plentiful 1800 half eagle varieties, with an estimated survivorship of 175 to 250 pieces in all grades. Nonetheless, that availability only exists for coins grading MS62 or lower. Regardless of variety, any 1800 half eagle is a rarity in MS63, and in MS64, only a handful of pieces are certified at PCGS. Only a single coin — an MS66 piece — is finer at that service (2/19).

Offered here is a lustrous near-Gem with satiny yellow-gold mint luster and a hint of field reflectivity. An even, well-centered strike brings out the border stars and most central details, although trivial weakness is noted on the horizontal shield lines below the eagle's neck. As the grade suggests, there are no bothersome abrasions, and the reverse is particularly clean. The obverse has some light, scattered hairlines and marks in the fields that appear under a loupe and keep this piece from a Gem designation. Eye appeal is outstanding. Population: 9 in 64 (1 in 64+), 1 finer (2/19). NGC ID# 25NW, PCGS# 45595 Base PCGS# 8082

**1805 BD-1 Half Eagle, MS62  
Early Die State**

**3864** 1805 BD-1, High R.3, MS62 PCGS. CAC. Bass-Dannreuther a/a. There is no evidence of a vertical die crack from the border to the drapery that bisects the 0 in the date on this early die state example. There are five known varieties of the 1805 half eagles, and Walter Breen recorded five varieties in his mid-1960s monograph. John Dannreuther reports four obverse dies and two reverse dies for the five varieties, and that is an accurate accounting. Dannreuther had the luxury of examining actual coins. Breen itemized his varieties from three obverse dies and four reverse dies. Breen mentioned a fifth variety in his *New Varieties* monograph, and that variety has since been disproven. The present attractive Mint State piece has full cartwheels and frosty yellow-gold luster with minimal grade-consistent marks on the brilliant surfaces. NGC ID# 25P4, PCGS# 45615 Base PCGS# 8088

**1805 Half Eagle, BD-1, MS63  
Lustrous Mint State Type Coin  
Conditionally Scarce**

**3865** 1805 BD-1, High R.3, MS63 PCGS. Bass-Dannreuther Die State a/a. BD-1 is the most plentiful 1805 half eagle variety, with as many as 225 pieces believed extant, according to John Dannreuther in *Early U.S. Gold Coin Varieties*. Although a common date among early gold issues, the 1805 half eagle is conditionally scarce in MS63 and rare finer. All varieties combined, we have previously handled a Select example of this date on only 16 occasions with a comparably small number of finer pieces. Much more often seen are AU-level coins, many of which are impaired.

The piece offered here displays softly frosted yellow-gold luster and an even strike. No adjustment marks are seen at the borders but a few do appear on the upper hair curls of the obverse portrait. Slight strike weakness occurs on the border stars and the eagle's left (facing) wing junction. The only grade-limiting surface imperfection is some light chatter in the obverse fields. A high-end type or date representative. Population (all varieties included): 39 in 63 (1 in 63+), 21 finer (3/19). NGC ID# 25P4, PCGS# 45615 Base PCGS# 8088

### 1806 Capped Bust Right Five, MS63 Knob 6, 7x6 Stars, BD-6 Variety

### 1807 Bust Left Half Eagle, MS64 BD-8, Sharp First-Year Type Coin

**3866** 1806 Knob 6, 7x6 Stars, BD-6, R.2, MS63 NGC. Bass-Dannreuther Die State d/e, with a rust lump on the upright of R in LIBERTY and clash marks on the reverse. According to Mint records, a substantial mintage of 64,093 Capped Bust Right half eagles was struck in 1806, with six die varieties known for the date. Five varieties have a Pointed 6 in the date and one, BD-6, represented by this coin, features a Knob 6. The BD-6 is an available variety, with a surviving population of 600-900 examples in all grades. The 2019 *Guide Book* notes the BD-6 accounted for 54,417 pieces of the reported mintage.

The present coin is a spectacular Select example, with well-detailed design elements that show just a touch of the usual softness at the juncture of the shield and the left (facing) wing. The remarkably clean orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. Census: 17 in 63 (1 in 63+), 21 finer (3/19). NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

**3867** 1807 Bust Left, BD-8, R.2, MS64 PCGS. Bass-Dannreuther Die State d/b, clashed as usual. BD-8 is a plentiful Bust Left variety, ideal for type collectors. However, high-grade Uncirculated examples are conditionally rare. This near-Gem displays frosty, luminous mint luster and bright yellow-gold coloration. Only a few light grazes are visible beneath a loupe, giving this piece outstanding eye appeal. The strike is razor-sharp.

We have seen only a handful of 1807 Bust Left fives so fine in recent years. In the FUN Signature (Heritage, 1/2018), lot 5024, an MS64+ PCGS coin realized \$40,800. This example is almost every bit as well-preserved as that piece with equal luster and eye appeal. We look forward to placing it in a high-end early gold collection. Population (all varieties included): 24 in 64 (1 in 64+), 6 finer (3/19). NGC ID# CKLH, PCGS# 507607 Base PCGS# 8101

**1808 Capped Bust Left Five, MS63  
Close 5D, BD-3 Variety**

**3868** 1808 Close 5D, BD-3, R.4, MS63 NGC. Bass-Dannreuther Die State a/c, with light clash in the shield. According to Mint records, a substantial mintage of 55,578 Capped Bust Left half eagles was achieved in 1808, with four die varieties known for the date. This coin represents the BD-3 variety, with the normal date and closely spaced 5D. The BD-3 has a surviving population of 100-125 examples in all grades and probably accounted for 10,000-15,000 pieces of the reported mintage.

This spectacular Select specimen exhibits sharply detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster throughout. The eye appeal is outstanding. Census: 19 in 63, 7 finer (2/19). NGC ID# 25PA, PCGS# 507604 Base PCGS# 8102

**1812 Half Eagle, BD-1, MS64  
Wide 5D, Frosted Mint Luster**

**3869** 1812 Wide 5D, BD-1, R.3, MS64 PCGS. Bass-Dannreuther Die State a/a. Struck from the odd Wide D denomination dies, this lustrous and attractive Capped Bust Left half eagle is sharp and heavily frosted throughout both sides. Reddish-gold accents add strong eye appeal to the greenish-gold surfaces, in an early die state — before the dies clashed or cracked, giving the coin incredibly fresh surfaces and a razor-sharp portrait of Liberty.

The reverse is nearly equally bold, although we note a sliver of incompleteness at the back of the eagle's neck where it joins the shield and wing. A few tiny abrasions and pinpoint marks are revealed under a loupe, but they are unseen in-hand, as are some feather-light obverse adjustment marks that are visible with magnification, but almost entirely eliminated by the sharp strike. This near-Gem coin ranks among the finest we have seen for the issue. Population (all varieties): 46 in 64 (5 in 64+), 8 finer (3/19). NGC ID# 25PL, PCGS# 507601 Base PCGS# 8112

### 1818 Capped Head Left Half Eagle, AU58 Normal Dies BD-1 Variety

**3870** 1818 BD-1, R.5, AU58 NGC. Bass-Dannreuther Die State b, with reverse die cracks through D and the base of AMERICA and another from the rim, past the leaves, through the eagle. A substantial mintage of 48,588 Capped Head Left half eagles was accomplished in 1818, with three die varieties known for the date. This coin represents the BD-1 variety, with normal spacing on STATES OF and a normal 5D. The BD-1 is an elusive variety, with a surviving population of 50-65 examples in all grades. This was the only use of both dies. The present coin is an impressive near-Mint specimen, with just a trace of high-point wear on the well-detailed design elements. The lightly abraded antique-gold surfaces are still lustrous and appealing. NGC ID# BFXV, PCGS# 519911 Base PCGS# 8119

## CLASSIC HALF EAGLES

### 1834 Classic Head Five, MS64 McCloskey 2-B First Year of Design

**3871** 1834 Plain 4 MS64 NGC. Breen-6502, McCloskey 2-B, R.3. Second Head. The weight and gold content of all U.S. gold coins was reduced in 1834, to bring their intrinsic value in line with their face value. This measure achieved the desired effect of restoring gold coinage to circulation for the first time since 1821. To signify the change in specifications, the design of the half eagle and quarter eagle was changed to the Classic Head motif. A substantial mintage of 657,460 was accomplished, making the issue reasonably available in lower Mint State grades today. The issue becomes scarce at the MS64 grade level, however.

This attractive Choice example displays well-detailed design elements, with a touch of the usual softness at the left (facing) shield border and the curls near the ear. The well-preserved orange-gold surfaces are lustrous and appealing, with a few reddish highlights. Census: 44 in 64 (1 in 64+, 2 in 64★), 9 finer (3/19). NGC ID# 25RR, PCGS# 8171

## LIBERTY HALF EAGLES

### 1834 Plain 4 Classic Head Half Eagle McCloskey 2-C, MS65 Conditionally Rare Type Coin

**3872** 1834 Plain 4 MS65 NGC. Breen-6502, McCloskey 2-C, R.4. The 1834 Plain 4 Classic Head half eagle is the most plentiful date of this short-lived type, popular as a type coin and the obvious choice over the scarce Crosslet 4 issue for a date representative. However, all aspects of availability become irrelevant at the Gem grade level, where the 1834 Plain 4 five joins the other Philadelphia issues as a major condition rarity. NGC and PCGS combined report only 18 submissions in MS65 and finer condition, including likely duplication or crossovers. The last Gem example of this issue that we handled was a PCGS CAC coin in the ANA Signature (Heritage, 8/2014), lot 5649, which realized nearly \$100,000. We have not seen a Gem NGC coin in more than a decade.

The present example displays subtle reflectivity in the fields amid bright yellow-gold coloration. A cartwheel effect emerges in-hand, and a loupe reveals only the faintest luster grazes in the fields that deny technical perfection. Typical of the type, this piece shows minor strike weakness on the left-hand edge of the shield and the adjacent wing feathers, as well as on the hair curls in front of Liberty's ear. Census: 9 in 65 (1 in 65+, 1 in 65★), 3 in 66 Prooflike finer (2/19). NGC ID# 25RR, PCGS# 8171

### 1858-S Half Eagle, AU58+ Just 18,600 Pieces Minted

**3873** 1858-S AU58+ NGC. Over the last 26 years since the debut of our Permanent Auction Archives, we have offered 74 examples of this issue, including an MS61 PCGS, an MS60 NGC, and this AU58+, all three of the finest graded examples of this rarity. None of the 15 previously appearing AU58 examples have received the Plus designation. This light yellow-gold representative has a bold strike and brilliant surfaces with delicate rose toning over the satiny mint luster. NGC and PCGS have certified exactly 100 examples in all grades, with an average certified grade of just XF. Census: 10 in 58 (1 in 58+), 1 finer (3/19). NGC ID# CLAM, PCGS# 8279

## PROOF LIBERTY HALF EAGLES

**1903-S Five Dollar, MS67**  
**The Sole Finest at PCGS**

**3874** 1903-S MS67 PCGS. A plentiful date in the absolute sense, the 1903-S Liberty half eagle is a popular type coin. However, that availability disintegrates in MS66, and in MS67, only one coin is reported at PCGS — this piece (2/19). We have previously handled only one of the NGC coins in this grade, in the Long Beach Signature (Heritage, 9/2013), which realized \$12,375.10. To our knowledge, this PCGS coin has never before appeared at auction. The coin is fully struck and lustrous with frosted original surfaces. Yellow-gold margins cede to warmer rose-gold and peach interiors, delivering attractive eye appeal. No mentionable abrasions are seen. NGC ID# 25Z3, PCGS# 8408

**1892 Liberty Half Eagle, PR65**  
**Rare Deep Cameo Specimen**

**3875** 1892 PR65 Deep Cameo PCGS. JD-1, R.5. Dannreuther Die State a/b, with die polish in the first and last clear spaces in the shield and the lower part of the other spaces. A relatively generous mintage of 92 proof Liberty half eagles was accomplished in 1892, but the issue is not as easy to locate as the production total would suggest. It seems likely that many coins went unsold and were melted after the end of the year. John Dannreuther estimates the surviving population at 35-45 examples in all grades. This impressive Gem representative exhibits sharply detailed design elements in most areas, but there is a touch of softness on the feathers below the shield. The well-preserved lemon-yellow surfaces show only insignificant signs of contact and the deeply mirrored fields contrast profoundly with the frosty devices. Eye appeal is terrific. Population: 2 in 65 Deep Cameo, 2 finer (3/19). NGC ID# 28CW, PCGS# 98487

## INDIAN HALF EAGLES

### 1905 Liberty Half Eagle, PR65 Cameo Unusual Contrast

**3876** 1905 PR65 Cameo NGC. JD-1, R.5. Dannreuther Die State a/a. The 1905 proof Liberty half eagle claims a mintage of 108 pieces, making it the last Liberty half eagle with a mintage over 100. John Dannreuther estimates the surviving population at 60-75 examples in all grades. The Mint switched to an all-brilliant finish for proof coins after 1902, so proofs of this era seldom show Cameo contrast.

The present coin is a happy exception to the rule, as the sharply detailed design elements have enough mint frost to create a noticeable cameo effect against the deeply reflective fields. The pleasing yellow-gold surfaces are well-preserved and overall visual appeal is terrific. Census: 5 in 65 Cameo (1 in 65+), 3 finer (3/19). NGC ID# 3YDP, PCGS# 88500

### 1908-S Indian Head Five, MS65 Beautiful Luster, Great Eye Appeal

**3877** 1908-S MS65 PCGS. In terms of low mintage, the 1908-S Indian five trails only the 1909-O and the 1911-D. In Gem Mint State, the exceedingly well-produced 1908-S is comparatively available, which is a great thing for collectors. Several other San Francisco issues offer significantly higher mintages, but are much rarer in high Uncirculated grades — namely the 1912-S, 1914-S, and 1915-S.

This Gem 1908-S is exceptionally attractive. High-luster surfaces alternate orange- and reddish-gold accents, with lilac overtones. A crisp strike weakens slightly at the lower headdress feathers and at the eagle's shoulder, but all else is sharp. Only a few tiny ticks are seen with a glass. The eye appeal is terrific. Population: 51 in 65 (1 in 65+), 20 finer (3/19). NGC ID# 65K3, PCGS# 8512

### 1909-O Five Dollar, Choice AU Final New Orleans Gold Production

### 1909-O Indian Half Eagle, AU58 Single-Year Branch Mint Type Coin

**3878 1909-O AU55 NGC.** Although the 1909-O half eagle has one of the highest overall surviving populations of any New Orleans gold issue, it is one of the most highly sought-after issues from this mint. Bela Lyon Pratt's sunken relief Indian Head design debuted in 1909, the same year that the New Orleans Mint ceased coinage operations for the last time. There were a few months of overlap, however, where New Orleans struck 34,200 Indian Head fives. These coins represented the only coinage of Indian gold at the Louisiana branch mint, and the only coinage of gold overall at New Orleans in 1909.

This Choice About Uncirculated example displays satiny honey-gold surfaces with bold detail and little wear. Scattered light contact marks accompany the grade but are not distracting. The mintmark is worn but visible with a loupe. NGC ID# 25ZK, PCGS# 8515

**3879 1909-O AU58 NGC. Variety 1.** The 1909-O is the only New Orleans half eagle to feature Bela Lyon Pratt's innovative incuse Indian design. From a meager mintage of 34,200 pieces, the 1909-O appeals to numismatists of many collecting disciplines. Fortunately, the issue enjoys a fairly high survival rate, but collector-demand still far outstrips the supply.

Just a trace of wear shows on the high points of the strongly impressed design elements of this attractive near-Mint specimen and the pleasing yellow and rose-gold surfaces are lightly abraded. Vibrant mint luster adds to the outstanding eye appeal. This coin should find a home in a fine date-mintmark collection or branch mint type set. NGC ID# 25ZK, PCGS# 8515

**1909-O Five Dollar, AU58  
Key One-Year Type**

**3880** 1909-O AU58 NGC. **Variety 1.** Famously, the 1909-O represents the only New Orleans issue in the Indian Head half eagle series. It also claims the lowest production total during the series' 22-year run. A mere 34,500 pieces were struck. Although probably 1,500 or so examples survive in all grades, the issue is subject to far greater demand as a one-year type than the supply can satisfy. Further, few are certified in mint condition. This nearly Uncirculated key date five dollar enjoys red-gold color and relatively strong definition. There are myriad small marks scattered across each side, including one on the mintmark, which is otherwise bold. NGC ID# 25ZK, PCGS# 8515

**1909-O Five Dollar, MS60  
Final-Year New Orleans Key**

**3881** 1909-O MS60 NGC. An Uncirculated example of the 1909-O half eagle is on many collectors' want lists, but the infrequency with which such coins are available prevents many enthusiasts from acquiring one. The appeal of this issue is two-fold: It is a key date in the series with a mintage of only 34,200 coins, and it is the only New Orleans issue with Bela Lyon Pratt's Indian Head design, which debuted just one year before the branch mint in New Orleans was shut down. The token quantity of half eagles coined in New Orleans in early 1909 circulated, leaving collectors with limited options if a Mint State coin is sought.

This piece is well-struck and displays original olive-gold patina. Scattered field abrasions limit the grade, but the eye appeal of this coin surpasses that of many MS61 and MS62 half eagles that we have seen of other dates. The design recesses are especially luminous. NGC ID# 25ZK, PCGS# 8515

### 1909-O Half Eagle, MS60 Rare Indian Five in Mint Condition

**3882** 1909-O MS60 NGC. Variety 1. One of the rarest Indian half eagles in Mint State grades, the 1909-O doubles up on its appeal to collectors as the only New Orleans issue of the series. The mintage of just 34,200 pieces is by far the lowest for any Indian five, adding to the 1909-O's unabated charisma.

While few examples of this issue will win a beauty contest, the present MS60 coin puts its best foot forward with softly lustrous surfaces and glimmers of orange among the incuse elements. Lilac-gray toning occupies the exposed fields. A relatively sharp strike is seen, lacking some definition at the lowest feather and along the high points of the headdress. Small marks are grade-consistent and marginally more frequent on the reverse, where some tiny rim nicks are visible with a loupe. The O mintmark is flat but fully outlined. NGC ID# 25ZK, PCGS# 8515

### 1909-O Half Eagle, MS61 Rarest Indian Head Five in Mint State

**3883** 1909-O MS61 NGC. The New Orleans Indian Head five comes with a variety of strike characteristics. Some pieces are well-defined, while others are reminiscent of the present coin, showing weakness on the lower headdress feathers and the eagle's talons. There is also a shallow depression in the planchet on each side of this piece along the left border, just inside the rim. The mintmark is lightly worn but has the appearance of being repunched within the loupe. True to norms for the issue, this low-end Uncirculated 1909-O half eagle displays satiny olive-gold luster. Minimal abrasions are present for the grade. The 1909-O is the rarest date in the series in Mint State, even more so than the 1929 melt rarity. NGC ID# 25ZK, PCGS# 8515

## 1911-D Five Dollar, MS62+ Condition Key

**3884 1911-D MS62+ NGC.** The 1911-D half eagle is a scarce date in Uncirculated condition, especially in grades finer than MS62. Just 72,500 pieces were struck, marking the second-lowest mintage in the series. Only the 1909-O, struck just briefly early in the year before coinage operations were ceased at New Orleans, has a lower mintage. This 1911-D is Plus-graded — the only coin so awarded in this grade at NGC. Each side has original straw-gold luster that glistens beneath a light. Scattered abrasions and flecks of russet patina on each side deny a finer grade, although at this level it is within reach of the many more Indian gold collectors than higher-end pieces are. Census: 53 in 62 (1 in 62+), 31 finer (3/19). NGC ID# 28DR, PCGS# 8521

## 1911-D Five Dollar, MS63 One of Series Keys

**3885 1911-D MS63 PCGS.** The 1911-D five dollar is unquestionably one of the keys to the Indian half eagle series. David Akers described it as “the prime rarity among all 20th century United States gold coin issues in MS-64 or better condition.” His assertion is backed up by a quick glance at the population data accumulated over the past 33 years. PCGS has certified only 39 pieces with this date/mintmark combination, and a mere 21 pieces are finer (2/19). That places this attractive MS63 as an astute acquisition for the collector. This coin has notably clean, problem-free surfaces, an unusual trait for this design that was struck in reduced relief; meaning the fields and highest parts of the design are the high points and therefore most susceptible to abrasions. Mint luster is also above average with a smooth, satin finish. The design elements display complete definition seen over each side. NGC ID# 28DR, PCGS# 8521

### 1913-S Five Dollar, MS64 Rarely Seen So Well-Preserved Just Five Coins Finer at NGC and PCGS

**3886 1913-S MS64 NGC.** A highly regarded issue in near-Gem or finer grades, the 1913-S is scarce (but available) in lesser Mint State conditions. Numerous examples from foreign holdings added to the bottom end of the Mint State grading scale, but did little to affect the high-grade population. In general, the 1913-S was poorly handled and acquired many abrasions, adding to its conditional rarity.

This Choice Uncirculated coin bucks that trend, with smooth and minimally marked surfaces. Lustrous, orange-gold surfaces display occasional rose, lime-green, and lilac highlights. A sharp strike exists throughout both sides, and marks are limited to a few light marks that are clear of the motifs. The tiny mintmark is little more than an S-shaped blob, but visible. NGC Census: 9 in 64, 3 finer (3/19). NGC ID# 25ZP, PCGS# 8526

### 1915-S Half Eagle, MS63 Always Elusive in Finer Grades

**3887 1915-S MS63 PCGS. CAC.** The 1915-S is a much scarcer coin in MS63 or finer grades than, for example, the well-regarded 1908-S, despite double the mintage. Abrasions are always a factor for the 1915-S, creating one of the great condition rarities of the series. A total of 164,000 pieces were struck, but remarkably few pieces survive in high grades. It is no surprise the 1915-S is the rarest Indian half eagle in Gem condition — just one coin has achieved MS65 certification.

For many collectors, the MS63 level is the optimal grade for a high-end set. The surfaces of this Select Uncirculated example are more satiny than frosted, and abrasions are relatively few. We note a series of tiny marks on the chin and cheek, but only minor abrasions are scattered elsewhere. Vibrant orange-gold color flashes lilac accents. Aside from brief weakness at the lower headdress feathers, the strike is sharp and the mintmark is bold. CAC endorsement is an important clue to quality for this attractive 1915-S. Population: 46 in 63, 13 finer. CAC: 9 in 63, 3 finer (3/19). NGC ID# 25ZR, PCGS# 8531

## 1929 Indian Half Eagle, MS64 Final Year of the Denomination

**3888** 1929 MS64 NGC. A substantial mintage of 662,000 Indian half eagles was accomplished at the Philadelphia Mint in 1929, the last year the denomination was struck for circulation. Unfortunately, few of those coins were needed in the contracting economy of that Depression year. Most of the mintage was stored in Mint or Treasury vaults until the Gold Recall of 1933 and subsequently melted. Today, the 1929 is an elusive issue at the MS64 grade level, and finer coins are condition rarities.

The present coin is an attractive Choice example, with well-detailed design elements and well-preserved yellow-gold surfaces that display vibrant mint luster on both sides. Overall eye appeal is outstanding. Census: 74 in 64 (2 in 64+, 1 in 64+★), 7 finer (3/19). NGC ID# 28E2, PCGS# 8533

## 1929 Half Eagle, MS64 Famous Gold Recall Melt Issue

**3889** 1929 MS64 NGC. A long, 13-year interruption in the production of Indian Head half eagles ended in 1929, when a large mintage of 662,000 pieces was achieved. In hindsight, the Mint would have been better served to strike far fewer coins, because some of the mintage never left its premises, and the balance of the mintage languished in bank vaults. Nearly all 1929 half eagles were melted as specified during the 1933 Gold Recall. Only a nominal number of coins were ever released into circulation.

The MS64 is an optimal level for a high-grade collection, since fewer than two dozen 1929 half eagles are available any finer. This Choice Uncirculated example displays satin-smooth, orange-gold surfaces and sharply struck motifs. Isolated light marks are confined to the obverse fields, while the reverse shows a few random light, hair-thin abrasions. In total, PCGS and NGC combined have certified a total of 590 Indian fives in all grades, which undoubtedly includes some duplication. NGC Census: 74 in 64 (2 in 64+, 1 in 64+★), 7 finer (3/19). NGC ID# 28E2, PCGS# 8533

## PROOF INDIAN HALF EAGLES

### 1912 Half Eagle, PR66 Spectacular CAC-Approved Rarity Few Known So Fine in PCGS Holders

**3890 1912 PR66 PCGS. CAC. JD-1, R.4.** The Mint delivered 144 sandblast proof half eagles on March 18, 1912. Production was similar to the 139 coins struck in 1911, and these two dates are similarly challenging to collectors. David Akers considered the 1912 proof rare in any condition and listed only 14 auction appearances for it from 1941 to 1979. In his *Proof Encyclopedia*, Walter Breen noted that, like the quarter eagle proof of this year, the five was "Much rarer than its mintage figure would suggest." Today, John Dannreuther estimates that 80 to 100 1912 proof fives survive. This is slightly more generous than PCGS, which estimates 70 to 90 survivors. In any case, the survivorship is significantly smaller than the recorded mintage. Only 73 coins are reported by PCGS and NGC combined in all grades, and the auction appearance rate of this issue is comparably low. We have previously handled a proof 1912 half eagle on only 26 occasions. A minority of those offerings have been PCGS-certified. The last PR66 PCGS coin that we offered was in the Long Beach Signature (Heritage, 9/2013), lot 6800, which realized \$58,750. The auction record for this issue was realized about two decades ago, when the Walter H. Childs coin realized \$69,000 (Bowers and Merena, 8/1999), lot 767. The Childs coin was graded PR67 PCGS, and it was believed to have been purchased directly from the Philadelphia Mint by C.F. Childs.

This Premium Gem could challenge that auction record. It is only the third CAC-approved coin that we have ever handled in any grade, and the preservation is indeed pristine. Profound sharpness characterizes the sunken devices, and the luminous peach-gold surfaces produce ample eye appeal. It is an ideal matte proof type coin. Population: 14 in 66, 6 finer. CAC: 5 in 66, 1 finer (3/19). NGC ID# 28E6, PCGS# 8543

## 1914 Half Eagle, PR67 125 Matte Proofs Minted Beautifully Textured Surfaces

**3891** 1914 PR67 NGC. JD-1, Low R.5. Proof half eagles struck in 1908 and then again from 1911 through 1915 featured a matte or sandblast finish that was not nearly as popular with collectors as the earlier high-contrast, and then brilliant coins produced through 1907. Satin or “Roman-finish” proofs struck in 1909 and 1910 garnered even less interest from contemporary collectors. Unfortunately, Bela Lyon Pratt’s sunken-relief design did not allow for high-polish fields. Instead, this finely textured finish that had been employed for certain medals from that period was used.

The 1914 five dollar is particular in that it features a somewhat coarser finish than earlier sandblast issues. According to the *Encyclopedia of U.S. Gold Coins*, the Mint increased “the microscopic size of the tiny facets” that produced the unique appearance on the 125 proofs struck. Echoing Walter Breen’s sentiments from his 1989 *Proof Encyclopedia*, authors Jeff Garrett and Ron Guth note that that these coins appear slightly darker than their predecessors.

Between 60 and 75 specimens of the 1914 are believed extant. NGC and PCGS have certified 59 pieces combined, most in the PR64 to PR66 range. There are five PR67 submissions at NGC and two more at PCGS, with five finer at the former and one better at the latter (2/19).

Finely textured orange-gold surfaces are essentially free of contact and void of anything that might be worth mentioning. A few as-made lint marks pose no distraction and do not affect the grade. Every design element exhibits full definition, as expected. An exceptional proof. NGC ID# 28E8, PCGS# 8545

## EARLY EAGLES

### 1795 Capped Bust Right Eagle, XF Details 13 Leaves, BD-1 Variety

**3892** 1795 13 Leaves, BD-1, High R.3 — Altered Surfaces — PCGS Genuine. XF Details. Bass-Dannreuther Die State indeterminate. The United States Mint struck gold coins for the first time in 1795, including 5,583 Capped Bust Right eagles. Five die varieties are known for the date. This coin represents the BD-1 variety, with star 11 placed close to Y in LIBERTY and the leaf virtually touching U in UNITED. The BD-1 is a relatively available variety, in the context of the series, with a surviving population of 225-325 examples in all grades.

In his excellent series reference *Early U.S. Gold Coin Varieties*, John Dannreuther speculates there may be a later die state of the obverse die than the three he lists in the text. We suspect this coin represents that later die state, as the dentils at 6 o'clock show advanced crumbling, but none of the die cracks that identify the earlier die states are evident on the slightly granular surfaces of this coin. It may be that the dies were lapped to remove the cracks before this coin was struck. The design elements are well-detailed, with some light wear on the high points and much interior detail still intact. There is a minor rim ding at 6:30 on the obverse.

## 1795 Capped Bust Right Eagle, AU58 First Date of Denomination 13 Leaves, BD-1 Variety

**3893** 1795 13 Leaves, BD-1, High R.3, AU58 PCGS. Bass-Dannreuther Die State c/b. Ten dollar gold coins were minted for the first time in 1795, with a reported mintage of 5,583 pieces. There are five known varieties for the date, four with 13 leaves on the palm branch and a rare variety with nine leaves. The present coin represents the more available BD-1 variety, with the 5 in the date overlapping the bust, star 11 near Y in LIBERTY, and a leaf nearly touching the U in UNITED. John Dannreuther estimates the BD-1 variety accounted for approximately 2,795-5,583 pieces of the reported mintage. Some 1795 dated coins from the other varieties may have been struck in 1796. The BD-1 has an estimated surviving population of 225-325 examples in all grades.

The early eagles are the only high denomination gold coins that have been popular with collectors since the early days of the hobby. Numismatists began to study the varieties of this series at an early date. In the Randall Collection (W. Elliot Woodward, 7/1885), the cataloger listed four different varieties of 1795 half eagles including the coin in lot 842 that sounds like an example of the BD-1. The lot description reads, "1795 No. 2; small eagle reverse, in the olive branch the turned up leaf touches the U; very fine indeed, almost proof surface, rare." Notice the cataloger mistook the palm frond for an olive branch. More recent auction offerings include the NGC-graded AU58 coin in lot 4193 of the Long Beach Signature (Heritage, 2/2018), which realized \$78,000.

The present near-Mint coin is attractive, with just a touch of wear on the well-detailed devices. The surfaces are a pleasing light greenish-gold color, with only minor abrasions. Satiny mint luster is present on both sides and the surfaces show small patches of prooflike reflectivity in sheltered areas. Population (all 13 Leaves varieties included): 29 in 58, 45 finer (2/19).

*Ex: Chicago Signature (Heritage, 8/2011), lot 7588, which realized \$83,950. NGC ID# 25ZU, PCGS# 45710 Base PCGS# 8551*

### 1797 Capped Bust Right Eagle, AU53 Elusive Small Eagle Reverse BD-1 Variety

**3894 1797 Small Eagle, BD-1, R.5, AU53 PCGS.** Bass-Dannreuther Die State b/b, with the usual die crack from the rim below star 16 to Liberty's throat. A small mintage of 3,615 Capped Bust Right eagles was struck with the old Small Eagle reverse die in 1797, before the design was switched over to the Heraldic Eagle motif. A single die variety is known for the date and type, classified as BD-1 by John Dannreuther in his outstanding series reference. The BD-1 is scarce-to-rare in all grades today, with a surviving population of just 55-65 examples. This was the only use of the obverse die, but the reverse was used previously to strike all the 1796-dated eagles. Die evidence suggests some 1796-dated coins were struck first, then the 1797 mintage was accomplished, and then there was a remarriage of the 1796 obverse with this reverse (in a later die state) to finish off the 1796 production. If this is true, the reported mintage for 1797 may include some 1796-dated coins, as well.

The Capped Bust Right eagles were popular with well-heeled collectors in the early days of the hobby and the elusive nature of the 1797 Small Eagle variety was understood by catalogers by the mid-1860s. An example in lot 1616 of the Fifth Semi-Annual Sale (W. Elliot Woodward, 10/1864) was described as, "1797 Small eagle reverse, four stars at right; a splendid uncirculated piece, of the highest degree of rarity." The lot realized a hefty \$40, more than any other early eagle in the sale, to prominent Ohio collector Heman Ely. Recent sales include the AU50 PCGS example in lot 4849 of the Long Beach Signature (Heritage, 2/2012), that realized \$103,500.

The present coin is an impressive AU53 example, with just a trace of high-point wear on the strongly impressed design elements. The lustrous orange-gold surfaces show the expected number of minor abrasions for the grade, but none are large or distracting. Under magnification, faint traces of planchet adjustment marks are evident on the right reverse border, but the fine scratches are virtually invisible to the naked eye. The overall presentation is most attractive. Population: 8 in 53, 10 finer (2/19). NGC ID# BFFN, PCGS# 45716 Base PCGS# 8555

## 1798/7 BD-1 Eagle, Unc Details Nine Stars Left, Four Right

**3895** 1798/7 9x4 Stars, BD-1, High R.4 — Cleaned — PCGS Genuine. Unc Details. Intermediate Die State. Bass-Dannreuther Die State b/b, or possibly later. The obverse is cracked from the edge through the L of LIBERTY, into the cap and hair. There is no evidence of the second (state c) crack through the R in LIBERTY. With strong magnification, faint die cracks are visible joining every letter of UNITED. The reverse die was used for 1797 BD-3, 1798/7 BD-1, and 1798/7 BD-2, but not in that order according to John Dannreuther who reports 1797 BD-3 eagles in a later reverse die state than on the two 1798 varieties. The conclusion is that some of the 1797 BD-3 eagles, and also some of the 1797 BD-4 eagles, were all struck in 1798.

Two obverse dies that were created in 1797 were never used, and were overdated at the beginning of 1798. The other obverse dies, those of 1797 BD-3 and BD-4, had already been used in coinage production, so could not be overdated. Therefore, some of the 1797-dated pieces were struck in that year, then the two 1798/7 varieties were struck next, and finally, more of the 1797 BD-3 and BD-4 eagles were coined.

Mintage figures pose a further challenge. Mint delivery records show that 7,985 eagles were coined during the first two months of 1798. However, the *Guide Book* gives "mintage" figures of 900 coins for BD-1, and 842 coins for BD-2. Those figures were the number of eagles coined in February 1798, and were probably based on the writings of Walter Breen in the 1960s. If those were accurate figures, the two varieties would be of approximately equal rarity, but the BD-1 outnumbered BD-2 by four to one. Much more study is necessary.

While the bright yellow surfaces of this piece indicate that it has been cleaned, the overall appearance is quite good. The cleaning resulted in a reflective appearance in the fields, and both sides exhibit myriad marks. The strike is excellent. Here is an important opportunity for the advanced collector.

### 1799 BD-3 Ten Dollar, AU50 Small Obverse Stars, 16-20 Coins Extant

**3896** 1799 Small Obverse Stars, BD-3, High R.6, AU50 PCGS. Bass-Dannreuther Die State c/d. Star 9 nearly touches the Y and the second 9 in the date is close to the bust, identifying this rare variety. About 16 to 20 examples are believed extant, but even John Dannreuther called that estimate generous in his 2006 *Early U.S. Gold Coin Varieties* reference. Our Permanent Auction Archives lists nine appearances for this die marriage.

This piece is in a late die state with interesting cracks right of star 8, through the left serifs of the L and B in LIBERTY, and from the lower right (facing) wing feathers into the shield. Most of the stars and legends are bold. Blending occurs over the curls and neck feathers, but it does not detract from this olive and reddish-gold 18th century Heraldic ten dollar. Lightly marked with the faintest traces of mint luster remaining. Early gold specialists will appreciate the rarity of this offering and should bid accordingly. PCGS# 45726 Base PCGS# 98562

### 1799 Capped Bust Right Eagle, MS61 Small Obverse Stars, BD-7

**3897** 1799 Small Obverse Stars, BD-7, R.3, MS61 PCGS. The 1799 Capped Bust Right eagle claims a reported mintage of 37,449 pieces, with 10 die varieties known for the date. Eight varieties display small stars on the obverse, while the final two exhibit large stars. This coin is an example of the Small Stars BD-7 variety, with the 17 in the date slanted to the right, and star 13 on the reverse positioned away from the ribbon. The BD-7 is one of the more available varieties, probably accounting for 10,000-15,000 pieces of the reported mintage. John Dannreuther believes 250-350 examples are still extant in all grades.

The present coin is an attractive Mint State example, with vivid lemon-yellow and greenish-gold surfaces. The design elements are sharply detailed, and the surfaces retain much prooflike reflectivity in sheltered areas. Population for all Small Stars varieties: 20 in 61, 52 finer (3/19).

Ex: *FUN Signature* (Heritage, 1/2012), lot 4959, realized \$29,900. NGC ID# 2625, PCGS# 45730 Base PCGS# 98562

## 1801 Ten Dollar, XF40 Scarce BD-1 Variety, Seldom Offered

**3898** 1801 BD-1, R.5, XF40 PCGS. Bass-Dannreuther Die State c/d. The BD-1 variety is scarce due to early failure of the obverse die. This well-circulated example shows heavy die cracks including one between 0 and 1 in the date, and another from the edge through L in LIBERTY that extends to mid-portrait. The reverse is an advanced die stage as well, where die clashing earns the variety its "Horned Beak" moniker, although that feature is not readily visible on this XF coin.

Antique-gold surfaces display deep-orange accents around sharp devices for good eye appeal. Light surface marks are smoothed by wear, and we note a small, circular planchet flaw in the field between inner points of stars 11 and 12. Surviving early eagles seldom show as much circulation. As a variety, the BD-1 die marriage is much scarcer than the more-available BD-2, and we have only sold a handful in the past 20+ years. The Bass-Dannreuther reference suggests just 40 to 50 pieces are known. NGC ID# 2627, PCGS# 45733 Base PCGS# 8564

## 1803 BD-3 Eagle, AU53 Small Stars Reverse

**3899** 1803 Small Reverse Stars, BD-3, R.4, AU53 NGC. The obverse was used for all six of the different varieties for 1803, ranging from this R.4 pairing to the R.7 Large Stars Reverse, BD-6. On this Small Stars Reverse, the eagle's upper beak nearly touches a star right below its point, and the right bottom serif of the E in STATES is over a space between two clouds. This brilliant greenish-gold, problem-free example shows superior eye appeal and few singular distractions, save for a sole small tick in the right obverse field. This nice, high-end piece would fit well into a Mint State gold type set at a fraction of the Uncirculated price.

*From our ANA Signature Sale (8/2007), lot 1964. NGC ID# 2629, PCGS# 45737 Base PCGS# 8565*

## LIBERTY EAGLES

### 1873 Closed 3 Eagle, AU58 Just 800 Pieces Struck One Coin Graded Finer

**3900 1873 Closed 3 AU58 NGC.** The 1873 eagle (all struck with Closed 3 in the date) is one in a series of sought-after low-mintage rarities. Ten dollar gold production decreased by more than half from 1872 to 1873, when only 800 pieces were struck. David Akers once wrote: "The 1873 is one of the five or six rarest dates in the U.S. \$10 gold series. Among Philadelphia Mint Liberty Head issues, only the 1875 is rarer. There are relatively few known specimens in any condition, perhaps 12-15 business strikes and only 7-8 proofs." Years later, the population is estimated to be around 25 to 35 coins. Few are as nice as this near-Mint representative. NGC lists four submissions in this grade with none finer. There are three AU58 examples at PCGS with a single MS60 graded higher (2/19).

Partly reflective fields surround well-struck motifs on each side. Scattered abrasions limit the contrast to a degree, but the eye appeal is nonetheless impressive. A hint of softness over Liberty's ear is the only area of noticeable friction. This is a rare opportunity to procure one of the finest examples of this Philadelphia key date. Expect fierce competition when the lot crosses the block. NGC ID# 2654, PCGS# 8666

### 1877 Ten Dollar, MS60 Only Three Mint State Survivors Blatantly Prooflike, Ultra-Low Mintage

**3901 1877 MS60 PCGS.** The Philadelphia Mint continued a trend in 1877 that began in 1875: the output of only a few hundred ten dollar gold coins per year. Specifically, that total amounted to 797 circulation strikes in 1877. This issue is nearly as rare as the 1876, while the 1875 is still the hands-down key. PCGS pegs the estimated survivorship of the 1877 at only 50 to 65 coins, almost all of which are in circulated grades. In his *Analysis of Auction Records* (1980), David Akers called the 1877 "one of the rarest, lowest mintage dates in the entire series," and noted that he had only ever seen one piece that qualified as Uncirculated: "[It] is by far the finest I have seen or heard of." In their gold *Encyclopedia* (2008), Garrett and Guth accentuate the rarity of this issue in Uncirculated condition: "There's a brick wall separating the circulated pieces from their Mint State counterparts."

Today, just three 1877 eagles have been certified Mint State, including this MS60 coin and a pair of MS61s — all PCGS-certified. This piece is the CoinFacts plate coin. One of the MS61 pieces last appeared at auction more than a decade ago (Goldbergs, 2/2007), when it realized \$42,550. The other MS61 coin last appeared at auction more than three years ago (Stack's, 3/2015), when it realized \$64,625. Simply put: an Uncirculated 1877 Liberty ten is an incredible difficult issue to acquire.

This coin is fully prooflike and displays a razor-sharp strike. Deep orange-gold and tangerine color adorns each side, save for on the obverse portrait where rose-gold patina prevails. Scattered marks in the fields define the MS60 grade, but they are surprisingly unobtrusive. A case could be made for this to be the most eye-appealing 1877 Liberty ten known in Mint State. Population: 1 in 60, 3 finer (3/19). NGC ID# 265F, PCGS# 8677

**1879-O Eagle, Sharp AU58  
Key New Orleans Issue  
Only 1,500 Pieces Produced**

**3902** 1879-O AU58 NGC. **Variety 1.** A tiny mintage of 1,500 pieces ensured from the outset that the 1879-O ten dollar would be a rarity in all grades. NGC and PCGS have graded fewer than 100 coins, including only three Mint State pieces: a PCGS MS60 and one MS61 each at NGC and PCGS. As expected, near-Mint coins like the current offering are rare. Indeed, the certified population of 14 AU58 examples is probably inflated by resubmissions sent in with the hope of obtaining a Mint State classification.

The yellow-gold surfaces of this specimen display semiprooflike fields that contrast moderately against the motifs. The strike is uniformly sharp with just a hint of softness on the hair strands around Liberty's ear. Several marks appear over each, but they are relatively light. Eye appeal for this important rarity is decidedly above-average. Census: 7 in 58, 2 finer (2/19). NGC ID# 265P, PCGS# 8685

**1884-CC Ten Dollar, MS61  
Among 10-12 Uncirculated Coins Known**

**3903** 1884-CC MS61 NGC. **Variety 1.** Carson City's branch mint accomplished a production of 9,925 eagles in 1884. That was the last time the facility struck ten dollar gold pieces for six years. Unsurprisingly for a Western issue with such a small mintage, the 1884-CC is scarce in all grades and rare in mint condition. Rusty Goe estimated that of the 265 to 300 coins extant in 2003, probably only 10 to 12 pieces were Uncirculated. Today, those figures remain unchanged. Regarding the prominent die scratches across the portrait, Goe explained in *The Mint on Carson Street*: "It has been suggested that there was no intention to even strike gold eagles at this mint in 1884, but a last minute request required coiner Levi Dague to use a partially cancelled obverse die."

This is one of the few Uncirculated examples known to have survived the hardships of the West. Although lightly abraded, its pale orange-gold surfaces maintain vibrant luster and great eye appeal. The only trace of softness occurs over Liberty's ear and the eagle's olive leaves. Census: 5 in 61, 0 finer (2/19).

Ex: Internet Auction #78 (David Lawrence Rare Coins, 3/2006), lot 1314.

**From The Jersey Shore Gold Collection.** NGC ID# 266B, PCGS# 8704

### 1901 Ten Dollar, MS67 A Registry Imperative

**3904 1901 MS67 NGC.** The 1901 Liberty ten is a plentiful type coin issue through MS65. It is moderately collectible, albeit scarce, at the MS66 grade level, becoming a top condition rarity — much rarer than the 1901-S — in Superb Gem condition. Only seven submissions have been graded MS67 at NGC, and a single coin compares at PCGS. None are known in better grades (2/19).

Strike definition is completely rendered on each side. Mint frost glows from and peach-gold hues color the smooth surfaces of this top-certified Registry imperative. There are a couple of microscopic flecks on each side, visible only under magnification. A scrape on the holder is easily remedied. NGC ID# 7LHF, PCGS# 8747

### 1903-S Eagle, MS67 None Grade Finer Repunched Date

**3905 1903-S MS67 NGC.** The 1903 and 1903-S eagle have similar certification totals, with the Philadelphia issue being slightly more available overall. However, the population of the 1903-S is skewed considerably toward the MS63 and MS64 levels, whereas the 1903 is most often seen in lower Uncirculated grades. This Superb Gem is better than any of those coins by a significant margin. It is one of only seven such submissions at NGC and four at PCGS with none finer (2/19).

Each side shows impressive definition aside from a few incomplete radial lines on stars 4 and 6. Reddish accents complement luminous peach-gold surfaces awash in vibrant S-mint frost. Remarkably few ticks are seen for a gold coin of this size. Spindly die cracks encircle the reverse, and the base of the date is repunched, most evident on 19. NGC ID# 267X, PCGS# 8754

## INDIAN EAGLES

### 1905 Eagle, Exceptional MS67 Among the Finest Graded

**3906 1905 MS67 PCGS.** The 200,992 Liberty eagles manufactured at the Philadelphia Mint in 1905 were produced primarily for reserve purposes. The *Annual Mint Director's Report* of that year explains that the law demanded at least \$100 million in gold coin be held in Treasury vaults at all times, lest the institution suspend the issuance of gold certificates. According to the report, this had "the effect of causing an unnecessary amount coinage ... . When any important demand upon the Treasury for gold is made it is always for export, and bullion is wanted." Probably most 1905 ten dollar gold pieces were exported, and the rest were jostled around in bags at the Treasury. Consequently, most examples are seen in MS61 to MS63 condition with numerous abrasions.

This Superb Gem is exceptionally clean, ranking among the finest submissions at both services combined. Fully struck devices and rolling cartwheel frost appear over smooth, peach-gold surfaces. A couple of small reddish alloy spots at the lower obverse are distinctive. Population: 5 in 67 (1 in 67+), 0 finer (2/19). NGC ID# 7LD3, PCGS# 8757

### 1909 Ten Dollar, MS65 Luminous Surfaces, Conditionally Rare

**3907 1909 MS65 PCGS. CAC.** The 1909 Indian eagle is a major condition rarity in the series. In *Indian Gold Coins of the 20th Century*, Mike Fuljenz writes: "The 1909 date is one of the scarcest Philadelphia Mint issues and it ranks behind only the rare and very expensive 1933, 1907 Wire Edge and 1907 Rolled Edge varieties." The 1909 is most elusive in Gem and finer grades, with MS65 pieces being the finest that most collectors will have a chance to acquire. Fuljenz writes: "There are a few superb MS66 examples known but these tend to be in strong hands and are seldom offered for sale."

This CAC-approved MS65 coin is among the most attractive that we have seen for the grade. Softly frosted straw-gold luster engulfs unabraded surfaces, producing a radiant cartwheel effect. The design elements are sharply rendered. Population: 19 in 65 (1 in 65+), 12 finer. CAC: 6 in 65, 2 finer (3/19). NGC ID# 28GM, PCGS# 8862

### 1909-S Ten Dollar, MS65+ Rich, Frosted Mint Luster

**3908 1909-S MS65+ PCGS.** The Fuljenz' reference *Indian Gold Coins* notes "Before 1977, this issue was nearly impossible to find in Uncirculated condition but an accumulation of about 60 nice Uncirculated pieces was discovered." We are unclear if these coins originated from the same source in El Salvador as the 1909-S twenties, a hoard that emerged in the mid-to-late 1980s. This coin has spectacular mint luster, thick and frosted, and its surfaces are essentially unmarked by coin-to-coin contact. Each side also displays even, reddish-gold color. It would be difficult to improve upon the luster and overall appeal of this coin. Population: 26 in 65 (1 in 65+), 7 finer (2/19). NGC ID# 28GP, PCGS# 8864

## 1911-D Indian Eagle, MS64 Sought-After Key Date Seldom Offered This Fine

**3909 1911-D MS64 PCGS.** Ten dollar gold coin production at the Denver Mint began on April 26, 1911, but there was little need for the coins in the regional economy, since large numbers of eagles were still on hand from the outsized mintage of 2.3 million pieces the year before. In addition, Congress passed legislation allowing the Treasury to issue gold certificates against gold bullion and foreign coins in government holdings, instead of first having to convert the gold into U.S. coinage. Accordingly, only 30,100 Indian eagles were struck at the Denver facility in 1911 — a total that stands as the lowest among regular issues in the series.

The small production of 1911-D eagles was eventually released into circulation, and few examples were saved by contemporary collectors. Consequently, the 1911-D is usually seen in the XF-AU grade range today. It is decidedly scarce in higher grades and is the leading condition rarity of the series at the Gem level. Any Uncirculated representative would hold a special place in a complete set. This high-quality Choice example would certainly be a highlight.

Prominent Denver collector Edward B. Morgan displayed an example of the 1911-D Indian eagle at the 1914 ANS Exhibition and the issue began appearing at auction as early as lot 903 of the James H. Manning Collection (B. Max Mehl, 5/1921), "1911-D Uncirculated. Very scarce." The lot realized \$12, a strong price for a coin that was only ten years old at the time. Recent sales include the MS64 PCGS example that sold for \$70,500 in our Central States Signature in 2017.

The present coin is an attractive Choice specimen of this important series key. Liberty's forecurls and the two lowest headdress feathers display unusually sharp definition. Detail is similarly sharp on most of the reverse elements, the exceptions being the tip of the eagle's wing and the mintmark, which is weak, but legible. Warm golden-yellow surfaces are awash in satin mint luster and display clean fields with just a couple of ticks on the portrait. Overall eye appeal is outstanding. Population: 19 in 64, 3 finer (3/19). NGC ID# 28GU, PCGS# 8869

### 1915-S Indian Eagle, MS63 Elusive, Low-Mintage Issue

**3910 1915-S MS63 PCGS.** World War I was underway in Europe in 1915, limiting overseas trade and reducing demand for large denomination gold coins in this country. Accordingly, the San Francisco Mint only struck 59,000 Indian eagles that year, the second lowest S-mint production of the series. The coins were released into circulation and few were saved for numismatic purposes. Mike Fuljenz reports the 1915-S is difficult to locate in all grades above AU55 today, and examples in MS63 condition are “quite scarce.”

This impressive Select specimen displays sharp definition on most design elements, but just a touch of softness is evident on the eagle’s shoulder. The vivid orange-gold surfaces are lightly marked for the grade and both sides radiate vibrant mint luster with outstanding eye appeal. Population: 41 in 63 (2 in 63+), 33 finer (3/19). NGC ID# 28H6, PCGS# 8879

### Newly Minted 1930-S Tens

## 1930-S Ten Dollar Indian, Frosty MS65 Scarce, Heavily Melted Key Issue

**3911 1930-S MS65 PCGS.** The 1930-S Indian eagle is an iconic gold melt rarity. Only 96,000 pieces were struck. There is an old photograph of a San Francisco Mint vault that shows a wall of newly minted coins, and in a “small” pile in the corner are a group of sealed mint bags marked: “S.F. / MINT / \$5,000 / EAGLES / 1930.” That photographed vault is believed to have contained almost the entire mintage of the 1930-S eagle, of which one surviving example is offered here, in Gem condition.

Sometime after the photograph was taken, a small number of coins were made available to the public, either through the Mint Cashier or via distribution to the federal reserve banks. Remainders from the annual assay may also have been available to coin collectors through the Philadelphia Mint. It was not until April 1933 that ownership of recently minted gold coinage became illegal. According to research by Roger Burdette in *Saint-Gaudens Double Eagles*, almost all twenty dollar gold pieces struck at San Francisco in 1930 were melted just a few years later, without documentation to suggest that any significant quantities were ever even exported for trade. A similar fate likely befell the ten dollar gold pieces of this date.

Without question, the 1930-S Indian ten dollar is one of the grand key dates in the series in all grades. And it is especially rare in Gem and finer condition. We sold a stunning Gem in our September 2014 Long Beach Signature auction. That CAC-endorsed PCGS coin realized more than \$85,000, setting an auction record at the time for a 1930-S eagle in this grade, and that record still prevails. This piece is visually and technically the equal of that coin. Frosty orange-gold surfaces yield tinges of lilac and peach as they are made to shimmer beneath light by delicate rotation. The strike is sharp, and a tiny mark on Liberty’s jaw is the only imperfection that is readily observable. It is a magnificent example of the final eagle coinage of the San Francisco Mint, one we expect to equal or exceed the record of any 1930-S Gem in a Heritage auction. Population: 18 in 65 (3 in 65+), 6 finer (3/19). NGC ID# 28HA, PCGS# 8883

## LIBERTY DOUBLE EAGLES

### 1852 Twenty, MS62+ Bold Strike, Original Rich-Gold Color

**3912** 1852 MS62+ PCGS. All Type One double eagles are scarce to rare in Uncirculated grades. Despite a large mintage of more than 2 million pieces, the 1852 is seldom seen any finer than this example, with only about two dozen finer coins reported by PCGS and NGC combined. It would not be unusual for several years to pass before we see a finer 1852 example. The present coin is the sole Plus-graded MS62 at PCGS.

Lustrous, frosted surfaces show minimal bagmarks or abrasions. The coin was struck with a partial wire rim or "fin," and it shows a minor obverse edge nick at 9 o'clock in that area. Natural rich-gold color displays a pale-green hue, and a sharp strike provides crisp definition for Liberty's portrait and the surrounding stars. The surfaces are only nominally busy with field chatter and tiny marks. Population: 1 in 62+, 15 finer (2/19). NGC ID# 268K, PCGS# 8906

### 1853/2' FS-301 Double Eagle, AU58 Few Pieces Are Finer at Either Service

**3913** 1853/2' FS-301 AU58 PCGS. The date anomaly, which may (or may not) be an underdigit behind 3 in the date, is hardly a factor when evaluating this attractive near-Mint 1853 twenty. Gleaming rich-gold surfaces retain a large amount of mint luster beneath areas of pale-olive toning. A few tiny marks are shallow and unobtrusive, and only brief wear exists on the high points of Liberty's hair and the eagle's neck feathers.

Most of the original sharp strike remains. Any Type One double eagle that approaches Mint State attracts gold specialists and series collectors alike. This coin is sure to do the same, especially with the enigmatic 1853/2' designation and the associated *Cherrypickers'* number. Few pieces are finer in that regard. NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

**1853/2' Twenty, MS61**  
**Rarely Found in Uncirculated Grades**

**3914 1853/2' FS-301 MS61 PCGS. CAC.** The lower downstroke of the 2 is sometimes weak on this alleged overdate, but not so on this piece. Two other important pick-up points are necessary to mention: a squareish die dot is located on the coronet below the R in LIBERTY, and the crossbar of the A in STATES is broken. This variant is almost never found in Uncirculated grades. This is an especially lustrous example whose only interruption in the flow of the luster around each side are the numerous abrasions that invariably accompany these coins. Population: 8 in 61, 0 finer. CAC: 6 in 61, 0 finer (2/19). NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

**1855 Double Eagle, MS62**  
**A Rarity in Mint State**

**3915 1855 MS62 PCGS.** With the exception of issues that survived via shipwrecks, only a few Type One Liberty double eagles are extant in significant Mint State numbers. Most are scarce or rare so fine. The 1855 Philadelphia is decidedly rare in Mint State. Since 1993, we have handled an Uncirculated example on only 27 occasions, mostly in MS61 or lower condition. We have seen just nine MS62 coins and a single MS63 finer. This piece is easily among the finest pieces we have handled. Frosted yellow-gold luster illuminates sharp design elements and reveals only trivial contact marks in the fields. Some light die lapping is seen on the obverse at the designer's initials, but the reverse is unlapped. Collectors will be hard-pressed to locate another coin of comparable quality, let alone a finer piece. Population: 5 in 62, 3 finer (9/18). NGC ID# 268V, PCGS# 8914

### 1857-O Double Eagle, Partly Lustrous AU55

**3916** 1857-O AU55 NGC. **Variety 1.** Double eagle production at the New Orleans Mint rebounded out of the small four-figure range in 1857, reaching 30,000 pieces. However, this issue circulated extensively and its modern-day availability is limited. Circulated pieces are occasionally seen, but the finer AU-level coins are in high demand since only a few Mint State pieces exist. This Choice About Uncirculated example is especially pleasing. There is some light friction over the high points of the devices and in the open areas of the fields, but the protected peripheral fields glimmer with original prooflike mirroring. A few marks on Liberty's cheek are the only singular distraction. Color on each side is a pleasing straw-gold hue, and eye appeal is outstanding for the issue and grade. Census: 28 in 55, 31 finer (3/19). NGC ID# 2694, PCGS# 8921

### 1858 Liberty Double Eagle, MS62 Conditionally Rare Type One Issue

**3917** 1858 MS62 PCGS. The 1858 Liberty double eagle claims a mintage of 211,714 pieces, a fairly modest production for a Type One Philadelphia issue. The coins were released into circulation and few high-quality examples were saved. Unlike some Type One issues, relatively few have been recovered from shipwreck finds. As a result, the 1858 is a condition rarity at the MS62 grade level.

This appealing MS62 example exhibits sharply detailed design elements throughout. The pleasing yellow and peach-gold surfaces show the expected number of minor contact marks for the grade and the fields display a mix of vibrant mint luster and prooflike reflectivity. Eye appeal is outstanding. Population: 5 in 62 (1 in 62+), 5 finer (3/19). NGC ID# 2697, PCGS# 8923

## 1861 Double Eagle, MS63 Type Collection Candidate

**3918 1861 MS63 PCGS.** Once-upon-a-time, the 1861 double eagle was considered the single common date for the Type One design. However, its status changed when the *S.S. Central America* and other treasures were discovered late in the 20th century. Today, the 1861 is still a plentiful issue, but the 1857-S is considered the common date of the series. With a mintage of just under 3 million coins, the 1861 had the ninth highest production of any double eagle issue from 1850 through 1933, and the third highest mintage of the Liberty Head design. This Select Mint State specimen has a few trivial marks with frosty yellow gold luster, bold design elements, and faint traces of light blue toning. Population: 36 in 63 (2 in 63+), 17 finer (3/19). NGC ID# 269G, PCGS# 8932

## 1861-S Twenty Dollar, MS61 Overlooked S-Mint Type One Issue

**3919 1861-S MS61 PCGS. CAC.** Medium S. The 1861-S twenty is easily overlooked as it is positioned in the shadow of the 1861-S Paquet Reverse. However, even though 768,000 pieces were produced, the 1861-S is overlooked and undervalued. Few Uncirculated examples survived; most undoubtedly were circulated to some degree in the hard-money Western states. This is a pleasing example whose mint frost is thin, but complete. Strike details are better-defined than often seen, and there are only slight abrasions scattered across the surfaces. Population: 19 in 61, 8 finer. CAC: 3 in 61, 5 finer (2/19). NGC ID# 269K, PCGS# 8935

**1865 Twenty Dollar, MS62**  
**Ex: S.S. Republic**  
**Misplaced Date Variety**

**1866-S Motto Twenty, MS61**  
**First Type Two Issue**  
**Misplaced Date, FS-1301**

**3920** 1865 — Date in Rim — MS62 NGC. Bowers Variety 2. Ex: *S.S. Republic*. The *S.S. Republic* encountered a devastating hurricane and sank in the Atlantic Ocean on October 25, 1865. The wreck was recovered in recent years, and many double eagles bearing *S.S. Republic* pedigrees entered the numismatic market in 2006. The 1865, formerly rare in Uncirculated grades, is now collectible in Mint State, but is subject to greater demand than ever before. The present lustrous example is nearly pristine aside from a single narrow mark on Liberty's cheek. The tops of two date digits are obvious in the dentils beneath the 65 in the date, as listed in the 2004 *Guide Book of Double Eagle Gold Coins*.

Ex: *Dallas Signature* (Heritage, 3/2013), lot 4387, where it sold for \$15,275. NGC ID# 269U, PCGS# 8943

**3921** 1866-S Motto MS61 PCGS. Tall S. An errant 8 protrudes dramatically from the denticles to the right of the 1. The motto IN GOD WE TRUST was introduced on two cent pieces in 1864 and it eventually made its way onto the double eagle in 1866. Nearly 850,000 With Motto twenties were struck at the San Francisco Mint that year, but only a few dozen examples are known to survive in Mint State.

This medium yellow-gold double eagle is unworn and well-defined for the type. Frosty mint luster issues from the recesses on the obverse, while the cartwheel effect is more vibrant on the reverse. Wispy marks occur in the field, but deep abrasions, as one would expect to find on an MS61, are scant. Population (all varieties): 16 in 61, 8 finer (2/19). NGC ID# 26B2, PCGS# 8950

## 1868-S Type Two Twenty Dollar, MS62+ One of the Finest Examples Available

**3922 1868-S MS62+ PCGS.** Small squat S. The 1868-S double eagle has an undistinguished mintage of 837,500 pieces, and circulated examples can be found with little difficulty. The problem arises when an attractive Mint State coin is needed for a type or date/mintmark collection. This condition difficulty is explained by two major factors in the post-Civil War United States economy. First, gold and silver coins were widely used in the western states. Naturally, when coins are used in the channels of commerce it removes top-grade examples from the realm of collectibility for many in the numismatic community. Second, and undoubtedly a more significant factor, is the increasing use of the double eagle as a gold reserve for both newly formed national banks as well as shipment overseas for trade purposes. It was this use as a gold reserve that explains why mintages for twenty dollar gold pieces continued to be solid even at a time when other silver and gold issues saw little or no production. This strong production from year-to-year and in all mints continued throughout the Type Two series from 1866 through 1876.

Within the Type Two series the 1868-S is only considered 22nd of the 31 date and mintmark combinations that were issued. However, because of the shipment of these pieces and subsequent heavy abrasions seen on most examples, higher-grade collector pieces were all but rendered extinct. To underscore this, here are the combined populations of coins certified by both major services in Uncirculated condition: MS60 (38); MS61 (52); MS62 (13); MS63 (0); MS64 (1). Then subtract from those numbers an unknown number of crossovers, and the picture becomes even clearer what a dramatically overlooked issue the 1868-S twenty is in MS62+ condition. Considerable emphasis should be placed on the Plus designation because this is not an ordinary 1868-S or even a sometimes-available MS62. This piece has thick, frosted surfaces with only the slightest luster grazes and smallest abrasions. Strike details are what is expected from the Type Two design, meaning there is central softness evident on Liberty's hair as well as the peripheral obverse stars. However, the reverse is surprisingly well-defined. This Plus-designated 1868-S is among the finest examples available, and the astute collector will recognize the opportunity presented here. Population: 8 in 62 (2 in 62+), 0 finer (2/19). NGC ID# 26A4, PCGS# 8954

### 1869-S Twenty, MS63 Only Five Finer at PCGS

**3923 1869-S MS63 PCGS.** Shimmering, minimally abraded surfaces offer outstanding sharpness for this Type Two S-mint, and both sides are coated in delicate reddish-orange patina. Although obtained with relative ease in the various AU grades, including AU58, the supply of 1869-S double eagles sees a sharp reduction once the Uncirculated level is reached. Only a handful of Select and better representatives are known to exist. This piece is tied with one other piece (an NGC coin) as second finest known. Allegedly eight coins have been certified in MS64 by PCGS and NGC, but surely several of those are resubmissions. Population: 2 in 63, 5 finer (3/19). NGC ID# 26A6, PCGS# 8956

### 1870-S Twenty Dollar, MS62+ Second Scarcest Type Two Issue

**3924 1870-S MS62+ PCGS.** The 1870-S twenty is the second-scarcest issue in the Type Two series. Many might be surprised by this since 982,000 pieces were struck. Survivors, however, are seldom seen with surfaces equal to those seen on this coin. The typical 1870-S has choppy surfaces with indifferent luster. The next owner of this piece will understand the special nature of this piece. The surfaces are remarkably free from abrasions, more suggestive of a higher grade than what one normally thinks of when mentally conjuring what an MS62 looks like. This undoubtedly explains the Plus designation. Also, the finish is more frosted than the usual hybrid satin/frosted luster seen on most survivors. The strike is also noteworthy with little peripheral softness evident. This is a coin that will undoubtedly find a home with a collector who both knows and understands Type Two twenties. Population: 14 in 62 (1 in 62+), 2 finer (2/19). NGC ID# 26A9, PCGS# 8959

## 1871 Liberty Double Eagle, MS61 Elusive Type Two Twenty

**3925 1871 MS61 PCGS.** The 1871 Liberty double eagle claims a business-strike mintage of just 80,120 pieces, the lowest production total of any Philadelphia Type Two twenty. Few high-quality specimens were saved by 19th century collectors, who tended to prefer proofs to business strikes. The coins circulated heavily over the years, suffering wear and attrition along the way. The issue is scarce in all grades today, with most examples seen in the VF-AU grade range. Mint State examples are rare.

This impressive MS61 specimen exhibits sharply detailed design elements and the vivid orange-gold surfaces are lightly marked for the grade. Vibrant mint luster adds to the outstanding eye appeal. This coin will be a welcome addition to a fine collection or type set. Population: 9 in 61, 8 finer (3/19). NGC ID# 26AA, PCGS# 8960

## 1873-S Closed 3 Double Eagle, MS63 Only One Finer Certified

**3926 1873-S Closed 3 MS63 NGC.** The 3 punch was modified partway through the year in 1873 because Chief Coiner Archibald Loudon Snowden thought the old Closed 3 looked too much like an 8. Before the dies with the new Open 3 in the date reached the San Francisco Mint, a substantial mintage of Liberty double eagles had been struck using the dies with the Closed 3. As a result, the Closed 3 variety is seen more often today. Like most Type Two double eagles, the 1873-S is available in circulated grades, but Mint State examples are elusive.

The present coin is an impressive Select example, with well-detailed design elements that show just a trace of the usual softness on Liberty's curls. The vivid yellow-gold surfaces are lustrous and appropriately marked. Eye appeal is outstanding. Census: 3 in 63, 1 finer (3/19). NGC ID# 26AL, PCGS# 8969

### 1878-CC Double Eagle, AU50 Elusive Carson City Issue

**3927** 1878-CC AU50 PCGS. **Variety 1-A**, which shows a heavy vertical die line on Liberty's neck and a prominent "check mark" die gouge below the mintmark. The 1878-CC is typically offered in grades up to and including the XF level, and coins that grade finer than AU53 are few and far between in today's market. Comfortably graded at the AU50 level, this particular survivor retains semiprooflike finish in the protected regions of the fields with scattered abrasions elsewhere. None of the latter are individually distracting, and the otherwise yellow-gold color deepens to olive-gold hues as the coin rotates away from the light. Overall bold in definition, as befits a minimally worn representative of the 1878-CC double eagle.

*Ex: FUN Signature (Heritage, 1/2003), lot 9036, which realized \$3,450. NGC ID# 26B4, PCGS# 8986*

### 1884-CC Double Eagle, MS62 Few Finer Pieces Are Known

**3928** 1884-CC MS62 NGC. **Variety 1-A**. The availability of the 1884-CC makes it popular among type collectors, as few Carson City double eagles are available in Mint State. Coinage in this year amounted to 81,139 coins at Carson City, complementing a production of 916,000 pieces on the West Coast. Only 71 proofs were struck at Philadelphia in 1884. The Carson City issue circulated some domestically but was also used in the foreign trade. Many of the surviving coins on the market are repatriated from overseas vaults.

This MS62 coin is high-end for the date, finer than the typical Uncirculated coin. Sharp devices complement frosty yellow-gold luster, which is lightly abraded but does not have any singular imperfections. Some tiny coppery discolorations are visible near star 5 on the obverse and the LIBE in LIBERTY. Eye appeal is pleasing. Census: 48 in 62, 6 finer (3/19).

**From The Jersey Shore Gold Collection.** NGC ID# 26BK, PCGS# 9001

## 1885 Twenty Dollar, AU Details Only 751 Circulation Strikes Issued

**3929 1885 — Harshly Cleaned — PCGS Genuine. AU Details.** The minuscule mintage of just 751 pieces assures any 1885 double eagle will be in strong demand. Only an estimated 100 circulation strikes survive in all grades from that small mintage, and many of those coins are heavily abraded. Most are in the XF45 to AU55 grade range, while fully Mint State coins number around two dozen pieces. Another 15 to 20 proofs survive.

This example is net graded by PCGS for a harsh cleaning, although the in-hand appearance only suggests that the coin was cleaned. Under a loupe, dense hairlines appear as well as numerous tiny marks. The medium-gold surfaces are bright, yet they retain solid About Uncirculated sharpness and considerable visual appeal. We note a small mark on the bridge of Liberty's nose and another near star 13. This well-detailed 1885 offers a seldom-available opportunity to acquire one of the most famous low-mintage issues in the entire U.S. gold series, and we expect many bidders to recognize the opportune moment.

## 1885 Liberty Double Eagle, MS61 Classic Type Three Rarity Only 751 Examples Struck

**3930 1885 MS61 PCGS.** United States twenty dollar gold coins were extremely useful in foreign trade during the last half of the 19th century. Double eagles were immediately recognizable to European and Latin American trade partners and their weight and gold content were reliably guaranteed, making them ideal as a medium of exchange. On the other hand, twenty dollars was a lot of money to the average working man, and the coins were too large for everyday transactions. Accordingly, double eagles were seldom seen in circulation in this country, but the Mint continued to strike large numbers of them to serve as currency reserves and settle large accounts in foreign trade. For most of the 1880s, the Philadelphia Mint tried to limit production of double eagles and encourage the use of gold bars for overseas transactions, saving time and resources which were needed to strike the vast quantities of silver dollars the government was mandated to produce by the Bland-Allison Act of 1878. As a result of this policy, only 751 business-strike Liberty double eagles were struck at the Philadelphia Mint in 1885, accompanied by a mintage of 77 proofs to satisfy collector demand.

Most of the small business-strike mintage was released into circulation at the time of issue. Because most 19th century collectors preferred to update their collections by purchasing proofs every year, few of the business strikes were saved for numismatic purposes. As a result, most examples seen are in the XF-AU grade range today, and the surviving population probably numbers less than 100 specimens in all grades. Although more business strikes exist in lower circulated grades, high-grade business strikes are more elusive, and more expensive, than proofs of corresponding grades in today's market.

The present coin is an impressive Mint State specimen, with sharply detailed design elements throughout. The pleasing greenish-gold surfaces show the expected number of minor contact marks for the grade, with much prooflike reflectivity in the fields. The overall presentation is most attractive for this classic 19th century gold rarity. Population: 3 in 61, 6 finer (3/19). NGC ID# 26BM, PCGS# 9003

**1885-CC Double Eagle, AU55  
Variety 1-A**

**3931** 1885-CC AU55 NGC. CAC. **Variety 1-A.** A single die variety is known for the low-mintage 1885-CC double eagle that had a production limited to 9,450 pieces. Three decades ago, Walter Breen wrote that this variety was prohibitively rare in AU (or better), although today, the average certified grade is 50. NGC and PCGS have certified six percent of the mintage (577 submissions), including 345 examples that are graded lower than the present piece (2/19). This Choice AU representative has brilliant orange-gold luster with a trace of high point wear and minimal handling marks. A splendid example for the specialist or Carson City type collector. NGC ID# 26BN, PCGS# 9004

**1889-CC Liberty Double Eagle, MS61  
Branch Mint Type Three Issue**

**3932** 1889-CC MS61 PCGS. **Variety 1-A.** Coinage operations were suspended at the Carson City Mint after 1885, and the facility functioned as an assay office until 1889. The buildings were repaired and the equipment was updated in 1889 and coinage was resumed late in the year. Only 30,945 Liberty double eagles were struck, but the issue is more available than that small production total would suggest, due to a significant hoard that surfaced in Europe in the 1990s.

The present coin is an impressive Mint State specimen, with well-detailed design elements that show just a trace of softness on the letters in LIBERTY. The pleasing orange-gold surfaces are lightly marked for the grade and retain most of their original mint luster. The overall presentation is most attractive. Population: 62 in 61, 67 finer (3/19). NGC ID# 26BV, PCGS# 9011

**1889-CC Double Eagle, MS62**  
**Minimally Abraded, Attractive Surfaces**  
**Rare in Finer Grades**

**3933 1889-CC MS62 PCGS. Variety 1-A.** Collectible as a Carson City date, the 1889-CC double eagle shows a modest mintage of 30,945 pieces. Most of the mintage went straight into circulation, since twenty dollar gold pieces remained a viable denomination in the West throughout the 19th century and into the early 20th century. Contrary to other gold denominations — in particular, the three dollar gold piece and the gold dollar, which were discontinued in 1889 — double eagles were still in demand by the business public.

Nearly all 1889-CC twenties are heavily abraded and in circulated or low Mint State grades. Bagmarks are the usual culprit. This MS62 example is sharp with superior surfaces in comparison, and it is scarce as such. Frosted rich-gold color radiates mint luster, and the coin is sharply struck from edge-to-edge throughout both sides. A pair of light abrasions near star 13 are the only marks of note. PCGS has seen just eight numerically finer examples. Population: 59 in 62 (2 in 62+), 8 finer (2/19). NGC ID# 26BV, PCGS# 9011

**1891 Twenty Dollar, Choice XF**  
**Only 1,390 Coins Struck**  
**Fewer Than 100 Survive**

**3934 1891 XF45 PCGS.** A total of 84 1891 twenty dollar gold pieces are reported at PCGS and NGC combined. That probably includes untold crossovers and resubmissions. It is generally accepted that fewer than 100 pieces exist in all grade from a production of 1,390 coins. The Mint also struck 52 proofs that year. It was those coins that most contemporary collectors targeted for their sets, partly explaining the low survivorship of circulation strikes. This problem-free Choice XF representative maintains a touch of semiprooflikeness in the fields and yellow-gold color overall. There are myriad small abrasions and hairlines on each side, with a couple of more prominent reeding marks on the portrait. Detail remains good. The stars show nearly complete radial lines, and the hair strands are well-delineated despite faint high-point merging. The 1891 is a challenging date in any grade, let alone high-end XF condition. This example is destined for an advanced collection. Population: 2 in 45, 36 finer (2/19). NGC ID# 26C2, PCGS# 9016

## 1907-D Twenty Dollar, MS66 Nearly Uncollectible Finer

**3935 1907-D MS66 PCGS.** The 1907-D is the only final-year Liberty Head double eagle issue known to survive finer than MS65 (3/19). Premium Gems are rare, but they are collectible for a price. This piece displays shimmering, frosty peach-gold mint luster and well-struck design elements. A few faint marks hidden within Liberty's hair and on the cheek are all that deny perfection. We have previously handled a coin in this grade on only 10 occasions, including the NGC Newman coin, which realized \$25,850 (Heritage, 11/2014), lot 3416. The piece offered here is the technical equal of that example, and it is only the fourth PCGS-graded coin that we have seen within the last decade. Clearly, in MS66 and finer grades, the 1907-D double eagle is rarer than its certified population suggests. Population: 23 in 66 (2 in 66+), 1 finer (3/19). NGC ID# 26D8, PCGS# 9053

## 1907-D Twenty Dollar, MS66+ Exceptionally Well-Preserved Surfaces

**3936 1907-D MS66+ PCGS.** The 1907-D can be found in a wide range of grades. The majority are so-so Uncirculated pieces, probably used in bank transactions. A few, however, are exceptionally well-preserved, such as this piece. The surfaces are bright and frosted, unlike the usual satiny finish seen on Denver products. Additionally, each side displays a wide but subtle ring of iridescence around the margins. This is significant as it indicates the untampered originality of the coin. The strike details are sharp overall and there are no mentionable abrasions. The Plus designation communicates a great deal about the eye appeal and overall preservation of this lovely twenty. Population: 23 in 66 (2 in 66+), 1 finer (2/19). NGC ID# 26D8, PCGS# 9053

## PROOF LIBERTY DOUBLE EAGLE

### 1905 Double Eagle, PR65+ Ultra Cameo About 40 to 50 Examples Extant Rare With Bold Contrast

**3937 1905 PR65+ Ultra Cameo NGC. JD-1, High R.4.** A mintage of 92 proofs for the 1905 Liberty Head double eagle resembles those of the 1904 and 1906 proof twenties (98 and 94 coins, respectively), but of the three, the 1905 is by far the rarest. John Dannreuther recently pegged the survivorship between 50 and 65 examples, and PCGS estimates only 40 to 45 pieces are extant. Garrett and Guth's estimate of as few as 30 to 40 coins is more in line with the frequency of auction appearances, though it could be that a number of examples are tightly held and simply do not trade hands. Since the beginning of our auction archives in 1993, we have sold only 27 examples of this proof issue, including reappearances of previously offered coins. There are two pieces in the Smithsonian Institution and a third is out of collectors' hands in the American Numismatic Association.

This Gem proof enjoys membership in an exclusive club of examples that boast any sort of Cameo designation. Because of the die preparation process used during the period from 1902 to 1907, few examples of this issue were ever struck with distinctive field-device contrast. In all grades, NGC lists only 10 Cameos, including possible resubmissions. This coin is *the only one* certified in Ultra (or Deep) Cameo at NGC and PCGS combined (3/19).

The eye appeal high-end proof is outstanding, featuring stark field-motif contrast amid warm yellow-gold color. The devices are sufficiently frosted, while the fields showcase incredibly deep mirroring and are devoid of any obvious hairlines. NGC ID# 26ET, PCGS# 99121

## HIGH RELIEF DOUBLE EAGLES

### 1907 Wire Rim High Relief Twenty, MS65 Based on the Nike of Samothrace

**3938 1907 High Relief, Wire Rim MS65 NGC.** The striding figure of Liberty on the High Relief double eagle was based on the Nike of Samothrace. That statue from Hellenistic Greece was excavated in 1883 by a young French vice-consul to Adrianople, Charles Champoiseau. The role of Nike in the pantheon of Greek gods and goddesses was one that was more than just the embodiment of victory, which was so desired by soldiers and sportsmen in the ancient world. Nike was not an abstract concept, but a goddess who chose who would receive her honors. A fragment by Simonides reads in part: "[T]o win glory, stepping into the chariot of honored Nike (Victory): for to one man only does the goddess grant to jump into her great carriage." It was this singular honor and prominence among the nations of the world that Augustus Saint-Gaudens embodied his figure of Liberty on the High Relief twenty; America confidently striding into the 20th century, a country with no peers. The smooth Parian marble of the original Nike of Samothrace is replicated on this well-preserved High Relief by the glowing, reddish-tinted satiny surfaces that are all but devoid of contact marks. The strike details are complete throughout. NGC ID# 26F2, PCGS# 9135

The Nike of Samothrace

**MCMVII High Relief Twenty  
Nearly Flawless MS66  
A Wire Rim Encircles Almost  
All of the Margins**

**3939 1907 High Relief, Wire Rim MS66 PCGS.** At the dawn of the 20th century America was a changed country. It was quickly changing from an agrarian to an industrialized nation. America's military power seemed obvious, but remained untested until it tipped the scales in favor of the Allies in World War I. The country had a new president after William McKinley was assassinated, Theodore Roosevelt; and Roosevelt had his own ideas about how the new, emerging nation should be governed. Those new ideas also extended to the symbolic. America began empire-building with the Spanish-American War, but Roosevelt brokered peace talks between Russian and Japan (winning him the Nobel Peace Prize).

Image was of such importance to Roosevelt that it extended down to the coinage in people's pockets. He disliked the unimaginative, low-relief coinage he saw in circulation at the time, and he challenged the country's foremost sculptor, Augustus Saint-Gaudens, to redesign the nation's coins from the common cent to the twenty dollar gold piece. The process began in early 1905 and eventually only involved two coins, the ten and twenty dollar gold pieces. But his redesign of these coins reflected the societal changes on the horizon, changes that would eventually label the 20th century as the American Century. With his decades-long experience as a sculptor, Saint-Gaudens brought a vibrancy and freshness of design to his High Relief double eagle that was clearly lacking in the Neoclassical designs from the 19th century. Saint-Gaudens insisted his double eagle design be struck in high relief, but in fact this was not just an artist's idiosyncratic demand. It was, in fact, necessary to strike the design he conceived in high relief because he had an almost three-dimensional concept for the figure of Liberty, much the same as the figures on his Shaw Memorial. This high-grade example of Saint-Gaudens' concept for a circulating twenty dollar gold piece is nearly flawless. The satin-like surfaces show no obvious abrasions. The coin has taken on a light reddish patina across both sides and the devices are fully detailed throughout. NGC ID# 26F2, PCGS# 9135

**MCMVII Twenty Dollar, MS65  
High Relief, Flat Rim**

**3940** 1907 High Relief, Flat Rim, MS65 NGC. Perhaps the most famous of all U.S. gold coins is the MCMVII High Relief double eagles. Augustus Saint-Gaudens created the designs, following instructions from President Theodore Roosevelt whose goal was to improve the designs of all U.S. coinage. In a letter to Treasury Secretary L.M. Shaw, the president commented: "I think our coinage is artistically of atrocious hideousness." President Roosevelt was pleased with the Saint-Gaudens design, and ordered production at the Mint. At about the same time, a second design that was created for the double eagle eventually became the model of a new design of the ten dollar gold piece, featuring an Indian wearing a headdress, and a standing eagle on the reverse. This splendid Gem shows the Saint-Gaudens design in its full beauty and displays a full strike with virtually flawless, highly lustrous surfaces. NGC ID# 26F2, PCGS# 9136

**1907 Flat Rim High Relief Twenty, MS65  
Much Scarcer Strike Variant**

**3941** 1907 High Relief, Flat Rim, MS65 PCGS. The sculptural works of Augustus Saint-Gaudens are an interesting blend of what is often called "naturalism" and the Neoclassical reworking of ancient Roman statuary. On the High Relief twenty dollar both influences are seen. The reverse has a realistic portrayal of an eagle in flight (borrowed from Christian Gobrecht's much earlier eagle). The obverse, however, skips over the Neoclassical interpretation of Roman statues and goes directly to the source, Hellenistic Greece. It was, in part this ability to adapt two styles simultaneously that earned him the epithet the "American Michelangelo." American numismatists over the past century have certainly agreed, and Saint-Gaudens' High Relief double eagle has justifiably earned its place among the most popular issues, not only in U.S. coinage, but among all coins struck worldwide and through all time.

Production of these extraordinary coins was not without its problems. One was the small space that remained between the die faces and the collar. With the enormous pressure exerted by the hydraulic press, a tiny "fin" or wire rim of gold was extruded around the rim of each side. The Mint saw this as a production problem and eventually they solved the problem, in the process creating the Flat Rim variant of the High Relief twenty. These pieces are much scarcer than the so-called Wire Rim twenties, and especially so in high grades. This is a bright, satiny example that displays significant reddish patina over each side, and there are no mentionable contact marks. Extraordinary quality. NGC ID# 26F2, PCGS# 9136

## SAINT-GAUDENS DOUBLE EAGLE

### 1908-S Double Eagle, MS63 Low-Mintage Early Series Issue

**3942** 1908-S MS63 NGC. Not only does the 1908-S twenty have a very low mintage of only 22,000 pieces (second only to the 1907 High Relief), but it is also scarce in all grades. In Mint State, though, the 1908-S is especially difficult to locate. 1908-S twenties have a reputation for always being sharply struck, and so it is with this piece. The surfaces show the soft, frosted luster usually seen, and there are virtually no marks visible on either side. In fact, one might wonder why this escaped a coveted MS64 grade. Worthy of a premium bid. Census: 21 in 63, 27 finer (3/19).

*Ex: Long Beach Signature (Heritage, 2/2006), lot 3549. NGC ID# 26FA, PCGS# 9149*

## COMMEMORATIVE SILVER

### 1921 Alabama Half Dollar, MS67 2x2 Variant, None Numerically Finer

**3943** 1921 Alabama 2x2 MS67 PCGS. CAC. Designed by Laura Gardin Fraser, the Alabama Centennial half dollar has one of the most dynamic eagles on all of U.S. coinage. This example is particularly sharp for the issue, which usually comes lightly struck. Most Alabama halves show marks from the original planchet, which remain in areas where the strike was incomplete such as Governor Kilby's cheek, although few marks exist on this deeply struck Superb Gem.

Attractive gold and ice-blue toning accompany pearlescent silver luster that glows beneath the moderate toning. The surface quality is far above average on this 2x2 example, which had a net distribution of just 6,006 pieces — a small number compared to the plain Alabama halves (without the 2x2 imprint). This splendid coin is housed in a previous generation green label holder, tied for the numerically finest-known at either service, and is one of the few examples to receive CAC endorsement at the MS67 level. Population: 9 in 67 (2 in 67+), 0 finer. CAC: 4 in 67, 0 finer (2/19). NGC ID# BYEZ, PCGS# 9225

**1921 Missouri Half Dollar, MS67  
2x4 Obverse Variant**

**3944** 1921 Missouri 2x4 MS67 NGC. Missouri became the 24th state on August 10, 1821 following the Missouri Compromise. President James Monroe signed the legislation on March 6, 1820, admitting Maine as a free state and Missouri as a slave state. A century later, Sedalia, Missouri was the site of the Missouri Centennial Exposition and State Fair that was held August 8-20, 1921. Two varieties exist, with or without the incuse 2★4 in the left obverse field. It is thought that the variety with the 2★4 as offered here had a substantially lower mintage, although certification totals suggest a slightly lower mintage. This lovely Superb Gem has excellent eye appeal with gold and gray toning over lustrous surfaces. Census: 1 in 67, 0 finer (2/19). NGC ID# 2FE9, PCGS# 9331

**1934 Texas Half Dollar, MS68  
Tied for Finest Certified**

**3945** 1934 Texas MS68 NGC. The 1934 Texas commemorative half dollar enjoyed a large distribution figure of 61,463 pieces in its first year of issue, and it is always popular with collectors. Given its complex reverse design — where virtually every Texas icon is represented — it is amazing that any coins reach the Superb Gem level, let alone the lofty MS68 grade. The obverse is less complicated but equally strike-challenged, with the eagle's breast and legs vulnerable to marks and weakness.

This exceptional coin is well-balanced and beautifully preserved. Colorful iridescent shades occupy the sloping borders, while light-gold and lilac hues adorn the centers. Silver mint luster glows from the satin-smooth surfaces, which are devoid of any significant marks. The eye appeal is outstanding. This coin is tied with three others at PCGS and NGC combined for finest-certified. Census: 2 in 68 (1 in 68+), 0 finer (2/19). NGC ID# BYJ7, PCGS# 9381

## COMMEMORATIVE GOLD

### 1915-S Round Pan-Pac Fifty Dollar Sharp AU Details Collector-Grade Example

**3946** 1915-S Panama-Pacific 50 Dollar Round — Cleaned — PCGS Genuine. AU Details. Ex: The Blue Hill Collection. The 1915-S Round Pan-Pac fifty dollar gold piece is distinguished as the lowest-distribution issue in the entire classic commemorative series. Only 483 coins were sold to collectors and fair-goers at the 1915 Panama-Pacific International Exposition, leaving a remainder of more than 1,000 coins that were melted as unsold. This issue — as well as its Octagonal counterpart — represents the biggest “stopper” to a complete United States commemorative coin collection.

This piece offers a rare opportunity to acquire a more affordable example of the issue. Hairlines on each side deny a numeric grade, and the faintest trace of rub — likely from the cleaning — leads PCGS to assign an AU Details designation. Nonetheless, to the unaided eye, the coin appears unworn, and the hairlines are not obvious. This is an appealing coin that will appeal to numerous classic commemorative collectors looking for an obtainable Round Pan-Pac fifty.

San Francisco History Center, San Francisco Public Library

## 1915-S Round Panama-Pacific Fifty Unc Details Only 483 Examples Sold

**3947 1915-S Panama-Pacific 50 Dollar Round — Cleaned — NGC Details. Unc.** The Panama-Pacific fifty dollar gold pieces, designed by Robert Aitken, depict the head of Minerva, the Roman equivalent of the Greek Athena, as the central figure on the obverse. Athena was a multipurpose deity. She was the goddess of war, wisdom, women at the loom, carpenters, charioteering, horse-taming, and shipbuilding. Historian Walter Burket remarked how Athena had united all of these “divergent spheres of competence [not as an] elemental force, but [as] the force of civilization.” He goes on to say, “It is not the wild olive of Olympia, but the cultivated tree which is the fit of Athena. ... Poseidon excites the waves, Athena builds the ship; Hermes may multiply the flocks, Athena teaches the use of wool.” Athena, then, was a civilizing ideal. As such, this ancient goddess was the perfect representation for the dual celebrations of the Panama-Pacific Exposition, the opening of the Panama Canal and the rebuilding of San Francisco after the devastating earthquake in 1906.

The Round Panama-Pacific fifty is the scarcer of the two design variants. Only 483 Rounds were sold to collectors. The novel Octagonal was more popular, but even its popularity couldn’t sell more than 645 examples at the Exposition. This piece shows only light hairlining on each side and the overbrightness one would expect. Still, the surfaces are pleasing and retain most of the coin’s original satiny luster. There are almost no abrasions on either side, and locating those that are present requires magnification.

## 1915-S Panama-Pacific Fifty, MS65 Scarcer Round Version 483 Examples Distributed

**3948 1915-S Panama-Pacific 50 Dollar Round MS65 NGC.** The Panama-Pacific International Exposition was a World's Fair event, held to commemorate the opening of the Panama Canal and the recovery of San Francisco after the great earthquake of 1906. The 1915-S Panama-Pacific fifty dollar gold piece was part of an ambitious five-coin set of commemorative coins issued in conjunction with the Exposition. Numismatic entrepreneur Farran Zerbe conceived this unprecedented program of commemorative coinage, with the set consisting of two fifty dollar gold pieces, round and octagonal versions, a quarter eagle, a gold dollar, and a silver half dollar. The coins were initially offered individually, or in sets, with the sets displayed in velvet-lined black leatherette cases. More purchasing options were offered later to improve lagging sales, including sets encased in elaborate glass-fronted copper frames from Shreve & Co., a local jewelry firm. Heritage Auctions is privileged to offer a spectacular Gem representative of the scarcer round fifty dollar piece in this important lot.

The design for the two fifty dollar commemoratives was by sculptor Robert Aitken, who was born in San Francisco in 1878. The obverse features a helmeted Minerva, the Roman goddess of industry. The reverse features her companion owl (wisdom), perched on a branch of western pine. The octagonal and round fifty dollar gold commemoratives were intended to have a maximum distribution of 1,500 pieces each, but sales fell far short of those objectives. The Pan-Pac fifties were priced at \$100 each, a prohibitively high price for most collectors of the time. As a result, only 483 examples of the round fifty dollar coins were sold. The octagonal version fared a little better, but still only sold 645 pieces. The remainder were melted after sales closed.

The round fifties began appearing at auction at least as early as lot 500 of the Cook-Conover Collections Sale (B. Max Mehl, 11/1916). Lots 500-504 of the sale comprised a five-piece set of 1915-S Panama-Pacific commemoratives, with the coins offered separately. The set was purchased by a single collector for a total price of \$200. Recent sales of the round Pan-Pac fifty include the MS65 PCGS specimen in lot 6123 of our January 2017 FUN Signature, which realized \$188,000.

The present coin is an attractive Gem, with sharp definition on all design elements and lightly textured lemon-yellow and rose-gold surfaces that show no mentionable distractions. Vibrant mint luster adds to the outstanding eye appeal of this exceptional gold commemorative and we expect intense competition from series specialists when this lot is called. Census: 63 in 65 (5 in 65+, 4 in 65★, 1 in 65+★), 24 finer (3/19). NGC ID# BYHP, PCGS# 7451

## 1915-S Panama-Pacific Fifty, Unc Details Octagonal Format

**3949 1915-S Panama-Pacific 50 Dollar Octagonal — Altered Surfaces — PCGS Genuine. Unc Details.** These massive fifty dollar gold pieces issued in conjunction with the Panama-Pacific International Exposition are commonly referred to as “slugs” and for good reason. Weighing in at two and a half ounces (83.59 grams), each coin measures well over the combined weights of two double eagles.

In fact, the large Pan-Pac fifties were modeled after the so-called fifty dollar ingots produced in San Francisco during the early Gold Rush period. Robert Evans explains in an August 2013 *Numismatist* article entitled “Augustus Humbert and His \$50 Gold Piece:

“The creation of the \$50 gold pieces was part necessity, part political compromise and largely experimental. The massive amount of gold extracted from California’s hills and streams in 1848, 1849 and 1850 was physically and commercially overwhelming. The United States Treasury reacted to the sudden availability of so much gold by introducing the double eagle (\$20), first minted for circulation in 1850 and containing twice as much gold as the eagle (\$10). That year, tens of millions of dollars entered circulation in the form of double eagles. But these coins were made in Philadelphia and New Orleans and did not resolve the economic problems in California, as too little federally issued coinage reached the Golden State.

“The introduction of the fifty dollar gold piece by Augustus Humbert, Assayer at the United States Assay Office in San Francisco, served as a workaround for laws that banned states from producing their own coinage, while satisfying the needs of commerce. According to Evans:

“Federal law prohibited the issuance of coins by any state, but under authority of a United States assayer, ‘ingots’ of \$50 and greater value were to be produced for circulation. This was intended to stabilize the price of raw gold, securing for the hard-working miner more of the fruits of his labor.”

The octagonal Humbert fifties quickly became a symbol of Gold Rush commerce and remains so to this day. The Panama-Pacific coins, inspired by the Humbert ingots, are much scarcer and equally iconic.

This example shows no signs of wear and exhibits minimal surface marks, although evidence of smoothing is visible. The overall eye appeal of this piece remains strong. Here is an important opportunity to acquire the largest commemorative coin ever struck by a U.S. Mint.

## 1915-S Octagonal Panama-Pacific Fifty Dollar, MS61 Soft, Frosted Reddish-Gold Surfaces

**3950 1915-S Panama-Pacific 50 Dollar Octagonal MS61 NGC.** Like the 1876 Centennial Exposition and the 1893 World's Columbian Exposition, the 1915 Panama-Pacific International Exposition served to showcase American progress in all its forms, from technology and architecture, to agriculture and manufacturing, but perhaps most importantly the country's growing stature on the world stage. Indeed, as Maureen Flanagan writes in *America Reformed: Progressives and Progressivisms, 1890s-1920s*:

"The locations of three major exhibitions held in the United States from 1876 to 1915 metaphorically celebrated the expansion of the continental United States: from Philadelphia to Chicago to San Francisco, the United States was complete from coast to coast."

Americans had also just completed the construction of the Panama Canal in 1914, giving them control of the most important waterway in the Western Hemisphere. And by the end of World War I in 1918, the United States would firmly establish itself as the leader of the new world order.

This was the context in which the PPIE was held. It was also the climate in which sculptor Robert Aitken was tasked with creating designs for the fifty dollar commemorative gold pieces issued in conjunction with the fair. Aitken understood that he had to "to express in my design the fact that this coin is struck to commemorate the Panama-Pacific Exposition" and knew that "the exposition stands for all that wisdom and industry have produced ... ." As such, he chose to feature Minerva, Roman goddess of wisdom and skill, on the obverse and her owl perched upon a branch of western pine on the reverse. Aitken wrote in a letter to Mint Director Frederick P. Dewey: "With these simple symbols, as full of beauty in themselves, I feel that I have expressed the larger meaning of the exposition, its appeal to the intellect."

Aitken was correct both in his belief that his symbolic devices would appeal to the intellect as well as express their inherent beauty. Even though their initial price at the time of issue (\$100 per coin) prevented many contemporary collectors from purchasing them, they have maintained a consistent popularity with collectors ever since. This is an attractive Octagonal that presents much better than its grade might indicate. The reddish-tinted mint luster is full and softly frosted. The only grade limitations are a few small abrasions on each side. This is a coin that should be carefully considered by collectors who value originality. NGC ID# BYHP, PCGS# 7452

## 1915-S Panama-Pacific Octagonal Fifty Exposition Relic, MS63

**3951 1915-S Panama-Pacific 50 Dollar Octagonal MS63 NGC.** There is no debate that the Pan-Pac fifty dollar gold pieces of 1915 are the most prestigious issues in the classic commemorative series. The hefty gold weight, impressive size, and iconic neoclassical design elements — symbolic as much as they are aesthetically pleasing — rank the coins among the most sought-after of all United States gold pieces. The modern-day demand for Pan-Pac fifties of both varieties is perhaps the greatest fulfillment of Charles C. Moore's prediction upon seeing the first coin struck: "Numismatists will seek these coins with zeal."

Farran Zerbe, in charge of the Department of Coins and Medals for the Panama-Pacific International Exposition, was the primary distributor of the fifty dollar gold pieces, as well as the quarter eagle, gold dollar, and half dollar that were also issued for the San Francisco fair. Zerbe sold the coins individually and in sets through his Money of the World exhibit at the exposition. Robert R. Van Ryzin, in an April 1999 *Coins Magazine* article entitled "The ANA's day at the fair," wrote:

"Zerbe's now famous exhibit was highlighted not only by his own vast collection but by rare pieces on loan to him, including (according to the April 1916 issue of *The Numismatist*): '... some exceptionally rare pieces from the collection of H.O. Granberg, Oshkosh, Wis., which included the finest known Oregon Beaver \$10 gold coin, United States pattern pieces, and the eight-daler copper plate of Sweden; some very choice gold bank notes from George H. King of Denver; a unique collection of Oriental porcelain tokens and other specimens from Elmer S. Sears, Swansea, Mass.; selections from the medallion collection of A.J. deLagerberg, Passaic, N.J., and some favors through the courtesy of Dr. George F. Kunze of New York.' "

Zerbe was an effective salesman for the Pan-Pac commemoratives, although sales of the fifty dollar gold pieces were stunted by the high purchase price of \$100 per coin. The Mint struck 1,500 Octagonal and 1,500 Round fifties for sale through the exposition, but Zerbe was only able to distribute 645 Octagonal and 483 Round examples. The remainders were melted after the close of the exposition.

This Select Octagonal example showcases a sharp strike and rich, satiny orange-gold mint luster. No mentionable abrasions are present. The Octagonal Pan-Pac fifty was the more popular of the two varieties in 1915, and it remains comparably sought-after today. NGC ID# BYHP, PCGS# 7452

## PROOF COMMEMORATIVE GOLD

### 1903 McKinley Gold Dollar, PR66 Finest Deep Cameo at PCGS

**3952** 1903 Louisiana Purchase McKinley Gold Dollar PR66 Deep Cameo PCGS. CAC. The first 100 coins produced for the Jefferson and McKinley gold dollars were proofs, "affixed to imprinted cards, with the coins held under a waxed paper window secured with chords and a red wax seal," according to Dave Bowers. The entire presentation was framed, signed by Coiner Rhine R. Freed and Mint Superintendent John H. Landis, and distributed to government and exposition officials, as well as well-connected insiders. Unfortunately, this PCGS certified example is not accompanied by its original packaging. The vast majority of known McKinley gold dollar proofs (about 80 to 90 pieces survive) lack any sort of cameo contrast. A small group shows moderate contrast. Considering the unprecedented field reflectivity and thick frost on both sides of this incredible Premium Gem, we feel confident this must have been one of, if not the first impression from the dies. Myriad raised polish lines are apparent on the portrait and in the fields. Each side is a deep yellow-gold hue and almost perfectly preserved. Truly a monumental opportunity for gold commemorative specialists. Population: 1 in 66 Deep Cameo, 0 finer (3/19). PCGS# 622825 Base PCGS# 7483

## TERRITORIAL GOLD

### (1834-1837) C. Bechtler Dollar 28 G. High in Field, N. Carolina Gold Rare K-2, Choice About Uncirculated

**3953** (1834-1837) C. Bechtler Dollar, 28 G. High, AU55 PCGS. **Kagin-2, R.6.** This is a rare, Choice About Uncirculated Christopher Bechtler gold dollar — seldom offered — with C BECHTLER. RUTHERF: positioned around 28G, which sits high in the obverse field. The reverse shows N:CAROLINA GOLD.DOLLAR. around ONE. The crudely made dies mix and match letter sizes (the H is fashioned from two I's, with an engraved crossbar), yet the minting was carefully done and the planchets painstakingly prepared to slightly exceed federal standards.

We assume this piece has a finely reeded edge, although that is impossible to confirm in the early blue label PCGS holder with barcode on the back. We are aware of just one Plain Edge variant, unlisted in the Kagin reference. Lovely golden-tan toning fills the margins, while the centers are lightly toned and appear a silver-green color typical of naturally alloyed North Carolina gold. Listed on page 392 of the 2019 *Guide Book*. Population: 1 in 55, 3 finer (3/19).

**From The Uptown Collection of Bechtler Territorial Gold.** NGC ID# 2B95, PCGS# 10061

**(1837-1842) Bechtler Quarter Eagle  
K-13, 70 G., AU58**

**3954** (1837-1842) C. Bechtler Quarter Eagle, 70 G. 20 C. AU58 NGC. K-13, R.6. This seventh-series design is unique, featuring the 70.G stamp and 20 CARATS below. Both sides display bright yellow-gold color and scattered hairlines, but the strongly rendered devices are practically void of rub. A die break from the rim at 9 o'clock on the reverse nearly touches the colon. Struck from rotated dies. Christopher Bechtler was based in Rutherfordton, North Carolina and was responsible for converting locally mined gold into coinage for circulation in the area. Prolific and highly respected through the 1830s and early 1840s, Bechtler's private mint even competed with the U.S. branch mint at Charlotte for a number of years. Listed on page 393 of the 2019 *Guide Book*. Census: 4 in 58, 7 finer (3/19).

**From The Uptown Collection of Bechtler Territorial Gold.** NGC ID# 2B9J, PCGS# 10070

**(1837-1842) C. Bechtler Quarter Eagle  
GEORGIA, 64 G., Uneven 22, K-11  
Choice About Uncirculated**

**3955** (1837-1842) C. Bechtler Quarter Eagle, 64 G. Uneven 22 C. AU55 PCGS. K-11, R.6. Among the Southern gold-producing states during the 1830s and 1840s, Georgia's was of the highest purity. This Choice About Uncirculated GEORGIA GOLD Bechtler quarter eagle features distinctively uneven digits in the carat punch, differentiating this variety from the scarcer K-12 variant. As usual, a few die breaks are seen, including one from the rim through the T in BECHTLER. Coloration is light yellow-gold, and each side displays strong devices with little evidence of high-point rub. Myriad marks are noted throughout. Listed on page 393 of the 2019 *Guide Book*.

**From The Uptown Collection of Bechtler Territorial Gold.** NGC ID# 2B9J, PCGS# 10073

**1831-1834 C. Bechtler Quarter Eagle  
K-8, RUTHERFORD in a Circle, AU58  
Iconic North Carolina Issue**

**3956** (1831-1834) C. Bechtler Quarter Eagle, Center Circle AU58 PCGS. CAC. K-8, R.7. This is an iconic piece of North Carolina gold and a significant opportunity for specialists in the Territorial gold series. The Bechtler family was the premier private coiner in operation during the North Carolina gold rush of the 1830s. At a time when federal specie was virtually unseen in circulation, the Bechtlers successfully converted the gold mined in and around Rutherfordton and beyond into coinage suitable for local commerce, and of consistently high quality. It was a group of local miners who first petitioned Christopher Bechtler, a respected jeweler, to perform this assaying and coining service. According to Don Kagin, "this was quite agreeable to Bechtler, for on July 2, 1831, and for several weeks thereafter, he ran an advertisement which announced that he was ready to coin the products of the mines into \$2.50 and \$5.00 pieces... ." Later, Bechtler would be the first to put gold dollars into the channels of American commerce.

In late 1834, after Congress passed legislation reducing the statutory weight of federal gold coinage, Bechtler began stamping his coins with NORTH CAROLINA GOLD, CAROLINA GOLD, and GEORGIA GOLD, with each area representing a different quality rather than geographical location. Again, we cite Kagin:

"Worded this way, it seems Bechtler used the geographical names as product 'types,' rather than as points of origination, though the three different degrees of quality may also have corresponded with the fineness of product from the noted region."

This particular variety, stamped NORTH CAROLINA GOLD around the obverse with 20.C. and 75.G. at the centers, is a major rarity in any grade. We are delighted to also offer the second finest example of K-8 as part of our Central States Signature auction, but this AU58 with CAC approval is similarly appealing. Green-gold surfaces display original reddish accents and strong detail throughout. Wear is almost nonexistent, and ticks are minimal. Listed on page 393 of the 2019 *Guide Book*.

**From The Uptown Collection of Bechtler Territorial Gold.** NGC ID# 2B9D, PCGS# 10079

## (1831-1834) C. Bechtler Two and a Half MS62

### The Second Finest Kagin-8

**3957** (1831-1834) C. Bechtler Quarter Eagle, Center Circle MS62 PCGS. K-8, R.7. Throughout the entire Bechtler coinage era, lasting from 1831 until about 1850, the family coined nine varieties of two-and-a-half gold pieces. Based on current rarity ratings published in the March 2017 Kagin's catalog featuring the Dr. Chris Allan Collection, no more than 200 examples survive from all nine mulings. Including all examples from those die pairings, PCGS has certified 102 submissions, including just 25 Mint State pieces and only three finer than the present MS62, each graded MS63. The average grade of all PCGS certified Bechtler two-and-a-half dollar gold pieces is AU53. The present example is far finer than the typical survivor and is the second best of the Kagin-8 die pairing that PCGS has examined. The finest known example realized \$123,375 in the March 2017 offering of the Allan Collection.

This spectacular Bechtler gold piece, from the third striking series, ranks high among those that we, or anyone, has handled. The bold and well-centered impression includes a complete beaded border on both sides. Scattered marks and faint hairlines are inconsequential on this important North Carolina emission. The surfaces are brilliant with satin mint luster and excellent eye appeal. Population: 1 in 62, 1 finer (3/19).

*Ex: The Archangel Collection of Private and Territorial Gold Coins (Stack's, 11/2006), lot 1062.*

### C. Bechtler Two and a Half, Kagin-9, XF40 Third Series, Star in Field over 75 G.

**3958 (1831-1834) C. Bechtler Quarter Eagle, Finely Reeded XF40 PCGS. K-9, R.7.** Christopher Bechtler, and his son, Augustus, were trained in the metallic arts in Germany, and immigrated to the United States in 1829. First settling in Philadelphia, news of gold discoveries in the southeast lured them to Rutherfordton, North Carolina a few months after their arrival in America. It was not long that the pair began making gold coins and earning the trust of the local community. Coinage began in the summer of 1831, and continued for many years, even after the U.S. government established a branch mint at Charlotte. Christopher Bechtler died in 1842, and his son, Augustus, continued the coinage venture until about 1850.

The Bechtler Mint, now a local Historic Park, is located 45 miles southeast of Asheville, and about 75 miles west of Charlotte. Clearly there was no reason for local miners to travel to Charlotte, and the Bechtlers' enjoyed a following from South Carolina and Georgia, as well. The majority of gold pieces struck were one dollar denomination coins and those are the most frequently seen today. Fewer five dollar gold coins were minted, and fewer still of the two-and-a-half dollar pieces.

Edgar Adams knew of just one piece when he published his 1909 Premium List, and he identified that coin as part of the Virgil Brand Collection. When Donald Kagin published his 1981 reference on private and territorial gold coins, he considered the Kagin-9 variety R.8 with just two or three known examples. In 1988, the cataloger for the Norweb Collection itemized five known examples. Kagin's recent (March 2017) catalog of the Dr. Chris Allan Collection revised the rarity rating to R.7. PCGS has certified a VF30, three XF40s, an XF45, and an AU53.

We believe that the present piece is a sixth known example, lacking the star due to wear, and similar in that regard to only the H.O. Granberg coin that was illustrated in the 1914 ANS Exhibition Catalog, and for many years in the *Guide Book*. However, this example does not match those illustrations. Delicate blue patina resides on the light yellow-gold surfaces of this example that exhibits scattered surface marks. Two or three trivial rim marks are noted, and should aid in future pedigree research. This piece is imperfectly centered as the illustration shows. The specialized collector of Bechtler gold coinage, and Donald Kagin mentions four present-day major collectors of the Bechtler series, will want to bid aggressively to add this rarity. Listed but unpriced on page 393 of the 2019 *Guide Book*.

**From The Uptown Collection of Bechtler Territorial Gold. PCGS# 10088**

**(1831-1834) C. Bechtler Five, AU55  
Rare Second-Series Issue, 150 G., 20 C.**

**3959** (1831-1834) C. Bechtler Five Dollar, 150 G. 20 C. AU55 PCGS. K-15, R.7. Important as one of the early five dollar gold pieces from the Bechtler private mint, this K-15 example is rare and in demand. A few pieces (the ultra-rare K-14) were struck before the Bechtler decided the 150 G designation was needed, and it was added to the reverse die just below 20.CARATS. The coins had a beaded border, and most pieces show a narrowly off-center strike.

The coins were struck from North Carolina gold, which had lower fineness than either South Carolina or Georgia gold. The 150-grain weight of each piece was high to offset relatively low 20 carat fineness. This is a lovely, semireflective example with vibrant greenish-gold color and orange-gold overtones. The sharp strike is slightly off-center east. A lens reveals pinpoint marks and microscopic lines, but no significant abrasions. The eye appeal is excellent. Population: 6 in 55, 5 finer (3/19).

*From The Uptown Collection of Bechtler Territorial Gold.* NGC ID# 2B9L, PCGS# 10118

**(1831-1834) Bechtler Five, Rare MS61  
150 G., 20 C., K-15 Variety  
Early Beaded Border Issue**

**3960 (1831-1834) C. Bechtler Five Dollar, Beaded Border, 150 G. 20 C. MS61 PCGS. K-15, R.7.** Struck by Christopher Bechtler in the autumn of 1831, this variety is held in high esteem by collectors of Southern gold as the first half eagle produced by the Rutherford County, North Carolina coiner. Most of these initial strikings were soon melted, as two weight reductions occurred within a span of three years. The K-15 has long been regarded as a rarity and it is estimated that a mere 15 to 20 pieces are known.

The first 150-grain five dollar pieces (Kagin-14 and 15) were struck with a beaded border — a device soon abandoned by Bechtler as he fine-tuned his coinage operation. Off-center strikes were glaringly obvious with the tight-fitting beads at the border. Bechtler experimented with different bead sizes on his early quarter eagles to no avail. By the time K-16 half eagles were issued, a more traditional rim was in place, lacking the beads.

The *Guide Book* indicates only one or two K-14 pieces (without 150 G) are known. No doubt Bechtler quickly realized it was necessary to show the weight of his new half eagles, and he quickly added the missing information to the reverse die. He was a careful and conscientious person, but not overly concerned with aesthetics, thus the missing text was squeezed between curved lines in the legend below CARATS — more or less centered, the 15 larger than 0 in 150 because the smaller digit was a better fit in the space available. A scribe line was left visible on the finished die.

This is a lovely, mildly reflective representative with full border beads that are only slightly askew on the obverse. Both sides show medium, natural green-gold color, with a subtle reddish blush across the center of the obverse. Surface marks are somewhat numerous, but generally light and nondistracting, and they fail to diminish the coin's prooflike qualities. Several tiny planchet cracks are noticed at the borders.

Often years pass without an opportunity to offer a Bechtler K-15 in any grade. We note five Mint State pieces that have been certified by both services combined, although some crossover duplication may exist. PCGS population: 1 in 61, 2 finer (3/19). Listed on page 393 of the 2019 *Guide Book*.

**From The Uptown Collection of Bechtler Territorial Gold.** NGC ID# 2B9L, PCGS# 10118

**(1834-1837) Bechtler Five Dollar, AU50 K-17, Plain Edge, 'RUTHERFORD.'**

**3961** (1834-1837) C. Bechtler Five Dollar, RUTHERFORD, Plain Edge, 140 G., 20 C., AU50 PCGS. K-17, R.5. A scarce Territorial gold piece (as are all of the Bechtler issues), the Kagin-17 variety is by far the most frequently seen die marriage among the other 140 G, 20 C Bechtler five dollar gold pieces. All Kagin Fourth Series varieties have a plain edge, except the rare K-16 variety, which has a reeded edge and no period after "RUTHERFORD"; almost equally rare, the K-18 shows RUTHERF: in its abbreviated format. The K-19 die pair is notably scarce, with 20 distant from CARATS and regular A's in CAROLINA.

This K-17 example was struck from misaligned dies. The upper right portion of the obverse and the lower right area on the reverse are weakly impressed, while the remainder of the coin is strong. Rich russet and orange accents surround the raised areas of this attractive, original green-gold Bechtler five dollar gold coin. Traces of luster remain among the devices, and the reverse is rotated 45° clockwise in relation to the obverse. Natural eye appeal abounds. Listed on page 394 of the 2019 *Guide Book*. Population: 11 in 50, 31 finer (3/19).

**From The Uptown Collection of Bechtler Territorial Gold.** NGC ID# 2B9P, PCGS# 10091

**(1834-1837) Bechtler Half Eagle, MS61 140 G. 20 C., RUTHERFORD, K-17**

**3962** (1834-1837) C. Bechtler Five Dollar, RUTHERFORD, Plain Edge, 140 G., 20C., MS61 PCGS. K-17, R.5. Prior to the private mint of Christopher Bechtler, the Southern Appalachian district where gold mines were located was populated by subsistence farmers and Cherokee Indians, and there were no large towns in the area. The economy was mostly based on a barter system, with almost no specie or paper money to facilitate economic transactions. The Bechtler assay services and private mint were of great importance to the region.

Although rudimentary in design, the Bechtler family's coinage was well-received by local commerce. Indeed, it often circulated far afield from its Piedmont origins. Bechtler changed the design of his coins frequently, responding to suggestions made by his depositors, as well as changes in weight standard adopted by the U.S. Mint. In all, he issued seven different series of five dollar gold coins, with many different die varieties.

This K-17 five dollar gold piece is a coin with distinctive visual appeal. Both sides are primarily pale, yellow-gold color and flashy semireflective surfaces. The left reverse shows some light adjustment marks and slight weakness in the peripheral zone at CAROLINA. The obverse displays brief coppery accents of orange and crimson through the margins, which carry over to a lesser extent on the interiors. Listed on page 394 of the 2019 *Guide Book*. Population: 3 in 61, 2 finer (3/19).

**From The Uptown Collection of Bechtler Territorial Gold.** NGC ID# 2B9P, PCGS# 10091

**(1834-1837) Bechtler Five Dollar, MS61+  
RUTHERFORD, 140 G., 20 C.**

**3963** (1834-1837) C. Bechtler Five Dollar, RUTHERFORD, Kagin-17, Plain Edge, R.5, MS61+ NGC. While Federal law prohibited individual states from engaging in coining operations, the government allowed the Bechtler family of private coiners to operate for more than two decades. The United States Treasury was well aware of the Bechtler operations, but did not act against them because the coins exceeded Federal weight and fineness. The Piedmont miners were also beneficiaries, since transporting bullion to the Philadelphia Mint was problematic. The situation was less concerning with the establishment of the Charlotte branch mint, which limited Bechtler's services.

Still, Bechtler coins circulated beyond the 1850s, with Christopher Bechtler's descendants still minting coins as late as 1855. This prooflike five dollar gold piece is an early Bechtler issue from the "fourth series," dated 1834. Bright, greenish-gold surfaces show a few file marks along the reverse margin and a corresponding weak edge on the obverse. The smooth, lightly hairlined surfaces retain considerable luster and overall sharpness. Scarce in Mint State, this is the sole Plus-graded coin at NGC at the MS61 level. Listed on page 394 of the 2019 *Guide Book*. Census: 7 in 61 (1 in 61+), 3 finer (3/19).

**From The Uptown Collection of Bechtler Territorial Gold.** NGC ID# 2B9P, PCGS# 10091

**(1834-1837) Bechtler Five Dollar, MS63  
Rutherford, Plain Edge, K-17  
Single Finest Certified**

**3964** (1834-1837) C. Bechtler Five Dollar, RUTHERFORD, Plain Edge, 140 G., 20C., MS63 NGC. K-17, R.5. Large scale mining of gold began in Georgia and North Carolina around 1828 and, prior to 1849, the region produced most of the gold found in the United States. The miners faced many challenges in converting their raw gold into a useful form of exchange. Shipping gold ore to the U.S. Mint in Philadelphia was a daunting prospect, both difficult and dangerous.

To provide the region with a standard medium of exchange, Christopher Bechtler, a German-born metallurgist, gunsmith, and jeweler, established a private mint in Rutherford County, North Carolina in 1831. Bechtler was scrupulously honest and a competent assayer, die engraver, and coiner. His family's coins were widely accepted in the South as late as the Civil War.

All of the fourth series Bechtler five dollar gold pieces, K-16 through K-19, were produced with the date AUGUST 1, 1834 in a small circle inside the legend CAROLINA GOLD / CARATS., which rings the rims. The weight 140 / G. / 20. is in the center. On the K-17 variety, the reverse reads C. BECHTLER. AT RUTHERFORD.★, and the edge is plain.

This example is the finest K-17 at either of the leading grading services. Both obverse and reverse feature well-struck design elements and the pleasing yellow-gold surfaces show only minor signs of contact. Ample mint luster and a few highlights of green color add to the outstanding eye appeal. Listed on page 394 of the 2019 *Guide Book*. Census: 1 in 63, 0 finer (3/19).

*Ex: San Francisco Signature (Heritage, 3/2014), lot 10761.*

**From The Uptown Collection of Bechtler Territorial Gold.** NGC ID# 2B9P, PCGS# 10091

**(1834-1837) Bechtler Five, AU58**  
**Scarce K-19, RUTHERF., 20 Distant**

**3965** (1834-1837) C. Bechtler Five Dollar, 140 G., 20 Distant, RUTHERF., AU58 NGC. K-19, Low R.6. This North Carolina gold variety has the 20 placed distant from CARATS, which distinguishes it from the less-rare Kagin-17. Equally important, RUTHERFORD is spelled out on K-17, but it is abbreviated as 'RUTHERF.' on K-19. The A's in CAROLINA are regular letters (no longer upside-down V's), although the A's are filled at their tops.

Semiprooflike luster accompanies the legends, and the natural, green-gold surfaces display glimpses of russet patina near the RO in CAROLINA. Struck with the reverse rotated 45° clockwise in relation to the obverse, the obverse border between 4 and 7 o'clock is weak, as is the reverse margin and rim above C. BECHTLER. There are no consequential abrasions on this attractive and scarce, near-Mint State K-19. Listed on page 394 of the 2019 *Guide Book*. Census: 7 in 58 (1 in 58+), 1 finer (3/19).

**From The Uptown Collection of Bechtler Territorial Gold.** NGC ID# 2B9S, PCGS# 10115

**A. Bechtler Half Eagle, AU58**  
**Scarce, Late Issue 134G. 21C., K-27**

**3966** (1842-1852) A. Bechtler Five Dollar, 134 G. 21 C., AU55 NGC. K-27, Low R.5. Christopher Bechtler's son, Augustus, inherited the Bechtler business when the senior Bechtler died. Augustus Bechtler was a gunsmith and jeweler, and did his best to expand the coinage operations, which were impacted by the U.S. branch mint at Charlotte, just 80 miles away. Bechtler gold pieces were still well-known and respected in the region, and passed the scrutiny of federal Mint officials, who found the coinage to correct in weight and fineness.

This sharply struck K-27 A. BECHTLER five has pale-orange accents among the legends, with smooth and attractive brassy-gold surfaces. A later A. Bechtler issue, it lacks the obverse star seen on the final C. BECHTLER fives, and RUTHERFORD is spelled out (with period) on the reverse. High rims with tooth like dentils surround lightly abraded surfaces with only tiny marks visible under a loupe. Census: 7 in 55, 14 finer (3/19). Listed on page 394 of the 2019 *Guide Book*

**From The Uptown Collection of Bechtler Territorial Gold.** NGC ID# 2B9Y, PCGS# 10046

**August Bechtler Five Dollar  
MS60, Second-Finest at NGC  
K-27, 134 G., 21 C.**

**3967** (1842-1852) A. Bechtler Five Dollar, 134 G. 21 C., MS60 NGC. K-27, Low R.5. The reverse is rotated ninety degrees from the obverse, as usual. Die breaks extend through LIN in CAROLINA. This straw-gold five dollar piece displays unusually crisp striking detail on all of the design elements. Prooflike luster dominates the legends. Mentionable marks are confined to a slight rim knock above the I in CAROLINA and a hair-thin line above the large 5. This is the second finest-known example at NGC, and one of only two certified in Mint State at either of the major services (3/19). Listed on page 394 of the 2019 *Guide Book*.

Ex: Central States Signature (Heritage, 4-5/2009), lot 2792, which realized \$18,400.

From The Uptown Collection of Bechtler Territorial Gold. NGC ID# 2B9Y, PCGS# 10046

**A. Bechtler Five Dollar, Choice AU  
Rare K-28, 128 G., 22 C.**

**3968** (1837-1842) A. Bechtler Five Dollar, 128 G. 22 C. AU55 PCGS. K-28, R.6. Although four die marriages are known for 128 G. Bechtler fives, three were struck by Christopher, and only one by his son August. The latter variety is virtually unobtainable in Mint State, with only a single MS61 PCGS example certified as such by either leading service. The present briefly circulated piece displays olive-green luster throughout the legends. The open fields are honey-gold. A narrow cluster of marks southeast of the large 5 provides the sole consequential contact. Listed on page 395 of the 2019 *Guide Book*. Population: 1 in 55, 1 finer (3/19).

From The Uptown Collection of Bechtler Territorial Gold. NGC ID# 2B9Z, PCGS# 10043

## 1851 Humbert Lettered Edge Fifty Dollar MS61

### Rare 880 Thous. K-2 Variety Splendid Mint State Example

**3969** 1851 Humbert Fifty Dollar, Lettered Edge, 880 Thous. MS61 NGC. Kagin-2, Without '50' On Reverse, R.5. First Type, 50 D\_C below eagle, no 50 on reverse. Before 1846, California was considered a remote area — sparsely populated, with a few ranches and areas of subsistence farming, but largely ignored economically by the rest of the country. Barter was an important means of exchange, and foreign coinage provided the only significant source of “hard money.” Gold and silver coins from Mexico and Peru were favored.

War with Mexico brought volunteer soldiers to California from Utah and other points East, and the discovery of gold in 1848 soon launched a flood of adventurers and pioneers from throughout the world to Northern California. Soon gold dust became the means of exchange — but officially, it was not accepted for duties, taxes, sale of public lands, debts, or any sums due to the United States.

While the State Assay Office of California and numerous private coiners provided a patchwork, partial solution to some of the financial infrastructure needed to support a burgeoning California population and economy, it was not until 1850 that the Federal government took action. A compromise bill providing for the United States Assay Office in San Francisco passed Congress after vigorous infighting. New York watchmaker Augustus Humbert was appointed United States Assayer. He arrived in San Francisco on January 30, 1851, and the first coins of his office were produced the very next day. Production of octagonal \$50 gold ingots began on February 14.

This Mint State octagonal fifty is one of the few early ingots dated 1851 — with lettered edge — to survive that frantic period of Gold Rush history. The dies brought by Humbert to his new position as Assayer featured an eagle standing upon a rock within a beaded circle with UNITED STATES OF AMERICA around, within a wide octagonal border; the reverse was an elaborate engine-turned design, with a small target in the center. Individual line punches were required to finish the struck ingots, imprinting AUGUSTUS / HUMBERT / UNITED / STATES / ASSAYER / OF GOLD / CALIFORNIA / 1851 on the eight-panel edge of the ingot. Numeral punches included 880 for the fineness (the numbers imprinted individually on the scroll before THOUS), and 50 for the denomination, imprinted below the eagle.

Bright, greenish-gold color blankets the lustrous surfaces of this MS61 example. There are remarkably few marks or signs of contact for such a big, heavy coin. The corners and edges are sharp and without damage, and only a few tiny ticks are seen on the engine-turned reverse. As always, the eagle is a bit soft above the shield from a lack of adequate striking pressure. The eye appeal is exceptional.

Only a few dozen of these lettered-edge pieces survive in Uncirculated, unimpaired condition. Most saw an immediate entrance into the West Coast economy, or were later melted for bullion in 1854 by the San Francisco Mint. Listed on page 397 of the 2019 *Guide Book*. NGC ID# ANH3, PCGS# 10196

### 1851 Humbert Fifty Dollar 'Ingot,' XF40 880 Thous., No '50,' K-5 Variety

**3970** 1851 Humbert Fifty Dollar, Reeded Edge, 880 Thous. XF40 NGC. K-5, R.5. No 50 on Reverse. The United States Assay Office was authorized as a compromise measure that was created to produce necessity coinage. Many in California wanted an actual mint. Others were profiting handsomely by the use of gold dust. Gold dealers would purchase gold in nugget or dust form at \$6 to \$8 per ounce, refine it, and resell it at \$16 to \$18 per ounce. California was not even a state when the USAOG was established on September 30, 1850. The act authorized the issuance of gold "ingots," such as this piece. These "ingots," better known as "slugs," established a uniform value, although in large-size coinage, that would eliminate much of the gross undervaluing of gold nuggets and dust. This example obviously saw use in the channels of commerce as seen by the uniform wear over the high points of the design. A few minor rim bumps are noted but the corners are intact, unlike many examples. The green-gold color has taken on a distinct reddish hue around the devices. An excellent representative of this highly collectible memento of the California Gold Rush. Listed on page 397 of the 2019 *Guide Book*. NGC ID# ANH8, PCGS# 10211

### 1852 Assay Office Ten Dollar, MS63 K-12a, Well-Preserved Lustrous Surfaces

**3971** 1852 Assay Office Ten Dollar MS63 PCGS. K-12a, R.4. CAC. The widely respected assay and coinage firm of Moffat & Co. was dissolved on February 14, 1852, after the retirement of John Little Moffat. The company immediately reorganized and operations continued under the name of the United States Assay Office of Gold, with Joseph R. Curtis, Philo H. Perry, and Samuel H. Ward as managing partners and the government coinage contract still in effect.

The K-12a ten dollar gold pieces show the O in OFFICE placed under the N of UNITED. The present coin represents the late die state K-12a (2), with weak dentilation on much of the reverse border. This attractive MS63 specimen is sharply detailed in most areas and the design elements show no evidence of wear. The orange-gold surfaces are lightly marked and retain much original mint luster. Listed on page 399 of the 2019 *Guide Book*. Population: 5 in 63, 1 finer. CAC: 3 in 63, 0 finer (3/19). NGC ID# ANG, PCGS# 10001

## 1855 Wass, Molitor Fifty Distinctive Round Territorial Issue

**3972** 1855 Wass Molitor Fifty Dollar — Repaired — PCGS **Genuine**. For unspecified reasons, PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been repaired. The design elements exhibit just a trace of wear and the apricot-gold surfaces are lightly abraded for a large gold coin that spent some time in circulation. Some smoothing is evident in the field near the nose. Despite the noted damage, this coin remains an impressive relic of an important era in American history.

Wass, Molitor & Co. was primarily an assay office, but they established an enviable reputation for honesty and were called upon by California merchants and bankers to issue private coinage on an emergency basis on several occasions. The distinctive round fifty dollar coins were issued only in 1855, at a time when the U.S. Assay Office of Gold was no longer in operation and the newly established San Francisco Mint was unable to meet the coinage needs of the region, due to a shortage of parting acids. The large denomination coins were very important in settling large transactions, as paper money was not authorized in the California economy. Listed on page 406 of the 2019 *Guide Book*.

## 1854 Kellogg & Co. Twenty, AU58 Short Arrows Reverse, K-1a Nearly Full Mint State

**3973** 1854 Kellogg & Co. AU58 NGC. **K-1a, R.4**. The United States Assay Office of Gold ceased coinage operations at the end of 1853, making way for the opening of the San Francisco Mint in 1854. The new branch mint was unable to start coining immediately, with needed improvements to the facility taking precedence. As usual, the West Coast was in dire need of gold coinage, so the private firm of Kellogg & Company filled the void by striking twenty dollar gold pieces in February, 1854.

The coinage was readily accepted in commerce, since both John G. Kellogg and G.F. Richter were former employees of the U.S. Assay Office. This Kagin-1a example is very nearly full Mint State, with minimally marked surfaces and little evidence of wear. Much luster remains over attractive, sun-gold surfaces that show a faint overlay of olive patina. The strike is first-rate for a Territorial gold piece. Listed on page 407 of the 2019 *Guide Book*. NGC ID# ANHY, PCGS# 10222

## S.S. CENTRAL AMERICA GOLD INGOTS

### Blake & Co. Gold Ingot. 19.15 Ounces

Ex: S.S. Central America

**3974 Blake & Co. Gold Ingot. 19.15 Ounces.** CABG-010. Gorham Blake was born in Boston in 1829. His partner, Johan A. Agrell, arrived in New York from Sweden on October 1, 1849. Gorham Blake and his cousin Frank W. Blake arrived in San Francisco on May 22, 1852. Blake and Agrell's assay office in Sacramento was established in 1855 but the partnership lasted less than two months. The successor company, also in Sacramento, was closer to the gold fields than was San Francisco (where most assayers were located), and assayers in that city enjoyed a brisk trade. Blake & Co. apparently only had one local competitor, Harris, Marchand & Co. Both firms were located on J Street. During 1856, Blake & Co. assayed 200,000 ounces of gold. The fineness of the ore they assayed varied considerably, according to the mine's location. The highest fineness was from Michigan Bluff at \$20.15 per ounce, the lowest was gold from Carson Valley that came in at only \$12.13 per ounce. The gold in this particular ingot is among the higher-grade ores mined in the region, valued at \$18.43 per ounce. Confirmation of the high-grade ore can also be seen by the fineness stamped on the bar, 892 Fine.

The surfaces show the usual care given to Blake ingots. The surfaces are all polished or finished to a nearly mirrorlike brightness. The edges are also beveled. These two touches in the production of these bars suggest they may have ultimately been intended as a circulating medium of exchange. This small, almost square ingot is 42 x 52 x 13 mm, confirming it was poured from Mold B-02. Only five fixed-sized molds were used for Blake ingots, in addition to the adjustable length "Twix Mold." Mold B-02 is the smallest of the fixed-size molds. The top face reads: BLAKE & Co / ASSAYERS / SACRAMENTO / 892 FINE / VALUE / \$353.11. This is bar number 5195, as stamped on the top side. The weight, 19.15 Oz, is stamped on the bottom side. Considerable ocean verdigris is on the back side, and that is also an area of considerable interest. The grayish-white incrustation, when closely examined with a loupe appears to have granules of raw gold ore that adhered to that side during its 132 years on the ocean floor.

Ex: Lineage Collection / Charlotte National Money Show Auction (Heritage, 3/2003), lot 6537, where it brought \$103,500.

**From The Marcello Collection, Part VI.** NGC ID# 2TGY, PCGS# 661900

## Kellogg & Humbert Gold Ingot Medium to Large Size, 48.74 Ounces Ex: *S.S. Central America*

**3975 Kellogg & Humbert Gold Ingot. 48.74 Ounces.** CABG-503. Most passengers aboard the *S.S. Central America* were making the long journey back from California to the East coast. Many were hardscrabble forty-niners who had spent years toiling in the gold fields around San Francisco and Sacramento. A few were returning penniless, having never made any money or having lost what they had made, but many were transporting vast amounts of gold dust, coins, and ingots. This was not limited to the men traveling on the ship. According to Gary Kinder:

“Many of the women traveled with a great deal of money they had not registered with the purser. All of them were now advised not to carry more than two twenty dollar gold pieces with them. Two women retrieved a satchel from their stateroom and upon returning to the cabin, opened the satchel, and weeping, shook eleven thousand dollars in gold onto the floor. Through the tears, they said that anyone who wanted the money could take what they please. ‘That money is all we made in California,’ they added. ‘We were returning home to enjoy it.’ ”

The circumstances are almost impossible to fathom. On the night of September 12, 1857, the precious yellow metal for which so many had sacrificed so much became essentially worthless, a burden that served no purpose other than to hasten their demise. As Kinder explains in *Ship of Gold in the Deep Blue Sea*:

“A red house brick weighed about four pounds; a gold brick of the same size weighed nearly fifty. Even in smaller amounts, gold could sink a weak swimmer or quickly exhaust a strong one. Yet some of the men had suffered great hardship since the summer of 1849 to accumulate the contents of that treasure belt or that carpetbag.”

Thousands upon thousands of coins, hundreds of ingots and immeasurable quantities of gold dust were lost in the sinking of the *S.S. Central America*. Hundreds of victims also perished. The souvenirs and relics brought to the surface during the late 1980s and again in 2014 are highly sought-after reminders of both the vast amounts of wealth generated by the California Gold Rush, as well as the difficulties that settlers, miners, and seafarers endured in their pursuit of riches.

The private assayers who had gold ingots aboard the *Central America* numbered only five firms, and of those five Kellogg & Humbert was by far the largest and best known. It was also the firm with the largest number of ingots in the ship's hold with 532 ingots recovered from 1988-1991. That this ingot is regarded as “medium to large size” tells us a great deal about the relative size and value of all the Kellogg & Humbert ingots aboard the *S.S. Central America*. The ingot is vertically laid out: No 643 / K&H hallmark / 48.74 Oz / 809 FINE / \$815.10. The back side repeats the serial number, but in a different font. The ingot measures: 43 x 95 x 21 mm.

## PATTERNS

### 1836 Gobrecht-Designed Gold Dollar Judd-67, PR65

**3976** 1836 Gold Dollar, Judd-67, Pollock-70, R.5, PR65 PCGS. CAC. The obverse features a Liberty cap surrounded by numerous glory rays, similar in design to certain contemporary Mexican issues. The reverse features the denomination "1 D." within a coiled palm frond, with the date below and UNITED STATES OF AMERICA above. Christian Gobrecht is credited with both designs. Struck in gold alloy with a plain edge. Judd-67 has considerable historical importance, as it is the first Federal gold pattern as well as the first gold dollar issue. Originals are likely quite rare, although a number were restruck in the 1860s, one of which was struck over an 1859 gold dollar. This bright yellow-gold Gem has a needle-sharp strike and highly reflective fields, while the reverse has bold mint-made striations.

*Ex: November Signature (Heritage, 11/2003), lot 11001; Long Beach Signature (Heritage, 6/2004), lot 6413; ANA Signature (Heritage, 8/2016), lot 4421, where it sold for \$19,975. NGC ID# 26VC, PCGS# 11260*

### 1836 Gold Dollar Pattern, PR65 Cameo Struck in Silver, Judd-69, Pollock-72

**3977** 1836 Gold Dollar, Judd-69, Pollock-72, High R.7, PR65 Cameo PCGS. The obverse features a Liberty cap appropriately inscribed and surrounded by a glory of rays, the same motif used for the 1836 Mint medal celebrating the advent of steam coinage. It is also very similar to the design seen on certain contemporary Mexican coins. The reverse features a large 1 D. in two lines, surrounded by a palm frond, with UNITED STATES OF AMERICA and the date 1836 around the rim. Struck in silver with a plain edge. Only a half-dozen or so are known in silver, and the striking date is uncertain but likely not in 1836. This is a deeply mirrored example that also has thickly contrasting frosted devices that creates the cameo effect on each side, this in spite of the variegated rose and blue toning that enhances the well-preserved surfaces. Population: 1 in 65 Cameo, 0 finer (3/19). PCGS# 392462 Base PCGS# 11264

**1852 Annular Gold Dollar**  
Judd-145, Thin Planchet, PR66

**3978** 1852 Gold Dollar, Judd-145 Thin, Pollock-173, Low R.6, PR66 PCGS. Simply designed with UNITED STATES OF AMERICA around the outer portion of the obverse with the date around the bottom. The reverse has DOLLAR at the top with a wreath around the lower margin. Struck in gold, perforated in the center, with a plain edge. Bright yellow-gold color. This pattern design was an attempt to increase the diameter of the gold dollar denomination, which at 13 mm was easily lost and even smaller than the 14 mm three cent silver. The gold dollar denomination was necessary to commerce in 1852, since silver coins were widely hoarded as their bullion value exceeded their face value.

On the present splendid specimen, the only flaw we see is the planchet defect above the second S in STATES. Dashes of subtle gray toning on the lower obverse are of little consequence. A lovely example of this rare and popular gold pattern. NGC ID# 299B, PCGS# 11604

**1858 Flying Eagle Cent Pattern, PR64**  
Judd-199, Pollock-230

**3979** 1858 Flying Eagle Cent, Judd-199, Pollock-230, High R.7, PR64 NGC. CAC. This extremely rare pattern features the standard Flying Eagle, Large Letters obverse design, combined with a reverse that showcases a large ornamental shield and oak wreath. Struck on a broad copper-nickel planchet, with a plain edge. USPatterns.com estimates the surviving population at half a dozen examples in all grades.

This impressive Choice proof representative exhibits sharply detailed design elements throughout. The well-preserved surfaces show a mix of original copper-red and crimson patina, with a few microscopic specks of carbon on both sides. Overall eye appeal is outstanding. Census: 1 in 64, 0 finer. CAC: 1 in 64, 0 finer (3/19). NGC ID# 2WJ2, PCGS# 11858

**1868 Judd-655 Three Dollar, PR64  
Rare Aluminum Strike  
From the Pittman Collection**

**3980** 1868 Three Dollar, Judd-655, Pollock-728, Low R.7, PR64 NGC. Ex: Pittman. The regular dies for the Indian Princess three dollar gold design struck in aluminum with a reeded edge. Perhaps as many as 10 examples of this aluminum pattern exist, and they were struck either to demonstrate the use of aluminum in coinage, or as specialty pieces for sale to contemporary collectors. Saul Teichman comments at USPatterns.com:

“Although these are described as regular die trial pieces in the standard references, the off-metal ‘trials’ of this year were struck as part of cased sets to show off aluminum as a coinage metal. At least 3 of these sets are still intact. It is also possible that some of these set were deliberately made for sale to collectors.”

This Choice proof has brilliant light gray surfaces, exhibiting fully mirrored fields that frame the lustrous devices, creating light cameo contrast. Trivial hairlines and contact marks prevent a higher grade. Census: 2 in 64, 3 finer (3/19).

Ex: ANA Sale (Abe Kosoff, 8/1958), lot 1608; John Jay Pittman (David Akers, 10/1997), lot 792.

**From The Chinook Collection.** NGC ID# 29P8, PCGS# 60873

**1869 Three Dollar in Copper  
Judd-772, PR64 Red and Brown  
Only 3-4 Pieces Believed Known**

**3981** 1869 Three Dollar, Judd-772, Pollock-857, R.7, PR64 Red and Brown PCGS. The obverse and reverse dies are the ones used to strike regular-issue three dollar gold pieces in 1869. Struck in aluminum with a reeded edge. The Judd and Pollock references call this issue a die trial, but USPatterns.com states they were struck for sale to favored collectors. These coins were apparently offered in sets, like the one in lot 235 of the Woodside Collection of Patterns (New York Coin & Stamp, 4/1892):

“1869 Complete set 1C. to \$20: like the regular issues but in aluminum: only five sets struck: proofs; 16 pcs.”

It may be that a few examples were sold as individual pieces, in addition to the sets. USPatterns.com estimates three or four specimens are extant in copper. The design was also struck in aluminum (Judd-773) and nickel (Judd-774). One factor contributing to the extraordinary rarity of the copper strikes is that this piece (the finest Red and Brown certified) has been off the market for 41 years. The surfaces are even red, just slightly mellowed from full Red status.

Ex: Public Auction (Stack's, 8/24-28/1976), lot 3659.

**From The Chinook Collection.** PCGS# 71003

## 1869 Judd-773 Three Dollar Pattern Aluminum, PR65 Ultra Cameo

**3982** 1869 Three Dollar, Judd-773, Pollock-858, High R.7, PR65 Ultra Cameo NGC. Struck from the regular Indian Princess three dollar dies in aluminum with a reeded edge. The 1869-dated patterns of the three dollar gold design are rare. According to USPatterns.com, there are three or four known in copper (Judd-772), about six known in aluminum as offered here, and probably just one known in nickel (Judd-774). NGC has certified six of these, including two in PR64, one in PR65+ Cameo, two in PR65 Ultra Cameo, and one in PR64 Gilt (3/19). This lovely Gem exhibits deeply mirrored light gray surfaces that show frosted, lustrous devices and excellent field-to-device contrast.

*From The Chinook Collection.* PCGS# 61004

## 1869 Double Eagle in Aluminum Judd-785, PR64

**3983** 1869 Twenty Dollar, Judd-785, Pollock-870, High R.7, PR64 PCGS. CAC. Regular die trials issue struck in aluminum with a reeded edge. While traditionally termed a die trials striking, it is safe to say there was no actual thought given to producing double eagles in 1869 struck in aluminum, making these pieces deliberately struck by the Mint for collectors. Nevertheless, these strikes are extremely rare. Off-metal pieces were also struck in copper (half a dozen estimated extant) and nickel (believed unique). Like the copper strikes, only half a dozen aluminum pieces are believed known. With the infrequency the aluminum strikes are offered, there may be even fewer than six known. As with most aluminum patterns, there is significant field-device contrast visible, although it is undesignated on this piece because of the age of the holder. A few tiny contact marks can be found, but the most important identifier is a planchet flaw on the obverse rim near 4 o'clock. Exceptional rarity and quality are combined in this one pattern.

*Ex: Long Beach Signature (Heritage, 6/1998), lot 6624.*

*From The Chinook Collection.* PCGS# 61017

### 1872 Five Dollar in Aluminum Judd-1244, PR66 Cameo

**3984** 1872 Five Dollar, Judd-1244, Pollock-1386, High R.7, PR66 Cameo PCGS. Regular dies trial for the Liberty Head half eagle. Struck in aluminum with a reeded edge. This is an extremely rare off-metal strike with only three or four examples known today. An equal number were produced in copper and they are equally rare. Numismatic tradition suggests that these pieces were dies trial struck to test the dies before striking proof examples in gold, although it is more likely that they were deliberately made for sale to collectors of the time. Whatever their original purpose may have been, these strikings are extremely rare and highly desirable today. This example displays profound field-device mirroring on each side. The planchet shows minute granularity, and there are three streaks that were incompletely polished away, located on the right side of the reverse. PCGS# 522742

### 1875 Three Dollar Struck in Gilt Copper Judd-1436 Gilt, PR64

**3985** 1875 Three Dollar, Judd-1436, Pollock-1579, R.7, PR64 Gilt NGC. CAC. A regular dies trial piece for the three dollar gold piece. Struck in copper and gilt with a reeded edge. Saul Teichman notes that: "The die trials of this date often have been gilded due to the extreme rarity of its gold counterpart." He goes on to explain, "Although these are described as regular die trials pieces in the standard references, it is more likely that the off-metal 'trials' of this year were deliberately struck for sale to collectors as part of complete off-metal sets." Only four or five copper pieces were struck, with an unknown number (undoubtedly small) that were gilt. This date is also known in aluminum. This piece retains much of the underlying brightness of the copper base, rendering the surfaces bright and closely resembling a gold coin. The gilt has only chipped away slightly in one place, just above the M in AMERICA.

**From The Chinook Collection.** NGC ID# 5D9B, PCGS# 71743

**1876 'Sailor Head' Trade Dollar in Copper**  
**Judd-1460, PR62 Brown**  
**Ex: Newcomer, Boyd, Farouk, Hydeman**

**3986** 1876 Sailor Head Dollar, Judd-1460, Pollock-1610, High R.7, PR62 Brown NGC. Ex: Farouk. The Sailor Head design is seen in a plain field with IN GOD WE TRUST and the date both below the bust. LIBERTY appears on a coronet in Liberty's hair. The reverse has ONE DOLLAR within a wreath with UNITED STATES OF AMERICA at the top border and E PLURIBUS UNUM at the bottom border. Struck in copper with a reeded edge. Only eight separate examples have been confirmed of this design in copper. The bright fields bring out significant deep green, pale red, and deeper brown colors. The obverse shows a few smaller specks of carbon.

Ex: Newcomer; Boyd; Farouk; Hydeman Collection (A. Kosoff, 3/1961), lot 957, where it brought \$260; Public Auction Sale (Merkin, 9/1968), lot 464, where it realized \$410; ANA Signature (Heritage, 8/1999), lot 7775, where it brought \$7,775; Sale of the Millennium (Bowers and Merena, 8/2000), lot 4086, where it realized \$6,440. PCGS# 61781

**1877 Quarter Pattern in Copper**  
**Judd-1500, PR65 Red**  
**Barber's Famous 'Sailor Head'**

**3987** 1877 Sailor Head Quarter Dollar, Judd-1500, Pollock-1653, R.7, PR65 Red NGC. The obverse features William Barber's "Sailor Head" of Liberty facing left, wearing a coronet inscribed LIBERTY with a pearl border and hair tied back with a ribbon. IN GOD WE TRUST above, date 1877 below, stars arranged 7x6 on the sides. The reverse dies were the adopted design for regular-issue quarters in 1877. Struck in copper, with a reeded edge. William Barber's celebrated "Sailor Head" first appeared on pattern twenty cent pieces in 1875 and was so well-thought-of that it was featured on several other patterns, including eagles and half eagles in 1875, dollars in 1876, and dimes, quarters, and half dollars in 1877. Walter Breen observed that the profile of Liberty on Judd-1500 closely resembles the portrait on Queen Victoria's "Young Head" coinage.

The original orange-red surfaces of this delightful Gem show a few areas of light brown patina and are brightly reflective throughout. The design elements are well-detailed, with just a touch of softness on the letters of LIBERTY. A minor planchet lamination, as struck, can be seen on the lower-left obverse. This rare pattern possesses incredible eye appeal to complement its tied-for-finest-known technical grade.

Ex: Eric P. Newman Collection (Heritage, 4/2013), lot 4010. NGC ID# 2VRA, PCGS# 81835

### 1878 William Barber Five Dollar, PR62 Gilt Judd-1574, An Anti-Counterfeiting Issue

**3988** 1878 Five Dollar, Judd-1574, Pollock-1766, High R.6, PR62 Gilt NGC. The William Barber Flowing Hair motif graces the obverse. Liberty faces left, wearing a headband eponymously inscribed. E PLURIBUS UNUM is above, the date 1878 below. The reverse offers an eagle with lowered wings in the center, with UNITED STATES OF AMERICA and E PLURIBUS UNUM around. The arrows are long and slender, their tips extending behind and past the eagle's wing, and the olive branch has six leaves. Struck in a larger diameter than regular half eagle issues, in copper, gilt, with a reeded edge.

The series of 1878 half eagles, Judd-1568A through 1574A, were struck on larger-diameter, thinner planchets as anti-counterfeiting measures, in an effort to combat the plague of malefactors scooping out the center of a gold coin and replacing it with less-expensive metal (in the 1870s one of the less-expensive metals was platinum!).

This is a lightly hairlined example. The gilt surface does little to impede the bright flash of the proof mirrors. The strike is generally strong, but it is clear that die opposition had not been thoroughly thought through with this design as there is slight high-point softness noted on each side.

**From The Chinook Collection.** NGC ID# 2AFX, PCGS# 61937

## INGOT

**1963 San Francisco Assay Office Gold Ingot  
11.79 Ounces**

**3989** 1963 San Francisco Assay Office Gold Ingot. 11.79 Ounces. This is the companion piece to the SFAO gold ingot we sold in the FUN Auction. Obviously both are from the same original source, as they have successive ingot numbers, 2922 and 2923. They are also similar in weight and both dated 1963. As we pointed out in the FUN Auction, this ingot was produced after the San Francisco Mint was de-activated after 1955. However, it continued to function as an Assay Office and, curiously, both Mint as well as Assay Office hallmarks are known. The top side is neatly laid out: 1963 Assay Office round hallmark / 2923 / 999.9 FINE. The lot number, 35, is on the lower short side, and predictably is from the same lot as the ingot from the FUN Auction. The back side has the weight: 11.79 / OZs, with a grease pen reproduction at the top of that side, but lacking the decimal, thus: 1179. Attractive and bright on the top side with the back side a bit more subdued. The ingot measures: 33 x 55 x 8 mm.

*End of Session Two*

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., Heritage Auctions, Inc., Heritage Collectibles, Inc., Heritage Luxury Property Auctions, Inc., Heritage Numismatic Auctions, Inc., Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the “Auctioneer”). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
  - For Domain Names & Intellectual Property Auction lots the Buyer's Premium is Fifteen percent (15%) subject to a minimum of \$19 per lot;
  - For Animation Art, Comic, Currency, Movie Posters, Sports Collectibles, US Coin, and World & Ancient Coin Auction lots the Buyer's Premium is Twenty percent (20%) subject to a minimum of \$19 per lot, except for Sports Collectibles lots which are subject to a minimum of \$14 per lot;
  - For Wine Auction lots the Buyer's Premium is Twenty-three percent (23%) subject to a minimum of \$19 per lot;
  - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$300,000 subject to a minimum of \$49 per lot, plus twenty percent (20%) of any amount between \$300,000 and \$3,000,000, plus twelve point five percent (12.5%) of any amount over \$3,000,000.

## Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Jewelry, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction (“Bidder(s”).
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

## Bidding Options:

8. Bids in Signature® Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled “Choose your bidding method.” For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, email, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: “How can I lose by less than an increment?” on our website. Bids will be accepted in whole dollar amounts only. No “buy” or “unlimited” bids will be accepted.

The following chart governs current bidding increments (see [HA.com/c/ref/web-tips.zx#guidelines-increments](http://www.ha.com/c/ref/web-tips.zx#guidelines-increments)).

Current Bid .....	Bid Increment	Current Bid .....	Bid Increment
< \$10 .....	\$1	\$10,000 - \$19,999 .....	\$1,000
\$10 - \$49 .....	\$2	\$20,000 - \$49,999 .....	\$2,000
\$50 - \$99 .....	\$5	\$50,000 - \$99,999 .....	\$5,000
\$100 - \$199 .....	\$10	\$100,000 - \$199,999 .....	\$10,000
\$200 - \$499 .....	\$20	\$200,000 - \$499,999 .....	\$20,000
\$500 - \$999 .....	\$50	\$500,000 - \$999,999 .....	\$25,000
\$1,000 - \$1,999 .....	\$100	\$1,000,000 - \$1,999,999 .....	\$50,000
\$2,000 - \$4,999 .....	\$200	\$2,000,000 - \$9,999,999 .....	\$100,000
\$5,000 - \$9,999 .....	\$500	>= \$10,000,000 .....	\$200,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment (“Cut Bid”) only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A “Minimum Bid” is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN “Minimum Bids” ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE “Minimum Bid”, THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. “Minimum Bids” are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the

“Minimum Bid” for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in “Good Faith” when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in “Good Faith.” Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

## Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes “good funds”: checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer.
25. Lots you purchase may be subject to taxes or fees imposed by various foreign taxing agencies. You are responsible for paying all foreign imposed taxes whether VAT, GST, etc. prior to delivery unless other arrangements are made in writing. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Should state sales tax become applicable in the state for delivery prior to delivery of the property on the invoice, the bidder agrees to pay all applicable state sales tax as required by the delivery state as of the shipping date. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

**Delivery, Shipping, and Handling Charges:**

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.xz for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item's hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:
- a. **Scope of Transit Services:** Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide a Secure Location to which the items will be delivered. NOTICE: **Auctioneer is neither an insurance company nor a common carrier of any type.**
- b. **Auctioneer's Compensation for Transit Services:** Auctioneer will provide transit services to Buyer for ¼ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
- c. **Auctioneer's Limitation of Liability for Transit Services:** You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**
35. It shall be the responsibility for the successful Bidder to arrange pick-up or shipping in a timely manner (within 10 days). Held Lots will be subject to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 20% Seller's Commission.
36. A. NOTICE OF CITES COMPLIANCE: The purchase of items made from protected species: Any property made of or incorporating endangered or protected species or wildlife may have import and/or export restrictions established by the Convention of International Trade in Endangered Species of Wild Fauna and Flora (CITES) in various countries and domestically. Plant and animal properties include (but are not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, alligator, lizard, or other wildlife. These items may not be available to ship internationally or, in some cases, domestically. Domestic bans and restrictions exist in these states: 1) California state law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California. 2) Fossil Ivory is currently banned or restricted in 5 U.S. states: New York, New Jersey, California, Hawaii, and New Mexico. By placing a bid, the bidder acknowledges that he or she is aware of any restriction in their country or place of residence and takes responsibility for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment or afford them the capacity to void their purchase or payment. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or failure to mark lots containing protected or regulated species. For further assistance, please contact client services at 1-800-872-6467.
36. B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.
36. C. Auctioneer shall not be liable for any loss caused by or resulting from:
- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles.
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

**Cataloging, Warranties, and Disclaimers:**

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. No statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. Any employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

**Release:**

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, cause of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity,

typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

**Dispute Resolution and Arbitration Provision:**

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administered by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

**Miscellaneous:**

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

**State Notices:**

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

## Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature® Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcgs.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency and PMG may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 10470, Peoria, IL 61612-0470. Third-party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the noncertified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions, call the Credit department at 877-HERITAGE (437-4824) or email: CreditDept@HA.com.

### Notice as to an Auction in New York City:

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

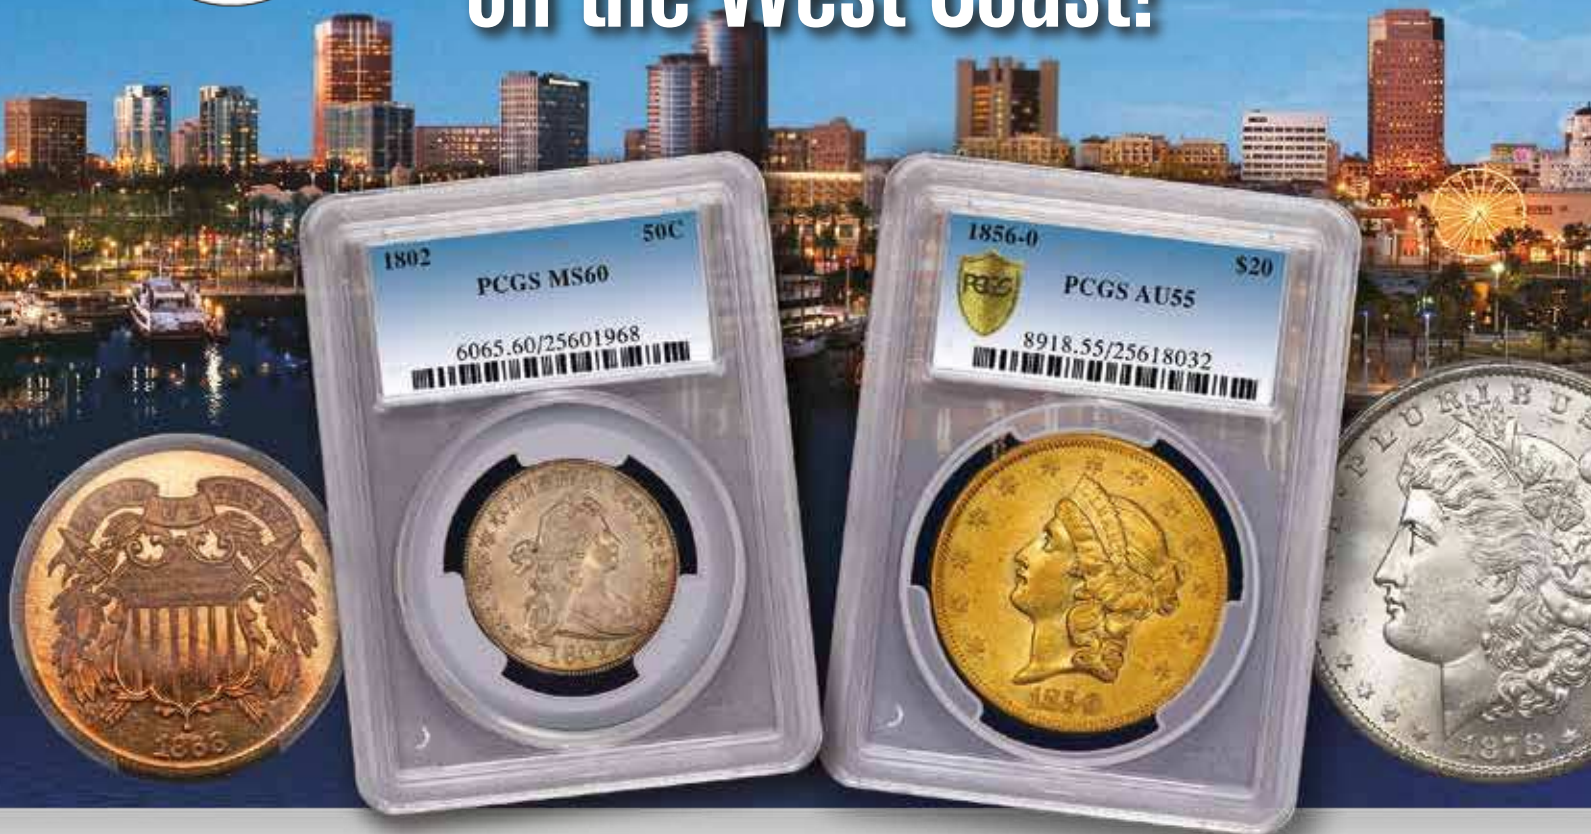

All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21, which states: The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

# "The best aspect of my experience

was the honesty and knowledge possessed by Jill Burgum. Her ability to be forthright in giving an honest estimate and understanding market conditions as they relate to the opening bid and final hammer price.

I want you to know I am extremely satisfied with the service I received from Jill and the entire Heritage team."

– David P. | Alabama
